BANCORP RHODE ISLAND, INC. Notes to Consolidated Financial Statements

(1) Basis of Presentation

Bancorp Rhode Island, Inc. (the "Company"), a Rhode Island corporation, was organized by Bank Rhode Island (the "Bank") to be a bank holding company and to acquire all of the capital stock of the Bank. The reorganization of the Bank into the holding company form of ownership was completed on September 1, 2000. The Company has no significant operating entities other than the Bank. For that reason, substantially all of the discussion in this Quarterly Report on Form 10-Q relates to the operations of the Bank and its subsidiaries.

Beginning December 31, 2003, the consolidated financial statements include the accounts of the Company and its wholly-owned direct subsidiary, the Bank, and its indirect subsidiaries, BRI Investment Corp. (a Rhode Island passive investment company), BRI Realty Corp. (a real estate holding company) and Acorn Insurance Agency, Inc. (a licensed insurance agency). The Company adopted FASB Interpretation 46-R, "Consolidation of Variable Interest Entities - Revised" on December 31, 2003, and therefore has deconsolidated its statutory trust subsidiaries as of that date. The Consolidated Statement of Operations for the 2003 period also included the results of BRI Statutory Trusts I and II (issuers of trust preferred securities). All significant intercompany accounts and transactions have been eliminated in consolidation.

The interim results of consolidated operations are not necessarily indicative of the results for any future interim period or for the entire year. These interim consolidated financial statements do not include all disclosures associated with annual financial statements and, accordingly, should be read in conjunction with the annual consolidated financial statements and accompanying notes included in the Company's Annual Report to Shareholders filed with the Securities and Exchange Commission.

In preparing the consolidated financial statements, management is required to make estimates and assumptions that affect the reported amounts of assets and liabilities as of the date of the balance sheet and revenues and expenses for the period. Actual results could differ from those estimates. Material estimates that are particularly susceptible to change relate to the determination of the allowance for loan losses and goodwill valuation.

The unaudited interim consolidated financial statements of the Company have been prepared in accordance with Accounting Principles Generally Accepted in the United States of America ("GAAP") and prevailing practices within the banking industry and include all necessary adjustments (consisting of only normal recurring adjustments), that, in the opinion of management, are required for a fair presentation of the results and financial condition of the Company.

(2) Earnings Per Share

Edgar Filing: BANCORP RHODE ISLAND INC - Form 10-Q

Basic earnings per share ("EPS") excludes dilution and is computed by dividing income available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted EPS reflects the potential dilution that could occur if securities or other contracts to issue common stock were exercised and resulted in the issuance of additional common stock that then shared in the earnings of the entity.

7

(3) Stock Based Compensation

In December 2002, the Financial Accounting Standards Board ("FASB") issued Statement of Financial Accounting Standards ("SFAS") 148, "Accounting for Stock-Based Compensation - Transition and Disclosure". SFAS 148 amends SFAS 123, "Accounting for Stock-Based Compensation", to provide alternative methods of transition for a voluntary change to the fair value based method of accounting for stock-based employee compensation. Companies are able to eliminate a "ramp-up" effect that the SFAS 123 transition rule creates in the year of adoption. Companies can choose to elect a method that will provide for comparability amongst years reported. In addition, this Statement amends the disclosure requirement of SFAS 123 to require prominent disclosures in both annual and interim financial statements about the fair value based method of accounting for stock-based employee compensation and the effect of the method used on reported results. The amendments to SFAS 123 are effective for financial statements for fiscal years ending after December 15, 2002. The adoption of this Statement did not have a material impact on the Company's financial position or results of operations at adoption, but may have a material impact sometime in the future if the Company were to elect the alternative method for accounting for stock-based employee compensation.

On March 31, 2004, the FASB issued Exposure Draft "Share-Based Payment - An Amendment to FASB Statement No. 123 and 95." The Exposure Draft concluded that all companies should expense the fair value of employee stock options using the modified prospective grant-date measurement approach as defined in SFAS 123. Compensation cost would be recognized in the financial statements over the requisite service period. A final Statement is expected in the second half of 2004, which could become effective in 2005. Until a new Statement is issued, the provisions of SFAS 123 and SFAS 148 remain in effect.

The following table summarizes the differences between the fair value and intrinsic value methods of accounting for stock-based compensation:

	Three Months Ended March 31,	
	2004	2003
	----	----
Net income (in thousands):
