Chuy's Holdings, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements

(Tabular dollar amounts in thousands, except share and per share data)

1. Basis of Presentation

Chuy's Holdings, Inc. (the "Company" or "Chuy's") develops and operates Chuy's restaurants throughout the United States. Chuy's is a fast-growing, full-service restaurant concept offering a distinct menu of authentic, freshly-prepared Mexican and Tex-Mex inspired food. As of September 30, 2018, the Company operated 98 restaurants in 19 states. In the opinion of management, the accompanying unaudited condensed consolidated financial statements and the related notes reflect all adjustments, consisting only of normal recurring adjustments, necessary to present fairly the Company's financial position, results of operations and cash flows for the periods presented. The unaudited condensed consolidated financial statements have been prepared in accordance with Generally Accepted Accounting Principles ("GAAP"), except that certain information and notes have been condensed or omitted pursuant to rules and regulations of the Securities and Exchange Commission (the "SEC"). Results for interim periods are not necessarily indicative of the results that may be expected for the full fiscal year. The unaudited condensed consolidated financial statements should be read in conjunction with consolidated financial statements and notes included in the Company's Annual Report on Form 10-K for the fiscal year ended December 31, 2017. The accompanying condensed consolidated balance sheet as of December 31, 2017, has been derived from our audited consolidated financial statements. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect certain reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses for the period. Actual results could differ from those estimates.

The Company operates on a 52- or 53- week fiscal year that ends on the last Sunday of the calendar year. Each quarterly period has 13 weeks, except for a 53-week year when the fourth quarter has 14 weeks. Our 2018 fiscal year consists of 52 weeks and our 2017 fiscal year consisted of 53 weeks.

2. Recent Accounting Pronouncements

Leases

In February 2016, the Financial Accounting Standards Board ("FASB") issued Accounting Standards Update ("ASU") 2016-02, "Leases (Topic 842)." This update requires a lessee to recognize on the balance sheet the right-of-use assets and lease liabilities for leases with a lease term of more than twelve months. This update also requires additional disclosures about the amount, timing, and uncertainty of cash flows arising from leases. This ASU is effective for interim and annual periods beginning after December 15, 2018 and requires a modified retrospective approach to adoption for leases existing at, or entered into after the beginning of the earliest comparative period presented in the financial statements, with certain practical expedients available. In July 2018, the FASB issued ASU 2018-11, "Leases (Topic 842) - Targeted Improvements," which provides another transition method that allows entities to apply the new lease standard at the adoption date and recognize a cumulative-effect adjustment to the opening balance of retained earnings in the period of adoption. This transition method option is in addition to the existing transition method of using a modified retrospective transition approach for leases existing at, or entered into after, the beginning of the earliest comparative period presented in the financial statements.

We anticipate electing the transition method option to apply the standard as of the effective date and therefore, we will not apply the standard to the comparative periods presented in our financial statements. We also anticipate taking advantage of the transition package of three practical expedients permitted within the standard, which among other things, allows the carryforward of historical lease classifications, and evaluating other practical expedients available and policy elections.

We had operating leases with remaining rental payments of approximately \$404.7 million as of December 31, 2017. The discounted minimum remaining rental payments will be the starting point for determining the assets and liabilities for the rights and obligations created by those leases. While the Company is still evaluating the impact on its consolidated financial statements, we expect the adoption of this standard will have a significant impact on the Company's consolidated balance sheet as we will recognize the right-of-use assets and liabilities for current operating leases. Our calculations of the impact are dependent on a number of key assumptions including discount rates and

other factors such as the number of leases commenced, renewed or expired as of effective date of the guidance. We do not expect a significant impact on the consolidated statement of income or cash flows and overall liquidity. In preparation for the adoption of the guidance, the Company will implement controls and key systems changes to enable the preparation of financial information.

Revenue Recognition

The Company adopted ASU 2014-09, "Revenue with Contracts from Customers (Topic 606)," in the first quarter of 2018. The comparative financial information has not been restated and continues to be reported under the accounting standards in effect for those periods. The adoption of this ASU was immaterial to the Company's consolidated financial statements.

Table of Contents

Chuy's Holdings, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

(Tabular dollar amounts in thousands, except share and per share data)

The Company's revenue is mainly comprised of food and beverage sales. Proceeds from the sale of gift cards are recorded as deferred revenue at the time of sale and recognized as revenue upon redemption by the customer. ASU 2014-09 does not have an impact on revenue recognition related to food and beverage sales. However, it requires gift card breakage to be recognized as revenue proportionate to the pattern of gift card redemptions. Under the previous guidance, the Company determined breakage when the likelihood of redemption of a gift card by a customer was remote. The Company continues to record gift card breakage as a component of revenue.

The Company reviewed all other recently issued accounting pronouncements and concluded that they were either not applicable or not expected to have a significant impact on the Company's consolidated financial statements.

3. Net (Loss) Income Per Share

The number of shares and net (loss) income per share data for all periods presented are based on the historical weighted-average shares of common stock outstanding.

Basic net (loss) income per share of the Company's common stock is computed by dividing net (loss) income by the weighted-average number of shares of common stock outstanding for the period.

Diluted net (loss) income per share of the Company's common stock is computed on the basis of the weighted-average number of shares of common stock plus the effect of dilutive potential shares of common stock equivalents outstanding during the period using the treasury stock method for dilutive options and deferred shares (these deferred shares were granted under the Chuy's Holdings, Inc. 2012 Omnibus Equity Incentive Plan (the "2012 Plan"), and are referred to herein as "restricted stock units"). For the thirteen weeks ended September 30, 2018 and September 24, 2017, there were approximately 1,300 and 100,000 shares, respectively, of common stock equivalents that were excluded from the calculation of diluted net (loss) income per share because their inclusion would have been anti-dilutive. For the thirty-nine weeks ended September 30, 2018 and September 24, 2017, there were approximately 2,600 and 32,000 shares, respectively, of common stock equivalents that were excluded from the calculation of diluted net (loss) income per share because their inclusion would have been anti-dilutive.

The computation of basic and diluted (loss) income per share is as follows:

	Thirteen Weeks Ended		Thirty-Nine Weeks Ended	
	September 30, 2018	September 24, 2017	September 30, 2018	September 24, 2017
BASIC				
Net (loss) income	\$(7,510)	\$ 3,195	\$2,129	\$ 13,074
Weighted-average common shares outstanding	16,948,701	16,905,705	16,940,716	16,886,743
Basic net (loss) income per common share	\$(0.44)	\$ 0.19	\$0.13	\$ 0.77
DILUTED				
Net (loss) income	\$(7,510)	\$ 3,195	\$2,129	\$ 13,074
Weighted-average common shares outstanding	16,948,701	16,905,705	16,940,716	16,886,743
Dilutive effect of stock options and restricted stock units	165,489	81,089	140,594	111,570
Weighted-average of diluted shares	17,114,190	16,986,794	17,081,310	17,098,313
Diluted net (loss) income per common share	\$(0.44)	\$ 0.19	\$0.12	\$ 0.77

4. Stock-Based Compensation

The Company has outstanding awards under the Chuy's Holdings, Inc. 2006 Stock Option Plan (the "2006 Plan") and the 2012 Plan. The 2006 Plan was terminated by the board effective July 27, 2012, and no further awards may be granted under the plan after such date. However, the termination of the 2006 Plan did not affect outstanding awards granted. Options granted under these plans vest over five years from the date of grant and have a maximum term of 10 years. Restricted stock units granted under the 2012 Plan vest over four to five years from the date of grant. As of September 30, 2018, a total of 496,379 shares of common stock are reserved and remain available for issuance under the 2012 Plan.

