Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Fully and Unconditionally Guaranteed by Morgan Stanley

Principal at Risk Securities

The Dual Directional Trigger Participation Securities, or “securities,” are unsecured obligations of Morgan Stanley Finance LLC (“MSFL”) and are fully and unconditionally guaranteed by Morgan Stanley. The securities will pay no interest, do not guarantee any return of principal at maturity and have the terms described in the accompanying product supplement for Participation Securities, index supplement and prospectus, as supplemented or modified by this document. At maturity, if the shares of the iShares® MSCI Emerging Markets ETF, which we refer to as the underlying shares, have **appreciated** in value, investors will receive the stated principal amount of their investment plus upside performance of the underlying shares, subject to the maximum payment at maturity. If the underlying shares have **depreciated** in value but by no more than 25%, investors will receive the stated principal amount of their investment plus a positive return equal to the absolute value of the percentage decline, which will effectively be limited to a positive 25% return. However, if the underlying shares have **depreciated** in value by more than 25%, investors will be exposed to the full amount of the percentage decline in the underlying shares and will lose 1% of the stated principal amount for every 1% of decline, without any buffer. Under these circumstances, the payment at maturity will be less than \$750 per security, and could be zero. The securities are for investors who seek an equity fund-based return and who are willing to risk their principal and forgo current income and upside above the maximum

payment at maturity in exchange for the absolute return feature that applies to a limited range of performance of the underlying shares. **There is no minimum payment at maturity on the securities. Accordingly, investors may lose their entire initial investment in the securities.** The securities are notes issued as part of MSFL's Series A Global Medium-Term Notes program.

The securities differ from the Participation Securities described in the accompanying product supplement for Participation Securities in that the securities offer the potential for a positive return at maturity if the underlying shares depreciate by up to 25%. The securities are not the Buffered Participation Securities described in the accompanying product supplement for Participation Securities. Unlike the Buffered Participation Securities, the securities do not provide any protection if the underlying shares depreciate by more than 25%.

All payments are subject to our credit risk. If we default on our obligations, you could lose some or all of your investment. These securities are not secured obligations and you will not have any security interest in, or otherwise have any access to, any underlying reference asset or assets.

FINAL TERMS

Issuer: Morgan Stanley Finance LLC
Guarantor: Morgan Stanley
Maturity date: November 19, 2021
Valuation date: November 16, 2021, subject to postponement for non-trading days and certain market disruption events

Underlying shares: Shares of the iShares® MSCI Emerging Markets ETF (the "Fund")

Aggregate principal amount: \$1,200,000

If the final share price is *greater than* the initial share price:

$\$1,000 + (\$1,000 \times \text{share percent change})$, subject to the maximum payment at maturity

In no event will the payment at maturity exceed the maximum payment at maturity.

If the final share price is *less than or equal to* the initial share price but is *greater than or equal to* the trigger level:

$\$1,000 + (\$1,000 \times \text{absolute share return})$

Payment at maturity: *In this scenario, you will receive a 1% positive return on the securities for each 1% negative return on the underlying shares. In no event will this amount exceed the stated principal amount plus \$250 per security.*

If the final share price is *less than* the trigger level:

$\$1,000 \times \text{share performance factor}$

Under these circumstances, the payment at maturity will be less than the stated principal amount of \$1,000, and will represent a loss of more than 25%, and possibly all, of your investment.

Maximum payment at maturity: \$1,556.70 per security (155.67% of the stated principal amount)

Share percent change: $(\text{final share price} - \text{initial share price}) / \text{initial share price}$

Absolute share return: The absolute value of the share percent change. For example, a -5% share percent change will result in a +5% absolute share return.

Share performance factor: final share price / initial share price

Initial share price: \$40.90, which is the closing price of one underlying share on the pricing date.

Final share price: The closing price of one underlying share on the valuation date *times* the adjustment factor on such date

Adjustment factor: 1.0, subject to adjustment in the event of certain events affecting the underlying shares

Trigger level: \$30.675, which is 75% of the initial share price

Stated principal amount / Issue price: \$1,000 per security (see “Commissions and issue price” below)

Pricing date: November 16, 2018

Original issue date: November 21, 2018 (3 business days after the pricing date)

CUSIP / ISIN: 61768DRR8 / US61768DRR88

Listing: The securities will not be listed on any securities exchange.
Morgan Stanley & Co. LLC (“MS & Co.”), an affiliate of MSFL and a wholly owned subsidiary of Morgan Stanley. See “Supplemental information regarding plan of distribution; conflicts of interest.”

Agent:

Estimated value on the pricing date: \$957.60 per security. See “Investment Summary” beginning on page 2.

Commissions and issue price:	Price to public Agent’s commissions⁽¹⁾	Proceeds to us⁽²⁾
Per security	\$1,000	\$31.50
Total	\$1,200,000	\$37,800
		\$968.50
		\$1,162,200

Selected dealers and their financial advisors will collectively receive from the agent, MS & Co., a fixed sales commission of \$31.50 for each security they sell. See “Supplemental information regarding plan of distribution; conflicts of interest.” For additional information, see “Plan of Distribution (Conflicts of Interest)” in the accompanying product supplement for Participation Securities.

(2) See “Use of proceeds and hedging” on page 16.

The securities involve risks not associated with an investment in ordinary debt securities. See “Risk Factors” beginning on page 6.

The securities and Exchange Commission and state securities regulators have not approved or disapproved these securities, or determined if this document or the accompanying product supplement, index supplement and prospectus is truthful or complete. Any representation to the contrary is a criminal offense.

The securities are not deposits or savings accounts and are not insured by the Federal Deposit Insurance Corporation or any other governmental agency or instrumentality, nor are they obligations of, or guaranteed by, a bank.

You should read this document together with the related product supplement, index supplement and prospectus, each of which can be accessed via the hyperlinks below. Please also see “Additional Information About the securities” at the end of this document.

As used in this document, “we,” “us” and “our” refer to Morgan Stanley or MSFL, or Morgan Stanley and MSFL collectively, as the context requires.

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Investment Summary

Trigger Performance Leveraged Upside Securities

The Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021 (the “securities”) can be used:

§ To achieve similar levels of upside exposure to the underlying shares as a direct investment, subject to the maximum payment at maturity

§ To obtain a positive return equal to the absolute share return for a limited range of negative performance of the underlying shares.

