Registrant's telephone number, including area code: (312) 917-7700

Date of fiscal year end: May 31

Date of reporting period: May 31, 2014

Form N-CSR is to be used by management investment companies to file reports with the Commission not later than 10 days after the transmission to stockholders of any report that is required to be transmitted to stockholders under Rule 30e-1 under the Investment Company Act of 1940 (17 CFR 270.30e-1). The Commission may use the information provided on Form N-CSR in its regulatory, disclosure review, inspection, and policymaking roles.

A registrant is required to disclose the information specified by Form N-CSR, and the Commission will make this information public. A registrant is not required to respond to the collection of information contained in Form N-CSR unless the Form displays a currently valid Office of Management and Budget ("OMB") control number. Please direct comments concerning the accuracy of the information collection burden estimate and any suggestions for reducing the burden to Secretary, Securities and Exchange Commission, 450 Fifth Street, NW, Washington, DC 20549-0609. The OMB has reviewed this collection of information under the clearance requirements of 44 U.S.C. ss. 3507.

ITEM 1. REPORTS TO STOCKHOLDERS.

---

Nuveen Investments to be acquired by TIAA-CREF

On April 14, 2014, TIAA-CREF announced that it had entered into an agreement to acquire Nuveen Investments, the parent company of your fund's investment adviser, Nuveen Fund Advisors, LLC ("NFAL") and the Nuveen affiliates that act as sub-advisers to the majority of the Nuveen Funds. TIAA-CREF is a national financial services organization with approximately \$569 billion in assets under management (as of March 31, 2014) and is a leading provider of retirement services in the academic, research, medical and cultural fields. Nuveen anticipates that it will operate as a separate subsidiary within TIAA-CREF's asset management business, and that its current leadership and key investment teams will stay in place.

Your fund investment will not change as a result of Nuveen's change of ownership. You will still own the same fund shares and the underlying value of those shares will not change as a result of the transaction. NFAL and your fund's sub-adviser(s) will continue to manage your fund according to the same objectives and policies as before, and we do not anticipate any significant changes to your fund's operations. Under the securities laws, the consummation of the transaction will result in the automatic termination of the investment management agreements between the funds and NFAL and the investment sub-advisory agreements between NFAL and each fund's sub-adviser(s). New agreements will be presented to the funds' shareholders for approval, and, if approved, will take effect upon consummation of the transaction or such later time as shareholder approval is obtained.

The transaction, expected to be completed by year end, is subject to customary closing conditions.

Chairman's Letter to Shareholders

Dear Shareholders,

After significant growth in 2013, domestic and international equity markets have been less compelling during the first part of 2014. Concerns about deflation, political uncertainty in many places and the potential for more fragile economies to impact other countries have produced uncertainty in the markets.

Europe is beginning to emerge slowly from the recession in mid-2013, with improved GDP and employment trends in some countries. However, Japan's deflationary headwinds have resurfaced; and China shows signs of slowing from credit distress combined with declines in manufacturing and exports. Most recently, tensions between Russia and Ukraine may continue to hold back stocks and support government bonds in the near term.

Despite these headwinds, there are some encouraging signs of forward momentum in the markets. In the U.S., the news is more positive with financial risks slowly receding, positive GDP trends, downward trending unemployment and stronger household finances and corporate spending.

It is in such changeable markets that professional investment management is most important. Investment teams who have experienced challenging markets in the past understand how their asset class can behave in rapidly changing times. Remaining committed to their investment disciplines during these times is a critical component to achieving long-term success. In fact, many strong investment track records are established during challenging periods because experienced investment teams understand that volatile markets place a premium on companies and investment ideas that can weather the short-term volatility. By maintaining appropriate time horizons, diversification and relying on practiced investment teams, we believe that investors can achieve their long-term investment objectives.

As always, I encourage you to communicate with your financial consultant if you have any questions about your investment in a Nuveen Fund. On behalf of the other members of the Nuveen Fund Board, we look forward to continuing to earn your trust in the months and years ahead.

William J. Schneider  
Chairman of the Board  
July 21, 2014

Nuveen Georgia Dividend Advantage Municipal Fund 2 (NKG)  
Nuveen Maryland Premium Income Municipal Fund (NMY)  
Nuveen Missouri Premium Income Municipal Fund (NOM)  
Nuveen North Carolina Premium Income Municipal Fund (NNC)  
Nuveen Virginia Premium Income Municipal Fund (NPV)

These Funds feature portfolio management by Nuveen Asset Management, LLC, an affiliate of Nuveen Investments, Inc. Portfolio managers Daniel J. Close, CFA, Thomas C. Spalding, CFA, and Christopher L. Drahn, CFA, discuss economic and municipal market conditions at the national and state levels, key investment strategies and the twelve-month performance of these five Nuveen Funds. Dan has managed the Nuveen Georgia and North Carolina Funds since 2007. Tom assumed portfolio management responsibility for the Maryland and Virginia Funds in 2011 and Chris has managed the Missouri Fund since 2011.

What factors affected the U.S. economy and the national municipal market during the twelve-month reporting period ended May 31, 2014?

During this reporting period, the U.S. economy continued its bumpy advance toward recovery from recession. The Federal Reserve (Fed) maintained efforts to bolster growth and promote progress toward its mandates of maximum employment and price stability by holding the benchmark fed funds rate at the record low level of zero to 0.25% that it established in December 2008. Based on its view that the underlying strength in the broader economy was enough to support ongoing improvement in the labor market, the Fed began to reduce or taper its monthly asset purchases in \$10 billion increments over the course of five consecutive meetings (December 2013 through June 2014). As of July 2014 (subsequent to the close of this reporting period), the Fed's monthly purchases comprise \$15 billion in mortgage-backed securities (versus the original \$40 billion per month) and \$20 billion in longer-term Treasury securities (versus \$45 billion). Following its June 2014 meeting (subsequent to the close of this reporting period), the Fed reiterated that it would continue to look at a wide range of factors, including labor market conditions, indicators of inflationary pressures and readings on financial developments, in determining future actions, saying that it would likely maintain the current target range for the fed funds rate for a considerable time after the asset purchase program ends, especially if projected inflation continues to run below the Fed's 2% longer-run goal.

In the first quarter of 2014, the U.S. economy, as measured by the U.S. gross domestic product (GDP), contracted at an annualized rate of 2.9%, the economy's weakest quarter since the recession officially ended in June 2009. The decline during this period was attributed in part to the severe weather of the past winter, which deterred consumer spending and disrupted construction, production and shipping. The Consumer Price Index (CPI) rose 2.1% year-over-year as of May 2014, the largest twelve-month increase since October 2012, while the core CPI (which excludes food and energy) increased 2.0% during the same period, in line with the Fed's unofficial longer-term objective of 2.0% for this inflation measure. As of May 2014, the national unemployment rate was 6.3%, the lowest reading since September 2008, down from the 7.5% reported in May 2013, but still higher than levels that would

Certain statements in this report are forward-looking statements. Discussions of specific investments are for illustration only and are not intended as recommendations of individual investments. The forward-looking statements and other views expressed herein are those of the portfolio managers as of the date of this report. Actual future results or occurrences may differ significantly from those anticipated in any forward-looking statements, and the views expressed herein are subject to change at any time, due to numerous market and other factors. The Funds disclaim any obligation to update publicly or revise any forward-looking statements or views expressed herein.

Ratings shown are the highest rating given by one of the following national rating agencies: Standard & Poor's (S&P), Moody's Investors Service, Inc. (Moody's) or Fitch, Inc. (Fitch). Credit ratings are subject to change. AAA, AA, A and BBB are investment grade ratings; BB, B, CCC, CC, C and D are below investment grade ratings. Certain bonds backed by U.S. government or agency securities are regarded as having an implied rating equal to the rating of such securities. Holdings designated N/R are not rated by these national rating agencies.

Bond insurance guarantees only the payment of principal and interest on the bond when due, and not the value of the bonds themselves, which will fluctuate with the bond market and the financial success of the issuer and the insurer. Insurance relates specifically to the bonds in the portfolio and not to the share prices of a Fund. No representation is made as to the insurers' ability to meet their commitments.

Portfolio Managers' Comments (continued)

provide consistent support for optimal GDP growth. The 113,000 net new jobs added in May 2014 meant that the economy finally had regained all of the 8.7 million jobs lost during the recent recession. The housing market continued to post gains, as the average home price in the S&P/Case-Shiller Index of 20 major metropolitan areas rose 10.8% for the twelve months ended April 2014 (most recent data available at the time this report was prepared). This brought the average U.S. home price back to summer 2004 levels, although prices continued to be down 18%–19% from their mid-2006 peak.

As this reporting period began, several events touched off increased volatility in the financial markets. First, in May 2013, then-Fed Chairman Ben Bernanke's remarks about tapering the Fed's asset purchase program triggered widespread uncertainty about the next step for the Fed's quantitative easing program and its impact on the markets as well as the overall economy. This uncertainty was compounded by headline credit stories involving Detroit's bankruptcy filing in July 2013, the largest municipal bankruptcy in history and the disappointing news that continued to come out of Puerto Rico, where a struggling economy and years of deficit spending and borrowing led to multiple downgrades on the commonwealth's bonds. Meanwhile, political debate over federal spending continued, as Congress failed to reach an agreement on the federal budget for Fiscal 2014. On October 1, 2013, the start date for Fiscal 2014, the federal government shut down for 16 days until an interim appropriations bill was signed into law. (Consensus on a \$1.1 trillion federal spending bill was ultimately reached in January 2014 and in February 2014, members of Congress agreed to suspend the \$16.7 trillion debt ceiling until March 2015.) In the unsettled environment of the first half of this reporting period, the Treasury market traded off, the municipal market followed suit and spreads widened as investor concern grew, which prompted increased selling by bondholders across the fixed income markets.

During the second half of this reporting period, municipal bonds generally rebounded, as the Fed remained accommodative, the Treasury market rallied and municipal credit fundamentals continued to improve. Higher yields and the prospect of higher taxes sparked increased demand and improved flows into municipal bond funds, while supply continued to drop. This supply/demand dynamic served as a key driver of municipal market performance. While yields retraced 2013 gains during the first five months of 2014, municipal bonds generally produced positive total returns for the reporting period as a whole. Fundamentals on municipal bonds remained strong, as state governments overall made good progress in dealing with budget issues. Due to strong growth in personal tax and sales tax collections, year-over-year totals for state tax revenues have increased for 16 consecutive quarters, while on the expense side, many states made headway in cutting and controlling costs, with more than 40 states implementing some type of pension reform. The current level of municipal issuance reflects the more conservative approach to state budgeting. For the twelve months ended May 31, 2014, municipal bond issuance nationwide totaled \$296.0 billion, down 21% from the issuance for the twelve-month period ended May 31, 2013.

What were the economic and market conditions in Georgia, Maryland, Missouri, North Carolina and Virginia during the twelve-month reporting period ended May 31, 2014?

During this period, Georgia continued its recovery from the recent recession. The state's economy grew 1.8% in 2013, up from 1.5% in 2012 and on par with national growth of 1.8% for 2013. This ranked Georgia 25th among the states in terms of economic expansion for 2013. As of May 2014, unemployment in Georgia was 7.2%, down from 8.4% in May 2013, but still above the national rate of 6.3%. Georgia's economy continued to be well diversified, although geographically concentrated around the Atlanta metropolitan area. Home prices in the Atlanta area, which were hard hit by the housing crisis, were up 13.7% year-over-year as of April 2014 (most recent data available at the time this report was prepared), ahead of the national average of 10.8%, according to the S&P/Case-Shiller Home Price Index. In 2013, Georgia's population grew by only 0.8%, the weakest in almost four decades. For Fiscal 2015, Georgia adopted a \$20.8 billion state budget, which included an estimated revenue increase of 3% over the amended Fiscal 2014 budget. The Fiscal 2015 budget also provided approximately \$514 million in additional funds for K-12 education, the largest annual increase in K-12 funding in seven years. As of May 2014, Georgia's general obligation

debt continued to be rated Aaa, AAA, AAA with stable outlooks from Moody's, S&P and Fitch, respectively. For the twelve months ended May 31, 2014, municipal issuance in Georgia totaled \$5.1 billion, a decrease of 3.3% from the twelve months ended May 31, 2013.

In Maryland, the state's credit profile remained relatively strong, due to sound fiscal management and a diverse economy. In 2013, Maryland's economic growth was flat, following expansion that averaged 1.9% in 2010-2012. While the state's economic recovery has been somewhat hampered by federal budget cuts, private sector employment has shown recent signs of expansion. Growth in the health care and professional services sectors buoyed the state's job market and lowered statewide unemployment

6 Nuveen Investments

---

to 5.6% as of May 2014, down from 6.7% in May 2013. However, employment in the manufacturing and financial services sectors continued to decline and Maryland's proximity to Washington DC means a greater dependency on federal employment than in most states, leaving it vulnerable to federal cost-cutting. The state's largest employer was Fort George G. Meade, with more than 56,000 workers. Maryland has one of the nation's best educated workforces, which has facilitated the development of advanced technology and the growth of public and private research facilities. Combined with the influence of the government sector and the presence of 56 universities, this has made Maryland a center for national security and medical and biomedical research. Maryland's Fiscal 2015 budget estimated a 5% increase in revenues and expenditures and maintenance of the state's rainy day fund at \$800 million. As of May 2014, Moody's, S&P and Fitch rated Maryland general obligation debt at Aaa, AAA, AAA, respectively, with stable outlooks. During the twelve months ended May 31, 2014, municipal issuance in the state totaled \$5.2 billion, down 29% from the twelve-month period ended May 31, 2013.