Table of Contents

Chuy's Holdings, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

(Tabular dollar amounts in thousands, except share and per share data)

Stock-based compensation expense recognized in the accompanying condensed consolidated income statements was approximately \$811,000 and \$747,000 for the thirteen weeks ended September 30, 2018 and September 24, 2017, respectively, and approximately \$2,368,000 and \$2,102,000 for the thirty-nine ended September 30, 2018 and September 24, 2017, respectively.

Stock Options

A summary of stock-based compensation activity related to stock options for the thirty-nine weeks ended September 30, 2018 are as follows:

	Shares	Weighted Average Exercise Price	Weighted Average Remaining Contractual Term (Years)	Aggregate Intrinsic Value
Outstanding at December 31, 2017	274,110	\$ 19.54		
Exercised	(25,745)	17.64		
Forfeited	(1,043)	31.59		
Outstanding at September 30, 2018	247,322	\$ 19.69	3.44	\$ 1,907
Exercisable at September 30, 2018	245,977	\$ 19.63	3.43	\$ 1,906

The aggregate intrinsic value in the table above is obtained by subtracting the exercise price from the estimated fair value of the underlying common stock as of September 30, 2018 and multiplying this result by the related number of options outstanding and exercisable at September 30, 2018. The estimated fair value of the common stock as of September 30, 2018 used in the above calculation was \$26.25 per share, the closing price of the Company's common stock on September 28, 2018, the last trading day of the third quarter. The total intrinsic value of options exercised during the thirty-nine weeks ended September 30, 2018 was approximately \$286,000. The fair value of options vested during the thirty-nine weeks ended September 30, 2018 was approximately \$260,000.

There was approximately \$8,000 of total unrecognized compensation expense related to options granted under the 2006 Plan and the 2012 Plan as of September 30, 2018. This expense will be recognized ratably over the next year.

Restricted Stock Units

A summary of stock-based compensation activity related to restricted stock units for the thirty-nine weeks ended September 30, 2018 are as follows:

	Shares	Weighted Average Fair Value	Weighted Average Remaining Contractual Term (Year)
Outstanding at December 31, 2017	258,486	\$ 29.64	
Granted	219,772	25.76	
Vested	(94,395)	30.87	
Forfeited	(9,007)	27.66	
Outstanding at September 30, 2018	374,856	\$ 27.10	2.91

The fair value of the restricted stock units is the quoted market value of our common stock on the date of grant. As of September 30, 2018, total unrecognized stock-based compensation expense related to non-vested restricted stock units was approximately \$8.3 million, which is expected to be recognized ratably over the next five years.

5. Long-Term Debt

Revolving Credit Facility

On November 30, 2012, the Company entered into a \$25.0 million Revolving Credit Facility with Wells Fargo Bank, National Association. On October 30, 2015, the Company entered into an amendment to its Revolving Credit Facility to, among other things, (1) extend the maturity date of the Revolving Credit Facility to October 30, 2020 from November 30, 2017 and (2)

Table of Contents

Chuy's Holdings, Inc.

Notes to Unaudited Condensed Consolidated Financial Statements (Continued)

(Tabular dollar amounts in thousands, except share and per share data)

revise the applicable margins and leverage ratios that determine the commitment fees and interest rates payable by the Company under the Revolving Credit Facility.

Under the Company's Revolving Credit Facility, the Company may request to increase the size of the Revolving Credit Facility by up to an additional \$25.0 million, in minimum principal amounts of \$5.0 million or the remaining amount of the \$25.0 million if less than \$5.0 million (the "Incremental Revolving Loan"), which Incremental Revolving Loan will be effective after 10 days written notice to the agent. In the event that any of the lenders fund the Incremental Revolving Loan, the terms and provisions of the Incremental Revolving Loan will be the same as under the Company's Revolving Credit Facility.

Borrowings under the Revolving Credit Facility generally bear interest at a variable rate based upon the Company's election, of (i) the base rate (which is the highest of prime rate, federal funds rate plus 0.5% or one month LIBOR plus 1.0%), or (ii) LIBOR, plus, in either case, an applicable margin based on the Company's consolidated total lease adjusted leverage ratio (as defined in the Revolving Credit Facility agreement). The Revolving Credit Facility also requires payment for commitment fees that accrue on the daily unused commitment of the lender at the applicable margin, which varies based on the Company's consolidated total lease adjusted leverage ratio.

The Revolving Credit Facility also requires compliance with a fixed charge coverage ratio, a lease adjusted leverage ratio and certain non-financial covenants. The Revolving Credit Facility also places certain restrictions on the payment of dividends and distributions. Under the Revolving Credit Facility, the Company may declare and make dividend payments so long as (i) no default or event of default has occurred and is continuing or would result therefrom and (ii) immediately after giving effect to any such dividend payment, on a pro forma basis, the lease adjusted leverage ratio does not exceed 3.50 to 1.00.

The obligations under the Company's Revolving Credit Facility are secured by a first priority lien on substantially all of the Company's assets. As of September 30, 2018 the Company had no borrowings under our Revolving Credit Facility.

6. Accrued Liabilities

The major classes of accrued liabilities at September 30, 2018 and December 31, 2017 are summarized as follows:

	September 30, 2018	December 31, 2017
Accrued compensation and related benefits	\$ 8,137	\$ 5,964
Other accruals	4,056	4,101
Sales and use tax	2,742	3,131
Deferred gift card revenue	1,332	2,098
Property tax	1,809	1,194
Total accrued liabilities	\$ 18,076	\$ 16,488

7. Share Repurchase Program

On October 26, 2017, the Company's board of directors approved a share repurchase program under which it authorized the Company, at its discretion, to repurchase up to \$30.0 million of its common stock through December 31, 2019. Repurchases of the Company's outstanding common stock will be made in accordance with applicable laws and may be made at management's discretion from time to time in the open market, through privately negotiated transactions or otherwise, including pursuant to Rule 10b5-1 trading plans. There is no guarantee as to the exact number of shares to be repurchased by the Company. The timing and extent of repurchases will depend upon several factors, including market and business conditions, regulatory requirements and other corporate considerations, and repurchases may be discontinued at any time.

We did not repurchase any shares of common stock during the thirteen weeks ended September 30, 2018. We repurchased approximately 65,000 shares of common stock during the thirty-nine weeks ended September 30, 2018 for \$1.6 million. As of September 30, 2018, we have \$28.4 million remaining to be repurchased under this plan.

8. Commitments and Contingencies

We are involved in various legal actions arising in the ordinary course of business. In the opinion of management, the ultimate disposition of these matters will not have a material adverse effect on our condensed consolidated financial position, results of operations, or cash flows.

