**Dear Fellow Shareholders:**

CryptoLogic delivered another record quarter in Q1 2006. Revenue was up 33%, earnings were up 58%, and diluted earnings per share were up 65%. After the quarter-end, our Board of Directors declared an increase in our quarterly cash dividend of 71%, to \$0.12 per share.

---

**Financial Highlights**

*(in millions of US dollars, except per share data)*

		<b>Three months ended</b>		
	<b>2006</b>	<b>March 31,</b>	<b>2005</b>	<b>% Change</b>
Revenue	\$ 27.0	\$	20.3	33%
Earnings	\$ 7.7	\$	4.8	58%
Earnings per diluted share	\$ 0.56	\$	0.34	65%
EBITDA <sup>(1)</sup>	\$ 8.7	\$	5.8	49%
Casino revenue	\$ 15.0	\$	13.2	14%
Poker revenue	\$ 9.6	\$	5.5	74%

The results surpassed our expectations and were driven by innovative casino games and an expanding poker offering that continued to fuel growth in our casino and poker fees. This success is a validation of the strength of CryptoLogic's strategy, products and discipline in choosing our licensees. On this last point, we are very excited to welcome a new blue-chip licensee the iconic Playboy brand which will help position CryptoLogic for an even more prosperous future.

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

We advanced a number of our strategies in Q1 2006:

**Geographic diversification.** Over 65% of licensees' revenue continued to be generated from overseas markets;

**Product diversification and innovation.** Internet casino licensing contributed 56% of CryptoLogic's revenue, while Internet poker represented 36%. We launched enhancements to our poker platform that help drive licensees' revenue through high-speed play, online entry into a wide range of land-based poker tournaments, and a reward system to build player loyalty;

**Customer diversification.** After the quarter-end, Cryptologic signed a new licensee, a Playboy-branded casino, and extended until at least January 1, 2012 our current commercial terms with our largest licensee, which operates the InterCasino and InterPoker brands;

**Dividend.** On May 9<sup>th</sup>, CryptoLogic's Board of Directors declared a 71% increase in the quarterly cash dividend to US\$0.12 per share, payable on June 15, 2006 to shareholders of record on June 8, 2006.

### Record Financial Performance

**Total Revenue.** Revenue increased 33% to a record \$27.0 million (Q1 2005: \$20.3 million), ahead of our guidance of \$25.1 to \$25.5 million. CryptoLogic's revenue growth in both of our primary software markets, Internet poker and Internet casino, benefited from ongoing product innovation and the resulting rise in player traffic at licensees' sites.

**EBITDA.** EBITDA<sup>(1)</sup> for the quarter grew 49% to a record \$8.7 million (Q1 2005: \$5.8 million). EBITDA<sup>(1)</sup> margin grew in the quarter to 32% of revenue (Q1 2005: 29%).

2006 CryptoLogic Inc. First Quarter Report

1

---

**Earnings and Earnings per Diluted Share.** At a record \$7.7 million, CryptoLogic's earnings grew 58% (Q1 2005: \$4.8 million). Earnings per diluted share rose 65% to \$0.56 (Q1 2005: \$0.34), ahead of Cryptologic's guidance of \$0.49 to \$0.50.

**Balance Sheet and Cash Flow.** CryptoLogic's financial strength continued to be reflected in our strong balance sheet and operating cash flow. At March 31, 2006, total cash grew to \$111.6 million (comprising cash and cash equivalents, short term investments, and security deposits of \$1.5 million), or \$8.15 per diluted share (December 31, 2005: \$99.1 million, or \$7.05 per diluted share). We continue to be debt-free. CryptoLogic's working capital rose to \$83.6 million, or \$6.11 per diluted share (December 31, 2005: \$73.6 million, or \$5.23 per diluted share).

Operating cash flow for the first quarter of 2006 grew to \$11.5 million (Q1 2005: \$2.6 million) primarily as a result of higher earnings and increased accrued liabilities, partially offset by higher prepaid expenses.