§ To provide limited protection against a loss of principal in the event of a decline of the underlying shares as of the valuation date but only if the final share price is greater than or equal to the trigger level

Maturity: Approximately 3 years
Maximum payment at maturity: \$1,556.70 per security (155.67% of the stated principal amount)
Minimum payment at maturity: None. Investors may lose their entire initial investment in the securities.
Trigger level: 75% of the initial share price
Interest: None
Listing: The securities will not be listed on any securities exchange

The original issue price of each security is \$1,000. This price includes costs associated with issuing, selling, structuring and hedging the securities, which are borne by you, and, consequently, the estimated value of the securities on the pricing date is less than \$1,000. We estimate that the value of each security on the pricing date is \$957.60.

What goes into the estimated value on the pricing date?

In valuing the securities on the pricing date, we take into account that the securities comprise both a debt component and a performance-based component linked to the underlying shares. The estimated value of the securities is determined using our own pricing and valuation models, market inputs and assumptions relating to the underlying shares, instruments based on the underlying shares, volatility and other factors including current and expected interest rates, as well as an interest rate related to our secondary market credit spread, which is the implied interest rate at which our conventional fixed rate debt trades in the secondary market.

What determines the economic terms of the securities?

In determining the economic terms of the securities, including the the trigger level and the maximum payment at maturity, we use an internal funding rate, which is likely to be lower than our secondary market credit spreads and therefore advantageous to us. If the issuing, selling, structuring and hedging costs borne by you were lower or if the internal funding rate were higher, one or more of the economic terms of the securities would be more favorable to you.

What is the relationship between the estimated value on the pricing date and the secondary market price of the securities?

The price at which MS & Co. purchases the securities in the secondary market, absent changes in market conditions, including those related to the underlying shares, may vary from, and be lower than, the estimated value on the pricing date, because the secondary market price takes into account our secondary market credit spread as well as the bid-offer spread that MS & Co. would charge in a secondary market transaction of this type and other factors. However, because the costs associated with issuing, selling, structuring and hedging the securities are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the securities in the secondary market, absent changes in market conditions, including those related to the underlying shares, and to our secondary market credit spreads, it would do so based on values higher than the estimated value. We expect that those higher values will also be reflected in your brokerage account statements.

MS & Co. may, but is not obligated to, make a market in the securities, and, if it once chooses to make a market, may cease doing so at any time.

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

Key Investment Rationale

The securities offer the potential for a positive return at maturity based on the absolute value of a limited range of percentage changes of the underlying shares. At maturity, if the underlying shares have **appreciated** in value, investors will receive the stated principal amount of their investment plus upside performance of the underlying shares, subject to the maximum payment at maturity. If the underlying shares have **depreciated** in value but by no more than 25%, investors will receive the stated principal amount of their investment plus a positive return equal to the absolute value of the percentage decline, which will effectively be limited to a positive 25% return. However, if the underlying shares have **depreciated** by more than 25%, investors will be exposed to the full amount of the percentage decline in the underlying shares and will lose 1% of the stated principal amount for every 1% of decline, without any buffer. **There is no minimum payment at maturity on the securities. Accordingly, investors may lose their entire initial investment in the securities.** All payments on the securities are subject to our credit risk.

Absolute Return Feature	The securities enable investors to obtain a positive return equal to the absolute share return if the final share price is less than the initial share price but is greater than or equal to the trigger level.
Upside Scenario if the Underlying Shares Appreciate	The final share price is greater than the initial share price, and, at maturity, you receive a full return of principal as well as 100% of the increase in the value of the underlying shares, subject to the maximum payment at maturity. For example, if the final share price is 10% greater than the initial share price, the securities will provide a total return of 10% at maturity. The maximum payment at maturity will be \$1,556.70 per security (155.67% of the stated principal amount). The final share price is less than or equal to the initial share price but is greater than or equal to the trigger level, which is 75% of the initial share price. In this case, you receive a 1% positive return
Absolute Return Scenario	on the securities for each 1% negative return on the underlying shares. For example, if the final share price is 10% less than the initial share price, the securities will provide a total positive return of 10% at maturity. The maximum return you may receive in this scenario is a positive 25% return at maturity. The final share price is less than the trigger level. In this case, the securities redeem for 25% less than the stated principal amount, and this decrease will be by an amount proportionate to the decline in the value of the underlying shares over the term of the securities. Under these circumstances, the payment at maturity will be less than \$750 per security. For example, if the final share price is 35% less than the initial share price, the securities will be redeemed at maturity for a loss of 35% of principal at \$650, or 65% of the stated principal amount. There is no minimum payment at maturity on the securities, and you could lose your entire investment.
Downside Scenario

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

How it works

Upside Scenario if the Underlying Shares Appreciate. If the final share price is greater than the initial share price, the investor would receive the \$1,000 stated principal amount plus 100% of the appreciation of the underlying § shares over the term of the securities, subject to the maximum payment at maturity. Under the terms of the securities, an investor would realize the maximum payment at maturity of \$1,556.70 per security (155.67% of the stated principal amount) at a final share price of 155.67% of the initial share price.

§ If the underlying shares appreciate 5%, the investor would receive a 5% return, or \$1,050 per security.

§ If the underlying shares appreciate 70%, the investor would receive only a 55.67% return, or \$1,556.70 per security, § due to the maximum payment at maturity.

Absolute Return Scenario. If the final share price is less than or equal to the initial share price and is greater than § or equal to the trigger level of 75% of the initial share price, the investor would receive a 1% positive return on the securities for each 1% negative return on the underlying shares.

§ If the underlying shares depreciate 10%, the investor would receive a 10% return, or \$1,100 per security.

§ The maximum return you may receive in this scenario is a positive 25% return at maturity, or \$1,250 per security.

Downside Scenario. If the final share price is less than the trigger level of 75% of the initial share price, the § investor would receive an amount that is significantly less than the \$1,000 stated principal amount, based on a 1% § loss of principal for each 1% decline in the underlying shares. Under these circumstances, the payment at maturity will be less than \$750 per security. There is no minimum payment at maturity on the securities.

§ If the underlying shares depreciate 30%, the investor would lose 30% of the investor's principal and receive only § \$700 per security at maturity, or 70% of the stated principal amount.

Principal at Risk Securities

Risk Factors

The following is a non-exhaustive list of certain key risk factors for investors in the securities. For further discussion of these and other risks, you should read the section entitled “Risk Factors” in the accompanying product supplement for Participation Securities, index supplement and prospectus. You should also consult with your investment, legal, tax, accounting and other advisors in connection with your investment in the securities.

