INVESTMENT OBJECTIVES & STRATEGY (UNAUDITED)

The Chartwell Dividend and Income Fund's (the "Fund") primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The Fund will seek to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in income generating equity securities, including dividend paying common stocks, convertible securities, preferred stocks and other equity-related securities. In addition, the Fund may invest the balance of its total assets in non-convertible debt securities, consisting primarily of corporate bonds. The Fund attempts to minimize individual security risk by diversifying across many industries and asset classes. The Fund is a closed-end management investment company which trades on the New York Stock Exchange under the symbol CWF.

COMMON STOCK

The Fund invests in the common stocks of utility companies, Real Estate Investment Trusts (REITs) and other industrial and financial companies as well as other equity securities. Both utilities and REITs tend to offer a premium dividend yield with steady growth that can lead to capital appreciation. Industrial and financial stocks are primarily purchased for capital appreciation based on the fundamental value of the underlying company.

HIGH-YIELD CORPORATE BONDS

High-yield bonds are non-investment grade corporate debt obligations rated "Ba1" or lower by Moody's Investors Service, Inc. or "BB+" or lower by Standard and Poor's Ratings Group; they typically have a higher risk level than investment-grade bonds. These securities have historically compensated investors with higher levels of income for that risk. Prices usually are less sensitive to interest rate fluctuations than higher rated bonds because of the high income levels. However, the prices of these bonds are more sensitive to changes in the economy.

CONVERTIBLE SECURITIES

The Fund can invest in both convertible preferred stock and convertible bonds. Both pay fixed rates of income, but because they can be converted into common stock, they are indirectly tied to the common stock's performance. As a result, convertible securities generally offer higher income than common stocks and an opportunity for price appreciation when the value of the underlying security rises. The Fund buys convertibles when the underlying common stock offers strong growth potential as well.

DEAR SHAREHOLDERS (UNAUDITED),

The total market return in the fiscal year ended November 30, 2006 for The Chartwell Dividend and Income Fund (CWF), including dividends reinvested, was 0.36%. This return was achieved even as the total market return in the last six months ended November 30, 2006 was 19.12%, reversing a negative market return of -15.74% during the first six months of the fiscal year.

The Net Asset Value (NAV) return was strong throughout the entire fiscal year and advanced 22.51%. These results exceeded the performance of the broad stock market as the S&P 500 advanced 14.23% and the Merrill Lynch High Yield Cash Pay Index returned 11.46% for the twelve months ended November 30, 2006.

We remain constructive on the outlook for the stock market and the high yield bond market. We believe that recent positive trends in both markets are fully supported by the performance of the U.S. economy. Previous shareholder letters discussed economic growth as being solid despite a slowing housing market, high oil prices, and rising short-term interest rates. It may be that the worries over these issues are yesterday's problems. In our view, the national housing market appears stable, even as new home construction declines. Despite the best efforts of OPEC, oil prices are well off their highs. In addition, short-term interest rates have stopped rising. Speculation is that the Federal Reserve's (the "Fed") next move may be to lower the Fed Funds Rate. In our opinion, the central question is whether future inflation will be too high for the Fed to be overly accommodative. The Consumer Price Index (CPI) is 2.0% above its year earlier level. The "core" index, which excludes energy and food prices, is 2.5% above its year-ago level. Some Fed watchers believe the Fed's "core" inflation target is around 2.0%. If so, the Fed may disappoint those hoping for lower rates in the near future.

Among the pleasant economic surprises was the surge in November retail sales. Sales rose by a seasonally adjusted 1.0%, much better than anticipated. The woes of the housing industry and the domestic auto companies do not appear to be dampening spending levels elsewhere. Sales of electronics, appliances and other consumer goods appear to be on solid footing. Please read the equity and fixed income commentary for more information and analysis.

HOW DID THE FUND PERFORM DURING THE FISCAL YEAR ENDED NOVEMBER 30, 2006?

For the fiscal year ended November 30, 2006, the Fund's market return was 0.36% including dividends reinvested. The total return of the net assets of the Fund including the reinvestment of dividends was 22.51%. Despite a significant sell-off in May, the equity market (as represented by the S&P 500) returned 14.23% for the fiscal year. The equity market rally in the second half of the Fund's fiscal year was fueled by the Fed's decision in early August not to raise the Fed Fund's rate for the first time in seventeen meetings and the decline in crude oil prices.

The Merrill Lynch High Yield Cash Pay Index returned 11.46% for the fiscal year ended November 30, 2006. Receding inflation fears, falling interest rates, and rising equity prices sparked a second half rally that pushed returns solidly higher. High yield was the best performing domestic fixed income category, outpacing the 10-year Treasury and investment grade corporate bonds, which returned 4.18% and 6.37% (Merrill Lynch U.S. Corporate Master Index), by a

wide margin. Returns were inversely related to credit quality and ranged from 10.1% for BB-rated bonds to 17.1% for CCC-rated bonds. Default rates remained below their historical average for the period, and the market's spread to the benchmark Treasury (or "risk premium") declined modestly from 3.8% to 3.5%.

In May 2006, the Fund lowered its monthly distribution from 8.33 cents per share to 7.33 cents per share. The reduction was in response to lower yields on the Fund's fixed income investments and higher short term borrowing costs, which reduced the net investment income available for distributions. While the reduction of the monthly distribution reflected current financial market conditions at the time, we remain optimistic about the long term potential of the investments in the Fund.

WHAT FACTORS CONTRIBUTED TO THE FUND'S PERFORMANCE?

The equity portion of the Fund returned 26.9% due to strong performance in a number of stocks, particularly in the financial, telecommunication services and consumer staples sectors. ALLIANCE BERNSTEIN, AMERICAN CAPITAL STRATEGIES, ISTAR FINANCIAL, INC., BOSTON PROPERTIES, INC., ALASKA COMMUNICATIONS SYSTEMS GROUP AND LOEWS CORPORATION--CAROLINA GROUP were significant holdings and all had returns of between 29% and 62% during the period. In addition, each of these companies pays substantial dividends to shareholders. The Fund's largest stock holding was Bank of America (BAC). BAC's stock advanced over 17% while the dividend return was over 4%.

Every major industry in the Merrill Lynch High Yield Cash Pay Index posted a positive return for the period, led by automotive related issuers which returned over 20% on average.