### Product Diversification and Innovation

CryptoLogic's fees from Internet poker software grew 74% to \$9.6 million (Q1 2005: \$5.5 million), up 22% compared to Q4 2005. These poker fees represented 36% of total Q1 2006 revenue. Internet casino software licensing revenue increased 14% to \$15.0 million (Q1 2005: \$13.2 million), up 2% over Q4 2005 after adjusting for an unusual chargeback recovery of \$0.8 million in the fourth quarter of 2005. Internet casino remains CryptoLogic's largest revenue contributor at 56% of Q1 2006 revenue.

The growth in poker fees over comparable periods is largely a result of increased traffic and player activity at licensees' sites. CryptoLogic expects that ongoing product and feature innovation will help to continue this trend. In Q1 2006, we enhanced our Internet poker tournament software with new features including high-speed *Thunder Tournaments*, which offer accelerated play and shorter blind levels. We also introduced an exclusive Super Satellite Tournament Structure that provides more chances to qualify for the world's biggest land-based tournaments, and My Poker Points, a reward system that enables online players to compete with points or use them for tournament entry fees.

3

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

CryptoLogic's growth in casino licensing revenue benefited from the Bonus Pack 8 games that we introduced in Q3 2005, including the exclusive Marvel comic-themed slot games and Bejeweled, the very popular gem-matching slot game. In March 2006, these games alone represented over 10% of licensees' casino revenue. CryptoLogic's proprietary online slot game, Millionaires Club<sup>SM</sup>, has also been very successful: its jackpot exceeds US\$2.5 million, the largest in online gaming history.

### Geographic Diversification

CryptoLogic's record results reflect our global strategy to diversify across jurisdictions known for their strongest near-term growth opportunities. Revenue generated from international players continued to exceed 65% of licensees' Q1 2006 revenue. The UK and other European markets remained strong contributors, together accounting for more than 60% of overall revenue in the quarter.

### Customer Diversification

Subsequent to the quarter end, CryptoLogic announced an exclusive three-year licensing deal to develop a new casino site featuring Playboy, one of the world's most recognizable entertainment brands, which should be launched in Q1 2007. We also extended current commercial terms until at least January 1, 2012 with our largest customer, Overseas Internet Gaming Entertainment NV, which operates the InterCasino and InterPoker sites. As well, CryptoLogic announced the termination of the licensing agreement with The Ritz Club London Online, effective on or prior to October 28, 2006. The Ritz accounts for less than two per cent of revenue. These announcements support CryptoLogic's strategy of return on effort aimed at maximizing growth and returns by focusing on major blue-chip entertainment brands with the best potential.

2006 CryptoLogic Inc. First Quarter Report

2

---

The Playboy opportunity meets all of CryptoLogic's strict criteria for partnership: a well-known entertainment brand, an audience with a propensity for online gaming, and the financial resources and commitment to market their site.

### Outlook

For Q2 2006, CryptoLogic forecasts revenue of \$26.4-\$26.7 million and earnings of \$6.6-\$6.8 million, or \$0.48-\$0.49 per diluted share. We expect the Q2 2006 release of our next casino game pack, which will include additional Marvel games, to help partially offset the typical seasonality for Internet gaming during the warmer months of the year, when players spend more time outdoors.

We expect that ongoing innovations and enhancements in our casino, poker and back-office software, and continued business diversification and regulatory leadership will help drive growth in the future. When launched, the Playboy-branded casino site is expected to complement CryptoLogic's ongoing organic growth, geographic diversification, and to contribute to positive financial results.