Missouri's economic recovery continued to lag that at the national level. For 2013, national economic growth of 1.8% outpaced Missouri's expansion rate of 0.8%, which ranked Missouri 45th among the states. Continued job losses in the government and information technology sectors were offset by employment growth in construction, leisure and hospitality, financial activities and education and health services. As of May 2014, Missouri's unemployment rate of 6.6% remained higher than the national rate of 6.3%, but represented a slight improvement over the state's reading of 6.7% in May 2013. Missouri's overexposure to traditional defense-related manufacturing jobs caused a drag on its recovery, but efforts to transition part of the state economy away from these jobs to health care and financial services could position Missouri for future growth. The state's plan to expand exports suffered a setback in 2013, with exports falling 8.5% from 2012, as increases in exports to Mexico failed to offset large decreases in exports to Canada and China. For Fiscal 2015, the proposed \$26.4 billion Missouri state budget, which was introduced in January 2014, focused on increased funding for K-12 education, higher education and the renovation of Fulton State Mental Hospital. In August 2014, residents will vote on a \$0.0075 ten-year sales tax increase that would provide an estimated \$500 million in annual transportation revenues. Although previous budgets have reduced state payrolls, the Fiscal 2015 budget called for increased spending on employee resources. As of May 2014, Moody's, S&P and Fitch rated Missouri general obligation debt at Aaa, AAA, AAA, respectively, with stable outlooks. For the twelve months ended May 31, 2014, municipal issuance in Missouri totaled \$6.5 billion, representing a 3.5% increase from the twelve months ended May 31, 2013.

North Carolina continued the trend line of growth that started at the end of 2011. For 2013, the gross state product for North Carolina grew 2.3%, following an increase of 2.4% in 2012. This outpaced national growth of 1.8% in 2013 and ranked North Carolina 17th among the states for the year. As of May 2014, the state's unemployment rate of 6.4% was its lowest since July 2008, down from 8.3% twelve months earlier. North Carolina has worked to transition its economy away from old-line manufacturing into sectors oriented toward research, technology and services and the combination of experience and a focus on the future resulted in Raleigh's being selected as the site for a new federally subsidized institute for technology-based manufacturing. Once a leader in textiles, furniture and tobacco, the state's manufacturing sector was not expected to resume its role as a major driver in the North Carolina economy, although manufacturing continued to represent 11% of the state's jobs. The federal government remained the largest employer in the state due to the large military installments, including Fort Bragg and Camp Lejeune, which are the two largest employers in the state with more than 110,000 workers. According to the S&P/Case-Shiller Index of 20 major metropolitan areas, housing prices in Charlotte rose 4.4% during the twelve months ended April 2014 (most recent data available at the time this report was prepared), compared with a 10.8% price increase nationally. This put Charlotte home prices less than 10% from their 2006 peak. North Carolina closed Fiscal 2013 with a budget surplus of more than \$440 million. Such surpluses are less likely going forward, as the state reduced personal income tax rates from a three-tiered system topping out at 7.5% to a flat 5.8% in 2014 and 5.75% in 2015, while also cutting the corporate income tax from 6.9% to 6% in 2014 and 5% in 2015. While the state eliminated sales tax exemptions in order to boost those revenues, the net result is expected to be a reduction in revenues. As of May 2014, North Carolina is one of only eight states to carry a rating of AAA by all three major rating agencies. During the twelve months ended May 31, 2014, municipal issuance in North Carolina totaled \$2.6 billion, a decrease of 70% from the twelve months

ended May 31, 2013.

Economic recovery in Virginia continued at a steady, though somewhat slower pace than in its peers. In 2013, Virginia's economic growth was relatively flat, following expansion that averaged 1.6% in 2010-2012. However, economic indicators reflected an economy that was relatively healthy and improving. As of May 2014, unemployment in the commonwealth fell to 5.1%, down from

Nuveen Investments

7

---

Portfolio Managers' Comments (continued)

5.6% in May 2013 and below the national average of 6.3%. Job growth in Virginia was led by the education and health services, financial services and construction sectors. The commonwealth is a center for research and development facilities, with Richmond, Charlottesville and Northern Virginia forming a research triangle. In recent months, home prices in the region have risen, according to the S&P/Case-Shiller Index of 20 major metropolitan areas, with the Washington DC area posting a 7.0% gain for the twelve months ended April 2014 (most recent data available at the time this report was prepared). This compared with a 10.8% rise in home prices nationally. Virginia is approaching the end of the second year of its \$85 billion biennium budget and progress on the budget for Fiscal 2015 is at a standstill over Medicaid expansion. Many of Virginia's local governments and school districts base their budgets on the commonwealth's and a delay in budget approval at the state level could result in problems for local municipalities. In 2012, Virginia passed a wide-ranging pension reform measure that required full funding of the Virginia retirement system within eight years, altered benefits and contribution rates and established a hybrid defined benefit/defined contribution plan for new employees. As of May 2014, Moody's, S&P and Fitch rated Virginia general obligation debt at Aaa/AAA/AAA with stable outlooks. During the twelve months ended May 31, 2014, issuance in Virginia totaled \$5.6 billion, a decrease of 42% from the previous twelve months.

What key strategies were used to manage these Funds during the twelve-month reporting period ended May 31, 2014?

As previously discussed, during the first part of this reporting period, uncertainty about the future of the Fed's quantitative easing program and headline credit stories involving Detroit and Puerto Rico triggered selling by bondholders across the fixed income markets, resulting in a volatile municipal market environment. The second part of the reporting period brought greater stability and a municipal market rally driven by stronger demand and tight supply. We continued to take a bottom-up approach to discovering sectors that appeared undervalued as well as individual credits that had the potential to perform well over the long term and helped keep the Funds fully invested.

Despite the challenging environment created by market volatility and the general decrease in new issuance, especially in North Carolina, Virginia and Maryland, we continued to find opportunities to purchase bonds in both the primary and secondary markets that helped us achieve our goals for the Funds. Given our view that there had been no fundamental change in municipal market credit, we were active buyers, taking advantage of higher coupons and attractive prices resulting from the pattern of outflows, predominately from high yield funds, during the first part of the reporting period. Overall, our emphasis in these Funds was on adding attractive bonds across the credit quality spectrum that we believed had long-term potential. For the most part, our purchases were made in the intermediate and longer parts of the municipal yield curve, with more emphasis on intermediate maturities in NNC.

During this reporting period, the Funds continued to find value in diversified areas of the marketplace. In NKG, we purchased several state and local general obligation (GO) credits, water and sewer bonds, tax increment financing (TIF) district credits and a gas prepayment issue. When NKG's holdings of bonds issued for Hartsfield-Jackson Atlanta International Airport were called, we reinvested the call proceeds in the airport's new issue. During this reporting period, NMY added to its holdings in health care, single-family housing, GOs and higher education, including The Johns Hopkins University and the University of Maryland. In Missouri, NOM found value in credits issued by the Metropolitan St. Louis Sewer District and the health care and higher education sectors, such as CoxHealth, the University of Central Missouri and the St. Louis College of Pharmacy. Despite the significant drop in North Carolina issuance during this period, we continued to find bonds that helped accomplish our goals for NNC, adding local GOs, water and sewer and airport bonds as well as Catawba electric revenue credits. Good supply of higher education issuance also enabled us to increase NNC's holdings in that sector, as we added bonds issued for East Carolina University, Winston-Salem State University and University of North Carolina at both Charlotte and Raleigh. In Virginia, NPV's purchases during this reporting period focused on tollroads, higher education (Washington and Lee University) and emission control bonds issued for Virginia Electric and Power Company. With the general decline in Virginia issuance, we also added some territorial paper (Virgin Islands) to help keep our portfolio fully invested.

During this reporting period, S&P upgraded its credit rating on National Public Finance Guarantee Corp. (NPF), the insurance subsidiary of MBIA, to a AA-rating from A-rating, citing NPF's strong operating performance and competitive position in the financial guarantee market. As a result, the ratings on the Funds' holdings of bonds backed by insurance from NPF were similarly upgraded to AA-rated as of mid-March 2014. This action produced an increase in the percentage of our portfolios held in the AA-rated credit

8 Nuveen Investments

---

quality category (and a corresponding decrease in the A-rated category), improving the overall credit quality of the Funds. During this reporting period, S&P also upgraded its rating on Assured Guaranty Municipal (AGM) as well as AGM's municipal-only insurer Municipal Assurance Corp. to AA from AA-.

Cash for new purchases was generated primarily by proceeds from called and matured bonds, which we worked to redeploy to keep the Funds fully invested and support their income streams. We also sold selected holdings to generate additional cash for purchases, including the sale of Virgin Islands electric system revenue bonds in NKG and pre-refunded bonds with short maturities in NNC. In addition, NOM took advantage of good demand for Missouri paper to sell some discount coupon bonds, which had the added benefit of generating tax loss carryforwards that can be used to offset future capital gains. NOM also reviewed its holdings to identify bonds that could qualify as potential sales candidates as better opportunities arose. As a result of this review, we sold our holdings of a Missouri appropriations bond at strong prices. All five Funds were also active sellers of Puerto Rico paper. This activity is further discussed in our comments on Puerto Rico at the end of this Portfolio Managers' Comments section.

As of May 31, 2014, all these Funds continued to use inverse floating rate securities. We employ inverse floaters for a variety of reasons, including duration management, income enhancement and total return enhancement. For duration and cash management reasons, NNC found it advantageous to terminate several of its inverse floating rate trusts, using cash on hand in the portfolio to place the bonds involved back on the Fund's balance sheet.

How did the Funds perform during the twelve-month reporting period ended May 31, 2014?

The tables in each Fund's Performance Overview and Holding Summaries section of this report provide the Funds' total returns for the one-year, five-year and ten-year periods ended May 31, 2014. Each Fund's total returns at net asset value (NAV) are compared with the performance of corresponding market indexes and a Lipper classification average.

For the twelve months ended May 31, 2014, the total return at common share NAV for NNC exceeded the return for the S&P Municipal Bond North Carolina Index as well as the S&P Municipal Bond Index, while the other four Funds underperformed their respective state's S&P Municipal Bond Index and the S&P Municipal Bond Index. For the same period, NNC outperformed the average return for the Lipper Other States Municipal Debt Funds Classification Average, while NKG, NMY, NOM and NPV lagged this Lipper average. Shareholders should note that the performance of the Lipper Other States classification represents the overall average of returns for funds from ten states with a wide variety of municipal market conditions, making direct comparisons less meaningful.

Key management factors that influenced the Funds' returns during this reporting period included duration and yield curve positioning, credit exposure and sector allocation. The underperformance of the Maryland and Virginia markets relative to the national municipal market also had an impact on the returns of NMY and NPV for the reporting period. In addition, the use of regulatory leverage was an important factor affecting the performance of these Funds. Leverage is discussed in more detail later in the Fund Leverage section of this report.

As yields retraced gains made during the first part of this reporting period, municipal bonds with long intermediate and longer maturities generally outperformed those with shorter maturities as a whole. Overall, credits with maturities between seven and twenty years, especially those in the fifteen-year maturity range, outperformed the general municipal market, while bonds at the shortest end of the municipal yield curve produced the weakest results. Because these Funds generally had good weightings in the segments of the municipal curve that performed best and underweights in the underperforming short end of the curve, duration and yield curve positioning was a positive contributor to their performance, especially in NNC.

During this reporting period, lower rated bonds generally outperformed higher quality bonds, as the environment shifted from tradeoff to rally and investors became more willing to accept risk. However, relative performance results among the lower rated categories were somewhat skewed by the underperformance of Puerto Rico bonds, which were

classified in the BBB-rated credit quality category for the majority of this reporting period before their downgrade to below investment grade in February 2014. All of these Funds except NNC were overweighted in BBB-rated bonds, with NPV having the heaviest allocation in this category. The impact of Puerto Rico holdings was offset to varying degrees by the Funds' weightings in the other lower quality positions that performed well.

Nuveen Investments

9

---

## Portfolio Managers' Comments (continued)

Health care and housing generally were the top performers among the municipal market sectors, with the performance of the housing sector boosted by improving property value assessments and the decline in mortgage and tax delinquencies. NMY, NOM, NNC and NPV all benefited from their heavy weightings in health care, including hospitals and continuing care retirement communities (CCRCs). Other revenue sectors that tended to outperform the general municipal market included transportation, industrial development revenue (IDR) bonds, water and sewer and education. NKG's overweighting in IDRs helped somewhat to offset its lower allocation to health care. For the reporting period, general obligation (GO) credits generally performed in line with the market.

