ASUR 1Q09 PASSENGER TRAFFIC DOWN 3.30% YOY

México D.F., April 23, 2009 Grupo Aeroportuario del Sureste, S.A.B. de C.V. (NYSE:ASR; BMV:ASUR), (ASUR) the first privatized airport group in Mexico and operator of Cancún Airport and eight other airports in southeast Mexico, today announced results for the three-month period ended March 31, 2009.

1Q09 Highlights¹:

EBITDA² increased by 17.63% to Ps.685.76 million.

Total passenger traffic was down 3.30%.

Total revenues rose by 13.20%, mainly due to increases of 8.50% in aeronautical revenues and 23.36% in non-aeronautical revenues.

Commercial revenues per passenger increased by 31.95% to Ps.60.62 per passenger.

Operating profit increased by 21.57%.

EBITDA margin was 69.64% compared with 67.02% in 1Q08.

1. Unless otherwise stated, all financial figures discussed in this announcement are unaudited, prepared in accordance with Mexican Financial Reporting Standards and represent comparisons between the three-month periods ended March 31, 2009, and the equivalent three-month period ended March 31, 2008. Results are expressed in nominal pesos. Tables state figures in thousands of pesos, unless otherwise noted. Passenger figures exclude transit and general aviation passengers. Commercial revenues include revenues from non-permanent ground transportation and parking lots. All U.S. dollar figures are calculated at the exchange rate of US\$1 = Ps.14.1517.
2. EBITDA means net income before: provision for taxes, deferred taxes, deferred employees profit sharing, non-ordinary items, comprehensive financing cost and depreciation and amortization. EBITDA should not be considered as an alternative to net income, as an indicator of our operating performance or as an alternative to cash flow as an indicator of liquidity. Our management believes that EBITDA provides a useful measure of our performance that is widely used by investors and analysts to evaluate our performance and compare it with other companies. EBITDA is not defined under U.S. GAAP and may be calculated differently by different companies.

Passenger Traffic

For the first quarter of 2009, total passenger traffic declined year-over-year by 3.30%. Domestic passenger traffic declined by 13.90% while international passenger traffic rose by 3.04%.

The 3.04% rise in international passenger traffic resulted mainly from an increase of 4.54% in international traffic at the Cancún airport. The 13.90% decline in domestic passenger traffic resulted mainly from declines of 24.05%, 16.44%, 6.54%, 21.96% and 27.85% at the Mérida, Cancún, Veracruz, Villahermosa and Cozumel airports, respectively.

Consolidated Results for 1Q09

Total revenues for 1Q09 increased year-over-year by 13.20% to Ps.984.7 million. This was mainly due to increases of:

- 8.50% in revenues from aeronautical services, principally as a result of an increase in rates, which more than offset the 3.30% decline in passenger traffic; and
- 23.36% in revenues from non-aeronautical services, principally as a result of the 26.73% rise in commercial revenues detailed below.

ASUR classifies commercial revenues as those derived from the following activities: duty-free services, car rental, retail, banking and currency exchange, advertising, teleservices, non-permanent ground transportation, food and beverage, and parking lots.

Commercial revenues rose by 26.73% year-over-year during the quarter, mainly as a result of revenue increases in the following areas principally from the 32.9% depreciation in the peso as against the U.S. dollar since 1Q08, which has resulted in a positive impact as contracts with some concession holders are denominated in US dollars and converted into pesos at the prevailing rate:

- 35.81% in duty-free stores;
- 20.39% in banking and currency exchange services;
- 33.71% in advertising;
- 8.81% in ground transportation;

25.14% in retail operations;
33.46% in car rental companies;
22.05% in food and beverage;

ASUR 1Q09, Page 3 of 14

17.19% in teleservices; and

29.29% in other revenues.

These increases were partially offset by a 3.45% decline in parking lot revenues.

