QUARTERS ENDED DECEMBER 31, 2012 AND 2011
(UNAUDITED)

NOTE A – Summary of Significant Accounting Policies

The consolidated unaudited interim financial statements included in this report have been prepared by Washington Federal, Inc. (“The Company”). The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America (“GAAP”) requires management to make estimates and assumptions that affect amounts reported in the financial statements. Actual results could differ from these estimates. In the opinion of management, all adjustments (consisting only of normal recurring accruals) necessary for a fair presentation are reflected in the interim financial statements. The September 30, 2012 Consolidated Statement of Financial Condition was derived from audited financial statements.

The information included in this Form 10-Q should be read in conjunction with Company’s 2012 Annual Report on Form 10-K (“2012 Form 10-K”) as filed with the SEC. Interim results are not necessarily indicative of results for a full year.

The significant accounting policies used in preparation of our consolidated financial statements are disclosed in our 2012 Form 10-K. Other than as discussed below, there have not been any material changes in our significant accounting policies compared to those contained in our 2012 Form 10-K.

Off-Balance-Sheet Credit Exposures – The only material off-balance-sheet credit exposures are loans in process and unused lines of credit, which had a combined balance at December 31, 2012, excluding covered loans, of \$252,553,000. The Company estimates losses on off-balance-sheet credit exposures by including the exposures with the related principal balance outstanding and then applying its general reserve methodology.

Certain reclassifications have been made to the financial statements to conform prior periods to current classifications.

NOTE B - Acquisitions

South Valley Bank and Trust

Effective as of the close of business October 31, 2012, Washington Federal completed the acquisition of South Valley Bank and Trust, headquartered in Klamath Falls, Oregon (“South Valley”). The acquisition provided \$383 million of net loans, \$107 million of net covered loans, \$735 million of deposit accounts, including \$533 million in transaction deposit accounts and 24 branch locations in Central and Southern Oregon. Total consideration at closing of \$44 million, including \$33 million of Washington Federal, Inc. stock and \$10 million of cash resulting from the collection of certain earn-out assets. If other earn out assets are collected over time, the total purchase price could be reduced by up to \$14 million.

The acquisition was accounted for under the acquisition method of accounting. The purchased assets and assumed liabilities were recorded at their respective acquisition date estimated fair values. The purchase accounting for acquired assets and liabilities is subject to future adjustment based on the completion of valuations. All fair adjustment amounts currently recognized in the financial statements at December 31, 2012 were determined provisionally as the purchase accounting fair value analysis was incomplete as of December 31, 2012. The determination of whether a loan is impaired and accounted for under ASC 310 was still in process as part of the acquisition date loan valuation; therefore, all loans are categorized as acquired loans without differentiation between non-impaired and credit impaired at December 31, 2012.

Loans that were classified as non-performing loans by South Valley are no longer classified as non-performing because, at acquisition, the carrying value of the loans was adjusted to reflect fair value. Management believes that the new book value reflects an amount that will ultimately be collected.

The operating results of the Company include the operating results produced by the acquired assets and assumed liabilities for the period from November 1, 2012 to December 31, 2012.

The table below displays the amounts recognized as of the acquisition date for each major class of assets acquired and liabilities assumed:

Most loans restructured in troubled debt restructurings ("TDRs") are accruing and performing loans where the borrower has proactively approached the Company about modification due to temporary financial difficulties. Each request is individually evaluated for merit and likelihood of success. The concession for these loans is typically a payment reduction through a rate reduction of between 100 to 200 basis points for a specific term, usually six to twelve months. Interest-only payments may also be approved during the modification period. Principal forgiveness is not an available option for restructured loans. As of December 31, 2012, single-family residential loans comprised 84.0% of TDRs.

NOTE E – Allowance for Losses on Loans

The Company has an asset quality review function that analyzes its loan portfolios and reports the results of the review to the Board of Directors on a quarterly basis. The single-family residential, HELOC and consumer portfolios are evaluated based on their performance as a pool of loans, since no single loan is individually significant or judged by its risk rating, size or potential risk of loss. The construction, land, multi-family, commercial real estate and commercial and industrial loans are risk rated on a loan by loan basis to determine the relative risk inherent in specific borrowers or loans. Based on that risk rating, the loans are assigned a grade and classified as follows:

Pass – the credit does not meet one of the definitions below.

Special mention – A special mention credit is considered to be currently protected from loss but is potentially weak. No loss of principal or interest is foreseen; however, proper supervision and Management attention is required to deter further deterioration in the credit. Assets in this category constitute some undue and unwarranted credit risk but not to the point of justifying a risk rating of substandard. The credit risk may be relatively minor yet constitutes an unwarranted risk in light of the circumstances surrounding a specific asset.

Substandard – A substandard credit is an unacceptable credit. Additionally, repayment in the normal course is in jeopardy due to the existence of one or more well defined weaknesses. In these situations, loss of principal is likely if the weakness is not corrected. A substandard asset is inadequately protected by the current sound worth and paying capacity of the borrower or of the collateral pledged, if any. Assets so classified will have a well defined weakness or weaknesses that jeopardize the liquidation of the debt. Loss potential, while existing in the aggregate amount of substandard assets, does not have to exist in individual assets risk rated substandard.

