MACC PRIVATE EQUITIES INC.
Notes to Unaudited Condensed Financial Statements

(1) Basis of Presentation

The accompanying unaudited condensed financial statements include the accounts of MACC Private Equities Inc. (“MACC,” “we” or “us”) and have been prepared in accordance with accounting principles generally accepted in the United States of America (“GAAP”) for investment companies. MACC has elected to be treated as a business development company under the Investment Company Act of 1940, as amended (“1940 Act”).

The unaudited condensed financial statements included herein have been prepared in accordance with GAAP for interim financial information and instructions to Form 10-Q and Articles 6 and 10 of Regulation S-X. Accordingly, certain information and note disclosures normally included in annually audited financial statements prepared in accordance with GAAP have been omitted, however MACC believes that the disclosures made are adequate to make the information presented not misleading. The unaudited condensed financial statements should be read in conjunction with the audited financial statements and notes thereto of MACC as of and for the year ended September 30, 2010 (“Fiscal 2010”) included in the MACC’s Form 10-K, as filed with the Securities and Exchange Commission (the “SEC”). The information reflects all adjustments consisting of normal recurring adjustments which are, in the opinion of management, necessary for a fair presentation of the results of operations for the interim periods. The results of the interim periods reported are not necessarily indicative of results to be expected for the year.

Significant Risk and Uncertainties

When global economic conditions are adverse or the global economy is in a recession as has been the case during certain periods covered in this report including the fiscal year which began October 1, 2010 and ends September 30, 2011 (“Fiscal 2011”), it is difficult for us to estimate future expected realizable value from investments, the likelihood of our portfolio companies’ ability to meet their financial obligations, including the debentures and related interest payments due to us, and therefore our future expected cash flows. All of these factors increase uncertainty inherent in management’s estimates and assumptions. As future events and their effects cannot be determined with precision, particularly those related to the condition of the economy and the performance of our investments, we believe actual results related to our realization on the sale of investments, collection of loans receivable and interest receivable presently pose our greatest risk and could differ significantly from our current estimates.

(2) Going Concern Uncertainty and Liquidity

MACC had a positive net change in net assets from operations of \$952,426 for the nine months ended June 30, 2011 and generated net cash flow from operations of \$1,431,574 to fund its operating activities and financing requirements for the nine months ended June 30, 2011. Operating expenses have been funded primarily from the sale of portfolio companies and MACC’s receipt of dividends and interest on its portfolio investments.

MACC continues to have an ongoing need to raise cash from portfolio sales to fund its operations and pay down outstanding debt. MACC’s efforts to sell certain investments has taken longer than initially anticipated while performance of the underlying portfolio companies in certain cases has deteriorated. MACC believes its ability to liquidate positions had been adversely affected by credit conditions and the downturn in the financial markets and the

global economy. MACC had a note payable with Cedar Rapids Bank & Trust Company (“CRB&T”) with a balance of \$1,961,428 as of June 30, 2011 and due and payable July 11, 2011 (“Note”). At the date of this report, there is a pending portfolio exit scheduled to close in August, 2011, and a second pending portfolio exit with a possible close by December 31, 2011, each of which would retire or almost fully retire the Note. In the event the first transaction does not close by the end of August, 2011, MACC intends to meet with CRB&T to review all near-term potential liquidity events in the portfolio and will request CRB&T extend the maturity of the Note.

At MACC's annual shareholder meeting held on November 30, 2010, shareholders did not authorize it to raise additional capital. As will be further explained in MACC's definitive proxy statement to be filed in the fourth quarter of Fiscal 2011, as a result the shareholders' votes in November 2010, MACC's Board of Directors (the "Board") continued to evaluate a number of alternatives and potential exit opportunities to preserve shareholder value, including liquidation. Following that evaluation and especially in light of shareholder views, during the fourth quarter of Fiscal 2011, the Board will seek shareholder approval to create a liquidating trust into which MACC's assets will be transferred for liquidation. MACC will continue to seek additional cash through future sales of portfolio equity and debt securities, initially to repay the Note and then for distribution to shareholders through the liquidation process.

The accompanying financial statements have been prepared assuming MACC continues as a going concern, which contemplates the realization of assets and the discharge of liabilities in the normal course of business for the foreseeable future, and do not include any adjustments to reflect the possible future effects of the inability to continue to operate as a going concern.

(3) Critical Accounting Policies

Investments

Investments in securities that are traded in the over-the-counter market or on a stock exchange are valued by taking the end of day close price (or bid price in the case of over-the-counter equity securities) for the valuation date. Restricted and other securities for which quotations are not readily available are valued at fair value as determined by the Board. Among the factors considered in determining the fair value of investments are the cost of the investment; developments, including recent financing transactions since the acquisition of the investment; financial condition and operating results of the investee; the long-term potential of the business of the investee; market interest rates for similar debt securities; overall market conditions and other factors generally pertinent to the valuation of investments. Because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

In the valuation process, we use financial information received monthly, quarterly, and annually from our portfolio companies which includes both audited and unaudited financial statements. This information is used to assist in assessing financial condition, performance, and valuation of the portfolio investments.

Realization of the carrying value of investments is subject to future developments. Investment transactions are recorded on the trade date and identified cost is used to determine realized gains and losses. Under the provisions of authoritative guidance, the fair value of loans and investments in portfolio securities on February 15, 1995, MACC's fresh-start date, is considered the cost basis for financial statement purposes.

Accounting Estimates

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period.

Actual results could differ from these estimates. Current economic conditions, including illiquid credit markets, volatile equity markets, and deteriorating economic conditions contribute to the inherent uncertainty of such estimates. Management's estimates and assumptions are reviewed periodically, and the effects of revisions are reflected in the unaudited condensed financial statements in the periods they are determined to be necessary.

