SEMI-ANNUAL REPORT TO SHAREHOLDERS DATED MAY 31, 2002

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

INVESTMENT OBJECTIVES & STRATEGY

The Chartwell Dividend and Income Fund's [the "Fund"] primary investment objective is to seek high current income. Capital appreciation is a secondary objective. The Fund will seek to achieve its objectives by investing, under normal circumstances, at least 50% of its total assets in income generating equity securities, including dividend paying common stocks, convertible securities, preferred stocks and other equity-related securities. In addition, the Fund may invest the balance of its total assets in non-convertible debt securities, consisting primarily of corporate bonds. The Fund attempts to minimize individual security risk by diversifying the portfolio with over 100 securities, which is subject to change. The Chartwell Dividend and Income Fund is a closed-end mutual fund which trades on the New York Stock Exchange under the symbol CWF.

HIGH-YIELD CORPORATE BONDS

High-yield bonds are non-investment grade corporate debt obligations rated "Ba1" or lower by Moody's Investors Service, Inc. or "BB+" or lower by Standard and Poor's Ratings Group; they typically have a higher risk level than investment-grade bonds. These securities have historically compensated investors with higher levels of income for that risk. Prices usually are less sensitive to interest rate fluctuations than higher rated bonds because of the high income levels. However, the prices of these bonds are more sensitive to changes in the economy.

CONVERTIBLE SECURITIES

The Fund can invest in both convertible preferred stock and convertible bonds. Both pay fixed rates of income, but because they can be converted into common stock, they are indirectly tied to the common stock's performance. As a result, convertible securities generally offer higher income than common stocks and an opportunity for price appreciation when the value of the underlying security rises. The Fund buys convertibles when the underlying common stock offers strong growth potential as well.

COMMON STOCK

The Fund invests in the common stocks of utility companies, Real Estate Investment Trusts (REITs) and other industrial and financial companies as well as other equity securities. Both utilities and REITs tend to offer a premium dividend yield with steady growth that can lead to capital appreciation. Industrial and financial stocks are primarily purchased for capital appreciation based on the fundamental value of the underlying company.

LETTER TO SHAREHOLDERS

DEAR SHAREHOLDERS,

The following is the semi-annual report for the Chartwell Dividend & Income Fund (NYSE symbol: "CWF") for the six months ended May 31, 2002. The Fund returned 19.50% assuming reinvestment of dividends in additional shares. The net asset value ("NAV") return was 1.73%. The Fund ended the period at a premium to NAV of 26.9% versus beginning the period at an 8.1% premium to NAV. The Fund traded on the NYSE between a range of \$10.35 and \$12.15 during the six months ended May 31, 2002. However, this was followed by a very weak beginning to the Fund's second half results in June. This is due to both a poor stock market and the reduction in the Fund's monthly distribution.

SIX MONTHS RETURN  
NOVEMBER 30, 2001-MAY 31, 2002

CWF.....	+19.50%
CWF NAV.....	+1.73%
S&P 500.....	-5.68%
High Yield Bonds*.....	+2.29%

-----  
\* Merrill Lynch Cash Pay Index.

On June 4, 2002, Chartwell Dividend & Income Fund announced a reduced monthly distribution of \$0.0833 per share of common stock, equal to \$1.00 per share annually. This new level represents a reduction of \$0.02 per share from the previously declared monthly distribution of \$0.1033 per share, equal to \$1.24 per share annually. Given current economic and market conditions, we believe the new monthly payout better aligns the Fund's distribution policy with its net asset value. As manager of the Fund, Chartwell Investment Partners is reducing the investment management fee from 0.95 percent to 0.85 percent, effective July 1, 2002. While we are disappointed by the weak markets and the necessity to reduce the monthly distribution, we believe that this difficult decision will better serve shareholders over the long term. While the markets continue to experience difficult times, we believe the U.S. economy is on a recovery track. We appreciate your continued confidence and look forward to serving you well into the future.

KEY EVENTS OVER THE PAST SIX MONTHS

The equity markets declined largely due to several major negative concerns. First, accounting usage and standards came under tremendous scrutiny as a number of high-profile companies have been accused of abusing accounting standards in order to make company results appear better than reality. This was often done with the blessing of their accountants. Enron Corp., WorldCom Inc. and other companies were analyzed and in some cases found to have distorted their financial results. Without being able to trust the numbers published in company

3

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

filings, investors simply assumed the worst and not only abandoned stocks that appeared to have questionable earnings, but also pulled even more money out of all stocks.

