SLADES FERRY BANCORP
Form 10-K/A
August 15, 2005

UNITED STATES SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K/A

X ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(D) OF THE SECURITIES
--- EXCHANGE ACT OF 1934 FOR THE FISCAL YEAR ENDED DECEMBER 31, 2004

Commission file number 000-23904

SLADE'S FERRY BANCORP.

(Exact name of registrant as specified in its charter)

MASSACHUSETTS ----- (State or other jurisdiction of incorporation or organization)	04-3061936 ----- (I.R.S. Employer Identification Number)
100 Slade's Ferry Avenue Somerset, Massachusetts ----- (Address of principal executive offices)	02726 ----- (Zip Code)

Registrant's telephone number, including area code: (508) 675-2121

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act: Common Stock,
\$.01 par value

Indicate by check mark whether the registrant (1) has filed all reports
required to be filed by section 13 or 15(d) of the Securities Exchange Act
of 1934 during the preceding 12 months and (2) has been subject to such
filing requirements for the past 90 days.

Yes [X] No []

Indicate by check mark if disclosure of delinquent filers pursuant to Item
405 of Regulation S-K is not contained herein, and will not be contained,
to the best of registrant's knowledge, in definitive proxy or information
statements incorporated by reference in Part III of this Form 10-K/A or any
amendment to this form 10-K/A. []

Indicate by check mark whether the registrant is an accelerated filer (as
defined in Rule 12b-2 of the Act).

Yes [] No [X]

The aggregate market value of the voting stock of Slade's Ferry Bancorp,
held by nonaffiliates of the registrant as of June 30, 2004 was
approximately \$63,100,223. On that date, there were 3,347,492 shares of
Slade's Ferry Bancorp Common Stock, \$.01 par value, outstanding.

DOCUMENTS INCORPORATED BY REFERENCE

Proxy Statement for Annual Meeting of Shareholders May 11, 2005 is
incorporated by reference into Part III.

PART I

Forward-looking Statements

This Form 10-K/A contains certain forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including statements regarding the strength of the company's capital and asset quality. Other such statements may be identified by words such as "believes," "will," "expects," "project," "may," "developments," "strategic," "launching," "opportunities," "anticipates," "estimates," "intends," "plans," "targets" and similar expressions. These statements are based upon the current beliefs and expectations of Slade's Ferry Bancorp's management and are subject to significant risks and uncertainties. Actual results may differ materially from those set forth in the forward-looking statements as a result of numerous factors.

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

The following factors, among others, could cause actual results to differ materially from the anticipated results or other expectations expressed in our forward-looking statements:

- (1) enactment of adverse government regulation;
- (2) competitive pressures among depository and other financial institutions may increase significantly and have an effect on pricing, spending, third-party relationships and revenues;
- (3) the strength of the United States economy in general and specifically the strength of the New England economies may be different than expected, resulting in, among other things, a deterioration in overall credit quality and borrowers' ability to service and repay loans, or a reduced demand for credit, including the resultant effect on the Bank's loan portfolio, levels of charge-offs and non-performing loans and allowance for loan losses;
- (4) changes in the interest rate environment may reduce interest margins and adversely impact net interest income; and
- (5) changes in assumptions used in making such forward-looking statements.

Should one or more of these risks materialize or should underlying beliefs or assumptions prove incorrect, Slade's Ferry Bancorp's actual results could differ materially from those discussed.

All subsequent written and oral forward-looking statements attributable to Slade's Ferry Bancorp or any person acting on its behalf are expressly qualified in their entirety by the cautionary statements set forth above. Slade's Ferry Bancorp does not intend or undertake any obligation to update any forward-looking statement to reflect circumstances or events that occur after the date the forward-looking statements are made.

As used throughout this report, the terms "we," "our," "us," or the "Company" refer to Slade's Ferry Bancorp and its consolidated subsidiaries.

Restatement of Prior Year Financial Statements

We announced in a Form 8-K filed on July 19, 2005, that in May 2005, a reporting error relating to our pension plan that affects our previously filed financial statements was discovered. The pension plan commenced on January 1, 1969 and was frozen on December 31, 1997. In May of 2005, we began exploring alternatives with respect to possibly liquidating the pension plan.

At that time, we discovered that the amount of prepaid benefit cost had been overstated (and pension expense had been cumulatively understated) since fiscal year 1996. Such misstatements related to (1) the failure to use settlement accounting for significant lump sum distributions, as required by FASB Statement No. 88, Employers' Accounting for Settlements and Curtailments of Defined Benefit Plans and for Termination Benefit, and (2) the understatement of the projected benefit obligation.

The reporting errors affect portions of our balance sheet data, income statement data and cash flow data, as well as numerous notes to the consolidated financial statements. In addition, since pension expense has been understated, retained earnings, net income and earnings per share amounts have been overstated. This form 10-K/A is being filed to amend and restate the financial statements and related information contained in our Form 10-K for the fiscal year ended December 31, 2004.

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

3

The following table presents the effects of correction of the errors on pension expense, net income and the cumulative effect on retained earnings, accumulated other comprehensive income (loss) and earnings per share basic and diluted:

ITEM 1

BUSINESS

General -----

Slade's Ferry Bancorp., a Massachusetts corporation, is a bank holding company headquartered in Somerset, Massachusetts with consolidated assets of \$549.4 million, consolidated net loans and leases of \$362.3 million, consolidated deposits of \$399.9 million and consolidated shareholders' equity of \$46.6 million as of December 31, 2004. We conduct our business principally through our wholly-owned subsidiary, Slade's Ferry Trust Company (referred to herein as the "Bank"), a Massachusetts-chartered trust company. As a bank holding company, we are subject to the Bank Holding Company Act of 1956, as amended (the "BHCA"), and the rules and regulations of the Federal Reserve Board (the "FRB") under the BHCA. We are additionally subject to the provisions of the Massachusetts General Laws applicable to commercial bank and trust companies and other depository institutions and their holding companies and applicable regulations of the Massachusetts Division of Banks (the "Division"). We are also subject to the rules and regulations of the Securities and Exchange Commission (the "SEC") as our common stock is registered with the SEC and is quoted on the Nasdaq Small Cap Market. The Bank's deposit accounts are insured up to applicable limits by the Bank Insurance Fund of the Federal Deposit

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

Insurance Corporation (the "FDIC"). The Bank is subject to extensive regulation, examination and supervision by the Division as its primary corporate regulator, and by the FDIC as its deposit insurer and primary federal regulator. Any change in such laws and regulations, whether by the Division, the FDIC, the FRB or the SEC or through legislation, could have a material adverse impact on our operation.

Our main office is located at 100 Slade's Ferry Avenue, Somerset, Massachusetts, 02726, and our telephone number is (508) 675-2121. Slade's Ferry Bancorp was organized for the purpose of becoming the holding company of the Bank. Slade's Ferry Bancorp acquisition of the Bank was completed on April 1, 1990.

We had consolidated asset growth of \$110.2 million or 25.1% and our level of deposits increased by \$66.8 million, or by 20.0%, during 2004. Aside from deposits, we increased borrowings from the Federal Home Loan Bank of Boston (the "FHLB") by \$29.8 million and the issue of subordinated debentures in March 2004 totaling \$10.3 million. This activity funded an increase in loans totaling \$30.8 million or 9.3%, and an increase in investments totaling \$63.2 million or 108.1%.

While we evaluate opportunities to acquire other banks or bank facilities as they arise and may in the future acquire other banks, financial institutions, or bank facilities, we are not currently engaged in any such acquisition.

