

PREFERRED INCOME OPPORTUNITY FUND INC

Form N-30B-2

April 19, 2005

FLAHERTY & CRUMRINE PREFERRED INCOME OPPORTUNITY FUND

Dear Shareholder:

The Flaherty & Crumrine Preferred Income Opportunity Fund ("PFO") delivered very respectable results during the most recently concluded fiscal quarter. For the three month period ending February 28, 2005, the Fund produced a total return on net asset value ("NAV") of 6.1%(1). All segments of the investment portfolio performed well during the period; however, the Adjustable Rate Preferred securities in the Fund (approximately 8% of the portfolio at the beginning of the quarter) were exceptionally strong. The Fund's hedges were a modest drag on investment results, as long-term interest rates declined during the period.

In recent letters, we have indicated that the Fund is susceptible to the same factors that have forced many other income-oriented funds to reduce their dividend distributions. In April, the Fund's monthly dividend was set at \$0.0705 per share, a 6.6% reduction from the prior month.

As is the case with other leveraged funds, rising short-term interest rates have increased the amount the Fund must pay on its Money Market Cumulative Preferred(TM) Stock ("MMP(R)"). Typically, rising short-term interest rates are accompanied by rising long-term rates, which should increase the value of the Fund's hedges. The gains on the hedges can then be invested in additional securities, which in turn increase the Fund's income, and, on balance, help keep the Fund's dividend relatively stable.

U.S. TREASURY YIELD CURVES

[GRAPHIC OMITTED]

EDGAR REPRESENTATION OF DATA POINTS USED IN PRINTED GRAPHIC

Maturity	4/30/04	2/28/05
0.25	0.97	2.74
0.50	1.14	2.97
2.00	2.31	3.58
3.00	2.75	3.75
5.00	3.61	3.99
10.00	4.50	4.36
30.00	5.28	4.71

As the above chart shows, current market conditions are anything but typical--since the Federal Reserve signaled its intent to raise short-term interest rates last April, short-term interest rates have increased by approximately 175 basis points, while long-term interest rates have FALLEN by over 50 basis points! As a result, the Fund's MMP(R) expense is significantly higher, but the hedges have not enabled us to produce more income. While we do not expect these conditions to persist for long periods, at this time it is necessary to adjust the monthly distribution to a more sustainable amount.

Over the longer term, a "flatter" yield curve (as measured by the difference in short- and long-term interest rates) is not a bad thing for the Fund. Obviously, the cost of the Fund's leverage will go up, but at

(1) Based on monthly data provided by Lipper Inc. Distributions are assumed to be reinvested at NAV in accordance with Lipper's practice.

Edgar Filing: PREFERRED INCOME OPPORTUNITY FUND INC - Form N-30B-2

the same time, the cost of the Fund's hedging strategy should go down. This effect can be significant since the leverage comprises roughly 32.5% of the Fund's assets, while the ENTIRE portfolio is hedged. The impact of the higher leverage cost occurs almost immediately, while the benefits of lower hedging costs take a bit longer to impact the Fund's income. The mathematics of all this can be a bit daunting, but over the long run, these two effects have tended to offset each other.

As a rule, we don't comment on the market price of the Fund's common shares; however, recent market activity certainly does warrant some observations. Over the long run, the market price SHOULD track the net asset value. From time to time we expect to see some deviation due to factors or circumstances unique to the Fund. For example, most investors cannot replicate PFO's investment portfolio, hedging strategy, or leverage, and therefore may be willing to pay a premium to the NAV.

The chart below plots the recent market price and net asset value of PFO. For most of this period, the market price traded at a premium to the NAV. We attributed this in part to the Fund's long history and successful track record, plus an attractive dividend rate which may be taxed at favorable rates for certain investors. During late February of this year, shares were trading around \$13 3/4; as of this writing, they are trading around \$12 1/2. During the same period, the net asset value declined less than \$0.10!

Unlike open-end mutual funds, investors in closed-end funds should have a longer investment horizon in order to weather swings in the relationship between market price and NAV. In that same vein, investors with a long-term investment horizon should stay focused on the NAV performance and dividend history of the Fund. We plan to stay the course and hopefully will continue to meet and exceed the objectives of the Fund.

As was evident in its recent Proxy Statement, 2005 represents a year of transition in the individuals representing the Fund's shareholders. Martin Brody, who has served as a Director since the inception of the Fund, will retire at the upcoming Shareholder's Meeting. Martin brought a wealth of wisdom and experience to the board, and will be missed. In addition, to comply with recent SEC rule amendments requiring that independent directors constitute 75% of the Board, Robert Ettinger did not stand for reelection as a Director. However, Bob will continue to be very involved with the management of the Fund, continuing to serve as President of the Fund and President of Flaherty & Crumrine Incorporated, the Fund's Investment Adviser. Karen Hogan has been nominated by the Board to replace Bob. Karen brings an extensive financial and investment banking background to the Board; her knowledge will certainly benefit Shareholders.

Please take advantage of the Fund's website, www.preferredincome.com. It contains a wide range of useful and up-to-date information about the Fund. We have also addressed in greater detail many of the topics discussed in this letter.

Sincerely,

Edgar Filing: PREFERRED INCOME OPPORTUNITY FUND INC - Form N-30B-2