CHARTWELL DIVIDEND & INCOME FUND TOTAL RETURN VS S&P 500  
TOTAL RETURN  
NOVEMBER 30, 2001 THROUGH MAY 31, 2002

[LINE GRAPH]

Another driver of the weak market was the ongoing problems in technology and telecommunications companies. Results continue to disappoint, forcing investors to further reduce valuations within these groups. Because these stocks were so widely held, their negative performance has led to broad market weakness. Investors remain focused on companies such as Cisco Systems, Inc. and Intel Corporation. The outlook here remains cloudy.

Compared to the stock markets, the broad economy continues to signal better aggregate strength, although there has been little in the way of a grass-roots confirmation in the form of company earnings. GDP (Gross Domestic Product) in the first quarter of '02 grew a strong 5.8%, while inflation was a tame annualized 2.9%. Interest rates remained at a low level, as the 10-year U.S. Treasury bond yield rose from 4.75% to 5.05%. The one area of commodity strength was crude oil, which increased in price per barrel from \$19 to \$25.50. While growth in the second quarter will moderate, it appears that the recession was short lived and that an economic rebound is in place.

MAY 31, 2002

CURRENT POSITIONING AND OUTLOOK

[FIXED INCOME PIE CHART]

Within the portfolio, high yield bonds and Real Estate Investment Trust ("REITs") continued to perform well. Equities showed a slightly positive return despite the decline in the overall stock market. Utilities were down for the reported period. Among our best securities were Philip Morris Companies Inc. and Bank of America Corporation within equities, Hospitality Properties Trust within REITs and MDC Corporation Inc. and Atrium Companies, Inc. within high yield bonds.

The portfolio currently holds 48% in high yield bonds, 37% in diversified

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

equities, 8% in utilities and 6% in REITs. At this point we are confident that our asset allocation offers a balanced opportunity to meet the needs of our investors for income while retaining some of the upside potential of equities.

Sincerely,

/s/ Bernard P. Schaffer

FIXED INCOME

[FIXED INCOME PIE CHART]

[PERFORMANCE BAR CHART]

High yield corporate bonds provided a positive total return during the six months ended May 31, 2002, with the Merrill Lynch High Yield Cash Pay Index returning 2.29%. The high yield portion of your Fund outperformed the index, returning 4.13% for the same period.

HIGH YIELD INDEX SPREAD TO TREASURY  
(SOURCE: MERRILL LYNCH, BLOOMBERG)

[HIGH YIELD INDEX LINE CHART]

The Merrill Lynch High Yield Cash Pay Index's interest rate spread over

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

Treasuries declined nearly 100 basis points, from 742 basis points on November 30, 2001 to 643 basis points on May 31, 2002. Some of the spread tightening was due to a 30 basis point increase in the 10-year Treasury yield from 4.75% to 5.05%. Most of the recent spread tightening was due to defaulted issues (with extremely high yields) exiting the index. Spreads are wide by historical standards.

6

CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

HIGH YIELD DEFAULT RATES  
(Latest 12 months ended 5/31/02, source: CS First Boston)

[HIGH YIELD INDEX BAR CHART]

Defaults have remained stubbornly high recently, with the trailing-twelve-month default rate at 10.8%, according to CS First Boston.

HIGH YIELD SECTOR PERFORMANCE  
(11/30/01-5/31/02, source: Merrill Lynch)

[HIGH YIELD INDEX BAR CHART]

Generally speaking, higher quality issuers outperformed lower quality issuers. High profile accounting improprieties and the continued threat of terrorism left investors little choice but to remain conservative. There was a wide dispersion of returns among high yield sectors. Most sectors outperformed the index, though telecommunications, cable TV, and utilities underperformed by a wide margin. Your Fund held winning investments in Seagate Technology International, MMI Products, Inc. and Atrium Companies, Inc., though we were off the mark with positions in Allegiance Telecom, Inc., Leap Wireless International, Inc. and AES Corporation.

7

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

### OUTLOOK

We are cautiously optimistic about the outlook for high yield bonds. We believe that default rates have peaked, or are near a peak, and should begin to decline, provided the economy continues to recover. We are intensely focused on an issuer's ability to generate consistent cash flow, particularly free cash flow after debt service and capital expenditures. We aim to position the high yield portion of your Fund conservatively with the objective of capturing high yield's excess income while minimizing principal losses. As always, rigorous fundamental credit research will be our roadmap to uncover superior investments in high yield.

