EOG RESOURCES, INC.

Item 7.01 Regulation FD Disclosure.

I. Price Risk Management

(a) With the objective of enhancing the certainty of future revenues, from time to time EOG Resources, Inc. (EOG) enters into New York Mercantile Exchange related financial commodity collar and price swap contracts. EOG accounts for these financial commodity derivative contracts using the mark-to-market accounting method. In addition to financial transactions, EOG is a party to various physical commodity contracts for the sale of hydrocarbons that cover varying periods of time and have varying pricing provisions. The financial impact of physical commodity contracts is included in revenues at the time of settlement, which in turn affects average realized hydrocarbon prices.

(b) For the fourth quarter of 2006, EOG anticipates a total gain of \$31.5 million from both natural gas and crude oil financial price swap contracts. During the fourth quarter of 2006, net cash inflow was \$48.2 million, all related to settled natural gas financial price swap contracts.

II. Natural Gas Financial Collar Contracts and Natural Gas Financial Price Swap Contracts

(a) For the fourth quarter of 2006, EOG anticipates a gain of \$27.0 million from natural gas financial price swap contracts. During the fourth quarter of 2006, the net cash inflow related to settled natural gas financial price swap contracts was \$48.2 million.

(b) Since EOG filed its Quarterly Report on Form 10-Q on November 1, 2006, EOG has entered into additional natural gas financial price swap contracts covering notional volumes of 15,000 million British thermal units per day (MMBtud) for the period January 2007 through December 2007 at an average price of \$8.50 per million British thermal units (MMBtu). Currently, EOG is not a party to any financial collar contracts. The average price of EOG's natural gas financial price swap contracts is \$9.61 per MMBtu. Presented below is a comprehensive summary of EOG's natural gas financial price swap contracts as of January 4, 2007.

### III. Crude Oil Financial Price Swap Contracts

(a) For the fourth quarter of 2006, EOG anticipates a gain of \$4.5 million from crude oil financial price swap contracts.

(b) EOG has not entered into any additional crude oil financial price swap contracts since EOG filed its Quarterly Report on Form 10-Q on November 1, 2006, which provided an update of all such financial contracts as of that date. The average price of EOG's crude oil financial price swap contracts is \$78.22 per barrel. Presented below is a comprehensive summary of EOG's crude oil financial price swap contracts as of January 4, 2007, with prices expressed in dollars per barrel (\$/Bbl) and notional volumes in barrels per day (Bbld).

### IV. Forward-Looking Statements

This document includes forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical facts, including, among others, statements regarding EOG's future financial position, business strategy, budgets, reserve information, projected levels of production, projected costs and plans and objectives of management for future

operations, are forward-looking statements. EOG typically uses words such as "expect," "anticipate," "estimate," "strategy," "intend," "plan," "target" and "believe" or the negative of those terms or other variations of them or by comparable terminology to identify its forward-looking statements. In particular, statements, express or implied, concerning future operating results, the ability to replace or increase reserves or to increase production, or the ability to generate income or cash flows are forward-looking statements. Forward-looking statements are not guarantees of performance. Although EOG believes its expectations reflected in forward-looking statements are based on reasonable assumptions, no assurance can be given that these expectations will be achieved. Important factors that could cause actual results to differ materially from the expectations reflected in the forward-looking statements include, among others: the timing and extent of changes in commodity prices for crude oil, natural gas and related products, foreign currency exchange rates and interest rates; the timing and impact of liquefied natural gas imports and changes in demand or prices for ammonia or methanol; the extent and effect of any hedging activities engaged in by EOG; the extent of EOG's success in discovering, developing, marketing and producing reserves and in acquiring oil and gas properties; the accuracy of reserve estimates, which by their nature involve the exercise of professional judgment and may therefore be imprecise; the availability and cost of drilling rigs, experienced drilling crews, materials and equipment used in well completions, and tubular steel; the availability, terms and timing of governmental and other permits and rights of way; the availability of pipeline transportation capacity; the availability of compression uplift capacity; the extent to which EOG can economically develop its Barnett Shale acreage outside of Johnson County, Texas; whether EOG is successful in its efforts to more densely develop its acreage in the Barnett Shale and other production areas; political developments around the world; acts of war and terrorism and responses to these acts; weather; and financial market conditions. In light of these risks, uncertainties and assumptions, the events anticipated by EOG's forward-looking statements might not occur. Forward-looking statements speak only as of the date made and EOG undertakes no obligation to update or revise its forward-looking statements, whether as a result of new information, future events or otherwise.