September 2008

Total operating costs and expenses for 1Q09 increased 4.87% year over year, primarily as a result of:

a 4.13% increase in cost of services, mainly reflecting increases of 9.75% in personnel costs and 9.41% in maintenance costs, which more than offset declines of 17.83% in energy and 17.81% in insurance costs, among others. The increase in personnel costs reflects the personnel reorganization implemented in 2Q08, while higher maintenance costs reflect the expiration of warranties on documented baggage equipment.

a 6.18% increase in depreciation and amortization, resulting from the depreciation of new investments in fixed assets and improvements made to concession assets; and

a 2.75% increase in concession fees paid to the Mexican government, mainly due to higher revenues (a factor in the calculation of the fee).

A 17.64% increase in the technical assistance fee paid to ITA, reflecting an increase in EBITDA for the quarter (a factor in the calculation of the fee).

These increases were partially offset by a 7.17% decline in administrative expenses.

Operating margin for the quarter increased to 53.56% from 49.87% in 1Q08. This was mainly the result of the 13.20% increase in revenues, which more than offset the 4.87% increase in costs during the period.

Following the changes in Mexican tax law that took effect January 1, 2008, which established a new flat rate business tax (Impuesto Empresarial a Tasa Unica , or IETU) and eliminated the asset tax, the Company evaluated and reviewed its deferred assets and liabilities position under Mexican Financial Reporting Standards.

During 1Q09, the ASUR subsidiaries that pay IETU made provisional tax payments of Ps.75.6 million.

During the quarter, ASUR recognized asset taxes for a total of Ps.9.5 million under the line item Provision for Asset Tax, and which are not expected to be recovered.

Net income for 1Q09 declined 2.94% to Ps.341.73 million from Ps.352.07 million in 1Q08. Earnings per common share for the quarter were Ps.1.1391, or earnings per ADS (EPADS) of US\$0.8049 (one ADS represents ten series B common shares). This compares with earnings per share of Ps.1.1736, or EPADS of US\$0.8293, for the same period last year.

Tariff Regulation

The Mexican Ministry of Communications and Transportation regulates the majority of ASUR's activities by setting maximum rates, which represent the rates for the maximum possible revenues allowed per traffic unit at each airport.

ASUR's regulated revenues for 1Q09 were Ps.756.28 million, resulting in an annual average tariff per workload unit of Ps.151.94. ASUR's regulated revenues accounted for approximately 76.80% of total income for the period.

The Mexican Ministry of Communications and Transportation reviews compliance with the maximum rates on an annual basis at the close of each year.

ASUR received approval from the Ministry of Communications and Transportation for the Master Development Programs for the years 2009 through 2023 and the applicable efficiency factor applicable and the maximum tariffs per work load unit for the years 2009 through 2013 for each

ASUR 1Q09, Page 6 of 14

of its concessions. One work load unit equals one passenger or 100 kg (220 pounds) of cargo.

The concession agreements for each airport provide that such airport's maximum rates will be reduced annually to account for projected improvements in efficiency. For the five-year period ending December 31, 2013, the maximum rates applicable to ASUR's airports will be reduced by an annual efficiency factor of 0.70% in real terms.

The Master Development Plans and maximum rates for each airport were approved before the execution of the Mayan Riviera Airport project, which is included in the National Infrastructure Plan for 2007-2012. Because of this timing, the Ministry of Communications and Transportation did not account for how the eventual construction, administration and operation of the Mayan Riviera Airport, and the beginning of flight operations there may affect passenger traffic levels for Cancún airport. Accordingly, the Ministry of Communications and Transportation has committed to modify the Master Development Plans for ASUR's airports within three months from the granting of a concession to operate the Mayan Riviera Airport so as to reflect new passenger traffic level projections, and accordingly, to adjust the investment obligations and maximum rates that we are authorized to charge at each airport.

Balance Sheet

On March 31, 2009, Airport Facility Usage Rights and Airport Concessions represented 77.29% of the Company's total assets, with current assets representing 17.63% and other assets representing 5.08%.

On March 31, 2009, cash and marketable securities were Ps.1,945.75 million. On the same date, shareholder's equity was Ps.15,296.72 million and total liabilities were Ps.2,234.48 million, representing 87.25% and 12.75% of total assets, respectively. Total deferred liabilities represented 85.90% of the Company's total liabilities.