(4) Recent Accounting Pronouncements

In May, 2011, FASB issued ASU No. 2011-04 “Amendments to Achieve Common Fair Value Measurement and Disclosure Requirements in U.S. GAAP and IFRSs.” ASU No. 2011-04 establishes common requirements for measuring fair value and for disclosing information about fair value measurements in accordance with U.S. generally accepted accounting principles (“GAAP”) and International Financial Reporting Standards (“IFRSs”). ASU No. 2011-04 is effective for interim and annual periods beginning after December 15, 2011. Management is currently evaluating the impact ASU No. 2011-04 may have on financial statement disclosures.

In January 2010, the Financial Accounting Standards Board (“FASB”) issued authoritative guidance that requires reporting entities to make new disclosures about recurring and non recurring fair-value measurements including significant transfers into and out of Level 1 and Level 2 fair-value measurements and information on purchases, sales, issuances, and settlements on a gross basis in the reconciliation of Level 3 fair-value measurements. FASB also clarified existing fair-value measurement disclosure guidance about the level of disaggregation, inputs, and valuation techniques. The new and revised disclosures were required to be implemented in annual and interim reporting periods beginning after December 15, 2010 and have been included in these financial statements.

(5) Fair Value Measurements

Investments

MACC follows the accounting guidance on fair value measurements. In part, this guidance defines fair value, establishes a framework for measuring fair value and expands disclosures about assets and liabilities measured at fair value. The guidance establishes a hierarchal disclosure framework which prioritizes and ranks the level of market price observability used in measuring investments at fair value. Market price observability is affected by a number of factors, including the type of investment and the characteristics specific to the investment. Investments with readily available active quoted prices or for which fair value can be measured from actively quoted prices generally will have a higher degree of market price observability and a lesser degree of judgment used in measuring fair value. MACC’s practices reflect recent authoritative guidance that requires reporting entities to make new disclosures about recurring and non recurring fair-value measurements including significant transfers into and out of Level I and Level 2 fair-value measurements and information on purchases, sales, issuances, and settlements on a gross basis in the reconciliation of Level 3 fair-value measurements. MACC also follows FASB’s recent clarification of existing fair-value measurement disclosure guidance about the level of disaggregation, inputs and valuation techniques.

MACC has often made separate debt, equity and mezzanine instruments in the same portfolio company. Most of these companies also have senior secured debt from unaffiliated commercial lenders. The investment securities vary in security and seniority of payment, whether the company makes scheduled payments or the instruments are paid on a sale of the company. Valuation takes into account the value of the portfolio company as a whole, and the relative value of individual securities within that portfolio company's capital structure. Generally, MACC exits a portfolio company when the entire company is sold. When a portfolio company is sold, following payment of senior debt, the most recently issued debt of that company generally has the most security or seniority, followed by previously issued debt, then preferred equity, with common stock having the least seniority. Unrealized depreciation is therefore applied to equity securities first, then to the individual preferred and debt securities based on their seniority/security in the capital structure. In addition, while valuations take into account the interest rate on debt securities, the factors discussed above significantly impact value in addition to the contracted rate.

MACC updates its schedule of investments with the most current information available for the reporting period. In certain instances, a debt instrument may be due, but cannot be paid due to senior debt covenants. While extension terms of the notes may be in negotiation, these negotiations may not be complete as of the date of the report. These same instruments may retain value as the principal amount, and all accrued interest, may be paid with priority over other interests in the company. Similarly, because of the senior commercial loan covenants or company performance, the investor group and a portfolio company may have agreed to defer interest payments, but the value of the instrument remains based on the company value and priority of the instrument in the capital structure.

Taking these factors into account, MACC’s investment valuations are based on industry specific information and earnings before interest, taxes, depreciation and amortization multiples obtained from third party sources, like-transactions, as well as contractual provisions such as investor put rights.

Investments measured and reported at fair value are classified and disclosed in one of the following categories:

Level 1 – Quoted prices are available in active markets for identical investments as of the reporting date. The type of investments included in Level 1 include listed equities and listed derivatives.

7

Level 2 – Pricing inputs are other than quoted prices in active markets, which are either directly or indirectly observable as of the reporting date, and fair value is determined through the use of models or other valuation methodologies. Investments which are generally included in this category include corporate debt and less liquid and restricted equity securities.

Level 3 – Pricing inputs are unobservable for the investments and includes situations where there is little, if any, market activity for the investment. The inputs into the determination of fair value require significant management judgment or estimation and are based on the Board of Director’s own assumptions about the assumptions that a market participant would use, including inputs derived from extrapolation and interpolation that are not corroborated by observable market data. Investments that are included in this category generally include corporate private equity.

In certain cases, the inputs used to measure fair value may fall into different levels of the fair value hierarchy. In such cases, the determination of which category within the fair value hierarchy is appropriate for any given investment is based on the lowest level of input that is significant to the fair value measurement. MACC’s assessment of the significance of a particular input to the fair value measurement in its entirety requires judgment and considers factors specific to the investment.

All of MACC’s investments at June 30, 2011 were classified and disclosed under the Level 3 category. Investments are stated at fair value as determined by the Board according to the procedures of MACC’s Valuation Policy. Securities are valued individually as of the end of each quarter of each fiscal year and as of the end of each fiscal year. Interest-bearing securities are carried at the approximate amount of fair value. Loan valuation determinations take into account portfolio companies’ financial condition, outlook, payment histories and other factors. Equity security valuations take into account the following factors, among others: the portfolio company’s performance, the prospects of a portfolio company’s future equity financing and the character of participants in such financing, and the utilization of various financial measures, including cash flow multiples, as appropriate. If a portfolio company appears likely to discontinue operations, a liquidation valuation technique may be employed. The Board also considers credit market conditions, and the risks and uncertainties associated with those conditions in determining the values of its portfolio securities. Valuations established by the Board are not necessarily indicative of amounts which may ultimately be realized as a result of future sales or other dispositions of portfolio assets, and these favorable or unfavorable differences could be material.

