GAIN FROM OUR PERSPECTIVE (R)

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

Franklin Templeton's distinct multi-manager structure combines the specialized expertise of three world-class investment management groups-- Franklin, Templeton and Mutual Series.

SPECIALIZED EXPERTISE

Each of our portfolio management groups operates autonomously, relying on its own research and staying true to the unique investment disciplines that underlie its success.

FRANKLIN. Founded in 1947, Franklin is a recognized leader in fixed income investing and also brings expertise in growth-and value-style U.S. equity investing.

TEMPLETON. Founded in 1940, Templeton pioneered international investing and, in 1954, launched what has become the industry's oldest global fund. Today, with offices in over 25 countries, Templeton offers investors a truly global perspective.

MUTUAL SERIES. Founded in 1949, Mutual Series is dedicated to a unique style of value investing, searching aggressively for opportunity among what it believes are undervalued stocks, as well as arbitrage situations and distressed securities.

TRUE DIVERSIFICATION

Because our management groups work independently and adhere to different investment approaches, Franklin, Templeton and Mutual Series funds typically have distinct portfolios. That's why our funds can be used to build truly diversified allocation plans covering every major asset class.

RELIABILITY YOU CAN TRUST

At Franklin Templeton Investments, we seek to consistently provide investors with exceptional risk-adjusted returns over the long term, as well as the reliable, accurate and personal service that has helped us become one of the most trusted names in financial services.

WHAT IS A CURRENT ACCOUNT?

A current account is that part of the balance of payments where all of one country's international transactions in goods and services are recorded.

WHAT IS BALANCE OF PAYMENTS?

Balance of payments is a record of all of a country's exports and imports of goods and services, borrowing and lending with the rest of the world during a particular time period. It helps a country evaluate its competitive strengths and weaknesses and forecast the strength of its currency.

PERFORMANCE OVERVIEW

For the six months under review, Templeton Global Income Fund posted cumulative total returns of +8.26% based on market price and +5.86% based on net asset value. The Fund outperformed the J.P. Morgan (JPM) Global Government Bond Index (GGBI), which posted cumulative total returns of +1.40% in local currency terms and +2.46% in U.S. dollar terms for the same period. 1 You can find the Fund's long-term performance data in the Performance Summary on page 7.

ECONOMIC AND MARKET OVERVIEW

For the six months under review, global economies seemed resilient in the face of moderating U.S. economic conditions. In general, lower energy and commodity prices curbed inflation despite improved global growth rates and strong labor markets. Oil prices fell 19% from a high of \$77 per barrel in July to about \$62 per barrel at period-end, alleviating some of the pressure on oil importing countries. In the U.S., the trade deficit narrowed to \$59 billion by January 2007 from \$69 billion in August 2006. However, the magnitude of the adjustment was small compared with the overall size of the current account deficit, which was 5.8% of U.S. gross domestic product (GDP) in the fourth quarter of 2006, and continued to be heavily dependent on foreign inflows for financing. 2 Lower oil prices and an improved labor market also supported consumption growth, offsetting some of the weakness in the U.S. housing market. For 2006, U.S. GDP grew 3.3%, which was in line with its historical average. Underlying inflation pressures in the U.S. remained relatively high and the U.S. Federal Reserve Board left the federal funds target rate unchanged at 5.25% throughout the reporting period.

In Japan, structural economic improvement was most evident in the upward inflation trend, which in 2006, turned positive on a yearly basis for the first time since 1998. The Bank of Japan raised interest rates for the second time since ending its zero interest rate policy last year. Although Japan's GDP growth rate has been relatively volatile, the economy grew at a faster-than-average pace of 2.3% in 2006, increasingly supported by a revival in private consumption. 3 Other Asian economies also remained strong in the fourth quarter of 2006, with growth in Singapore of 7.9%, Indonesia 6.1% and

Malaysia 5.7%. 4 Increased intra-regional trade remained an important growth driver, and China continued to be an important source of demand for Asia's

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

exports of goods and services. While China allowed limited currency appreciation, it continued to accumulate international reserves that exceeded \$1 trillion in the reporting period, adding \$162.9 billion during the last four months of 2006. 5 The yuan rose 2.7% for the six months under review. 6