In contrast, pre-refunded bonds, which are often backed by U.S. Treasury securities, were among the poorest performing market segments. The underperformance of these bonds relative to the market can be attributed primarily to their shorter effective maturities and higher credit quality. All of these Funds had allocations of pre-refunded bonds, with NMY having the heaviest weighting and NKG the smallest exposure. Bonds in the utilities sector also lagged municipal market performance. These Funds tended to be underweighted in utilities relative to the index, which was generally helpful. Lower rated tobacco credits backed by the 1998 master tobacco settlement agreement also performed poorly. At the beginning of this reporting period, all of these Funds except NOM had allocations of tobacco bonds issued by The Children's Trust Fund (Puerto Rico). In addition, NMY held tobacco credits issued by Guam and the Virgin Islands and NPV had positions in tobacco bonds issued by Guam and the Tobacco Settlement Financing Corporation of Virginia. In late 2013, NKG and NNC closed out their positions in Puerto Rico tobacco bonds.

During this reporting period, developments in Puerto Rico also had an impact on the Funds' holdings and performance. The commonwealth's continued economic weakening, escalating debt service obligations and long-standing inability to deliver a balanced budget have led to multiple downgrades on its debt. In another round of rating reductions in February 2014, Moody's, S&P, and Fitch cut their ratings on Puerto Rico general obligation (GO) debt to below investment grade, at Ba2/BB+/BB, respectively, with negative outlooks. In late June 2014, Puerto Rico approved new legislation creating a judicial framework and formal process that would allow several of the commonwealth's public corporations to restructure their public debt. As of July 2014, the Nuveen complex holds \$80.6 million in bonds backed by public corporations in Puerto Rico that could be restructured under this legislation, representing less than 0.1% of our municipal assets under management. In light of the evolving economic situation in Puerto Rico, Nuveen's credit analysis of Puerto Rico had previously considered the possibility of a default and restructuring of public corporations and we adjusted our portfolios to prepare for such an outcome, although no such default or restructuring has occurred to date. The Nuveen complex's entire exposure to obligations of the government of Puerto Rico and other Puerto Rico issuers amounts to 0.8% of our municipal assets under management. On July 1, 2014, in response to the new legislation, Moody's further dropped its rating on Puerto Rico GO debt by an additional three notches, to B2 from Ba2. To date, S&P and Fitch have not announced any additional rating adjustments.

For the reporting period ended May 31, 2014, Puerto Rico paper underperformed the municipal market as a whole. During this reporting period, each of these Funds had exposure to Puerto Rico bonds. The effect on performance from these holdings differed from Fund to Fund in line with the type and amount of its position, but on the whole, our Puerto Rico holdings were a major detractor from performance during this period. These territorial bonds were originally added to the Funds in order to keep assets fully invested and working for the Funds as well as to enhance diversity, duration and credit in states such as Maryland and Virginia. We found the Puerto Rico credits attractive because they offer higher yields, added diversification and triple exemption (i.e., exemption from most federal, state and local taxes). During this reporting period, the Funds took advantage of opportunities to reduce or even close out their positions in Puerto Rico paper. In addition to the sales of Puerto Rico tobacco bonds mentioned above, NKG and NNC, which began the period with exposures of 3.8% and 2.2%, respectively, sold their remaining holdings of Puerto Rico bonds, leaving the Funds with no Puerto Rico holdings at the end of the reporting period. NOM also reduced its exposure to Puerto Rico from 7.9% to 3.1% during the reporting period. NMY and NPV trimmed their positions in Puerto Rico bonds from 17.2% to 10.0% in NMY and from 15.4% to 7.8% in NPV. In addition, we should note that

NMY's holding of bonds issued by Puerto Rico Ports Authority for American Airlines made a positive contribution to its performance during this reporting period, as the Fund's position in these bonds was converted into equity as part of the merger with US Airways. Over time, we expect to reinvest the proceeds from these shares into municipal bonds.

## Fund Leverage

## IMPACT OF THE FUNDS' LEVERAGE STRATEGIES ON PERFORMANCE

One important factor impacting the returns of the Funds relative to their comparative benchmarks was the Funds' use of leverage through their issuance of preferred shares and/or investments in inverse floating rate securities, which represent leveraged investments in underlying bonds. The Funds use leverage because our research has shown that, over time, leveraging provides opportunities for additional income, particularly in the recent market environment where short-term market rates are at or near historical lows, meaning that the short-term rates the Fund has been paying on its leveraging instruments have been much lower than the interest the Fund has been earning on its portfolio of long-term bonds that it has bought with the proceeds of that leverage. However, use of leverage also can expose the Fund to additional price volatility. When a Fund uses leverage, the Fund will experience a greater increase in its net asset value if the municipal bonds acquired through the use of leverage increase in value, but it will also experience a correspondingly larger decline in its net asset value if the bonds acquired through leverage decline in value, which will make the Fund's net asset value more volatile, and its total return performance more variable over time. In addition, income in levered funds will typically decrease in comparison to unlevered funds when short-term interest rates increase and increase when short-term interest rates decrease. Leverage detracted from the performance of NKG, NMY and NPV during the period after accounting for the cost of leverage used. Leverage had a positive impact on performance for NOM, and a negligible impact on NNC during the period.

As of May 31, 2014, the Funds' percentages of effective and regulatory leverage are as shown in the accompanying table.

	NKG	NMY	NOM	NNC	NPV
Effective Leverage*	36.25%	34.86%	37.81%	33.65%	37.74%
Regulatory Leverage*	33.71%	32.11%	35.09%	33.65%	33.03%

\* Effective Leverage is a Fund's effective economic leverage, and includes both regulatory leverage and the leverage effects of certain derivative and other investments in a Fund's portfolio that increase the Fund's investment exposure. Currently, the leverage effects of Tender Option Bond (TOB) inverse floater holdings are included in effective leverage values, in addition to any regulatory leverage. Regulatory leverage consists of preferred shares issued or borrowings of a Fund. Both of these are part of a Fund's capital structure. Regulatory leverage is subject to asset coverage limits set forth in the Investment Company Act of 1940.

## Fund Leverage (continued)

## THE FUNDS' REGULATORY LEVERAGE

As of May 31, 2014, the Funds have issued and outstanding MuniFund Term Preferred (MTP) Shares, Variable Rate MuniFund Term Preferred (VMTP) Shares and Variable Rate Demand Preferred (VRDP) Shares as shown in the accompanying table.

	MTP Shares			NYSE/ NYSE MKT Ticker	VMTP Shares		VRDP Shares		Total
	Series	Shares Issued at Liquidation Value	Annual Interest Rate		Series	Shares Issued at Liquidation Value	Series	Shares Issued at Liquidation Value	
NKG		—	—	— 2017	\$ 75,000,000	—	—	—	\$ 75,000,000
NMY		—	—	— 2017	\$ 167,000,000	—	—	—	\$ 167,000,000
NOM	2015	\$ 17,880,000	2.10%	NOM PRC	—	—	—	—	\$ 17,880,000
NNC		—	—	— 2017	\$ 125,000,000	—	—	—	\$ 125,000,000
NPV		—	—	—	—	—	1	\$ 128,000,000	\$ 128,000,000

During the current reporting period, NKG, NMY and NNC refinanced all of their outstanding MTP Shares with the proceeds from newly issued VMTP Shares, and NPV refinanced all of its outstanding MTP Shares with the proceeds from newly issued VRDP Shares.

Refer to Notes to Financial Statements, Note 1 – General Information and Significant Accounting Policies for further details on MTP, VMTP and VRDP Shares and each Fund's respective transactions.

## Share Information

## COMMON SHARE DIVIDEND INFORMATION

The following information regarding the Fund's distributions is current as of May 31, 2014. Each Fund's distribution levels may vary over time based on each Fund's investment activity and portfolio investments value changes.

During the current reporting period, the Funds' monthly dividends to common shareholders were as shown in the accompanying table.

Ex-Dividend Date	Per Common Share Amounts					
	NKG	NMY	NOM	NNC	NPV	
June 2013	\$ 0.0535	\$ 0.0555	\$ 0.0610	\$ 0.0503	\$ 0.0595	
July	0.0535	0.0555	0.0610	0.0503	0.0595	
August	0.0535	0.0555	0.0610	0.0503	0.0595	
September	0.0535	0.0555	0.0610	0.0503	0.0595	
October	0.0535	0.0555	0.0610	0.0503	0.0595	
November	0.0535	0.0555	0.0610	0.0503	0.0595	
December	0.0535	0.0555	0.0610	0.0503	0.0595	
January	0.0535	0.0555	0.0610	0.0503	0.0615	
February	0.0535	0.0555	0.0610	0.0503	0.0615	
March	0.0535	0.0555	0.0610	0.0503	0.0615	
April	0.0535	0.0555	0.0610	0.0503	0.0615	
May 2014	0.0535	0.0555	0.0610	0.0503	0.0615	
Long-Term Capital Gain*	\$ —	\$ —	\$ —	\$ —	\$ 0.0078	
Ordinary Income Distribution*	\$ —	\$ 0.0023	\$ —	\$ —	\$ 0.0005	
Market Yield**	4.95%	5.16%	4.85%	4.56%	5.51%	
Taxable-Equivalent Yield**	7.31%	7.59%	7.16%	6.73%	8.11%	

\* Distribution paid in December 2013.

\*\* Market Yield is based on the Fund's current annualized monthly dividend divided by the Fund's current market price as of the end of the reporting period. Taxable-Equivalent Yield represents the yield that must be earned on a fully taxable investment in order to equal the yield of the Fund on an after-tax basis. It is based on a combined federal and state income tax rate of 32.3%, 32.0%, 32.3%, 32.2% and 32.1% for Georgia, Maryland, Missouri, North Carolina and Virginia, respectively. When comparing a Fund to investments that generate qualified dividend income, the Taxable-Equivalent Yield would be lower.

All of the Funds in this report seek to pay stable dividends at rates that reflect each Fund's past results and projected future performance. During certain periods, each Fund may pay dividends at a rate that may be more or less than the amount of net investment income actually earned by the Fund during the period. If a Fund has cumulatively earned more than it has paid in dividends, it holds the excess in reserve as undistributed net investment income (UNII) as part of the Fund's NAV. Conversely, if a Fund has cumulatively paid dividends in excess of its earnings, the excess constitutes negative UNII that is likewise reflected in the Fund's NAV. Each Fund will, over time, pay all of its net investment income as dividends to shareholders. As of May 31, 2014, all of these Funds had positive UNII balances for tax purposes. NMY, NOM and NPV had positive UNII balances, while NKG and NNC had negative UNII balances for financial reporting purposes.

## Share Information (continued)

## COMMON SHARE EQUITY SHELF PROGRAM

During the current reporting period, NPV was authorized to issue an additional 1,700,000 common shares through an equity shelf program. Under this program, the Fund, subject to market conditions, may raise additional capital from time to time in varying amounts and offering methods at a net price at or above the Fund's NAV per common share. During the current reporting period NPV did not sell any common shares through its equity shelf program.

Refer to Notes to Financial Statements, Note 1 — General Information and Significant Accounting Policies for further details on the Fund's equity shelf program.

## COMMON SHARE REPURCHASES

As of May 31, 2014, and since the inception of the Funds' repurchase programs, the Funds have cumulatively repurchased and retired common shares as shown in the accompanying table.

	NKG	NMY	NOM	NNC	NPV
Common Shares Cumulatively Repurchased and Retired	—	—	—	—	—
Common Shares Authorized for Repurchase	1,055,000	2,410,000	235,000	1,655,000	1,795,000

## OTHER COMMON SHARE INFORMATION

As of May 31, 2014, and during the current reporting period, the Funds' common share prices were trading at a premium/(discount) to their common share NAVs as shown in the accompanying table.

	NKG	NMY	NOM	NNC	NPV
Common Share NAV	\$ 13.98	\$ 14.64	\$ 14.19	\$ 14.90	\$ 14.47
Common Share Price	\$ 12.98	\$ 12.91	\$ 15.08	\$ 13.24	\$ 13.39
Premium/(Discount) to NAV	(7.15)%	(11.82)%	6.27%	(11.14)%	(7.46)%
12-Month Average Premium/(Discount) to NAV	(9.88)%	(12.76)%	(4.00)%	(11.42)%	(8.63)%

## Risk Considerations

Fund shares are not guaranteed or endorsed by any bank or other insured depository institution, and are not federally insured by the Federal Deposit Insurance Corporation. Past performance is no guarantee of future results. Fund common shares are subject to a variety of risks, including:

**Investment, Price and Market Risk.** An investment in shares is subject to investment risk, including the possible loss of the entire principal amount that you invest. Your investment in shares represents an indirect investment in the municipal securities owned by the Fund, which generally trade in the over-the-counter markets. Shares of closed-end investment companies like these Funds frequently trade at a discount to their net asset value (NAV). Your shares at any point in time may be worth less than your original investment, even after taking into account the reinvestment of Fund dividends and distributions.

**Leverage Risk.** Each Fund's use of leverage creates the possibility of higher volatility for the Fund's per share NAV, market price, distributions and returns. There is no assurance that a Fund's leveraging strategy will be successful. Certain aspects of the recently adopted Volcker Rule may limit the availability of tender option bonds, which are used by the Funds for leveraging and duration management purposes. The effects of this new Rule, expected to take effect in mid-2015, may make it more difficult for a Fund to maintain current or desired levels of leverage and may cause the Fund to incur additional expenses to maintain its leverage.

**Tax Risk.** The tax treatment of Fund distributions may be affected by new IRS interpretations of the Internal Revenue Code and future changes in tax laws and regulations.