Doubtful – A credit classified doubtful has all the weaknesses inherent in one classified substandard with the added characteristic that the weakness makes collection or liquidation in full, on the basis of currently existing facts, conditions and values, highly questionable and improbable. The probability of loss is high, but because of certain important and reasonably specific pending factors that may work to the advantage and strengthening of the asset, its classification as an estimated loss is deferred until its more exact status may be determined. Pending factors include proposed merger, acquisition, or liquidation procedures, capital injection, perfecting liens on additional collateral, and refinancing plans.

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 QUARTERS ENDED DECEMBER 31, 2012 AND 2011
 (UNAUDITED)

Loss – Credits classified loss are considered uncollectible and of such little value that their continuance as a bankable asset is not warranted. This classification does not mean that the asset has absolutely no recovery or salvage value, but rather it is not practical or desirable to defer writing off this asset even though partial recovery may be affected in the future. Losses should be taken in the period in which they are identified as uncollectible. Partial charge-off versus full charge-off may be taken if the collateral offers some identifiable protection.

The following table summarizes the activity in the allowance for loan losses for the quarter ended December 31, 2012 and fiscal year ended September 30, 2012:

Quarter Ended December 31, 2012	Beginning Allowance (In thousands)	Charge-offs	Recoveries	Provision & Transfers	Ending Allowance

	\$ 157,160	\$ (84,579)) \$ 14,857	\$ 45,709	\$ 133,147

The Company recorded a \$3,600,000 provision for loan losses during the quarter ended December 31, 2012, while an \$11,210,000 provision was recorded for the same quarter one year ago. Non-performing assets (“NPAs”) amounted to \$264,219,000, or 2.02%, of total assets at December 31, 2012, compared to \$343,665,000, or 2.52%, of total assets one year ago. Acquired loans, including covered loans, are not classified as non-performing loans because, at acquisition, the carrying value of these loans was adjusted to reflect fair value. There was no additional provision for loan losses recorded on acquired or covered loans during the quarter ended December 31, 2012. Non-accrual loans decreased from \$185,783,000 at December 31, 2011, to \$163,116,000 at December 31, 2012, a 12.2% decrease. The

Company had net charge-offs of \$9,920,000 for the quarter ended December 31, 2012, compared with \$13,829,000 of net charge-offs for the same quarter one year ago. A loan is charged-off when the loss is estimable and it is confirmed that the borrower will not be able to meet its contractual obligations. \$115,141,000 of the allowance

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
 NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
 QUARTERS ENDED DECEMBER 31, 2012 AND 2011
 (UNAUDITED)

was calculated under our general allowance methodology and the remaining \$11,686,000 was made up of specific reserves on loans that were deemed to be impaired at December 31, 2012. For the period ending December 31, 2011, \$114,552,000 of the allowance was calculated under the formulas contained in our general allowance methodology and the remaining \$39,988,000 was made up of specific reserves on loans that were deemed to be impaired. The primary reasons for the shift in total allowance allocation from specific reserves to general reserves is due to the Company having already addressed many of the problem loans focused in the speculative construction and land A&D portfolios, combined with an increase in delinquencies and elevated charge-offs in the single family residential portfolio.

The following tables shows a summary of loans collectively and individually evaluated for impairment and the related allocation of general and specific reserves as of December 31, 2012 and September 30, 2012:

December 31, 2012	Loans Collectively Evaluated for Impairment			Loans Individually Evaluated for Impairment

NOTE F – New Accounting Pronouncements

There were no new accounting pronouncements issued since the Company's 2012 Form 10-K was filed.

NOTE G – Fair Value Measurements

U.S. GAAP defines fair value as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. U.S. GAAP also establishes a fair value hierarchy which requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. The standard describes three levels of inputs that may be used to measure fair value:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active exchange markets that the entity has the ability to access as of the measurement date.

Level 2: Significant other observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

We have established and documented the Company's process for determining the fair values of our assets and liabilities, where applicable. Fair value is based on quoted market prices, when available, for identical or similar assets or liabilities. In the absence of quoted market prices, fair value is determined using valuation models or third-party appraisals. The following is a description of the valuation methodologies used to measure and report the fair value of financial assets and liabilities on a recurring or nonrecurring basis:

Measured on a Recurring Basis

Securities

Securities available for sale are recorded at fair value on a recurring basis. Securities at fair value are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under the provisions of the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification are considered a Level 2 input method.