Supported by investment growth and external demand from Asia and other parts of Europe, Euro-zone economic growth notably accelerated, increasing 2.7% in 2006 from 1.5% in 2005. 7 Private consumption trends were more dynamic than in prior years, but weak real wage growth remained an impediment to stronger consumer spending. Labor markets improved and the unemployment rate dropped from 8.8% in early 2005 to 7.5% by the end of 2006. 7 The European Central Bank tightened its monetary policy, hiking interest rates 50 basis points (100 basis points equal one percentage point) to 3.50%. 7 Among non-euro European countries, economic growth was even better. In the fourth quarter of 2006, GDP growth in Slovakia was 9.6%, Poland 6.4%, Sweden 4.9% and Norway 4.5%. 7 Growth among these countries was broad based while inflation remained low, supported by lower energy prices and improved productivity growth. Despite low inflation, rapidly narrowing excess capacity led Norway and Sweden to hike rates 75 basis points each.

INVESTMENT STRATEGY

We invest selectively in bonds around the world to generate income for the Fund, seeking opportunities while monitoring changes in interest rates, currency exchange rates and credit risks.

MANAGER'S DISCUSSION

The Fund's total return was influenced by various factors, including interest rate developments, currency movements and exposure to sovereign debt markets.

INTEREST RATE STRATEGY

During the six months under review, the overall duration of the Fund's portfolio remained relatively short amid a backdrop of strong global growth rates and inflation and valuation concerns. However, we continued to find select interest rate opportunities determined by country-specific factors. For example, Indonesian bond market strength was driven primarily by a 250 basis point interest rate reduction during the period. The Fund benefited from its investments in domestic Indonesian bonds, which rose +13.19% in local currency terms, as measured by the HSBC Asian Local Bond Index (ALBI).⁹ In Brazil, improving inflation and credit fundamentals allowed the central bank to reduce interest rates 125 basis points and supported local currency returns of +20.32% in the JPM Global Bond Index-Emerging Markets (GBI-EM).¹⁰ Brazilian inflation declined from 8% in mid-2005 to 3% at period-end.¹¹ Brazilian real interest rates were high over the period and disinflation allowed the central bank to lower nominal rates to boost relatively slow aggregate growth. Consistent with our investment strategy, the Fund can invest across a wide spectrum of local bond markets and protect against currency risk.

CURRENCY STRATEGY

Global imbalances resulted in strong relative consumption growth and a large U.S. current account deficit, as well as low domestic demand and current account surpluses in Asia. Based on our view that these imbalances could gradually unwind over the medium term, we continued to position the portfolio for a weak U.S. dollar through a basket of Asian currencies. Over the period, the yen has taken on a greater role in the Fund's currency exposure and is now the single largest currency represented among a diversified portfolio despite an underweighted allocation compared with the Citigroup World Government Bond Index (WGBI) Index.¹² Japan's relatively low interest rate environment worked against the yen as it weakened 1.01% against the U.S. dollar during the review period.⁶ However, we continued to find yen valuations attractive and see room for the difference between Japan's interest rates and those of other major economies to narrow as the nation's structural

improvements continue to take hold. The Fund also maintained diversified exposure across several other Asian currencies. Among those other currencies, the Thai baht rose 10.72% against the U.S. dollar, despite investor uncertainty over capital controls instituted under the new government that came to power by

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

a coup in the fall of 2006. 6 Additionally, the Malaysian ringgit appreciated 5.08% against the U.S. dollar and the South Korean won rose 2.10%. 6

European currencies had mixed performance over the period. Although the Fund had limited direct exposure to the euro, it was positioned to benefit from euro appreciation through its investments in non-euro European currencies, which are sensitive to euro movements. This strategy worked well for the Fund as central European currencies outperformed the euro's 3.20% rise during the review period. 6 The Slovak koruna appreciated 12.95% as the nation's prospects improved for joining the European Union (EU) in 2009. 6 Additionally, Romania's successful entrance into the EU at the beginning of 2007 helped boost its currency 7.12%. 6 The Fund benefited from its exposure to the Polish zloty, which appreciated 4.14%, while Scandinavian currencies lagged, with the Norwegian krone and Swedish krona rising 3.09% and 2.63%. 6

The U.S. dollar rose 0.34% against its major trading partners, largely due to 5.36% depreciation of the Canadian dollar, which detracted from the Fund's relative performance. 6 However, we continued to find the Canadian dollar attractive given its low valuation and Canada's economic strength. For example, Canada's unemployment rate dropped to a 30-year low of 6.1% in February 2007, and it is the only major developed nation to run both a fiscal surplus and a current account surplus. 13

