

MARKET VECTORS ETF TRUST  
 Form 497K  
 December 18, 2013

MARKET VECTORS EMERGING MARKETS AGGREGATE BOND ETF\*

Ticker: EMAG  
 Principal U.S. Listing Exchange: NYSE Arca, Inc.  
 SUMMARY PROSPECTUS  
 DECEMBER 10, 2013

EMAGSUM

Before you invest, you may want to review the Fund's prospectus, which contains more information about the Fund and its risks. You can find the Fund's prospectus and other information about the Fund online at <http://www.vaneck.com/library/etfs/>. You can also get this information at no cost by calling 888.MKT.VCTR, or by sending an email request to [info@vaneck.com](mailto:info@vaneck.com). The Fund's prospectus and statement of additional information, both dated December 10, 2013, are incorporated by reference into this summary prospectus.

**INVESTMENT OBJECTIVE**

Market Vectors Emerging Markets Aggregate Bond ETF\* (the "Fund") seeks to replicate as closely as possible, before fees and expenses, the price and yield performance of Market Vectors® EM Aggregate Bond Index (the "Index").

**FUND FEES AND EXPENSES**

The following tables describe the fees and expenses that you may pay if you buy and hold shares of the Fund ( "Shares" ).

Shareholder Fees (*fees paid directly from your investment*) None

**Annual Fund Operating Expenses**

(*expenses that you pay each year as a percentage of the value of your investment*)

Management Fee	0.35 %
Other Expenses	0.91 %
Total Annual Fund Operating Expenses <sup>(a)</sup>	1.26 %
Fee Waivers and Expense Reimbursement <sup>(a)</sup>	(0.77 )%
Total Annual Fund Operating Expenses After Fee Waiver and Expense Reimbursement <sup>(a)</sup>	0.49 %

(a) Van Eck  
 Associates

Corporation  
(the Adviser )  
has agreed to  
waive fees  
and/or pay  
Fund  
expenses to  
the extent  
necessary to  
prevent the  
operating  
expenses of  
the Fund  
(excluding  
acquired fund  
fees and  
expenses,  
interest  
expense,  
offering costs,  
trading  
expenses,  
taxes and  
extraordinary  
expenses)  
from  
exceeding  
0.49% of the  
Fund s  
average daily  
net assets per  
year until at  
least  
September 1,  
2015. During  
such time, the  
expense  
limitation is  
expected to  
continue until  
the Fund s  
Board of  
Trustees acts  
to discontinue  
all or a  
portion of  
such expense  
limitation.

**EXPENSE EXAMPLE**

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497K

This example is intended to help you compare the cost of investing in the Fund with the cost of investing in other funds. This example does not take into account brokerage commissions that you pay when purchasing or selling Shares of the Fund.

The example assumes that you invest \$10,000 in the Fund for the time periods indicated and then redeem all of your Shares at the end of those periods. The example also assumes that your investment has a 5% annual return and that the Fund's operating expenses remain the same. Although your actual costs may be higher or lower, based on these assumptions, your costs would be:

YEAR	EXPENSES
1	\$ 50
3	\$ 323
5	\$ 618
10	\$ 1,455

---

\* Prior to December 10, 2013, the Fund's name was Market Vectors LatAm Aggregate Bond ETF and its investment objective was to seek to replicate as closely as possible, before fees and expenses, the price and yield performance of The BofA Merrill Lynch Broad Latin America Bond Index.

## **PORTFOLIO TURNOVER**

The Fund will pay transaction costs, such as commissions, when it purchases and sells securities (or turns over its portfolio). A higher portfolio turnover will cause the Fund to incur additional transaction costs and may result in higher taxes when Fund Shares are held in a taxable account. These costs, which are not reflected in annual fund operating expenses or in the example, may affect the Fund's performance. During the most recent fiscal year, the Fund's portfolio turnover rate was 11% of the average value of its portfolio.