We are committed to the philosophy of serving the needs of customers within our market area. We believe that our comprehensive retail, small business, and commercial real estate products enable us to compete effectively. We do not have any major target accounts, nor do we derive a material portion of our deposits from any single depositor. We concentrate our operations in the area of retail banking and we service the needs of the local communities. Our loans are not concentrated within any single industry or group of related industries that would have any possible adverse effect on our business.

We currently have eight full service banking facilities extending east from Seekonk, Massachusetts to Fairhaven, Massachusetts. These facilities service numerous communities in Southeastern Massachusetts and contiguous areas of Rhode Island. We also provide limited banking services at the Somerset High School in Somerset, Massachusetts. We will open a tenth facility, located in Assonet, Massachusetts in early 2005. This branch will be a full-service banking office and will be a state-of-the-art facility, designed to provide superior customer convenience and service. Two branches, one each in the cities of New Bedford and Fall River were closed in 2004, as these offices were deemed by management to be unprofitable.

In June 1999, we established Slade's Ferry Preferred Capital Corporation, a real estate investment trust (the "REIT"). The REIT was formed to purchase certain designated, bank-owned real estate mortgage loans. The interest income derived on these loans was taxed at a reduced state tax rate.

On June 20, 2003, the Bank and the REIT entered into an agreement with the Massachusetts Department of Revenue (the "DOR") settling a dispute concerning the dividends received deduction through calendar year 2002 claimed or to be claimed by the Bank. Under the agreement, the Bank agreed

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

to pay and the DOR agreed to abate 50% of all tax and interest assessed or unassessed relating to the REIT dividend deduction. Therefore, the previously unrecorded tax liability of \$881,790, interest of \$128,977 and federal and state tax benefits of \$352,599 were recognized during the year ended December 31, 2003.

On December 8, 2003, the Bank, acting in its capacity as sole common stockholder of the REIT authorized the REIT's liquidation and dissolution. The REIT was subsequently liquidated and dissolved as of December 16, 2003.

We maintain four subsidiaries, all of which are wholly-owned by the Bank. Two of these, Slade's Ferry Securities Corporation ("SFSC"), and Slade's Ferry Securities Corporation II ("SFSCII") are Massachusetts securities corporations on which, under current Massachusetts law, income is taxed at 1.32%, as compared to the Massachusetts bank taxation rate of 10.5%. In exchange for this lower tax rate, the assets of any Massachusetts security corporation are limited to certain investment securities, including United States Treasury and agency securities, mortgage-backed investments, corporate debt securities and marketable equity securities. Investment securities with book values totaling \$19.0 million and \$36.8 million were held at SFSC and SFSC II respectively.

Slade's Ferry Realty Trust ("SFRT") owns and manages our land and buildings.

Slade's Ferry Loan Company ("SFLC") is a Rhode Island corporation founded for the purpose of generating loans in the State of Rhode Island. As the Bank has received authorization to generate loans in Rhode Island directly, SFLC is in the process of liquidation and dissolution. We expect the ultimate legal dissolution to occur in early 2005.

Our major customer base as of December 31, 2004 consists of approximately 24,800 personal savings, checking and money market accounts, and 6,550 personal certificates of deposit and individual retirement accounts. Our commercial base consists of approximately 1,700 checking, money market, corporate and certificate of deposit accounts.

As we grew in 2004, we remained committed to customer service. We are currently upgrading the systems utilized on the teller platform and in customer service areas to allow employees to serve customers more efficiently.

Services

We engage in a broad range of banking activities, including demand, savings, time deposits, related personal and commercial checking account services, real estate mortgages, commercial and installment lending, payroll services, money orders, travelers checks, Visa, MasterCard, debit card, safe deposit rentals and automatic teller machines. We also offer certain non-traditional banking services including investments, life insurance, annuities, and cash management services and we also provide a range of internet-based services for both consumer and commercial customers.

Lending Activities

Our loan portfolio consists primarily of residential and commercial real estate, construction and land development, commercial, home equity lines of credit and consumer loans originated primarily in our market area. There are no foreign loans outstanding. Interest rates charged by the Bank

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

on loans are affected principally by the demand for such loans, the supply of money available for lending purposes and the rates offered by its competitors. These factors are affected by general and economic conditions, monetary policies of the federal government, including the FRB, legislative tax policies and governmental budgetary matters. We originate residential equity lines of credit, fixed-rate equity loans, commercial business loans, consumer loans and commercial real estate loans. Total net loans were 65.9% of total assets at December 31, 2004, as compared to 75.5% of total assets at December 31, 2003. See Item 7, "Management's Discussion and Analysis of Financial Condition and Operating Results", for detailed portfolio information.

7

Multi-Family and Commercial Real Estate Lending. We originate multi-family and commercial real estate loans that are generally secured by five or more unit apartment buildings and properties used for business purposes such as small office buildings, restaurants or retail facilities primarily located in our primary market area. Our multi-family and commercial real estate underwriting policies provide that such real estate loans may be made in amounts of up to 80% of the appraised value of the property, subject to our current loans-to-one-borrower limit of \$8.0 million at December 31, 2004. Our multi-family and commercial real estate loans are generally made with terms of up to 20 years and are offered with interest rates that adjust periodically. In reaching a decision on whether to make a multi-family or commercial real estate loan, we consider the net operating income of the property, the borrower's expertise, credit history and profitability and the value of the underlying property. We have generally required that the properties securing these real estate loans have debt service coverage ratios (the ratio of earnings before debt service) of at least 1.20 times. Environmental impact surveys are generally required for all commercial real estate loans. Generally, all multi-family and commercial real estate loans made to corporations, partnerships and other business entities require personal guarantees by the principals. We may choose not to require a personal guarantee on such loans depending on the creditworthiness of the borrower and the amount of the down payment and other mitigating circumstances.

Loans secured by multi-family and commercial real estate properties generally involve larger principal amounts and a greater degree of risk than one-to-four family residential mortgage loans. Because payments on loans secured by multi-family and commercial real estate properties are often dependent on successful operation or management of the properties, repayment of such loans may be subject to adverse conditions in the real estate market or the economy. We seek to minimize these risks through its underwriting standards.

Multi-family and commercial real estate loans totaled \$192.8 million and comprised 52.6% of the total gross loan portfolio at December 31, 2004. At December 31, 2003, the multi-family and commercial real estate loan portfolio totaled \$181.4 million, or 53.9% of total gross loans.

Residential Lending. We currently offer fixed-rate one-to-four family mortgage loans with terms from 10 to 30 years and a number of adjustable rate mortgage ("ARM") loans with terms of up to 30 years and interest rates which adjust every one or three years from the outset of the loan. The interest rates for the ARM loans are generally indexed to the applicable Constant Maturity Treasury ("CMT") Index, or other comparable indices. Our ARM loans generally provide for periodic (not more than 2%) and overall (not more than 6%) caps on the increase or decrease in the

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

interest rate at any adjustment date and over the life of the loan.

The origination of adjustable-rate residential mortgage loans and short term fixed-rate mortgage loans, as opposed to 30-year fixed-rate residential mortgage loans, generally helps reduce our exposure to increases in interest rates. However, adjustable-rate loans generally pose credit risks not inherent in fixed-rate loans, primarily because as interest rates rise, the underlying payments of the borrower rise, thereby increasing the potential for default. Periodic and lifetime caps on interest rate increases help to reduce the risks associated with adjustable-rate loans but also limit the interest rate sensitivity of such loans. The continued period of low market interest rates has been the impetus for the Bank's customers to continue finance home purchases with fixed-rate loans or to refinance ARM loans into fixed-rate loans.