Respectfully,

Lewis Rose  
President and CEO

## MANAGEMENT'S DISCUSSION AND ANALYSIS

CryptoLogic Inc. and our subsidiaries are referred collectively as CryptoLogic, the Company, we, us and our throughout Management's Discussion and Analysis (MD&A), unless otherwise specified. The following MD&A should be read in conjunction with the unaudited consolidated interim financial statements of CryptoLogic, including the notes thereto, for the three months ended March 31, 2006, and the audited consolidated financial statements and the MD&A for the year ended December 31, 2005 as set out in our 2005 Annual Report. Except where otherwise indicated, the reader may assume that economic and industry factors are substantially unchanged from the 2005 year-end MD&A. This MD&A is dated May 10, 2006. Additional information relating to CryptoLogic, including our Annual Information Form, is available on SEDAR at [www.sedar.com](http://www.sedar.com) or EDGAR at [www.sec.gov](http://www.sec.gov).

All currency amounts are in US dollars, unless otherwise indicated.

## BUSINESS OVERVIEW

CryptoLogic is a world-leading and long-standing publicly traded online gaming software developer and supplier serving the global Internet gaming market. WagerLogic Limited (WagerLogic), a wholly-owned subsidiary of CryptoLogic, provides software licensing, e-cash management and customer support services for our Internet gaming software to an internationally-recognized blue-chip client base (licensees or customers) around the world who operate under government authority where their Internet businesses are domiciled.

## OVERVIEW OF RESULTS

In the first quarter of 2006, CryptoLogic delivered record revenue, EBITDA<sup>(1)</sup>, earnings, and earnings per share performance. The results were achieved through organic growth from a core group of blue-chip international customers benefiting from increased revenue in both of the Company's primary markets of Internet casino and Internet poker.

Revenue rose 33% for Q1 2006 to a record \$27.0 million (Q1 2005: \$20.3 million). Q1 2006 EBITDA<sup>(1)</sup> increased to \$8.7 million, up 49% (Q1 2005: \$5.8 million). EBITDA<sup>(1)</sup> margin grew to 32% of revenue in Q1 2006 (Q1 2005: 29%). Earnings rose 58% to \$7.7 million or \$0.56 per diluted share (Q1 2005: \$4.8 million, or \$0.34 per diluted share).

CryptoLogic's balance sheet at March 31, 2006 continued to be strong. Cash, cash equivalents and short term investments rose to \$111.6 million (including \$1.5 million in security deposits) at quarter-end (December 31, 2005: \$99.1 million including \$1.5 million in security deposits). The Company had no debt at quarter-end, or year-end 2005. Working capital grew to \$83.6 million (December 31, 2005: \$73.6 million).

On May 9<sup>th</sup>, CryptoLogic's Board of Directors declared a 71% increase in the quarterly cash dividend to US\$0.12 per share, payable on June 15, 2006 to shareholders of record on June 8, 2006.

## RESULTS OF OPERATIONS

### Revenue

Revenue reached record levels in Q1 2006, up 33% to \$27.0 million (Q1 2005: \$20.3 million). Online casino continued to represent the largest portion of revenues and online poker continued to grow at a strong rate.

### Internet Casino

Q1 2006 Internet casino revenue rose 14% to \$15.0 million (Q1 2005: \$13.2 million), up 2% over Q4 2005 (\$15.5 million, or \$14.7 million,

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

adjusted) after adjusting for an unusual chargeback recovery of \$0.8 million in the fourth quarter of 2005. Casino fees accounted for 56% of total Q1 2006 revenue.

Fees or licensing revenue from our casino business is calculated as a percentage of a licensee's level of activity in its online casino site. Such revenue is affected by the number of active players on licensee's sites and their related gaming activity. In turn, these results are influenced by a variety of factors, including the entertainment value of CryptoLogic-developed casino games, the frequency and success of new offerings and the effectiveness of our licensee's marketing programs.

Currently, CryptoLogic releases new game packs twice each year. The games in Bonus Pack 8 of our casino software (released in Q3 2005) were the primary drivers behind the improved casino revenue at licensee sites. The software package included Marvel comic-themed games, based on characters such as The Hulk, Daredevil, The X-Men, Blade and The Punisher, and the first online play-for-real slot version of Bejeweled, one of the most popular titles online. Together, the Bonus Pack 8 games represented more than 10% of licensee's casino revenue for March 2006.