## **PRINCIPAL INVESTMENT STRATEGIES**

The Fund normally invests at least 80% of its total assets in securities that comprise the Fund's benchmark index. The Index is comprised of sovereign bonds and corporate bonds denominated in U.S. dollars, Euros or local currencies of an emerging market country. As of September 30, 2013, Emerging Markets countries represented in the Index include Angola, Argentina, Azerbaijan, Bahrain, Bangladesh, Barbados, Belarus, Belize, Bolivia, Bosnia and Herzegovina, Brazil, Bulgaria, Chile, China, Colombia, Costa Rica, Côte d'Ivoire, Croatia, Czech Republic, Dominican Republic, Ecuador, Egypt, Gabon, Georgia, Ghana, Guatemala, Honduras, Hong Kong, Hungary, India, Indonesia, Iraq, Israel, Jamaica, Jordan, Kazakhstan, Kenya, Kuwait, Latvia, Lebanon, Lithuania, Malaysia, Malawi, Mexico, Mongolia, Morocco, Namibia, Nigeria, Oman, Pakistan, Panama, Paraguay, Peru, Philippines, Poland, Qatar, Romania, Russia, El Salvador, Saudi Arabia, Senegal, Serbia, Sri Lanka, South Africa, Tanzania, Thailand, Tunisia, Turkey, Ukraine, United Arab Emirates, Uruguay, Venezuela, Vietnam and Zambia. The Index includes both investment grade and below investment grade rated securities. As of September 30, 2013, the Index included approximately 1,794 bonds of 619 issuers and the weighted average maturity of the Index was 8.3 years. The Fund's 80% investment policy is non-fundamental and may be changed without shareholder approval upon 60 days' prior written notice to shareholders.

The Fund, using a passive or indexing investment approach, attempts to approximate the investment performance of the Index. The Adviser expects that, over time, the correlation between the Fund's performance before fees and expenses and that of the Index will be 95% or better. A figure of 100% would indicate perfect correlation. Because of the practical difficulties and expense of purchasing all of the securities in the Index, the Fund does not purchase all of the securities in the Index. Instead, the Adviser utilizes a sampling methodology in seeking to achieve the Fund's objective. As such, the Fund may purchase a subset of the bonds in the Index in an effort to hold a portfolio of bonds with generally the same risk and return characteristics of the Index.

The Fund may concentrate its investments in a particular industry or group of industries to the extent that the Index concentrates in an industry or group of industries. As of the date of this prospectus, the financial services sector represented a significant portion of the Index.

## **PRINCIPAL RISKS OF INVESTING IN THE FUND**

Investors in the Fund should be willing to accept a high degree of volatility in the price of the Fund's Shares and the possibility of significant losses. An investment in the Fund involves a substantial degree of risk. An investment in the Fund is not a deposit with a bank and is not insured or guaranteed by the Federal Deposit Insurance Corporation or any other government agency. Therefore, you should consider carefully the following risks before investing in the Fund.

**Risk of Investing in Emerging Market Issuers.** Investments in emerging markets securities are exposed to a number of risks that may make these investments volatile in price or difficult to trade. Political risks may include unstable governments, nationalization, restrictions on foreign ownership, laws that prevent investors from getting their money out of a country and legal systems that do not protect property rights as well as the laws of the United States. Market risks may include economies that concentrate in only a few industries, securities issues that are held by only a few investors, liquidity issues and limited trading capacity in local exchanges and the possibility that markets or issues may be manipulated by foreign nationals who have inside information.

**Credit Risk.** Bonds are subject to credit risk. Credit risk refers to the possibility that the issuer of a security will be unable and/or unwilling to make timely interest payments and/or repay the principal on its debt or to otherwise honor its obligations. Bonds are subject to varying degrees of credit risk which may be reflected in credit ratings. There is a possibility that the credit rating of a bond may be downgraded after purchase, which may adversely affect the value of the security.