Generally, we originate one-to-four family residential mortgage loans in amounts of up to 95% of the appraised value or selling price of the property securing the loan, whichever is lower. Certain loans in our "First-Time Home Buyer" program allow for a 97% loan-to-value ("LTV") ratio. Private mortgage insurance ("PMI") may be required for loans with a LTV ratio of greater than 80%. Mortgage loans we originate generally include due-on-sale clauses, which provide us with the contractual right to deem the loan immediately due and payable in the event the borrower transfers ownership of the property without our consent. Due-on-sale clauses are an important means of adjusting the yields on our fixed-rate mortgage loan portfolio and we have generally exercised our rights under these clauses. We require fire, casualty, title, and, in certain cases, flood insurance on all properties securing real estate loans we make.

In an effort to provide financing for moderate income and first-time homebuyers, we offer Federal Housing Authority ("FHA") and Veterans Administration ("VA") loans and we have our own First-Time Home Buyer loan program. These programs offer residential mortgage loans to qualified individuals. These loans are offered with adjustable- and fixed-rates of interest and terms of up to 30 years. Such loans may be secured by a one-to-four family residential property, in the case of FHA and VA loans, and must be secured by a single-family owner-occupied unit in the case of First-Time Home Buyer loans. These loans are originated using modified underwriting guidelines, in the case of

8

FHA and VA loans, and the same underwriting guidelines as our other one-to-four family mortgage loans in the case of First-Time Home Buyer loans. Such loans may be originated in amounts of up to 97% of the lower of the property's appraised value or the sale price. Private mortgage insurance is required on all such loans with loan to values in excess of 80%.

We generally underwrite our residential real estate loans to comply with secondary market standards established by the Federal National Mortgage Association. Although loans are underwritten to standards that make them readily salable, we have not chosen to sell these loans, rather to maintain them in portfolio, consistent with our income and interest rate risk management targets.

Residential real estate loans totaled \$97.5 million and comprised 26.6% of the total loan portfolio at December 31, 2004. At December 31, 2003, the residential real estate loan portfolio totaled \$88.0 million, or 26.1% of total gross loans.

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

Commercial loans. Our commercial business loan portfolio consists of loans and lines of credit predominantly collateralized by inventory, furniture and fixtures, and accounts receivable. In assessing the collateral for these loans, management applies a 50% liquidation value to inventories; 25% to furniture, fixtures and equipment; and 70% to accounts receivable less than 90 days of invoice date. Like commercial real estate loans, the successful repayment of these loans is dependent on the operations of the business to which the loan is made. Accordingly, these loans carry a higher level of credit risk than loans secured by real estate. To alleviate some of this risk, credit enhancements, such as personal guarantees or additional collateral are often taken.

Commercial loans totaled \$26.6 million and comprised 7.3% of the total gross loan portfolio at December 31, 2004. At December 31, 2003, the commercial loan portfolio totaled \$34.0 million, or 10.1% of total gross loans.

Construction Lending. We originate fixed-rate construction loans for the development of one-to-four family residential properties, primarily located in our primary market area. Although we do not generally make loans secured by raw land, our policies permit the origination of such loans. Construction loans are generally offered to experienced local developers operating in our primary market area and, to a lesser extent, to individuals for the construction of their primary residence. Construction loans are generally offered with terms of up to 12 months and may be made in amounts of up to 70% of the appraised value of the property, as improved. In the case of construction loans to individuals for the construction of their primary residence, loans up to 90% of the appraisal value may be made. Loans made to individuals are generally written on a construction-to-permanent basis. Land loans of up to 80% of the appraised value may be made. Construction loan proceeds are disbursed periodically in increments as construction progresses and as inspections by our lending officers warrant. Generally, if the borrower is a corporation, partnership or other business entity, personal guarantees by the principals are required for all construction loans.

Construction financing is generally considered to involve a higher degree of credit risk than long-term financing on improved, owner-occupied real estate. Risk of loss on a construction loan is dependent largely upon the accuracy of the initial estimate of the property's value at completion of construction compared to the estimated cost (including interest) of construction and other assumptions, including the estimated time to sell residential properties. If the estimate of value proves to be inaccurate, we may be confronted with a project, when completed, having a value which is insufficient to assure full repayment.

Construction and land development loans totaled \$24.2 million and comprised 6.6% of the total gross loan portfolio at December 31, 2004. At December 31, 2003, the construction and land development loan portfolio totaled \$10.3 million, or 3.1% of total gross loans.

Home Equity Lines of Credit. Substantially all of our home equity lines of credit are secured by second mortgages on owner-occupied one-to-four family residences located in our primary market area. Our home equity lines of credit generally have interest rates, indexed to the Wall Street Journal Prime Rate, that adjust on a monthly basis. Home equity lines of credit generally have an 18% lifetime limit on interest rates. Generally, the maximum combined loan-to-value ratio on home equity lines of credit is 80%. The underwriting standards we employ for home equity lines of credit include a determination of the applicant's credit history and an assessment of the applicant's ability to meet existing obligations and payments on the proposed loan and the value of the collateral securing the loan. The

stability

9

of the applicant's monthly income may be determined by verification of gross monthly income from primary employment and, additionally, from any verifiable secondary income. Creditworthiness of the applicant is a primary consideration.

Home equity lines of credit totaled \$23.1 million and comprised 6.3% of the total gross loan portfolio at December 31, 2004. At December 31, 2003, home equity line of credit portfolio totaled \$18.3 million, or 5.5% of total gross loans.

Consumer Lending. Loans secured by rapidly depreciable assets such as recreational vehicles and automobiles entail greater risks than one-to-four family residential mortgage loans. In such cases, repossessed collateral for a defaulted loan may not provide an adequate source of repayment of the outstanding loan balance, since there is a greater likelihood of damage, loss or depreciation of the underlying collateral. Further, consumer loan collections on these loans are dependent on the borrower's continuing financial stability and, therefore, are more likely to be adversely affected by job loss, divorce, illness or personal bankruptcy. Finally, the application of various federal and state laws, including federal and state bankruptcy and insolvency laws, may limit the amount which can be recovered on such loans in the event of a default. Accordingly, we originate consumer loans typically based on the borrower's ability to repay the loan through continued financial stability. We endeavor to minimize risk by reviewing the borrower's repayment history on past debts, and assessing the borrower's ability to meet existing obligations on the proposed loans. Because of the proliferation of manufacturers' discount financing and automobile leasing, origination of automobile loans has diminished significantly in the last five years, accounting for the continued drop in volume of consumer loans.

Consumer loans totaled \$2.5 million and comprised 0.7% of the total gross loan portfolio at December 31, 2004. At December 31, 2003, the consumer loan portfolio totaled \$4.0 million, or 1.2% of total gross loans.

Loan Approval Procedures and Authority. The Bank's Board of Directors establishes the Bank's lending policies and loan approval limits. The Bank's Board of Directors has established a Loan Committee that considers and approves all loans within its designated authority as established by the Board. In addition, the Bank's Board of Directors has authorized certain officers to consider and approve all loans within their designated authority as established by the Board. The President, CEO and Senior Vice President have authority to approve loans to \$250,000, and the Executive Committee has authority to approve loans to \$500,000. For loans above \$500,000, full Board approval is necessary.

Investing Activities

We utilize our investment portfolio as a temporary means of warehousing liquidity until the funds can be lent. The investment portfolio also serves to secure certain deposits and borrowings. We manage the investment portfolio to optimize earnings, while using the portfolio as a tool in managing interest rate risk. We use an independent investment advisor to assist us in our portfolio management function.