Table of Contents

9. Impairment of Long-lived Assets

The Company reviews long-lived assets, such as property and equipment and intangibles, subject to amortization, for impairment when events or circumstances indicate the carrying value of the assets may not be recoverable. In determining the recoverability of the asset value, an analysis is performed at the individual restaurant level and primarily includes an assessment of historical undiscounted cash flows and other relevant factors and circumstances. The Company evaluates future cash flow projections in conjunction with qualitative factors and future operating plans and regularly reviews any restaurants with a deficient level of cash flows for the previous 24 months to determine if impairment testing is necessary. Recoverability of assets to be held and used is measured by a comparison of the carrying value of the restaurant to its estimated future undiscounted cash flows. If the estimated undiscounted future cash flows are less than the carrying value, we determine if there is an impairment loss by comparing the carrying value of the restaurant to its estimated fair value. Based on this analysis, if the carrying value of the restaurant exceeds its estimated fair value, an impairment charge is recognized by the amount by which the carrying value exceeds the fair value.

We make assumptions to estimate future cash flows and asset fair values. The estimated fair value is generally determined using the depreciated replacement cost method and discounted cash flow projections. Estimated future cash flows are highly subjective assumptions based on Company's projections and understanding of our business, historical operating results, and trends in sales and restaurant level operating costs.

As a result of above mentioned review process, during the third quarter of 2018 the Company identified six restaurants as impaired and recognized a \$12.3 million non-cash loss on asset impairment during the third quarter of 2018. The Company did not recognize an impairment charge during the fiscal year 2017.

The Company's impairment assessment process requires the use of estimates and assumptions regarding future cash flows and operating outcomes, which are based upon a significant degree of management judgment. The estimates used in the impairment analysis represent a Level 3 fair value measurement. The Company continues to assess the performance of restaurants and monitors the need for future impairment. Changes in the economic environment, real estate markets, capital spending and overall operating performance could impact these estimates and underlying assumptions and result in future impairment charges.

10. Subsequent events

Subsequent to September 30, 2018, the Company opened two new restaurants for a total of 100 restaurants in 19 states.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

The following discussion should be read in conjunction with our unaudited condensed consolidated financial statements and accompanying notes. Unless otherwise specified, or the context otherwise requires, the references in this report to "Chuy's," "our Company," "the Company," "us," "we" and "our" refer to Chuy's Holdings, Inc. together with its subsidiaries.

The following discussion contains, in addition to historical information, forward-looking statements as defined in the Private Securities Litigation Reform Act of 1995. We use words such as "anticipated", "believe", "could", "should", "estimate", "intend", "may", "consider", "predict", "project", "target", and other similar terms and phrases, including references to assumptions to identify forward looking statements. Our actual results may differ materially from those anticipated in these forward-looking statements as a result of certain factors, including changes in the economic environment, real estate markets, capital spending and our overall operating performance and those set forth under the heading "Risk Factors" in our Annual Report on Form 10-K for the year ended December 31, 2017 (our "Annual Report") and those set forth under "Cautionary Statement Concerning Forward-Looking Statements" in this report. Although we believe that the expectations reflected in the forward-looking statements are reasonable based on our current knowledge of our business and operations, we cannot guarantee future results, levels of activity, performance or achievements. We assume no obligation to provide revisions to any forward-looking statements should circumstances change, except as may be required by law.

The following discussion summarizes the significant factors affecting the consolidated operating results, financial condition, liquidity and cash flows of our Company as of and for the periods presented below. The following discussion and analysis should be read in conjunction with our Annual Report and the unaudited condensed consolidated financial statements and the accompanying notes thereto included herein.

Overview

We are a fast-growing, full-service restaurant concept offering a distinct menu of authentic, freshly-prepared Mexican and Tex-Mex inspired food. We were founded in Austin, Texas in 1982 and, as of September 30, 2018, we operated 98 Chuy's restaurants across 19 states.

We are committed to providing value to our customers through offering generous portions of made-from-scratch, flavorful Mexican and Tex-Mex inspired dishes. We also offer a full-service bar in all of our restaurants providing our customers a wide variety of beverage offerings. We believe the Chuy's culture is one of our most valuable assets, and we are committed to preserving and continually investing in our culture and our customers' restaurant experience. Our restaurants have a common décor, but we believe each location is unique in format, offering an "unchained" look and feel, as expressed by our motto "If you've seen one Chuy's, you've seen one Chuy's!" We believe our restaurants have an upbeat, funky, eclectic, somewhat irreverent atmosphere while still maintaining a family-friendly environment.

Our Growth Strategies and Outlook

Our growth is based primarily on the following strategies:

- Pursue new restaurant development in major markets;
- Backfill smaller existing markets to build brand awareness;
- Deliver consistent same store sales through providing high-quality food and service; and
- Leverage our infrastructure.

During the 13-week period ended September 30, 2018, we opened two new restaurants and we also opened two additional restaurants subsequent to September 30, 2018. We have an established presence in Texas, the Southeast and the Midwest, with restaurants in multiple large markets in these regions. Our growth plan over the next five years focuses on developing additional locations in major markets while continuing to "backfill" our existing core markets in order to build our brand awareness.

Performance Indicators

We use the following performance indicators in evaluating our performance:

- **Number of Restaurant Openings.** Number of restaurant openings reflects the number of restaurants opened during a particular fiscal period. For restaurant openings we incur pre-opening costs, which are defined below, before the restaurant opens. Typically, new restaurants open with an initial start-up period of higher than normalized sales volumes, which decrease to a steady level approximately six to 12 months after opening.

However, operating costs during this initial six to 12 month period are also higher than normal, resulting in restaurant operating margins that are generally lower during the start-up period of operation and increase to a steady level approximately nine to 12 months after opening.

Table of Contents

Comparable Restaurant Sales. We consider a restaurant to be comparable in the first full quarter following the 18th month of operations. Changes in comparable restaurant sales reflect changes in sales for the comparable group of restaurants over a specified period of time. Changes in comparable sales reflect changes in average weekly customer trends as well as changes in average check. Our comparable restaurant base consisted of 80 and 67 restaurants at September 30, 2018 and September 24, 2017, respectively.

Average Check. Average check is calculated by dividing revenue by total entrées sold for a given time period. Average check reflects menu price increases as well as changes in menu mix. Our management team uses this indicator to analyze trends in customers' preferences, effectiveness of menu changes and price increases and per customer expenditures.

Average Weekly Customers. Average weekly customers is measured by the number of entrées sold per week. Our management team uses this metric to measure changes in customer traffic.

Average Unit Volume. Average unit volume consists of the average sales of our comparable restaurants over a certain period of time. This measure is calculated by dividing total comparable restaurant sales within a period of time by the total number of comparable restaurants within the relevant period. This indicator assists management in measuring changes in customer traffic, pricing and development of our brand.

Operating Margin. Operating margin represents income from operations as a percentage of our revenue. By monitoring and controlling our operating margins, we can gauge the overall profitability of our Company.

