- (1) Interest rates represent the weighted average annual stated interest rate on loans and debt securities, which are presented by nature of indebtedness for a single issuer. The maturity dates represent the earliest and the latest maturity dates.
- (2) Common stock, preferred stock, warrants, options, and equity interests are generally non-income producing and restricted.
- (4) Non-U.S. company or principal place of business outside the U.S.
- (6) Loan or debt security is on non-accrual status and therefore is considered non-income producing.
- (11) Represents the effective interest yield earned on the cost basis of these preferred equity investments and income notes. The yield is included in interest income in the consolidated statement of operations.

The accompanying notes are an integral part of these consolidated financial statements.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

### NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

#### Note 1. Organization

Allied Capital Corporation, a Maryland corporation, is a closed-end, non-diversified management investment company that has elected to be regulated as a business development company ( BDC ) under the Investment Company Act of 1940 ( 1940 Act ). Allied Capital Corporation ( ACC ) has a real estate investment trust subsidiary, Allied Capital REIT, Inc. ( Allied REIT ), and several subsidiaries that are single member limited liability companies established for specific purposes including holding real estate properties. ACC also has a subsidiary, A.C. Corporation ( AC Corp ), that generally provides diligence and structuring services, as well as transaction, management, consulting, and other services, including underwriting and arranging senior loans, to the Company, its portfolio companies and its managed funds.

ACC and its subsidiaries, collectively, are referred to as the Company. The Company consolidates the results of its subsidiaries for financial reporting purposes.

Pursuant to Accounting Standards Codification ( ASC ) Topic 810 *Consolidations*, the financial results of the Company's portfolio investments are not consolidated in the Company's financial statements. Portfolio investments are held for purposes of deriving investment income and future capital gains.

The investment objective of the Company is to achieve current income and capital gains. In order to achieve this objective, the Company has primarily invested in debt and equity securities of private companies in a variety of industries.

#### Note 2. Summary of Significant Accounting Policies

The consolidated financial statements include the accounts of ACC and its subsidiaries. All intercompany accounts and transactions have been eliminated in consolidation. Certain reclassifications have been made to the 2008 balances to conform with the 2009 financial statement presentation.

In June 2009, the FASB issued SFAS No. 168, *The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles*, which was primarily codified into ASC Topic 105, *Generally Accepted Accounting Standards*. This standard is the single source of authoritative non-governmental U.S. generally accepted accounting principles ( GAAP ), superseding existing FASB, American Institute of Certified Public Accountants ( AICPA ), Emerging Issues Task Force ( EITF ), and related accounting literature. Also included is relevant Securities and Exchange Commission guidance organized using the same topical structure in separate sections. This guidance is effective for financial statements issued for reporting periods that end after September 15, 2009. This guidance impacts the Company's consolidated financial statements and related disclosures as all references to authoritative literature reflect the newly adopted codification.

The accompanying unaudited consolidated financial statements of the Company have been prepared in accordance with GAAP for interim financial information. Accordingly, they do not include all of the information and footnotes required by GAAP for complete consolidated financial statements. In the opinion of management, the unaudited consolidated financial results of the Company included herein contain all adjustments (consisting of only normal recurring accruals) necessary to present fairly the financial position of the Company as of September 30, 2009, the results of operations for the three and nine months ended September 30, 2009 and 2008, and changes in net assets and

cash flows for the nine months ended September 30, 2009 and 2008. The results of operations for the three and nine months

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

ended September 30, 2009, are not necessarily indicative of the operating results to be expected for the full year.

The private finance portfolio and the interest and related portfolio income and net realized gains (losses) on the private finance portfolio are presented in three categories: companies more than 25% owned, which represent portfolio companies where the Company directly or indirectly owns more than 25% of the outstanding voting securities of such portfolio company or where the Company controls the portfolio company's board of directors and, therefore, are deemed controlled by the Company under the 1940 Act; companies owned 5% to 25%, which represent portfolio companies where the Company directly or indirectly owns 5% to 25% of the outstanding voting securities of such portfolio company or where the Company holds one or more seats on the portfolio company's board of directors and, therefore, are deemed to be an affiliated person under the 1940 Act; and companies less than 5% owned which represent portfolio companies where the Company directly or indirectly owns less than 5% of the outstanding voting securities of such portfolio company and where the Company has no other affiliations with such portfolio company. The interest and related portfolio income and net realized gains (losses) from the commercial real estate finance portfolio and other sources, including investments in money market and other securities, are included in the companies less than 5% owned category on the consolidated statement of operations.