Our licensee also benefited from Millionaires Club, our patented, progressive Internet slot game, which now has a jackpot over \$2.5 million an online casino record.

The Company expects the release of its next game pack in Q2 2006 to help offset the effect of summer seasonality in what is typically a softer quarter. Please refer to the Revenue Trends section of this MD&A for more details.

### Internet Poker

Q1 2006 Internet poker revenue grew 74% to \$9.6 million (Q1 2005: \$5.5 million), up 22% over Q4 2005 (\$7.9 million). Such fees represented 36% of Q1 2006 revenue.

Through WagerLogic, CryptoLogic offers a virtual central poker room for its licensee. Fees from online poker are based on a percentage of the licensee's rake per hand in regular or ring games (the rake is typically 5% of the pot, up to a maximum amount per hand), or fixed fees for entry into poker tournaments. Players prefer poker rooms with strong liquidity rooms that offer high availability of games at the desired stake levels, in their currency of choice, on a 24/7 basis. The Company believes that our licensee's central poker room is ranked as one of the top five rooms online, by revenue.

During Q1 2006, we continued to enhance our Internet poker platform through a number of innovations to our online poker tournament software. We introduced *Thunder Tournaments*, which reduce player decision time to 12 seconds and provide shorter blind levels, creating one of the fastest tournament structures available online. The new *Thunder Tournaments* complement our popular high-speed Lightning™ ring games. Also in Q1 2006, CryptoLogic introduced My Poker Points, a reward system that lets online players compete with points or use them for tournament entry, and an enhanced Super-Satellite tournament structure, called Land-Based Online Qualification Series, for online qualification to a choice of 20 premier land-based poker events around the globe.

### Other sources of revenue

We also earn licensing revenue from online bingo software and other revenue, which includes fees for software customization and fees for marketing support. Bingo licensing revenue represented \$0.1 million, or 1% of Q1 2006 total revenue (Q1 2005: \$0.2 million, or 1% of revenue). Other revenue in Q1 2006 was \$2.2 million, or 8% of total revenue (Q1 2005: \$1.3 million, or 7% of revenue).

---

### Geographic diversification

CryptoLogic continues to be well-diversified in the key global markets for online gaming. Licensee's revenue derived from international players continued to account for more than 65% of overall Q1 2006 revenue, as it had in Q1 2005. The UK and Continental Europe represented the vast majority, and together accounted for more than 60% of total Q1 2006 revenue, comparable to Q1 2005.

Revenue trends

We experience seasonality in our business. The first and fourth quarters of the year are typically the Company's strongest. Players spend less time online during the warmer months. We expect this trend to continue, particularly for the more developed casino market.

While the global online gaming market continues to promise vast growth potential, competition is intensifying for players and market position. We believe, however, that continued disciplined execution of our business strategy will contribute to ongoing growth in the future. Please refer to the Business Outlook section of this MD&A for more details.

**Operating Costs**

Operating costs comprise software development and support costs that include all personnel and equity compensation costs for employee stock options and our Long Term Incentive Program, licensee support, customer service costs and compliance-related expenditures. Operating costs were \$16.4 million in Q1 2006 or 61% of revenue (Q1 2005: \$12.8 million, or 63% of revenue).

Increased costs, in absolute terms, were in line with CryptoLogic's expenditures on new casino games, enhancement of our poker offering, an expanding system infrastructure to support growing player traffic and volumes, and improvement of our customer care and back-office processing and support services. Also, higher operating costs reflected higher processing fees associated with increased financial transaction volumes.

CryptoLogic will continue to manage normal course expenditures in proportion to revenue generation. We also plan for incremental investments that may be necessary to position the Company effectively in a competitive marketplace, and to prepare for a regulated UK market for online gaming.