The following tables present the investments at fair value as of June 30, 2011 and September 30, 2010 by type of investment:

Fair Value Measurement as of June 30, 2011

Fair Value Based on	Corporate Private Debt	Corporate Private Equity (1)	Total
Investment Level 3	\$ 4,475,774	\$4,289,853	100%

(1) Represents \$1,067,953 preferred shares; \$1,020,732 in common shares; \$1,878,544 in membership interests, and \$322,624 escrow.

Fair Value Measurement as of September 30, 2010

Fair Value Based on	Corporate Private Debt	Corporate Private Equity (1)	Total
Investment Level 3	\$ 6,092,445	\$3,134,205	100%

(1) Represents \$557,848 in preferred shares; \$1,698,638 in common shares; \$802,215 in membership interests, and \$75,504 in escrow.

The following tables provide a rollforward in the changes in fair value for the three month and nine month periods ending June 30, 2011 and 2010 for all investments which MACC has determined using unobservable (Level 3) factors.

(6) Note

MACC had the Note with a balance of \$1,961,428 with CRB&T as of June 30, 2011. The Note is a variable interest rate note secured by all of MACC's assets. The interest rate is the greater of the Wall Street Journal prime rate plus 0.5%, or 6%. The interest rate on the Note at June 30, 2011 was 6.0%. The Note has a stated maturity of July 11, 2011. MACC is required to apply 80% of all cash proceeds received on the sale or liquidation of investments to pay down any amounts outstanding. MACC may need to consider additional sales of investments in order to meet the current payment and operating requirements. At the date of this report, there is a pending portfolio exit scheduled to close in August, 2011, and a second pending portfolio exit with a possible close by December 31, 2011, each of which would retire or almost fully retire the Note. In the event the first transaction does not close by the end of August, 2011, MACC intends to meet with CRB&T to review all near-term potential liquidity events in the portfolio and will request CRB&T extend the maturity of the Note.

(7) Subsequent Events

As reported in Form 8-K filed by MACC on May 5, 2011, effective April 29, 2011, MACC entered into an interim Investment Advisory Agreement (the "Interim Advisory Agreement") with InvestAmerica Investment Advisors, Inc. ("InvestAmerica") under Rule 15a-4 adopted under the 1940 Act (the "Rule"). The previous investment advisory agreement by and between MACC and Eudaimonia Asset Management, LLC ("EAM") expired on April 29, 2011 (the "EAM Advisory Agreement"). Simultaneously, the Subadvisory Agreement by and among MACC, InvestAmerica and EAM (the "Subadvisory Agreement") also expired on April 29, 2011. In light of the shareholders' failure to authorize MACC to raise additional capital, the Board determined to pursue a liquidation strategy. As a result, EAM requested, and the Board agreed, not to renew the term of the EAM Advisory Agreement. Similarly, the Board and InvestAmerica agreed not to renew the Subadvisory Agreement based on the implementation of the Interim Advisory Agreement.

The Interim Advisory Agreement will continue for a period of 150 days unless terminated earlier by MACC or InvestAmerica. Consistent with the Rule, the Interim Advisory Agreement provides that InvestAmerica will be compensated for serving as MACC's investment adviser at the annual rate of 1% of assets under management with no incentive fee. It is anticipated that MACC will implement a liquidating trust prior to the termination of the Interim Advisory Agreement.

As discussed in Note 5, the financial statements included in this report present the fair value of MACC's investments at June 30, 2011. Subsequent to that date, negotiations for the sale of one portfolio company have resulted in a number of competing bids for the purchase of the portfolio company. At the date of this report, there is no agreement by the portfolio company and the investment group of which MACC is a part with any potential purchaser and negotiations are likely to continue for some time. While the results of this negotiation are uncertain, based on bids received at this date, the value of MACC's investment in this portfolio company could increase from the June 30, 2011 valuation if a

sale is ultimately completed in the range of values currently being discussed. The realization of a higher value is uncertain and dependent upon numerous factors, including business developments at the portfolio company and in its industry, further due diligence by prospective purchasers and numerous other factors. It is likely that a closing of a transaction for this portfolio company would be after the end of Fiscal 2011.

On May 9, 2011, MACC filed a preliminary proxy materials with the SEC with respect to a special meeting of shareholders for the following are the purposes:

1. To authorize the complete liquidation and dissolution of MACC and the transfer of all of its assets to a liquidating trust established for the sole purpose of distributing MACC's assets, once liquidated, to its shareholders;
2. To authorize the withdrawal of MACC's election to be regulated as a business development company under the 1940 Act;
3. To ratify the appointment of BBD, LLP ("BBD") as MACC's independent auditors for Fiscal 2011; and
4. To transact such other business as may properly come before the meeting and any adjournment thereof.

The definitive proxy statement will be filed during the fourth quarter of Fiscal 2011 with a special meeting date scheduled during the fourth quarter of Fiscal 2011.

MACC evaluated all events that have occurred subsequent to June 30, 2011 through the date of the filing of this Form 10-Q, and besides the above, no additional subsequent events have occurred requiring disclosure in the Form 10-Q.

Operating and income tax expense	15.00	16.96	16.99	14.99
----------------------------------	-------	-------	-------	-------

(1)EAM elected to voluntarily waive its management fees during the third quarter and nine-month period of Fiscal 2011 and Fiscal 2010. Due to the election, the investment adviser voluntarily waived advisory fees of \$6,897 and \$50,806 as of June 30, 2011 and \$27,656 and \$87,468 as of June 30, 2010, respectively. The effect of the waiver for the three and nine months ended June 30, 2011 are the following: (i) total return on net assets value basis would be 7.30% and 15.16%; (ii) the net investment loss ratio would be (6.41%) and (8.41%); and (iii) the operating and income tax expense ratio would be

15.45% and 18.17%. The effects of the waiver for the three and nine months ended June 30, 2010 are the following: (i) total return on net assets value basis would be 8.59% and 7.57%; (ii) the net investment loss ratio would be (15.47%) and (12.42%); and (iii) the operating and income expense ratio would be 18.94% and 16.79%.