The following table presents the balance of assets measured at fair value on a recurring basis at December 31, 2012:

Table of ContentsWASHINGTON FEDERAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS ENDED DECEMBER 31, 2012 AND 2011
(UNAUDITED)

There were no transfers between, into and/or out of Levels 1, 2 or 3 during the quarter ended December 31, 2012. Measured on a Nonrecurring Basis

Impaired Loans & Real Estate Held for Sale

From time to time, and on a nonrecurring basis, fair value adjustments to collateral-dependent loans and real estate held for sale are recorded to reflect write-downs of principal balances based on the current appraised or estimated value of the collateral. When management determines that the fair value of the collateral or the real estate held for sale requires additional adjustments, either as a result of a non-current appraisal value or when there is no observable market price, the Company classifies the impaired loan or real estate held for sale as Level 3. Level 3 assets recorded at fair value on a nonrecurring basis at December 31, 2012 included loans for which a specific reserve allowance was established or a partial charge-off was recorded based on the fair value of collateral, as well as covered REO and real estate held for sale for which fair value of the properties was less than the cost basis.

Real estate held for sale consists principally of properties acquired through foreclosure.

The following table presents the aggregated balance of assets measured at estimated fair value on a nonrecurring basis through the quarter ended December 31, 2012, and the total losses resulting from those fair value adjustments for the quarter ended December 31, 2012. The following estimated fair values are shown gross of estimated selling costs:

	Through December 31, 2012				Quarter Ended December 31, 2012
	Level 1	Level 2	Level 3	Total	Total Losses
	(In thousands)				
Impaired loans (1)	\$—	\$—	\$21,238	\$21,238	\$9,813
Covered REO (2)	—	—	3,080	3,080	91
Real estate held for sale (2)	—	—	25,426	25,426	7,536
Balance at end of period	\$—	\$—	\$49,744	\$49,744	\$17,440

(1) The losses represents remeasurements of collateral-dependent loans.

(2) The losses represents aggregate writedowns and charge-offs on real estate held for sale.

There were no liabilities carried at fair value, measured on a recurring or nonrecurring basis, at December 31, 2012.

The following describes the process used to value Level 3 assets measured on a nonrecurring basis:

Impaired loans - The Company adjusts the carrying amount of impaired loans when there is evidence of probable loss and the expected fair value of the loan is less than its contractual amount. The amount of the impairment may be determined based on the estimated present value of future cash flows or the fair value of the underlying collateral.

Impaired loans with a specific reserve allowance based on cash flow analysis or the value of the underlying collateral are classified as Level 3 assets.

The evaluations for impairment are prepared by the Problem Loan Review Committee, which is chaired by the Chief Credit Officer and includes the Loan Review manager and Special Credits manager, as well as senior credit officers, division managers and group executives, as applicable. These evaluations are performed in conjunction with the quarterly allowance for loan loss ("ALLL") process.

Applicable loans are evaluated for impairment on a quarterly basis. Loans included in the previous quarter's review are reevaluated and if their values are materially different from the prior quarter evaluation, the underlying information (loan balance and collateral value) are compared. Material differences are evaluated for reasonableness and discussions are held between the relationship manager and their division manager to understand the difference and

determine if any adjustment is necessary. The inputs are developed and substantiated on a quarterly basis, based on current borrower developments, market conditions and collateral values. The following method is used to value impaired loans:

The fair value of the collateral, which may take the form of real estate or personal property, is based on internal estimates, field observations, assessments provided by third-party appraisers and other valuation models. The Company performs or reaffirms valuations of collateral-dependent impaired loans at least annually. Adjustments are

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS ENDED DECEMBER 31, 2012 AND 2011
(UNAUDITED)

made if management believes that more recent information is available and relevant with respect to the fair value of the collateral.

Real estate held for sale ("REO") - These assets are valued based on inputs such as appraisals and third-party price opinions, less estimated selling costs. Assets that are acquired through foreclosure are recorded initially at the lower of the loan balance or fair value at the date of foreclosure. After foreclosure, valuations are updated periodically, and current market conditions may require the assets to be written down further to a new cost basis. The following method is used to value real estate held for sale:

When a loan is reclassified from loan status to real estate held for sale due to the Company taking possession of the collateral, a Special Credits officer, along with the Special Credits manager, obtains a valuation, which may include a third-party appraisal, which is used to establish the fair value of the underlying collateral. The determined fair value, to the extent it does not exceed the carrying value of the loan, becomes the carrying value of the REO asset. In addition to the valuations from independent third-party sources, the carrying balance of REO assets are written down once a bona fide offer is contractually accepted, through execution of a Purchase and Sale Agreement, where the accepted price is lower than the current balance of the particular REO asset. The fair value of REO assets is re-evaluated quarterly and the REO asset is adjusted to reflect the lower of cost or fair value as necessary.

Fair Values of Financial Instruments

U. S. GAAP requires disclosure of fair value information about financial instruments, whether or not recognized on the statement of financial condition, for which it is practicable to estimate those values. Certain financial instruments and all non-financial instruments are excluded from the disclosure requirements. Accordingly, the aggregate fair value estimates presented do not reflect the underlying fair value of the Company. Although management is not aware of any factors that would materially affect the estimated fair value amounts presented below, such amounts have not been comprehensively revalued for purposes of these financial statements since the dates shown, and therefore, estimates of fair value subsequent to those dates may differ significantly from the amounts presented below.

