Report of Independent Registered Public Accounting Firm

The SERP Administrative Committee
Intel Corporation 401(k) Savings Plan

We have audited the accompanying statements of net assets available for benefits of Intel Corporation 401(k) Savings Plan as of December 31, 2007 and 2006, and the related statement of changes in net assets available for benefits for the year ended December 31, 2007. These financial statements are the responsibility of the Plan's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. We were not engaged to perform an audit of the Plan's internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Plan's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the net assets available for benefits of the Plan at December 31, 2007 and 2006, and the changes in its net assets available for benefits for the year ended December 31, 2007, in conformity with U.S. generally accepted accounting principles.

Our audits were performed for the purpose of forming an opinion on the financial statements taken as a whole. The accompanying supplemental schedule of assets (held at end of year) as of December 31, 2007, is presented for purposes of additional analysis and is not a required part of the financial statements but is supplementary information required by the Department of Labor's Rules and Regulations for Reporting and Disclosure under the Employee Retirement Income Security Act of 1974. This supplemental schedule is the responsibility of the Plan's management. The supplemental schedule has been subjected to the auditing procedures applied in our audits of the financial statements and, in our opinion, is fairly stated in all material respects in relation to the financial statements taken as a whole.

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements

1. Description of the Plan

The following description of the Intel Corporation 401(k) Savings Plan (the Plan) provides only general information. Participants should refer to the plan document for a more complete description of the Plan's provisions.

General

The Plan is a defined contribution plan covering all eligible U.S. employees of Intel Corporation (the company). Eligible employees may participate in the Plan any time on or after their date of hire. The Plan was amended to require all employees who become eligible to participate on or after January 1, 2007, to be automatically enrolled in the Plan unless they make an affirmative election not to participate. Participants who are automatically enrolled will initially have 3% of their compensation withheld and deposited in the appropriate LifeStage Fund, which invests in varying percentages of equity securities and fixed-income debt instruments based on the participants' age.

The Plan is intended to be qualified under Section 401(a) of the U.S. Internal Revenue Code of 1986 (the Code), as amended, and is subject to the provisions of the Employee Retirement Income Security Act of 1974 (ERISA), as amended.

Trustee

The Bank of New York Mellon, N.A. (Mellon) is the Plan's trustee, and holds all investments of the Plan and the Intel Corporation Master Trust (the Master Trust).

Administration of the Plan

The Sheltered Employee Retirement Plan (SERP) Administrative Committee (as appointed by the Finance Committee of the company) is the fiduciary responsible for the general operation and administration of the Plan (but not management or control of Plan assets) and the Investment Policy Committee (as appointed by the Finance Committee of the company) is the fiduciary responsible for the management and control of Plan assets. The company is the plan sponsor, as defined by ERISA. Fidelity Investments Institutional Operations Company provides recordkeeping services with respect to the Plan.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

Contributions and Participant Accounts

Participant Contributions

Participants may contribute up to 50% (limited to certain percentages for highly compensated individuals) of their annual compensation on a before-tax basis, provided the amounts do not exceed the annual Internal Revenue Service (IRS) limit. Such contributions are withheld by the company from each participant's compensation and deposited in the appropriate fund in accordance with the participant's directives. Participants who are fifty years of age or older by the end of a particular plan year and have contributed the maximum 401(k) deferral amount allowed under the Plan for that year are eligible to contribute an additional portion of their annual compensation on a before-tax basis as catch-up contributions, up to the annual IRS limit. As of December 31, 2007, participants could elect to invest in any combination of the 72 different investment options offered under the Plan; however, effective November 1, 2006, participants may not elect to invest more than 20% of their account in the Intel Stock Fund. Participants may change their investment elections daily.

Subsequent to year-end, the Plan was amended to allow participants to make Roth 401(k) contributions. Effective January 1, 2008, participants can make pre-tax contributions, after-tax Roth 401(k) contributions, or a combination of both, up to the allowed annual IRS limit.

Participant Accounts

Separate accounts are maintained for each participant. The account balances are generally adjusted as follows:

Bi-weekly or semi-monthly for participant contributions.