**Issuer Credit Risk.** This is the risk that a security in a Fund's portfolio will fail to make dividend or interest payments when due.

**Interest Rate Risk.** Fixed-income securities such as bonds, preferred, convertible and other debt securities will decline in value if market interest rates rise.

**Reinvestment Risk.** If market interest rates decline, income earned from a Fund's portfolio may be reinvested at rates below that of the original bond that generated the income.

**Call Risk or Prepayment Risk.** Issuers may exercise their option to prepay principal earlier than scheduled, forcing a Fund to reinvest in lower-yielding securities.

**Inverse Floater Risk.** The Funds may invest in inverse floaters. Due to their leveraged nature, these investments can greatly increase a Fund's exposure to interest rate risk and credit risk. In addition, investments in inverse floaters involve the risk that the Fund could lose more than its original principal investment.

Report of Independent Registered Public Accounting Firm

The Board of Trustees and Shareholders  
Nuveen Georgia Dividend Advantage Municipal Fund 2  
Nuveen Maryland Premium Income Municipal Fund  
Nuveen Missouri Premium Income Municipal Fund  
Nuveen North Carolina Premium Income Municipal Fund  
Nuveen Virginia Premium Income Municipal Fund

We have audited the accompanying statements of assets and liabilities, including the portfolios of investments, of Nuveen Georgia Dividend Advantage Municipal Fund 2, Nuveen Maryland Premium Income Municipal Fund, Nuveen Missouri Premium Income Municipal Fund, Nuveen North Carolina Premium Income Municipal Fund, and Nuveen Virginia Premium Income Municipal Fund (the "Funds") as of May 31, 2014, and the related statements of operations and cash flows for the year then ended, the statements of changes in net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended. These financial statements and financial highlights are the responsibility of the Funds' management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audits to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Funds' internal control over financial reporting. Our audits included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Funds' internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of May 31, 2014, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial positions of Nuveen Georgia Dividend Advantage Municipal Fund 2, Nuveen Maryland Premium Income Municipal Fund, Nuveen Missouri Premium Income Municipal Fund, Nuveen North Carolina Premium Income Municipal Fund, and Nuveen Virginia Premium Income Municipal Fund at May 31, 2014, and the results of their operations and their cash flows for the year then ended, the changes in their net assets for each of the two years in the period then ended, and the financial highlights for each of the five years in the period then ended, in conformity with U.S. generally accepted accounting principles.

28,915	Total Water and Sewer			32,647,815
\$ 204,814	Total Long-Term Investments (cost \$211,751,466)			222,327,955
	Floating Rate Obligations – (2.2)%			(3,245,000)
	Variable Rate MuniFund Term Preferred Shares, at Liquidation Value – (50.8)% (5)			(75,000,000)
	Other Assets Less Liabilities – 2.3%			3,424,388
	Net Assets Applicable to Common Shares – 100%			\$ 147,507,343

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (5) Variable Rate MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investments is 33.7%.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

NMY Nuveen Maryland Premium Income Municipal Fund  
Portfolio of Investments (continued) May 31, 2014

Shares	Description (1)	Value
	COMMON STOCKS – 0.9% (0.6% of Total Investments)	
	Airlines – 0.9% (0.6% of Total Investments)	
79,607	American Airlines Group Inc., (7)	\$ 3,197,017
	Total Common Stocks (cost \$2,473,540)	3,197,017
	Total Long-Term Investments (cost \$511,208,367)	534,215,372
	Floating Rate Obligations – (6.2)%	(21,935,000)
	Variable Rate MuniFund Term Preferred Shares, at Liquidation Value – (47.3)% (8)	(167,000,000)
	Other Assets Less Liabilities – 2.2%	7,729,355
	Net Assets Applicable to Common Shares – 100%	\$ 353,009,727

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) At or subsequent to the end of the reporting period, this security is non-income producing. Non-income producing, in the case of a fixed-income security, generally denotes that the issuer has (1) defaulted on the payment of principal or interest, (2) is under the protection of the Federal Bankruptcy Court or (3) the Fund's Adviser has concluded that the issue is not likely to meet its future interest payment obligations and has directed the Fund's custodian to cease accruing additional income on the Fund's records.
- (5) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.
- (6) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (7) On November 28, 2011, AMR Corp. ("AMR"), the parent company of American Airlines Group, Inc. ("AAL") filed for federal bankruptcy protection. On December 9, 2013, AMR emerged from federal bankruptcy with the acceptance of its reorganization plan by the bankruptcy court. Under the settlement agreement established to meet AMR's unsecured bond obligations, the bondholders, including the Fund, received a distribution of AAL preferred stock which was converted to AAL common stock over a 120- day period. Every 30 days, a quarter of the preferred stock was converted to AAL common stock based on the 5-day volume-weighted average price and the amount of preferred shares tendered during the optional preferred conversion period.
- (8) Variable Rate MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investments is 31.3%
- (ETM) Escrowed to maturity.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

	Net Assets Applicable to Common Shares – 100%			\$ 33,071,647

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (5) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.
- (6) MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investments is 34.6%  
 WI/DD Investment, or portion of investment, purchased on a when-issued or delayed delivery basis.  
 (ETM) Escrowed to maturity.  
 (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

	Net Assets Applicable to Common Shares – 100%			\$ 246,491,581

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor’s Group (“Standard & Poor’s”), Moody’s Investors Service, Inc. (“Moody’s”) or Fitch, Inc. (“Fitch”) rating. Ratings below BBB by Standard & Poor’s, Baa by Moody’s or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (5) Variable Rate MuniFund Term Preferred Shares, at Liquidation Value as a percentage of Total Investments is 34.1%  
(ETM) Escrowed to maturity.

\$ 1,000	Virginia Resources Authority, Water and Sewerage System Revenue Bonds, Goochland County – Tuckahoe Creek Service District Project, Series 2012, 0.000%, 11/01/34	11/22 at 63.13	AA	\$ 442,684
3,050	Virginia State Resources Authority, Clean Water Revenue Bonds, Series 2007, Trust 3036, 13.281%, 10/01/15 (IF)	No Opt. Call	AAA	3,904,275
19,625	Total Water and Sewer			21,524,314
\$ 499,695	Total Long-Term Investments (cost \$376,522,762)			390,766,454
	Floating Rate Obligations – (3.6)%			(9,250,000)
	Variable Rate Demand Preferred Shares, at Liquidation Value – (49.3)% (6)			(128,000,000)
	Other Assets Less Liabilities – 2.4%			6,051,265
	Net Assets Applicable to Common Shares – 100%			\$ 259,567,719

- (1) All percentages shown in the Portfolio of Investments are based on net assets applicable to common shares unless otherwise noted.
- (2) Optional Call Provisions (not covered by the report of independent registered public accounting firm): Dates (month and year) and prices of the earliest optional call or redemption. There may be other call provisions at varying prices at later dates. Certain mortgage-backed securities may be subject to periodic principal paydowns.
- (3) Ratings (not covered by the report of independent registered public accounting firm): Using the highest of Standard & Poor's Group ("Standard & Poor's"), Moody's Investors Service, Inc. ("Moody's") or Fitch, Inc. ("Fitch") rating. Ratings below BBB by Standard & Poor's, Baa by Moody's or BBB by Fitch are considered to be below investment grade. Holdings designated N/R are not rated by any of these national rating agencies.
- (4) Investment, or portion of investment, has been pledged to collateralize the net payment obligations for investments in inverse floating rate transactions.
- (5) Backed by an escrow or trust containing sufficient U.S. Government or U.S. Government agency securities, which ensure the timely payment of principal and interest. Certain bonds backed by U.S. Government or agency securities are regarded as having an implied rating equal to the rating of such securities.
- (6) Variable Rate Demand Preferred Shares, at Liquidation Value as a percentage of Total Investments is 32.8%.
- (ETM) Escrowed to maturity.
- (IF) Inverse floating rate investment.
- (UB) Underlying bond of an inverse floating rate trust reflected as a financing transaction. See Notes to Financial Statements, Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities for more information.

See accompanying notes to financial statements.

- (a) The amounts shown are based on common share equivalents.
- (b) Total Return Based on Market Value is the combination of changes in the market price per share and the effect of reinvested dividend income and reinvested capital gains distributions, if any, at the average price paid per share at the time of reinvestment. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending market price. The actual reinvestment for the last dividend declared in the period may take place over several days, and in some instances may not be based on the market price, so the actual reinvestment price may be different from the price used in the calculation. Total returns are not annualized.

Total Return Based on Common Share NAV is the combination of changes in common share NAV, reinvested dividend income at NAV and reinvested capital gains distributions at NAV, if any. The last dividend declared in the period, which is typically paid on the first business day of the following month, is assumed to be reinvested at the ending NAV. The actual reinvest price for the last dividend declared in the period may often be based on the Fund's market price (and not its NAV), and therefore may be different from the price used in the calculation. Total returns are not annualized.

- (c) Ratios do not reflect the effect of dividend payments to Auction Rate Preferred shareholders, where applicable; Net Investment Income (Loss) ratios reflect income earned and expenses incurred on assets attributable to Auction Rate Preferred Shares ("ARPS"), MTP Shares and/or VMTP Shares, where applicable.
- (d) After expense reimbursement from the Adviser, where applicable. As of September 30, 2010, the Adviser is no longer reimbursing Georgia Dividend Advantage 2 (NKG) for any fees and expenses.

- (e) The expense ratios reflect, among other things, all interest expense and other costs related to MTP Shares, VMTP Shares and/or the interest expense deemed to have been paid by the Fund on the floating rate certificates issued by the special purpose trusts for the self-deposited inverse floaters held by the Fund, where applicable, each as described in Note 1 – General Information and Significant Accounting Policies, MuniFund Term Preferred Shares and Variable Rate MuniFund Term Preferred Shares and Note 3 – Portfolio Securities and Investments in Derivatives, Inverse Floating Rate Securities, respectively, as follows:

Georgia Dividend Advantage 2 (NKG)

Year Ended 5/31:	
2014	1.89%
2013	1.51
2012	1.56
2011	1.60
2010	.55

Maryland Premium Income (NMY)

Year Ended 5/31:	
2014	1.81%
2013	1.46
2012	1.56
2011	1.00
2010	.32

- (f) Portfolio Turnover Rate is calculated based on the lesser of long-term purchases or sales (as disclosed in Note 5 – Investment Transactions) divided by the average long-term market value during the period.

N/A Fund does not have, or no longer has, a contractual reimbursement agreement with the Adviser.

See accompanying notes to financial statements.

(b) MTP Shares issued in connection with the reorganizations.

\* For the period January 26, 2010 (first issuance date of shares) through May 31, 2010.

\*\* For the period March 14, 2011 (first issuance date of shares) through May 31, 2011.

For the period August 6, 2012 (effective date of the reorganizations) through May 31, 2013.

<sup>^</sup> For the period June 1, 2013 through September 9, 2013.

See accompanying notes to financial statements.

## Notes to Financial Statements

### 1. General Information and Significant Accounting Policies

#### General Information

##### Fund Information

The state funds covered in this report and their corresponding New York Stock Exchange (“NYSE”) or NYSE MKT symbols are as follows (each a “Fund” and collectively, the “Funds”):

- Nuveen Georgia Dividend Advantage Municipal Fund 2 (NKG) (“Georgia Dividend Advantage 2 (NKG)”)
- Nuveen Maryland Premium Income Municipal Fund (NMY) (“Maryland Premium Income (NMY)”)
- Nuveen Missouri Premium Income Municipal Fund (NOM) (“Missouri Premium Income (NOM)”)
- Nuveen North Carolina Premium Income Municipal Fund (NNC) (“North Carolina Premium Income (NNC)”)
- Nuveen Virginia Premium Income Municipal Fund (NPV) (“Virginia Premium Income (NPV)”)

The Funds are registered under the Investment Company Act of 1940, as amended, as diversified closed-end registered investment companies. Common shares of Georgia Dividend Advantage 2 (NKG), Maryland Premium Income (NMY) and Virginia Premium Income (NPV) are traded on the NYSE while common shares of North Carolina Premium Income (NNC) and Missouri Premium Income (NOM) are traded on the NYSE MKT. (Common shares of Georgia Dividend Advantage 2 (NKG) were formerly traded on the NYSE MKT). Georgia Dividend Advantage 2 (NKG) and Missouri Premium Income (NOM) were organized as Massachusetts business trusts on October 26, 2001 and March 29, 1993, respectively. Maryland Premium Income (NMY), North Carolina Premium Income (NNC) and Virginia Premium Income were organized as Massachusetts business trusts on January 12, 1993.

##### Investment Adviser

The Funds’ investment adviser is Nuveen Fund Advisors, LLC (the “Adviser”), a wholly-owned subsidiary of Nuveen Investments, Inc. (“Nuveen”). The Adviser is responsible for each Fund’s overall investment strategy and asset allocation decisions. The Adviser has entered into sub-advisory agreements with Nuveen Asset Management, LLC (the “Sub-Adviser”), a subsidiary of the Adviser, under which the Sub-Adviser manages the investment portfolios of the Funds.