The following table presents operating data for the periods indicated:

	Thirteen Weeks Ended September 30, 2018		Thirty-Nine Weeks Ended September 24, 2017	
Total restaurants (at end of period)	98	86	98	86
Total comparable restaurants (at end of period)	80	67	80	67
Average unit volumes (in thousands)	\$1,058	\$1,107	\$3,257	\$3,413
Change in comparable restaurant sales ⁽¹⁾	0.5	% (2.1)%	0.3	% (1.2)%
Average check	\$15.03	\$14.75	\$15.09	\$14.76

We consider a restaurant to be comparable in the first full quarter following the 18th month of operations. Change in comparable restaurant sales reflects changes in sales for the comparable group of restaurants over a specified period of time. Due to the inclusion of a 53rd week in fiscal 2017, there is a one-week calendar shift in the comparison of the third fiscal quarter of 2018 ended September 30, 2018, to the third fiscal quarter of 2017 ended September 24, 2017. As a result, our comparable restaurant sales calculation is based on comparing sales in the fiscal quarters of 2018 to sales in the corresponding calendar periods of 2017. Sales for the same 80 restaurants in the comparable restaurant base, on fiscal basis, decreased 0.4% for the fiscal thirteen week period ended September 30, 2018 and decreased 0.3% for the fiscal thirty-nine week period ended September 30, 2018.

Our Fiscal Year

We operate on a 52- or 53-week fiscal year that ends on the last Sunday of the calendar year. Each quarterly period has 13 weeks, except for a 53-week year when the fourth quarter has 14 weeks. Our 2018 fiscal year consists of 52 weeks and our 2017 fiscal year consisted of 53 weeks.

Key Financial Definitions

Revenue. Revenue primarily consists of food and beverage sales and also includes sales of our merchandise. Revenue is presented net of discounts associated with each sale. Revenue in a given period is directly influenced by the number of operating weeks in such period, the number of restaurants we operate and comparable restaurant sales growth.

Cost of Sales. Cost of sales consists of food, beverage and merchandise related costs. The components of cost of sales are variable in nature, change with sales volume and are subject to increases or decreases based on fluctuations in commodity costs.

Labor Costs. Labor costs include restaurant management salaries, front-and back-of-house hourly wages, restaurant-level manager bonus expense and payroll taxes.

Operating Costs. Operating costs consist primarily of restaurant-related operating expenses, such as supplies, utilities, repairs and maintenance, property insurance, travel, insurance, employee benefits, credit card fees, recruiting, delivery service and security. These costs generally increase with sales volume but decline as a percentage of revenue.

Table of Contents

Occupancy Costs. Occupancy costs include rent charges, both fixed and variable, as well as common area maintenance costs, property taxes, the amortization of tenant allowances and the adjustment to straight-line rent. These costs are generally fixed but a portion may vary with an increase in sales when the lease contains percentage rent.

General and Administrative Expenses. General and administrative expenses include costs associated with corporate and administrative functions that support our operations, including senior and supervisory management and staff compensation (including stock-based compensation) and benefits, travel, legal and professional fees, information systems, corporate office rent and other related corporate costs.

Marketing. Marketing costs include costs associated with our local restaurant marketing programs, community service and sponsorship activities, our menus and other promotional activities.

Restaurant Pre-opening Costs. Restaurant pre-opening costs consist of costs incurred before opening a restaurant, including manager salaries, relocation costs, supplies, recruiting expenses, initial new market public relations costs, pre-opening activities, employee payroll and related training costs for new employees. Restaurant pre-opening costs also include rent recorded during the period between date of possession and the restaurant opening date.

Depreciation and Amortization. Depreciation and amortization principally include depreciation on fixed assets, including equipment and leasehold improvements, and amortization of certain intangible assets for our restaurants.

Interest Expense. Interest expense consists primarily of interest on our outstanding indebtedness and the amortization of our debt issuance costs reduced by capitalized interest.

Results of Operations

Potential Fluctuations in Quarterly Results and Seasonality

Our quarterly operating results may fluctuate significantly as a result of a variety of factors, including the timing of new restaurant openings and related expenses, profitability of new restaurants, weather, increases or decreases in comparable restaurant sales, general economic conditions, consumer confidence in the economy, changes in consumer preferences, competitive factors, changes in food costs, changes in labor costs and changes in gas prices. In the past, we have experienced significant variability in restaurant pre-opening costs from quarter to quarter primarily due to the timing of restaurant openings. We typically incur restaurant pre-opening costs in the five months preceding a new restaurant opening. In addition, our experience to date has been that labor and direct operating costs associated with a newly opened restaurant during the first several months of operation are often materially greater than what will be expected after that time, both in aggregate dollars and as a percentage of restaurant sales. Accordingly, the number and timing of new restaurant openings in any quarter has had, and is expected to continue to have, a significant impact on quarterly restaurant pre-opening costs, labor and direct operating costs.

Our business is also subject to fluctuations due to seasonality and adverse weather. The spring and summer months have traditionally had higher sales volume than other periods of the year. Timing of holidays, severe winter weather, hurricanes, thunderstorms and similar conditions may impact restaurant unit volumes in some of the markets where we operate and may have a greater impact should they occur during our higher volume months. As a result of these and other factors, our financial results for any given quarter may not be indicative of the results that may be achieved for a full fiscal year.

Table of Contents

Thirteen Weeks Ended September 30, 2018 Compared to Thirteen Weeks Ended September 24, 2017

The following table presents, for the periods indicated, the condensed consolidated statement of operations (in thousands):

	Thirteen Weeks Ended							
	September 30, 2018	% of Revenue	September 24, 2017	% of Revenue	\$ Change	% Change

* Not meaningful

Revenue. Revenue increased \$9.0 million, or 9.7%, to \$101.2 million for the thirteen weeks ended September 30, 2018 from \$92.2 million for the comparable period in 2017. This increase was primarily driven by \$10.4 million in incremental revenue from an additional 144 operating weeks during the thirteen weeks ended September 30, 2018. This increase was partially offset by a decrease in our fiscal comparable restaurant sales as well as a decrease in sales related to our non-comparable restaurants that are not included in the incremental revenue discussed above. Revenue for non-comparable restaurants is historically lower as the restaurants transition out of the 'honeymoon' period that follows a restaurant's initial opening.

Due to the inclusion of a 53rd week in fiscal 2017, there is a one-week calendar shift in the comparison of the third fiscal quarter of 2018 to the third fiscal quarter of 2017. After adjusting for the timing of the 53rd week, comparable restaurant sales, on a calendar basis, increased 0.5% for the thirteen weeks ended September 30, 2018 compared to the thirteen weeks ended October 1, 2017. The increase in comparable restaurant sales was primarily driven by a 1.7% increase in average check, partially offset by a 1.2% decrease in average weekly customers. The Company estimates the unfavorable weather conditions during the third quarter of 2018 more than offset the favorable impact from lapping Hurricanes Harvey and Irma last year by approximately 30 basis points. Our total revenue mix attributed to bar sales was 18.3% during the thirteen weeks ended September 30, 2018 as compared to 18.4% during the comparable period in 2017.