In the ordinary course of business, the Company enters into transactions with portfolio companies that may be considered related party transactions.

The Company, as a BDC, has invested in illiquid securities including debt and equity securities of portfolio companies, CLO bonds and preferred shares/income notes, CDO bonds and investment funds. The Company's investments may be subject to certain restrictions on resale and generally have no established trading market. The Company values substantially all of its investments at fair value as determined in good faith by the Board of Directors in accordance with the Company's valuation policy and the provisions of the 1940 Act and ASC Topic 820 *Financial Instruments*, which codified FASB Statement No. 157, *Fair Value Measurements*. The Company determines fair value to be the price that would be received for an investment in a current sale, which assumes an orderly transaction between market participants on the measurement date. The Company's valuation policy considers the fact that no ready market exists for substantially all of the securities in which it invests and that fair value for its investments must typically be determined using unobservable inputs. The Company's valuation policy is intended to provide a consistent basis for determining the fair value of the portfolio.

The Company adopted the standards in ASC Topic 820 on a prospective basis in the first quarter of 2008. These standards require the Company to assume that the portfolio investment is to be sold in the principal market to market participants, or in the absence of a principal market, the most advantageous market, which may be a hypothetical market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact. In accordance with the standards, the Company has considered its principal market, or the market in which the Company exits its portfolio investments with the greatest volume and level of activity.

The Company has determined that for its buyout investments, where the Company has control or could gain control through an option or warrant security, both the debt and equity securities of the portfolio investment would exit in the merger and acquisition (M&A) market as the principal market generally through a sale or recapitalization of the portfolio company. The Company believes that the in-

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

use premise of value (as defined in ASC Topic 820), which assumes the debt and equity securities are sold together, is appropriate as this would provide maximum proceeds to the seller. As a result, the Company uses the enterprise value methodology to determine the fair value of these investments. Enterprise value means the entire value of the company to a market participant, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. Enterprise value is determined using various factors, including cash flow from operations of the portfolio company, multiples at which private companies are bought and sold, and other pertinent factors, such as recent offers to purchase a portfolio company, recent transactions involving the purchase or sale of the portfolio company's equity securities, liquidation events, or other events. The Company allocates the enterprise value to these securities in order of the legal priority of the securities.

While the Company typically exits its securities upon the sale or recapitalization of the portfolio company in the M&A market, for investments in portfolio companies where the Company does not have control or the ability to gain control through an option or warrant security, the Company cannot typically control the exit of its investment into its principal market (the M&A market). As a result, in accordance with ASC Topic 820, the Company is required to determine the fair value of these investments assuming a sale of the individual investment (the in-exchange premise of value) in a hypothetical market to a hypothetical market participant. The Company continues to perform an enterprise value analysis for the investments in this category to assess the credit risk of the loan or debt security and to determine the fair value of its equity investment in these portfolio companies. The determined equity values are generally discounted when the Company has a minority ownership position, restrictions on resale, specific concerns about the receptivity of the capital markets to a specific company at a certain time, or other factors. For loan and debt securities, the Company performs a yield analysis assuming a hypothetical current sale of the investment. The yield analysis requires the Company to estimate the expected repayment date of the instrument and a market participant's required yield. The Company's estimate of the expected repayment date of a loan or debt security may be shorter than the legal maturity of the instruments as the Company's loans have historically been repaid prior to the maturity date. The yield analysis considers changes in interest rates and changes in leverage levels of the loan or debt security as compared to market interest rates and leverage levels. Assuming the credit quality of the loan or debt security remains stable, the Company will use the value determined by the yield analysis as the fair value for that security. A change in the assumptions that the Company uses to estimate the fair value of its loans and debt securities using the yield analysis could have a material impact on the determination of fair value. If there is deterioration in credit quality or a loan or debt security is in workout status, the Company may consider other factors in determining the fair value of a loan or debt security, including the value attributable to the loan or debt security from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis.