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

EQUITY

[EQUITY RETURNS PIE CHART]

[EQUITY RETURNS BAR CHART]

The equity portion of the Fund returned 1.02% (including convertible preferred stock and option overwriting gains). This compares to the S&P 500 (-5.68%) and the Dow Jones Industrial Average (+0.75%).

One area that provided consistently good returns within the equities was regional banks. Bank of America Corporation ("BAC") was a top performer, up 26% during the period. As one of the premier consumer banking franchises in the southern and western United States, BAC benefited from strong mortgage lending results and robust deposit growth. In addition, the bank has exited many large corporate lending commitments that are currently causing their competition problems. Contrasting this, Comerica Incorporated ("Comerica") performed well off of a low starting base after investors punished the stock too much for its exposure to middle-American industry. While large lenders are facing credit difficulties, mid-sized, specialized corporate lenders like Comerica continue to run solid businesses. The Fund was fortunate enough to purchase the stock at approximately \$50 and sell it near \$63.

[BANK OF AMERICA LINE CHART]

Also performing well within financials was Capital One Financial Corporation. Part of the strategy of this top-five credit card issuer is to conduct over 100,000 marketing "tests" per year in order to determine what different consumers respond to when choosing and using a credit card. The company has been able to

9

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

grow far faster and be more profitable than the credit card market as a whole by scientifically focusing on "what's in your wallet."

[CAPITAL ONE LINE CHART]

Philip Morris Companies ("MO") has taken a different track, depending on its consistent franchises to trade as high as \$57 during the past six months. Overseas markets continue to provide growth opportunities. In addition, U.S. consumers continue to enjoy MO's food brands such as Oscar Meyer, Cool-Aid and Jell-O.

[PHILIP MORRIS LINE CHART]

Finally, GlobalSantaFe Corporation depends less on brands and more on engineering expertise to help the worlds largest energy producers find and produce oil and gas. They operate large land- and water-based drilling rigs that draw crude oil and natural gas out of reserve basins deep below the earth's

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

surface. While demand for their service in the Gulf of Mexico has been lukewarm lately, internal usage has been strong, helping drive the performance of these shares.

10

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

[GLOBAL SANTA FE LINE CHART]

Other stocks obviously faired less well and must be addressed. First worth mentioning is Halliburton Company ("HAL"). While a worldwide leader in oil services (similar to GlobalSantaFe Corporation), HAL suffered from acute exposure to asbestos litigation, which has recently come to prominence again. Given the unknown potential liability that is associated with asbestos, it is often an unpredictable variable. Currently the company may be on the verge of a settlement with the major plaintiffs' attorneys representing individuals actually sick from asbestos exposure. If this settlement occurs, which it may not, investors will likely return focus to HAL's improving fundamental business characteristics.

[HALLIBURTON LINE CHART]

While being the bluest of blue chips, General Electric Company's ("GE") stock has performed poorly since Jack Welch gave up the helm. GE has suffered from concern about the future of its turbine business, which sells to power generators. It also has seen weakness in GE capital, a major player in large corporate lending. We view the company as solid, with NBC, appliances and plastics continuing to perform well. We expect the stock to react well to any improvement in the economy.

11

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

[GENERAL ELECTRIC LINE CHART]

Finally, the Fund held a number of major pharmaceutical stocks, including Merck and Co., Inc. and Wyeth (formerly American Home Products). Many worries plague these stocks, including major drugs coming off patent, a dearth of new pipeline drugs to replace former blockbusters, and regulatory pressure from states to implement drug price controls. However, their cash flows and returns remain robust and well above market averages. Despite this, they trade at below-market price-to-earnings ratios. In addition, innovation has always been the savior of this industry and likely will again as they use newly discovered techniques and technologies to create more effective drugs.

## UTILITIES

[UTILITY RESULTS PIE CHART]

[UTILITY RETURNS BAR CHART]

Utilities had a poor period of performance. The main weakness in utilities came from owning stocks that participated in energy marketing and trading and used acquisitions to boost growth. We underestimated the degree to which competition would hurt business and to what degree investors would punish companies for not meeting expectations. Stocks such as El Paso Corporation (Natural Gas) were down significantly for the last six months and hurt the Fund's performance. That said, many utilities are now trading below break-up valuations, meaning an acquirer could buy the entire company and sell off the pieces to make a profit. It is unlikely that valuations will remain at such low levels, especially as the stronger companies right themselves and improve their balance sheets.