FHLB advances and other borrowings	2	1,880,000	2,105,789	1,880,000	2,110,223

The following methods and assumptions were used to estimate the fair value of financial instruments:

Cash and cash equivalents – The carrying amount of these items is a reasonable estimate of their fair value.

Available-for-sale securities and held-to-maturity securities – Securities at fair value are priced using model pricing based on the securities' relationship to other benchmark quoted prices as provided by an independent third party, and under the provisions of

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES
NOTES TO CONSOLIDATED FINANCIAL STATEMENTS
QUARTERS ENDED DECEMBER 31, 2012 AND 2011
(UNAUDITED)

the Fair Value Measurements and Disclosures topic of the FASB Accounting Standards Codification are considered a Level 2 input method.

Loans receivable and covered loans – For certain homogeneous categories of loans, such as fixed- and variable-rate residential mortgages, fair value is estimated for securities backed by similar loans, adjusted for differences in loan characteristics, using the same methodology described above for AFS and HTM securities. The fair value of other loan types is estimated by discounting the future cash flows and estimated prepayments using the current rates at which similar loans would be made to borrowers with similar credit ratings and for the same remaining term. Some loan types were valued at carrying value because of their floating rate or expected maturity characteristics. Net deferred loan fees are not included in the fair value calculation but are included in the carrying amount.

FDIC indemnification asset – The fair value of the indemnification asset is estimated by discounting the expected future cash flows using the current rates.

FHLB stock – The fair value is based upon the par value of the stock which equates to its carrying value.

Customer accounts – The fair value of demand deposits, savings accounts, and money market accounts is the amount payable on demand at the reporting date. The fair value of fixed-maturity certificates of deposit is estimated by discounting the estimated future cash flows using the rates currently offered for deposits with similar remaining maturities.

FHLB advances and other borrowings – The fair value of FHLB advances and other borrowings is estimated by discounting the estimated future cash flows using rates currently available to the Company for debt with similar remaining maturities.

The following is a reconciliation of amortized cost to fair value of available-for-sale and held-to-maturity securities:

During the period ending December 31, 2012, \$43,899,000 of available-for-sale securities were sold, resulting in a gain of \$0. \$3,500,000 of available-for-sale securities were sold during the period ending December 31, 2011, resulting in a gain of \$0.

Substantially all mortgage-backed securities have contractual due dates that exceed 10 years.

The following table shows the unrealized gross losses and fair value of securities at December 31, 2012, by length of time that individual securities in each category have been in a continuous loss position. Management believes that the declines in fair value of these investments are not an other than temporary impairment.

NOTE H – Covered Assets

Covered assets represent loans and real estate held for sale acquired from the FDIC that are subject to loss sharing agreements and were \$416,624,000 as of December 31, 2012, versus \$317,925,000 as of September 30, 2012.

As of the close of business October 31, 2012, the Company acquired covered assets as part of the South Valley acquisition as described in Note B. The purchase accounting, for acquired assets and liabilities, mainly related to the valuation of the acquired loans, is subject to future adjustment based on the completion of valuations. The carrying balance of acquired covered loans have been included in the following tables; however, the balances are subject to future adjustment based on the completion of the purchase accounting valuations.

Changes in the carrying amount and accretible yield for acquired impaired and non-impaired loans for the quarter ended December 31, 2012 and the fiscal year ended September 30, 2012 were as follows:

December 31, 2012	Acquired Impaired		Acquired Non-impaired	
	Accretible Yield	Carrying Amount of Loans	Accretible Yield	Carrying Amount of Loans
	(In thousands)			
Balance at beginning of period	\$50,902	\$74,953	\$23,789	\$213,423

At December 31, 2012, none of the acquired impaired or non-impaired loans were classified as non-performing assets. Therefore, interest income, through accretion of the difference between the carrying amount of the loans and the expected cash flows, was recognized on all acquired loans.

The outstanding principal balance of acquired loans was \$465,882,000 and \$373,455,000 as of December 31, 2012 and September 30, 2012, respectively. The discount balance related to the acquired loans was \$85,288,000 and \$85,079,000 as of December 31, 2012 and September 30, 2012, respectively.