The securities do not pay interest or guarantee return of any principal. The terms of the securities differ from those of ordinary debt securities in that the securities do not pay interest or guarantee the payment of any principal at maturity. If the final share price is less than the trigger level (which is 75% of the initial share price), the absolute return feature will no longer be available and the payout at maturity will be an amount in cash that is at least 25% § less than the \$1,000 stated principal amount of each security, and this decrease will be by an amount proportionate to the full decrease in the price of the underlying shares over the term of the securities, without any buffer. There is no minimum payment at maturity on the securities, and, accordingly, you could lose your entire initial investment in the securities.

The appreciation potential of the securities is limited by the maximum payment at maturity. The appreciation potential of the securities is limited by the maximum payment at maturity of \$1,556.70 per security, or 155.67% of § the stated principal amount. Because the payment at maturity will be limited to 155.67% of the stated principal amount for the securities, any increase in the final share price over the initial share price by more than 55.67% of the initial share price will not further increase the return on the securities.

The market price of the securities will be influenced by many unpredictable factors. Several factors, many of which are beyond our control, will influence the value of the securities in the secondary market and the price at which MS & Co. may be willing to purchase or sell the securities in the secondary market, including the trading price (including whether the trading price is at or below the trigger level), volatility (frequency and magnitude of changes in value) and dividends of the underlying shares and of the stocks composing the share underlying index (the index which the underlying shares seek to track), interest and yield rates in the market, time remaining until the securities mature, geopolitical conditions and economic, financial, political and regulatory or judicial events that § affect the underlying shares or equities markets generally and which may affect the final share price of the underlying shares, the occurrence of certain events affecting the underlying shares that may or may not require an adjustment to the adjustment factor, and any actual or anticipated changes in our credit ratings or credit spreads. The price of the underlying shares may be, and has recently been, volatile, and we can give you no assurance that the volatility will lessen. See “iShare® MSCI Emerging Markets ETF Overview” below. You may receive less, and possibly significantly less, than the stated principal amount per security if you try to sell your securities prior to maturity.

The price of the underlying shares is subject to currency exchange risk. Because the price of the underlying shares is related to the U.S. dollar value of stocks underlying the MSCI Emerging Markets IndexSM (the “share underlying index”), holders of the securities will be exposed to currency exchange rate risk with respect to each of the currencies in which such component securities trade. Exchange rate movements for a particular currency are volatile and are the result of numerous factors including the supply of, and the demand for, those currencies, as well as relevant government policy, intervention or actions, but are also influenced significantly from time to time by political or economic developments, and by macroeconomic factors and speculative actions related to the relevant region. An investor’s net exposure will depend on the extent to which the currencies of the component securities strengthen or weaken against the U.S. dollar and the relative weight of each currency. If, taking into account such weighting, the dollar strengthens against the currencies of the component securities represented in the MSCI Emerging Markets IndexSM, the price of the underlying shares will be adversely affected and the payment at maturity on the securities may be reduced.

Of particular importance to potential currency exchange risk are:

- existing and expected rates of inflation;
- existing and expected interest rate levels;
- the balance of payments; and

the extent of governmental surpluses or deficits in the countries represented in the MSCI Emerging Markets IndexSM and the United States.

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

All of these factors are in turn sensitive to the monetary, fiscal and trade policies pursued by the governments of various countries represented in the MSCI Emerging Markets IndexSM and the United States and other countries important to international trade and finance.

There are risks associated with investments in securities, such as the securities, linked to the value of foreign (and especially emerging markets) equity securities. The underlying shares track the performance of the MSCI Emerging Markets IndexSM, which is linked to the value of foreign (and especially emerging markets) equity securities. Investments in securities linked to the value of foreign equity securities involve risks associated with the securities markets in those countries, including risks of volatility in those markets, governmental intervention in those markets and cross-shareholdings in companies in certain countries. Also, there is generally less publicly available information about foreign companies than about U.S. companies that are subject to the reporting requirements of the Securities and Exchange Commission, and foreign companies are subject to accounting, auditing and financial reporting standards and requirements different from those applicable to U.S. reporting companies. The prices of securities issued in foreign markets may be affected by political, economic, financial and social factors in those countries, or global regions, including changes in government, economic and fiscal policies and currency exchange laws. In addition, the stocks included in the MSCI Emerging Markets IndexSM and that are generally tracked by the underlying shares have been issued by companies in various emerging markets countries, which pose further risks in addition to the risks associated with investing in foreign equity markets generally. Countries with emerging markets may have relatively unstable governments, may present the risks of nationalization of businesses, restrictions on foreign ownership and prohibitions on the repatriation of assets, and may have less protection of property rights than more developed countries. The economies of countries with emerging markets may be based on only a few industries, may be highly vulnerable to changes in local or global trade conditions, and may suffer from extreme and volatile debt burdens or inflation rates. Local securities markets may trade a small number of securities and may be unable to respond effectively to increases in trading volume, potentially making prompt liquidation of holdings difficult or impossible at times. Moreover, the economies in such countries may differ unfavorably from the economy in the United States in such respects as growth of gross national product, rate of inflation, capital reinvestment, resources, self-sufficiency and balance of payment positions.

The securities are subject to our credit risk, and any actual or anticipated changes to our credit ratings or credit spreads may adversely affect the market value of the securities. You are dependent on our ability to pay all amounts due on the securities at maturity and therefore you are subject to our credit risk. If we default on our obligations under the securities, your investment would be at risk and you could lose some or all of your investment. As a result, the market value of the securities prior to maturity will be affected by changes in the market's view of our creditworthiness. Any actual or anticipated decline in our credit ratings or increase in the credit spreads charged by the market for taking our credit risk is likely to adversely affect the market value of the securities.

§ **As a finance subsidiary, MSFL has no independent operations and will have no independent assets.** As a finance subsidiary, MSFL has no independent operations beyond the issuance and administration of its securities and will have no independent assets available for distributions to

holders of MSFL securities if they make claims in respect of such securities in a bankruptcy, resolution or similar proceeding. Accordingly, any recoveries by such holders will be limited to those available under the related guarantee by Morgan Stanley and that guarantee will rank *pari passu* with all other unsecured, unsubordinated obligations of Morgan Stanley. Holders will have recourse only to a single claim against Morgan Stanley and its assets under the guarantee. Holders of securities issued by MSFL should accordingly assume that in any such proceedings they would not have any priority over and should be treated *pari passu* with the claims of other unsecured, unsubordinated creditors of Morgan Stanley, including holders of Morgan Stanley-issued securities.