GLOBAL SOVEREIGN DEBT STRATEGY

The Fund also invested in investment-grade and sub investment-grade sovereign debt that as an asset class typically compensates for greater credit risk by offering higher yields relative to U.S. and European benchmark treasury curves. Despite rising U.S. interest rates, U.S. dollar-denominated emerging market debt generated a strong six-month return of +5.88% as measured by the JPM Emerging Markets Bond Index Global (EMBIG). 14 Sovereign interest rate spreads declined from 197 basis points at the beginning of the reporting period to 187 basis points by period-end. 15 Regionally, Latin American sovereign debt

Templeton Global Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES

Templeton Global Income Fund (the Fund) is registered under the Investment Company Act of 1940, as amended (the 1940 Act), as a non-diversified, closed-end investment company.

The following summarizes the Fund's significant accounting policies.

A. SECURITY VALUATION

Securities listed on a securities exchange or on the NASDAQ National Market System are valued at the last quoted sale price or the official closing price of the day, respectively. Over-the-counter securities and listed securities for which there is no reported sale are valued within the range of the most recent quoted bid and ask prices. Securities that trade in multiple markets or on multiple exchanges are valued according to the broadest and most representative market. Investments in open-end mutual funds are valued at the closing net asset value.

Corporate debt securities and government securities generally trade in the over-the-counter market rather than on a securities exchange. The Fund may utilize independent pricing services, quotations from bond dealers, and information with respect to bond and note transactions, to assist in determining a current market value for each security. The Fund's pricing services may use valuation models or matrix pricing which considers information with respect to comparable bond and note transactions, quotations from bond dealers, or by reference to other securities that are considered comparable in such characteristics as rating, interest rate and maturity date, option adjusted

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

spread models, prepayment projections, interest rate spreads and yield curves, to determine current value.

The Fund has procedures to determine the fair value of individual securities and other assets for which market prices are not readily available or which may not be reliably priced. Methods for valuing these securities may include: fundamental analysis, matrix pricing, discounts from market prices of similar securities, or discounts applied due to the nature and duration of restrictions on the disposition of the securities. Due to the inherent uncertainty of valuations of such securities, the fair values may differ significantly from the values that would have been used had a ready market for such investments existed. Occasionally, events occur between the time at which trading in a security is completed and the close of the NYSE that might call into question the availability (including the reliability) of the value of a portfolio security held by the Fund. If such an event occurs, the securities may be valued using fair value procedures, which may include the use of independent pricing services. All security valuation procedures are approved by the Fund's Board of Trustees.

Templeton Global Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

B. FOREIGN CURRENCY TRANSLATION

Portfolio securities and other assets and liabilities denominated in foreign currencies are translated into U.S. dollars based on the exchange rate of such currencies against U.S. dollars on the date of valuation. Purchases and sales of securities, income and expense items denominated in foreign currencies are translated into U.S. dollars at the exchange rate in effect on the transaction date. Occasionally, events may impact the availability or reliability of foreign exchange rates used to convert the U.S. dollar equivalent value. If such an event occurs, the foreign exchange rate will be valued at fair value using procedures established and approved by the Fund's Board of Trustees.

The Fund does not separately report the effect of changes in foreign exchange rates from changes in market prices on securities held. Such changes are included in net realized and unrealized gain or loss from investments on the Statement of Operations.

Realized foreign exchange gains or losses arise from sales of foreign currencies, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the recorded amounts of dividends, interest, and foreign withholding taxes and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains and losses arise from changes in foreign exchange rates on foreign denominated assets and liabilities other than investments in securities held at the end of the reporting period.

C. FOREIGN CURRENCY CONTRACTS

When the Fund purchases or sells foreign securities it may enter into foreign exchange contracts to minimize foreign exchange risk from the trade date to the settlement date of the transactions. A foreign exchange contract is an agreement between two parties to exchange different currencies at an agreed upon exchange

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

rate at a future date. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations.

The Fund may also enter into forward exchange contracts to hedge against fluctuations in foreign exchange rates or to gain exposure to certain foreign currencies. These contracts are valued daily by the Fund and the unrealized gains or losses on the contracts, as measured by the difference between the contractual forward foreign exchange rates and the forward rates at the reporting date, are included in the Statement of Assets and Liabilities. Realized and unrealized gains and losses on these contracts are included in the Statement of Operations.