On a fiscal basis, which does not adjust for the one-week calendar shift, as previously noted, sales for the same restaurants in the comparable restaurant base for the thirteen weeks ended September 30, 2018 decreased 0.4% compared to the thirteen weeks ended September 24, 2017.

Cost of Sales. Cost of sales as a percentage of revenue decreased to 25.6% during the thirteen weeks ended September 30, 2018 from 26.7% during the same period in 2017 primarily as a result of a decrease in the cost of produce of approximately 60 basis points, chicken of approximately 40 basis points, dairy and cheese of approximately 20 basis points, and beef of approximately 10 basis points. These decreases were partially offset by an increase in the cost of grocery of approximately 20 basis points.

Labor Costs. Labor costs as a percentage of revenue increased to 37.0% during the thirteen weeks ended September 30, 2018 from 35.2% during the comparable period in 2017, primarily due to new store labor inefficiencies, hourly labor rate inflation on comparable stores of approximately 3.6%, and higher hourly rates in new markets, partially offset by lower training expense for our new managers.

Table of Contents

Operating Costs. Operating costs as a percentage of revenue increased to 14.8% during the thirteen weeks ended September 30, 2018 from 14.3% during the comparable period in 2017. This increase is driven by higher insurance costs of approximately 30 basis points and higher credit card fees and delivery service charges of approximately 20 basis points.

Occupancy Costs. Occupancy costs as a percentage of revenue increased to 7.6% during the thirteen weeks ended September 30, 2018 from 7.0% during the comparable period in 2017, primarily as a result of higher rental expense at certain newly opened restaurants as we continue our expansion into larger markets and an increase in rent on extended lease terms at some existing restaurants.

General and Administrative Expenses. General and administrative expenses remained flat at \$4.8 million for the thirteen weeks ended September 30, 2018 as compared to the same period in 2017. As a percentage of revenue, general and administrative expenses decreased approximately 40 basis points compared to the same period last year.

Restaurant Pre-opening Costs. Restaurant pre-opening costs decreased by \$0.3 million or 20.1% to \$1.0 million during the thirteen weeks ended September 30, 2018 as compared to the same period in 2017. This decrease is primarily the result of timing differences in our development schedule. During the thirteen weeks ended September 30, 2018, we incurred pre-opening costs for six new restaurants, of which four will open in the fourth quarter of 2018 or later.

During the comparable period in 2017, we incurred pre-opening costs for eight new restaurants, of which six opened in the fourth quarter of 2017 or later.

Marketing. Marketing expense increased \$0.3 million or 45.4% to \$1.0 million during the thirteen weeks ended September 30, 2018 as compared to the same period in 2017. This increase was a result of our new national-level marketing initiatives.

Loss on asset impairment. As a result of our regular impairment analysis of under-performing restaurants the Company identified six restaurants as impaired during the third quarter of 2018 and recognized a non-cash loss of \$12.3 million (\$11.0 million, net of tax or \$0.64 per diluted share).

Depreciation and Amortization. Depreciation and amortization costs increased \$0.6 million to \$5.1 million during the thirteen weeks ended September 30, 2018 from \$4.5 million during the comparable period in 2017, primarily as the result of an increase in equipment and leasehold improvement costs associated with our new restaurants.

Income Tax Expense. For the thirteen weeks ended September 30, 2018 our effective tax rate decreased to approximately 17.1% tax benefit from approximately 23.4% tax expense during the comparable period in 2017. The tax benefit in the third quarter of 2018 was primarily due to the tax impact of the non-cash loss on asset impairment of \$1.3 million. Excluding the impact of the non-cash loss on asset impairment, the Company's effective tax rate decreased to a benefit of 6.7% during the third quarter of 2018 from an expense of 23.4% for the same period in 2017. The decrease in our effective tax rate for the quarter is primarily related to a decrease in the federal statutory tax rate from 35% to 21% effective January 1, 2018 and an increase in employee tax credits in proportion to our taxable income.

Net Loss. As a result of the foregoing, net loss was \$7.5 million during the thirteen weeks ended September 30, 2018 as compared to net income of \$3.2 million during the comparable period in 2017.

Table of Contents

Thirty-Nine Weeks Ended September 30, 2018 Compared to Thirty-Nine Weeks Ended September 24, 2017
The following table presents, for the periods indicated, the condensed consolidated statement of operations (in thousands):

	Thirty-Nine Weeks Ended							
	September 30, 2018	% of Revenue	September 24, 2017	% of Revenue	\$ Change	% Change		
Revenue	\$301,366	100.0 %	\$ 273,570	100.0 %	\$ 27,796	10.2 %

Income tax expense	(363)	(0.1) %	4,884	1.8 %	(5,247)	*		
Net income	\$2,129	0.6 %	\$ 13,074	4.8 %	\$(10,945)	(83.7) %		

* Not meaningful

Revenue. Revenue increased \$27.8 million, or 10.2%, to \$301.4 million for the thirty-nine weeks ended September 30, 2018 from \$273.6 million for the comparable period in 2017. This increase was primarily driven by \$31.6 million in incremental revenue from an additional 426 operating weeks during the thirty-nine weeks ended September 30, 2018. This increase was partially offset by a decrease in our fiscal comparable restaurant sales as well as a decrease in sales related to our non-comparable restaurants that are not included in the incremental revenue discussed above. Revenue for non-comparable restaurants is historically lower as the restaurants transition out of the 'honeymoon' period that follows a restaurant's initial opening.

There is a one-week calendar shift in the comparison of the thirty-nine weeks ended September 30, 2018 to the fiscal comparable period in 2017 due to the 53rd week in fiscal 2017. As a result of this shift, the week between Christmas and New Year's, traditionally a high-volume week for the Company's restaurants was included in the first quarter of 2017 but was replaced with an average volume week in the first quarter of 2018. This shift reduced revenue by an estimated \$1.4 million during the thirty-nine weeks ended September 30, 2018.

Adjusting for the timing of the 53rd week, comparable restaurant sales, on a calendar basis, increased 0.3% for the thirty-nine weeks ended September 30, 2018 compared to the thirty-nine weeks ended October 1, 2017. The increase in comparable restaurant sales was primarily driven by a 1.9% increase in average check, partially offset by a 1.6% decrease in average weekly customers. The Company estimates the comparable sales were negatively impacted by the unfavorable weather conditions during the thirty-nine weeks ended September 30, 2018 of approximately 60 basis points and approximately 10 basis points as a result of strategic cannibalization. Our total revenue mix attributed to bar sales was 18.7% during both the thirty-nine weeks ended September 30, 2018 and the comparable period in 2017.

On a fiscal basis, which does not adjust for the one-week calendar shift, as previously noted, sales for the same restaurants in the comparable restaurant base for the thirty-nine weeks ended September 30, 2018 decreased 0.3% compared to the thirty-nine weeks ended September 24, 2017.

Cost of Sales. Cost of sales as a percentage of revenue decreased to 25.4% during the thirty-nine weeks ended September 30, 2018 from 25.9% during the comparable period in 2017. This decrease is primarily attributed to a decrease in the cost of produce of approximately 30 basis points, chicken of approximately 20 basis points, dairy and cheese of approximately 10 basis points, partially offset by an increase in the cost of grocery of approximately 10 basis points.