Investing in the securities is not equivalent to investing in the underlying shares or the stocks composing the share underlying index. Investing in the securities is not equivalent to investing in the underlying shares, the share § underlying index or the stocks that constitute the share underlying index. Investors in the securities will not have voting rights or rights to receive dividends or other distributions or any other rights with respect to the underlying shares or the stocks that constitute the share underlying index.

Adjustments to the underlying shares or to the share underlying index could adversely affect the value of the securities. The investment adviser to the Fund, BlackRock Fund Advisors (the “Investment Adviser”), seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the share underlying index. Pursuant to its investment strategy or otherwise, the Investment Adviser may add, delete or § substitute the stocks composing the Fund. Any of these actions could adversely affect the price of the underlying shares and, consequently, the value of the securities. MSCI Inc. (“MSCI”) is responsible for calculating and maintaining the share underlying index. MSCI may add, delete or substitute the stocks constituting the share underlying index or make other methodological

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

changes that could change the value of the share underlying index. MSCI may discontinue or suspend calculation or publication of the share underlying index at any time. In these circumstances, the calculation agent will have the sole discretion to substitute a successor index that is comparable to the discontinued share underlying index and is permitted to consider indices that are calculated and published by the calculation agent or any of its affiliates. Any of these actions could adversely affect the value of the underlying shares, and consequently, the value of the securities.

The performance and market price of the Fund, particularly during periods of market volatility, may not correlate with the performance of the share underlying index, the performance of the component securities of the share underlying index or the net asset value per share of the Fund. The Fund does not fully replicate the share underlying index and may hold securities that are different than those included in the share underlying index. In addition, the performance of the Fund will reflect additional transaction costs and fees that are not § included in the calculation of the share underlying index. All of these factors may lead to a lack of correlation between the performance of the Fund and the share underlying index. In addition, corporate actions (such as mergers and spin-offs) with respect to the equity securities underlying the Fund may impact the variance between the performances of the Fund and the share underlying index. Finally, because the shares of the Fund are traded on an exchange and are subject to market supply and investor demand, the market price of one share of the Fund may differ from the net asset value per share of the Fund.

In particular, during periods of market volatility, or unusual trading activity, trading in the securities underlying the Fund may be disrupted or limited, or such securities may be unavailable in the secondary market. Under these circumstances, the liquidity of the Fund may be adversely affected, market participants may be unable to calculate accurately the net asset value per share of the Fund, and their ability to create and redeem shares of the Fund may be disrupted. Under these circumstances, the market price of shares of the Fund may vary substantially from the net asset value per share of the Fund or the level of the share underlying index.

For all of the foregoing reasons, the performance of the Fund may not correlate with the performance of the share underlying index, the performance of the component securities of the share underlying index or the net asset value per share of the Fund. Any of these events could materially and adversely affect the price of the shares of the Fund and, therefore, the value of the securities. Additionally, if market volatility or these events were to occur on the valuation date, the calculation agent would maintain discretion to determine whether such market volatility or events have caused a market disruption event to occur, and such determination would affect the payment at maturity of the securities. If the calculation agent determines that no market disruption event has taken place, the payment at maturity would be based solely on the published closing price per share of the Fund on the valuation date, even if the Fund's shares are underperforming the share underlying index or the component securities of the share underlying index and/or trading below the net asset value per share of the Fund.

The amount payable on the securities is not linked to the price of the underlying shares at any time other than the valuation date. The final share price will be based on the closing price of one underlying share on the valuation date, subject to postponement for non-trading days and certain market disruption events. Even if the price of the underlying shares appreciates prior to the valuation date but then drops by the valuation date, the payment at maturity will be less, and may be significantly less, than it would have been had the payment at maturity been linked to the price of the underlying shares prior to such drop. Although the actual price of the underlying shares on the stated maturity date or at other times during the term of the securities may be higher than the final share price, the payment at maturity will be based solely on the closing price of one underlying share on the valuation date.

The rate we are willing to pay for securities of this type, maturity and issuance size is likely to be lower than the rate implied by our secondary market credit spreads and advantageous to us. Both the lower rate and the inclusion of costs associated with issuing, selling, structuring and hedging the securities in the original issue price reduce the economic terms of the securities, cause the estimated value of the securities to be less than the original issue price and will adversely affect secondary market prices. Assuming no change in market conditions or any other relevant factors, the prices, if any, at which dealers, including MS & Co., may be willing to purchase the securities in secondary market transactions will likely be significantly lower than the original issue price, because secondary market prices will exclude the issuing, selling, structuring and hedging-related costs that are included in the original issue price and borne by you and because the secondary market prices will reflect our secondary market credit spreads and the bid-offer spread that any dealer would charge in a secondary market transaction of this type as well as other factors.

The inclusion of the costs of issuing, selling, structuring and hedging the securities in the original issue price and the lower rate we are willing to pay as issuer make the economic terms of the securities less favorable to you than they otherwise would be.

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

However, because the costs associated with issuing, selling, structuring and hedging the securities are not fully deducted upon issuance, for a period of up to 6 months following the issue date, to the extent that MS & Co. may buy or sell the securities in the secondary market, absent changes in market conditions, including those related to the underlying shares, and to our secondary market credit spreads, it would do so based on values higher than the estimated value, and we expect that those higher values will also be reflected in your brokerage account statements.

The estimated value of the securities is determined by reference to our pricing and valuation models, which may differ from those of other dealers and is not a maximum or minimum secondary market price. These pricing and valuation models are proprietary and rely in part on subjective views of certain market inputs and certain assumptions about future events, which may prove to be incorrect. As a result, because there is no market-standard way to value these types of securities, our models may yield a higher estimated value of the securities than those § generated by others, including other dealers in the market, if they attempted to value the securities. In addition, the estimated value on the pricing date does not represent a minimum or maximum price at which dealers, including MS & Co., would be willing to purchase your securities in the secondary market (if any exists) at any time. The value of your securities at any time after the date of this document will vary based on many factors that cannot be predicted with accuracy, including our creditworthiness and changes in market conditions. See also “The market price of the securities will be influenced by many unpredictable factors” above.

The antidilution adjustments the calculation agent is required to make do not cover every event that could affect the underlying shares. MS & Co., as calculation agent, will adjust the adjustment factor for certain events § affecting the underlying shares. However, the calculation agent will not make an adjustment for every event that could affect the underlying shares. If an event occurs that does not require the calculation agent to adjust the adjustment factor, the market price of the securities may be materially and adversely affected.