The ratios of net investment loss to average net assets and of operating and income tax expenses to average net assets are calculated for common stockholders as a class and have been annualized. Total return, which reflects the change in net assets, was calculated for common stockholders as a class using the change in net assets for each relevant period. An individual common stockholders' return may vary from these returns.

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

This section of the Quarterly Report on Form 10-Q for MACC Private Equities Inc. (“MACC” or “we” or “us”) contains forward-looking statements. All statements in this Quarterly Report on Form 10-Q, including those made by our management, other than statements of historical fact, are forward-looking statements. These forward-looking statements are based on current management expectations that involve substantial risks and uncertainties that could cause actual results to differ materially from the results expressed in, or implied by, these forward-looking statements. Forward-looking statements relate to future events or our future financial performance. We generally identify forward-looking statements by terminology such as “may,” “will,” “should,” “could,” “would,” “expects,” “anticipates,” “believes,” “estimates,” “predicts,” “intends,” “targets,” “potential,” and “continue,” or the negative of these other similar words. Examples of forward-looking statements contained in this Quarterly Report on Form 10-Q include statements regarding:

- our ability to continue as a going concern;
- our ability to pay down debt;
- our ability to meet cash flow requirements;
- our future financial and operating results;
- our business strategies, prospects and prospects of our portfolio companies;
- our ability to operate as a business development company;
- our regulatory structure;
- the adequacy of cash resources and working capital;
- our projected costs;
- our competitive positions;
- management’s plans and objectives for future operations;
- industry trends; and
- our ability to exit currently held investments

These forward-looking statements are based on management’s estimates, projections and assumptions as of the date hereof and include the assumptions that underlie such statements. Any expectations based on these forward-looking statements are subject to risks and uncertainties and other important factors, as disclosed in MACC’s prior Securities and Exchange Commission (“SEC”) filings. These and many other factors could affect our future financial condition and operating results and could cause actual results to differ materially from expectations based on forward-looking statements made in this document or elsewhere by us or on our behalf. We undertake no obligation to revise or update any forward-looking statements. The forward-looking statements contained in this report on Form 10-Q are excluded from the safe harbor protection provided by Section 27A of the Securities Act of 1933, as amended (the “1933 Act”) and Section 21E of the Securities Exchange Act of 1934, as amended (the “Exchange Act”). All references below to fiscal years apply to our respective fiscal years which end on September 30.

Results of Operations

Our investment income includes income from interest and dividends. Net investment loss represents total investment income minus net operating expenses. The main objective of portfolio company investments is to achieve capital appreciation and realized gains in the portfolio. These gains and losses are not included in net investment loss and are reported as separate line items.

Third Quarter Ended June 30, 2011 Compared to Third Quarter Ended June 30, 2010

For the three months ended
June 30,

Edgar Filing: MACC PRIVATE EQUITIES INC - Form 10-Q

Net asset value per share:				
Beginning of period	\$	2.61	\$ 2.72	
End of period	\$	2.80	\$ 2.96	

Total Investment Income

During the third quarter of our fiscal year ending September 30, 2011 (“Fiscal 2011”), total investment income was \$142,414, an increase of \$86,084, or 152%, from total investment income of \$56,330 for the prior fiscal year (“Fiscal 2010”) third quarter. In the third quarter of Fiscal 2011 as compared to third quarter of Fiscal 2010, interest income increased \$48,064, or 262%, and dividend income increased \$38,020, or 100%. The increase in interest income is primarily due to the fact that no portfolio securities had accrued interest reserved in the current year third quarter as compared to one debt portfolio security which was placed on non-accrual of interest status in the prior year third quarter. In both the third quarter of Fiscal 2011 and the third quarter of Fiscal 2010, we received a dividend on one existing portfolio investment. The timing and amount of dividend income is difficult to predict.

Net Operating Expenses

Net operating expenses for the third quarter of the Fiscal 2011 were \$236,428, a decrease of \$43,360, or 15%, as compared to net operating expenses for the third quarter of Fiscal 2010 of \$279,788. Interest expense decreased \$35,012, or 52%, in the third quarter of Fiscal 2011 due to the decrease in the principal balance of the promissory note (the “Note”) payable to Cedar Rapids Bank and Trust (“CRB&T”) as discussed below under Going Concern Uncertainty, Financial Condition, Liquidity and Capital Resources.

Management fees decreased \$27,721, or 50%, in the third quarter of Fiscal 2011 due to the decrease in assets under management and the reduced management fee rate we pay InvestAmerica Investment Advisors, Inc. (“InvestAmerica”) under the Interim Advisory Agreement discussed below. Professional fees increased \$11,650, or 11%, in the third quarter of Fiscal 2011 as compared to the third quarter of Fiscal 2010. The increase is primarily related to evaluation by the Board of Directors of all remaining strategies for MACC to continue to operate as a going concern. Other expenses decreased \$13,036, or 17%, in the third quarter of Fiscal 2011 as compared to the third quarter of Fiscal 2010 due to the net result of the expenses incurred in the prior year third quarter in retaining an outside consultant to represent us in retaining our NASDAQ market listing status and the increase in directors’ fees in the current year third quarter due to the addition of one new director.

Net Investment Loss

For the third quarter of Fiscal 2011, MACC recorded a net investment loss of \$94,014, as compared to a net investment loss of \$223,458 during the third quarter of Fiscal 2010, a decrease of \$129,444, or 58%. The decrease in net investment loss is the result of the increase in investment income and the decrease in net operating expense

described above.