The Company's equity investments in private debt and equity funds are generally valued based on the fund's net asset value, unless other factors lead to a determination of fair value at a different amount. The value of the Company's equity securities in public companies for which quoted prices in an active market are readily available is based on the closing public market price on the measurement date.

The fair value of the Company's CLO bonds and preferred shares/income notes and CDO bonds (CLO/CDO Assets) is generally based on a discounted cash flow model that utilizes prepayment, re-investment, loss and ratings assumptions based on historical experience and projected performance, economic factors, the characteristics of the underlying cash flow, and comparable yields for similar bonds and preferred shares/ income notes, when available. The Company recognizes unrealized appreciation or

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

depreciation on its CLO/CDO Assets as comparable yields in the market change and/or based on changes in estimated cash flows resulting from changes in prepayment, re-investment, loss or ratings assumptions in the underlying collateral pool or changes in redemption assumptions for the CLO/CDO Assets, if applicable. The Company determines the fair value of its CLO/CDO Assets on an individual security-by-security basis.

The Company records unrealized depreciation on investments when it determines that the fair value of a security is less than its cost basis, and records unrealized appreciation when it determines that the fair value is greater than its cost basis. Because of the inherent uncertainty of valuation, the values determined at the measurement date may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the values determined at the measurement date. In accordance with ASC Topic 820 (discussed below), the Company does not consider a transaction price that is associated with a transaction that is not orderly to be indicative of fair value or market participant risk premiums, and accordingly would place little, if any, weight on transactions that are not orderly in determining fair value. When considering recent potential or completed transactions, the Company uses judgment in determining if such offers or transactions were pursuant to an orderly process for purposes of determining how much weight is placed on these data points in accordance with the applicable guidelines in ASC Topic 820.

***Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation***

Realized gains or losses are measured by the difference between the net proceeds from the repayment or sale and the cost basis of the investment without regard to unrealized appreciation or depreciation previously recognized, and include investments charged off during the period, net of recoveries. Net change in unrealized appreciation or depreciation primarily reflects the change in portfolio investment values during the reporting period, including the reversal of previously recorded unrealized appreciation or depreciation when gains or losses are realized. Net change in unrealized appreciation or depreciation also reflects the change in the value of U.S. Treasury bills, when applicable, and depreciation on accrued interest and dividends receivable and other assets where collection is doubtful.

***Interest and Dividend Income***

Interest income is recorded on an accrual basis to the extent that such amounts are expected to be collected. For loans and debt securities with contractual payment-in-kind interest, which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity, the Company will not accrue payment-in-kind interest if the portfolio company valuation indicates that the payment-in-kind interest is not collectible. In general, interest is not accrued on loans and debt securities if the Company has doubt about interest collection or where the enterprise value of the portfolio company may not support further accrual. Interest may not accrue on loans or debt securities to portfolio companies that are more than 50% owned by the Company depending on such company's capital requirements.

When the Company receives nominal cost warrants or free equity securities ( nominal cost equity ), the Company allocates its cost basis in its investment between its debt securities and its nominal cost

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

equity at the time of origination. At that time, the original issue discount basis of the nominal cost equity is recorded by increasing the cost basis in the equity and decreasing the cost basis in the related debt securities. Loan origination fees, original issue discount, and market discount are capitalized and then amortized into interest income using a method that approximates the effective interest method. Upon the prepayment of a loan or debt security, any unamortized loan origination fees are recorded as interest income and any unamortized original issue discount or market discount is recorded as a realized gain.

The weighted average yield on loans and debt securities is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total loans and debt securities at value. The weighted average yield is computed as of the balance sheet date.