There were certainly some bright spots in the utility portfolio. Exelon Corporation, the power company serving much of Illinois and Pennsylvania, did very well, coming off low valuations and benefiting from better uptime at their power plants. KeySpan Corporation also did quite well, serving the Long Island and New York City areas. Hurting the Fund was Williams Companies, Inc. which was hurt by poor trading operations and a poorly operating telecommunications subsidiary. El Paso Energy also underperformed as they were forced to write down the value of trading assets. They have begun to sell assets and raise equity to improve the stability of their balance sheet.

Going forward, we think that the healing process has begun. In the utility sector, many struggling companies have been able to raise equity to reduce debt. Natural gas prices are relatively stable. Deals to sell excess assets have been inked and there appears to be further demand and financial resources available for further purchases. While we do not expect an immediate snap-back in the prices of natural gas stocks, we do believe the valuations justify holding them at this time.

## REAL ESTATE INVESTMENT TRUSTS

[REAL ESTATE TRUSTS PIE CHART]

[REITs RETURNS BAR CHART]

Shares of Real Estate Investment Trusts ("REITs") provided positive returns in a challenging investing environment. Fueled by strong cash flows, high dividend yields and low price-to-funds from operation ratios, these stocks appear attractive to many investors. In past years, some institutional and mutual fund managers have avoided REITs because of their concentration on real estate and unique corporate structures. Now it appears that many fund managers and individual investors are more open to REITs, which we expect to continue. However, the majority of REITs now trade at or near the value of the real estate they own. It is unlikely that they will appreciate much beyond current levels. Therefore we have attempted to focus on those trading at reasonable valuations

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

relative to their underlying assets and with stable cash flows to fund dividends.

Among our best REITs were Duke-Weeks Realty Corporation, Prologis Trust, Reckson Associates Realty Corporation and Healthcare Realty Trust, Inc. The only REIT in the portfolio to lose money during the period was Boston Properties Inc. a large office/industrial/hotel property developer.

### UTILIZATION OF LEVERAGE

The Chartwell Dividend and Income Fund has utilized leverage through the issuance of commercial paper. As of May 31, 2002, the Fund had \$60 million in leverage outstanding in the form of commercial paper rated A1/P1 by Moody's Investors Service, Inc./Standard & Poor's Ratings Group. These ratings should enhance the marketability and reduce the interest costs associated with the issuance of the commercial paper. However, it must be noted that the utilization of leverage involves the risk of lower portfolio returns if the cost of leverage is higher than the resulting yields on assets or if the Fund experiences capital losses in excess of the yield spread, if any. Therefore, the addition of leverage also increases the potential volatility of the Fund. The Fund has the ability to leverage to a maximum of 33% of the Fund's gross assets.

The Fund utilizes leveraging to seek to enhance the yield and net asset value of its Common Stock. However, these objectives cannot be achieved in all interest rate and stock market environments. To leverage, the Fund issues Commercial Paper, which is issued at a discount equivalent to short-term interest rates, and invests the proceeds in long-term securities. The interest earned on these investments is paid to Common Stock shareholders in the form of dividends, and the value of these portfolio holdings is reflected in the per share net asset value of the Fund's Common Stock. However, in order to benefit Common Stock shareholders, the yield curve must be positively sloped; that is, short-term interest rates must be lower than long-term interest rates. At the same time, a period of generally declining interest rates will benefit Common Stock shareholders. If either of these conditions change, then the risks of leveraging will begin to outweigh the benefits.

To illustrate these concepts, assume a fund's common stock capitalization of \$100 million and the issuance of commercial paper for an additional \$50 million, creating a total value of \$150 million available for investment in long-term securities. If prevailing short-term interest rates are approximately 3% and long-term interest rates are approximately 6%, the yield curve has a strongly positive slope. The fund pays a discount on the \$50 million of commercial paper based on the lower short-term interest rates. At the same time, the fund's total portfolio of \$150 million earns the income based on long-term interest rates.