The following table shows the year to date activity for the FDIC indemnification asset:

PART I – Financial Information

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

FORWARD LOOKING STATEMENTS

In addition to historical information, this Quarterly Report on Form 10-Q includes certain “forward-looking statements,” as defined in the Securities Act of 1933 and the Securities Exchange Act of 1934, based on current management expectations. Actual results could differ materially from those management expectations. Such forward-looking statements include statements regarding the Company’s intentions, beliefs or current expectations as well as the assumptions on which such statements are based. Stockholders and potential stockholders are cautioned that any such forward-looking statements are not guarantees of future performance and involve risks and uncertainties, and that actual results may differ materially from those contemplated by such forward-looking statements. Factors that could cause future results to vary from current management expectations include, but are not limited to: general economic conditions; legislative and regulatory changes, including without limitation the potential effect of the Dodd-Frank Wall Street Reform and Consumer Protection Act and regulations to be promulgated thereunder; monetary fiscal policies of the federal government; changes in tax policies; rates and regulations of federal, state and local tax authorities; changes in interest rates; deposit flows; cost of funds; demand for loan products; demand for financial services; competition; changes in the quality or composition of the Company’s loan and investment portfolios; changes in accounting principles; policies or guidelines and other economic, competitive, governmental and technological factors affecting the Company’s operations, markets, products, services and fees, including without limitation the Bank’s ability to comply in a timely and satisfactory manner with the requirements of the memorandum of understanding entered into with the Office of The Comptroller of the Currency. The Company undertakes no obligation to update or revise any forward-looking statements to reflect changed assumptions, the occurrence of unanticipated events or changes to future operating results over time.

GENERAL

Washington Federal, Inc. (“Company”) is a savings and loan holding company. The Company’s primary operating subsidiary is Washington Federal.

The results discussed below were impacted by the acquisition on close of business October 31, 2012, of South Valley Bank and Trust, headquartered in Klamath Falls, Oregon (“South Valley”). The acquisition provided \$383 million of net loans, \$107 million of net covered loans, \$735 million of deposit accounts, including \$533 million in transaction deposit accounts and 24 branch locations in Central and Southern Oregon. Total consideration at closing of \$44 million, including \$33 million of Washington Federal, Inc. stock and \$10 million of cash resulting from the collection of certain earn-out assets.

The operating results of the Company include the operating results produced by the acquired assets and assumed liabilities for the period from November 1, 2012 to December 31, 2012.

INTEREST RATE RISK

Historically, the Company accepted a higher level of interest rate volatility as a result of its significant holdings of fixed-rate single-family home loans that are longer in term than the characteristics of its primary liabilities of customer accounts and borrowings. Based on Management's assessment of the current interest rate environment, the Company has taken steps, including growing business loans, transaction deposit accounts and extending the maturity on borrowings, to reduce its interest rate risk profile compared to its historical norms.

At December 31, 2012, the Company had approximately \$1.6 billion more liabilities subject to repricing in the next year than assets, which amounted to a negative one-year maturity gap of 12.3% of total assets. This was a Increase from the 10.1% negative gap as of September 30, 2012.

The negative one-year maturity gap described above signifies that assets do not respond as quickly to changes in interest rates as liabilities and net interest income typically declines when interest rates rise and expands when interest rates fall as compared to a portfolio of matched maturities of assets and liabilities.

The potential impact of rising interest rates on net income for one year has also been estimated using a model that is based on account level of detail for loans and deposits. In the event of an immediate and parallel increase of 200 basis points in interest rates, we would expect net interest income to decrease by 1.7%. In the event of a gradual increase from current rates by 200 basis points over a twelve-month period, we would expect a decrease in net interest income of .76%.

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART I – Financial Information

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

This analysis assumes zero balance sheet growth and constant percentage composition of assets and liabilities. It also assumes that loan and deposit prices respond in full to the increase in market rates. Actual results will differ from the assumptions used in this model, as Management monitors and adjusts loan and deposit pricing and the size and composition of the balance sheet to respond to changing interest rates.

The net portfolio value (“NPV”) is the difference between the present value of expected cash flows from interest-earning assets and the present value of expected cash flows from interest-paying liabilities and off-balance-sheet contracts.

The sensitivity of the NPV to changes in interest rates is another measure of interest rate risk. This approach provides a longer term view of interest rate risk as it incorporates all future expected cash flows. In the event of an immediate and parallel increase of 200 basis points in interest rates, the NPV is estimated to decline by \$315 million and the NPV to total assets ratio to decline to 16.14%. As of September 30, 2012 the estimated decrease in NPV in the event of a 200 basis point increase in rates was estimated to decline by \$296 million and the NPV to total assets ratio to decline to 15%.

The interest rate spread increased to 2.83% at December 31, 2012 from 2.80% at September 30, 2012. The spread increased due to a decline in the average rate on customer deposit accounts and borrowings. As of December 31, 2012, the weighted average rate on customer deposit accounts and borrowings decreased by 12 basis points compared to September 30, 2012, while the weighted average rates on earning assets decreased by 9 basis points over the same period.

As of December 31, 2012, the Company had increased total assets by \$633,898,000 from \$12,472,944,000 at September 30, 2012. For the quarter ended December 31, 2012, compared to September 30, 2012, loans (both non-covered and covered) increased \$255,130,000, or 3.3%. To help offset the reduced income from loans, investment securities increased \$437,831,000, or 14.7%. Cash and cash equivalents of \$637,298,000 and stockholders’ equity of \$1,914,678,000 provides management with flexibility in managing interest rate risk going forward.

