Presentation to investors and analysts on Prudential plc's US operations

Embargo 11.00 hrs Wednesday 30 October 2002

Presentation to investors and analysts on Prudential plc's US operations

Prudential plc will hold a number of presentations today (30 October) and tomorrow (31 October) for investors and analysts covering the Group's business operations in the United States. These presentations will be hosted by Clark Manning, Chief Executive Officer of Jackson National Life ("JNL"), with support from senior members of the JNL management team.

The main objectives of the presentations are to:

Review JNL's track-record of delivering strong growth (including highlighting the factors that led to JNL's strong sales performance in the first nine months of 2002, summary details of which are included in the Notes to Editors);

Summarise the market opportunities for JNL in the United States;

Outline the strategic priorities for the business;

Update on current market conditions in the United States; and

Answer questions about JNL's performance and strategy.

In addition to Strategic and Financial Overviews, there will be presentations covering Asset/Liability Management, Investment Management, Retail and Institutional Products, Distribution, Information Systems and Customer Service. These presentations will reinforce a number of key messages, in particular that Jackson National Life has:

A good track record of delivering strong growth and performance;

A clear ambition to continue growing the business;

A robust business proposition that incorporates:

a value-based approach;

a low-cost, flexible infrastructure;

an excellent product manufacturing and administrative capability;

a relationship-driven distribution model; and

Edgar Filing: PRUDENTIAL PLC - Form 6-K

strong risk management capabilities and financial discipline.

A team with a clear view of the future opportunities and challenges facing the business;

A strategy that is designed to deliver sustained profitable growth; and

Is well placed to benefit from the anticipated growth in the US financial services market.

There will be an update on current market conditions in the United States and their implications for JNL's financial and strategic positioning. This will include a reference to realised losses in relation to defaults and impairments on bonds which, on the basis of known defaults to date, are expected to be less in 2002 than the figure of US\$532 million incurred in 2001 (US\$228 million in the first half of 2002).

A live webcast of the presentation and the presentation slides will be available on the Group's website, www.prudential.co.uk from 2.00pm on Wednesday 30 October and 8.30am on Thursday 31 October 2002.

A pre-recorded interview with Clark Manning (in video/audio/text) will be available on www.prudential.co.uk and www.cantos.com from 11.00am on Wednesday 30 October 2002.

Notes to Editors:

1. Jackson National Life ("JNL")

JNL was acquired by Prudential in 1986. Today, it is the 21st largest US life insurance company ranked by total assets, and has more than 1.5 million policies and contracts in force.

JNL is a leading provider of fixed, indexed and variable annuities, term and permanent life insurance, and stable value products.

Headquartered in Lansing, Michigan, and employing 2,400 people (including affiliates and subsidiaries), JNL markets its products in 49 states and in the District of Columbia through independent agents, broker-dealers and financial institutions. JNL's subsidiary, Jackson National Life Insurance Company of New York, markets its products through similar channels in the State of New York.

JNL's investment portfolio is managed by PPM America Inc., which manages some US\$62 billion of US assets.

2. 2002 Financial Performance

Interim Results

Edgar Filing: PRUDENTIAL PLC - Form 6-K

New business achieved profits increased 26 per cent to £117 million in the first half of 2002, driven by a strong increase in insurance sales and an improvement in the new business margin from 35 to 39 per cent.

We continued to see a high level of bond defaults in the first half of 2002 and JNL, like its competitors, did not escape the impact of these volatile market conditions. Defaults and impairments on bonds resulted in realised losses of US\$228 million. Losses are accounted for on a five-year average basis and the effect of these losses was to increase the half-year-on-half-year charge by £63 million to £71 million. These losses equated to 0.6 per cent of JNL's total invested assets.

Nine-month sales to 30 September

JNL recorded an 18 per cent increase in total sales to £4.5 billion in the first nine months of 2002 compared to the corresponding period in 2001, reflecting strong sales of variable and fixed annuities. APE sales during the period increased by 17 per cent to £464 million.

Total single premium sales during the period increased by 18 per cent. Total sales of annuity products to retail customers of £3 billion were up 39 per cent on the first nine months of 2001. Variable annuity sales of £852 million were up 39 per cent and sales of fixed annuities during the period of £2 billion increased by 44 per cent. During 2002, JNL has made a number of revisions to its product lines which have had a positive impact on sales; in September 2002, 65 per cent of new annuities business was from products launched this year.