##### Agreement and Plan of Merger

On April 14, 2014, TIAA-CREF, a national financial services organization, announced that it had entered into an agreement (the “Purchase Agreement”) to acquire Nuveen, the parent company of the Adviser. The transaction is expected to be completed by the end of the year, subject to customary closing conditions, including obtaining necessary Nuveen fund and client consents sufficient to satisfy the terms of the Purchase Agreement and obtaining customary regulatory approvals. There can be no assurance that the transaction described above will be consummated as contemplated or that necessary conditions will be satisfied.

The consummation of the transaction will be deemed to be an “assignment” (as defined in the Investment Company Act of 1940) of the investment management agreements between the Nuveen funds and the Adviser and the investment sub-advisory agreements between the Adviser and each Nuveen fund’s sub-adviser or sub-advisers, and will result in automatic termination of each agreement. It is anticipated that the Board of Directors/Trustees of the Nuveen funds will consider a new investment management agreement with the Adviser and new investment sub-advisory agreements with each sub-adviser. If approved by the Board of Directors/Trustees, the new agreements will be presented to the Nuveen funds’ shareholders for approval, and, if so approved by shareholders, will take effect upon consummation of the transaction or such later time as shareholder approval is obtained.

The transaction is not expected to result in any change in the portfolio management of the Funds or in the Funds' investment objectives or policies.

**Investment Objectives**

Each Fund seeks to provide current income exempt from both regular federal and designated state income taxes by investing primarily in a portfolio of municipal obligations issued by state and local government authorities within a single state or certain U.S. territories.

**Significant Accounting Policies**

The following is a summary of significant accounting policies followed by the Funds in the preparation of their financial statements in accordance with U.S. generally accepted accounting principles ("U.S. GAAP").

Nuveen Investments

81

## Notes to Financial Statements (continued)

## Investment Transactions

Investment transactions are recorded on a trade date basis. Realized gains and losses from transactions are determined on the specific identification method, which is the same basis used for federal income tax purposes. Investments purchased on a when-issued/delayed delivery basis may have extended settlement periods. Any investments so purchased are subject to market fluctuation during this period. The Funds have instructed the custodian to earmark securities in the Funds' portfolios with a current value at least equal to the amount of the when-issued/delayed delivery purchase commitments. As of May 31, 2014, outstanding when-issued/delayed delivery purchase commitments were as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
Outstanding when-issued/delayed delivery purchase commitments	\$ —	\$ —	\$ 519,370	\$ —	\$ —

## Investment Income

Investment income, which reflects the amortization of premiums and includes accretion of discounts for financial reporting purposes, is recorded on an accrual basis. Investment income also reflects paydown gains and losses, if any.

## Professional Fees

Professional fees presented on the Statement of Operations consist of legal fees incurred in the normal course of operations, audit fees, tax consulting fees and, in some cases, workout expenditures. Workout expenditures are incurred in an attempt to protect or enhance an investment, or to pursue other claims or legal actions on behalf of Fund shareholders. If a refund is received for workout expenditures paid in a prior reporting period, such amounts will be recognized as "Legal fee refund" on the Statements of Operations.

## Dividends and Distributions to Common Shareholders

Dividends from net investment income are declared monthly. Net realized capital gains and/or market discount from investment transactions, if any, are distributed to shareholders at least annually. Furthermore, capital gains are distributed only to the extent they exceed available capital loss carryforwards.

Distributions to common shareholders of net investment income, net realized capital gains and/or market discount, if any, are recorded on the ex-dividend date. The amount and timing of distributions are determined in accordance with federal income tax regulations, which may differ from U.S. GAAP.

## Auction Rate Preferred Shares

Each Fund is authorized to issue Auction Rate Preferred Shares ("ARPS"). During prior fiscal periods, the Funds redeemed all of their outstanding ARPS, at liquidation value.

## MuniFund Term Preferred Shares

During the current fiscal period, the Funds had issued and outstanding MTP Shares, with a \$10 stated par value per share. Each Fund's MTP Shares were issued in one or more Series and traded on the NYSE/NYSE MKT.

Georgia Dividend Advantage (NKG) and Maryland Premium Income (NMY) redeemed all of their outstanding MTP Shares on May 30, 2014. North Carolina Premium Income (NNC) redeemed all of its outstanding MTP Shares on

March 3, 2014. Virginia Premium Income (NPV) redeemed all of its outstanding Shares on September 9, 2013.

Georgia Dividend Advantage's (NKG), Maryland Premium Income's (NMY), and North Carolina Premium Income's (NNC) MTP Shares were redeemed at their \$10 liquidation value per share, plus dividend amounts owed, using proceeds from their issuance of Variable Rate MuniFund Term Preferred ("VMTP") Shares (as described below in Variable Rate MuniFund Term Preferred Shares).

Virginia Premium Income's (NPV) MTP Shares were redeemed at their \$10 liquidation value per share, plus dividend amounts owed, using proceeds from its issuance of Variable Rate Demand Preferred ("VRDP") Shares (as described below in Variable Rate Demand Preferred Shares).

As of May 31, 2014, details of Missouri Premium Income's (NOM) MTP Shares outstanding are as follows:

Fund	Series	NYSE MKT Ticker	Shares Outstanding	Shares Outstanding at \$10 Per Share Liquidation Value	Annual Dividend Rate
Missouri Premium Income (NOM)	2015	NOM PRC	1,780,000	\$ 17,800,000	2.10%

82 Nuveen Investments

A Fund is obligated to redeem its MTP Shares by the date as specified in its offering document (“Term Redemption Date”), unless earlier redeemed or repurchased by the Fund. MTP Shares are subject to optional and mandatory redemption in certain circumstances. MTP Shares were subject to redemption at the option of the Fund (“Optional Redemption Date”), subject to a payment of premium for one year following the Optional Redemption Date (“Premium Expiration Date”), and at par thereafter. MTP Shares also will be subject to redemption, at the option of the Fund, at par in the event of certain changes in the credit rating of the MTP Shares. The Fund may be obligated to redeem certain of the MTP Shares if the Fund fails to maintain certain asset coverage and leverage ratio requirements and such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends. The Term Redemption Date, Optional Redemption Date and Premium Expiration Date for the Fund’s series of MTP Shares are as follows:

Fund	Series	NYSE MKT Ticker	Term Redemption Date	Optional Redemption Date	Premium Expiration Date
Missouri Premium Income (NOM)	2015	NOM PRC	December 1, 2015	December 1, 2011	November 30, 2012

The average liquidation value of MTP Shares outstanding for each Fund during the fiscal year ended May 31, 2014, was as follows:

	Georgia Dividend Advantage 2 (NKG)*	Maryland Premium Income (NMY)*	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)**	Virginia Premium Income (NPV)***
Average liquidation value of MTP Shares outstanding	\$ 74,945,000	\$ 166,144,000	\$ 17,880,000	\$ 124,860,000	\$ 127,408,000

\* For the period June 1, 2013 through May 30, 2014.

\*\* For the period June 1, 2013 through March 3, 2014.

\*\*\* For the period June 1, 2013 through September 9, 2013.

For financial reporting purposes, the liquidation value of MTP Shares is recorded as a liability and recognized as “MuniFund Term Preferred (“MTP”) Shares, at liquidation value” on the Statement of Assets and Liabilities. Unpaid dividends on MTP Shares are recognized as a component of “Interest payable” on the Statement of Assets and Liabilities. Dividends accrued on MTP Shares are recognized as a component of “Interest expense and amortization of offering costs” on the Statement of Operations. Costs incurred by the Funds in connection with their offerings of MTP Shares were recorded as a deferred charge, which are amortized over the life of the shares and are recognized as components of “Deferred offering costs” on the Statement of Assets and Liabilities and “Interest expense and amortization of offering costs” on the Statement of Operations. In conjunction with Georgia Dividend Advantage’s (NKG), Maryland Premium Income’s (NMY), North Carolina Premium Income’s (NNC) and Virginia Premium Income’s (NPV) redemption of MTP Shares, the remaining deferred offering costs of \$287,969, \$779,586, \$626,799 and \$661,608, respectively, were fully expensed during the current fiscal period, as the redemptions were deemed extinguishments of debt.

#### Variable Rate MuniFund Term Preferred Shares

The following Funds have issued and outstanding VMTP Shares, with a \$100,000 liquidation value per share. VMTP Shares are issued via private placement and are not publically available.

As of May 31, 2014, VMTP Shares outstanding, at liquidation value, for each Fund was as follows:

Fund	Series	Shares Outstanding	Shares Outstanding at \$100,000 Per Share Liquidation Value	
Georgia Dividend Advantage 2 (NKG)	2017	750	\$	75,000,000
Maryland Premium Income (NMY)	2017	1,670	\$	167,000,000
North Carolina Premium Income (NNC)	2017	1,250	\$	125,000,000

During the current fiscal period, Georgia Dividend Advantage (NKG), Maryland Premium Income (NMY) and North Carolina Premium Income (NNC) issued their VMTP Shares through privately negotiated offerings.

Each Fund is obligated to redeem its VMTP Shares by the date as specified in its offering document (“Term Redemption Date”), unless earlier redeemed or repurchased by the Fund. VMTP Shares are subject to optional and mandatory redemption in certain circumstances. The VMTP Shares are subject to redemption at the option of each Fund (“Optional Redemption Date”), subject to payment of premium for one year following the date of issuance (“Premium Expiration Date”), and at par thereafter. Each Fund may be obligated to redeem certain of the VMTP Shares if the Fund fails to maintain certain asset coverage and leverage ratio requirements and such failures are not cured by the applicable cure date. The redemption price

## Notes to Financial Statements (continued)

per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends. The Term Redemption Date, Optional Redemption Date and Premium Expiration Date for each Fund's VMTP Shares are as follows:

Fund	Series	Term Redemption Date	Optional Redemption Date	Premium Expiration Date
Georgia Dividend Advantage 2 (NKG)	2017	June 1, 2017	June 1, 2015	May 31, 2015
Maryland Premium Income (NMY)	2017	June 1, 2017	June 1, 2015	May 31, 2015
North Carolina Premium Income (NNC)	2017	March 1, 2017	March 1, 2015	April 30, 2015

The average liquidation value of VMTP Shares outstanding and annualized dividend rate for each Fund during the fiscal year ended May 31, 2014, were as follows:

	Georgia Dividend Advantage 2 (NKG)*	Maryland Premium Income (NMY)*	North Carolina Premium Income (NNC)**
Average liquidation value of VMTP Shares outstanding	\$ 75,000,000	\$ 167,000,000	\$ 125,000,000
Annualized dividend rate	1.00%	1.02%	1.02%

\* For the period May 20, 2014 (first issuance date of shares) through May 31, 2014.

\*\* For the period February 21, 2014 (first issuance date of shares) through May 31, 2014.

VMTP Shares generally do not trade, and market quotations are generally not available. VMTP Shares are short-term or short/intermediate-term instruments that pay a variable dividend rate tied to a short-term index, plus an additional fixed "spread" amount established at the time of issuance. The fair value of VMTP Shares is expected to be approximately their liquidation par value so long as the fixed "spread" on the VMTP Shares remains roughly in line with the "spread" rates being demanded by investors on instruments having similar terms in the current market environment. In present market conditions, the Funds' Adviser has determined that the fair value of VMTP Shares is their liquidation value, but their fair value could vary if market conditions change materially. For financial reporting purposes, the liquidation value of VMTP Shares is recorded as a liability and recognized as "Variable Rate MuniFund Term Preferred ("VMTP") Shares, at liquidation value" on the Statement of Assets and Liabilities.

Dividends on the VMTP Shares (which are treated as interest payments for financial reporting purposes) are set weekly. Unpaid dividends on VMTP Shares are recognized as a component of "Interest payable" on the Statement of Assets and Liabilities, when applicable. Dividends accrued on VMTP Shares are recognized as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

Offering costs incurred by the Funds in connection with their offerings of VMTP Shares, which were recorded as a deferred charge and are being amortized over the life of the shares, are recognized as components of "Deferred offering costs" on the Statement of Assets and Liabilities and "Interest expense and amortization of offering costs" on the Statement of Operations. Georgia Dividend Advantage (NKG), Maryland Premium Income (NMY) and North Carolina Premium Income (NNC) each incurred offering costs of \$160,000, \$185,000 and \$125,000, respectively.

Variable Rate Demand Preferred Shares

Virginia Premium Income (NPV) has issued and outstanding VRDP Shares, with a \$100,000 liquidation value per share. VRDP Shares are issued via private placement and are not publicly available.

During the current fiscal period, Virginia Premium Income (NPV) issued its outstanding VRDP Shares through a private negotiated offering.

As of May 31, 2014, details for the Fund's VRDP Shares outstanding are as follows:

Fund	Series	Shares Outstanding	Shares Outstanding at \$100,000 Per Share Liquidation Value	Maturity
Virginia Premium Income (NPV)	1	1,280	\$ 128,000,000	August 3, 2043

VRDP Shares include a liquidity feature that allows VRDP shareholders to have their shares purchased by a liquidity provider with whom the Fund has contracted in the event that purchase orders for VRDP Shares in a remarketing are not sufficient in number to be matched with the sale orders in that remarketing. The Fund is required to redeem any VRDP Shares that are still owned by the liquidity provider after six months of continuous, unsuccessful remarketing. The Fund pays an annual remarketing fee of .10% on the aggregate principal amount of all VRDP Shares outstanding. The Fund's VRDP Shares have successfully remarketed since issuance.