Daily for a pro rata share of investment income or losses on the Plan's investments based on the ratio that each participant's account bears to the total of all such accounts.

ESOP Conversion

The Plan was amended effective January 1, 2007, to convert the Intel Stock Fund into an employee stock ownership plan (ESOP) in accordance with Code section 4975(e)(7). As such, participants will have the option to receive dividends on their shares of stock held in the Intel Stock Fund distributed in cash or reinvested within the Intel Stock Fund.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

Vesting

Participants are immediately 100% vested with respect to contributions to all investment options in the Plan, as well as the related earnings from such contributions.

Payment of Benefits

Participants are eligible for a distribution of Plan benefits upon termination of service, whether by disability, retirement, death or leaving the company. In the event of financial hardship (as defined by the Plan), participants may withdraw money from their Plan accounts while they are still employed. Upon termination of service, a participant or applicable beneficiary may elect to have benefits paid in a single lump-sum distribution or monthly annuity payments, or may request that the company make a direct transfer to another eligible retirement plan. Spousal consent may be required based on the value of the account balance or type of distribution.

Participants who elect monthly annuity payments will have the balance of their accounts transferred to the Intel Corporation Defined Benefit Pension Plan (Intel Pension Plan). A single annuity is paid to those participants based on the combined benefit under the terms of the two plans. There were transfers under this option of \$123,583 for the year ended December 31, 2007.

Participant Loans

All participants are permitted to obtain loans of up to 50% of their vested account balances in the Plan up to a maximum of \$50,000 when combined with all other loans from this Plan and the Intel Corporation Profit Sharing Retirement Plan (Intel Profit Sharing Plan). The participants' account balances secure their loans. The interest rate is based on the prime rate plus 1% as reported in *The Wall Street Journal* on the last business day of each month. The loan provisions are established by the SERP Administrative Committee and administered by the record keeper.

Participants may choose to obtain loans from either this Plan or the Intel Profit Sharing Plan. Repayments of loans are transferred to the participants' Plan and Intel Profit Sharing Plan accounts in the ratio in which such accounts provided funding for the loan.

Administrative Expenses

The company pays a portion of the expenses for administration of the Plan. All other administrative expenses are paid directly by the Plan.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

2. Summary of Significant Accounting Policies

Basis of Accounting

The accompanying financial statements are prepared on the accrual basis of accounting in accordance with U.S. generally accepted accounting principles.

Investment Valuation

A portion of the investments of the Plan are held in the Master Trust, which consists of the assets of the Plan, the Intel Profit Sharing Plan, and the Intel Pension Plan. The Master Trust includes multiple investment accounts, in which different combinations of the above-mentioned plans invest. Each participating plan shares in the assets and earnings of the master trust investment accounts (*see Note 3: Master Trust Investment Accounts*) are based on its respective interest in each master trust investment account. The Plan, along with the Intel Profit Sharing Plan, participates in one such investment account, the Stable Value Fund.

The Plan, either directly or through investment in the Stable Value Fund, holds investments in mutual funds, common collective trust funds, equity securities, fixed-income debt instruments and participant loans, all of which are stated at fair value as of the last day of the plan year. The fair value for securities traded on a national securities exchange or over-the-counter market is determined using the last reported sales price as of the valuation date. Mutual funds are valued at quoted market prices that represent the net asset values of shares held at year-end. Participation units in common collective trust funds are stated at their unit price based on the fair values of underlying assets in the funds on the last business day of the plan year. Participant loans are valued at their outstanding balances as of the last day of the plan year, which approximates fair value.