DID ANY COMMON STOCKS OR FIXED INCOME HOLDINGS WITHIN THE FUND UNDERPERFORM RELATIVE TO YOUR EXPECTATIONS?

As can be seen in the chart below, every sector in the S&P 500 had positive performance for the fiscal year. Among our larger stock holdings there were only a few stocks that underperformed versus our expectations (HOMEBANC CORPORATION, HARTFORD FINANCIAL SERVICES, NEW YORK COMMUNITY BANCORP, KINDER MORGAN ENERGY PARTNERS LP). The reasons for the poor performance were generally company specific. HomeBanc Corp. (HMB) was by far the most disappointing holding we held during the year. They are a mortgage REIT specializing in residential mortgages,

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

mostly in the southeastern United States. Growing concerns about a weakening economy raising mortgage delinquencies and the slowing of the demand for new mortgages were responsible for a good portion of the share price decline. In addition, HMB has decided to change away from its current REIT structure which has caused additional selling pressure. We believe the company is worth more than it is currently selling for and believe we will be able to realize a better price for our shares once the selling pressure abates.

On the fixed income side of the Fund, our worst performing position was in HCA INC., a hospital operator that was the target of a leveraged buyout. Fortunately, we owned short dated HCA bonds, which experienced less price

deterioration than the longer parts of HCA's capital structure. Other relatively poor performers included CHESAPEAKE ENERGY and WESTERN FINANCE. While the broad high yield market was strong, defensive industries comprised of relatively higher quality issuers such as healthcare, gaming and energy, underperformed during the year.

WHAT CHANGES WERE MADE TO THE PORTFOLIO DURING THE PERIOD?

In the first portion of the fiscal year we continued to increase our investment in Preferred Term Securities. These securities exhibit features of both equity and fixed income instruments and represent pools of bank and insurance company preferred securities. On the equity side of the portfolio, we became slightly more defensive by adding to our weight in the consumer staples and

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

telecommunication services areas. Some new additions during the period were: GATEHOUSE MEDIA, INC., a publisher of local newspapers and WINDSTREAM CORPORATION (FORMERLY VALOR COMMUNICATIONS GROUP), a provider of telecommunications services in rural communities in the southwestern United States. In addition we added to our position in REDDY ICE HOLDINGS, a manufacturer of packaged ice. Meanwhile, our weighting in the energy portion of the portfolio increased in the second half of the year as we added to our holdings of Master Limited Partnerships. This asset class carries high yields with exposure to the energy sector through ownership of mid-stream assets such as pipelines. Lastly, in the financial sector, we reduced our exposure to banks due to declining net interest margins and increased credit risks while we increased our exposure to non-bank financial companies such as AMERICAN CAPITAL STRATEGIES LIMITED and APOLLO INVESTMENT CORPORATION.

The bond side of the Fund continued to focus primarily on B and BB-rated issuers. Recent purchases include BLOUNT INC., a manufacturer of chainsaw chain, guide-bars and other outdoor industrial products, and IDEARC INC., the Yellow Pages directory business that was spun out of Verizon Communications. CHIQUITA BRANDS, a producer of bananas and other produce, and HOVNANIAN ENTERPRISES, a large homebuilder, were among the fixed income positions that we exited during the year.

HOW DID THE FUND TRADE RELATIVE TO ITS NET ASSET VALUE (NAV) DURING THE FISCAL YEAR?

As of November 30, 2006, the Fund was trading at a closing price of \$9.78, which is a 2.4% premium to its Net Asset Value of \$9.55. At the start of the fiscal year on November 30, 2005, the Fund was trading at a closing price of \$10.70, a premium of 23.7% to its NAV of \$8.65. Throughout the period, the Fund traded between a 4.0% discount to its NAV and a 27.2% premium to its NAV.

WHAT IS YOUR CURRENT OUTLOOK FOR THE EQUITY AND FIXED INCOME MARKETS?

Looking out to the Fund's next fiscal year we are somewhat cautious about the expected returns for the equity market. While current absolute valuations are not expensive, corporate profit margins have been at or near peak levels for an extended period and corporate earnings comparisons will be difficult. There is currently conflicting evidence on the strength of the economy with job growth continuing to surprise on the upside, but other measures of economic output have been slowing of late. In our opinion, there are questions as to the strength of the consumer and both the housing and automotive markets have cooled substantially. Lastly, there appears to be significant consternation in the market regarding the next move by the Federal Reserve. With all of these mixed signals and the fact that the market has rallied approximately 14% from its June lows, we believe that the next year should bring good but not spectacular gains in the stock market with dividends continuing to play a significant role for investors. Therefore, we will continue to look to make investments in the equities of companies that appear to have solid business models that generate significant

cash flow which the companies return to their shareholders through stable and growing dividends.

In the fixed income portion of the Fund, we are optimistic about the outlook for the high yield bond market. Default rates remain low by historical standards, and despite five quarter-point increases in the Fed Funds Rate over the last year, the broad economy and corporate profits have continued to grow. A recent survey of Fed Senior Loan Officers indicates that most banks are maintaining stable lending standards, a sanguine environment for companies looking to expand their business or to refinance their balance sheets. Mergers and acquisitions, fueled by high stock prices and burgeoning private equity coffers, are expected to continue at an elevated pace. While not always the case, these transactions tend to be positive for high yield issuers. Our optimism is tempered

by the potential for slower economic growth as the economy digests the full effect of the recent rate increases. Provided a mid-cycle slowdown does not turn into a full blown recession, we would expect the current credit cycle to extend through 2007, and that high yield should deliver positive returns in line with the market's average coupon.

As of November 30, 2006, the percentage of the Fund's total investments held in equities and fixed income was 69% and 30%, respectively. The Fund continues to overweight high quality, higher dividend paying securities. We believe that the market will continue to reward companies that provide a high dividend. In the Equity portion of the portfolio financials continue to represent the largest sector allocation, as favorable valuation, high dividend yield and consistent growth relative to other sectors provides many attractive investment opportunities. With the uncertainty around the next move by the Federal Reserve, questions about the strength of the economy and the likely slowing of corporate earnings growth, we added to our holdings in the consumer staples sector which we believe should show steadier earnings characteristics in the event of an economic slowdown.