The risks of these contracts include movement in the values of the foreign currencies relative to the U.S. dollar and the possible inability of the counterparties to fulfill their obligations under the contracts, which may be in excess of the amount reflected in the Statement of Assets and Liabilities.

Templeton Global Income Fund

NOTES TO FINANCIAL STATEMENTS (UNAUDITED) (CONTINUED)

1. ORGANIZATION AND SIGNIFICANT ACCOUNTING POLICIES (CONTINUED)

D. INCOME TAXES

No provision has been made for U.S. income taxes because it is the Fund's policy to qualify as a regulated investment company under the Internal Revenue Code and to distribute to shareholders substantially all of its taxable income and net realized gains.

Foreign securities held by the Fund may be subject to foreign taxation on interest income received. Foreign taxes, if any, are recorded based on the tax regulations and rates that exist in the foreign markets in which the Fund invests.

E. SECURITY TRANSACTIONS, INVESTMENT INCOME, EXPENSES AND DISTRIBUTIONS

Security transactions are accounted for on trade date. Realized gains and losses on security transactions are determined on a specific identification basis. Interest income and estimated expenses are accrued daily. Amortization of premium and accretion of discount on debt securities are included in interest income. Dividend income is recorded on the ex-dividend date. Distributions to shareholders are recorded on the ex-dividend date and are determined according to income tax regulations (tax basis). Distributable earnings determined on a tax basis may differ from earnings recorded in accordance with accounting principles generally accepted in the United States. These differences may be permanent or temporary. Permanent differences are reclassified among capital accounts to reflect their tax character. These reclassifications have no impact on net assets or the results of operations. Temporary differences are not reclassified, as they may reverse in subsequent periods.

Inflation-indexed bonds provide an inflation hedge through periodic adjustments in the security's interest rate and principal redemption value, by amounts corresponding to the current rate of inflation. Any such adjustments, including adjustments to principal redemption value, are recorded as interest income.

F. ACCOUNTING ESTIMATES

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the amounts of income and expenses during the reporting period. Actual results could differ from those estimates.

G. GUARANTEES AND INDEMNIFICATIONS

Under the Fund's organizational documents, its officers and trustees are indemnified by the Fund against certain liabilities arising out of the performance of their duties to the Fund. Additionally, in the normal course of business, the Fund enters into contracts with service providers that contain general indemnification clauses. The Fund's maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Fund that have not yet occurred. Currently, the Fund expects the risk of loss to be remote.

2. SHARES OF BENEFICIAL INTEREST

At February 28, 2007, there were an unlimited number of shares authorized (without par value). During the period ended February 28, 2007, 544,388 shares were issued for \$4,895,019 from reinvested distributions. During the year ended August 31, 2006, 66,994 shares were issued for \$600,550 from reinvested distributions.

The Fund's Board of Trustees previously authorized an open-market share repurchase program pursuant to which the Fund may purchase, from time to time, Fund shares in open-market transactions, at the discretion of management. This authorization remains in effect. Through February 28, 2007, the Fund had repurchased a total of 11,210,400 shares. During the periods ended August 31, 2006 and February 28, 2007, there were no share repurchases.

3. TRANSACTIONS WITH AFFILIATES

Franklin Resources, Inc. is the holding company for various subsidiaries that together are referred to as Franklin Templeton Investments. Certain officers and trustees of the Fund are also officers and/or directors of the following subsidiaries:

SUBSIDIARY	AFFILIATION
Franklin Advisers, Inc. (Advisers)	Investment manager
Franklin Templeton Services, LLC (FT Services)	Administrative manager

A. MANAGEMENT FEES

The Fund pays investment management fees to Advisers based on the average daily net assets of the Fund as follows:

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

ANNUALIZED FEE RATE	NET ASSETS
0.550%	Up to and including \$200 million
0.500%	Over \$200 million, up to and including \$1 billion

4. EXPENSE OFFSET ARRANGEMENT

The Fund has entered into an arrangement with its custodian whereby credits realized as a result of uninvested cash balances are used to reduce a portion of the Fund's custodian expenses. During the period ended February 28, 2007, there were no credits earned.