Labor Costs. Labor costs as a percentage of revenue increased to 35.9% during the thirty-nine weeks ended September 30, 2018 from 34.3% during the comparable period in 2017, primarily due to new store labor inefficiencies, hourly labor rate inflation

Table of Contents

on comparable stores of approximately 3.2% and higher hourly rates in new markets, partially offset by lower training expense for our new managers.

Operating Costs. Operating costs as a percentage of revenue increased to 14.3% during the thirty-nine weeks ended September 30, 2018 from 14.0% during the comparable period in 2017 primarily due to increases in to-go supplies of approximately 10 basis points and delivery service charges of approximately 10 basis points, both mainly driven by an increase in to-go sales, higher utility and maintenance costs of approximately 10 basis points, an increase in insurance costs of approximately 10 basis points, partially offset by a decrease in liquor taxes of approximately 10 basis points as we expand outside of Texas.

Occupancy Costs. Occupancy costs as a percentage of revenue increased to 7.4% during the thirty-nine weeks ended September 30, 2018 from 6.9% during the comparable period in 2017, primarily as a result of higher rental expense at certain newly opened restaurants as we continue our expansion into larger markets and an increase in rent on extended lease terms at some existing restaurants.

General and Administrative Expenses. General and administrative expenses increased \$1.1 million, or 7.8%, to \$15.5 million for the thirty-nine weeks ended September 30, 2018 from \$14.4 million during the comparable period in 2017. As a percentage of revenue, general and administrative expenses decreased to 5.1% during thirty-nine weeks ended September 30, 2018 from 5.3% during the same period last year. The dollar increase was primarily driven by an increase in management salaries and equity compensation of \$0.9 million due to both additional headcount to support our growth, higher travel costs of \$0.1 million and a \$0.1 million increase in professional fees and public company costs.

Restaurant Pre-opening Costs. Restaurant pre-opening costs decreased \$0.3 million, or 8.4% to \$3.7 million for the thirty-nine weeks ended September 30, 2018 compared to the same period in 2017. This decrease is primarily the result of timing differences in our development schedule. During the thirty-nine weeks ended September 30, 2018, we incurred pre-opening costs for eleven new restaurants, of which four will open in the fourth quarter of 2018 or later. During the comparable period in 2017, we incurred pre-opening costs for 13 new restaurants, of which four opened in the fourth quarter of 2017 or later.

Marketing. Marketing expense increased \$1.1 million or 55.9% to \$3.2 million during the thirty-nine weeks ended September 30, 2018 as compared to the same period in 2017. This increase was a result of our new national-level marketing initiatives.

Loss on asset impairment. As a result of our regular impairment analysis of under-performing restaurants the Company identified six restaurants as impaired during the third quarter of 2018 and recognized a non-cash loss of \$12.3 million (\$11.0 million, net of tax or \$0.64 per diluted share).

Depreciation and Amortization. Depreciation and amortization costs increased \$1.7 million, or 13.5% to \$14.7 million during the thirty-nine weeks ended September 30, 2018 from \$13.0 million during the comparable period in 2017, primarily as the result of an increase in equipment and leasehold improvement costs associated with our new restaurants.

Income Tax Expense. For the thirty-nine weeks ended September 30, 2018 our effective tax rate decreased to 20.6% tax benefit from 27.2% tax expense during the comparable period in 2017. The tax benefit in the third quarter of 2018 was primarily due to the tax impact of the non-cash loss on asset impairment of \$1.3 million. Excluding the impact of the non-cash loss on asset impairment, the Company's effective tax rate decreased to 6.9% during the thirty-nine weeks ended September 30, 2018 from 27.2% for the same period in 2017. The decrease in our effective tax rate for the quarter is primarily related to a decrease in the federal statutory tax rate from 35% to 21% effective January 1, 2018 and an increase in employee tax credits in proportion to our taxable income.

Net Income. As a result of the foregoing, net income decreased 83.7% to \$2.1 million during the thirty-nine weeks ended September 30, 2018 from \$13.1 million during the comparable period in 2017.

Liquidity

Our principal sources of cash are net cash provided by operating activities, which includes tenant improvement allowances from our landlords, and borrowings under our \$25.0 million Revolving Credit Facility. Our need for capital resources is driven by our restaurant expansion plans, ongoing maintenance of our restaurants, investment in our corporate and information technology infrastructure and obligations under our operating leases. Based on our

current growth plans, we believe our expected cash flows from operations, expected tenant improvement allowances and available borrowings under our Revolving Credit Facility will be sufficient to finance our planned capital expenditures and other operating activities for at least the next twelve months.

Consistent with many other restaurant and retail chain store operations, we use operating lease arrangements to operate our restaurants. We believe that these operating lease arrangements provide appropriate leverage of our capital structure in a financially efficient manner. We have entered into operating leases with certain related parties with respect to six of our restaurants and our corporate headquarters.

On October 26, 2017, the Company's board of directors approved a share repurchase program under which it authorized the Company, at its discretion, to repurchase up to \$30.0 million of its common stock through December 31, 2019. Repurchases of

Table of Contents

the Company's outstanding common stock will be made in accordance with applicable laws and may be made at management's discretion from time to time in the open market, through privately negotiated transactions or otherwise, including pursuant to Rule 10b5-1 trading plans. There is no guarantee as to the exact number of shares to be repurchased by the Company. The timing and extent of repurchases will depend upon several factors, including market and business conditions, regulatory requirements and other corporate considerations, and repurchases may be discontinued at any time. As of September 30, 2018, we have \$28.4 million remaining to be repurchased under this plan.

Our liquidity may be adversely affected by a number of factors, including a decrease in customer traffic or average check per customer due to changes in economic conditions.

Cash Flows for Thirty-Nine Weeks Ended September 30, 2018 and September 24, 2017

The following table summarizes the statement of cash flows for the thirty-nine weeks ended September 30, 2018 and September 24, 2017 (in thousands):

	Thirty-Nine Weeks Ended	
	September 30, 2018	September 24, 2017
Net cash provided by operating activities	\$38,849	\$34,327
Net cash used in investing activities	(34,872)	(30,290)
Net cash used in financing activities	(1,949)	(330)
Net increase in cash and cash equivalents	2,028	3,707
Cash and cash equivalents at beginning of year	8,785	13,694
Cash and cash equivalents at end of period	\$10,813	\$17,401

Operating Activities. Net cash provided by operating activities increased \$4.5 million to \$38.8 million for the thirty-nine weeks ended September 30, 2018 from \$34.3 million during the comparable period in 2017. Our business is almost exclusively a cash business. Almost all of our receipts come in the form of cash and cash equivalents and a large majority of our expenditures are paid within a 30 day period. The increase in net cash provided by operating activities was primarily due to a \$1.4 million increase in deferred lease incentives as a result of the addition of new restaurants; a \$3.0 million increase in accrued liabilities and deferred rent mainly driven by a favorable change in hourly payroll cycle during the third quarter of 2018; and a \$2.1 million decrease in accounts receivable mainly as a result of a collection of an insurance settlement accrued as of the end of the fourth quarter of 2017. This total increase of \$6.5 million was partially offset by a \$1.7 million increase in tax receivable as a result of lower statutory tax rates.