The fixed income portion of the Fund is positioned primarily in B and BB-rated issues. With high yield spreads below their long term average, we do not believe that investors are sufficiently compensated to own most CCC-rated issues given their higher risk and relative earnings volatility. The goal of the fixed income portfolio is to provide a consistent level of high income in support of the Fund's monthly distribution. We continue to employ rigorous credit analysis in an attempt to identify fixed income positions that we believe have solid business plans, strong market shares and cash flows sufficient to service their debt obligations.

UTILIZATION OF LEVERAGE (UNAUDITED)

The Chartwell Dividend and Income Fund, Inc. has utilized leverage through the issuance of commercial paper. As of November 30, 2006, the Fund had approximately \$55 million in leverage outstanding (out of \$60 million available) in the form of commercial paper rated A1/P1 by Moody's Investors Service, Inc./Standard & Poor's Ratings Group. These ratings should enhance the marketability and reduce the interest costs associated with the issuance of the commercial paper. However, it must be noted that the utilization of leverage involves the risk of lower portfolio returns if the cost of leverage is higher than the resulting yields on assets or if the Fund experiences capital losses in excess of the yield spread, if any. Therefore, the addition of leverage also increases the potential volatility of the Fund. The Fund has the ability to

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

leverage to a maximum of 33% of the Fund's gross assets.

The Fund utilizes leveraging to seek to enhance the yield and NAV of its common stock. However, these objectives cannot be achieved in all interest rate environments. To leverage, the Fund issues commercial paper, which is issued at a discount equivalent to short-term interest rates, and invests the proceeds in long-term securities. The interest earned on these investments is paid to common stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share NAV of the Fund's common stock. However, in order to benefit common stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit common stock shareholders. IF EITHER OF THESE CONDITIONS CHANGE, THEN THE RISKS OF LEVERAGING WILL BEGIN TO OUTWEIGH THE BENEFITS.

To illustrate these concepts, assume a fund's common stock capitalization of \$100 million and the issuance of commercial paper for an additional \$50 million, creating a total value of \$150 million available for investment in long-term securities. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The Fund pays a discount on the \$50 million of commercial paper based on the lower short-term interest rates. At the same time, the Fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the discount paid to commercial paper holders is significantly lower than the income earned on the Fund's long-term investments, and therefore the common stock shareholders are the beneficiaries of the incremental yield. However, IF SHORT-TERM INTEREST RATES RISE, which they have been, narrowing the differential between short-term and long-term interest rates, THE INCREMENTAL YIELD PICK-UP ON THE COMMON STOCK WILL BE REDUCED OR ELIMINATED COMPLETELY. At the same time, the market value on the Fund's common stock (that is, its price as listed on the New York Stock Exchange), may, as a result, decline. Furthermore, IF LONG-TERM INTEREST RATES RISE, THE COMMON STOCK'S NAV WILL REFLECT THE FULL DECLINE IN THE PRICE OF THE PORTFOLIO'S INVESTMENTS, SINCE THE VALUE OF THE FUND'S COMMERCIAL PAPER DOES NOT FLUCTUATE. In addition to the decline in net asset value, the market value of the Fund's common stock may also decline.

NOVEMBER 30, 2006

NOTES TO FINANCIAL STATEMENTS

Chartwell Dividend and Income Fund, Inc. (the "Fund") was incorporated under the

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

laws of the State of Maryland on April 6, 1998 and is registered under the Investment Company Act of 1940 as amended, (the "Act"), as a closed-end, diversified management investment company. Investment operations commenced on June 29, 1998. The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective.

NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

USE OF ESTIMATES: The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of increases and decreases in net assets from operations during the reporting period. Actual results could differ from those estimates.

SECURITY VALUATION: Investment securities of the Fund that are listed on a securities exchange, except for debt securities, and for which market quotations are readily available, are valued at the last quoted sales price at the close of trading on the New York Stock Exchange (normally 4:00 p.m., Eastern Time). Investment securities of the Fund that are quoted on the NASDAQ market system are valued at the official closing price, or if there is none, at the last sales price. If there is no reported sale, these securities and unlisted securities for which market quotations are not readily available are valued at last bid price. Debt securities are priced based upon valuations provided by independent, third-party pricing agents, if available. Such values generally reflect the last reported sales price if the security is actively traded. The third-party pricing agents may also value debt securities at an evaluated bid price by employing methodologies that utilize actual market transactions, broker-supplied valuations, or other methodologies designed to identify the market value for such securities. Debt obligations with remaining maturities of sixty days or less may be valued at their amortized cost, which approximates market value. Prices for most securities held in the Fund are provided daily by recognized independent pricing agents. If a security price cannot be obtained from an independent, third-party pricing agent, the Fund seeks to obtain a bid price from at least one independent broker. All securities and assets for which quotations are not readily available, of which there were none as of November 30, 2006, are valued in accordance with Fair Value Procedures established by the Board of Directors (the "Board"). The Fund's Fair Value Procedures are implemented through a Fair Value Committee (the "Committee")

designated by the Fund's Board. Some of the more common reasons that may necessitate that a security be valued using Fair Value Procedures include, among other things: the security's trading has been halted or suspended; the security has been de-listed from a national exchange; the security's primary trading

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

market is temporarily closed at a time when under normal conditions it would be open; or the security's primary pricing source is not able or willing to provide a price. When a security is valued in accordance with the Fair Value Procedures, the Committee will determine the value after taking into consideration relevant information reasonably available to the Committee.

CASH AND CASH EQUIVALENTS: Idle cash is swept into various money market funds and is classified as cash equivalents on the Schedule of Investments. Amounts so invested are generally available on the same business day.

WRITTEN OPTIONS: When the Fund writes a covered call option, an amount equal to the premium received by the Fund is included in the Fund's Statement of Assets and Liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written.

When a covered written call option expires on its stipulated expiration date, or if the Fund enters into a closing purchase transaction, the Fund will realize a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the call option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option will be extinguished. When a covered written call option is exercised, the Fund will realize a gain or loss from the sale of the underlying security and the proceeds of the sale are increased by the premium originally received. The Fund, as writer of an option, has no control over whether the underlying securities may be sold (called) and as a result bears the market risk of an unfavorable change in the price of the securities underlying the written option.