Dividends on the VRDP Shares (which are treated as interest payments for financial reporting purposes) are set weekly at a rate established by a remarketing agent; therefore, the market value of the VRDP Shares is expected to approximate its liquidation value. If remarketings for VRDP Shares

are continuously unsuccessful for six months, the maximum rate is designed to escalate according to a specified schedule in order to enhance the remarketing agent’s ability to successfully remarket the VRDP Shares.

Subject to certain conditions, VRDP Shares may be redeemed, in whole or in part, at any time at the option of the Fund. The Fund may also redeem certain of the VRDP Shares if the Fund fails to maintain certain asset coverage requirements and such failures are not cured by the applicable cure date. The redemption price per share is equal to the sum of the liquidation value per share plus any accumulated but unpaid dividends.

The average liquidation value of VRDP Shares outstanding and annualized dividend rate for the Fund during the period August 29, 2013 (first issuance of shares) through May 31, 2014, were as follows:

	Virginia Premium Income (NPV)
Average liquidation value of VRDP Shares outstanding	\$ 128,000,000
Annualized dividend rate	.16%

For financial reporting purposes, the liquidation value of VRDP Shares is a liability and is recognized as “Variable Rate Demand Preferred (“VRDP”) Shares, at liquidation value” on the Statement of Assets and Liabilities. Unpaid dividends on VRDP Shares are recognized as a component of “Interest payable” on the Statement of Assets and Liabilities, when applicable. Dividends accrued on VRDP Shares are recognized as a component of “Interest expense and amortization of offering costs” on the Statement of Operations. Costs incurred by the Fund in connection with its offerings of VRDP Shares were recorded as a deferred charge, which are being amortized over the life of the shares and are recognized as a component of “Deferred offering costs” on the Statement of Assets and Liabilities and “Interest expense and amortization of offering costs” on the Statement of Operations. Virginia Premium Income (NPV) incurred \$270,000 of offering costs in conjunction with its shares issued during the current fiscal period. In addition to interest expense, the Fund also pays a per annum liquidity fee to the liquidity provider, as well as a remarketing fee, which are recognized as “Liquidity fees” and “Remarketing fees,” respectively, on the Statement of Operations.

#### Common Shares Equity Shelf Programs and Offering Costs

Virginia Premium Income (NPV) has filed a registration statement with the Securities and Exchange Commission authorizing the Fund to issue 1.7 million additional common shares through an equity shelf program (“Shelf Offering”), which was declared effective during the current fiscal period.

Under this Shelf Offering, the Fund, subject to market conditions, may raise additional equity capital from time to time in varying amounts and offering methods at a net price at or above the Fund’s net asset value (“NAV”) per common share.

Authorized common shares, common shares issued and offering proceeds, net of offering costs under the Fund’s Shelf Offering during the fiscal year ended May 31, 2014 were as follows:

	Virginia Premium Income (NPV ) Year Ended 5/31/14
Authorized common shares	1,700,000*

Common shares issued	—
Offering proceeds, net of offering costs	\$ —

\* Shelf Offering declared effective by the SEC during the current fiscal period.

Costs incurred by the Fund in connection with its Shelf Offering are recorded as a deferred charge and recognized as a component of “Deferred offering costs” on the Statement of Assets and Liabilities. The deferred asset is reduced during the one-year period that additional shares are sold by reducing the proceeds from such sales and is recognized as a component of “Proceeds from shelf offering, net of offering costs” on the Statement of Changes in Net Assets, when applicable. At the end of the one-year life of the Shelf Offering period, any remaining deferred charges will be expensed accordingly and recognized as a component of “Other expenses” on the Statement of Operations. Any additional costs the Fund may incur in connection with its Shelf Offering are expensed as incurred and recognized as a component of “Proceeds from shelf offering, net of offering costs” on the Statement of Changes in Net Assets, when applicable.

#### Indemnifications

Under the Funds’ organizational documents, their officers and trustees are indemnified against certain liabilities arising out of the performance of their duties to the Funds. In addition, in the normal course of business, the Funds enter into contracts that provide general indemnifications to other parties. The Funds’ maximum exposure under these arrangements is unknown as this would involve future claims that may be made against the Funds that have not yet occurred. However, the Funds have not had prior claims or losses pursuant to these contracts and expect the risk of loss to be remote.

Nuveen Investments

Notes to Financial Statements (continued)

Netting Agreements

In the ordinary course of business, the Funds may enter into transactions subject to enforceable International Swaps and Derivative Association, Inc. (“ISDA”) master agreements or other similar arrangements (“netting agreements”). Generally, the right to offset in netting agreements allows each Fund to offset any exposure to a specific counterparty with any collateral received or delivered to that counterparty based on the terms of the agreements. Generally, a Fund manages its cash collateral and securities collateral on a counterparty basis.

As of May 31, 2014, the Funds were not invested in any portfolio securities or derivative instruments that are subject to netting agreements.

Use of Estimates

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets applicable to common shares from operations during the reporting period. Actual results may differ from those estimates.

2. Investment Valuation and Fair Value Measurements

The fair valuation input levels as described below are for fair value measurement purposes.

Investment Valuation

Prices of fixed income securities are provided by a pricing service approved by the Nuveen funds’ Board of Directors/Trustees. The pricing service establishes a security’s fair value using methods that may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor’s credit characteristics considered relevant. These securities are generally classified as Level 2. In pricing certain securities, particularly less liquid and lower quality securities, the pricing service may consider information about a security, its issuer or market activity, provided by the Adviser. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs.

Common stocks and other equity-type securities are valued at the last sales price on the securities exchange on which such securities are primarily traded and are generally classified as Level 1. Securities primarily traded on the NASDAQ National Market (“NASDAQ”) are valued, except as indicated below, at the NASDAQ Official Closing Price and are generally classified as Level 1. However, securities traded on a securities exchange or NASDAQ for which there were no transactions on a given day or securities not listed on a securities exchange or NASDAQ are valued at the quoted bid price and are generally classified as Level 2.

Certain securities may not be able to be priced by the pre-established pricing methods as described above. Such securities may be valued by the Nuveen funds’ Board of Directors/Trustees or its designee at fair value. These securities generally include, but are not limited to, restricted securities (securities which may not be publicly sold without registration under the Securities Act of 1933, as amended) for which a pricing service is unable to provide a market price; securities whose trading has been formally suspended; debt securities that have gone into default and for which there is no current market quotation; a security whose market price is not available from a pre-established pricing source; a security with respect to which an event has occurred that is likely to materially affect the value of the security after the market has closed but before the calculation of a fund’s NAV (as may be the case in non-U.S. markets on which the security is primarily traded) or make it difficult or impossible to obtain a reliable market quotation; and a security whose price, as provided by the pricing service, is not deemed to reflect the security’s fair value. As a general principle, the fair value of a security would appear to be the amount that the owner might

reasonably expect to receive for it in a current sale. A variety of factors may be considered in determining the fair value of such securities, which may include consideration of the following: yields or prices of investments of comparable quality, type of issue, coupon, maturity and rating, market quotes or indications of value from security dealers, evaluations of anticipated cash flows or collateral, general market conditions and other information and analysis, including the obligor's credit characteristics considered relevant. These securities are generally classified as Level 2 or Level 3 depending on the priority of the significant inputs. Regardless of the method employed to value a particular security, all valuations are subject to review by the Nuveen funds' Board of Directors/Trustees or its designee.

#### Fair Value Measurements

Fair value is defined as the price that would be received upon selling an investment or transferring a liability in an orderly transaction to an independent buyer in the principal or most advantageous market for the investment. A three-tier hierarchy is used to maximize the use of observable market data and minimize the use of unobservable inputs and to establish classification of fair value measurements for disclosure purposes. Observable inputs reflect the assumptions market participants would use in pricing the asset or liability. Observable inputs are based on market data obtained from sources independent of the reporting entity. Unobservable inputs reflect the reporting entity's own assumptions about the assumptions market participants would use in pricing the asset or liability. Unobservable inputs are based on the best information available in the circumstances. The following is a summary of the three-tiered hierarchy of valuation input levels.

Level 1 – Inputs are unadjusted and prices are determined using quoted prices in active markets for identical securities.

Level 2 – Prices are determined using other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment speeds, credit risk, etc.).

Level 3 – Prices are determined using significant unobservable inputs (including management's assumptions in determining the fair value of investments).

The inputs or methodologies used for valuing securities are not an indication of the risks associated with investing in those securities. The following is a summary of each Fund's fair value measurements as of the end of the reporting period:

Georgia Dividend Advantage 2 (NKG)	Level 1	Level 2	Level 3	Total
Long-Term Investments*:				
Municipal Bonds	\$ —	\$ 222,327,955	\$ —	\$ 222,327,955
Maryland Premium Income (NMY)				
Long-Term Investments*:				
Municipal Bonds	\$ —	\$ 531,018,355	\$ —	\$ 531,018,355
Common Stocks	3,197,017	—	—	3,197,017
Total	\$ 3,197,017	\$ 531,018,355	\$ —	\$ 534,215,372

Virginia Premium Income (NPV)				
Long-Term Investments*:				
Municipal Bonds	\$ —	\$ 390,766,454	\$ —	\$ 390,766,454

\* Refer to the Fund's Portfolio of Investments for industry classifications.

The Nuveen funds' Board of Directors/Trustees is responsible for the valuation process and has delegated the oversight of the daily valuation process to the Adviser's Valuation Committee. The Valuation Committee, pursuant to the valuation policies and procedures adopted by the Board of Directors/Trustees, is responsible for making fair value determinations, evaluating the effectiveness of the funds' pricing policies and reporting to the Board of Directors/Trustees. The Valuation Committee is aided in its efforts by the Adviser's dedicated Securities Valuation Team, which is responsible for administering the daily valuation process and applying fair value methodologies as approved by the Valuation Committee. When determining the reliability of independent pricing services for investments owned by the funds, the Valuation Committee, among other things, conducts due diligence reviews of the pricing services and monitors the quality of security prices received through various testing reports conducted by the Securities Valuation Team.

The Valuation Committee will consider pricing methodologies it deems relevant and appropriate when making a fair value determination, based on the facts and circumstances specific to the portfolio instrument. Fair value determinations generally will be derived as follows, using public or private market information:

- (i) If available, fair value determinations shall be derived by extrapolating from recent transactions or quoted prices for identical or comparable securities.
- (ii) If such information is not available, an analytical valuation methodology may be used based on other available information including, but not limited to: analyst appraisals, research reports, corporate action information, issuer financial statements and shelf registration statements. Such analytical valuation methodologies may include, but are not limited to: multiple of earnings, discount from market value of a similar freely-traded security, discounted cash flow analysis, book value or a multiple thereof, risk premium/yield analysis, yield to maturity and/or fundamental investment analysis.

The purchase price of a portfolio instrument will be used to fair value the instrument only if no other valuation methodology is available or deemed appropriate, and it is determined that the purchase price fairly reflects the instrument's current value.

For each portfolio security that has been fair valued pursuant to the policies adopted by the Board of Directors/Trustees, the fair value price is compared against the last available and next available market quotations. The Valuation Committee reviews the results of such testing and fair valuation occurrences are reported to the Board of Directors/Trustees.

### 3. Portfolio Securities and Investments in Derivatives

#### Portfolio Securities

##### Inverse Floating Rate Securities

Each Fund is authorized to invest in inverse floating rate securities. An inverse floating rate security is created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker-dealer. In turn, this trust (a) issues floating rate certificates, in face amounts equal to some fraction of the deposited bond's par amount or market value, that typically pay short-term tax-exempt interest rates to third parties, and (b) issues to a long-term investor (such as one of the Funds) an inverse floating rate certificate (sometimes referred to as an "inverse floater") that represents all remaining or residual interest in the trust. The income received by the inverse floater holder varies inversely with the short-term rate paid to the floating rate certificates' holders, and in most circumstances the inverse floater holder bears substantially all of the underlying bond's downside

---

## Notes to Financial Statements (continued)

investment risk and also benefits disproportionately from any potential appreciation of the underlying bond's value. The price of an inverse floating rate security will be more volatile than that of the underlying bond because the interest rate is dependent on not only the fixed coupon rate of the underlying bond but also on the short-term interest paid on the floating rate certificates, and because the inverse floating rate security essentially bears the risk of loss of the greater face value of the underlying bond.

The inverse floater held by a Fund gives the Fund the right (a) to cause the holders of the floating rate certificates to tender their notes at par, and (b) to have the broker transfer the fixed-rate bond held by the trust to the Fund, thereby collapsing the trust.

A Fund may purchase an inverse floating rate security in a secondary market transaction without first owning the underlying bond (referred to as an "externally-deposited inverse floater"), or instead by first selling a fixed-rate bond to a broker-dealer for deposit into the special purpose trust and receiving in turn the residual interest in the trust (referred to as a "self-deposited inverse floater").

An investment in an externally-deposited inverse floater is identified in the Portfolio of Investments as "(IF) – Inverse floating rate investment." The Fund's Statement of Assets and Liabilities shows only the inverse floaters and not the underlying bonds as an asset and does not reflect the short-term floating rate certificates as liabilities. Also, the Fund reflects in "Investment Income" only the net amount of earnings on its inverse floater investment (net of the interest paid to the holders of the short-term floating rate certificates and the expenses of the trust), and does not show the amount of that interest paid as an interest expense on the Statement of Operations.