5. INCOME TAXES

For tax purposes, capital losses may be carried over to offset future capital gains, if any. At August 31, 2006, the capital loss carryforwards were as follows:

Capital loss carryforwards expiring in:	
2010	\$ 23,832,302
2011	4,209,282
	\$ 28,041,584
	\$ 28,041,584

At February 28, 2007, the cost of investments and net unrealized appreciation (depreciation) for income tax purposes were as follows:

Cost of investments	\$ 1,073,564,827
	\$ 1,073,564,827
Unrealized appreciation	\$ 74,556,192
Unrealized depreciation	(7,500,953)
	\$ 67,055,239
Net unrealized appreciation (depreciation)	\$ 67,055,239
	\$ 67,055,239

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

Net investment income differs for financial statement and tax purposes primarily due to differing treatments of foreign currency transactions, and bond discounts and premiums.

Net realized gains (losses) differ for financial statement and tax purposes primarily due to differing treatments of wash sales, foreign currency transactions, and bond discounts and premiums.

6. INVESTMENT TRANSACTIONS

Purchases and sales of investments (excluding short term securities) for the period ended February 28, 2007, aggregated \$233,313,378 and \$364,633,603, respectively.

8. CREDIT RISK

The Fund has 19.20% of its portfolio invested in below investment grade and comparable quality unrated high yield securities, which tend to be more sensitive to economic conditions than higher rated securities. The risk of loss due to default by the issuer may be significantly greater for the holders of high yielding securities because such securities are generally unsecured and are often subordinated to other creditors of the issuer.

9. CONCENTRATION OF RISK

Investing in foreign securities may include certain risks and considerations not typically associated with investing in U.S. securities, such as fluctuating currency values and changing local and regional economic, political and social conditions, which may result in greater market volatility. In addition, certain foreign securities may not be as liquid as U.S. securities.

10. INVESTMENTS IN FRANKLIN INSTITUTIONAL FIDUCIARY TRUST MONEY MARKET PORTFOLIO

The Fund may invest in the Franklin Institutional Fiduciary Trust Money Market Portfolio (the Sweep Money Fund), an open-end investment company managed by Advisers. Management fees paid by the Fund are reduced on assets invested in the Sweep Money Fund, in an amount not to exceed the management and administrative fees paid by the Sweep Money Fund.

11. REGULATORY AND LITIGATION MATTERS

As part of various investigations by a number of federal, state, and foreign regulators and governmental entities, including the Securities and Exchange Commission ("SEC"), relating to certain practices in the mutual fund industry, including late trading, market timing and marketing support payments to securities dealers who sell fund shares ("marketing support"), Franklin Resources, Inc. and certain of its subsidiaries (collectively, the "Company"), entered into settlements with certain of those regulators and governmental entities. Specifically, the Company entered into settlements with the SEC, among

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

others, concerning market timing and marketing support.

On June 23, 2006, the SEC approved the proposed plan of distribution for the marketing support settlement, and disbursement of the settlement monies to the designated funds, in accordance with the terms and conditions of that settlement and plan, was completed in September 2006. The Fund did not participate in that settlement.

The plan of distribution for the market timing settlement is currently under review by the SEC staff. After publication of notice of the plan and a 30-day comment period, the proposed plan of distribution will be submitted to the SEC for approval. Following the SEC's approval of the plan of distribution, with modifications as appropriate, distribution of the settlement monies will begin in accordance with the terms and conditions of the settlement and plan.

11. REGULATORY AND LITIGATION MATTERS (CONTINUED)

In addition, the Company, as well as most of the mutual funds within Franklin Templeton Investments and certain current or former officers, Company directors, fund directors, and employees, have been named in private lawsuits (styled as shareholder class actions, or as derivative actions on behalf of either the named funds or Franklin Resources, Inc.). The lawsuits relate to the industry practices referenced above, as well as to allegedly excessive commissions and advisory and distribution fees.

The Company and fund management believe that the claims made in each of the private lawsuits referenced above are without merit and intend to defend against them vigorously. The Company cannot predict with certainty the eventual outcome of these lawsuits, nor whether they will have a material negative impact on the Company. If it is determined that the Company bears responsibility for any unlawful or inappropriate conduct that caused losses to the Fund, it is committed to making the Fund or its shareholders whole, as appropriate.