**General and Administrative Costs**

General and administrative (G&A) expenses were \$1.9 million for the quarter (Q1 2005: \$1.6 million). The marginal increase in Q1 2006 reflected higher costs associated with a growing organization and increased facilities and infrastructure expenditures. G&A expenses are expected to rise modestly, but are expected to remain fairly consistent as a percentage of revenue.

**Finance Costs**

Finance costs include bank charges and fees for bank drafts. During Q1 2006, these costs stayed relatively level at \$0.1 million (Q1 2005: \$0.09 million).

**EBITDA<sup>(1)</sup>**

EBITDA<sup>(1)</sup> improved significantly to \$8.7 million (Q1 2005: \$5.8 million), up 49%. EBITDA<sup>(1)</sup> margin increased to 32% of revenue in Q1 2006 (Q1 2005: 29%). Improved margins in Q1 2006 reflected the inherent leverage in CryptoLogic's business model at higher levels of revenue. EBITDA<sup>(1)</sup> is expected to remain strong as normal course expenditures continue to be managed in proportion to revenue generation.

(1) Management believes that EBITDA (earnings before interest, taxes, and amortization) is a useful supplemental measure of performance. However, EBITDA is not a recognized earnings measure under generally accepted accounting principles (GAAP) and does not have a standardized meaning. Therefore, EBITDA may not be comparable to similar measures presented by other companies.

EBITDA is reconciled to earnings as follows:

(In thousands of US dollars)	For the three months ended March 31,	
	2006	2005
Earnings	\$ 7,662	\$ 4,839
Income taxes	1,246	795

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

Interest income	(1,443)	(637)
Amortization	1,195	802
<hr/>		
EBITDA	\$ 8,660	\$ 5,799
<hr/>		

### Amortization

During the quarter, amortization expense was \$1.2 million (Q1 2005: \$0.8 million). The increase reflected higher investments made in computer equipment, leasehold improvements, software and licenses to support our growing organization.

### Interest Income

Interest income, comprising interest earned on the Company's cash and short term investment balances, rose to \$1.4 million in Q1 2006 (Q1 2005: \$0.6 million). The increase was a result of higher cash and short term investment positions and better interest yield.

### Provision for Income Taxes

Income taxes for the quarter were \$1.2 million (Q1 2005: \$0.8 million), primarily due to higher pre-tax profits and increased taxable income in higher tax jurisdictions. The future income tax credit of \$0.4 million (Q1 2005: credit \$0.2 million) relates to timing differences between tax and accounting recognition with respect to certain of the Company's expenses.

### Earnings

Earnings in Q1 2006 rose 58% to \$7.7 million, and grew 65% per diluted share to \$0.56 (Q1 2005: \$4.8 million, or \$0.34 per diluted share). Please refer to revenue and expense sections of this MD&A for variance explanations.

### Summary of Quarterly Results

	Fiscal 2006		Fiscal 2005			Fiscal 2004

2006 CryptoLogic Inc. First Quarter Report

7

Typically, the first and fourth quarters (during the winter and fall seasons) are CryptoLogic's strongest periods. Revenue in the middle two quarters of the year can slow down as Internet usage moderates in the warmer months, when players spend more time outdoors.

### LIQUIDITY AND CAPITAL RESOURCES

In the quarter, CryptoLogic improved its strong financial position. As at March 31, 2006, the Company had no debt, and a total cash position of \$111.6 million (comprising cash and cash equivalents, short term investments, and security deposits of \$1.5 million), or \$8.15 per diluted share (December 31, 2005: \$99.1 million, including \$1.5 million in security deposits, or \$7.05 per diluted share). CryptoLogic's working capital rose to

### RESULTS OF OPERATIONS

8

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

\$83.6 million, or \$6.11 per diluted share (December 31, 2005: \$73.6 million, or \$5.23 per diluted share).

Operating cash flow for the first quarter of 2006 was \$11.5 million (Q1 2005: \$2.6 million). This increase was largely due to higher earnings and increased accrued liabilities, partially offset by higher prepaid expenses.