LIQUIDITY AND CAPITAL RESOURCES

The Company’s net worth at December 31, 2012 was \$1,914,678,000, or 14.61% of total assets. This was an increase of \$14,926,000 from September 30, 2012 when net worth was \$1,899,752,000, or 15.23% of total assets. The Company’s net worth was impacted in the three months ended December 31, 2012 by net income of \$35,282,000, the payment of \$17,250,000 in cash dividends, treasury stock purchases that totaled \$44,747,000, as well as a decrease in other comprehensive income of \$1,667,000.

Management believes this strong net worth position will help the Company manage its interest rate risk and provide the capital support needed for controlled growth in a regulated environment. To be categorized as well capitalized, Washington Federal must maintain minimum total risk-based, Tier 1 risk-based and Tier 1 leverage ratios as set forth in the following table.

	Actual		Capital Adequacy Guidelines		Categorized as Well Capitalized Under Prompt Corrective Action Provisions		
	Capital (In thousands)	Ratio	Capital	Ratio	Capital	Ratio

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART I – Financial Information

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

CHANGES IN FINANCIAL CONDITION

Available-for-sale and held-to-maturity securities: Available-for-sale securities increased \$222,072,000, or 12.5%, during the three months ended December 31, 2012, which included the purchase of \$261,966,000 of available-for-sale securities. There were \$43,899,000 of available-for-sale securities sold during the three months ended December 31, 2012, resulting in no gain or loss. During the same period, there were 264,781,000 of held-to-maturity securities purchased and no sales of held-to-maturity securities. As of December 31, 2012, the Company had net unrealized gains on available-for-sale securities of \$11,639,000, net of tax, which were recorded as part of stockholders’ equity. The Company increased its available-for-sale and held-to-maturity investment portfolios to help offset some of the lost interest income on maturing and prepaying loans and mortgage-backed securities.

Loans receivable: During the three months ended December 31, 2012, the balance of loans receivable increased 2.2% to \$7,614,910,000 compared to \$7,451,998,000 at September 30, 2012. This increase is a result of the acquisition of \$344 million in loans from South Valley offset by declining balances consistent with management’s strategy to reduce the Company’s exposure to land and construction loans and not aggressively compete for 30 year fixed-rate loans at rates below 4%, due to the duration risk associated with such low mortgage rates. Additionally, during the quarter, \$22,762,000 of loans were transferred to REO. If the current low rates on 30 year fixed-rate mortgages persist, management will consider continuing to shrink the Company’s loan portfolio. The following table shows the loan portfolio by category for the last three quarters.

Loan Portfolio by Category *	December 31, 2012		September 30, 2012		June 30, 2012		
Non-Acquired loans	(In thousands)

* Excludes covered loans

Covered loans: As of December 31, 2012, covered loans increased 32.0%, or \$92,218,000, to \$380,594,000, compared to September 30, 2012, due to acquisition of FDIC covered loans as part of the South Valley acquisition described in Note B.

Non-performing assets: Non-performing assets, which excludes discounted acquired assets, decreased during the quarter ended December 31, 2012 to \$264,219,000 from \$272,905,000 at September 30, 2012, a 3.2% decrease. The continued elevated level of NPAs is a result of the significant decline in housing values in the western United States and the national recession over the last three years. Non-performing assets as a percentage of total assets was 2.02% at December 31, 2012 compared to 2.19% at September 30, 2012. This level of NPAs remains significantly higher than the 0.94% average in the Company’s 28+ year history as a public company.

The following table sets forth information regarding restructured and non-accrual loans and REO held by the Company at the dates indicated.

Total non-performing assets	\$264,219		\$272,905		
Total non-performing assets and performing restructured loans as a percentage of total assets	5.05	%	5.42	%	
(1) Restructured loans were as follows:					
Performing	\$397,045	93.6	% \$403,238	93.1	%
Non-accrual *	27,317	6.4	30,040	6.9	
	\$424,362	100	% \$433,278	100	%

*Included in "Total non-accrual loans" above

(2) The Company recognized interest income on nonaccrual loans of approximately \$790,000 in the three months ended December 31, 2012. Had these loans performed according to their original contract terms, the Company would have recognized interest income of approximately \$2,250,000 for the three months ended December 31, 2012.

In addition to the nonaccrual loans reflected in the above table, at December 31, 2012, the Company had \$134,816,000 of loans that were less than 90 days delinquent but which it had classified as substandard for one or more reasons. If these loans were deemed non-performing, the Company's ratio of total NPAs and performing restructured loans as a percent of total assets would have increased to 6.07% at December 31, 2012.

Total REO and REHI (included in real estate held for sale on the Statement of Financial Condition) includes real (3) estate held for sale acquired in settlement of loans or acquired from purchased institutions in settlement of loans.

Excludes covered REO.

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART I – Financial Information

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Restructured single-family residential loans are reserved for under the Company’s general reserve methodology. If any individual loan is significant in balance, the Company may establish a specific reserve as warranted.