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

We utilize both a "held-to-maturity" account and an "available-for-sale" account, as defined in Statement of Financial Accounting Standards No. 115, "Accounting for Certain Investments in Debt and Equity Securities", to manage the investment portfolio. Our investment policy requires Board approval before a trading account can be established. The held-to-maturity account was originally established for holding high-yielding municipal securities. During 2004, certain mortgage-backed securities designated as collateral for FHLB advances were also designated as held-to-maturity. Management has the ability and intent to hold these securities to their contractual maturity. Held-to-maturity securities totaled \$37.8 million at December 31, 2004 while available-for-sale securities totaled \$83.9 million as compared to \$11.3 million and \$47.2 million, respectively, at December 31, 2003.

We primarily utilize U.S. Government agency securities and agency-insured mortgage-backed securities as investment vehicles. High-quality corporate bonds and municipal securities are purchased when an exceptional opportunity to enhance investment yields arises. Purchases of these investments are limited to securities that carry a rating of "Baa1" (Moody's) or "BBB+" (Standard and Poor's), in order to control credit risk within the investment portfolio. Among other investment criteria, it is management's goal to maintain a total portfolio duration of less than 5 years. At December 31, 2004, the portfolio duration was estimated at 2.65 years, which is within the established portfolio duration limit.

10

Excess cash is sold on an overnight basis into federal funds or overnight deposits at the FHLB. At December 31, 2004 federal funds sold and overnight deposits totaled \$18.8 million or 3.4% of total assets, as compared to \$4.0 million, or 0.9% of total assets at December 31, 2003.

Under Massachusetts Law, the Bank is permitted to invest in marketable equity securities. Management views equity securities as a source of current income with tax advantages, as well as a source of capital gain income, given appreciation in the portfolio. Limits on asset quality, holding size, overall portfolio size and composition are in place to protect us from undue market risk. All equity securities are classified as available-for-sale.

Deposit Activities

We seek to develop relationships with our customers in order to become the customer's primary bank. We have developed programs that stress multiple account relationships in order to increase the level of "core deposits" in our portfolio. Management views a customer's checking account as the primary relationship account and, accordingly, emphasizes the growth of checking accounts in its strategic plans. Aside from checking accounts being a consistent, low-cost source of funds, they provide a source of non-interest income in the form of service charges and insufficient funds fees.

Deposits are obtained from individuals and from small and medium-sized businesses in the local market area. Our customer base is diverse, and accordingly different product suites are offered to different groups of customers. The suites range from accounts that serve the basic service needs of any customer, such as free checking and statement savings accounts, to our "Coastal" product suite, which addresses the particular needs of high-balance customers. Additionally, small and medium-sized businesses have suites of products that address their particular needs. We

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

also attract deposits from municipalities and other government agencies. We do not solicit or accept brokered deposits. We offer a full line of deposit products including checking and NOW accounts, savings accounts, money market accounts, and certificates of deposit. We offer debit cards to its checking and savings customers.

Customers have access to deposit funds at any of our nine branch offices, all of which are equipped with Automated Teller Machines. Additionally, the Bank is a member of the NYCE Network, enabling customers to have access to their funds worldwide. We also provide balance inquiry and funds transfer telephonically. Our website, www.sladesferry.com, provides customers with the ability to manage their accounts and pay bills online. Business customers who utilize our cash management program have the ability to transfer funds and originate wire transfers or ACH transactions through the website as well.

As a general rule, management systematically reviews the deposit accounts it offers to determine if the products meet both the customers' needs and our asset/liability management goals. This review is the responsibility of the Pricing Committee of the Bank's Board of Directors, which meets weekly to determine products and pricing practices consistent with overall earnings and growth goals. The Pricing Committee establishes deposit interest rates based on a variety of factors, including local economy, market interest rates, competitors' interest rates, and the need to fund loan demand. We set rates to be competitive, but not necessarily the highest rates in its market area. As competition for deposits has intensified with the larger financial institutions in our market area, we introduced the use of off-maturity "special" certificate accounts. We actively market our other products to new depositors garnered through the use of specials, in order to cross-sell additional products and services, and thereby establish a continued banking relationship.

In order to offset the potentially adverse effects of early withdrawal, we generally charge an early withdrawal penalty on certificates of deposit in an amount equal to three months' interest on accounts with original maturities of one year or less, and six months' interest on accounts with an original maturity of greater than one year. Interest credited to a certificate account during any term may be withdrawn without penalty at any time during the term. Upon renewal of a certificate account, only interest credited during the renewal term may be withdrawn without penalty.

11

Non-Deposit Investment Products

We offer a variety of mutual funds, annuities, and insurance products offered through third-party sales arrangements with Linsco Private Ledger, Inc. and the Savings Bank Life Insurance Company of Massachusetts ("SBLI").

Borrowing Activities

In order to fund additional asset growth, we have the ability to borrow at the FHLB of Boston. The FHLB limits borrowings to 30% of assets, and limits FHLB stock purchases to 4.5% of total borrowings. These borrowings are collateralized by our residential loan portfolio, certain commercial real estate loans, and certain U.S. agency securities and agency-insured mortgage-backed securities. Management views borrowing as

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

not only a funding mechanism, but as a tool to manage the levels of interest rate risk inherent in the balance sheet. In addition, we maintain borrowing lines of credit with correspondent banks to meet short-term liquidity needs.

During this period of historically low market interest rates we have utilized FHLB advances to enhance our interest rate risk position. In prior years, we had used amortizing advances to "match-fund" certain commercial loans. As management has taken a whole-balance sheet approach to interest rate risk management, the use of matched funding strategies, and consequently, the use of long-term amortizing advances, has decreased, in favor of the use of bullet advances, deployed in a ladder approach. Because the FHLB attaches significant prepayment penalties to long-term advances, management does not anticipate prepayment of the amortizing advances.

Competition

The banking business in our market area is highly competitive. We actively compete for both loans and deposits with local branches of nationwide and regional banks, as well as local banks and credit unions. We also compete with money market funds, consumer mortgage and finance companies, financing subsidiaries of durable goods manufacturers, and insurance companies. Many of the major commercial banks or other affiliates in our service areas offer services such as international banking and trust services that we do not currently offer directly.

In order to expand our market area, we are opening a new branch office located in the town of Assonet, Massachusetts. We believe that the addition of this branch will add to the diversity in our loan portfolio and add a new pool of potential depositors.

Employees

At December 31, 2004, we had 125 full-time and 47 part time employees. We believe that employee relations are good, and there are no known disputes between management and employees.

All employees are eligible to participate in our Retirement Savings 401(k) Plan and Profit Sharing Plan. Additionally, certain officers may participate in the Slade's Ferry Bancorp Stock Option Plan, and certain executive officers may participate in a supplemental executive retirement program.

Our performance-based incentive programs for officers and employees have supported, and will continue to support our growth, by giving employees a stake in our overall performance and for balancing profit, growth and productivity.

