**Media Release**

**EU to re-register Chlorothalonil fungicide**

**Basel, Switzerland, 28 February 2005**

Syngenta today announced that the fungicide chlorothalonil has been approved for inclusion in Annex 1 under EU Directive 91/414, which allows for continued registration in EU countries. Chlorothalonil is marketed as a straight product as BRAVO® and in combinations under several brand names including AMISTAR® OPTI and ALTO® ELITE.

This decision ensures that European farmers will retain a very important tool for disease control and particularly for resistance management in cereals and other crops, said John Atkin, Chief Operating Officer of Syngenta Crop Protection.

AMISTAR® OPTI, a combination product containing AMISTAR®, the broadest spectrum cereal fungicide, and BRAVO®, offers farmers a unique solution for combating many diseases including *Septoria*, a serious fungal disease in European cereals, which is developing strains that other treatments do not fully control.

Chlorothalonil is registered in all major regions for fungal disease control in a wide range of crops including cereals, fruit, potatoes, vegetables and turf.

Syngenta is a world-leading agribusiness committed to sustainable agriculture through innovative research and technology. The company is a leader in crop protection, and ranks third in the high-value commercial seeds market. Sales in 2004 were approximately \$7.3 billion. Syngenta employs some 19,000 people in over 90 countries. Syngenta is listed on the Swiss stock exchange (SYNN) and in New York (SYT).