12. NEW ACCOUNTING PRONOUNCEMENTS

In July 2006, the Financial Accounting Standards Board (FASB) issued FASB Interpretation No. 48, "Accounting for Uncertainty in Income Taxes -- an Interpretation of FASB Statement No. 109" ("FIN 48"), which clarifies the accounting for uncertainty in tax positions taken or expected to be taken in a tax return. FIN 48 provides guidance on the measurement, recognition, classification and disclosure of tax positions, along with accounting for the related interest and penalties. FIN 48 is effective for fiscal years beginning after December 15, 2006, and is to be applied to all open tax years as of the date of effectiveness. On December 22, 2006, the Securities and Exchange Commission extended the implementation date to no later than the last net asset value calculation in the first semi-annual reporting period in 2007. The Fund is currently evaluating the impact, if any, of applying the various provisions of FIN 48.

In September 2006, FASB issued FASB Statement No. 157, "Fair Value Measurement" ("SFAS 157"), which defines fair value, establishes a framework for measuring fair value, and expands disclosures about fair value measurements. SFAS 157 is effective for fiscal years beginning after November 15, 2007, and interim

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

periods within those fiscal years. The Fund believes the adoption of SFAS 157 will have no material impact on its financial statements.

DIVIDEND REINVESTMENT AND CASH PURCHASE PLAN

The Fund offers a Dividend Reinvestment and Cash Purchase Plan (the "Plan") with the following features:

Shareholders must affirmatively elect to participate in the Plan; share dividends and capital gains distributions will be reinvested automatically;

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

Mellon Investor Services, P.O. Box 3338, South Hackensack, NJ 07606-1938, will provide additional Plan information upon request.

Whenever the Fund declares dividends in either cash or shares of the Fund, if the market price is equal to or exceeds net asset value at the valuation date, the participant will receive the dividends entirely in shares at a price equal to the net asset value, but not less than 95% of the then current market price of the Fund's shares. If the market price is lower than net asset value or if dividends and/or capital gains distributions are payable only in cash, the participant will receive shares purchased on the New York Stock Exchange or otherwise on the open market.

A participant has the option of submitting additional cash payments to Mellon Bank, N.A. (the "Plan Administrator"), in any amounts of at least \$100, up to a maximum of \$5,000 per month, for the purchase of Fund shares for his or her account. These payments shall be made by check or money order payable to "Mellon Bank, N.A." and sent to Mellon Investor Services, P.O. Box 382009, Pittsburgh, PA 15250-8009, Attention: Templeton Global Income Fund. The Plan Administrator shall apply such payments (less a \$5.00 service charge and less a pro rata share of trading fees) to purchases of Fund shares on the open market.

The automatic reinvestment of dividends and/or capital gains does not relieve the participant of any income tax that may be payable on dividends or distributions.

Whenever shares are purchased on the New York Stock Exchange or otherwise on the open market, each participant will pay a pro rata portion of trading fees. Trading fees will be deducted from amounts to be invested. The Plan Administrator's fee for a sale of shares through the Plan are \$15.00 per transaction plus a \$0.12 per share trading fee.

A participant may withdraw from the Plan without penalty at any time by written notice to the Plan Administrator sent to Mellon Investor Services, P.O. Box 3338, South Hackensack, NJ 07606-1938. Upon withdrawal, the participant will receive, without charge, share certificates issued in the participant's name for all full shares held by the Plan Administrator; or, if the participant wishes, the Plan Administrator will sell the shares and send the proceeds to the participant, less a service charge of \$15.00 and less trading fees of \$0.12 per share.

DIRECT DEPOSIT SERVICE FOR REGISTERED SHAREHOLDERS

Cash distributions can now be electronically credited to a checking or savings account at any financial institution that participates in the Automated Clearing House ("ACH") system. The Direct Deposit service is provided for registered shareholders at no charge.

To enroll in the service, access your account online by going to www.melloninvestor.com/isd or dial 1-800-416-5585 (toll free) and follow the instructions. Direct Deposit will begin with the next scheduled distribution payment date following enrollment in the service.

ITEM 7. DISCLOSURE OF PROXY VOTING POLICIES AND PROCEDURES FOR CLOSED-END MANAGEMENT INVESTMENT COMPANIES.

The board of trustees of the Fund has delegated the authority to vote proxies related to the portfolio securities held by the Fund to the Fund's manager Franklin Advisers, Inc. in accordance with the Proxy Voting Policies and Procedures (Policies) adopted by the manager.

The manager has delegated its administrative duties with respect to the voting of proxies to the Proxy Group within Franklin Templeton Companies, LLC (Proxy Group), an affiliate and wholly owned subsidiary of Franklin Resources, Inc. All proxies received by the Proxy Group will be voted based upon the manager's instructions and/or policies.