DIVIDENDS AND DISTRIBUTIONS: The Fund will declare and pay dividends to shareholders on a monthly basis. Net long-term capital gains, if any, in excess of capital loss carryforwards are distributed to shareholders annually. Dividends from net investment income and capital gain distributions, if any, are determined in accordance with U.S. Federal income tax regulations, which may differ from generally accepted accounting principles. Dividends and distributions, if any, to shareholders are recorded on the ex-dividend date.

The Fund currently intends to distribute a monthly fixed amount to shareholders. The Fund's final distribution for each calendar year may exceed that amount, however, to the extent necessary for the Fund to have distributed all of its net investment company taxable income and net capital gains recognized during the year, if any. If, for any calendar year, the total distributions exceed current and accumulated earnings and profit, the excess, distributed from the Fund's assets, will generally be treated as a tax-free return of capital and will result in a reduction in the shareholder's basis. The Board reserves the right to change the aforementioned dividend policy from time to time.

33

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2006

BORROWINGS: The Fund issues short-term commercial paper at a discount from par. The discount is amortized to interest expense over the life of the commercial paper using the straight-line method.

ILLIQUID SECURITIES: A security is considered illiquid if it cannot be sold or

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

disposed of in the ordinary course of business within seven days or less for its approximate carrying value on the books of the Fund. Valuations of illiquid securities may differ significantly from the values that would have been used had an active market value for these securities existed.

SECURITY TRANSACTIONS AND INVESTMENT INCOME: Security transactions are recorded on the trade date. Realized gains and losses on sales of securities are calculated on the identified cost basis.

Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. The Fund accretes original issue discount on securities using the effective interest method.

INVESTMENTS IN REAL ESTATE INVESTMENT TRUSTS ("REITS"): With respect to the Fund, dividend income is recorded based on the income included in distributions received from the REIT investments using published REIT reclassifications including some management estimates when actual amounts are not available. Distributions received in excess of this estimated amount are recorded as a reduction of the cost of investments or reclassified to capital gains. The actual amounts of income, return of capital, and capital gains are only determined by each REIT after its fiscal year-end, and may differ from the estimated amounts.

INVESTMENTS IN PREFERRED TERM SECURITIES ("PTSS"): The Fund invests in Preferred Term Securities ("PTs"), a type of collateralized debt obligation ("CDO"). A PTS is a trust collateralized by a pool of capital securities of affiliated holding corps., typically of, but not limited to, smaller to medium sized banks and insurance companies.

The income tranche of these securities, owned by the Fund, receives residual cash disbursements after the senior tranches are paid a stated rate of interest. Dividend income from these securities is recorded based on anticipated cash flows and the internal rate of return of each PTS. Distributions received in excess of this estimated amount are recorded as a reduction of the cost of investments or reclassified to capital gains. The actual amounts of income, return of capital, and capital gains are only determined by each PTS quarterly, and may differ from the estimated amounts.

In addition to the normal risks associated with fixed income securities (e.g., interest rate risk and default risk), PTSs carry additional risks including, but are not limited to: (i) the possibility that distributions from collateral securities will not be adequate to make interest or other payments; (ii) the quality of the

34

CHARTWELL

collateral may decline in value or default; (iii) the Fund may invest in PTSs that are subordinate to other classes; and (iv) the complex structure of the security may produce disputes with the issuer or unexpected investment results.

NOTE 2. INVESTMENT MANAGEMENT, ADMINISTRATION, CUSTODIAN AGREEMENTS AND OTHER TRANSACTIONS WITH AFFILIATES

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

The Fund has entered into an investment management agreement with the Manager. The Manager manages the Fund's portfolio and makes investment decisions. For these services, the Fund pays the Manager a monthly fee at an annual rate of 0.95% of the Fund's Managed Assets. "Managed Assets" are the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, excluding debt related to leveraging, short-term debt and the aggregate liquidation preference of any outstanding preferred stock. The Manager has agreed to limit the investment management fee paid to it by the Fund to 0.85% of the Fund's Managed Assets. This waiver is voluntary and may be changed at any time.

The Fund has entered into an administration agreement with SEI Investments Global Funds Services (the "Administrator"). Under such agreement, the Administrator performs or arranges for the performance of certain administrative services necessary for the operation of the Fund. Prior to September 30, 2006, the Fund paid a fee to the Administrator based on the Fund's Managed Assets according to the following rates: 0.10% on the first \$250 million of such Managed Assets and 0.09% on such Managed Assets in excess of \$250 million, subject to a minimum annual fee of \$180,000, which included fees under this agreement and fees received by the Administrator from the Chartwell U.S Equity and Chartwell Small Cap Value Funds. Due to the liquidation of the Chartwell U.S. Equity and Small Cap Value Funds during the year, effective September 30, 2006, the Fund pays the Administrator according to the same fee structure as listed above, exclusive of any fees from the other Funds.

Certain officers and/or directors of the Fund are officers and/or directors of the Manager. The Fund pays each director, who is not an "affiliated person" as defined in the Act (a "Disinterested Director"), a fee of \$2,000 for each regular Board Meeting attended, \$750 for each special Board Meeting attended, plus \$1,000 per year for audit committee members. Prior to January 18, 2006 the Fund paid each Disinterested Director a fee of \$1,500 for each regular Board Meeting attended, plus \$1,000 per year for audit committee members and an additional fee of \$250 per year for the chairman of the audit committee.

For the year ended November 30, 2006, the Fund incurred a legal expense of \$101,019 for services provided by Drinker Biddle & Reath LLP, counsel for the Fund. A partner of the firm is an officer of the Fund.

U.S. Bank serves as the custodian for the Fund. The Custodian plays no role in determining the investment policies of the Fund or which securities are to be purchased or sold by the Fund.

As of November 30, 2006, \$55,000,000 of commercial paper was outstanding with an amortized cost of \$54,629,153. The average discount rate of commercial paper outstanding at November 30, 2006, was 5.35%. The maximum face amount of commercial paper outstanding at any time during the year ended November 30, 2006, was \$55,000,000. In conjunction with the issuance of the commercial paper, the Fund has entered into a line of credit arrangement with a bank for \$30,000,000. Interest on borrowing is based on market rates in effect at the time of borrowing. The commitment fee is computed at the rate of 0.30% per annum on the unused balance. There were no borrowings under this arrangement during the year ended November 30, 2006.