Most restructured loans are accruing and performing loans where the borrower has proactively approached the Company about modifications due to temporary financial difficulties. Each request is individually evaluated for merit and likelihood of success. Single-family residential loans comprised 84.0% of restructured loans as of December 31, 2012. The concession for these loans is typically a payment reduction through a rate reduction of from 100 to 200 bps for a specific term, usually six to twelve months. Interest-only payments may also be approved during the modification period.

For commercial loans, six consecutive payments on newly restructured loan terms are required prior to returning the loan to accrual status. In some instances after the required six consecutive payments are made, a management assessment will conclude that collection of the entire principal balance is still in doubt. In those instances, the loan will remain on non-accrual. Homogeneous loans may or may not be on accrual status at the time of restructuring, but all are placed on accrual status upon the restructuring of the loan. Homogeneous loans are restructured only if the borrower can demonstrate the ability to meet the restructured payment terms; otherwise, collection is pursued and the loan remains on non-accrual status until liquidated. If the homogeneous restructured loan does not perform it will be placed in non-accrual status when it is 90 days delinquent.

A loan that defaults and is subsequently modified would impact the Company’s delinquency trend, which is part of the qualitative risk factors component of the general reserve calculation. Any modified loan that re-defaults and is charged-off would impact the historical loss factors component of our general reserve calculation.

Allocation of the allowance for loan losses: The following table shows the allocation of the Company’s allowance for loan losses at the dates indicated.

	December 31, 2012			September 30, 2012		
	Amount (In thousands)	Loans to Total Loans (1)	Coverage Ratio (2)	Amount (In thousands)	Loans to Total Loans (1)	Coverage Ratio (2)

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART I – Financial Information

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

RESULTS OF OPERATIONS

Net Income: The quarter ended December 31, 2012, produced net income of \$35,282,000 compared to \$33,418,000 for the same quarter one year ago. The net income for the quarter ended December 31, 2012 benefited from overall lower credit costs, which included the provision for loan losses, and gains/losses on sales of REO. The provision for loan losses amounted to \$3,600,000 and for the quarter ended December 31, 2012, as compared to \$11,210,000 for the three month period one year ago. See related discussion in “Provision for Loan Losses” section below for reasons for the decrease in the provision for loan losses. In addition, gains/losses recognized on real estate acquired through foreclosure was a net loss of \$3,319,000 for the three months ended December 31, 2012 as compared to net losses of \$10,570,000 for the three month period one year ago.

Net Interest Income: The largest component of the Company’s earnings is net interest income, which is the difference between the interest and dividends earned on loans and other investments and the interest paid on customer deposits and borrowings. Net interest income is impacted primarily by two factors; first, the volume of earning assets and liabilities and second, the rate earned on those assets or the rate paid on those liabilities.

The following table sets forth certain information explaining changes in interest income and interest expense for the periods indicated compared to the same periods one year ago. For each category of interest-earning asset and interest-bearing liability, information is provided on changes attributable to (1) changes in volume (changes in volume multiplied by old rate) and (2) changes in rate (changes in rate multiplied by old volume). The change in interest income and interest expense attributable to changes in both volume and rate has been allocated proportionately to the change due to volume and the change due to rate.

Rate / Volume Analysis:

	Comparison of Quarters Ended		
	12/31/12 and 12/31/11		
	Volume	Rate	Total
	(In thousands)		
Interest income:			
Loans and covered loans	\$ (4,304) \$ (6,332) \$ (10,636
Mortgaged-backed securities	(4,991) (9,573) (14,564
Investments (1)	427	156	583
All interest-earning assets	(8,868) (15,749) (24,617
Interest expense:			
Customer accounts	518	(5,695) (5,177
FHLB advances and other borrowings	(8,240) (2,920) (11,160
All interest-bearing liabilities	(7,722) (8,615) (16,337
Change in net interest income	\$ (1,146) \$ (7,134) \$ (8,280

(1) Includes interest on cash equivalents and dividends on FHLB stock

Provision for Loan Losses: The Company recorded a \$3,600,000 provision for loan losses during the quarter ended December 31, 2012, while a \$11,210,000 provision was recorded for the same quarter one year ago. Non-performing assets amounted to \$264,219,000, or 2.02% , of total assets at December 31, 2012, compared to \$343,665,000, or 2.52%, of total assets one year ago. Non-accrual loans decreased from \$185,783,000 at December 31, 2011, to \$163,116,000 at December 31, 2012, a 12.2% decrease. The Company had net charge-offs of \$9,920,000 for the quarter ended December 31, 2012, compared with \$13,829,000 of net charge-offs for the same quarter one year ago. The decrease in the provision for loan losses is in response to four primary factors: first, the amount of NPA's

improved year-over-year; second, non-accrual loans as a percentage of net loans decreased from 2.38% at December 31, 2011, to 2.14% at December 31, 2012; third, the percentage of loans 30 days or more delinquent decreased from from 3.13% at December 31, 2011, to 2.80% at December 31, 2012; and finally, the Company's exposure in the land A&D and speculative construction portfolios, the source of the majority of losses during this credit cycle, has decreased from a combined 3.7% of the gross loan portfolio at December 31, 2011, to 3.0% at December 31, 2012. Management believes the allowance for loan losses, totaling \$126,827,000, or 1.58% of gross loans is sufficient to absorb estimated losses inherent in the portfolio.