To assist it in analyzing proxies, the manager subscribes to Institutional Shareholder Services (ISS), an unaffiliated third party corporate governance research service that provides in-depth analyses of shareholder meeting agendas, vote recommendations, recordkeeping and vote disclosure services. In addition, the manager subscribes to Glass, Lewis & Co., LLC (Glass Lewis), an unaffiliated third party analytical research firm, to receive analyses and vote recommendations on the shareholder meetings of publicly held U.S. companies. Although ISS' and/or Glass Lewis' analyses are thoroughly reviewed and considered in making a final voting decision, the manager does not consider recommendations from ISS, Glass Lewis or any other third party to be determinative of the manager's ultimate decision. The manager votes proxies solely in the interests of the Fund and its shareholders. As a matter of policy, the officers, directors/trustees and employees of the Fund, the manager and the Proxy Group will not be influenced by outside sources whose interests conflict with the interests of the Fund and its shareholders. Efforts are made to resolve all conflicts in the interests of the manager's clients. Material conflicts of interest are identified by the Proxy Group based upon analyses of client, broker and vendor lists, information periodically gathered from directors and officers, and information derived from other sources, including public filings. In situations where a material conflict of interest is identified, the Proxy Group will refer the matter, along with the recommended course of action by the manager to an interdepartmental Proxy Review Committee (which may include portfolio managers and/or research analysts employed by the manager), for evaluation and voting instructions. The Proxy Review Committee may defer to the voting recommendation of ISS, Glass Lewis or those of another independent third party provider of proxy services; or send the proxy directly to the Fund with a recommendation regarding the vote for approval. Where the Proxy Review Committee refers a matter to the Fund, it may rely upon the instructions of a representative of the Fund, such as the board of trustees or a committee of the board.

The recommendation of management on any issue is a factor which the manager considers in determining how proxies should be voted, but is not determinative of the manager's ultimate decision. As a matter of practice, the votes with

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

respect to most issues are cast in accordance with the position of the company's management. Each issue, however, is considered on its own merits, and the manager will not support the position of the company's management in any situation where it deems that the ratification of management's position would adversely affect the investment merits of owning that company's shares.

MANAGER'S PROXY VOTING POLICIES AND PRINCIPLES The manager has adopted general proxy voting guidelines, which are summarized below. These guidelines are not an exhaustive list of all the issues that may arise and the manager cannot anticipate all future situations. In all cases, each proxy will be considered based on the relevant facts and circumstances.

BOARD OF DIRECTORS. The manager supports an independent board of directors, and prefers that key committees such as audit, nominating, and compensation committees be comprised of independent directors. The manager will generally vote against management efforts to classify a board and will generally support proposals to declassify the board of directors. The manager may withhold votes from directors who have attended less than 75% of meetings without a valid reason. While generally in favor of separating Chairman and CEO positions, the manager will review this issue as well as proposals to restore or provide for cumulative voting on a case-by-case basis, taking into consideration factors such as the company's corporate governance guidelines or provisions and performance.

RATIFICATION OF AUDITORS OF PORTFOLIO COMPANIES. In light of several high profile accounting scandals, the manager will closely scrutinize the role and performance of auditors. On a case-by-case basis, the manager will examine proposals relating to non-audit relationships and non-audit fees. The manager will also consider, on a case-by-case basis, proposals to rotate auditors, and will vote against the ratification of auditors when there is clear and compelling evidence of accounting irregularities or negligence.

MANAGEMENT AND DIRECTOR COMPENSATION. A company's equity-based compensation plan should be in alignment with its shareholders' long-term interests. The manager believes that executive compensation should be directly linked to the performance of the company. The manager evaluates plans on a case-by-case basis by considering several factors to determine whether the plan is fair and reasonable, including the ISS quantitative model utilized to assess such plans and/or the Glass Lewis evaluation of the plans. The manager will generally oppose plans that have the potential to be excessively dilutive, and will almost always oppose plans that are structured to allow the repricing of underwater options, or plans that have an automatic share replenishment "evergreen" feature. The manager will generally support employee stock option plans in which the purchase price is at least 85% of fair market value, and when potential dilution is 10% or less.

Severance compensation arrangements will be reviewed on a case-by-case basis, although the manager will generally oppose "golden parachutes" that are considered to be excessive. The manager will normally support proposals that require a percentage of directors' compensation to be in the form of common stock, as it aligns their interests with those of shareholders. The manager will review on a case-by-case basis any shareholder proposals to adopt policies on expensing stock option plans.