**Interest Rate Risk.** Bonds are also subject to interest rate risk. Interest rate risk refers to fluctuations in the value of a bond resulting from changes in the general level of interest rates. When the general level of interest rates goes up, the prices of most bonds go down. When the general level of interest rates goes down, the prices of most bonds go up. The historically low interest rate environment, which has been influenced by actions taken by the U.S. Government, increases the risk associated with rising interest rates. However, there can be no assurance that actions by the U.S. Government will be maintained or that interest rates will be affected by U.S. Government action in the future. In addition, bonds with longer durations tend to be more sensitive to interest rate changes, usually making them more volatile than bonds with shorter durations.

**Sovereign and Quasi-Sovereign Bond Risk.** Investments in sovereign and quasi-sovereign bonds involve special risks not present in corporate bonds. The governmental authority that controls the repayment of the bonds may be unable or unwilling to make interest payments and/or repay the principal on its bonds or to otherwise honor its obligations. If an issuer of sovereign or quasi-

sovereign bonds defaults on payments of principal and/or interest, the Fund may have limited recourse against the issuer. In the past, certain governments of emerging market countries have declared themselves unable to meet their financial obligations on a timely basis.

**Foreign Currency Risk.** Because some or all the Fund's assets will be invested in debt denominated in foreign currencies, the income received by the Fund from these investments may be in foreign currencies. The Fund's exposure to foreign currencies and changes in the value of foreign currencies versus the U.S. dollar may result in reduced returns for the Fund. Moreover, the Fund may incur costs in connection with conversions between U.S. dollars and foreign currencies. The value of an emerging market country's currency may be subject to a high degree of fluctuation. This fluctuation may be due to changes in interest rates, investors' expectations concerning inflation and interest rates, the emerging market country's debt levels and trade deficit, the effects of monetary policies issued by the United States, foreign governments, central banks or supranational entities, the imposition of currency controls or other national or global political or economic developments. The economies of certain emerging market countries can be significantly affected by currency devaluations. Certain emerging market countries may also have managed currencies which are maintained at artificial levels relative to the U.S. dollar rather than at levels determined by the market. This type of system could lead to sudden and large adjustments in the currency, which in turn, can have a negative effect on the Fund and its investments.

**High Yield Securities Risk.** Securities rated below investment grade are commonly referred to as high yield securities or "junk bonds." Junk bonds are often issued by issuers that are restructuring, are smaller or less creditworthy, or are more highly indebted than other issuers. Junk bonds are subject to greater risk of loss of income and principal than higher rated securities and are considered speculative. The prices of junk bonds are likely to be more sensitive to adverse economic changes or individual issuer developments than higher rated securities. During an economic downturn or substantial period of rising interest rates, junk bond issuers may experience financial stress that would adversely affect their ability to service their principal and interest payment obligations, to meet their projected business goals or to obtain additional financing. In the event of a default, the Fund may incur additional expenses to seek recovery. The secondary market for securities that are junk bonds may be less liquid than the markets for higher quality securities and, as such, may have an adverse effect on the market prices of and the Fund's ability to arrive at a fair value for certain securities. The illiquidity of the market also could make it difficult for the Fund to sell certain securities in connection with a rebalancing of the Index. In addition, periods of economic uncertainty and change may result in an increased volatility of market prices of high yield securities and a corresponding volatility in the Fund's net asset value (NAV).

**Risk of Investing in the Financial Services Sector.** The financial services sector includes companies engaged in banking, commercial and consumer finance, investment banking, brokerage, asset management, custody or insurance. Because as currently constituted the financial services sector represents a significant portion of the Index, the Fund may be sensitive to changes in, and its performance may depend to a greater extent on, the overall condition of the financial services sector. Companies in the financial services sector may be subject to extensive government regulation that affects the scope of their activities, the prices they can charge and the amount of capital they must maintain. The profitability of companies in the financial services sector may be adversely affected by increases in interest rates, by loan losses, which usually increase in economic downturns, and by credit rating downgrades. In addition, the financial services sector is undergoing numerous changes, including continuing consolidations, development of new products and structures and changes to its regulatory framework. Furthermore, some financial institutions perceived as benefitting from government intervention in the past may be subject to future government-imposed restrictions on their businesses or face increased government involvement in their operations. Increased government involvement in the financial services sector, including measures such as taking ownership positions in financial institutions, could result in a dilution of the Fund's investments in financial institutions. Recent developments in the credit markets may cause companies operating in the financial services sector to incur large losses, experience declines in the value of their assets and even cease operations.