The Company recognizes interest income on the CLO preferred shares/income notes using the effective interest method, based on the anticipated yield that is determined using the estimated cash flows over the projected life of the investment. Yields are revised when there are changes in actual or estimated cash flows due to changes in prepayments and/or re-investments, credit losses, ratings or asset pricing. Changes in estimated yield are recognized as an adjustment to the estimated yield over the remaining life of the preferred shares/income notes from the date the estimated yield was changed. CLO and CDO bonds have stated interest rates. The weighted average yield on the CLO/CDO Assets is calculated as the (a) annual stated interest or the effective interest yield on the accruing bonds or the effective yield on the preferred shares/income notes, divided by (b) CLO/CDO Assets at value. The weighted average yields are computed as of the balance sheet date.

Dividend income on preferred equity securities is recorded as dividend income on an accrual basis to the extent that such amounts are expected to be collected and to the extent that the Company has the option to receive the dividend in cash. Dividend income on common equity securities is recorded on the record date for private companies or on the ex-dividend date for publicly traded companies.

***Fee Income***

Fee income includes fees for loan prepayment premiums, guarantees, commitments and services rendered by the Company to portfolio companies and other third parties such as diligence, structuring, transaction services, management and consulting services, and other services. Loan prepayment premiums are recognized at the time of prepayment. Guaranty and commitment fees are generally recognized as income over the related period of the guaranty or commitment, respectively. Diligence, structuring, and transaction services fees are generally recognized as income when services are rendered or when the related transactions are completed. Management, consulting and other services fees, including fund management fees, are generally recognized as income as the services are rendered. Fees are not accrued if the Company has doubt about collection of those fees.

***Cash and Cash Equivalents***

Cash and cash equivalents represents unrestricted cash and highly liquid securities with original maturities of 90 days or less.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

***Guarantees***

Guarantees meeting the characteristics described in ASC Topic 460, *Guarantees* and issued or modified after December 31, 2002, are recognized at fair value at inception. Guarantees made on behalf of portfolio companies are considered in determining the fair value of the Company's investments. See Note 5.

***Financing Costs***

Debt financing costs are based on actual costs incurred in obtaining debt financing and generally are deferred and amortized as part of interest expense over the term of the related debt instrument using a method that approximates the effective interest method. Costs associated with the issuance of common stock are recorded as a reduction to the proceeds from the sale of common stock. Financing costs generally include underwriting, accounting and legal fees, and printing costs.

***Dividends to Shareholders***

Dividends to shareholders are recorded on the ex-dividend date.

***Stock Compensation Plans***

The Company has a stock-based employee compensation plan. See Note 9. Effective January 1, 2006, the Company adopted the provisions of FASB Statement No. 123 (Revised 2004), *Share-Based Payment* (SFAS 123R), which was primarily codified into ASC Topic 718, *Compensation - Stock Compensation*. These standards were adopted using the modified prospective method of application, which required the Company to recognize compensation costs on a prospective basis beginning January 1, 2006. Accordingly, the Company did not restate prior year financial statements. Under this method, the unamortized cost of previously awarded options that were unvested as of January 1, 2006, is recognized over the remaining service period in the statement of operations beginning in 2006, using the fair value amounts determined for pro forma disclosure under these standards. With respect to options granted on or after January 1, 2006, compensation cost based on estimated grant date fair value is recognized over the related service period in the statement of operations.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 2. Summary of Significant Accounting Policies, continued

The stock option expense for the three and nine months ended September 30, 2009 and 2008, was as follows:

(\$ in millions, except per share amounts)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Employee Stock Option Expense:				
Previously awarded, unvested options as of January 1, 2006	\$	\$	\$	\$3.9
Options granted on or after January 1, 2006	0.4	1.5	2.4	5.6
Total employee stock option expense	\$0.4	\$1.5	\$2.4	\$9.5
Per basic share	\$0.00	\$0.01	\$0.01	\$0.06
Per diluted share	\$0.00	\$0.01	\$0.01	\$0.06