12

Holding Company Regulation

Federal Regulation

Capital Requirements. The FRB has adopted capital adequacy guidelines pursuant to which it assesses the adequacy of capital in examining and

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

supervising a bank holding company and in analyzing applications to it under the BHCA. The FRB capital adequacy guidelines generally require bank holding companies to maintain total capital equal to 8% of total risk-adjusted assets, with at least one-half of that amount consisting of Tier I, or core capital, and up to one-half of that amount consisting of Tier II, or supplementary capital. Tier I capital for bank holding companies generally consists of the sum of common shareholders' equity and perpetual preferred stock (subject in the case of the latter to limitations on the kind and amount of such stocks which may be included as Tier I capital), less goodwill and, with certain exceptions, intangibles. Tier II capital generally consists of hybrid capital instruments; perpetual preferred stock which is not eligible to be included as Tier I capital; term subordinated debt and intermediate-term preferred stock; and, subject to limitations, general allowances for loan losses. Assets are adjusted under the risk-based guidelines to take into account different risk characteristics, with the categories ranging from 0% (requiring no additional capital) for assets such as cash to 100% for the bulk of assets which are typically held by a bank holding company, including multi-family residential and commercial real estate loans, commercial business loans and consumer loans. Single-family residential first mortgage loans which are not past-due (90 days or more) or non-performing and which have been made in accordance with prudent underwriting standards are assigned a 50% level in the risk-weighting system, as are certain privately-issued mortgage-backed securities representing indirect ownership of such loans. Off-balance sheet items also are adjusted to take into account certain risk characteristics.

In addition to the risk-based capital requirements, the FRB requires bank holding companies to maintain a minimum leverage capital ratio of Tier I capital to total assets of 3.0%. Total assets for this purpose does not include goodwill and any other intangible assets and investments that the FRB determines should be deducted from Tier I capital. The FRB has announced that the 3.0% Tier I leverage capital ratio requirement is the minimum for the top-rated bank holding companies without any supervisory, financial or operational weaknesses or deficiencies or those that are not experiencing or anticipating significant growth. Other bank holding companies are expected to maintain Tier I leverage capital ratios of at least 4.0% to 5.0% or more, depending on their overall condition.

The Company is in compliance with the above-described FRB regulatory capital requirements.

Activities. The BHCA prohibits a bank holding company from acquiring direct or indirect ownership or control of more than 5% of the voting shares of any bank, or increasing such ownership or control of any bank, without prior approval of the FRB. No approval under the BHCA is required, however, for a bank holding company already owning or controlling 50% of the voting shares of a bank to acquire additional shares of such bank.

The BHCA also prohibits a bank holding company, with certain exceptions, from acquiring more than 5% of the voting shares of any company that is not a bank and from engaging in any business other than banking or managing or controlling banks. Under the BHCA, the FRB is authorized to approve the ownership of shares by a bank holding company in any company, the activities of which the FRB has determined to be so closely related to banking or to managing or controlling banks as to be a proper incident thereto. In making such determinations, the FRB is required to weigh the expected benefit to the public, such as greater convenience, increased competition or gains in efficiency, against the possible adverse effects, such as undue concentration of resources, decreased or unfair competition, conflicts of interest or unsound banking practices.

In addition, a bank holding company that does not qualify and elect

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

to be treated as a financial holding company under the Gramm-Leach-Bliley Financial Services Modernization Act is generally prohibited from engaging in, or acquiring, direct or indirect control of any company engaged in non-banking activities. One of the principal exceptions to this prohibition is for activities found by the FRB to be so closely related to banking or managing or controlling banks as to be permissible. Bank holding companies that do qualify as a financial holding company may engage in activities that are financial in nature or incident to activities which are financial in nature. Bank holding companies may qualify to become a financial holding company if it meets certain criteria set forth by the FRB.

13

Beginning June 1, 1997, the Interstate Banking Act permitted federal banking agencies to approve merger transactions between banks located in different states, regardless of whether the merger would be prohibited under the law of the two states. The Interstate Banking Act also permitted a state to "opt in" to the provisions of the Interstate Banking Act before June 1, 1997, and permitted a state to "opt out" of the provisions of the Interstate Banking Act by adopting appropriate legislation before that date. Accordingly, beginning June 1, 1997, the Interstate Banking Act permitted a bank, such as the Bank, to acquire an institution by merger in a state other than Massachusetts unless the other state had opted out of the Interstate Banking Act. The Interstate Banking Act also authorizes de novo branching into another state if the host state enacts a law expressly permitting out of state banks to establish such branches within its borders.

Massachusetts Regulation

The Company as a Massachusetts-chartered Company is governed by the Massachusetts Business Corporation Law and the Company's Articles of Organization and Bylaws. Under the Massachusetts banking laws, a company owning or controlling two or more banking institutions, including a savings bank, is regulated as a bank holding company. The Company or the Bank would become a Massachusetts bank holding company if the Company acquired a second banking institution and operated it separately from the Bank or the Bank acquired a banking institution.

Acquisition of the Company or the Bank

Federal Restrictions. Under the federal Change in Bank Control Act, any person (including a company), or group acting in concert, seeking to acquire control of the Company or the Bank will be required to submit prior notice to the FRB. Under the Change in Bank Control Act, the FRB has 60 days within which to act on such notices, taking into consideration factors, including the financial and managerial resources of the acquirer, the convenience and needs of the communities served by the Company and the Bank, and the anti-trust effects of the acquisition. The term "control" is defined generally under the BHCA to mean the ownership or power to vote 25% or more of any class of voting securities of an institution or the ability to control in any manner the election of a majority of the institution's directors. Additionally under the Bank Merger Act sections of the Federal Deposit Insurance Act, the prior approval of an insured institution's primary federal regulator is required for an insured institution to merge with or transfer assets to another insured institution or an uninsured institution.

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

The Sarbanes-Oxley Act

On July 30, 2002, President George W. Bush signed into law the Sarbanes-Oxley Act of 2002. The Sarbanes-Oxley Act implements a broad range of corporate governance and accounting measures for public companies designed to promote honesty and transparency in corporate America and better protect investors from the type of corporate wrongdoing that occurred in Enron, WorldCom and similar companies. The Sarbanes-Oxley Act's principal legislation includes:

- * the creation of an independent accounting oversight board;
- * auditor independence provisions which restrict non-audit services that accountants may provide to their audit clients;
- * additional corporate governance and responsibility measures, including the requirement that the chief executive officer and chief financial officer certify financial statements;
- * the forfeiture of bonuses or other incentive-based compensation and profits from the sale of an issuer's securities by directors and senior officers in the twelve month period following initial publication of any financial statements that later require restatement;
- * an increase in the oversight of, and enhancement of, certain requirements relating to audit committees of public companies and how they interact with the Company's independent auditors;

14

- * requirement that audit committee members must be independent and are absolutely barred from accepting consulting, advisory or other compensatory fees from the issuer;
- * requirement that companies disclose whether at least one member of the committee is an "audit committee financial expert" (as such term is defined by the Securities and Exchange Commission) and if not, why not;
- * expanded disclosure requirements for corporate insiders, including accelerated reporting of stock transactions by insiders and a prohibition on insider trading during pension blackout periods;
- * a prohibition on personal loans to directors and officers, except certain loans made by insured financial institutions;
- * disclosure of a code of ethics and filing a Form 8-K for a change or waiver of such code;
- * mandatory disclosure by analysts of potential conflicts of interest; and
- * a range of enhanced penalties for fraud and other violations.

Although the Company has and will continue to incur additional expense in complying with the provisions of the Sarbanes-Oxley Act and the resulting regulations, such compliance will not have a material impact on

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

its results of operations or financial condition.

Federal Securities Law

The Company's common stock is registered with the SEC under Section 12(g) of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). Thus, the Company is subject to information, proxy solicitation, insider trading restrictions, and other requirements under the Exchange Act.

Bank Regulation

Massachusetts Banking Regulation

General. The Bank is subject to Massachusetts statute and the rules and regulations of the Division establishing the powers of the Bank, investment limitations and minimum standards relative to the security and protection of the Bank for the benefit of Bank employees and the general public.