In this case, the discount paid to Commercial Paper holders is significantly lower than the income earned on the Fund's long-term investments, and therefore the Common Stock shareholders are the beneficiaries of the incremental yield. However, if short-term interest rates rise, narrowing the differential between short-term and long-term interest rates, the incremental yield pick-up on the Common Stock will be reduced or eliminated completely. At the same time, the market value on the Fund's Common Stock (that is, its price as listed on the New York Stock Exchange), may, as a result, decline. Furthermore, if long-term

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

interest rates rise, the Common Stock's net asset value will reflect the full decline in the price of the portfolio's investments, since the value of the Fund's Commercial Paper does not fluctuate. In addition to the decline in net asset value, the market value of the Fund's Common Stock may also decline.

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

NOTES TO FINANCIAL STATEMENTS (UNAUDITED)

Chartwell Dividend and Income Fund, Inc. (the "Fund") was incorporated under the laws of the State of Maryland on April 6, 1998 and is registered under the Investment Company Act of 1940 (the "Act"), as amended, as a closed-end, diversified management investment company. The Fund had no operations until June 17, 1998 when it sold 6,667 shares of common stock for \$100,005 to Chartwell Investment Partners, L.P. (the "Manager"). Investment operations commenced on June 29, 1998. The Fund's primary investment objective is to seek high current income. Capital appreciation is a secondary objective.

NOTE 1. SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The policies are in conformity with accounting principles generally accepted in the United States of America.

**PORTFOLIO VALUATION:** Portfolio securities listed or traded on a national securities exchange, except for debt securities, are valued at the last sale price as of the close of regular trading on the New York Stock Exchange. Securities not traded on a particular day, over-the-counter securities and government and agency securities are valued at the mean value between bid and asked prices. Long-term debt securities are valued on the basis of valuations provided by a pricing service when such prices are believed to reflect the fair value of such securities. All securities and assets for which quotations are not readily available are valued at fair value as determined in good faith and pursuant to a method approved by the Board of Directors. Short-term investments having a maturity of less than 60 days are valued at amortized cost.

**CASH AND CASH EQUIVALENTS:** Idle cash is swept into a money market fund at PFPC Trust Company, the Fund's custodian, and is classified as a cash equivalent. Amounts so invested are generally available on the same business day.

**WRITTEN OPTIONS:** When the Fund writes a covered call option, an amount equal to the premium received by the portfolio is included in the Fund's statement of assets and liabilities as a liability. The amount of the liability is subsequently marked-to-market to reflect the current market value of the option written.

When a covered written call expires on its stipulated expiration date, or if the portfolio enters into a closing purchase transaction, the Fund will realize a gain (or loss if the cost of the closing purchase transaction exceeds the premium received when the call option was written) without regard to any unrealized gain or loss on the underlying security, and the liability related to such option will be extinguished. When a covered written call option is exercised, the Fund will realize a gain or loss from the sale of the underlying security and the proceeds of the sale are increased by the premium originally received. The Fund as writer of

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

an option has no control over whether the underlying securities may be sold (call) and as a result bears the market risk of an unfavorable change in the price of the securities underlying the written option.

**FEDERAL INCOME TAXES:** It is the Fund's intention to continue to meet the requirements under Subchapter M of the Internal Revenue Code applicable to regulated investment companies and to distribute substantially all of its taxable income to shareholders. Therefore, no provision for Federal income tax or excise tax is required.

**DIVIDENDS AND DISTRIBUTIONS:** The Fund will declare and pay dividends to shareholders on a monthly basis. Long-term capital gains, if any, in excess of loss carryforwards are distributed to shareholders annually. Dividends from net investment income and capital gain distributions are determined in accordance with U.S. Federal income tax regulations, which may differ from generally accepted accounting principles. Dividends and distributions to shareholders are recorded on the ex-dividend date.

The Fund currently intends to distribute a monthly fixed amount to shareholders. The Fund's final distribution for each calendar year will exceed that amount, however, to the extent necessary for the Fund to have distributed all of its net investment company taxable income and net capital gains recognized during the year, if any. If, for any calendar year, the total distributions exceed net investment company taxable income and net capital gain, the excess, distributed from the Fund's assets, will generally be treated as a tax-free return of capital and will result in a reduction in the shareholder's basis. The Board of Directors reserves the right to change the aforementioned dividend policy from time-to-time.

**BORROWINGS:** The Fund issues short-term commercial paper at a discount from par. The discount is amortized to interest expense over the life of the commercial paper using the straight line method.