ANTI-TAKEOVER MECHANISMS AND RELATED ISSUES. The manager generally opposes anti-takeover measures since they tend to reduce shareholder rights. On occasion, the manager may vote with management when the research analyst has concluded that the proposal is not onerous and would not harm the Fund or its shareholders' interests. The manager generally supports proposals that require shareholder rights' plans ("poison pills") to be subject to a shareholder vote and will closely evaluate such plans on a case-by-case basis to determine whether or not they warrant support. The manager will generally vote against any

Edgar Filing: TEMPLETON GLOBAL INCOME FUND - Form N-CSRS

proposal to issue stock that has unequal or subordinate voting rights. The manager generally opposes any supermajority voting requirements as well as the payment of "greenmail." The manager generally supports "fair price" provisions and confidential voting.

CHANGES TO CAPITAL STRUCTURE. The manager will review, on a case-by-case basis, proposals by companies to increase authorized shares and the purpose for the increase and proposals seeking preemptive rights. The manager will generally not vote in favor of dual-class capital structures to increase the number of authorized shares where that class of stock would have superior voting rights. The manager will generally vote in favor of the issuance of preferred stock in cases where the company specifies the voting, dividend, conversion and other rights of such stock and the terms of the preferred stock issuance are deemed reasonable.

MERGERS AND CORPORATE RESTRUCTURING. Mergers and acquisitions will be subject to careful review by the research analyst to determine whether each will be beneficial to shareholders. The manager will analyze various economic and strategic factors in making the final decision on a merger or acquisition. Corporate restructuring and reincorporation proposals are also subject to a thorough examination on a case-by-case basis.

SOCIAL AND CORPORATE POLICY ISSUES. The manager will generally give management discretion with regard to social, environmental and ethical issues, although the manager may vote in favor of those that are believed to have significant economic benefits or implications for the Fund and its shareholders.

GLOBAL CORPORATE GOVERNANCE. Many of the tenets discussed above are applied to proxy voting decisions for international companies. However, the manager must be more flexible in these instances and must be mindful of the varied market practices of each region.

The manager will attempt to process every proxy it receives for all domestic and foreign issuers. However, there may be situations in which the manager cannot process proxies, for example, where a meeting notice was received too late, or sell orders preclude the ability to vote. If a security is on loan, the manager may determine that it is not in the best interests of the Fund to recall the security for voting purposes. Also, the manager may abstain from voting under certain circumstances or vote against items such as "Other Business" when the manager is not given adequate information from the company.

Shareholders may view the complete Policies online at franklintempleton.com. Alternatively, shareholders may request copies of the Policies free of charge by calling the Proxy Group collect at 1-954-527-7678 or by sending a written request to: Franklin Templeton Companies, LLC, 500 East Broward Boulevard, Suite 1500, Fort Lauderdale, FL 33394, Attention: Proxy Group. Copies of the Fund's proxy voting records are available online at franklintempleton.com and posted on the SEC website at www.sec.gov and reflect the 12-month period beginning July 1, 2005, and ending June 30, 2006.

ITEM 11. CONTROLS AND PROCEDURES.

(A) EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES. The Registrant maintains disclosure controls and procedures that are designed to ensure that information required to be disclosed in the Registrant's filings under the Securities Exchange Act of 1934 and the Investment Company Act of 1940 is recorded, processed, summarized and reported within the periods specified in the rules and forms of the Securities and Exchange Commission. Such information is accumulated and communicated to the Registrant's management, including its principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure. The Registrant's management, including the principal executive officer and the principal financial officer, recognizes that any set of controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives.

Within 90 days prior to the filing date of this Shareholder Report on Form N-CSR, the Registrant had carried out an evaluation, under the supervision and with the participation of the Registrant's management, including the Registrant's principal executive officer and the Registrant's principal financial officer, of the effectiveness of the design and operation of the Registrant's disclosure controls and procedures. Based on such evaluation, the Registrant's principal executive officer and principal financial officer concluded that the Registrant's disclosure controls and procedures are effective.

(B) CHANGES IN INTERNAL CONTROLS. There have been no significant changes in the Registrant's internal controls or in other factors that could significantly affect the internal controls subsequent to the date of their evaluation in connection with the preparation of this Shareholder Report on Form N-CSR.
