2 ANNUAL REPORT

OCTOBER 31, 2008

A Letter to Shareholders

Dear Shareholder

It has been a tumultuous period for investors, marked by almost daily headlines of deepening turmoil in financial markets and a darkening economic outlook. The news took an extraordinarily heavy tone late in the period as the credit crisis boiled over and triggered unprecedented failures and consolidation in the financial sector, stoking fears of a market and economic collapse and

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

prompting a series of new government programs designed to contain and combat the fallout.

The Federal Reserve Board (the Fed) has taken decisive measures to restore liquidity and stabilize the financial system. Key moves included slashing the target federal funds rate 250 basis points (2.50%) between November 2007 and April 2008 and providing massive cash injections and lending programs. In October, as credit conditions further deteriorated, the central bank cut the key interest rate by 50 basis points on two separate occasions on October 8 in coordination with five other global central banks, and again during its regularly scheduled meeting on October 29. This left the key short-term rate at just 1.0%, its lowest level since 2004. While the U.S. economy appeared fairly resilient through the second quarter of 2008, the third quarter saw a contraction of 0.5%, and a more significant decline is expected for the fourth quarter. Moreover, on December 1, the National Bureau of Economic Research confirmed that the U.S. had entered a recession in December 2007.

Against this backdrop, U.S. equity markets experienced intense volatility, with periods of downward pressure punctuated by sharp rebounds. Losses were significant and broad-based, though small-cap stocks fared moderately better than their larger counterparts. Non-U.S. markets decelerated at a considerably faster pace than domestic equities a stark reversal of recent years trends, when international stocks generally outpaced U.S. stocks.

Treasury issues also traded in a volatile fashion, but rallied overall (yields fell and prices correspondingly rose) and outperformed other fixed income assets as investors continued their flight to higher quality and more liquid securities. Tax-exempt issues generally

underperformed, as problems among municipal bond insurers and the collapse in the market for auction rate securities afflicted the group throughout the course of the past year. At the same time, the above mentioned economic headwinds and malfunctioning credit markets plagued the high yield sector, with the third quarter of 2008 marking one of the worst periods in history for the asset class.

Facing unprecedented volatility and macro pressures, the major benchmark indexes generally recorded losses for the six- and 12-month reporting periods:

Total Returns as of October 31, 2008	6-month	12-month
U.S. equities (S&P 500 Index)	(29.28)%	(36.10)%
Small cap U.S. equities (Russell 2000 Index)	(24.39)	(34.16)
International equities (MSCI Europe, Australasia, Far East Index)	(41.21)	(46.62)
Fixed income (Barclays Capital U.S. Aggregate Index*)	(3.63)	0.30
Tax-exempt fixed income (Barclays Capital Municipal Bond Index*)	(4.70)	(3.30)

3

Fund Summary as of October 31, 2008

BlackRock Broad Investment Grade 2009 Term Trust Inc.

Investment Objective

BlackRock Broad Investment Grade 2009 Term Trust Inc. (BCT) (the Fund) seeks to manage a portfolio of fixed income securities that will return \$15 per share (the initial public offering price per share) to investors on or about December 31, 2009 while providing high monthly income.

Performance

For the 12 months ended October 31, 2008, the Fund returned (13.82)% based on market price and (0.07)% based on net asset value (NAV). For the same period, the closed-end Lipper U.S. Mortgage Funds category posted an average return of (10.48)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund moved from a premium to NAV to a discount by period-end, which accounts for the difference between performance based on price and performance based on NAV. The Fund matures in December 2009 and has an effective duration of 0.72 years, which is shorter than its Lipper category peers. While its shorter duration hindered performance versus funds investing in U.S. agency mortgage-backed securities (MBS), the Fund significantly outperformed funds that invest in non-agency MBS.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

4 ANNUAL REPORT

OCTOBER 31, 2008

Fund Summary as of October 31, 2008

BlackRock Enhanced Capital and Income Fund, Inc.

Investment Objective

BlackRock Enhanced Capital and Income Fund, Inc. (CII) (the Funds) seeks to provide investors with a combination of current income and capital appreciation. The Fund seeks to achieve its investment objective by investing primarily in a diversified portfolio of common stocks in an attempt to generate current income and by employing a strategy of writing (selling) call options on equity indexes in an attempt to generate gains from option premiums primarily on the S&P 500 Index.