An investment in a self-deposited inverse floater is accounted for as a financing transaction. In such instances, a fixed-rate bond deposited into a special purpose trust is identified in the Portfolio of Investments as "(UB) – Underlying bond of an inverse floating rate trust reflected as a financing transaction," with the Fund accounting for the short-term floating rate certificates issued by the trust, at their liquidation value, as "Floating rate obligations" on the Statement of Assets and Liabilities. In addition, the Fund reflects in "Investment Income" the entire earnings of the underlying bond and recognizes the related interest paid to the holders of the short-term floating rate certificates as a component of "Interest expense and amortization of offering costs" on the Statement of Operations.

The average floating rate obligations outstanding and average annual interest rate and fees related to self-deposited inverse floaters during the fiscal year ended May 31, 2014, were as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
Average floating rate obligations outstanding	\$ 3,245,000	\$ 21,983,658	\$ 2,225,000	\$ 14,058,205	\$ 9,250,000
Average annual interest rate and fees	.43%	.71%	.25%	.55%	.28%

As of May 31, 2014, the total amount of floating rate obligations issued by each Fund's self-deposited inverse floaters and externally-deposited inverse floaters was as follows:

Georgia	Maryland	Missouri	North Carolina	Virginia
---------	----------	----------	-------------------	----------

	Dividend Advantage 2 (NKG)	Premium Income (NMY)	Premium Income (NOM)	Premium Income (NNC)	Premium Income (NPV)
Floating rate obligations: self-deposited inverse floaters	\$ 3,245,000	\$ 21,935,000	\$ 2,225,000	\$ —	\$ 9,250,000
Floating rate obligations: externally-deposited inverse floaters	5,635,000	—	—	—	20,070,000
<b>Total</b>	<b>\$ 8,880,000</b>	<b>\$ 21,935,000</b>	<b>\$ 2,225,000</b>	<b>\$ —</b>	<b>\$ 29,320,000</b>

Each Fund may also enter into shortfall and forbearance agreements (sometimes referred to as a “recourse trust” or “credit recovery swap”) (such agreements are referred to herein as “Recourse Trusts”), with a broker-dealer by which a Fund agrees to reimburse the broker-dealer, in certain circumstances, for the difference between the liquidation value of the fixed-rate bond held by the trust and the liquidation value of the floating rate certificates issued by the trust plus any shortfalls in interest cash flows. Under these agreements, a Fund’s potential exposure to losses related to or on inverse floaters may increase beyond the value of a Fund’s inverse floater investments as a Fund may potentially be liable to fulfill all amounts owed to holders of the floating rate certificates. At period end, any such shortfall is denoted as “Unrealized depreciation on Recourse Trusts” on the Statement of Assets and Liabilities.

As of May 31, 2014, each Fund's maximum exposure to the floating rate obligations issued by externally-deposited Recourse Trusts, was as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
Maximum exposure to Recourse Trusts	\$ —	\$ —	\$ —	\$ —	\$ 13,330,000

#### Zero Coupon Securities

A zero coupon security does not pay a regular interest coupon to its holders during the life of the security. Income to the holder of the security comes from accretion of the difference between the original purchase price of the security at issuance and the par value of the security at maturity and is effectively paid at maturity. The market prices of zero coupon securities generally are more volatile than the market prices of securities that pay interest periodically.

#### Investments in Derivatives

Each Fund is authorized to invest in certain derivative investments, such as futures, options and swap contracts. Each Fund will limit its investments in futures, options on futures and swap contracts to the extent necessary for the Adviser to claim exclusion from registration by the Commodity Futures Trading Commission as a commodity pool operator with respect to the Fund. The Funds record derivative instruments at fair value, with changes in fair value recognized on the Statement of Operations, when applicable. Even though the Funds' investments in derivatives may represent economic hedges, they are not considered to be hedge transactions for financial reporting purposes. Although the Funds are authorized to invest in derivative instruments and may do so in the future, they did not make any such investments during the fiscal year ended May 31, 2014.

#### Market and Counterparty Credit Risk

In the normal course of business each Fund may invest in financial instruments and enter into financial transactions where risk of potential loss exists due to changes in the market (market risk) or failure of the other party to the transaction to perform (counterparty credit risk). The potential loss could exceed the value of the financial assets recorded on the financial statements. Financial assets, which potentially expose each Fund to counterparty credit risk, consist principally of cash due from counterparties on forward, option and swap transactions, when applicable. The extent of each Fund's exposure to counterparty credit risk in respect to these financial assets approximates their carrying value as recorded on the Statement of Assets and Liabilities.

Each Fund helps manage counterparty credit risk by entering into agreements only with counterparties the Adviser believes have the financial resources to honor their obligations and by having the Adviser monitor the financial stability of the counterparties. Additionally, counterparties may be required to pledge collateral daily (based on the daily valuation of the financial asset) on behalf of each Fund with a value approximately equal to the amount of any unrealized gain above a pre-determined threshold. Reciprocally, when each Fund has an unrealized loss, the Funds have instructed the custodian to pledge assets of the Funds as collateral with a value approximately equal to the amount of the unrealized loss above a pre-determined threshold. Collateral pledges are monitored and subsequently adjusted if and when the valuations fluctuate, either up or down, by at least the pre-determined threshold amount.

#### 4. Fund Shares

##### Common Shares

Since the inception of the Funds' repurchase programs, the Funds have not repurchased any of their outstanding common shares.

Transactions in common shares were as follows:

	Georgia Dividend Advantage 2 (NKG)		Maryland Premium Income (NMY)		Missouri Premium Income (NOM)	
	Year Ended	Year Ended	Year Ended	Year Ended	Year Ended	Year Ended
	5/31/14	5/31/13	5/31/14	5/31/13	5/31/14	5/31/13

Nuveen Investments 91

## Notes to Financial Statements (continued)

## 6. Income Tax Information

Each Fund is a separate taxpayer for federal income tax purposes. Each Fund intends to distribute substantially all of its net investment income and net capital gains to shareholders and to otherwise comply with the requirements of Subchapter M of the Internal Revenue Code applicable to regulated investment companies. Therefore, no federal income tax provision is required. Furthermore, each Fund intends to satisfy conditions that will enable interest from municipal securities, which is exempt from regular federal and designated state income taxes, to retain such tax-exempt status when distributed to shareholders of the Funds. Net realized capital gains and ordinary income distributions paid by the Funds are subject to federal taxation.

For all open tax years and all major taxing jurisdictions, management of the Funds has concluded that there are no significant uncertain tax positions that would require recognition in the financial statements. Open tax years are those that are open for examination by taxing authorities (i.e., generally the last four tax year ends and the interim tax period since then). Furthermore, management of the Funds is also not aware of any tax positions for which it is reasonably possible that the total amounts of unrecognized tax benefits will significantly change in the next twelve months.

The following information is presented on an income tax basis. Differences between amounts for financial statement and federal income tax purposes are primarily due to timing differences in recognizing taxable market discount, timing differences in recognizing certain gains and losses on investment transactions and the treatment of investments in inverse floating rate securities reflected as financing transactions, if any. To the extent that differences arise that are permanent in nature, such amounts are reclassified within the capital accounts as detailed below. Temporary differences do not require reclassification. Temporary and permanent differences do not impact the NAVs of the Funds.

As of May 31, 2014, the cost and unrealized appreciation (depreciation) of investments, as determined on a federal income tax basis, were as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
Cost of investments	\$ 208,404,537	\$ 490,486,424	\$ 46,578,507	\$ 346,017,111	\$ 366,810,789
Gross unrealized:					
Appreciation	\$ 11,836,626	\$ 28,616,590	\$ 3,299,812	\$ 21,432,430	\$ 24,211,035
Depreciation	(1,157,779)	(6,822,634)	(372,523)	(1,092,329)	(9,505,370)
Net unrealized appreciation (depreciation) of investments	\$ 10,678,847	\$ 21,793,956	\$ 2,927,289	\$ 20,340,101	\$ 14,705,665

Permanent differences, primarily due to federal taxes paid, nondeductible offering costs, distribution character reclassifications, paydowns and nondeductible reorganization expenses resulted in reclassifications among the Funds' components of common share net assets as of May 31, 2014, the Funds' tax year end, as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
--	--	--	--	---	--

Paid-in-surplus	\$ (577,844)	\$ (1,108,688)	\$ (93,684)	\$ (987,565)	\$ (693,179)
Undistributed (Over-distribution of) net investment income	493,915	1,100,650	93,681	977,269	700,849
Accumulated net realized gain (loss)	83,929	8,038	3	10,296	(7,670)

The tax components of undistributed net tax-exempt income, net ordinary income and net long-term capital gains as of May 31, 2014, the Funds' tax year end, were as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
Undistributed net tax-exempt income <sup>1</sup>	\$ 185,325	\$ 1,924,493	\$ 354,669	\$ 616,922	\$ 2,187,299
Undistributed net ordinary income <sup>2</sup>	—	10,895	—	—	—
Undistributed net long-term capital gains	—	—	—	496,406	—

- 1 Undistributed net tax-exempt income (on a tax basis) has not been reduced for the dividend declared on May 1, 2014, paid on June 2, 2014.
- 2 Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.

The tax character of distributions paid during the Funds' tax years ended May 31, 2014 and May 31, 2013 was designated for purposes of the dividends paid deduction as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
2014					
Distributions from net tax-exempt income <sup>3</sup>	\$ 8,917,503	\$ 21,036,311	\$ 2,080,261	\$ 13,080,537	\$ 14,297,444
Distributions from net ordinary income <sup>2</sup>	819	55,441	—	3,040	9,687
Distributions from net long-term capital gains <sup>4</sup>	—	—	—	—	139,974

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	North Carolina Premium Income (NNC)	Virginia Premium Income (NPV)
2013					
Distributions from net tax-exempt income	\$ 7,902,906	\$ 18,685,110	\$ 2,087,163	\$ 12,772,122	\$ 13,813,122
Distributions from net ordinary income <sup>2</sup>	8,446	—	—	8,772	50,192
Distributions from net long-term capital gains	—	—	—	—	274,262

- 2 Net ordinary income consists of taxable market discount income and net short-term capital gains, if any.
- 3 The Funds hereby designate these amounts paid during the fiscal year ended May 31, 2014, as Exempt Interest Dividends.
- 4 The Funds designated as a long-term capital gain dividend, pursuant to the Internal Revenue Code Section 852(b)(3), the amount necessary to reduce earnings and profits of the Funds related to net capital gain to zero for the tax year ended May 31, 2014.

As of May 31, 2014, the Funds' tax year end, the following Funds had unused capital loss carryforwards available for federal income tax purposes to be applied against future capital gains, if any. If not applied, the carryforwards will expire as shown in the following table. The losses not subject to expiration will be utilized first by a Fund.

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY) <sup>5</sup>	Missouri Premium Income (NOM)	Virginia Premium Income (NPV)
Expiration:				
May 31, 2016	\$ 462,549	\$ 851,610	\$ —	\$ —
May 31, 2017	1,635,823	172,377	77,824	—
May 31, 2018	1,329,548	—	91,539	—
May 31, 2019	48,370	—	—	—

Edgar Filing: NUVEEN GEORGIA DIVIDEND ADVANTAGE MUNICIPAL FUND 2 - Form N-CSR

Not subject to expiration	895,118	6,790,849	691,272	6,487,908
<b>Total</b>	<b>\$ 4,371,408</b>	<b>\$ 7,814,836</b>	<b>\$ 860,635</b>	<b>\$ 6,487,908</b>

5 A portion of Maryland Premium Income's (NMY) capital loss carryforward is subject to limitation under the Internal Revenue Code and related regulations.

During the Funds' tax year ended May 31, 2014, the following Fund utilized capital loss carryforwards as follows:

	North Carolina Premium Income (NNC)
<b>Utilized capital loss carryforwards</b>	<b>\$ 734,088</b>

The Funds have elected to defer late-year losses in accordance with federal income tax rules. These losses are treated as having arisen on the first day of the following fiscal year. The following Funds have elected to defer losses as follows:

	Georgia Dividend Advantage 2 (NKG)	Maryland Premium Income (NMY)	Missouri Premium Income (NOM)	Virginia Premium Income (NPV)
Post-October capital losses <sup>6</sup>	\$ 944,720	\$ 375,356	\$ 71,083	\$ 1,057,596
Late-year ordinary losses <sup>7</sup>	—	—	—	—

6 Capital losses incurred from November 1, 2013 through May 31, 2014, the Funds' tax year end.

7 Ordinary losses incurred from January 1, 2014 through May 31, 2014 and specified losses incurred from November 1, 2013 through May 31, 2014.

## Notes to Financial Statements (continued)

## 7. Management Fees and Other Transactions with Affiliates

Each Fund's management fee compensates the Adviser for overall investment advisory and administrative services and general office facilities. The Sub-Adviser is compensated for its services to the Funds from the management fees paid to the Adviser.