**SECURITY TRANSACTIONS AND INVESTMENT INCOME:** Security transactions are recorded on the trade date. Realized gains and losses on sales of securities are calculated on the identified cost basis.

Dividend income is recorded on the ex-dividend date. Interest income is recorded on the accrual basis. The Fund accretes discount and amortizes premium on securities using the effective interest method.

**NEW ACCOUNTING POLICIES:** As required, effective December 1, 2001, the Fund has adopted the provisions of the AICPA Audit and Accounting Guide for Investment Companies and began accreting market discount and amortizing premium on fixed income securities for financial reporting. Prior to December 1, 2001, the Fund did not accrete market discount and amortize premium on fixed income securities. The cumulative effect of this accounting change had no impact on total net assets of the Trust, but resulted in a \$47,320 increase in cost of

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

securities and a corresponding \$47,320 increase in net unrealized depreciation based on securities held by the Trust on December 1, 2001.

The effect of this change for the six months ended May 31, 2002, was to increase net investment income by \$50,263; increase net unrealized depreciation by \$29,413, and increase net realized losses by \$20,850. The statements of changes in net assets and financial highlights for prior periods have not been restated to reflect this change.

USE OF ESTIMATES: The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts in the financial statements. Actual results could differ from those estimates.

NOTE 2. INVESTMENT MANAGEMENT, ADMINISTRATION AGREEMENTS AND OTHER TRANSACTIONS WITH AFFILIATES

The Fund has entered into an investment management agreement with the Manager. The Manager manages the Fund's portfolio and makes investment decisions. For these services, the Fund pays the Manager a monthly fee at an annual rate of 0.95% of the Fund's Managed Assets. "Managed Assets" means the average weekly value of the Fund's total assets minus the sum of the Fund's liabilities, which liabilities exclude debt related to leverage, short-term debt and the aggregate liquidation preference of any outstanding preferred stock. Effective July 1, 2002, the Manager is reducing the investment management fee from 0.95% to 0.85%.

The Fund has entered into an administration agreement with Princeton Administrators, L.P. (the "Administrator"). Under such agreement, the Administrator performs or arranges for the performance of certain administrative services necessary for the operation of the Fund. For these services, the Fund pays the Administrator a monthly fee at an annual rate of 0.15% of the Fund's average weekly Managed Assets, subject to a monthly minimum fee of \$12,500. Effective July 1, 2002, the Administrator is reducing the administrative fee from 0.15% to 0.125%.

Certain officers and/or directors of the Fund are officers and/or directors of the Manager. The Fund pays each director who is not an "affiliated person" as defined in the Act a fee of \$4,000 per year plus \$250 for each meeting attended.

For the six months ended May 31, 2002, the Fund incurred fees, of which \$32,444 has been expensed, to Drinker Biddle & Reath LLP, counsel for the Fund. A partner of the firm is an officer of the Fund.

NOTE 3. PURCHASE AND SALES OF INVESTMENTS

For the six months ended May 31, 2002, purchases and sales of investments, excluding short-term investments, totaled \$111,478,178 and \$112,997,755, respectively.

33

	-----	-----
Options outstanding May 31, 2002.....	6,270	\$ 949,204
	=====	=====

#### NOTE 4. COMMERCIAL PAPER

As of May 31, 2002, \$60,000,000 of commercial paper was outstanding with an amortized cost of \$59,767,100. The average discount rate of commercial paper outstanding at May 31, 2002 was 2.17%. The average daily balance of commercial paper outstanding for the six months ended May 31, 2002 was \$59,799,402 at a weighted average discount rate of 2.42%. The maximum amount of commercial paper outstanding at any time during the six months ended was \$60,000,000. In conjunction with the issuance of the commercial paper, the Fund entered into a line of credit arrangement with a bank for \$30,000,000. Interest on borrowing is based on market rates in effect at the time of borrowing. The commitment fee is computed at the rate of 0.15% per annum on the unused balance. During the six months ended May 31, 2002, there were no borrowings under this arrangement.

#### NOTE 5. CAPITAL STOCK

There are 100,000,000 shares of \$0.01 par value common stock authorized. Of the 15,924,214 shares of common stock outstanding at May 31, 2002, the Manager owned 10,088 shares.

For the six months ended May 31, 2002 and the year ended November 30, 2001 the Fund issued 126,652 and 260,491 shares respectively, in connection with the Fund's dividend reinvestment plan.