Performance

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

The Fund recently changed its fiscal year end to October 31. For the 12 months ended October 31, 2008, the Fund returned (32.17)% based on market price and (31.00)% based on NAV. For the same period, the benchmark S&P 500 Citigroup Value Index returned (38.07)% . All returns reflect reinvestment of dividends. The Fund's discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund's options investments were the most significant contributor to performance over the period. From a sector perspective, stock selection in consumer staples, healthcare and utilities proved advantageous, as did an underweight in financials and an overweight in energy. Conversely, stock selection in information technology, materials, financials and energy hindered performance, as did an underweight in utilities.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

ANNUAL REPORT

OCTOBER 31, 2008

5

Fund Summary as of October 31, 2008

BlackRock Global Floating Rate Income Trust

Investment Objective

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

BlackRock Global Floating Rate Income Trust (BGT) (the Fund) seeks to provide a high level of current income and to seek the preservation of capital. The Fund seeks to achieve its objective by investing in a global portfolio of primarily floating and variable rate securities.

Performance

The Fund recently changed its fiscal year end to October 31. For the 12 months ended October 31, 2008, the Fund returned (36.76)% based on market price and (32.72)% based on NAV. For the same period, the closed-end Lipper Loan Participation Funds category posted an average return of (32.26)% on a NAV basis. All returns reflect reinvestment of dividends. The Fund's discount to NAV, which widened during the period, accounts for the difference between performance based on price and performance based on NAV. The high yield loan market came under intense pressure during the period due to adverse credit conditions and forced liquidations of loan portfolios by financial institutions, hedge funds and other leveraged investors. The average price of a loan in the Barclays Capital High Yield Loan Index dropped from 96.8 to 73.0.

The views expressed reflect the opinions of BlackRock as of the date of this report and are subject to change based on changes in market, economic or other conditions. These views are not intended to be a forecast of future events and are no guarantee of future results.

6 ANNUAL REPORT

OCTOBER 31, 2008

Fund Summary as of October 31, 2008

BlackRock Preferred and Corporate Income Strategies Fund, Inc.

Investment Objective

BlackRock Preferred and Corporate Income Strategies Fund, Inc. (PSW) (the Fund) seeks to provide shareholders with high current income. The secondary objective of the Fund is to seek to provide shareholders with capital appreciation. The Fund seeks to achieve its objectives by investing primarily in a portfolio of preferred securities and debt securities, including convertible securities that may be converted into common stock or other securities of the same or a different issuer.

Performance

For the 12 months ended October 31, 2008, the Fund returned (55.38)% based on market price and (58.09)% based on NAV. For the same period, the closed-end Lipper Income & Preferred Stock Funds category posted an average return of (47.54)% on a NAV basis.

All returns reflect reinvestment of dividends. The Fund's discount to NAV, which narrowed during the period, accounts for the difference between performance based on price and performance based on NAV. The Fund's Lipper category contains both preferred bond and equity funds, both of which suffered large losses as financial markets sold off sharply and preferred securities of financial issuers, who make up a significant percentage of the market, came under extreme pressure due to uncertainty about their financial condition.

10 ANNUAL REPORT

OCTOBER 31, 2008

The Benefits and Risks of Leveraging

The Funds may utilize leverage to seek to enhance the yield and NAV of their Common Shares. However, these objectives cannot be achieved in all interest rate environments.

To leverage, BlackRock Global Floating Rate Income Trust, BlackRock Preferred and Corporate Income Strategies Fund, Inc., BlackRock Preferred and Equity Advantage Trust, BlackRock Preferred Income Strategies Fund, Inc. and BlackRock Preferred Opportunity Trust issue Preferred Shares, which pay dividends at prevailing short-term interest rates. In addition, certain Funds may utilize leverage through borrowings or issuance of short-term debt securi-

ties including reverse repurchase agreements and credit facility borrowings. In general, the concept of leveraging is based on the premise that the cost of assets to be obtained from leverage will be based on short-term interest rates, which normally will be lower than the income earned by each Fund on its longer-term portfolio investments. To the extent that the total assets of each Fund (including the assets obtained from leverage) are invested in higher-yielding portfolio investments, each Fund's Common Shareholders will benefit from the incremental yield.

The interest earned on securities purchased with the proceeds from leverage is paid to Common Shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV of each Fund's Common Shares. However, in order to benefit Common Shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. If the yield curve becomes negatively sloped, meaning short-term interest rates exceed long-term interest rates, returns to Common Shareholders will be lower than if the Funds had not used leverage.