Net Realized Gain/(Loss) on Investments

During the third quarter of Fiscal 2011, MACC realized a net gain of \$16,361 on one portfolio investment, as compared with no net realized gain on investments in the third quarter of Fiscal 2010. The current period net realized gain is the result of the reversal of deferred incentive fees relating to one portfolio investment that was previously sold. Management does not attempt to maintain a comparable level of realized gains quarter to quarter but instead attempts to maximize total investment portfolio appreciation through realizing gains in the disposition

of securities. Under the EAM Advisory Agreement (defined below), our former investment adviser was entitled to be paid an incentive fee, which was calculated as a percentage of the excess of our realized gains in a particular period, over the sum of net realized losses, unrealized depreciation, and operating losses during the same period. As a result, the timing of realized gains, realized losses and unrealized depreciation had an effect on the amount of the incentive fee payable to the investment adviser under the EAM Advisory Agreement.

Effective April 29, 2008, MACC entered into an investment advisory agreement (the "EAM Advisory Agreement") with Eudaimonia Asset Management, LLC ("EAM"). Also effective April, 29, 2008, MACC and EAM entered into an Investment Subadvisory Agreement (the "Subadvisory Agreement") with InvestAmerica, under which InvestAmerica managed our portfolio of investments which existed on the effective date of the Subadvisory Agreement (the "Existing Portfolio"). Under the terms of the Subadvisory Agreement, EAM paid InvestAmerica an incentive fee based on a portion of the incentive fees paid to EAM by us under the EAM Advisory Agreement attributable to the Existing Portfolio.

Upon the expiration of the EAM Advisory Agreement and the Subadvisory Agreement on April 29, 2011, MACC entered into an interim Investment Advisory Agreement (the "Interim Advisory Agreement") with InvestAmerica under Rule 15a-4 adopted under the 1940 Act (the "Rule"). The Interim Advisory Agreement will continue for a period of 150 days unless terminated earlier by MACC or InvestAmerica. Consistent with the Rule, the Interim Advisory Agreement provides that InvestAmerica will be compensated for serving as MACC's investment adviser at the annual rate of 1% of assets under management with no incentive fee. It is anticipated that MACC will implement a liquidating trust prior to the termination of the Interim Advisory Agreement.

Change in Unrealized Appreciation/Depreciation of Investments

Net change in unrealized appreciation/depreciation on investments represents the change for the period in the unrealized appreciation, net of unrealized depreciation, on our total investment portfolio based on the valuation method described under "Critical Accounting Policies."

We recorded a net change in unrealized appreciation/depreciation on investments of \$553,486 during the current year third quarter, as compared to \$826,589 during the prior year third quarter. This net change resulted from:

Unrealized appreciation in the fair value of two portfolio companies totaling \$466,027 during the current year third quarter, as compared to unrealized appreciation in the fair value of three portfolio companies totaling \$853,552 during the prior year third quarter.

Unrealized depreciation in the fair value of two portfolio companies totaling \$352,155 during the current year third quarter, as compared to unrealized depreciation in the fair value of one portfolio company of \$26,963 during the prior year third quarter.

Reversal of unrealized depreciation of \$439,614 in three portfolio companies during the current year third quarter, as compared to no reversal of unrealized depreciation during the prior year third quarter.

Net Change in Net Assets from Operations

MACC experienced an increase of \$475,833 in net assets for the third quarter of Fiscal 2011, and the resulting net asset value per share was \$2.80 as of June 30, 2011, as compared to \$2.96 as of June 30, 2010. The increase in net asset value during the third quarter ended June 30, 2011 was primarily the result of the net increase in unrealized appreciation on investments and the decrease in the net investment loss, as described above.

As of June 30, 2011, MACC had recorded unrealized appreciation on two portfolio investments and had recorded unrealized depreciation on seven portfolio investments. Quarterly valuations can be affected by a portfolio company's short term performance that results in increases or decreases in unrealized depreciation and unrealized appreciation for the quarter. Changes in the fair value of a portfolio security may or may not be indicative of the long term performance of the portfolio company.

MACC is not making any new investments. MACC will continue to prudently sell the existing portfolio investments and use the resulting proceeds to pay down the Note, as further described below. The ability to exit the existing portfolio investments is affected by portfolio company performance and external factors unrelated to the portfolio companies. These factors include available credit, health of the markets in which our portfolio companies operate, inflationary expectations and pressures, commodity prices, and the general state of the economy.

Nine Months Ended June 30, 2011 Compared to Nine Months Ended June 30, 2010

	For the nine months ended		
	June 30, 2011	2010	Change
Total investment income	\$ 446,277	228,296	217,981
Total operating expenses	(780,205)	(789,449)	9,244
Net investment loss	(333,928)	(561,153)	227,225
Net realized gain (loss) on investments	476,797	(3,063,596)	3,540,393
Net change in unrealized appreciation/ depreciation on investments	809,557	3,121,362	(2,311,805)
Net gain on investments	1,286,354	57,766	1,228,588
Net increase (decrease) in net assets resulting from operations	\$ 952,426	(503,387)	1,455,813
Net asset value per share:			
Beginning of period	\$ 2.41	3.17	
End of period	\$ 2.80	2.96	

Total Investment Income

During the nine-month period ended on June 30, 2011, total investment income was \$446,277, an increase of \$217,981, or 95%, from total investment income of \$228,296 for the same nine-month period of Fiscal 2010. In the nine-month period ended on June 30, 2011 as compared to the nine-month period ended on June 30, 2010, interest income increased \$53,271 or 37%, and dividend income increased \$164,710, or 199%. The increase in interest income was primarily due to the fact that no portfolio securities had accrued interest reserved in the nine-month period ended on June 30, 2011 as compared to one debt portfolio security of which the interest accrued was reserved in the nine-month period ended on June 30, 2010. In both the nine-month periods ended on June 30 of Fiscal 2011 and Fiscal 2010, MACC received dividends on two existing portfolio investments. The timing and amount of dividend income is difficult to predict.