**Options Granted.** The stock option expense shown in the table above was based on the underlying value of the options granted by the Company. The fair value of each option grant was estimated on the date of grant using the Black-Scholes option pricing model and expensed over the vesting period. The following weighted average assumptions were used to calculate the fair value of options granted during the three and nine months ended September 30, 2009 and 2008:

	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Expected term (in years)	5.0	3.0	5.0	5.0
Risk-free interest rate	3.4%	1.3%	2.8%	2.8%
Expected volatility	32.8%	105.0%	27.8%	27.8%
Dividend yield	8.5%	32.5%	8.5%	8.5%
Weighted average fair value per option	\$1.81	\$0.21	\$2.18	\$2.18

The expected term of the options granted represents the period of time that such options are expected to be outstanding. To determine the expected term of the options, the Company used historical and other data to estimate option exercise time frames, including considering employee terminations. The risk free rate was based on the U.S. Treasury bond yield curve at the date of grant consistent with the expected term. Expected volatilities were determined based on the historical volatility of the Company's common stock over a historical time period consistent with the expected term. The dividend yield was determined based on an estimate of the Company's future dividends over the expected term, relative to the option price. The estimate of future dividends takes into consideration the Company's estimate of future taxable income required to be distributed in order to maintain its status as a registered

investment company (see Federal and State Income Taxes and Excise Tax below). The Company currently is not paying a dividend and may or may not be able to pay a dividend during the expected term. In addition, actual future taxable income and dividends may significantly differ from these estimates.

To determine the stock options expense for options granted, the calculated fair value of the options granted is applied to the options granted, net of assumed future option forfeitures. The Company estimates that the employee-related stock option expense will be \$3.4 million, \$3.9 million, and

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

\$4.0 million for the years ended December 31, 2009, 2010, and 2011, respectively. This estimate may change if the Company's assumptions related to future option forfeitures change. This estimate does not include any expense related to stock option grants after September 30, 2009, as the fair value of those stock options will be determined at the time of grant. The aggregate total stock option expense remaining as of September 30, 2009, is expected to be recognized over an estimated weighted-average period of 1.30 years.

***Federal and State Income Taxes and Excise Tax***

The Company has complied with the requirements of the Code that are applicable to regulated investment companies ( RIC ) and real estate investment trusts ( REIT ). ACC and any subsidiaries that qualify as a RIC or a REIT intend to distribute or retain through a deemed distribution all of their annual taxable income to shareholders; therefore, the Company has made no provision for income taxes exclusive of excise taxes for these entities.

If the Company does not distribute at least 98% of its annual taxable income in the year earned, the Company will generally be required to pay an excise tax equal to 4% of the amount by which 98% of the Company's annual taxable income exceeds the distributions from such taxable income during the year earned. To the extent that the Company determines that its estimated current year annual taxable income will be in excess of estimated current year dividend distributions from such taxable income, the Company accrues excise taxes on estimated excess taxable income as taxable income is earned using an annual effective excise tax rate. The annual effective excise tax rate is determined by dividing the estimated annual excise tax by the estimated annual taxable income.

Income taxes for AC Corp are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases as well as operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

***Per Share Information***

Basic earnings per common share is calculated using the weighted average number of common shares outstanding for the period presented. Diluted earnings per common share reflects the potential dilution that could occur if options to issue common stock were exercised into common stock. Common stock equivalents of 3,814,040 shares and 5,703 shares were not included in the calculation of diluted earnings (loss) per common share for the nine months ended September 30, 2009 and 2008, respectively, as the effect would have been antidilutive.

***Use of Estimates in the Preparation of Financial Statements***

The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from these estimates.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

The consolidated financial statements include portfolio investments at value of \$2.5 billion and \$3.5 billion at September 30, 2009, and December 31, 2008, respectively. At September 30, 2009, and December 31, 2008, 88% and 94%, respectively, of the Company's total assets represented portfolio investments whose fair values have been determined by the Board of Directors in good faith in the absence of readily available market values. Because of the inherent uncertainty of valuation, the Board of Directors' determined values may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

***Recent Accounting Pronouncements***

*Fair Value Measurements.* In September 2006, the FASB issued Statement No. 157, which was primarily codified into ASC Topic 820, defines fair value, establishes a framework for measuring fair value in GAAP, and expands disclosures about fair value measurements. This statement was effective for financial statements issued for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years.