To illustrate these concepts, assume a Fund's Common Shares capitalization is \$100 million and it issues Preferred Shares for an additional \$50 million, creating a total value of \$150 million available for investment in long-term municipal bonds. If prevailing short-term interest rates are 3% and long-term interest rates are 6%, the yield curve has a strongly positive slope. In this case, the Fund pays dividends on the \$50 million of Preferred Shares based on the lower short-term interest rates. At the same time, the Fund's total portfolio of \$150 million earns the income based on long-term interest rates. Conversely, if prevailing short-term interest rates rise above long-term interest rates of 6%, the yield curve has a negative slope. In this case, the Fund pays dividends on the higher short-term interest rates whereas the Fund's total portfolio earns income based on lower long-term interest rates.

In this case, the dividends paid to Preferred Shareholders are significantly lower than the income earned on the fund's long-term investments, and therefore the Common Shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pickup on the Common Shares will be reduced or eliminated completely.

Furthermore, the value of the Fund's portfolio investments generally varies inversely with the direction of long-term interest rates, although other factors can influence the value of portfolio investments. In contrast, the redemption value of the Fund's Preferred Shares does not fluctuate in relation to interest rates. As a result, changes in interest rates can influence the Fund's NAV positively or negatively in addition to the impact on Fund performance from leverage from Preferred Shares or other methods discussed above.

The use of leverage may enhance opportunities for increased returns to the Fund and Common Shareholders, but as described above, they also create risks as short- or long-term interest rates fluctuate. Leverage also will generally cause greater changes in a Fund's NAV, market price and dividend rate than

a comparable portfolio without leverage. If the income derived from securities purchased with assets received from leverage exceeds the cost of leverage, the Fund's net income will be greater than if leverage had not been used. Conversely, if the income from the securities purchased is not sufficient to cover the cost of leverage, the Fund's net income will be less than if leverage had not been used, and therefore the amount available for distribution to shareholders will be reduced. The Fund may be required to sell portfolio securities at inopportune times or below fair market values in order to comply with regulatory requirements applicable to the use of leverage or as required by the terms of leverage instruments which may cause a Fund to incur losses. The use of leverage may limit a Fund's ability to invest in certain types of securities or use certain types of hedging strategies, such as in the case of certain restrictions imposed by ratings agencies that rate preferred shares issued by the Fund. The Fund will incur expenses in connection with the use of leverage, all of which are borne by the holders of the Common Shares and may reduce returns on the Common Shares.

Under the Investment Company Act of 1940, BlackRock Global Floating Rate Income Trust, BlackRock Preferred and Corporate Income Strategies Fund, Inc., BlackRock Preferred and Equity Advantage Trust, BlackRock Preferred Income Strategies Fund, Inc. and BlackRock Preferred Opportunity Trust are permitted to issue Preferred Shares in an amount of up to 50% of their total managed assets at the time of issuance. Under normal circumstances, each Fund anticipates that the total economic leverage from Preferred Shares, reverse repurchase agreements and credit facility borrowings will not exceed 50% of its total managed assets at the time such leverage is incurred. As of October 31, 2008, the Funds had economic leverage from Preferred Shares, reverse repurchase agreements and/or credit facility borrowings as a percentage of their total managed assets as follows:

	Percent of Leverage
BlackRock Global Floating Rate Income Trust	41%
BlackRock Preferred and Corporate Income Strategies Fund, Inc	49%
BlackRock Preferred and Equity Advantage Trust	45%
BlackRock Preferred Income Strategies Fund, Inc	50%
BlackRock Preferred Opportunity Trust	49%

Derivative Instruments

The Funds may invest in various derivative instruments, including swap agreements, futures and forward currency contracts, and other instruments specified in the Notes to Financial Statements, which constitute additional forms of economic leverage. Such instruments are used to obtain exposure to a market without owning or taking physical custody of securities or to hedge market and/or interest rate risks. Such derivative instruments involve risks, including the imperfect correlation between the value of a derivative instrument and the underlying asset, possible default of the other party to the transaction and illiquidity of the derivative instrument. The Funds' ability

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

to successfully use a derivative instrument depends on the Advisor's ability to accurately predict pertinent market movements, which cannot be assured. The use of derivative instruments may result in losses greater than if they had not been used, may require the Funds to sell or purchase portfolio securities at inopportune times or for prices other than current market values, may limit the amount of appreciation the Funds can realize on an investment or may cause the Funds to hold a security that it might otherwise sell. The Funds' investments in these instruments are discussed in detail in the Notes to Financial Statements.