Within the Stable Value Fund, traditional Guaranteed Investment Contracts (GICs) and Variable Synthetic (VS) GICs are stated at estimated fair value, computed using discounted cash flows. Wrapper contracts related to Fixed Maturity Synthetic (FMS) GICs and Constant Duration Synthetic (CDS) GICs also held in the Stable Value Fund are stated at estimated fair value, based on a replacement cost determined by Standish Mellon Asset Management (Standish), the Stable Value Fund's investment manager. The Stable Value Fund is allocated to the Plan and the Intel Profit Sharing Plan based on each plan's proportionate share of the underlying assets.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

Effective January 1, 2006, the Plan adopted the requirements as described in Financial Accounting Standards Board (FASB) Staff Position (FSP) AAG INV-1 and SOP 94-4-1, *Reporting of Fully Benefit-Responsive Investment Contracts Held by Certain Investment Companies Subject to the AICPA Investment Company Guide and Defined-Contribution Health and Welfare and Pension Plans* (FSP AAG INV-1 and SOP 94-4-1). These requirements are effective for financial statements issued for periods ending after December 15, 2006. FSP AAG INV-1 and SOP 94-4-1 requires investment contracts held by a defined contribution plan to be reported at fair value. However, contract value is the relevant measurement attribute for that portion of the net assets available for benefits of a defined contribution plan attributable to fully benefit responsive investment contracts because contract value is the amount participants would receive if they were to initiate permitted transactions under the terms of the Plan. Contract value represents the cost plus contributions made under the contracts plus interest at the contract rates less withdrawals and administrative expenses. In particular, FSP AAG INV-1 and SOP 94-4-1 affected the presentation of the amounts related to the Plan's participation in the Stable Value Fund. The statements of net assets available for benefits present the fair value of the investment in the Stable Value Fund as well as the adjustment from fair value to contract value for the Plan's proportionate share of fully benefit responsive investment contracts within the Stable Value Fund. The statement of changes in net assets available for benefits is prepared on a contract value basis.

Income Recognition

Net investment income includes gains/(losses) realized on the sale of securities and unrealized appreciation/(depreciation) in the fair value of investments, which is the difference between the fair value of investments at the beginning and the end of the year.

Investment transactions are recognized as of their trade dates. Interest is accrued daily; dividends are accrued when declared.

Benefit Payments

Benefits are recorded when paid.

Contributions

Participant contributions are accrued when the participants' salary deferrals are made.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

Use of Estimates

The preparation of financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and judgments that affect the amounts reported in the financial statements and accompanying notes. Actual results could differ materially from management's estimates.

Recent Accounting Pronouncements

In September 2006, the FASB issued Statement of Financial Accounting Standards (SFAS) No. 157, Fair Value Measurements (SFAS No. 157). SFAS No. 157 defines fair value, establishes a framework for measuring fair value, and enhances fair value measurement disclosure. The measurement and disclosure requirements of SFAS No. 157 related to financial assets and financial liabilities are effective for the Plan beginning in 2008. The resulting fair values calculated under SFAS No. 157 after adoption may be different than the fair values that would have been calculated under previous guidance. The Plan is currently evaluating the impact that the adoption of SFAS No. 157 will have on the Plan's financial statements.

3. Master Trust Investment Accounts

Substantially all of the Plan's investments are in various participant-directed investments, included in Investments, at fair value in the statements of net assets available for benefits. A significantly smaller portion of the Plan's investments are in the Stable Value Fund. The value of the Plan's interest in the Stable Value Fund included in the statements of net assets available for benefits represents 81.0% of the net assets available for benefits of the Stable Value Fund at December 31, 2007 and 85.0% at December 31, 2006.

Table of ContentsIntel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

The Stable Value Fund's net assets available for benefits consisted of the following:

	December 31,	
	2007	2006
Assets		
Investments, at fair value:		
Common collective trusts	\$ 88,664,602	\$ 79,916,975
Fixed-income debt instruments	41,825,656	33,878,511
Traditional guaranteed investment contracts	4,566,104	9,505,596
Variable synthetic guaranteed investment contracts	2,548,880	2,508,397
Wrapper contracts	10,345	7,977
 Total investments, at fair value	 137,615,587	 125,817,456
 Interest and dividends receivable	 214,286	 493,341
 Total assets	 137,829,873	 126,310,797
Liabilities		
Investment advisory fees	64,515	29,636
 Net assets available for benefits, at fair value	 137,765,358	 126,281,161
 Adjustment from fair value to contract value for fully benefit responsive investment contracts	 767,032	 1,812,683
 Net assets available for benefits	 \$ 138,532,390	 \$ 128,093,844

The net investment income in the Stable Value Fund for the year ended December 31, 2007, was comprised of interest and dividends in the amount of \$6,002,804.