Specifically, the increase in prepaid expenses and accrued liabilities was mainly due to a higher provision for our Long Term Incentive Plan ( LTIP ). The LTIP is a cash-based incentive program tied to our financial and stock performance, and forms part of a broader strategy of employee compensation aimed at attracting and retaining high-quality employees to foster long term shareholder value. The LTIP provision rose in Q1 2006, reflecting grants under the plan for the two years of 2005 and 2006, and because CryptoLogic's stock price increased over the quarter, which affects the LTIP calculation. Also affecting accruals was a higher jackpot provision in Q1 2006 reflecting the success and growing jackpot prizes of our slot games, most notably Millionaires Club™, which now offers a record online jackpot of more than \$2.5 million.

CryptoLogic currently has approximately 13.6 million common shares and approximately 946,000 stock options outstanding.

### **CRITICAL ACCOUNTING POLICIES, CHANGES IN ACCOUNTING POLICIES AND OFF-BALANCE SHEET ARRANGEMENTS**

These items are substantially unchanged as discussed in the Company's MD&A for the year ended December 31, 2005 as contained in our 2005 Annual Report, filed on SEDAR at [www.sedar.com](http://www.sedar.com) or EDGAR at [www.sec.gov](http://www.sec.gov).

### **RISKS AND UNCERTAINTIES**

The primary risks and uncertainties that affect and may affect us and our business, financial condition and results of operations are substantially unchanged from the Company's MD&A for the year ended December 31, 2005 as contained in our 2005 Annual Report, filed on SEDAR at [www.sedar.com](http://www.sedar.com) or EDGAR at [www.sec.gov](http://www.sec.gov).

### **OUTLOOK**

While the global online gaming market continues to promise vast growth potential, competition is intensifying for players and market position. CryptoLogic's disciplined execution of a strategy of customer, product and market diversification has contributed to increasing revenue, earnings and cash generation. We remain committed to this focused approach to drive both the organic growth of a core group of high quality international brand-name customers in Internet casino and Internet poker, and allow for the addition of carefully chosen new, blue-chip licensees.

In Internet casino, we will continue to deliver an array of new and engaging games to help our licensees refresh their offerings to players, and foster player loyalty. Introduction of our Bonus Pack 9 suite of new

---

games, including additional Marvel comic-branded slots, will begin in Q2 2006. Given the popularity of the games in Bonus Pack 8, we expect these new offerings to be solid business drivers for our casino licensees.

In Internet poker, the Company will continue to enhance our poker solution to build on the liquidity in our licensees' central poker room, including the wide choice of games, stake levels and tournaments, around the clock. During 2006, we will continue to add new games and features, further expand our tournament offerings, and enhance the look and feel of the game environment.

The ability of our licensees to market their sites effectively is key to CryptoLogic's success. Accordingly, we continue to enhance our back-office solutions that help customers attract, retain, and re-activate players. We will continue to build on our offering of sophisticated business intelligence, data mining and marketing tools, which are helping customers better understand, respond to and serve their players.

As announced in August 2005, Betfair, a poker software licensee, is expected to leave the central poker room sometime between June 2006 and January 2007. WagerLogic will receive fees from Betfair such that CryptoLogic's annual results for 2006 are not expected to be materially

## Edgar Filing: CRYPTOLOGIC INC - Form 6-K

affected. While Betfair's exit could affect the liquidity of the central poker room in 2007, the substantial organic growth of our other major customers is expected to be an offsetting factor.

Subsequent to the quarter end, we announced an exclusive three-year licensing deal to develop a new casino site featuring Playboy, one of the world's most recognizable entertainment brands, which should be launched in Q1 2007. We also extended our current commercial terms until at least January 1, 2012 with our largest customer, Overseas Internet Gaming Entertainment NV, which operates the InterCasino, and InterPoker sites. As well, we announced the termination of the licensing agreement with one of our smallest customers, The Ritz Club London Online, effective on or prior to October 28, 2006. The Ritz accounts for less than two per cent of our revenue. These announcements support CryptoLogic's strategy of return on effort aimed at maximizing growth and returns by focusing on major blue-chip entertainment brands with the best potential.