Net Operating Expenses

Net operating expenses for the nine-month period ended on June 30, 2011 were \$780,205, a decrease of \$9,244, or 1%, as compared to net operating expenses for the nine-month period ended on June 30, 2010 of \$789,449. Interest expense decreased \$91,410, or 44%, in the nine-month period ended on June 30, 2011 due to the decrease in the principal balance of the Note as discussed below under Going Concern Uncertainty, Financial Condition, Liquidity

and Capital Resources.

Management fees decreased \$59,526, or 34%, in the nine-month period ended on June 30, 2011 due to the decrease in assets under management and the lower management fee under the Interim Advisory Agreement. Professional fees increased \$85,141, or 30%, in the nine-month period ended on June 30, 2011 as compared to the nine-month period ended on June 30, 2010. The increase was primarily related to legal costs in relation to the annual meeting of stockholders and the accrual of additional audit fees charged in connection with portfolio valuation activities. Other expenses increased \$19,889, or 9%, in the nine-month period ended on June 30, 2011 as compared

to the nine-month period ended on June 30, 2010 as a result of an increase in directors and officers insurance expense and directors' fees due to the addition of one new director and shareholder expenses.

Net Investment Loss

For the nine-month period ended on June 30, 2011, MACC recorded net investment loss of \$333,928, as compared to a net investment loss of \$561,153 during the nine-month period ended on June 30, 2010, a decrease of \$227,225, or 40%. The decrease in net investment loss is primarily the result of the increase in investment income and the decrease in net operating expense described above in the nine-month period ended on June 30, 2011.

Net Realized Gain/(Loss) on Investments

During the nine-month period ended on June 30, 2011, MACC realized a net gain of \$476,797 on four portfolio investments, as compared with a net realized loss of \$3,063,596 on three portfolio investments in the nine-month period ended on June 30, 2010. The nine-month period ended on June 30, 2011 net realized gain was the result of the sale of one portfolio investment for a realized gain of \$844,083, the sale of two other portfolio investments for realized losses of \$381,531, the reduction of the anticipated escrow receipt on a previously sold portfolio company of \$2,116 and the reversal of a deferred incentive fee on one other portfolio investment of \$16,361. Management does not attempt to maintain a comparable level of realized gains quarter to quarter but instead attempts to maximize total investment portfolio appreciation through realizing gains in the disposition of securities.

Change in Unrealized Appreciation/Depreciation of Investments

Net change in unrealized appreciation/depreciation on investments represents the change for the period in the unrealized appreciation, net of unrealized depreciation, on our total investment portfolio based on the valuation method described under "Critical Accounting Policies."

We recorded a net change in unrealized appreciation/depreciation on investments of \$809,557 during the nine-month period ended on June 30, 2011, as compared to \$3,121,362 during the nine-month period ended on June 30, 2010. This net change resulted from:

Unrealized appreciation in the fair value of five portfolio companies totaling \$1,731,413 during the nine-month period ended on June 30, 2011, as compared to unrealized appreciation in the fair value of three portfolio companies totaling \$1,224,298 during the nine-month period ended on June 30, 2010.

Reversal of unrealized appreciation in the fair value of one portfolio company totaling \$627,651 during the nine-month period ended on June 30, 2011, as compared to reversal of unrealized appreciation in the fair value of two portfolio companies totaling \$74,641 during the nine-month period ended on June 30, 2010.

Unrealized depreciation in the fair value of five portfolio companies totaling \$757,718 during the nine-month period ended on June 30, 2011, as compared to unrealized depreciation in the fair value of four portfolio companies of \$1,100,848 during the nine-month period ended on June 30, 2010.

Reversal of unrealized depreciation of \$463,513 in two portfolio companies during the nine-month period ended on June 30, 2011, as compared to reversal of unrealized depreciation of \$3,072,553 in three portfolio companies in the nine-month period ended on June 30, 2010.

Going Concern Uncertainty, Financial Condition, Liquidity and Capital Resources

Global capital markets experienced significant disruption beginning in 2008 as evidenced by a lack of liquidity in debt capital markets, significant write-offs in the financial services sector, the re-pricing of credit risk and the failure of major financial institutions. These events have contributed to difficult economic conditions that materially and adversely impacted the broader financial and credit markets and significantly reduced the availability of debt and equity capital for the market as a whole and financial services firms in particular. Although there are signs of these conditions lightening, they may continue for a prolonged period of time or worsen in the future. Our portfolio companies may not be able to service or refinance their debt which could materially and adversely affect our financial condition as we would experience reduced income or even losses. The inability of our portfolio companies to obtain adequate financing or to raise capital and the risk of portfolio company defaults may have a negative

effect on our business, financial condition and results of operations.

As of June 30, 2011, MACC's cash and money market accounts totaled \$160,168. MACC has the Note with a balance of \$1,961,428 at June 30, 2011 that was due and payable July 11, 2011. At the date of this report, there is a pending portfolio exit scheduled to close in August, 2011, and a second pending portfolio exit with a possible close by December 31, 2011, each of which would retire or almost fully retire the Note. In the event the first transaction does not close by the end of August, 2011, MACC intends to meet with CRB&T to review all near-term potential liquidity events in the portfolio and will request CRB&T extend the maturity of the Note.

At our annual shareholder meeting held on November 30, 2010, shareholders did not authorize it to raise additional capital. As will be further explained in our definitive proxy statement to be filed in the fourth quarter of Fiscal 2011, as a result the shareholders' votes in November 2010, MACC's Board of Directors (the "Board") continued to evaluate a number of alternatives and potential exit opportunities to preserve shareholder value, including liquidation. Following that evaluation and especially in light of shareholder views, during the fourth quarter of Fiscal 2011, the Board will seek shareholder approval to create a liquidating trust into which MACC's assets will be transferred for liquidation. We will continue to seek additional cash through future sales of portfolio equity and debt securities, initially to repay the Note and then for distribution to shareholders through the liquidation process.