Table of ContentsIntel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)**4. Investments**

The fair value of individual investments that represent 5% or more of the fair value of the Plan's net assets available for benefits at year-end are as follows:

	December 31,	
	2007	2006
Mutual funds:		
American Funds EuroPacific Growth Fund	\$ 273,134,153	\$ 223,288,203
Fidelity Contrafund	\$ 307,508,515	\$ 258,121,401
Fidelity Growth Company Fund	\$ 237,491,103	\$ 205,895,490
Fidelity Low-Priced Stock Fund	\$ 295,440,026	\$ 324,443,235
Vanguard Institutional Index Fund	\$ 270,210,560	\$ 279,044,861
Common collective trust fund:		
EB Daily Liquidity Stock Index Fund	\$ 332,683,531	\$ 294,881,790
Common stock:		
Intel Corporation	\$ 487,531,923	\$ 447,663,383

During 2007, the Plan's investments (including investments purchased, sold, and held during the year) appreciated in fair value as follows:

	Year Ended December 31, 2007
Net realized and unrealized appreciation (depreciation) in fair value of investments:	
Mutual funds	\$ 43,673,301
Common collective trust funds	46,357,406
Intel common stock	126,735,251
Other common stock	185,710
Net realized and unrealized appreciation in fair value of investments	\$ 216,951,668

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

5. Investment Contracts

The Stable Value Fund holds investment contracts with insurance companies and banks in order to provide participants with a stable, fixed-rate return on investment and protection of principal from changes in market interest rates. Standish has discretionary authority for the purchase and sale of investments in the Stable Value Fund, subject to the general investment policies of the Investment Policy Committee.

The Traditional GICs crediting rate is based upon the rate that is agreed to when the insurance company writes the contract and is generally fixed for the life of the contract. The initial crediting rate for both the CDS GICs and the FMS GICs is set based on the market interest rates at the time that the initial asset is purchased and is guaranteed to have an interest crediting rate not less than zero percent. The CDS GICs crediting rate and the FMS GICs crediting rate reset every quarter based on the book value of the contract, the market value of the underlying assets, and the average duration of the underlying assets. The crediting rate for CDS GICs aims at converging the book value of the contract and the market value of the contract and therefore will be affected by interest rate and market changes. The VS GICs crediting rate is reset every quarter based on the then current market index rates and investment spread. The investment spread is established when the contract is issued and is guaranteed by the issuer for the life of the investment.

Certain events may limit the ability of the Stable Value Fund to transact at contract value with the issuers. Such events include the following:

- employer initiated events which are within the control of the plan sponsor that would have a material and adverse impact on the fund;

- employer communications designed to induce participants to transfer from the fund;

- competing fund transfer or violation of equity wash or equivalent rules in place; and

- changes in qualification status of the employer or the plans participating in the fund.

If any such event occurs, market value would likely be used in determining the payouts to the participants.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

In general, issuers may terminate the contract and settle at other than contract value if there is a change in the qualification status of the employer or the Plan, a breach of material obligations under the contract and misrepresentations by the contract holder, or a failure of the underlying portfolio to conform to the pre-established investment guidelines.

The FMS GICs and CDS GICs use wrapper contracts in order to manage market risks and to alter the return characteristics of the underlying portfolio of securities owned by the Stable Value Fund to match certain fixed income fund objectives. Wrapper contracts generally change the investment characteristics of underlying securities (such as corporate debt or U.S. government securities) to those of traditional GICs. The wrapper contracts provide that benefit-responsive distributions for specific underlying securities may be withdrawn at contract or face value. Benefit-responsive distributions are generally defined as a withdrawal on account of a participant's retirement, disability, or death, or participant-directed transfers in accordance with the terms of the Plan.