The Company adopted this statement on a prospective basis beginning in the quarter ended March 31, 2008. The initial adoption of this statement did not have a material effect on the Company's consolidated financial statements.

ASC Topic 820 also includes the codification of *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active* ( FSP 157-3 ), which was issued by the FASB in October 2008. These provisions apply to financial assets within the scope of accounting pronouncements that require or permit fair value measurements in accordance with ASC Topic 820. These provisions of ASC Topic 820 provide clarification in a market that is not active and provide an example to illustrate key considerations in determining the fair value.

The Company applied these provisions of ASC Topic 820 relating to determining the fair value of a financial asset when the market for that asset is not active, in determining the fair value of its portfolio investments at December 31, 2008. The application of these provisions did not have a material impact on the Company's consolidated financial position or its results of operations.

ASC Topic 820 also includes the codification of *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* ( FSP 157-4 ), which was issued by the FASB in April 2009. These provisions provide guidance on how to determine the fair value of assets under ASC Topic 820 in the current economic environment and reemphasize that the objective of a fair value measurement remains an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. These provisions state that a transaction price that is associated with a transaction that is not orderly is not determinative of fair value or market-participant risk premiums and companies should place little, if any, weight (compared with other indications of fair value) on transactions that are not orderly when estimating fair value or market risk premiums.

The Company adopted these provisions of ASC Topic 820 on a prospective basis beginning in the quarter ending March 31, 2009. The adoption of these provisions did not have a material effect on the Company's consolidated financial statements.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Note 2. Summary of Significant Accounting Policies, continued

*The Fair Value Option for Financial Assets and Financial Liabilities Including an Amendment of FASB Statement No. 115*, which was primarily codified into ASC Topic 320. In February 2007, the FASB issued Statement No. 159, which was primarily codified into ASC Topic 825, permits an entity to choose to measure many financial instruments and certain other items at fair value. This statement applies to all reporting entities, and contains financial statement presentation and disclosure requirements for assets and liabilities reported at fair value as a consequence of the election. This statement was effective for fiscal years beginning after November 15, 2007, and interim periods within those fiscal years.

The Company did not elect fair value measurement for assets or liabilities other than portfolio investments, which already were required to be measured at fair value, therefore, the adoption of this statement did not impact the Company's consolidated financial position or its results of operations.

*Subsequent Events* ( SFAS 165 ), which was primarily codified into ASC Topic 855. In May 2009, the FASB issued SFAS 165 which establishes general standards for reporting events that occur after the balance sheet date, but before financial statements are issued or are available to be issued. This standard requires the disclosure of the date through which an entity has evaluated subsequent events and whether that date represents the date the financial statements were issued or were available to be issued.

The Company adopted these provisions of ASC 855 in the quarter ended June 30, 2009. The adoption of these provisions did not have a material impact on the Company's financial statements.

*Accounting for Transfers of Financial Assets* ( SFAS 166 ), which has not yet been codified. In June 2009, the FASB issued SFAS 166, which changes the conditions for reporting a transfer of a portion of a financial asset as a sale and requires additional year-end and interim disclosures. SFAS 166 is effective for fiscal years beginning after November 15, 2009.

The implementation of SFAS 166 is not expected to have a material impact on the Company's financial statements.

*Amendments to FASB Interpretation No. 46(R)* ( SFAS 167 ), which will be codified into ASC Topic 810, *Consolidation*. In June 2009, the FASB issued SFAS 167, which amends the guidance on accounting for variable interest entities. SFAS 167 is effective for fiscal years beginning after November 15, 2009 and interim periods within that fiscal year. The Company has not completed the process of evaluating the impact of adopting this standard.