Loans-to-One-Borrower Limitations. With specified exceptions, the total obligations of a single borrower to a Massachusetts-chartered commercial bank and trust company may not exceed 20% of shareholders' equity. A commercial bank and trust company may lend additional amounts up to 100% of its retained earnings account if secured by collateral meeting the requirements of the Massachusetts banking laws. The Bank currently complies with applicable loans-to-one-borrower limitations.

Dividends. Under the Massachusetts banking laws, a commercial bank and trust company may, subject to several limitations, declare and pay a dividend on its capital stock out of the Bank's net profits. A dividend may not be declared, credited or paid by a stock trust company so long as there is any impairment of capital stock. No dividend may be declared on the Bank's common stock for any period other than for which dividends are declared upon preferred stock, except as authorized by the Commissioner of the Division. The approval of the Commissioner is also required for a commercial bank and trust company to declare a dividend, if the total of all dividends declared by the commercial bank and trust company in any calendar year shall exceed the total of its net profits for that year combined with its retained net profits of the preceding two years, less any required transfer to surplus or a fund for the retirement of any preferred stock.

15

In addition, federal law may also limit the amount of dividends that may be paid by the Bank. See "- Federal Banking Regulation - Prompt Corrective Action."

Examination and Enforcement. The Division is required to periodically examine commercial bank and trust companies at least once every calendar year or at least once each 18-month period if the commercial bank and trust company qualifies as well capitalized under the prompt corrective action provisions of the Federal Deposit Insurance Act. See "- Federal Banking Regulation - Prompt Corrective Action."

Community Reinvestment Act. The Bank is subject to provisions of the Massachusetts Community Reinvestment Act, which are similar to those

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

imposed by the federal Community Reinvestment Act with the exception of the assigned exam ratings. Massachusetts banking law provides for an additional exam rating of "high satisfactory" in addition to the federal Community Reinvestment Act ratings of "outstanding," "satisfactory," "needs to improve" and "substantial noncompliance." The Division is required to consider a bank's Massachusetts Community Reinvestment Act rating when reviewing the Bank's application to engage in certain transactions, including mergers, asset purchases and the establishment of branch offices or automated teller machines, and provides that such assessment may serve as a basis for the denial of any such application. The Massachusetts Community Reinvestment Act requires the Division to assess a bank's compliance and to make such assessment available to the public. The Bank's latest Massachusetts Community Reinvestment Act rating, from an exam dated April 1, 2004, was a rating of "Satisfactory."

Federal Banking Regulation

Capital Requirements. FDIC regulations require Bank Insurance Fund-insured banks, such as the Bank, to maintain minimum levels of capital. The FDIC regulations define two classes of capital known as Tier 1 and Tier 2 capital.

The FDIC regulations establish a minimum leverage capital requirement for banks in the strongest financial and managerial condition, with a rating of 1 (the highest examination rating of the FDIC for banks) under the Uniform Financial Institutions Rating System, of not less than a ratio of 3.0% of Tier 1 capital to total assets. For all other banks, the minimum leverage capital requirement is 4.0%, unless a higher leverage capital ratio is warranted by the particular circumstances or risk profile of the depository institution.

The FDIC regulations also require that banks meet a risk-based capital standard. The risk-based capital standard requires the maintenance of a ratio of total capital (which is defined as the sum of Tier 1 capital and Tier 2 capital) to risk-weighted assets of at least 8% and a ratio of Tier 1 capital to risk-weighted assets of at least 4%. In determining the amount of risk-weighted assets, all assets, plus certain off balance sheet items, are multiplied by a risk-weight of 0% to 100%, based on the risks the FDIC believes are inherent in the type of asset or item.

The federal banking agencies, including the FDIC, have also adopted regulations to require an assessment of an institution's exposure to declines in the economic value of a bank's capital due to changes in interest rates when assessing the Bank's capital adequacy. Under such a risk assessment, examiners will evaluate a bank's capital for interest rate risk on a case-by-case basis, with consideration of both quantitative and qualitative factors.

Institutions with significant interest rate risk may be required to hold additional capital. The agencies also issued a joint policy statement providing guidance on interest rate risk management, including a discussion of the critical factors affecting the agencies' evaluation of interest rate risk in connection with capital adequacy. The Bank was considered "well-capitalized" under FDIC guidelines at December 31, 2004.

Activity Restrictions on State-Chartered Banks. Section 24 of the Federal Deposit Insurance Act ("FDIA"), as amended, which was added by the Federal Deposit Insurance Corporation Improvement Act of 1991 ("FDICIA"), generally limits the activities and investments of state-chartered FDIC insured banks and their subsidiaries to those permissible for national banks and their subsidiaries, unless such activities and investments are

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

specifically exempted by Section 24 or consented to by the FDIC.

16

Section 24 provides an exception for investments by a bank in common and preferred stocks listed on a national securities exchange or the shares of registered investment companies if:

- (1) The Bank held such types of investments during the 14-month period from September 30, 1990 through November 26, 1991;
- (2) The state in which the Bank is chartered permitted such investments as of September 30, 1991; and
- (3) The Bank notifies the FDIC and obtains approval from the FDIC to make or retain such investments. Upon receiving such FDIC approval, an institution's investment in such equity securities will be subject to an aggregate limit up to the amount of its Tier 1 capital.

The Bank received approval from the FDIC to retain and acquire such equity investments subject to a maximum permissible investment equal to the lesser of 100% of the Bank's Tier 1 capital or the maximum permissible amount specified by the FDIA. Section 24 also provides an exception for majority owned subsidiaries of a bank, but Section 24 limits the activities of such subsidiaries to those permissible for a national bank, permissible under Section 24 of the FDIA and the FDIC regulations issued pursuant thereto, or as approved by the FDIC.

Before making a new investment or engaging in a new activity not permissible for a national bank or not otherwise permissible under Section 24 of the FDIC regulations thereunder, an insured bank must seek approval from the FDIC to make such investment or engage in such activity. The FDIC will not approve the activity unless the Bank meets its minimum capital requirements and the FDIC determines that the activity does not present a significant risk to the FDIC insurance funds.

Enforcement. The FDIC has extensive enforcement authority over insured state-chartered commercial bank and trust companies, including the Bank. This enforcement authority includes, among other things, the ability to assess civil money penalties, to issue cease and desist orders and to remove directors and officers. In general, these enforcement actions may be initiated in response to violations of laws and regulations and to unsafe or unsound practices.

The FDIC is required, with certain exceptions, to appoint a receiver or conservator for an insured state bank if that bank is "critically undercapitalized." For this purpose, "critically undercapitalized" means having a ratio of tangible capital to total assets of less than 2%. The FDIC may also appoint a conservator or receiver for a state bank on the basis of the institution's financial condition or upon the occurrence of certain events.

Deposit Insurance. Pursuant to FDICIA, the FDIC established a system for setting deposit insurance premiums based upon the risks a particular institution poses to its deposit insurance fund. Under the risk-based deposit insurance assessment system, the FDIC assigns an institution to one of three capital categories based on the institution's financial information, as of the most recent quarterly report filed with the applicable bank regulatory agency prior to the assessment period. The three

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

capital categories are: (1) well capitalized, (2) adequately capitalized and (3) undercapitalized, using capital ratios that are substantially similar to the prompt corrective action capital ratios discussed below. See "-Federal Banking Regulation - Prompt Corrective Action" below. The FDIC also assigns an institution to a supervisory subgroup based on a supervisory evaluation provided to the FDIC by the institution's primary federal regulator and information that the FDIC determines to be relevant to the institution's financial condition and the risk posed to the deposit insurance funds (which may include, if applicable, information provided by the institution's state supervisor). An institution's assessment rate depends on the capital category and supervisory category to which it is assigned. Any increase in insurance assessments could have an adverse effect on the earnings of insured institutions, including the Bank.