The investment contracts owned by the Stable Value Fund earned the following average yields:

	Years Ended December 31,	
	2007	2006
Earned by the Plan	4.72%	4.57%
Credited to participants	4.61%	4.51%

6. Party-In-Interest Transactions

Approximately 11% of the Plan's net assets available for benefits are shares of the company's common stock. Transactions in shares of the company's common stock qualify as party-in-interest transactions under the provisions of ERISA. During 2007, the Plan made purchases of the company's common stock of \$10,336,014 and sales and distributions of \$97,202,725.

Table of Contents

Intel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)

7. Securities Lending

The Plan has a securities lending agreement with Mellon. The Plan is not restricted from lending securities to other qualified financial institutions, provided such loans are callable at any time and are at all times fully secured by cash, cash equivalents, or securities issued or guaranteed by the U.S. government or its agencies. The Plan may bear the risk of delay in recovery of, or rights in, the securities loaned should the borrower of the securities fail financially. Consequently, loans of securities are only made to firms deemed by the subadvisors to be creditworthy. The Plan receives compensation for lending its securities, either in the form of fees or by retaining a portion of interest on the investment of any cash received as collateral.

Cash collateral is recorded as an asset with a corresponding liability on the statements of net assets available for benefits. For lending agreements collateralized by securities, the collateral is not recorded as an asset or a liability, unless the collateral is repledged. All collateral received will be in an amount equal to at least 102% of the market value of the loaned securities. It is intended that the collateral will be maintained at that level during the period of the loan. The value of the collateral on-hand was \$3,781,817, including \$36,321 collateralized by securities which the Plan does not have the right to sell or repledge, at December 31, 2007. The market value of the loaned securities is determined at the close of business, and any additional required collateral is delivered to the Plan the next business day. The market value of the loaned securities was \$3,639,760 at December 31, 2007. During the loan period, the Plan continues to retain rights of ownership, including dividends and interest of the loaned securities. Income generated from securities lending arrangements totaled \$2,405 for the year ended December 31, 2007. This amount is included in the net realized and unrealized appreciation in fair value of investments on the statement of changes in net assets available for benefits. The Plan did not participate in any securities lending during 2006.

8. Concentration of Credit Risk

The Plan's exposure to a concentration of credit risk is limited by the diversification of investments across 72 participant-directed fund elections. With the exception of the Intel Stock Fund, the investments within each participant-directed fund election are further diversified into varied financial instruments. The Intel Stock Fund invests in a single security. The Plan's exposure to credit risk on the wrapper contracts is limited to the fair value of the contracts with each counterparty. Collateral has been obtained and secured against investments whenever deemed necessary.

Table of ContentsIntel Corporation 401(k) Savings Plan
Notes to Financial Statements (continued)**9. Income Tax Status**

The Plan has received a determination letter from the IRS dated February 7, 2006, stating that the Plan is qualified under Section 401(a) of the Code, and therefore the related trust is exempt from taxation. Subsequent to this issuance of the determination letter, the Plan was amended and restated. Once qualified, the Plan is required to operate in conformity with the Code to maintain its qualification. The plan sponsor believes the Plan is being operated in compliance with the applicable requirements of the Code and, therefore, believes that the Plan, as amended and restated, is qualified and the related trust is tax-exempt.

10. Plan Termination

The company has the right under the Plan to amend and terminate the Plan at any time for any reason. In the event of a plan termination, participants will remain 100% vested in their accounts.

11. Reconciliation of Financial Statements to Form 5500

The following is a reconciliation of net assets available for benefits per the financial statements at December 31, 2007 and 2006 to the Form 5500:

	December 31,	
	2007	2006
Net assets available for benefits per the financial statements	\$ 4,309,031,419	\$ 3,766,877,550
Less: Adjustment between fair value and contract value related to fully benefit responsive investment contracts held by the Stable Value Fund	(621,296)	(1,540,511)
Net assets available for benefits per the Form 5500	\$ 4,308,410,123	\$ 3,765,337,039