*The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles* ( SFAS 168 ), which was primarily codified into Topic 105, was issued by the FASB in July 2009. This standard, which supersedes SFAS No. 162, *The Hierarchy of Generally Accepted Accounting Principles*, establishes the FASB Accounting Standards Codification, which will become the source of authoritative GAAP recognized by the FASB. This standard is effective for the period ending after September 15, 2009. The implementation of this standard did not have a material impact on the Company's financial statements.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 3. Portfolio

*Private Finance*

At September 30, 2009, and December 31, 2008, the private finance portfolio consisted of the following:

(\$ in millions)	Cost	2009 Value	Yield <sup>(1)</sup>	Cost	2008 Value	Yield <sup>(1)</sup>
Loans and debt securities:						
Senior loans	\$ 553.1	\$ 289.4	4.8%	\$ 556.9	\$ 306.3	5.6%
Unitranche debt <sup>(2)</sup>	424.9	374.7	12.2%	527.5	456.4	12.0%
Subordinated debt <sup>(3)</sup>	1,770.9	1,182.9	13.4%	2,300.1	1,829.1	12.9%
Total loans and debt securities <sup>(4)</sup>	2,748.9	1,847.0	11.8%	3,384.5	2,591.8	11.9%
Equity securities:						
Preferred shares/income notes of CLOs <sup>(5)</sup>	245.0	84.4	12.1%	248.2	179.2	16.4%
Subordinated certificates in Senior Secured Loan Fund LLC <sup>(5)</sup>	165.2	165.0	14.0%	125.4	125.4	12.0%
Other equity securities	1,035.2	346.3		1,119.3	502.7	
Total equity securities	1,445.4	595.7		1,492.9	807.3	
Total	\$ 4,194.3	\$ 2,442.7		\$ 4,877.4	\$ 3,399.1	

(1) The weighted average yield on loans and debt securities is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total loans and debt securities at value. At September 30, 2009, and December 31, 2008, senior loans included the senior secured loan to Ciena totaling \$319.0 million and \$319.0 million at cost, respectively, and \$102.2 million and \$104.9 million at value, respectively, which was placed on non-accrual status on the purchase date.

The weighted average yield on the preferred shares/income notes of CLOs is calculated as the (a) effective interest yield on the preferred shares/income notes of CLOs, divided by (b) total preferred shares/income notes of CLOs at value. The weighted average yields are computed as of the balance sheet date. The yield on the CLO assets represents the yield used for recording interest income. The market yield used in the valuation of the CLO assets may be different than the interest yields.

The weighted average yield on the subordinated certificates in the Senior Secured Loan Fund LLC is computed as the (a) effective interest yield on the subordinated certificates divided by (b) total investment at value.

(2) Unitranche debt is an investment that combines both senior and subordinated financing, generally in a first lien position.

(3) Subordinated debt includes bonds in CLOs and in a CDO.

- (4) The total principal balance outstanding on loans and debt securities was \$2,775.9 million and \$3,418.0 million at September 30, 2009, and December 31, 2008, respectively. The difference between principal and cost is represented by unamortized loan origination fees and costs, original issue discounts, and market discounts totaling \$27.0 million and \$33.5 million at September 30, 2009, and December 31, 2008, respectively.
- (5) Investments in the preferred shares/income notes of CLOs and the subordinated certificates in Senior Secured Loan Fund LLC earn a current return that is included in interest income in the accompanying consolidated statement of operations.

The Company's private finance investment activity principally involves providing financing through privately negotiated long-term debt and equity investments. The Company's private finance debt and equity investments generally are issued by private companies and generally are illiquid and may be subject to certain restrictions on resale.

The Company's private finance debt investments are generally structured as loans and debt securities that carry a relatively high fixed rate of interest, which may be combined with equity features, such as conversion privileges, or warrants or options to purchase a portion of the portfolio company's equity at a pre-determined strike price, which is generally a nominal price for warrants or options in a private company. The annual stated interest rate is only one factor in pricing the investment relative to the Company's rights and priority in the portfolio company's capital structure, and will vary depending on

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 3. Portfolio, continued**

many factors, including if the Company has received nominal cost equity or other components of investment return, such as loan origination fees or market discount. The stated interest rate may include some component of contractual payment-in-kind interest, which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity.