Investing Activities. Net cash used in investing activities increased \$4.6 million to \$34.9 million for the thirty-nine weeks ended September 30, 2018 from \$30.3 million during the comparable period in 2017. The increase was primarily due to the timing of our construction schedule and the related construction payments associated with our seven new restaurants that opened during the thirty-nine weeks ended September 30, 2018, as well as expenditures related to future restaurant openings, maintaining our existing restaurants and other projects.

Financing Activities. Net cash used in financing activities increased by \$1.6 million to \$1.9 million for the thirty-nine weeks ended September 30, 2018 from \$0.3 million during the comparable period in 2017. The increase was primarily due to \$1.6 million repurchase of shares of our common stock in the open market during the thirty-nine weeks ended September 30, 2018.

As of September 30, 2018, we lease six of our restaurant locations and our corporate offices from entities owned by our founders and one former executive officer. We had no other financing transactions, arrangements or other relationships with any unconsolidated affiliates or related parties. Additionally, we had no financing arrangements involving synthetic leases or trading activities involving commodity contracts.

Capital Resources

Long-Term Capital Requirements

Our capital requirements are primarily dependent upon the pace of our growth plan and resulting new restaurants. Our growth plan is dependent upon many factors, including economic conditions, real estate markets, restaurant locations and the nature of our lease agreements. Our capital expenditure outlays are also dependent on maintenance and

remodel costs in our existing restaurants as well as information technology and other general corporate capital expenditures.

The capital resources required for a new restaurant depends on whether the restaurant is a ground-up construction or a conversion. For our new restaurant openings during 2018, our cost of a conversion or ground-up buildout requires a total cash investment of approximately \$2.6 million to \$3.6 million (net of estimated tenant incentives of between zero and \$1.0 million). In addition, we

Table of Contents

expect to spend approximately \$470,000 to \$490,000 per restaurant for restaurant pre-opening costs. We currently target a cash-on-cash return beginning in the third operating year of 30.0%, and a sales to investment ratio of 1.9:1 for our new restaurants.

For 2018, we currently estimate capital expenditure outlays will range between \$34.0 million and \$37.0 million, net of agreed upon tenant improvement allowances and excluding approximately \$4.3 million to \$4.4 million of restaurant pre-opening costs for new restaurants that are not capitalized. We spent \$3.7 million on pre-opening costs during the thirty-nine weeks ended September 30, 2018. These capital expenditure estimates are based on average new restaurant capital expenditures of \$2.9 million (net of estimated tenant improvement allowances) for the opening of nine new restaurants and \$8.7 million to maintain and remodel our existing restaurants and for general corporate purposes. Based on our growth plans, we believe our combined expected cash flows from operations, available borrowings under our Revolving Credit Facility and expected tenant improvement allowances will be sufficient to finance our planned capital expenditures and other operating activities in fiscal 2018.

Short-Term Capital Requirements

Our operations have not required significant working capital and, like many restaurant companies, we generally operate with negative working capital. Restaurant sales are primarily paid for in cash or by credit card, and restaurant operations do not require significant inventories or receivables. In addition, we receive trade credit for the purchase of food, beverages and supplies, therefore reducing the need for incremental working capital to support growth. We had a net working capital deficit of \$3.4 million at September 30, 2018 compared to a surplus of \$0.9 million at December 31, 2017.

Revolving Credit Facility

On November 30, 2012, we entered into our \$25.0 million Revolving Credit Facility with Wells Fargo Bank, National Association. On October 30, 2015, we entered into an amendment to our Revolving Credit Facility to, among other things, (1) extend the maturity date of the Revolving Credit Facility to October 30, 2020 from November 30, 2017 and (2) revise the applicable margins and leverage ratios that determine the commitment fees and interest rates payable by the Company under the Revolving Credit Facility. As of September 30, 2018, we had no outstanding indebtedness under our Revolving Credit Facility.

Under our Revolving Credit Facility, we may request to increase the size of our Revolving Credit Facility by up to \$25.0 million, in minimum principal amounts of \$5.0 million or the remaining amount of the \$25.0 million if less than \$5.0 million (the "Incremental Revolving Loan"), the Incremental Revolving Loan will be effective after 10 days written notice to the agent. In the event that any of the lenders fund the Incremental Revolving Loan, the terms and provisions of the Incremental Revolving Loan will be the same as under our Revolving Credit Facility.

Borrowings under the Revolving Credit Facility generally bear interest at a variable rate based upon our election, of (i) the base rate (which is the highest of prime rate, federal funds rate plus 0.5% or one month LIBOR plus 1.0%), or (ii) LIBOR, plus, in either case, an applicable margin based on our consolidated total lease adjusted leverage ratio (as defined in the Revolving Credit Facility agreement). Our Revolving Credit Facility also requires payment for commitment fees that accrue on the daily unused commitment of the lender at the applicable margin, which varies based on our consolidated total lease adjusted leverage ratio. In addition, the Revolving Credit Facility requires compliance with a fixed charge coverage ratio, a lease adjusted leverage ratio and certain non-financial covenants as well as places certain restrictions on the payment of dividends and distributions. Under the Revolving Credit Facility, Chuy's may declare and make dividend payments so long as (i) no default or event of default has occurred and is continuing or would result therefrom and (ii) immediately after giving effect to any such dividend payment, on a pro forma basis, the lease adjusted leverage ratio does not exceed 3.50 to 1.00.

The obligations under the Company's long-term debt are secured by a first priority lien on substantially all of the Company's assets.

Contractual Obligations

There have been no material changes to our contractual obligations from what was previously disclosed in our Annual Report filed with the SEC.

Off-Balance Sheet Arrangements

As of September 30, 2018, we are not involved in any variable interest entities transactions and do not otherwise have any off-balance sheet arrangements.

Significant Accounting Policies

Except as set forth below, there have been no material changes to the significant accounting policies from what was previously disclosed in our Annual Report filed with the SEC.

Table of Contents

Impairment of Long-lived Assets

The Company reviews long-lived assets, such as property and equipment and intangibles, subject to amortization, for impairment when events or circumstances indicate the carrying value of the assets may not be recoverable. In determining the recoverability of the asset value, an analysis is performed at the individual restaurant level and primarily includes an assessment of historical undiscounted cash flows and other relevant factors and circumstances. The Company evaluates future cash flow projections in conjunction with qualitative factors and future operating plans and regularly reviews any restaurants with a deficient level of cash flows for the previous 24 months to determine if impairment testing is necessary. Recoverability of assets to be held and used is measured by a comparison of the carrying value of the restaurant to its estimated future undiscounted cash flows. If the estimated undiscounted future cash flows are less than the carrying value, we determine if there is an impairment loss by comparing the carrying value of the restaurant to its estimated fair value. Based on this analysis, if the carrying value of the restaurant exceeds its estimated fair value, an impairment charge is recognized by the amount by which the carrying value exceeds the fair value.