#### NOTE 6. MARKET AND CREDIT RISKS

The Fund may invest in high-yielding fixed-income securities, which carry ratings of BB or lower by S&P and/or Bal or lower by Moody's. Investments in these

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

higher-yielding securities may be accompanied by a greater degree of credit risk than higher rated securities. Additionally, lower-rated securities may be more susceptible to adverse economic and competitive industry conditions than investment-grade securities. The Fund may invest up to 15% of its total assets in illiquid securities and other securities which may not be readily marketable. In addition, the Fund may purchase securities sold in reliance of Rule 144A of the Securities Act of 1933. The relative illiquidity of some of the Fund's portfolio securities may adversely affect the ability of the Fund to dispose of such securities in a timely manner and at a fair price at times when it might be necessary or advantageous for the Fund to liquidate portfolio securities.

NOTE 7. SUBSEQUENT EVENT

The Board of Directors of the Fund declared the following dividends:

DECLARATION DATE	EX-DATE	RECORD DATE	PAYABLE DATE	DIVIDEND RATE
-----	-----	-----	-----	-----
June 3, 2002	June 14, 2002	June 18, 2002	June 28, 2002	\$0.0833
July 1, 2002	July 17, 2002	July 19, 2002	July 31, 2002	\$0.0833

NOTE 8. CAPITAL LOSS CARRYFORWARDS

The following summarizes the capital loss carryforwards as of November 30, 2001. This capital loss carryforward is available to offset future gains.

EXPIRING IN FISCAL YEAR	AMOUNT
-----	-----
2007	\$ 8,880,255
2008	\$ 9,509,213
2009	\$25,913,206

Under the current tax law, capital and currency losses realized after October 31, 2001 are deferred and treated as occurring on the first day of the following fiscal year. For fiscal year ended November 30, 2001, the Fund elected to defer capital losses occurring between November 1, 2001 and November 30, 2001 in the amount of \$3,148,870.

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

### AUTOMATIC DIVIDEND REINVESTMENT PLAN (UNAUDITED)

Pursuant to the Fund's Automatic Dividend Reinvestment Plan (the "Plan"), unless a shareholder otherwise elects, all dividend and capital gains distributions will be automatically reinvested in additional shares of common stock of the Fund by PFPC Inc., as agent for shareholders in administering the Plan (the "Plan Agent"). Shareholders who elect not to participate in the Plan will receive all dividends and distributions in cash, paid by check mailed directly to the shareholder of record (or, if the shares are held in street or other nominee name, then to such nominee) by PFPC Inc., as dividend paying agent. Such participants may elect not to participate in the Plan and to receive all distributions of dividends and capital gains in cash by sending written instructions to PFPC Inc., as dividend paying agent, at the address set forth below.

Participation in the Plan is completely voluntary and may be terminated or resumed at any time without penalty by written notice if received by the Plan Agent not less than ten days prior to any dividend record date. Otherwise such termination will be effective with respect to any subsequently declared dividend or distribution.

Whenever the Fund declares a distribution, an ordinary income dividend or a capital gain dividend (collectively referred to as "dividends") payable either in shares or in cash, non-participants in the Plan will receive cash, and participants in the Plan will receive the equivalent in shares of common stock. The shares will be acquired by the Plan Agent for the participant's account, depending upon the circumstances described below, either (i) through receipt of additional unissued but authorized shares of common stock from the Fund or (ii) by purchase of outstanding shares of common stock on the open market on the NYSE or elsewhere. If on the payment date of the dividend, the net asset value per share of the common stock is equal to or less than the market price per share plus estimated brokerage commissions (such condition being referred to herein as "market premium"), the Plan Agent will invest the dividend amount in newly issued shares on behalf of the participant. The number of newly issued shares of common stock to be credited to the participant's account will be determined by dividing the dollar amount of the dividend by the net asset value per share on the date the shares are issued, provided that the maximum discount from the then current market price per share on the date of issuance may not exceed 5%. If on the dividend payment date the net asset value per share is greater than the market value (such condition being referred to herein as "market discount"), the Plan Agent will invest the dividend amount in shares acquired on behalf of the participant in open-market purchases.