We will continue to seek additional cash through future sales of portfolio equity and debt securities, initially to repay the Note and then for distribution to shareholders through the liquidation process. In order to fund operating cash needs, we may need to liquidate our current investment portfolio on an accelerated basis, to the extent possible, which could result in significant realized losses due to the current economic conditions.

The following table shows our significant contractual obligations as of June 30, 2011:

Payments due by period

Contractual Obligations

	Total	Less than 1 Year	1-3 Years	3-5 Years	More than 5 Years
Note	\$ 1,961,428	1,961,428	---	---	---

Failure to pay-off, refinance or find alternative financing for the Note could pose significant financial risks to us given the relative illiquid nature of the Existing Portfolio. In addition, we anticipate that our current cash and money market accounts will not be adequate enough to fund our cash flow short-fall from operations during Fiscal 2011. We will need to liquidate portfolio assets to fund the operating cash short-fall. Although management believes we will be able liquidate portfolio assets sufficient to provide funds for us to meet our Fiscal 2011 anticipated cash requirements, there can be no assurance that our cash flows from portfolio sales, operations or cash requirements will be as projected. At the date of this report, there is a pending portfolio exit scheduled to close in August, 2011, and a second pending portfolio exit with a possible close by December 31, 2011, each of which would retire or almost fully retire the Note. In the event the first transaction does not close by the end of August, 2011, MACC intends to meet with CRB&T to review all near-term potential liquidity events in the portfolio and will request CRB&T extend the maturity of the Note.

Portfolio Activity

We have invested in and lended to businesses through investments in subordinated debt (generally with detachable equity warrants), preferred stock and common stock. We, however, are not making new investments in portfolio

companies and are actively seeking to liquidate the portfolio. The total portfolio value of our investments in illiquid securities was \$8,765,627 at June 30, 2011 and \$9,226,650 at September 30, 2010. During the three months ended June 30, 2011, we made no new investments and no follow-on investments were made in existing portfolio companies.

We have frequently co-invested with other funds managed by InvestAmerica. When we make any co-investment with these related funds, we follow certain procedures consistent with orders of the SEC for related party

co-investments to mitigate conflict of interest issues.

Critical Accounting Policies

In September 2006, the FASB issued authoritative guidance for fair value measurements and disclosures which defines fair value, establishes a framework for measuring fair value and expands disclosures related to assets and liabilities measured at fair value. In February 2008, the FASB issued additional authoritative guidance for fair value measurements which delayed the effective date of the authoritative guidance for fair value measurements to fiscal years beginning after November 15, 2008 for all nonfinancial assets and nonfinancial liabilities that are recognized or disclosed at fair value in the financial statements on a nonrecurring basis. We adopted the provisions of the authoritative guidance for fair value measurements on January 1, 2008 with the exception of the application of the guidance to non-recurring non financial assets and non-financial liabilities which we adopted on October 1, 2009.

Investments in securities that are traded in the over-the-counter market or on a stock exchange are valued by taking the average of the close (or bid price in the case of over-the-counter equity securities) for the valuation date. Restricted and other securities for which quotations are not readily available are valued at fair value as determined by the Board of Directors. Among the factors considered in determining the fair value of investments are the cost of the investment; developments, including recent financing transactions, since the acquisition of the investment; financial condition and operating results of the investee; the long-term potential of the business of the investee; market interest rates for similar debt securities; overall market conditions and other factors generally pertinent to the valuation of investments. Because of the inherent uncertainty of valuation, those estimated values may differ significantly from the values that would have been used had a ready market for the securities existed, and the differences could be material.

In the valuation process, we use financial information received monthly, quarterly, and annually from our portfolio companies which includes both audited and unaudited financial statements. This information is used to determine financial condition, performance, and valuation of the portfolio investments.

Realization of the carrying value of investments is subject to future developments. Investment transactions are recorded on the trade date and identified cost is used to determine realized gains and losses.

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Determination of Net Asset Value

The net asset value per share of our outstanding common stock is determined quarterly, as soon as practicable after and as of the end of each calendar quarter, by dividing the value of total assets minus total liabilities by the total number of shares outstanding at the date as of which the determination is made.

Item 3. Quantitative and Qualitative Disclosure About Market Risk

We currently have a portfolio of debt and equity securities for which no regular trading market exists. The fair value of these investments may not be readily determinable. We value these investments quarterly at fair value as determined in good faith under the direction of our Board of Directors pursuant to a valuation policy and consistently applied valuation process utilizing the input of our investment adviser and Audit Committee. The types of factors that may be considered in fair value pricing of these investments include the nature and realizable value of any collateral,

the portfolio company's ability to make payments and its earnings, the markets in which the portfolio company does business, comparison to more liquid securities, indices and other market related inputs, discounted cash flow and other relevant factors. Because such valuations and particularly valuations of private securities and private companies are inherently uncertain, may fluctuate over short periods of time and may be based on estimates, our determinations of fair value may differ materially from the values that would have been used if a readily available market for these investments existed and may differ materially from the amounts we realize on any disposition of such investments. Our net asset value could be adversely affected if our determinations regarding the fair value of these investments were materially higher than the values that we ultimately realize upon the disposal

of such investments. In addition, decreases in the market values or fair values of our investments are recorded as unrealized depreciation. Continued declines in prices and liquidity in the debt markets could result in substantial unrealized/realized losses, which could have a material adverse impact on our business, financial condition and results of operations.

The recent economic conditions generally and the disruptions in the capital markets over the past two years in particular have decreased liquidity, where available. The longer these conditions persist, the greater the probability that these factors could reduce our ability to effectively liquidate portfolio positions, increase our cost and significantly limit our access to debt and equity capital, and thus continue to have an adverse effect on our operations and financial results. Many of our portfolio companies were susceptible to the economic downturn, which affected their ability to repay our loans or engage in a liquidity event, such as a sale or recapitalization.