The securities will not be listed on any securities exchange and secondary trading may be limited. The securities will not be listed on any securities exchange. Therefore, there may be little or no secondary market for the securities. MS & Co. may, but is not obligated to, make a market in the securities and, if it once chooses to make a market, may cease doing so at any time. When it does make a market, it will generally do so for transactions of routine secondary market size at prices based on its estimate of the current value of the securities, taking into account its bid/offer spread, our credit spreads, market volatility, the notional size of the proposed sale, the cost of unwinding § any related hedging positions, the time remaining to maturity and the likelihood that it will be able to resell the securities. Even if there is a secondary market, it may not provide enough liquidity to allow you to trade or sell the securities easily. Since other broker-dealers may not participate significantly in the secondary market for the securities, the price at which you may be able to trade your securities is likely to depend on the price, if any, at which MS & Co. is willing to transact. If, at any time, MS & Co. were to cease making a market in the securities, it is likely that there would be no secondary market for the securities. Accordingly, you should be willing to hold your securities to maturity.

§

The calculation agent, which is a subsidiary of Morgan Stanley and an affiliate of MSFL, will make determinations with respect to the securities. As calculation agent, MS & Co. has determined the initial share price and the trigger level, will determine the final share price, including whether the share price has decreased to below the trigger level, and will calculate the amount of cash, if any, you will receive at maturity. Moreover, certain determinations made by MS & Co., in its capacity as calculation agent, may require it to exercise discretion and make subjective judgments, such as with respect to the occurrence or non-occurrence of market disruption events and the selection of a successor index or calculation of the final share price in the event of a discontinuance of the underlying shares or a market disruption event. These potentially subjective determinations may adversely affect the payout to you at maturity, if any. For further information regarding these types of determinations, see “Description of Participation Securities—Postponement of Valuation Date(s),” “—Discontinuance of Any ETF Shares and/or Share Underlying Index; Alteration of Method of Calculation,” “—Alternate Exchange Calculation in case of an Event of Default” and “—Calculation Agent and Calculations” in the accompanying product supplement. In addition, MS & Co. has determined the estimated value of the securities on the pricing date.

Hedging and trading activity by our affiliates could potentially adversely affect the value of the securities. One or more of our affiliates and/or third-party dealers have carried out, and will continue to carry out, hedging activities related to the securities (and to other instruments linked to the underlying shares or the share underlying index), including trading in the underlying shares and in other instruments related to the underlying shares or the share underlying index. As a result, these entities may be unwinding or adjusting hedge positions § during the term of the securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. Some of our affiliates also trade the underlying shares or the stocks that constitute the share underlying index and other financial instruments related to the share underlying index on a regular basis as part of their general broker-dealer and other businesses. Any of these hedging or trading activities on or prior to the pricing date could have increased the initial share

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

price, and, therefore, could have increased the price at or above which the underlying shares must close on the valuation date so that investors do not suffer a significant loss on their initial investment in the securities. Additionally, such hedging or trading activities during the term of the securities, including on the valuation date, could adversely affect the closing price of the underlying shares on the valuation date, and, accordingly, the amount of cash an investor will receive at maturity, if any.

The U.S. federal income tax consequences of an investment in the securities are uncertain. Please read the discussion under “Additional provisions—Tax considerations” in this document and the discussion under “United States Federal Taxation” in the accompanying product supplement for participation securities (together, the “Tax Disclosure Sections”) concerning the U.S. federal income tax consequences of an investment in the securities. As discussed in the Tax Disclosure Sections, there is a substantial risk that the “constructive ownership” rule could apply, in which case all or a portion of any long-term capital gain recognized by a U.S. Holder could be recharacterized as ordinary income and an interest charge could be imposed. If the Internal Revenue Service (the “IRS”) were successful in asserting an alternative treatment, the timing and character of income on the securities might differ significantly from the tax treatment described in the Tax Disclosure Sections. For example, under one possible treatment, the IRS § could seek to recharacterize the securities as debt instruments. In that event, U.S. Holders would be required to accrue into income original issue discount on the securities every year at a “comparable yield” determined at the time of issuance and recognize all income and gain in respect of the securities as ordinary income. Additionally, as discussed under “United States Federal Taxation—FATCA” in the accompanying product supplement for participation securities, the withholding rules commonly referred to as “FATCA” would apply to the securities if they were recharacterized as debt instruments. The risk that financial instruments providing for buffers, triggers or similar downside protection features, such as the securities, would be recharacterized as debt is greater than the risk of recharacterization for comparable financial instruments that do not have such features. We do not plan to request a ruling from the IRS regarding the tax treatment of the securities, and the IRS or a court may not agree with the tax treatment described in the Tax Disclosure Sections.

In 2007, the U.S. Treasury Department and the IRS released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, as discussed in this document. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect. Both U.S. and Non-U.S. Holders should consult their tax advisers regarding the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the potential application of the constructive ownership rule, the issues presented by this notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

iShares® MSCI Emerging Markets ETF Overview

The iShares® MSCI Emerging Markets ETF is an exchange-traded fund that seeks investment results that correspond generally to the price and yield performance, before fees and expenses, of the MSCI Emerging Markets IndexSM. The iShares® MSCI Emerging Markets ETF is managed by iShares®, Inc. (“iShares”), a registered investment company that consists of numerous separate investment portfolios, including the iShares® MSCI Emerging Markets ETF. Information provided to or filed with the Securities and Exchange Commission (the “Commission”) by iShares pursuant to the Securities Act of 1933 and the Investment Company Act of 1940 can be located by reference to Commission file numbers 033-97598 and 811-09102, respectively, through the Commission’s website at www.sec.gov. In addition, information may be obtained from other publicly available sources. **Neither the issuer nor the agent makes any representation that any such publicly available information regarding the iShares® MSCI Emerging Markets ETF is accurate or complete.**

Information as of market close on November 16, 2018:

Ticker Symbol:	EEM UP	52 Week High (on 1/26/2018):	\$52.08
Current Share Price:	\$40.90	52 Week Low (on 10/29/2018):	\$38.00
52 Weeks Ago:	\$46.59		

The following graph sets forth the daily closing values of the underlying shares for the period from January 1, 2013 through November 16, 2018. The related table sets forth the published high and low closing prices, as well as the end-of-quarter closing prices, of the underlying shares for each quarter in the same period. The closing price of the underlying shares on November 16, 2018 was \$40.90. We obtained the information in the table and graph below from Bloomberg Financial Markets, without independent verification. The historical closing prices of the underlying shares should not be taken as an indication of future performance, and no assurance can be given as to the closing price of the underlying shares on the valuation date.