**Market Risk.** The prices of the securities in the Fund are subject to the risks associated with investing in bonds, including general economic conditions and sudden and unpredictable drops in value. An investment in the Fund may lose money.

**Call Risk.** The Fund may invest in callable bonds. If interest rates fall, it is possible that issuers of callable securities will call (or prepay) their bonds before their maturity date. If a call were exercised by the issuer during or following a period of declining interest rates, the Fund is likely to have to replace such called security with a lower yielding security. If that were to happen, it would decrease the Fund's net investment income.

**Risk of Investing in Foreign Securities.** Investments in the securities of foreign issuers involve risks beyond those associated with investments in U.S. securities. These additional risks include greater market volatility, the availability of less reliable financial information, higher transactional and custody costs, taxation by foreign governments, decreased market liquidity and political instability. Foreign issuers are often subject to less stringent requirements regarding accounting, auditing, financial reporting and record keeping than are U.S. issuers, and therefore, not all material information may be available or reliable.

**Sampling Risk.** The Fund's use of a representative sampling approach will result in its holding a smaller number of securities than are in the Index. As a result, an adverse development respecting an issuer of securities held by the Fund could result in a greater decline in NAV than would be the case if the Fund held all of the securities in the Index. Conversely, a positive development relating to an issuer of securities in the Index that is not held by the Fund could cause the Fund to underperform the Index. To the extent the assets in the Fund are smaller, these risks will be greater.

**Index Tracking Risk.** The Fund's return may not match the return of the Index for a number of reasons. For example, the Fund incurs a number of operating expenses not applicable to the Index and incurs costs associated with buying and selling securities, especially when rebalancing the Fund's securities holdings to reflect changes in the composition of the Index and raising cash to meet redemptions or deploying cash in connection with newly created Creation Units (defined herein). Because the Fund bears the costs and risks associated with buying and selling securities while such costs are not factored into the return of the Index, the Fund's return may deviate significantly from the return of the Index. The Fund may not be fully invested at times either as a result of cash flows into the Fund or reserves of cash held by the Fund to meet redemptions or pay expenses. In addition, the Fund's use of a representative sampling approach may cause the Fund to not be as well correlated with the return of the Index as would be the case if the Fund purchased all of the securities in the Index in the proportions represented in the Index. To the extent the Fund calculates its NAV based on fair value prices and the value of the Index is based on securities' closing prices on local foreign markets (*i.e.*, the value of the Index is not based on fair value prices), the Fund's ability to track the Index may be adversely affected.

**Risk of Cash Transactions.** Unlike most other exchange-traded funds (ETFs), the Fund expects to effect its creations and redemptions partially for cash, rather than in-kind securities. As such, investments in Shares may be less tax-efficient than an investment in a conventional ETF.

**Replication Management Risk.** An investment in the Fund involves risks similar to those of investing in any bond fund, such as market fluctuations caused by such factors as economic and political developments, changes in interest rates and perceived trends in security prices. However, because the Fund is not actively managed, unless a specific security is removed from the Index, the Fund generally would not sell a security because the security's issuer was in financial trouble. Therefore, the Fund's performance could be lower than funds that may actively shift their portfolio assets to take advantage of market opportunities or to lessen the impact of a market decline or a decline in the value of one or more issuers.

**Premium/Discount Risk.** Disruptions to creations and redemptions, the existence of extreme market volatility or potential lack of an active trading market for Shares may result in Shares trading at a significant premium or discount to NAV. If a shareholder purchases Shares at a time when the market price is at a premium to the NAV or sells Shares at a time when the market price is at a discount to the NAV, the shareholder may sustain losses.