In the event of a market discount on the dividend payment date, the Plan Agent will have until the last business day before the next date on which the shares trade on the "ex-dividend" basis or in no event more than 30 days after the dividend payment date to invest the dividend amount in shares acquired in open-market purchases. If, before the Plan Agent has completed its open-market

36

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

purchases, the market price of a share of common stock exceeds the net asset value per share, the average per share purchase price paid by the Plan Agent may exceed the net asset value of the Fund's shares, resulting in the acquisition of

Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

fewer shares than if the dividend had been paid in newly issued shares on the dividend payment date. The Plan provides that if the Plan Agent is unable to invest the full dividend amount in open-market purchases during the purchase period or if the market discount shifts to market premium during the purchase period, the Plan Agent will cease making open-market purchases and will invest the uninvested portion of the dividend amount in newly issued shares at the close of business on the last purchase date.

The Plan Agent maintains all shareholders' accounts in the Plan and furnishes written confirmation of all transactions in the accounts, including information needed by shareholders for tax records. Shares in the account of each Plan participant will be held by the Plan Agent on behalf of the Plan participant, and each shareholder's proxy will include those shares purchased or received pursuant to the Plan. The Plan Agent will forward all proxy solicitation materials to participants and vote proxies for shares held pursuant to the Plan in accordance with the instructions of the participants.

In the case of shareholders such as banks, brokers or nominees which hold shares for others who are the beneficial owners, the Plan Agent will administer the Plan on the basis of the number of shares certified from time to time by the record shareholders as representing the total amount registered in the record shareholder's name and held for the account of beneficial owners who are to participate in the Plan.

There will be no brokerage charges with respect to shares issued directly by the Fund as a result of dividends or capital gain distributions payable either in shares or in cash. However, each participant will pay a pro rata share of brokerage commissions incurred with respect to the Plan Agent's open-market purchases in connection with reinvestment of dividends.

The automatic reinvestment of dividends and distributions will not relieve participants of any federal, state or local income tax that may be payable (or required to be withheld) on such dividends.

Shareholders participating in the Plan may receive benefits not available to shareholders not participating in the Plan. If the market price plus commissions of the Fund's shares is above the net asset value, participants in the Plan will receive shares of the Fund at less than they could otherwise purchase them and will have shares with a cash value greater than the value of any cash distribution they would have received on their shares. If the market price plus commissions is below the net asset value, participants will receive distributions in shares with a net asset value greater than the value of any cash distribution they would have received on their shares. However, there may be insufficient shares available in the market to make distributions in shares at prices below the net asset value.

37

-----  
CHARTWELL

CHARTWELL DIVIDEND AND INCOME FUND, INC.

MAY 31, 2002

Also, since the Fund does not redeem its shares, the price on resale may be more or less than the net asset value.

Experience under the Plan may indicate that changes are desirable. Accordingly, the Fund reserves the right to amend or terminate the Plan. There is no direct service charge to participants in the Plan; however, the Fund reserves the right to amend the Plan to include a service charge payable by the participants.

## Edgar Filing: CHARTWELL DIVIDEND & INCOME FUND INC - Form N-30D

All correspondence concerning the Plan should be directed to the Plan Agent at PFPC Inc., P.O. Box 43027, Providence, RI 02940-3027, Attn: Closed-End Department.

### ADDITIONAL INFORMATION (UNAUDITED)

During the period, there have been no material changes in the Fund's investment objective or fundamental policies that have not been approved by the shareholders. There have been no changes in the Fund's charter or By-Laws that would delay or prevent a change in control of the Fund which have not been approved by the shareholders. There have been no changes in the principal risk factors associated with investment in the Fund. There have been no changes in the persons who are primarily responsible for the day-to-day management of the Fund's portfolio.

### EFFECTS OF LEVERAGE

Leverage of \$60 million in commercial paper was initially sold by the Fund on July 28, 1999. Through May 31, 2002, interest paid on the commercial paper ranged from 1.95% to 6.75%. As of May 31, 2002, the Fund had \$30 million outstanding at 1.98% per annum maturing on June 3, 2002, and \$30 million at 2.36% per annum maturing on October 1, 2002. All interest rates include fees due to the broker-dealer. The Fund must experience an annual return of 0.64% to cover interest payments on the commercial paper.

The following table explains the potential effects of leverage on the equity returns of common shareholders:

Assumed return on portfolio (net of expenses)	- 10.00%	- 5.00%	0.00%	5.00%	10.00%
Corresponding return to common stockholder	- 14.90%	- 7.90%	- 90%	6.10%	13.10%

Assumes \$160 million assets attributable to common shareholders; \$60 million aggregate leverage with an average interest rate of 2.25%.