This document relates only to the securities referenced hereby and does not relate to the underlying shares. We have derived all disclosures contained in this document regarding iShares from the publicly available documents described above. In connection with the offering of the securities, neither we nor the agent has participated in the preparation of such documents or made any due diligence inquiry with respect to iShares. Neither we nor the agent makes any representation that such publicly available documents or any other publicly available information regarding iShares is accurate or complete. Furthermore, we cannot give any assurance that all events occurring prior to the date hereof (including events that would affect the accuracy or completeness of the publicly available documents described above) that would affect the trading price of the underlying shares (and therefore the price of the underlying shares at the time we priced the securities) have been publicly disclosed. Subsequent disclosure of any such events or the disclosure of or failure to disclose material future events concerning iShares could affect the value received at maturity with respect to the securities and therefore the value of the securities.

Neither we nor any of our affiliates makes any representation to you as to the performance of the underlying shares.

We and/or our affiliates may presently or from time to time engage in business with iShares. In the course of such business, we and/or our affiliates may acquire non-public information with respect to iShares, and neither we nor any of our affiliates undertakes to disclose any such information to you. In addition, one or more of our affiliates may publish research reports with respect to the underlying shares. The statements in the preceding two sentences are not intended to affect the rights of investors in the securities under the securities laws. As a purchaser of the securities, you should undertake an independent investigation of iShares as in your judgment is appropriate to make an informed decision with respect to an investment linked to the underlying shares.

iShares® is a registered trademark of BlackRock Institutional Trust Company, N.A. (“BTC”). The securities are not sponsored, endorsed, sold, or promoted by BTC. BTC makes no representations or warranties to the owners of the securities or any

Additional Information About the securities

Please read this information in conjunction with the summary terms on the front cover of this document.

Additional provisions:

Postponement of maturity date:

If, due to a market disruption event or otherwise, the valuation date is postponed so that it falls less than two business days prior to the scheduled maturity date, the maturity date will be postponed to the second business day following the valuation date as postponed. If a market disruption event occurs with respect to the underlying shares, the calculation agent may determine the final share price in accordance with the procedures set forth in the product supplement for Participation Securities. You should refer to the section “Description of Securities—General Terms of Securities —Some Definitions—share closing price” in the product supplement for Participation Securities for more information.

Additional information related to calculating the final share price:

If the underlying shares are subject to a stock split or reverse stock split, the calculation agent may make the antidilution adjustments in accordance with the procedures set forth in the product supplement for Participation Securities. You should refer to the section “Description of Securities—Antidilution Adjustments for Securities linked to Exchange-Traded Funds” in the product supplement for Participation Securities for more information.

If no closing price of the underlying shares is available on the valuation date through discontinuance or liquidation of the Fund, the calculation agent may determine the final share price in accordance with the procedures set forth in the product supplement for Participation Securities. You should refer to the section “Description of Securities—Discontinuance of Any ETF Shares and/or Share Underlying Index; Alteration of Method of Calculation” in the product supplement for Participation Securities for more information.

Tax considerations:

Although there is uncertainty regarding the U.S. federal income tax consequences of an investment in the securities due to the lack of governing authority, in the opinion of our counsel, Davis Polk & Wardwell LLP, under current law, and based on current market conditions, a security should be treated as a single financial contract that is an “open transaction” for U.S. federal income tax purposes.

Assuming this treatment of the securities is respected and subject to the discussion in “United States Federal Taxation” in the accompanying product supplement for participation securities, the following U.S. federal income tax consequences should result based on current law:

§

A U.S. Holder should not be required to recognize taxable income over the term of the securities prior to settlement, other than pursuant to a sale or exchange.

§

Upon sale, exchange or settlement of the securities, a U.S. Holder should recognize gain or loss equal to the difference between the amount realized and the U.S. Holder’s tax basis in the securities. Subject to the discussion below concerning the potential application of the “constructive ownership” rule, such gain or loss should be long-term capital gain or loss if the investor has held the securities for more than one year, and short-term capital gain or loss otherwise.

Because the securities are linked to shares of an exchange-traded fund, although the matter is not clear, there is a substantial risk that an investment in the securities will be treated as a “constructive ownership transaction” under Section 1260 of the Internal Revenue Code of 1986, as amended (the “Code”). If this treatment applies, all or a portion of any long-term capital gain of the U.S. Holder in respect of the securities could be recharacterized as ordinary income (in which case an interest charge will be imposed). Due to the lack of governing authority, our counsel is unable to opine as to whether or how Section 1260 of the Code applies to the securities. U.S. investors should read the section entitled “United States Federal Taxation—Tax Consequences to U.S. Holders—Possible Application of Section 1260 of the Code” in the accompanying product supplement for participation securities for additional information and consult their tax advisers regarding

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

the potential application of the “constructive ownership” rule.

In 2007, the U.S. Treasury Department and the Internal Revenue Service (the “IRS”) released a notice requesting comments on the U.S. federal income tax treatment of “prepaid forward contracts” and similar instruments. The notice focuses in particular on whether to require holders of these instruments to accrue income over the term of their investment. It also asks for comments on a number of related topics, including the character of income or loss with respect to these instruments; whether short-term instruments should be subject to any such accrual regime; the relevance of factors such as the exchange-traded status of the instruments and the nature of the underlying property to which the instruments are linked; the degree, if any, to which income (including any mandated accruals) realized by non-U.S. investors should be subject to withholding tax; and whether these instruments are or should be subject to the “constructive ownership” rule, as discussed above. While the notice requests comments on appropriate transition rules and effective dates, any Treasury regulations or other guidance promulgated after consideration of these issues could materially and adversely affect the tax consequences of an investment in the securities, possibly with retroactive effect.

As discussed in the accompanying product supplement for participation securities, Section 871(m) of the Code and Treasury regulations promulgated thereunder (“Section 871(m)”) generally impose a 30% (or a lower applicable treaty rate) withholding tax on dividend equivalents paid or deemed paid to Non-U.S. Holders with respect to certain financial instruments linked to U.S. equities or indices that include U.S. equities (each, an “Underlying Security”). Subject to certain exceptions, Section 871(m) generally applies to securities that substantially replicate the economic performance of one or more Underlying Securities, as determined based on tests set forth in the applicable Treasury regulations (a “Specified Security”). However, pursuant to an IRS notice, Section 871(m) will not apply to securities issued before January 1, 2021 that do not have a delta of one with respect to any Underlying Security. Based on our determination that the securities do not have a delta of one with respect to any Underlying Security, our counsel is of the opinion that the securities should not be Specified Securities and, therefore, should not be subject to Section 871(m).