We make assumptions to estimate future cash flows and asset fair values. The estimated fair value is generally determined using the depreciated replacement cost method and discounted cash flow projections. Estimated future cash flows are highly subjective assumptions based on Company's projections and understanding of our business, historical operating results, and trends in sales and restaurant level operating costs.

The Company's impairment assessment process requires the use of estimates and assumptions regarding future cash flows and operating outcomes, which are based upon a significant degree of management judgment. The estimates used in the impairment analysis represent a Level 3 fair value measurement. The Company continues to assess the performance of restaurants and monitors the need for future impairment. Changes in the economic environment, real estate markets, capital spending, overall operating performance could impact these estimates and underlying assumptions and result in future impairment charges.

Recent Accounting Pronouncements

For information regarding new accounting pronouncements, see Note 2, Recent Accounting Pronouncements in the notes to our unaudited condensed consolidated financial statements.

Cautionary Statement Concerning Forward-Looking Statements

Forward-looking statements address matters that involve risks and uncertainties. Accordingly, there are or will be important factors that could cause our actual results to differ materially from those indicated in these statements. We believe that these factors include, but are not limited to, the following:

- the success of our existing and new restaurants;
- our ability to identify appropriate sites and develop and expand our operations;
- our ability to manage our growth effectively;
- we operate most of our restaurants under long-term leases which we would be obligated to perform even if we closed our restaurants;
- we may not be able to renew leases;
- changes in economic conditions;
- damage to our reputation or lack of acceptance of our brand in existing or new markets;
- our expansion into markets that we are unfamiliar with;
- economic and other trends and developments, including adverse weather conditions, in the local or regional areas in which our restaurants are located and specifically in Texas where a large percentage of our restaurants are located;
- the impact of negative economic factors, including the availability of credit, on our landlords and surrounding tenants;
- changes in food availability and costs;
- labor shortages and increases in our labor costs, including as a result of changes in government regulation such as the adoption of federal health care legislation;
- food safety and food borne illness concerns;
- increased competition in the restaurant industry and the segments in which we compete;
- the impact of legislation and regulations regarding nutritional information, and new information or attitudes regarding diet and health or adverse opinions about the health of consuming our menu offerings;

Table of Contents

the impact of federal, state and local beer, liquor and food service regulations;
 the impact of litigation;
 the success of our marketing programs;
 the impact of new restaurant openings, including the effect on our existing restaurants when opening new restaurants in the same markets;
 the loss of key members of our management team;
 strain on our infrastructure and resources caused by our growth;
 the inadequacy of our insurance coverage and fluctuating insurance requirements and costs;
 the impact of our indebtedness on our ability to invest in the ongoing needs of our business;
 our ability to obtain debt or other financing on favorable terms or at all;
 the impact of a potential requirement to record asset impairment charges in the future;
 the impact of security breaches of confidential customer information in connection with our electronic processing of credit and debit card transactions;
 inadequate protection of our intellectual property;
 the failure of our information technology system or the breach of our network security;
 a major natural or man-made disaster;
 our increased costs and obligations as a result of being a public company;
 the failure of our internal control over financial reporting;
 the impact of federal, state and local tax laws;
 volatility in the price of our common stock;
 the timing and amount of repurchases of our common stock, if any, changes to the Company's expected liquidity position and the possibility that the repurchase program may be suspended or discontinued;
 the impact of future sales of our common stock and the exercise of stock options and any additional capital raised by us through the sale of our common stock;
 the impact of a downgrade of our shares by securities analysts or industry analysts, the publication of negative research or reports, or lack of publication of reports about our business;
 the effect of anti-takeover provisions in our charter documents and under Delaware law;
 the effect of our decision to not pay dividends for the foreseeable future;
 the effect of changes in accounting principles applicable to us;
 our ability to raise capital in the future;
 the conflicts of interest that may arise with some of our directors; and
 the other risks discussed under "Item 1A. Risk Factors" in our Annual Report.

The foregoing factors should not be construed as exhaustive and should be read together with the other cautionary statements included in this report and in our Annual Report. If one or more of these or other risks or uncertainties materialize, or if our underlying assumptions prove to be incorrect, actual results may differ materially from what we anticipate. Any forward-looking statements you read in this report reflect our views as of the date of this report with respect to future events and are subject to these and other risks, uncertainties and assumptions relating to our operations, results of operations, growth strategy and liquidity. We assume no obligation to provide revisions to any forward-looking statements should circumstances change, except as may be required by law.

Table of Contents

Item 3. Quantitative and Qualitative Disclosures About Market Risk

There have been no material changes to our quantitative and qualitative disclosures about market risk from what was previously disclosed in our Annual Report filed with the SEC.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our principal executive officer and principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) as of the end of the period covered by this report. Based on this evaluation, our principal executive officer and principal financial officer concluded that our disclosure controls and procedures (as defined in Rule 13a-15(e) of the Exchange Act) were effective as of the end of the period covered by this report.

The design of any system of control is based upon certain assumptions about the likelihood of future events, and there can be no assurance that any design will succeed in achieving its stated objectives under all future events, no matter how remote, or that the degree of compliance with the policies or procedures may not deteriorate. Because of its inherent limitations, disclosure controls and procedures may not prevent or detect all misstatements. Accordingly, even effective disclosure controls and procedures can only provide reasonable assurance of achieving their control objectives.

Changes in Internal Control over Financial Reporting

There have been no changes in our internal control over financial reporting (as such term is defined in Rule 13a-15(f) under the Exchange Act) that occurred during our most recent fiscal quarter that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

Table of Contents

Part II—Other Information

Item 1. Legal Proceedings

Occasionally, we are a party to various legal actions arising in the ordinary course of our business including claims resulting from “slip and fall” accidents, employment related claims and claims from customers or employees alleging illness, injury or other food quality, health or operational concerns. None of these types of litigation, most of which are covered by insurance, has had a material effect on us in the past. As of the date of this report, we are not a party to any material pending legal proceedings and are not aware of any claims that could have a materially adverse effect on our financial position, results of operations or cash flows.

Item 1A. Risk Factors

There have been no material changes from the risk factors previously disclosed in our most recent Annual Report filed with the Securities and Exchange Commission.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The table below provides information with respect to our purchase of shares of our common stock during the three months ended September 30, 2018:

Period	Total Number of Shares Purchased (1)	Average Price Paid Per Share	Total number of shares purchased as part of publicly announced plans or programs	Approximate dollar value of shares that may yet be purchased under the plans or programs (in millions) (2)
July 2, 2018 through July 29, 2018	—	\$ —	—	\$ 28.4
July 30, 2018 through August 26, 2018	800	28.69	—	28.4
August 27, 2018 through September 30, 2018	—	—	—	28.4
Total	800	\$ 28.69	—	

(1) To satisfy tax withholding obligations associated with the vesting of restricted stock units during the third quarter of 2018, we withheld a total of 800 shares that are included in the total number of shares purchased column above.

(2) On November 2, 2017, we announced that our Board of Directors authorized us to repurchase an indeterminate number of our common stock through December 31, 2019 at an aggregate market value of up to \$30.0 million.

Item 3. Defaults Upon Senior Securities

None.

Item 4. Mine Safety Disclosures

None.

Item 5. Other Information

None.