**Non-Diversified Risk.** The Fund is classified as a non-diversified investment company under the Investment Company Act of 1940, as amended (the 1940 Act). Therefore, the Fund may invest a relatively high percentage of its assets in a smaller number of issuers or may invest a larger proportion of its assets in obligations of a single issuer. As a result, the gains and losses on a single investment may have a greater impact on the Fund's NAV and may make the Fund more volatile than more diversified funds.

**Concentration Risk.** The Fund's assets may be concentrated in a particular sector or sectors or industry or group of industries to the extent the Index concentrates in a particular sector or sectors or industry or group of industries. By concentrating its assets in a particular sector or industry, the Fund will be subject to the risk that economic, political or other conditions that have a negative effect on that sector or industry will negatively impact the Fund to a greater extent than if the Fund's assets were invested in a wider variety of sectors or industries.

## **PERFORMANCE**

Edgar Filing: MARKET VECTORS ETF TRUST - Form 497K

The bar chart that follows shows how the Fund performed for the last calendar year. The table below the bar chart shows the Fund's average annual returns (before and after taxes). The bar chart and table provide an indication of the risks of investing in the Fund by showing the Fund's performance and by showing how the Fund's average annual returns for the one year and since inception periods compared with the Fund's benchmark index. All returns assume reinvestment of dividends and distributions. Prior to December 10, 2013, the Fund's principal investment objective was to replicate as closely as possible, before fees and expenses, the price and yield performance of The BofA Merrill Lynch Broad Latin America Bond Index. The performance shown below was achieved using the Fund's previous principal investment objective. The Fund's past performance (before and after taxes) is not necessarily indicative of how the Fund will perform in the future. Updated performance information is available online at [www.marketvectorsetfs.com](http://www.marketvectorsetfs.com).

**Annual Total Returns Calendar Years**

The year-to-date total return as of September 30, 2013 was -4.18%.

Best Quarter: 7.04% 1Q 12

Worst Quarter: -1.06% 2Q 12

**Average Annual Total Returns for the Periods Ended December 31, 2012**

The after-tax returns presented in the table below are calculated using the highest historical individual federal marginal income tax rates and do not reflect the impact of state and local taxes. Your actual after-tax returns will depend on your specific tax situation and may differ from those shown below. After-tax returns are not relevant to investors who hold Shares of the Fund through tax-deferred arrangements, such as 401(k) plans or individual retirement accounts.

Prior to December 10, 2013, the Fund sought to replicate an index called The BofA Merrill Lynch Broad Latin America Bond Index.

	Past One Year	Since Inception (5/11/2011)
Market Vectors Emerging Markets Aggregate Bond ETF (return before taxes)	12.72 %	6.82 %
Market Vectors Emerging Markets Aggregate Bond ETF (return after taxes on distributions)	10.76 %	5.01 %
Market Vectors Emerging Markets Aggregate Bond ETF (return after taxes on distributions and sale of Fund Shares)	8.22 %	4.73 %
The BofA Merrill Lynch Broad Latin America Bond Index (reflects no deduction for fees, expenses or taxes)	17.32 %	10.72 %

**PORTFOLIO MANAGEMENT**

Investment Adviser. Van Eck Associates Corporation.

Portfolio Managers. The following individuals are jointly and primarily responsible for the day-to-day management of the Fund's portfolio:

Name	Title with Adviser	Date Began Managing the Fund
Michael F. Mazier	Portfolio Manager	May 2011
Francis G. Rodilosso	Portfolio Manager	September 2012

**PURCHASE AND SALE OF FUND SHARES**

The Fund issues and redeems Shares at NAV only in a large specified number of Shares each called a Creation Unit, or multiples thereof. A Creation Unit consists of 200,000 Shares.

Individual Shares of the Fund may only be purchased and sold in secondary market transactions through brokers. Shares of the Fund are listed on NYSE Arca, Inc. ( NYSE Arca ) and because Shares trade at market prices rather than NAV, Shares of the Fund may trade at a price greater than or less than NAV.

**TAX INFORMATION**

The Fund's distributions are taxable and will generally be taxed as ordinary income or capital gains.