Our determination is not binding on the IRS, and the IRS may disagree with this determination. Section 871(m) is complex and its application may depend on your particular circumstances, including whether you enter into other transactions with respect to an Underlying Security. If withholding is required, we will not be required to pay any additional amounts with respect to the amounts so withheld. You should consult your tax adviser regarding the potential application of Section 871(m) to the securities.

Both U.S. and non-U.S. investors considering an investment in the securities should read the discussion under “Risk Factors” in this document and the discussion under “United States Federal Taxation” in the accompanying product supplement for participation securities and consult their tax advisers regarding all aspects of the U.S. federal income tax consequences of an investment in the securities, including possible alternative treatments, the potential application of the constructive ownership rule, the issues presented by the aforementioned notice and any tax consequences arising under the laws of any state, local or non-U.S. taxing jurisdiction.

The discussion in the preceding paragraphs under “Tax considerations” and the discussion contained in the section entitled “United States Federal Taxation” in the accompanying product supplement for participation securities, insofar as they purport to describe provisions of U.S. federal income tax laws or legal conclusions with respect thereto, constitute the full opinion of Davis Polk & Wardwell LLP regarding the material U.S. federal tax consequences of an investment in the securities.

Trustee: The Bank of New York Mellon

Calculation agent: MS & Co.

November 2018 Page 15

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

The proceeds from the sale of the securities will be used by us for general corporate purposes. We will receive, in aggregate, \$1,000 per security issued, because, when we enter into hedging transactions in order to meet our obligations under the securities, our hedging counterparty will reimburse the cost of the agent's commissions. The costs of the securities borne by you and described beginning on page 2 above comprise the agent's commissions and the cost of issuing, structuring and hedging the securities.

Use of proceeds and hedging:

On or prior to the pricing date, we hedged our anticipated exposure in connection with the securities by entering into hedging transactions with our affiliates and/or third party dealers. We expect our hedging counterparties to have taken positions in the underlying shares and in futures and options contracts on the underlying shares or any component stocks of the share underlying index. Such purchase activity could have increased the price of the underlying shares on the pricing date, and, therefore, could have increased the trigger level, which is the price at or above which the underlying shares must close on the valuation date so that investors do not suffer a significant loss on their initial investment in the securities. In addition, through our affiliates, we are likely to modify our hedge position throughout the life of the securities, including on the valuation date, by purchasing and selling the underlying shares, futures or options contracts on the underlying shares or component stocks of the share underlying index listed on major securities markets or positions in any other available securities or instruments that we may wish to use in connection with such hedging activities. As a result, these entities may be unwinding or adjusting hedge positions during the term of the securities, and the hedging strategy may involve greater and more frequent dynamic adjustments to the hedge as the valuation date approaches. We cannot give any assurance that our hedging activities will not affect the value of the underlying shares, and, therefore, adversely affect the value of the securities or the payment you will receive at maturity, if any. For further information on our use of proceeds and hedging, see "Use of Proceeds and Hedging" in the accompanying product supplement for Participation Securities.

Benefit plan investor considerations:

Each fiduciary of a pension, profit-sharing or other employee benefit plan subject to Title I of the Employee Retirement Income Security Act of 1974, as amended ("ERISA") (a "Plan"), should consider the fiduciary standards of ERISA in the context of the Plan's particular circumstances before authorizing an investment in the securities. Accordingly, among other factors, the fiduciary should consider whether the investment would satisfy the prudence and diversification requirements of ERISA and would be consistent with the documents and instruments governing the Plan.

In addition, we and certain of our affiliates, including MS & Co., may each be considered a "party in interest" within the meaning of ERISA, or a "disqualified person" within the meaning of the Internal Revenue Code of 1986, as amended (the "Code"), with respect to many Plans, as well as many individual retirement accounts and Keogh plans (such accounts and plans, together with other plans, accounts and arrangements subject to Section 4975 of the Code, also "Plans"). ERISA Section 406 and Section 4975 of the Code generally prohibit transactions between Plans and parties in interest or disqualified persons. Prohibited transactions within the meaning of ERISA or the Code would

likely arise, for example, if the securities are acquired by or with the assets of a Plan with respect to which MS & Co. or any of its affiliates is a service provider or other party in interest, unless the securities are acquired pursuant to an exemption from the “prohibited transaction” rules. A violation of these “prohibited transaction” rules could result in an excise tax or other liabilities under ERISA and/or Section 4975 of the Code for those persons, unless exemptive relief is available under an applicable statutory or administrative exemption.

The U.S. Department of Labor has issued five prohibited transaction class exemptions (“PTCEs”) that may provide exemptive relief for direct or indirect prohibited transactions resulting from the purchase or holding of the securities. Those class exemptions are PTCE 96-23 (for certain transactions determined by in-house asset managers), PTCE 95-60 (for certain transactions involving insurance company general accounts), PTCE 91-38 (for certain transactions involving bank collective investment funds), PTCE 90-1 (for certain transactions involving insurance company separate accounts) and PTCE 84-14 (for certain transactions determined by independent qualified professional asset managers). In addition, ERISA Section 408(b)(17) and Section 4975(d)(20) of the Code provide an exemption for the purchase and sale of securities and the related lending transactions, provided that neither the issuer of the securities nor any of its affiliates has or exercises any discretionary authority or control or renders any investment advice with respect to the

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

assets of the Plan involved in the transaction and provided further that the Plan pays no more, and receives no less, than “adequate consideration” in connection with the transaction (the so-called “service provider” exemption). There can be no assurance that any of these class or statutory exemptions will be available with respect to transactions involving the securities.