Under the FDIA, the FDIC may terminate the insurance of an institution's deposits upon a finding that the institution has engaged in unsafe or unsound practices, is in an unsafe or unsound condition to continue operations or has violated any applicable law, regulation, rule, order or condition imposed by the FDIC. The management of the Bank does not know of any practice, condition or violation that might lead to termination of deposit insurance.

Transactions with Affiliates of the Bank. Transactions between an insured bank, such as the Bank, and any of its affiliates are governed by Sections 23A and 23B of the Federal Reserve Act (the "FRA"). An affiliate of a bank

17

is any company or entity that controls, is controlled by or is under common control with the Bank. A subsidiary of a bank that is not also a depository institution is not treated as an affiliate of the Bank for purposes of Sections 23A and 23B.

Section 23A:

- * limits the extent to which the Bank or its subsidiaries may engage in "covered transactions" with any one affiliate to an amount equal to 10% of such bank's capital stock and retained earnings, and limit on all such transactions with all affiliates to an amount equal to 20% of such capital stock and retained earnings; and
- * requires that all such transactions be on terms that are consistent with safe and sound banking practices.

The term "covered transaction" includes the making of loans, purchase of assets, issuance of guarantees and other similar types of transactions. Further, most loans by a bank to any of its affiliates must be secured by collateral in amounts ranging from 100 to 130 percent of the loan amounts. In addition, any covered transaction by a bank with an affiliate and any purchase of assets or services by a bank from an affiliate must be on terms that are substantially the same, or at least as favorable to the Bank, as those that would be provided to a non-affiliate.

Effective April 1, 2003, the Federal Reserve Board, or FRB, rescinded its interpretations of Sections 23A and 23B of the FRA and replaced these interpretations with Regulation W. In addition, Regulation W makes various changes to existing law regarding Sections 23A and 23B, including expanding the definition of what constitutes an affiliate subject to Sections 23A and

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

23B and exempting certain subsidiaries of state-chartered banks from the restrictions of Sections 23A and 23B. We do not expect that the changes made by Regulation W will have a material adverse effect on our business.

The Bank's authority to extend credit to its directors, executive officers and 10% shareholders, as well as to entities controlled by such persons, is currently governed by the requirements of Sections 22(g) and 22(h) of the FRA and Regulation O of the Federal Reserve Board. Among other things, these provisions require that extensions of credit to insiders (a) be made on terms that are substantially the same as, and follow credit underwriting procedures that are not less stringent than, those prevailing for comparable transactions with unaffiliated persons and that do not involve more than the normal risk of repayment or present other unfavorable features and (b) not exceed certain limitations on the amount of credit extended to such persons, individually and in the aggregate, which limits are based, in part, on the amount of the Bank's capital. The regulations allow small discounts on fees on residential mortgages for directors, officers and employees. In addition, extensions for credit in excess of certain limits must be approved by the Bank's Board of Directors.

Section 402 of the Sarbanes-Oxley Act of 2002 prohibits the extension of personal loans to directors and executive officers of issuers (as defined in Sarbanes-Oxley). The prohibition, however, does not apply to mortgages advanced by an insured depository institution, such as The Bank, that are subject to the insider lending restrictions of Section 22(h) of the Federal Reserve Act.

Community Reinvestment Act. Under the Community Reinvestment Act ("CRA"), any insured depository institution, including the Bank has a continuing and affirmative obligation consistent with its safe and sound operation to help meet the credit needs of its entire community, including low and moderate income neighborhoods. The CRA does not establish specific lending requirements or programs for financial institutions nor does it limit an institution's discretion to develop the types of products and services that it believes are best suited to its particular community. The CRA requires the FDIC, in connection with its examination of a commercial bank and trust company, to assess the depository institution's record of meeting the credit needs of its community and to take such record into account in its evaluation of certain applications by such institution, including applications for additional branches and acquisitions.

The CRA requires the FDIC to provide a written evaluation of an institution's CRA performance utilizing a four-tiered descriptive rating system and requires public disclosure of an institution's CRA rating. The Bank received a "Satisfactory" rating on its last CRA exam on April 1, 2004.

18

Safety and Soundness Standards. Pursuant to the requirements of the FDICIA, as amended by the Riegle Community Development and Regulatory Improvement Act of 1994, each federal banking agency, including the FDIC, has adopted guidelines establishing general standards relating to internal controls, information and internal audit systems, loan documentation, credit underwriting, interest rate exposure, asset growth, asset quality, earnings and compensation, fees and benefits. In general, the guidelines require, among other things, appropriate systems and practices to identify and manage the risks and exposures specified in the guidelines. The guidelines prohibit excessive compensation as an unsafe and unsound practice and describe compensation as excessive when the amounts paid are

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

unreasonable or disproportionate to the services performed by an executive officer, employee, director, or principal stockholder.

In addition, the FDIC adopted regulations to require a bank that is given notice by the FDIC that it is not satisfying any of such safety and soundness standards to submit a compliance plan to the FDIC. If, after being so notified, a bank fails to submit an acceptable compliance plan or fails in any material respect to implement an accepted compliance plan, the FDIC may issue an order directing corrective and other actions of the types to which a significantly undercapitalized institution is subject under the "prompt corrective action" provisions of the FDICIA. If a bank fails to comply with such an order, the FDIC may seek to enforce such an order in judicial proceedings and to impose civil monetary penalties.

Prompt Corrective Action. The FDICIA also established a system of prompt corrective action to resolve the problems of undercapitalized institutions. The FDIC, as well as the other federal banking regulators, adopted regulations governing the supervisory actions that may be taken against undercapitalized institutions. The regulations establish five categories, consisting of "well capitalized," "adequately capitalized," "undercapitalized," "significantly undercapitalized" and "critically undercapitalized." The severity of the action authorized or required to be taken under the prompt corrective action regulations increases as a bank's capital decreases within the three undercapitalized categories. All banks are prohibited from paying dividends or other capital distributions or paying management fees to any controlling person if, following such distribution, the Bank would be undercapitalized.

Federal Reserve System

Under Federal Reserve Board regulations, the Bank is required to maintain noninterest-earning reserves against its transaction accounts. Current Federal Reserve Board regulations generally require that reserves of 3% must be maintained against aggregate transaction accounts of \$47.6 million or less, subject to adjustment by the Federal Reserve Board. Total transaction accounts in excess of \$47.6 million are required to have a reserve of 10% held against them, which are also subject to adjustment by the Federal Reserve Board. The first \$7.0 million of otherwise reservable balances, subject to adjustments by the Federal Reserve Board, are exempted from the reserve requirements. The Bank is in compliance with these requirements. Because required reserves must be maintained in the form of vault cash, a noninterest-bearing account at a Federal Reserve Bank or a pass-through account as defined by the Federal Reserve Board, the effect of this reserve requirement is to reduce the Bank's interest-earning assets.