Each Fund's management fee consists of two components – a fund-level fee, based only on the amount of assets within the Fund, and a complex-level fee, based on the aggregate amount of all eligible fund assets managed by the Adviser. This pricing structure enables Fund shareholders to benefit from growth in the assets within their respective Fund as well as from growth in the amount of complex-wide assets managed by the Adviser.

The annual fund-level fee for each Fund, payable monthly, is calculated according to the following schedules:

	Georgia Dividend Advantage 2 (NKG) Fund-Level Fee Rate
Average Daily Managed Assets*	
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For managed assets over \$2 billion	.3750

	North Carolina Premium Income (NNC) Maryland Premium Income (NMY) Missouri Premium Income (NOM) Virginia Premium Income (NPV) Fund-Level Fee Rate
Average Daily Managed Assets*	
For the first \$125 million	.4500%
For the next \$125 million	.4375
For the next \$250 million	.4250
For the next \$500 million	.4125
For the next \$1 billion	.4000
For the next \$3 billion	.3875
For managed assets over \$5 billion	.3750

The annual complex-level fee for each Fund, payable monthly, is calculated according to the following schedule:

Complex-Level Managed Asset Breakpoint Level*	Effective Rate at Breakpoint Level
\$55 billion	.2000%
\$56 billion	.1996
\$57 billion	.1989
\$60 billion	.1961
\$63 billion	.1931
\$66 billion	.1900
\$71 billion	.1851
\$76 billion	.1806
\$80 billion	.1773
\$91 billion	.1691
\$125 billion	.1599

\$200 billion	.1505
\$250 billion	.1469
\$300 billion	.1445

- \* For the fund-level and complex-level fees, managed assets include closed-end fund assets managed by the Adviser that are attributable to certain types of leverage. For these purposes, leverage includes the funds' use of preferred stock and borrowings and certain investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities, subject to an agreement by the Adviser as to certain funds to limit the amount of such assets for determining managed assets in certain circumstances. The complex-level fee is calculated based upon the aggregate daily managed assets of all Nuveen Funds that constitute "eligible assets." Eligible assets do not include assets attributable to investments in other Nuveen Funds or assets in excess of \$2 billion added to the Nuveen Fund complex in connection with the Adviser's assumption of the management of the former First American Funds effective January 1, 2011. As of May 31, 2014, the complex-level fee rate for each of these Funds was .1657%.

The Funds pay no compensation directly to those of its trustees who are affiliated with the Adviser or to its officers, all of whom receive remuneration for their services to the Funds from the Adviser or its affiliates. The Board of Trustees has adopted a deferred compensation plan for independent trustees that enables trustees to elect to defer receipt of all or a portion of the annual compensation they are entitled to receive from certain Nuveen-advised funds. Under the plan, deferred amounts are treated as though equal dollar amounts had been invested in shares of select Nuveen-advised funds.

Quarterly Form N-Q Portfolio of Investments Information

Each Fund is required to file its complete schedule of portfolio holdings with the Securities and Exchange Commission (SEC) for the first and third quarters of each fiscal year on Form N-Q. You may obtain this information directly from the SEC. Visit the SEC on-line at <http://www.sec.gov> or in person at the SEC's Public Reference Room in Washington, D.C. Call the SEC toll-free at (800) SEC -0330 for room hours and operation.

Nuveen Funds' Proxy Voting Information

You may obtain (i) information regarding how each fund voted proxies relating to portfolio securities held during the most recent twelve-month period ended June 30, without charge, upon request, by calling Nuveen Investments toll-free at (800) 257-8787 or on Nuveen's website at [www.nuveen.com](http://www.nuveen.com) and (ii) a description of the policies and procedures that each fund used to determine how to vote proxies relating to portfolio securities without charge, upon request, by calling Nuveen Investments toll free at (800) 257-8787. You may also obtain this information directly from the SEC. Visit the SEC on-line at <http://www.sec.gov>.

CEO Certification Disclosure

Each Fund's Chief Executive Officer (CEO) has submitted to the New York Stock Exchange (NYSE) the annual CEO certification as required by Section 303A.12(a) of the NYSE Listed Company Manual. Each Fund has filed with the SEC the certification of its CEO and Chief Financial Officer required by Section 302 of the Sarbanes-Oxley Act.

Share Information

Each Fund intends to repurchase shares of its own common stock at such times and in such amounts as is deemed advisable. During the period covered by this report, the Fund repurchased shares of its common stock as shown in the accompanying table. Any future repurchases will be reported to shareholders in the next annual or semi-annual report.

FINRA BrokerCheck: The Financial Industry Regulatory Authority (FINRA) provides information regarding the disciplinary history of FINRA member firms and associated investment professionals. This information as well as an investor brochure describing FINRA BrokerCheck is available to the public by calling the FINRA BrokerCheck Hotline number at (800) 289-9999 or by visiting [www.FINRA.org](http://www.FINRA.org).

Glossary of Terms  
Used in this Report

**Auction Rate Bond:** An auction rate bond is a security whose interest payments are adjusted periodically through an auction process, which process typically also serves as a means for buying and selling the bond. Auctions that fail to attract enough buyers for all the shares offered for sale are deemed to have “failed,” with current holders receiving a formula-based interest rate until the next scheduled auction.

**Average Annual Total Return:** This is a commonly used method to express an investment’s performance over a particular, usually multi-year time period. It expresses the return that would have been necessary each year to equal the investment’s actual cumulative performance (including change in NAV or market price and reinvested dividends and capital gains distributions, if any) over the time period being considered.

**Duration:** Duration is a measure of the expected period over which a bond’s principal and interest will be paid, and consequently is a measure of the sensitivity of a bond’s or bond fund’s value to changes when market interest rates change. Generally, the longer a bond’s or fund’s duration, the more the price of the bond or Fund will change as interest rates change.

**Effective Leverage:** Effective leverage is a fund’s effective economic leverage, and includes both regulatory leverage (see Leverage) and the leverage effects of certain derivative investments in the fund’s portfolio. Currently, the leverage effects of Tender Option Bond (TOB) inverse floater holdings are included in effective leverage values, in addition to any regulatory leverage.

**Gross Domestic Product (GDP):** The total market value of all final goods and services produced in a country/region in a given year, equal to total consumer, investment and government spending, plus the value of exports, minus the value of imports.

**Inverse Floating Rate Securities:** Inverse floating rate securities, also known as inverse floaters or tender option bonds (TOBs), are created by depositing a municipal bond, typically with a fixed interest rate, into a special purpose trust created by a broker dealer. This trust, in turn, (a) issues floating rate certificates typically paying short-term tax-exempt interest rates to third parties in amounts equal to some fraction of the deposited bond’s par amount or market value, and (b) issues an inverse floating rate certificate (sometimes referred to as an “inverse floater”) to an investor (such as a Fund) interested in gaining investment exposure to a long-term municipal bond. The income received by the holder of the inverse floater varies inversely with the short term rate paid to the floating rate certificates’ holders, and in most circumstances the holder of the inverse floater bears substantially all of the underlying bond’s downside investment risk. The holder of the inverse floater typically also benefits disproportionately from any potential appreciation of the underlying bond’s value. Hence, an inverse floater essentially represents an investment in the underlying bond on a leveraged basis.

**Leverage:** Leverage is created whenever a fund has investment exposure (both reward and/or risk) equivalent to more than 100% of the investment capital.

**Lipper Other States Municipal Debt Funds Classification Average:** Calculated using the returns of all closed-end funds in this category. Lipper returns account for the effects of management fees and assume reinvestment of distributions, but do not reflect any applicable sales charges.

**Net Asset Value (NAV) Per Share:** A fund’s Net Assets is equal to its total assets (securities, cash, accrued earnings and receivables) less its total liabilities. NAV per share is equal to the fund’s Net Assets divided by its

number of shares outstanding.

Pre-Refunding: Pre-Refunding, also known as advanced refundings or refinancings, is a procedure used by state and local governments to refinance municipal bonds to lower interest expenses. The issuer sells new bonds with a lower yield and uses the proceeds to buy U.S. Treasury securities, the interest from which is used to make payments on the higher-yielding bonds. Because of this collateral, pre-refunding generally raises a bond's credit rating and thus its value.

---

**Regulatory Leverage:** Regulatory Leverage consists of preferred shares issued by or borrowings of a fund. Both of these are part of a fund's capital structure. Regulatory leverage is subject to asset coverage limits set in the Investment Company Act of 1940.

**S&P Municipal Bond Georgia Index:** An unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade Georgia municipal bond market. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees.

**S&P Municipal Bond Index:** An unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade U.S. municipal bond market. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees.

**S&P Municipal Bond Maryland Index:** An unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade Maryland municipal bond market. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees.

**S&P Municipal Bond Missouri Index:** An unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade Missouri municipal bond market. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees.

**S&P Municipal Bond North Carolina Index:** An unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade North Carolina municipal bond market. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees.

**S&P Municipal Bond Virginia Index:** An unleveraged, market value-weighted index designed to measure the performance of the tax-exempt, investment-grade Virginia municipal bond market. Index returns assume reinvestment of distributions, but do not reflect any applicable sales charges or management fees.

**Total Investment Exposure:** Total investment exposure is a fund's assets managed by the Adviser that are attributable to financial leverage. For these purposes, financial leverage includes a fund's use of preferred stock and borrowings and investments in the residual interest certificates (also called inverse floating rate securities) in tender option bond (TOB) trusts, including the portion of assets held by a TOB trust that has been effectively financed by the trust's issuance of floating rate securities.

**Zero Coupon Bond:** A zero coupon bond does not pay a regular interest coupon to its holders during the life of the bond. Tax-exempt income to the holder of the bond comes from accretion of the difference between the original purchase price of the bond at issuance and the par value of the bond at maturity and is effectively paid at maturity. The market prices of zero coupon bonds generally are more volatile than the market prices of bonds that pays interest periodically.

Reinvest Automatically,  
Easily and Conveniently

Nuveen makes reinvesting easy. A phone call is all it takes to set up your reinvestment account.

---

#### Nuveen Closed-End Funds Automatic Reinvestment Plan

Nuveen Closed-End Fund allows you to conveniently reinvest distributions in additional Fund shares. By choosing to reinvest, you'll be able to invest money regularly and automatically, and watch your investment grow through the power of compounding. Just like distributions in cash, there may be times when income or capital gains taxes may be payable on distributions that are reinvested. It is important to note that an automatic reinvestment plan does not ensure a profit, nor does it protect you against loss in a declining market.

#### Easy and convenient

To make recordkeeping easy and convenient, each month you'll receive a statement showing your total distributions, the date of investment, the shares acquired and the price per share, and the total number of shares you own.

#### How shares are purchased

The shares you acquire by reinvesting will either be purchased on the open market or newly issued by the Fund. If the shares are trading at or above net asset value at the time of valuation, the Fund will issue new shares at the greater of the net asset value or 95% of the then-current market price. If the shares are trading at less than net asset value, shares for your account will be purchased on the open market. If the Plan Agent begins purchasing Fund shares on the open market while shares are trading below net asset value, but the Fund's shares subsequently trade at or above their net asset value before the Plan Agent is able to complete its purchases, the Plan Agent may cease open-market purchases and may invest the uninvested portion of the distribution in newly-issued Fund shares at a price equal to the greater of the shares' net asset value or 95% of the shares' market value on the last business day immediately prior to the purchase date. Distributions received to purchase shares in the open market will normally be invested shortly after the distribution payment date. No interest will be paid on distributions awaiting reinvestment. Because the market price of the shares may increase before purchases are completed, the average purchase price per share may exceed the market price at the time of valuation, resulting in the acquisition of fewer shares than if the distribution had been paid in shares issued by the Fund. A pro rata portion of any applicable brokerage commissions on open market purchases will be paid by Plan participants. These commissions usually will be lower than those charged on individual transactions.

#### Flexible

You may change your distribution option or withdraw from the Plan at any time, should your needs or situation change. You can reinvest whether your shares are registered in your name, or in the name of a brokerage firm, bank, or other nominee. Ask your investment advisor if his or her firm will participate on your behalf. Participants whose shares are registered in the name of one firm may not be able to transfer the shares to another firm and continue to participate in the Plan. The Fund reserves the right to amend or terminate the Plan at any time. Although the Fund reserves the right to amend the Plan to include a service charge payable by the participants, there is no direct service charge to participants in the Plan at this time.

Call today to start reinvesting distributions

For more information on the Nuveen Automatic Reinvestment Plan or to enroll in or withdraw from the Plan, speak with your financial advisor or call us at (800) 257-8787.

## Board Members &amp; Officers

The management of the Funds, including general supervision of the duties performed for the Funds by the Adviser, is the responsibility of the Board of Trustees of the Funds. The number of trustees of the Funds is currently set at twelve. None of the trustees who are not “interested” persons of the Funds (referred to herein as “independent trustees”) has ever been a director or employee of, or consultant to, Nuveen or its affiliates. The names and business addresses of the trustees and officers of the Funds, their principal occupations and other affiliations during the past five years, the number of portfolios each oversees and other directorships they hold are set forth below.

Name, Year of Birth & Address	Position(s) Held with the Funds	Year First Elected or Appointed  and Term(1)	Principal Occupation(s) Including other  Directorships During Past 5 Years	Number of Portfolios in Fund Complex Overseen by Board Member
-------------------------------------	------------------------------------	--	---	---