NOTE 5. CAPITAL STOCK

There are 100,000,000 shares of \$0.01 par value common stock authorized. Of the 16,824,863 shares of common stock outstanding at November 30, 2006, the Manager owned 16,527 shares.

For the years ended November 30, 2006 and November 30, 2005, the Fund issued 131,915 and 166,611 shares, respectively, in connection with the Fund's dividend reinvestment plan.

NOTE 6. MARKET AND CREDIT RISKS

The Fund may invest in high-yielding fixed-income securities, which carry ratings of BB or lower by S&P and/or Ba1 or lower by Moody's. Investments in these higher-yielding securities may be accompanied by a greater degree of credit

risk than higher rated securities. Additionally, lower-rated securities may be more susceptible to adverse economic and competitive industry conditions

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

than investment-grade securities. The Fund may invest up to 15% of its total assets in illiquid securities and other securities which may not be readily marketable. In addition, the Fund may purchase securities sold in reliance of Rule 144A of the Securities Act of 1933. The relative illiquidity of some of the Fund's portfolio securities may adversely affect the ability of the Fund to dispose of such securities in a timely manner and at a fair price at times when it might be necessary or advantageous for the Fund to liquidate portfolio securities.

NOTE 7. FEDERAL TAX INFORMATION

It is the Fund's intention to continue to meet the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders. Therefore, no provision for Federal income or excise tax is required.

In accordance with accounting pronouncements, the Fund has recorded several reclassifications in the capital accounts. These reclassifications have no impact on the net asset value of the Fund. These differences, which may result in distribution reclassifications, are primarily due to distributions in excess of tax earnings and profits and return of capital from investments in master limited partnerships. As of November 30, 2006, the Fund recorded the following reclassifications to increase (decrease) the accounts below:

UNDISTRIBUTED NET INVESTMENT INCOME	ACCUMULATED REALIZED GAIN	ADDITIONAL PAID-IN- CAPITAL

9. NEW ACCOUNTING PRONOUNCEMENTS:

On July 13, 2006, the Financial Accounting Standards Board (FASB) released FASB Interpretation No. 48 "Accounting for Uncertainty in Income Taxes" (FIN 48). FIN 48 provides guidance for how uncertain tax positions should be recognized, measured, presented and disclosed in the financial statements. FIN 48 requires the evaluation of tax positions taken or expected to be taken in the course of preparing the Fund's tax returns to determine whether the tax positions are "more-likely-than-not" of being sustained by the applicable tax authority. Tax positions not deemed to meet the more-likely-than-not threshold would be recorded as a tax benefit or expense in the current year. The Fund will not be required to adopt FIN 48 until May 31, 2008. As of November 30, 2006, the Fund has not completed its evaluation of the impact, if any, that will result from the adoption of FIN 48.

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

NOVEMBER 30, 2006

In September 2006, FASB issued STATEMENT ON FINANCIAL ACCOUNTING STANDARDS (SFAS) NO. 157, "FAIR VALUE MEASUREMENTS." This standard establishes a single authoritative definition of fair value, sets out a framework for measuring fair value and requires additional disclosures about fair value measurements. SFAS No. 157 applies to fair value measurements already required or permitted by existing standards. SFAS No. 157 is effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years. The changes to current generally accepted accounting principles from the application of this Statement relate to the definition of fair value, the methods used to measure fair value, and the expanded disclosures about fair value measurements. As of November 30, 2006, the Fund does not believe the adoption of SFAS No. 157 will impact the amounts reported in the financial statements; however, additional disclosures may be required about the inputs used to develop the measurements and the effect of certain of the measurements reported in the financial statements for a fiscal period.

10. INDEMNIFICATIONS

The Fund enters into contracts that contain a variety of indemnifications. The Fund's maximum exposure under these arrangements is unknown. However, the Fund has not had prior claims or losses pursuant to these contracts and expects the risk of loss to be remote.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors and Shareholders of
Chartwell Dividend & Income Fund, Inc:

We have audited the accompanying statement of assets and liabilities of Chartwell Dividend & Income Fund, Inc. (the "Fund"), including the schedule of investments, as of November 30, 2006, and the related statements of operations, cash flows, changes in net assets, and financial highlights for the year then ended. These financial statements and financial highlights are the

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

responsibility of the Fund's management. Our responsibility is to express an opinion on these financial statements and financial highlights based on our audit. The statement of changes in net assets for the year ended November 30, 2005 and the financial highlights for the four years in the period ended November 30, 2005 were audited by other auditors, whose report dated January 27, 2006 expressed an unqualified opinion on those financial statements and financial highlights.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements and financial highlights are free of material misstatement. We were not engaged to perform an audit of the Fund's internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Fund's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements and financial highlights, assessing the accounting principles used and significant estimates made by management, and evaluating the overall financial statement presentation. Our procedures included confirmation of securities owned as of November 30, 2006, by correspondence with the custodian and brokers or by other appropriate auditing procedures where replies from brokers were not received. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the financial statements and financial highlights referred to above present fairly, in all material respects, the financial position of Chartwell Dividend & Income Fund, Inc. at November 30, 2006, the results of its operations and cash flows, and the changes in its net assets and financial highlights for the year then ended, in conformity with U.S. generally accepted accounting principles.

AUTOMATIC DIVIDEND REINVESTMENT PLAN (UNAUDITED)

Pursuant to the Fund's Automatic Dividend Reinvestment Plan (the "Plan"), unless a shareholder otherwise elects, all dividend and capital gains distributions will be automatically reinvested in additional shares of common stock of the Fund by PFPC, Inc., as agent for shareholders in administering the Plan (the "Plan Agent"). Shareholders who elect not to participate in the Plan will receive all dividends and distributions in cash, paid by check mailed directly to the shareholder of record (or, if the shares are held in street or other nominee name, then to such nominee) by PFPC, Inc., as dividend paying agent. Such participants may elect not to participate in the Plan and to receive all distributions of dividends and capital gains in cash by sending written

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

instructions to PFPC, Inc., as dividend paying agent, at the address set forth below.

Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by written notice if received by the Plan Agent not less than ten days prior to any dividend record date. Otherwise such termination will be effective with respect to any subsequently declared dividend or distribution.