Federal Home Loan Bank System

The Bank is a member of the Federal Home Loan Bank system, which consists of 12 regional Federal Home Loan Banks. The Federal Home Loan Bank provides a central credit facility primarily for member institutions. The Bank, as a member of the Federal Home Loan Bank of Boston (the "FHLB"), is required to acquire and hold shares of capital stock in the FHLB in an amount equal to at least 1% of the aggregate principal amount of its unpaid residential mortgage loans and similar obligations at the beginning of each year, or 1/20 of its advances (borrowings) from the FHLB, whichever is greater. The Bank was in compliance with this requirement with an investment in FHLB stock at December 31, 2004 of \$4.6 million. The Federal Home Loan Banks are required to provide funds for certain purposes including contributing funds for affordable housing programs. These requirements could reduce the amount of dividends that the Federal Home

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

Loan Banks pay to their members and result in the Federal Home Loan Banks imposing a higher rate of interest on advances to their members.

The USA PATRIOT Act.

The Bank is subject to the USA PATRIOT Act, which gives the federal government new powers to address terrorist threats through enhanced domestic security measures, expanded surveillance powers, increased information sharing, and broadened anti-money laundering requirements. By way of amendments to the Bank Secrecy Act, Title III of the USA PATRIOT Act takes measures intended to encourage information sharing among bank regulatory agencies and law enforcement bodies. Further, certain provisions of Title III impose affirmative obligations on a broad range of financial institutions, including banks, thrifts, brokers, dealers, credit unions, money transfer agents, and parties registered under the Commodity Exchange Act.

Among other requirements, Title III of the USA PATRIOT Act imposes the following requirements with respect to financial institutions:

- * Pursuant to Section 352, all financial institutions must establish anti-money laundering programs that include, at minimum: (i) internal policies, procedures, and controls; (ii) specific designation of an anti-money laundering compliance officer; (iii) ongoing employee training programs; and (iv) an independent audit function to test the anti-money laundering program.
- * Pursuant to Section 326, on May 9, 2003, the Secretary of the Department of Treasury, in conjunction with other bank regulators, issued Joint Final Rules that provide for minimum standards with respect to customer identification and verification. These rules, which became effective on October 1, 2003, require each financial institution to implement a written customer identification program appropriate for its size, location and type of business that includes certain minimum requirements.
- * Section 312 requires financial institutions that establish, maintain, administer, or manage private banking accounts or correspondent accounts in the United States for non-United States persons or their representatives (including foreign individuals visiting the United States) to establish appropriate, specific, and, where necessary, enhanced due diligence policies, procedures, and controls designed to detect and report instances of money laundering through those accounts.
- * Section 318, which became effective December 25, 2001, prohibits financial institutions from establishing, maintaining, administering, or managing correspondent accounts for foreign shell banks (foreign banks that do not have a physical presence in any country), and requires financial institutions to take reasonable steps to ensure that correspondent accounts provided to foreign banks are not being used to indirectly provide banking services to foreign shell banks.
- * Bank regulators are directed to consider a holding company's effectiveness in combating money laundering when ruling on Bank Holding Company Act and Bank Merger Act applications.

Recent Regulatory Examinations

During 2003, the Bank continued to operate under an informal agreement (Memorandum of Understanding) with the FDIC and Massachusetts Commissioner of Banks. This agreement was originally entered into in December 2000. Following completion of a joint examination in 2002, a revised Memorandum of Understanding was entered into during the first quarter of 2003. The FDIC, with concurrence from the Massachusetts Commissioner of Banks, terminated the aforementioned Memorandum of Understanding effective January 22, 2004.

As the result of a 2004 joint examination, on March 14, 2005, the Bank entered into an informal agreement (Memorandum of Understanding) with the FDIC and Massachusetts Commissioner of Banks under which the Bank agreed to certain recommendations designed to strengthen its policies and procedures for compliance with certain provisions of the Bank Secrecy Act.

PROPERTIES

Our main office is located at 100 Slade's Ferry Avenue, Somerset, Massachusetts at the junctions of U.S. Routes 6, 138, and 103. We operate our business from eight full service banking offices located in Fairhaven, Fall River, New Bedford, Seekonk, Somerset and Swansea, Massachusetts. As of December 31, 2004, the following properties were owned through the Bank's wholly-owned subsidiary, Slade's Ferry Realty Trust:

	Location -----		Sq. Footage -----
Main Office	100 Slade's Ferry Avenue	Somerset, MA	42,000
North Somerset	2722 County Street	Somerset, MA	3,025
Linden Street	244-253 Linden Street	Fall River, MA	1,750
Brayton Avenue	855 Brayton Avenue	Fall River, MA	3,325
North Swansea	2388 G.A.R. Highway	Swansea, MA	2,960
Seekonk	1400 Fall River Avenue	Seekonk, MA	2,300
Fairhaven	75 Huttleston Avenue	Fairhaven, MA	13,000
Ashley Boulevard	833 Ashley Boulevard	New Bedford, MA	2,655

The office listed below is leased by the Bank with the indicated lease expiration date.

Brayton Avenue Drive Up Complex (expires July 2006)	16 Stevens St.	Fall River, MA	549
---	----------------	----------------	-----

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

The main office building contains approximately 42,000 square feet of usable space which we occupy. We also operate a school banking facility located in the Somerset High School, Grandview Avenue, Somerset, Massachusetts that consists of 200 square feet. This facility provides basic banking services to students and school staff. The Seekonk office is an 8,800 square foot building of which we utilize 2,300 square feet and lease out the remainder.

We closed two branches during 2004. The first was a leased facility located at 838 Pleasant Street, New Bedford. The second was a branch located at 1601 South Main Street, Fall River. This property was sold in March 2005.

A new branch, located in Assonet, Massachusetts, was opened in March 2005. The branch will be leased. As of December 31, 2004 the leasing arrangements had not been finalized.

MARKET FOR REGISTRANT'S COMMON EQUITY, RELATED STOCKHOLDER MATTERS AND ISSUER PURCHASES OF EQUITY SECURITIES

Market Information

Our common stock is listed in the Nasdaq Small Cap Market under the symbol SFBC. The following table sets forth the range of high and low bid price for our common stock as reported for the Nasdaq Small Cap Market by quarter for the two-year period ended December 31, 2004:

2004		2003	
High	Low	High	Low
----	---	----	---

Edgar Filing: SLADES FERRY BANCORP - Form 10-K/A

1st Quarter	\$ 24.00	\$ 21.75	\$ 14.26	\$ 13.25
2nd Quarter	\$ 22.00	\$ 17.35	\$ 15.77	\$ 14.18
3rd Quarter	\$ 22.94	\$ 18.65	\$ 18.50	\$ 15.60
4th Quarter	\$ 20.90	\$ 19.01	\$ 23.00	\$ 18.55

During 2004, there were no shares repurchased.

As of March 15, 2005 there were 1,308 holders of an aggregate of 4,078,333 shares of common stock issued and outstanding.

Dividends - History and Policy

Slade's Ferry Bancorp, since its inception in 1990 and prior thereto the Bank, has consistently paid dividends to shareholders since 1961. We paid four quarterly cash dividends of \$.09 per share for a total of \$.36 per share during each of 2003 and 2004.

The declaration of cash dividends is dependent on a number of factors, including regulatory limitations, and the Bank's operating results and financial condition. Our shareholders will be entitled to dividends only when, and if, declared by the our Board of Directors out of funds legally available. Under the Massachusetts Business Corporation Law, a dividend may not be declared if the corporation is insolvent or if the declaration of the dividend would render the corporation insolvent.

Chapter 172 Section 28 of the Massachusetts Statutes on Bank and Banking provides that a bank's Board of Directors may, subject to the restriction contained in the section, declare and pay dividends on capital stock out of net profits from time to time and to such extent as they deem advisable. However, under this provision, no cash dividend shall be paid unless, following the payment of such dividend, the capital stock and retained earnings account will be unimpaired.
