European Car Rental Industry Leaders

Choose Magic Software's Technology

CarPro Systems Ltd. Announces Multiple Agreements

Totaling Approximately \$300,000

Or-Yehuda, Israel, (October 12th, 2004) Magic Software Enterprises (NASDAQ: MGIC), a leading provider of state-of-the-art development and integration technology, announced, that its subsidiary, CarPro Systems Ltd, has recently signed agreements and completed implementations for Europcar, Budget and Hertz. Collectively these deals total approximately \$300,000.

Among these wins is an agreement with Adria Plus, the representative of Europcar in Croatia, to computerize the rental activities of three Europcar companies in Serbia, Slovenia and Montenegro and allow them to interact with the Europcar Croatia system. Europcar offices in Croatia, Greece, Hungary and Malta already use RentPro.

RentPro, is designed to handle all aspects of rental management, and it contains more functionality than any other solution on the market. The embedded ERP philosophy and methodology provides an all-inclusive system to streamline business processes and optimize resources. RentPro and the other modules of the CarPro Suite are built using Magic Software's eDeveloper platform.

CarPro has recently completed an installation of RentPro with Budget Iceland. CarPro now holds a 70% market share in the Car Rental industry in Iceland, providing solutions to both Hertz and Budget.

Additionally, CarPro has completed the installation and implementation of RentPro for Hertz Serbia. The revenue from both the Hertz and Budget deals was recognized earlier this year. Selecting CarPro as our preferred supplier guarantees the stability and the growth path required by Hertz Serbia for its expansion, states Mr. Goran Djokovic, IT Manager for Putnik (the representatives of Hertz Serbia, a Uniworld company.) The rapid installation, professional training and seamless implementation provided by CarPro enabled Hertz Serbia to go live during the peak tourist summer season.

After intensive research, we concluded that CarPro Systems offered the only software capable of effectively monitoring the activities in all four countries that Europcar Croatia supports, through a shared database said Mr. Jablan Pesic, General Manager of Europcar Croatia. We strongly believe that the functionality and flexibility provided by CarPro Systems' RentPro software applications is a key ingredient in the efficiency and profitability of our company today.

There were a number of reasons for selecting CarPro Systems as our software solutions supplier, continued Mr. Pesic. One of the most critical is the strong and reliable relationship that has developed between our two companies. This relationship has enabled us to increase our rental fleet from 400 to more than 1000 vehicles, with plans to double our

fleet size over the next year.

Mordi Perl, CEO of CarPro Systems stated, These agreements and implementations reflects the positioning of CarPro Systems as a major solution provider for the European Rental Car Industry.

### **About CarPro Systems**

CarPro Systems, a subsidiary of Magic Software Enterprises, develops, markets and supports full Enterprise Resource Planning (ERP) software solutions for optimizing business processes at car rental and car leasing companies. CarPro produces comprehensive and modular, multi lingual and multi-currency software packages encompassing all aspects of the fleet management, car rental and car leasing business.