12 ANNUAL REPORT

OCTOBER 31, 2008

Schedule of Investments (concluded)

BlackRock Broad Investment Grade 2009 Term Trust Inc. (BCT)

* The cost and unrealized appreciation (depreciation) of investments as of October 31, 2008, as computed for federal income tax purposes, were as follows:

Aggregate cost	\$ 38,437,313
Gross unrealized appreciation	\$ 575,661
Gross unrealized depreciation	(2,903,523)
Net unrealized depreciation	\$ (2,327,862)

- (a) Security is fair valued.
- (b) Issuer filed for bankruptcy and/or is in default of interest payments.
- (c) Non-income producing security.
- (d) Security exempt from registration under Rule 144A of the Securities Act of 1933. These securities may be resold in transactions exempt from registration to qualified institutional investors.
- (e) Variable rate security. Rate shown is as of report date.
- (f) Represents the interest only portion of a mortgage-backed security and has either a nominal or a notional amount of principal.
- (g) Amount is less than \$1,000.
- (h) Security is collateralized by Municipal or U.S. Treasury Obligations.
- (i) All or a portion of security has been pledged as collateral in connection with open financial futures contracts.
- (j) MBIA Insured.
- (k) Represents the principal only portion of a mortgage-backed security.
- (l) Represents a zero-coupon bond. Rate shown reflects the yield at time of purchase.
- (m) Rate shown is the yield to maturity as of the date of purchase.

futures contracts sold as of October 31, 2008 were as follows:

Contracts	Issue	Expiration Date	Face Value	Unrealized Appreciation (Depreciation)
-----------	-------	-----------------	------------	--

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

82	2-Year U.S. Treasury Bond	December 2008	\$17,446,677	\$ (169,229)
380	10-Year U.S. Treasury Bond	December 2008	\$44,286,977	1,317,289
Total				\$ 1,148,060

Swaps outstanding as of October 31, 2008 were as follows:

BlackRock Liquidity Series, LLC Cash Sweep Series	\$(11,221,904)	\$206,280

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting ease. These industry classifications are unaudited.

Effective January 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities

Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of October 31, 2008 in determining the fair valuation of the Fund's investments:

Valuation Inputs	Investments in Securities	Other Financial Instruments**
Level 1	\$171,046,483	\$(6,391,350)
Level 2	2,450,990	
Level 3		
Total	\$173,497,473	\$(6,391,350)

** Other financial instruments are options.

USD	U.S. Dollar

For Fund compliance purposes, the Fund's industry classifications refer to any one or more of the industry sub-classifications used by one or more widely recognized

Edgar Filing: BLACKROCK PREFERRED & EQUITY ADVANTAGE TRUST - Form N-CSR

market indexes or ratings group indexes, and/or as defined by Fund management. This definition may not apply for purposes of this report, which may combine industry sub-classifications for reporting ease. These industry classifications are unaudited.

Effective January 1, 2008, the Fund adopted Financial Accounting Standards Board Statement of Financial Accounting Standards No. 157, Fair Value Measurements (FAS 157). FAS 157 clarifies the definition of fair value, establishes a framework for measuring fair values and requires additional disclosures about the use of fair value measurements. Various inputs are used in determining the fair value of investments, which are as follows:

Level 1 price quotations in active markets/exchanges for identical securities
 Level 2 other observable inputs (including, but not limited to: quoted prices for similar assets or liabilities in markets that are not active, inputs other than quoted prices that are observable for the assets or liabilities (such as interest rates, yield curves, volatilities, prepayment speeds, loss severities, credit risks, and default rates) or other market-corroborated inputs)

Level 3 unobservable inputs based on the best information available in the circumstance, to the extent observable inputs are not available (including the Fund's own assumption used in determining the fair value of investments)

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. For information about the Fund's policy regarding valuation of investments and other significant accounting policies, please refer to Note 1 of the Notes to Financial Statements.

The following table summarizes the inputs used as of October 31, 2008 in determining the fair valuation of the Fund's investments:

Valuation Inputs	Investments in Securities	Other Financial Instruments*
Level 1	\$ 294,386	\$ 43,810
Level 2	290,209,309	5,964,865
Level 3	120,780,137	(543,254)
Total	\$ 411,283,832	\$ 5,465,421

The following is a reconciliation of investments for unobservable inputs (Level 3) that were used in determining fair value:

	Investments in Securities	Other Financial Instruments*
Balance, as of December 31, 2007	\$ 163,425,498	\$(119,977)
Accrued discounts/premiums	26,715	
Realized gain (loss)	(5,340,204)	
Change in unrealized appreciation (depreciation)	(109,699,613)	(423,277)
Net purchases (sales)	(24,255,859)	
Net transfers in/out of Level 3	96,623,600	
Balance, as of October 31, 2008	\$ 120,780,137	\$(543,254)

* Other financial instruments are swaps, foreign currency exchange contracts and options.