A continued economic downturn could continue to impact some of the industries in which we invest, causing us to be vulnerable to further losses in our portfolio. Therefore, the number of our non-performing assets could increase and the fair market value of our portfolio decrease during these periods. The economic downturn has affected the availability of credit generally and may prevent us from replacing or renewing our credit facility on reasonable terms, if at all. If market instability intensifies, we may experience difficulty in raising capital.

We are also subject to financial market risks from changes in market interest rates. We currently have the outstanding Note with a variable interest rate that is based on an independent index. Therefore, general interest rate fluctuations may have a materially adverse effect on our investment expense.

Item 4. Controls and Procedures

(a) Evaluation of Disclosure Controls and Procedures

As of June 30, 2011, our Chief Executive Officer and Chief Financial Officer (the “Certifying Officers”) conducted evaluations of our disclosure controls and procedures. Disclosure controls and procedures means controls and other procedures of an issuer that are designed to ensure that information required to be disclosed by the issuer in the reports that it files or submits under the Securities Exchange Act of 1934, as amended (the “1934 Act”) is recorded, processed, summarized and reported, within the time periods specified in the SEC’s rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by an issuer in the reports that it files or submits under the 1934 Act is accumulated and communicated to the issuer’s management, including its principal executive officer or officers and principal financial officer or officers, or persons performing similar functions, as appropriate to allow timely decisions regarding required disclosure. The Certifying Officers have evaluated our disclosure controls and procedures and have concluded, as a result of the previous identification of material weaknesses in internal control over financial reporting, that those specific disclosure controls and procedures were not effective throughout the entire quarter ended June 30, 2011. As noted below, during the quarter remedial steps were commenced to address the identified weaknesses.

(b) Management’s Report on Internal Control Over Financial Reporting

Management is responsible for establishing and maintaining adequate internal control over financial reporting. Our internal control system is a process designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles and includes policies and procedures that: (i) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect transactions and dispositions of assets; (ii) provide reasonable assurances that transactions are recorded as necessary to permit preparation of financial statements in accordance with

accounting principles generally accepted in the United States of America and that receipts and expenditures are being made only in accordance with authorizations of our management and directors; and (iii) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of our assets that could have a material effect on our financial statements.

All internal control systems, no matter how well designed, have inherent limitations. Because of these limitations, internal control over financial reporting may not prevent or detect misstatements on a timely basis. Also, projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions or that the degree of compliance with the policies or procedures

may deteriorate.

A material weakness is a deficiency, or a combination of deficiencies, in internal control over financial reporting, such that there is a reasonable possibility that a material misstatement of our annual or interim financial statements will not be prevented or detected on a timely basis.

Management assessed the effectiveness of our internal control over financial reporting as of June 30, 2011 using the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission in Internal Control-Integrated Framework. In performing the assessment, management identified the following material weaknesses in internal control over financial reporting:

- 1) Our policies and procedures over the preparation and accumulation of information used in the investments valuation process and management's review thereof are not appropriately designed to identify matters that may affect the appropriateness and reliability of information provided to the valuation committee. Specifically, our policies and procedures and management's review controls were not designed to ensure the appropriateness and consistency in (a) the preparation of the portfolio company's financial information provided to the valuation committee, (b) the procedures used to ensure the relevancy and reliability of the underlying financial information provided by the portfolio companies, and (c) the methods used to value our individual investments.
- 2) Our entity-level policies and procedures for monitoring internal control over financial reporting were not sufficient. Specifically, we did not have sufficient personnel with an appropriate level of technical accounting knowledge, experience, and training who could execute appropriate monitoring controls and perform adequate supervisory reviews over the investments valuation process. This material weakness contributed to the additional material weakness discussed above.

For the quarter ended June 30, the material weakness discussed above did not result in any fair value adjustments to the valuations of the individual holdings reported in the previous quarter.

As a result of these material weaknesses, we have concluded that internal control over financial reporting was not effective at the start of the quarter ended June 30, 2011 (see "Remediation Plan" below).

(c) Changes in Internal Control over Financial Reporting

There were no changes in our internal control over financial reporting during the quarter ended June 30, 2011 that have materially affected or are reasonably likely to materially affect our internal control over financial reporting.

(d) Remediation Plan

In response to the previously identified control weaknesses, in the period from the issuance of our prior quarterly report, to the filing of this report, the following actions have been taken:

- A team consisting of the Company's officers, members of the Audit Committee and outside legal counsel evaluated the issues discussed above and drafted amendments to our valuation policies which were proposed to, and approved by, the Board of Directors.
 - The proposed changes were reviewed by our independent registered public accounting firm.
- Changes to the Company valuation policy (the "Valuation Policy"), which were implemented for the quarter commencing April 1, 2011, include the following:

- o Increased documentation of the requirements for portfolio companies to prepare and report their financial information to us.
- o Verification that all current portfolio companies are required, as a matter of contract, to provide adequate financial reporting to us, and that all are doing so on a timely basis for each valuation.

o As part of the annual valuation in connection with preparation of audited financial statements, the Board will engage an independent valuation expert to provide (1) an overall review of the valuation process in general, and (2) a more detailed review of selected investment valuations on a rotating basis.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings.

There are no items to report.

Item 1A. Risk Factors.

There are no material changes to report from the risk factors disclosed in MACC's Annual Report on Form 10-K for the year ended September 30, 2010.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds.

There are no items to report.

Item 3. Defaults Upon Senior Securities.

There are no items to report.

Item 4. (Removed and Reserved).

Item 5. Other Information.

There are no items to report.

Item 6. Exhibits.

The following exhibits are filed with this Quarterly Report on Form 10-Q:

31.1 Section 302 Certification of David R. Schroder (President and Principal Executive Officer).

31.2 Section 302 Certification of Robert A. Comey (CFO).

32.1 Section 1350 Certification of David R. Schroder (President and Principal Executive Officer).

32.2 Section 1350 Certification of Robert A. Comey (CFO).

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the undersigned thereunto duly authorized.