Whenever the Fund declares a distribution, an ordinary income dividend or a capital gain dividend (collectively referred to as "dividends") payable either in shares or in cash, non-participants in the Plan will receive cash, and participants in the Plan will receive the equivalent in shares of common stock. The shares will be acquired by the Plan Agent for the participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized shares of common stock from the Fund or (ii) by purchase of outstanding shares of common stock on the open market on the NYSE or elsewhere. If on the payment date of the dividend, the net asset value per share of the common stock is equal to or less than the market price per share plus estimated brokerage commissions (such condition being referred to herein as "market premium"), the Plan Agent will invest the dividend amount in newly issued shares on behalf of the participant. The number of newly issued shares of common stock to be credited to the participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (such condition being referred to herein as "market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases.

In the event of a market discount on the dividend payment date, the Plan Agent will have until the last business day before the next date on which the shares trade on the "ex-dividend" basis or in no event more than 30 days after the

41

CHARTWELL

dividend payment date to invest the dividend amount in shares acquired in open-market purchases. If, before the Plan Agent has completed its open-market purchases, the market price of a share of common stock exceeds the net asset value per share, the average per share purchase price paid by the Plan Agent may exceed the net asset value of the Fund's shares, resulting in the acquisition of fewer shares than if the dividend had been paid in newly issued shares on the dividend payment date. The Plan provides that if the Plan Agent is unable to invest the full dividend amount in open-market purchases during the purchase period or if the market discount shifts to market premium during the purchase period, the Plan Agent will cease making open-market purchases and will invest the uninvested portion of the dividend amount in newly issued shares at the close of business on the last purchase date.

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held pursuant to the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the record shareholders as representing the total amount registered in the record shareholder's name and held for the account of beneficial owners who are to participate in the Plan.

There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gain distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with reinvestment of dividends.

The automatic reinvestment of dividends and distributions will not relieve participants of any Federal, state or local income tax that may be payable (or required to be withheld) on such dividends.

Shareholders participating in the Plan may receive benefits not available to shareholders not participating in the Plan. If the market price plus commissions of the Fund's shares is above the net asset value, participants in the Plan will receive shares of the Fund at less than they could otherwise purchase them and will have shares with a cash value greater than the value of any cash distribution they would have received on their shares. If the market price plus

commissions is below the net asset value, participants will receive distributions in shares with a net asset value greater than the value of any cash distribution they would have received on their shares. However, there may be insufficient shares available in the market to make distributions in shares at prices below the net asset value. Also, since the Fund does not redeem its shares, the price on resale may be more or less than the net asset value.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

All correspondence concerning the Plan should be directed to the Plan Agent at PFPC, Inc., P.O. Box 43027, Providence, RI 02940-3027, Attn: Closed-End Department.

The Registrant has delegated the voting of proxies relating to its voting securities to its investment adviser, Chartwell Investment Partners, L.P. (the "Adviser"), subject to the general oversight by the Registrant's Board of Directors. The Registrant expects the Adviser to vote proxies related to the Registrant's portfolio securities for which it has voting authority consistent with the Registrant's best economic interests. The Adviser has adopted its own Proxy Voting Policies and Procedures which address, among other things, conflicts of interests that may arise between the interests of the Registrant and the interests of the Adviser and its affiliates. The Adviser's Proxy Voting Policies and Procedures is included as an Exhibit hereto.

CHARTWELL INVESTMENT PARTNERS PROXY VOTING POLICIES AND PROCEDURES

ADOPTED APRIL 11, 1997
AS AMENDED FEBRUARY 1, 2005

PURPOSE. Chartwell Investment Partners ("Chartwell") has adopted these Proxy Voting Policies and Procedures ("Policies") to seek to ensure that it exercises voting authority on behalf of Chartwell clients in a manner consistent with the best interests of each client and its agreement with the client.

SCOPE. These Policies apply where clients have delegated the authority and responsibility to Chartwell to decide how to vote proxies. Chartwell does not accept or retain authority to vote proxies in accordance with individual client guidelines. Clients that wish to arrange to vote proxies in accordance with their own guidelines may elect to do so at any time by notifying Chartwell. Chartwell generally will follow these Policies if asked to make recommendations about proxy voting to clients who request that advice but have not delegated proxy voting responsibility to Chartwell.

GUIDING PRINCIPLES. Chartwell believes that voting proxies in the best interests of each client means making a judgment as to what voting decision is most likely to maximize total return to the client as an investor in the securities being voted, and casting the vote accordingly. For this reason, Chartwell's evaluation of the possible impact of a proxy vote on the economic interests of company shareholders similarly situated to Chartwell's clients will be the primary factor governing Chartwell's proxy voting decisions.

USE OF INDEPENDENT PROXY VOTING SERVICE. Chartwell has retained Institutional Shareholder Services, Inc., ("ISS") an independent proxy voting service, to

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

assist it in analyzing specific proxy votes with respect to securities held by Chartwell clients and to handle the mechanical aspects of casting votes. Historically, Chartwell has placed substantial reliance on ISS' analyses and recommendations and generally gives instructions to ISS to vote proxies in accordance with ISS' recommendations, unless Chartwell reaches a different conclusion than ISS about how a particular matter should be voted. ISS proxy voting recommendations typically are made available to Chartwell about a week before the proxy must be voted, and are reviewed and monitored by members of the Proxy Voting Committee (and, in certain cases, by Chartwell portfolio managers), with a view to determining whether it is in the best interests of Chartwell's clients to vote proxies as recommended by ISS, or whether client proxies should be voted on a particular proposal in another manner.

ADMINISTRATION OF POLICIES. Chartwell has established a Proxy Voting Committee to oversee and administer the voting of proxies on behalf of clients, comprised of approximately five representatives of the firm's compliance and operations departments. The Committee's responsibilities include reviewing and updating these Policies as may be appropriate from time to time; identifying and resolving any material conflicts of interest on the part of Chartwell or its personnel that may affect particular proxy votes; evaluating and monitoring,

on an ongoing basis, the analyses, recommendations and other services provided by ISS or another third party retained to assist Chartwell in carrying out its proxy voting responsibilities; when deemed appropriate by the Committee, consulting with Chartwell portfolio managers and investment professionals on particular proposals or categories of proposals presented for vote; and determining when and how client proxies should be voted other than in accordance with the general rules and criteria set forth in Chartwell's Proxy Voting Guidelines or with the recommendations of ISS or another independent proxy voting service retained by Chartwell.