The Playboy opportunity meets all of CryptoLogic's strict criteria for partnership: a well-known entertainment brand, an audience with a propensity for online gaming, and the financial resources and commitment to market their site. We expect that the addition of the Playboy brand to our licensee base will complement our ongoing organic growth, be consistent with our strategy of geographic diversification and contribute positively to our financial results.

**NOTES TO CONSOLIDATED INTERIM FINANCIAL STATEMENTS**

As at March 31, 2006

*(All figures are in thousands of US dollars, except per share disclosure and where otherwise indicated)  
(Unaudited)*

These consolidated interim financial statements of CryptoLogic Inc. (the Company) have been prepared in accordance with Canadian generally accepted accounting principles (GAAP) using the same accounting policies as were used for the audited consolidated financial statements for the year ended December 31, 2005. These interim consolidated financial statements do not contain all disclosures required by GAAP and, as such, should be read in conjunction with the audited consolidated financial statements including the notes thereto for the year ended December 31, 2005, as set out in the 2005 Annual Report.

**1. Stock Option Plan**

In accordance with the guidelines of the Canadian Institute of Chartered Accountants, the Company has expensed the costs of all stock option grants issued on or after January 1, 2003. The fair value of the options granted in 2005 and 2006 was made using the Black-Scholes option pricing model under the following weighted assumptions.

	<u>2006</u>	<u>2005</u>
Dividend yield	1.00%	0.75%
Risk-free rate	4.25%	3.25%
Expected volatility	55.0%	50.0%
Expected life of options in years	5.0	5.0

The estimated fair value of options is recorded over the vesting period of the options. The cost of stock options of \$527 in Q1 2006 (Q1 2005: \$425) is included in operating costs with a corresponding addition to Stock Options in Shareholders' Equity. The Stock Options account is reduced as options are exercised with an entry to Share Capital. The amount recorded for exercises from the Stock Options account was \$471 in Q1 2006 (Q1 2005: \$438). Consideration paid by employees on the exercise of stock options is recorded as share capital.

Had compensation expense been determined based on the fair value of the employee stock option awards for 2002 grants at the grant dates in accordance with the new recommendations, the Company's earnings and earnings per common share would have been changed to the following pro forma amounts:

	<b>Three months ended March 31, 2006</b>		<b>Three months ended March 31, 2005</b>	
	<b>As reported</b>	<b>Pro forma</b>	<b>As reported</b>	<b>Pro forma</b>
	( 000)	( 000)	( 000)	( 000)
Earnings	\$ 7,662	\$ 7,531	\$ 4,839	\$ 4,658
Earnings per common share:				
Basic	\$ 0.57	\$ 0.56	\$ 0.36	\$ 0.34
Diluted	\$ 0.56	\$ 0.55	\$ 0.34	\$ 0.33

## 2. Share Capital

Exercise of stock options	237	2,617			2,617
Balance, March 31, 2006	13,559	\$ 27,788		\$	\$ 27,788

## 3. Normal Course Issuer Bid

In September 2005, the Board of Directors approved the renewal of the share repurchase plan, under a Normal Course Issuer Bid, to repurchase and cancel up to 1,340,000 of the Company's outstanding common shares for the period commencing September 28, 2005 and ending September 27, 2006. Under the plan, the Company had repurchased and cancelled 239,200 common shares in Q4 2005 for a total cost including transaction fees of \$4.0 million. For the three months ended March 31, 2006, the Company did not repurchase any shares under this plan.

## 4. Seasonality

Typically, the first and fourth quarters are CryptoLogic's strongest periods. Revenue in the middle two quarters may decrease as Internet usage moderates in the warmer months of the year.
