Operating review

Deposit growth

The Bank has adopted a conscious strategy of focusing on current and savings account deposits and reducing its wholesale term deposit base. Current and savings account deposits increased 16% to Rs. 66,914 crore (US\$ 14.2 billion) at September 30, 2008 from Rs. 57,827 crore (US\$ 12.3 billion) at September 30, 2007. Current and savings account (CASA) deposits constituted 30% of total deposits at September 30, 2008 compared to 25% at September 30, 2007. Total deposits declined marginally on a year-on-year basis due to the reduction in term deposits pursuant to the strategy adopted by the Bank. The Bank has significantly expanded its branch network to expand its reach and further enhance its deposit franchise. At October 22, 2008, the Bank had 1,400 branches and 4,530 ATMs.

Credit growth

Consolidated advances of the Bank and its banking subsidiaries and ICICI Home Finance Company increased 16% to Rs. 264,665 crore (US\$ 56.4 billion) at September 30, 2008 from Rs. 227,583 crore (US\$ 48.5 billion) at September 30, 2007.

- Being the preferred bank for non-resident Indians: The Bank's remittance volumes increased by 38.2% in Q2-2009 to about Rs. 11,946 crore (US\$ 2.5 billion) compared to Q2-2008.

ICICI Bank Canada's capital position continued to be strong with a capital adequacy ratio of 15.4% at September 30, 2008. ICICI Bank Canada's deposit base increased by over CAD 1.0 billion during the quarter to CAD 4.85 billion at September 30, 2008, of which 86% was term deposits.

ICICI Bank UK's profit before mark to market impact and provision on investments was US\$ 43 million for H1-2009. After the required provisioning charge in respect of its investment portfolio (including the mark-to-market impact of credit spread widening during the period), ICICI Bank UK reported a net loss of US\$ 35 million. ICICI Bank UK's capital position continued to be strong with a capital adequacy ratio of 18.4% at September 30, 2008. ICICI Bank UK's deposit base was US\$ 4.9 billion at September 30, 2008, of which 39% was term deposits. At September 30, 2008, ICICI Bank UK had zero net non-performing assets.

The Bank and its subsidiaries have entirely exited their non-India linked credit derivatives portfolio at no incremental loss over and above the provisions already held.

Performance highlights of insurance subsidiaries

ICICI Prudential Life Insurance Company (ICICI Life) increased its overall market share in retail new business weighted received premiums from 12.7% in the year ended March 31, 2008 (FY2008) to 13.7% during April- August 2008. New business weighted received premium increased by 22% in H1-2009 to Rs. 2,650 crore (US\$ 564 million). While ICICI Life's results reduced the consolidated profit after tax of ICICI Bank by Rs. 466 crore (US\$ 99 million) in H1-2009, ICICI Life's unaudited New Business Profit (NBP)² in H1-2009 was Rs. 522 crore (US\$ 111 million). Assets held increased to Rs. 30,107 crore (US\$ 6.4 billion) at September 30, 2008.

ICICI Lombard General Insurance Company (ICICI General) increased its overall market share from 11.9% in FY2008 to 12.5% during April-August 2008. ICICI General's premiums increased 12.2% on a year-on-year basis to Rs. 1,925 crore (US\$ 410 million) in H1-2009.

² Life insurance companies worldwide make accounting losses in initial years due to business set-up and customer acquisition costs in the initial years and reserving for actuarial liability. Further, in India, amortization of acquisition costs is not permitted. These factors have resulted in statutory losses for ICICI Life since the company's inception, as its business has grown rapidly year on year. If properly priced, life insurance policies are profitable over the life of the policy, but at the time of sale, there is a loss on account of non-amortized expenses and commissions, generally termed as new business strain that emerges out of new business written during the year. New Business Profit (NBP) is an alternate measure of the underlying business profitability (as opposed to the statutory profit or loss) and relevant in the case of fast expanding companies like ICICI Life. NBP is the present value of the profits of the new business written during the year. It is based on standard economic and non-economic assumptions including risk discount rates, investment returns, mortality, expenses and persistency assumptions. Disclosure on economic assumptions are available in the annual report for the year ended March 31, 2008.