CONFLICTS OF INTEREST. It is Chartwell's policy not to exercise its authority to decide how to vote a proxy if there is a material conflict of interest between Chartwell's interests and the interests of the client that owns the shares to be voted that could affect the vote on that matter. To seek to identify any such material conflicts, a representative of the Proxy Voting Committee screens all proxies and presents any potential conflicts identified to the Committee for determination of whether the conflict exists and if so, whether it is material. Conflicts of interest could result from a variety of circumstances, including, but not limited to, significant personal relationships between executive officers of an issuer and Chartwell personnel, a current or prospective investment adviser-client relationship between an issuer or a pension plan sponsored by an issuer and Chartwell, a significant ownership interest by Chartwell or its personnel in the issuer and various other business, personal or investment relationships. Generally, a current or prospective adviser-client relationship will not be considered material for these purposes if the net advisory revenues to Chartwell have not in the most recent fiscal year and are not expected in the current fiscal year to exceed 1/2 of 1 percent of Chartwell's annual advisory revenue.

In the event the Committee determines that there is a material conflict of interest that may affect a particular proxy vote, Chartwell will NOT make the decision how to vote the proxy in accordance with these Policies unless the Policies specify how votes shall be cast on that particular type of matter, i.e., "for" or "against" the proposal. Where the Policies provide that the voting decision will be made on a "case-by-case" basis, Chartwell will either request the client to make the voting decision, or the vote will be cast in accordance with the recommendations of ISS or another independent proxy voting service retained by Chartwell for that purpose. Chartwell also will not provide advice to clients on proxy votes without first disclosing any material conflicts

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

to the client requesting such advice.

WHEN CHARTWELL DOES NOT VOTE PROXIES. Chartwell may not vote proxies respecting client securities in certain circumstances, including, but not limited to, situations where (a) the securities are no longer held in a client's account; (b) the proxy and other relevant materials are not received in sufficient time to allow analysis or an informed vote by the voting deadline; (c) Chartwell concludes that the cost of voting the proxy will exceed the expected potential benefit to the client; or (d) the securities have been loaned out pursuant to a client's securities lending program and are unavailable to vote.

2

PROXY VOTING GUIDELINES

Generally, Chartwell votes all proxies in accordance with the following guidelines. These guidelines may be changed or supplemented from time to time. Votes on matters not covered by these guidelines will be determined in accordance with the principles set forth above. Client guidelines may be inconsistent with these guidelines and may cause Chartwell to vote differently for different clients on the same matter.

I. THE BOARD OF DIRECTORS

A. DIRECTOR NOMINEES IN UNCONTESTED ELECTIONS

Vote on a CASE-BY-CASE basis for director nominees, examining the following factors:

- o long-term corporate performance record of the company's stock relative to a market index;
- o composition of board and key board committees;
- o nominee's attendance at meetings (past two years);
- o nominee's investment in the company;
- o whether a retired CEO of the company sits on the board; and
- o whether the board chairman is also serving as the company's CEO.

In certain cases, and when information is readily available, we also review:

- o corporate governance provisions and takeover activity;
- o board decisions regarding executive pay;
- o board decisions regarding majority-supported shareholder proposals in back-to-back years;
- o director compensation; and
- o interlocking directorships.

WITHHOLD votes from directors who are CEOs of publicly traded companies who serve on more than three public boards, i.e., more than two public boards other than their own board.

WITHHOLD votes from directors who serve on more than six public company boards.

WITHHOLD votes from all directors (except from new nominees) of companies who have dead-hand or modified dead-hand features (e.g. slow-hand) in shareholder rights plan.

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

WITHHOLD votes from all directors (except from new nominees) if the company has adopted or renewed a poison pill without shareholder approval since the company's last annual meeting, does not put the pill to a vote at the current annual meeting, and there is no requirement to put the pill to shareholder vote within 12 months of its adoption. (Pills adopted prior to this policy will not be considered.)

3

WITHHOLD votes from the ENTIRE board (except from new nominees) in cases where the director(s) receive more than 50% withhold votes out of those cast and the issue that was the underlying cause of the high level of withholds votes in the prior election has not been addressed. The adequacy of the company's response, if any, would be analyzed on a CASEBY-CASE basis to determine if it represents an acceptable cure for the issue(s) that resulted in such a high level of withholds.

B. CHAIRMAN AND CEO ARE THE SAME PERSON

Vote FOR shareholder proposals requiring the position of chairman to be filled by an independent director unless there are compelling reasons to recommend against the proposal, such as a counterbalancing governance structure including all of the following:

- o Designated lead director, elected by and from the independent board members with clearly delineated duties. (The role may alternatively reside with a presiding director, vice chairman or rotating lead director.) At a minimum these should include:
 - Presides at all meetings of the board at which the chairman is not present, including executive sessions of the independent directors
 - Serves as liaison between the chairman and the independent directors
 - Approves information sent to the board
 - Approves meeting agendas for the board
 - Approves meeting schedules to assure that there is sufficient time for discussion of all agenda items
 - Has the authority to call meetings of the independent directors
 - If requested by major shareholders, ensures that he is available for consultation and direct communication
- o 2/3 independent board
- o All independent key committees
- o Established governance guidelines
- o The company should not have underperformed its peers and index on a one-year and three-year basis, unless there has been a change in the Chairman/CEO position within that time. Performance will be measured according to shareholder returns against index and peers from the performance summary table.

C. MAJORITY OF INDEPENDENT DIRECTORS

WITHHOLD votes from insiders and affiliated outsiders on boards that are not at least majority independent.

Vote FOR proposals that request that the board audit, compensation and/or nominating committees include independent directors exclusively.

CATEGORIZATION OF DIRECTORS

INSIDE DIRECTOR (I)

- o Employee of the company or its affiliates(1)
- o Nonemployee officer of the company if among the five most highly compensated individuals o Listed as a Section 16 officer(2)
- o Interim CEO
- o Beneficial ownership of more than 50 percent of the company's voting power (this may be aggregated if voting power is distributed among more than one member of a defined group).