Because we may be considered a party in interest with respect to many Plans, the securities may not be purchased, held or disposed of by any Plan, any entity whose underlying assets include “plan assets” by reason of any Plan’s investment in the entity (a “Plan Asset Entity”) or any person investing “plan assets” of any Plan, unless such purchase, holding or disposition is eligible for exemptive relief, including relief available under PTCEs 96-23, 95-60, 91-38, 90-1, 84-14 or the service provider exemption or such purchase, holding or disposition is otherwise not prohibited. Any purchaser, including any fiduciary purchasing on behalf of a Plan, transferee or holder of the securities will be deemed to have represented, in its corporate and its fiduciary capacity, by its purchase and holding of the securities that either (a) it is not a Plan or a Plan Asset Entity and is not purchasing such securities on behalf of or with “plan assets” of any Plan or with any assets of a governmental, non-U.S. or church plan that is subject to any federal, state, local or non-U.S. law that is substantially similar to the provisions of Section 406 of ERISA or Section 4975 of the Code (“Similar Law”) or (b) its purchase, holding and disposition of these securities will not constitute or result in a non-exempt prohibited transaction under Section 406 of ERISA or Section 4975 of the Code or violate any Similar Law.

Due to the complexity of these rules and the penalties that may be imposed upon persons involved in non-exempt prohibited transactions, it is particularly important that fiduciaries or other persons considering purchasing the securities on behalf of or with “plan assets” of any Plan consult with their counsel regarding the availability of exemptive relief.

The securities are contractual financial instruments. The financial exposure provided by the securities is not a substitute or proxy for, and is not intended as a substitute or proxy for, individualized investment management or advice for the benefit of any purchaser or holder of the securities. The securities have not been designed and will not be administered in a manner intended to reflect the individualized needs and objectives of any purchaser or holder of the securities.

Each purchaser or holder of any securities acknowledges and agrees that:

(i)

the purchaser or holder or its fiduciary has made and shall make all investment decisions for the purchaser or holder and the purchaser or holder has not relied and shall not rely in any way upon us or our affiliates to act as a fiduciary or adviser of the purchaser or holder with respect to (A) the design and terms of the securities, (B) the purchaser or holder's investment in the securities, or (C) the exercise of or failure to exercise any rights we have under or with respect to the securities;

(ii)

we and our affiliates have acted and will act solely for our own account in connection with (A) all transactions relating to the securities and (B) all hedging transactions in connection with our obligations under the securities;

(iii)

any and all assets and positions relating to hedging transactions by us or our affiliates are assets and positions of those entities and are not assets and positions held for the benefit of the purchaser or holder;

(iv)

our interests are adverse to the interests of the purchaser or holder; and

(v)

neither we nor any of our affiliates is a fiduciary or adviser of the purchaser or holder in connection with any such assets, positions or transactions, and any information that we or any of our affiliates may provide is not intended to be impartial investment advice.

Each purchaser and holder of the securities has exclusive responsibility for ensuring that its purchase, holding and disposition of the securities do not violate the prohibited transaction rules of ERISA or the Code or any Similar Law. The sale of any securities to any Plan or plan subject to Similar Law is in no respect a representation by us or any of our affiliates or representatives that such an investment meets all relevant legal requirements with respect to investments by plans generally or any particular plan, or that such an investment is appropriate for plans generally or any particular plan. In this regard, neither this discussion nor anything provided in this document is or is intended to be investment advice directed at any potential Plan purchaser or at Plan purchasers generally and such purchasers of these

Morgan Stanley Finance LLC

Dual Directional Trigger Participation Securities Based on the iShares® MSCI Emerging Markets ETF due November 19, 2021

Trigger Performance Leveraged Upside SecuritiesSM

Principal at Risk Securities

securities should consult and rely on their own counsel and advisers as to whether an investment in these securities is suitable.

However, individual retirement accounts, individual retirement annuities and Keogh plans, as well as employee benefit plans that permit participants to direct the investment of their accounts, will not be permitted to purchase or hold the securities if the account, plan or annuity is for the benefit of an employee of Morgan Stanley or Morgan Stanley Wealth Management or a family member and the employee receives any compensation (such as, for example, an addition to bonus) based on the purchase of the securities by the account, plan or annuity.

Additional considerations:

Client accounts over which Morgan Stanley, Morgan Stanley Wealth Management or any of their respective subsidiaries have investment discretion are not permitted to purchase the securities, either directly or indirectly.

Selected dealers, which may include our affiliates, and their financial advisors will collectively receive from the agent a fixed sales commission of \$31.50 for each security they sell.

Supplemental information regarding plan of distribution; conflicts of interest:

MS & Co. is an affiliate of MSFL and a wholly owned subsidiary of Morgan Stanley, and it and other affiliates of ours expect to make a profit by selling, structuring and, when applicable, hedging the securities.

Validity of the securities:

MS & Co. will conduct this offering in compliance with the requirements of FINRA Rule 5121 of the Financial Industry Regulatory Authority, Inc., which is commonly referred to as FINRA, regarding a FINRA member firm's distribution of the securities of an affiliate and related conflicts of interest. MS & Co. or any of our other affiliates may not make sales in this offering to any discretionary account. See "Plan of Distribution (Conflicts of Interest)" and "Use of Proceeds and Hedging" in the accompanying product supplement for Participation Securities.

In the opinion of Davis Polk & Wardwell LLP, as special counsel to MSFL and Morgan Stanley, when the securities offered by this pricing supplement have been executed and issued by MSFL, authenticated by the trustee pursuant to the MSFL Senior Debt Indenture (as defined in the accompanying prospectus) and delivered against payment as contemplated herein, such securities will be valid and binding obligations of MSFL and the related guarantee will be a valid and binding obligation of Morgan Stanley, enforceable in accordance with their terms, subject to applicable bankruptcy, insolvency and similar laws affecting creditors' rights generally, concepts of reasonableness and equitable principles of general applicability (including, without limitation, concepts of good faith, fair dealing and the lack of bad faith), *provided* that such counsel expresses no opinion as to (i) the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law on the conclusions expressed above and (ii) any provision of the MSFL Senior Debt Indenture that purports to avoid the effect of fraudulent conveyance, fraudulent transfer or similar provision of applicable law by limiting the amount of Morgan Stanley's obligation under the related

guarantee. This opinion is given as of the date hereof and is limited to the laws of the State of New York, the General Corporation Law of the State of Delaware and the Delaware Limited Liability Company Act. In addition, this opinion is subject to customary assumptions about the trustee's authorization, execution and delivery of the MSFL Senior Debt Indenture and its authentication of the securities and the validity, binding nature and enforceability of the MSFL Senior Debt Indenture with respect to the trustee, all as stated in the letter of such counsel dated November 16, 2017, which is Exhibit 5-a to the Registration Statement on Form S-3 filed by Morgan Stanley on November 16, 2017.