See Note F for further discussion and analysis of the allowance for loan losses for the quarter ended December 31, 2012.

Table of Contents

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART I – Financial Information

Item 2. Management’s Discussion and Analysis of Financial Condition and Results of Operations

Other Income: The quarter ended December 31, 2012 produced total other income of \$4,957,000 compared to \$4,645,000 for the same quarter one year ago, an increase of \$312,000.

Other Expense: The quarter ended December 31, 2012, produced total other expense of \$38,298,000 compared to \$34,363,000 for the same quarter one year ago, a 11.5% increase. The increase in total other expense over the same comparable period one year ago was primarily due to the increase of \$2,397,000 in compensation and benefits, which, for the quarter ended December 31, 2012 included the addition of the employees from the South Valley acquisition as of October 31, 2012 and the Western National Bank transaction with the FDIC in December 2011. Also impacted by these acquisitions were the increases in occupancy expense and other expense of \$515,000 and \$1,874,000 respectively, for the quarter ended December 31, 2012 as compared to the prior year. Total other expense for the quarters ended December 31, 2012 and 2011 equaled 1.20% and 1.01%, respectively, of average assets. The number of staff, including part-time employees on a full-time equivalent basis, was 1,430 and 1,241 at December 31, 2012 and 2011, respectively. FDIC insurance expense decreased to \$3,342,000 for the three months ended December 31, 2012 as compared to \$4,193,000 for the same quarter one year ago. The FDIC instituted a new assessment basis in the fourth quarter of fiscal 2011, which resulted in an overall lower insurance expense for the Company.

Taxes: Income taxes increased to \$19,892,000 for the quarter ended December 31, 2012, as compared to \$18,798,000 for the same period one year ago. The effective tax rate for the quarters ended December 31, 2012 and 2011, was 36.00%. The Company expects an effective tax rate of 36.00% going forward.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Management believes that there have been no material changes in the Company’s quantitative and qualitative information about market risk since September 30, 2012. For a complete discussion of the Company’s quantitative and qualitative market risk, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” in the Company’s 2012 Form 10-K.

(a) Evaluation of Disclosure Controls and Procedures. The Company maintains a set of disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (the "Exchange Act")) that are designed to ensure that information required to be disclosed by the Company in the reports it files or submits under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the Securities and Exchange Commission's rules and forms, and that such information is accumulated and communicated to the Company's management, including the Company’s President and Chief Executive Officer along with the Company’s Executive Vice President and Chief Financial Officer, as appropriate, to allow timely decisions regarding required disclosure. Management has evaluated, with the participation of the Company’s President and Chief Executive Officer, along with the Company’s Executive Vice President and Chief Financial Officer, the effectiveness of the Company’s disclosure controls and procedures as of the end of the period covered by this quarterly report (the "Evaluation Date"). Based on the evaluation, the Company’s President and Chief Executive Officer along with the Company’s Executive Vice President and Chief Financial Officer have concluded that, as of the Evaluation Date, the Company's disclosure controls and procedures are effective.

(b) Changes in Internal Control over Financial Reporting. During the period to which this report relates, there have not been any changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that have materially affected, or that are reasonably likely to materially affect, such controls.

WASHINGTON FEDERAL, INC. AND SUBSIDIARIES

PART II – Other Information

Item 1. Legal Proceedings

From time to time the Company or its subsidiaries are engaged in legal proceedings in the ordinary course of business, none of which are considered to have a material impact on the Company's financial position or results of operations.

Item 1A. Risk Factors

In addition to the other information set forth in this report, you should carefully consider the factors discussed under "Part I--Item 1A--Risk Factors" in our Form 10-K for the year ended September 30, 2012. These factors could materially and adversely affect our business, financial condition, liquidity, results of operations and capital position, and could cause our actual results to differ materially from our historical results or the results contemplated by the forward-looking statements contained in this report.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information with respect to purchases made by or on behalf of the Company of the Company's common stock during the three months ended December 31, 2012.

Period	Total Number of Shares Purchased	Average Price Paid Per Share	Total Number of Shares Purchased as Part of Publicly Announced Plan (1)	Maximum Number of Shares That May Yet Be Purchased Under the Plan at the End of the Period
October 1, 2012 to October 31, 2012	1,100,000	\$16.76	1,100,000	5,088,030
November 1, 2012 to November 30, 2012	1,008,200	16.61	1,008,200	4,079,830
December 1, 2012 to December 31, 2012	587,814	16.27	587,814	3,492,016
Total	2,696,014	\$—	2,696,014	3,492,016

The Company's only stock repurchase program was publicly announced by the Board of Directors on February 3, (1) 1995 and has no expiration date. Under this ongoing program, a total of 31,956,264 shares have been authorized for repurchase.
