Additional Information:

Consolidated Ratio of Earnings to Fixed Charges

The information contained in the Prospectus under the caption "Consolidated Ratio of Earnings to Fixed Charges" is hereby amended, as follows:

Year Ended December 31,

<u>2005</u>	<u>2006</u>	<u>2007</u>	<u>2008</u>	<u>2009</u>
1.66	1.63	1.56	1.24	0.85

For purposes of computing the consolidated ratio of earnings to fixed charges, earnings consist of net earnings adjusted for the provision for income taxes, noncontrolling interests, discontinued operations and undistributed earnings of equity investees.

Fixed charges consist of interest and discount on all indebtedness and one-third of rentals, which is considered to be representative of the interest factor of such rentals.

As set forth above, GE Capitals ratio of earnings to fixed charges declined to 0.85:1 during 2009 due to lower pre-tax earnings due to lower pre-tax earnings at GE Capital, which were primarily driven by higher provisions for losses on financing receivables in connection with the challenging economic environment. As of December 31, 2009, the amount of earnings needed to achieve a one-to-one ratio of earnings to fixed charges was \$2,693 Million.