AFFILIATED OUTSIDE DIRECTOR (AO)

- o Board attestation that an outside director is not independent o Former CEO of the company or its affiliate(1)

I. SHARE REPURCHASE PROGRAMS

Vote FOR management proposals to institute open-market share repurchase plans in which all shareholders may participate on equal terms.

VIII. EXECUTIVE AND DIRECTOR COMPENSATION

In general, we vote on a CASE-BY-CASE basis on executive and director compensation plans, with the view that viable compensation programs reward the creation of stockholder wealth by having a high payout sensitivity to increases in shareholder value.

In evaluating a pay plan, we measure its dilutive effect both on shareholder wealth and on voting power. We value equity-based compensation along with cash components of pay. We estimate the present value of short- and long-term incentives, derivative awards, and cash/bonus compensation -- which enables us to assign a dollar value to the amount of potential shareholder wealth transfer.

Our vote is based, in part, on a comparison of company-specific adjusted allowable dilution cap and a weighted average estimate of shareholder wealth transfer and voting power dilution. Administrative features are also factored into our vote. For example, our policy is that the plan should be [administered] DO YOU MEAN OVERSEEN? WHO WOULD BE DISINTERESTED OTHER THAN THE INDEPENDENT DIRECTORS, AND THEY SHOULDN'T BE ADMINISTERING. by a committee of [disinterested persons] independent directors; insiders should not serve on compensation committees.

Other factors, such as repricing underwater stock options without shareholder approval, would cause us to vote against a plan. Additionally, in some cases we would vote against a plan deemed unnecessary.

Vote FOR director equity plans that have reasonable costs, as measured by the binomial compensation model. However, for director equity plans that have excessive costs based on the binomial compensation model, we will review the qualitative features of board compensation, taking into account:

- o Director stock ownership guidelines
 - A minimum of three times the annual cash retainer.
- o Vesting schedule or mandatory holding/deferral period
 - A minimum vesting of three years for stock options or restricted stock, or
 - Deferred stock payable at the end of a three-year deferral period.
- o Mix between cash and equity
 - A balanced mix of cash and equity at the time of grant, for example, 40% cash/60% equity or 50% cash/50% equity.
 - If the mix is heavier on the equity component, the vesting schedule or deferral period should be more stringent, with the lesser of five years or the term of directorship.
- o Retirement/Benefit and Perquisites programs
 - No retirement/benefits and perquisites provided to non-employee directors.
- o Quality of disclosure
 - Provide detailed disclosure on cash and equity compensation delivered to each non-employee director for the most recent fiscal year in a table. The column headers for the table may include the following: name of each non-employee director, annual retainer, board meeting fees, committee retainer, committee-meeting fees and equity grants.

To vote FOR director equity plans based on the above qualitative features, a company needs to demonstrate that it meets all of the above qualitative features in its proxy statement.

XII. SOCIAL AND ENVIRONMENTAL ISSUES

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-CSR

In general we ABSTAIN from voting on shareholder social and environmental proposals, on the basis that their impact on share value can rarely be anticipated with any high degree of confidence.

In most cases, however, we vote FOR proposals that seek additional disclosure or reports, particularly when it appears companies have not adequately addressed shareholders' social and environmental concerns.

19

In determining our vote on social and environmental proposals, we also analyze the following factors:

- o whether adoption of the proposal would have either a positive or negative impact on the company's short-term or long-term share value;
- o the percentage of sales, assets and earnings affected;
- o the degree to which the company's stated position on the issues could affect its reputation or sales, or leave it vulnerable to boycott or selective purchasing;
- o whether the issues presented should be dealt with through government or company-specific action;
- o whether the company has already responded in some appropriate manner to the request embodied in a proposal;
- o whether the company's analysis and voting recommendation to shareholders is persuasive;
- o what other companies have done in response to the issue;
- o whether the proposal itself is well framed and reasonable;
- o whether implementation of the proposal would achieve the objectives sought in the proposal; and
- o whether the subject of the proposal is best left to the discretion of the board.

The following list includes some of the social and environmental issues to which this analysis is applied:

- o energy and environment
- o South Africa
- o Northern Ireland
- o military business
- o maquiladora standards and international operations policies
- o world debt crisis
- o equal employment opportunity and discrimination
- o animal rights
- o product integrity and marketing
- o human resources issues

Vote CASE-BY-CASE on proposals requesting reports assessing economic risks of environmental pollution or climate change, taking into account whether the company has clearly disclosed the following in its public documents:

The percentage of revenue derived from international operations, particularly in Europe, where GE products are more regulated and consumer backlash is more pronounced.

Vote CASE-BY-CASE on proposals asking for a report on the feasibility of labeling products containing GE ingredients taking into account:

- o The relevance of the proposal in terms of the company's business and the proportion of it affected by the resolution

- o Company's current disclosure on the feasibility of GE product labeling, including information on the related costs

(a) (3) Portfolio Manager Compensation

As of the most recently completed fiscal year end (November 30, 2006), the compensation paid to Chartwell portfolio managers consists of base salary, annual bonus, ownership distributions, and an annual profit-sharing contribution to Chartwell's retirement plan.

A portfolio manager's fixed base salary is determined by Chartwell's Compensation Committee and is reviewed at least annually. A portfolio manager's experience, historical performance, and role in firm or product team management are the primary considerations in determining the base salary.

Annual bonuses are determined by the Compensation Committee based on a number of factors. The primary factors are investment performance of client portfolios during the calendar year, product profitability, and firm-wide profitability. Investment performance is measured based on the gross (pre-tax) composite performance of all accounts within a particular investment product versus the appropriate benchmark for both 1 year and 3 year periods. The S&P 500 Index and

Merrill Lynch High Yield Cash Pay Index are used as benchmarks for Chartwell Dividend and Income Fund. Portfolio construction, sector and security weighting, and performance are reviewed by the Compliance Committee and Compensation Committee to prevent a manager from taking undue risks. Additional factors used to determine the annual bonus include the portfolio manager's contribution as an analyst, product team management, and contribution to the strategic planning and development of the investment group as well as the firm.

Ownership distributions are paid to a portfolio manager based on the portfolio manager's ownership interest, or percentage limited partnership interest in Chartwell multiplied by total net cash distributions paid during the year.

A profit-sharing contribution is paid to the retirement plan account of all eligible Chartwell employees based solely on annual profitability of the firm.