At September 30, 2009, 80% of the private finance loans and debt securities had a fixed rate of interest and 20% had a floating rate of interest. At December 31, 2008, 85% of the private finance loans and debt securities had a fixed rate of interest and 15% had a floating rate of interest. Senior loans may carry a fixed rate of interest or a floating rate of interest, usually set as a spread over prime or LIBOR, and may require payments of both principal and interest throughout the life of the loan. Senior loans generally have contractual maturities of three to six years and interest is generally paid to the Company monthly or quarterly. Unitranche debt generally carries a fixed rate of interest and generally requires payments of both principal and interest throughout the life of the loan. Unitranche debt generally has contractual maturities of five to six years and interest generally is paid to the Company quarterly. Subordinated debt generally carries a fixed rate of interest generally with contractual maturities of five to ten years and generally has interest-only payments in the early years and payments of both principal and interest in the later years, although maturities and principal amortization schedules may vary. Interest on subordinated debt generally is paid to the Company quarterly.

Equity securities primarily consist of securities issued by private companies and may be subject to certain restrictions on their resale and are generally illiquid. The Company may make equity investments for minority stakes in portfolio companies or may receive equity features, such as nominal cost warrants. The Company also may invest in the equity (preferred and/or voting or non-voting common) of a portfolio company where the Company's equity ownership may represent a significant portion of the equity, but may or may not represent a controlling interest. If the Company invests in non-voting equity in a buyout investment, the Company generally has the option to acquire a controlling stake in the voting securities of the portfolio company at fair market value. The Company may incur costs associated with making buyout investments that will be included in the cost basis of the Company's equity investment. These include costs such as legal, accounting and other professional fees associated with diligence, referral and investment banking fees, and other costs. Equity securities generally do not produce a current return, but are held with the potential for investment appreciation and ultimate gain on sale.

**Ciena Capital LLC.** Ciena Capital LLC (f/k/a Business Loan Express, LLC) ( Ciena ) has provided loans to commercial real estate owners and operators. Ciena has been a participant in the Small Business Administration's 7(a) Guaranteed Loan Program and its wholly-owned subsidiary is licensed by the SBA as a Small Business Lending Company ( SBLC ). Ciena remains subject to SBA rules and regulations. Ciena is headquartered in New York, NY.

On September 30, 2008, Ciena voluntarily filed for bankruptcy protection under Chapter 11 of Title 11 of the United States Code (the Bankruptcy Code ) in the United States Bankruptcy Court for the Southern District of New York (the Court ). Ciena continues to service and manage its assets as a debtor-in-possession under the jurisdiction of the Court and in accordance with the applicable provisions of the Bankruptcy Code and the orders of the Court.

As a result of Ciena's decision to file for bankruptcy protection, the Company's unconditional guaranty of the obligations outstanding under Ciena's revolving credit facility became due and the Company, in lieu of paying under its guaranty, purchased the positions of the senior lenders under Ciena's revolving credit facility. As of September 30,

2009, the senior secured loan to Ciena had a cost

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

**Note 3. Portfolio, continued**

basis of \$319.0 million and a value of \$102.2 million. The Company continues to guarantee the remaining principal balance of \$5 million, plus related interest, fees and expenses payable to a third party bank. In connection with the Company's continuing guaranty of the amounts held by this bank, the Company has agreed that the amounts owing to the bank under the Ciena revolving credit facility will be paid before any of the secured obligations of Ciena now owed to the Company.

At September 30, 2009 and December 31, 2008, the Company's investment in Ciena was as follows:

(\$ in millions)	September 30, 2009		December 31, 2008	
	Cost	Value	Cost	Value
Senior Loan	\$ 319.0	\$ 102.2	\$ 319.0	\$ 104.9
Class B Equity Interests <sup>(1)</sup>	119.5		119.5	
Class C Equity Interests <sup>(1)</sup>	109.1		109.3	
Total <sup>(2)</sup>	\$ 547.6	\$ 102.2	\$ 547.8	\$ 104.9

<sup>(1)</sup> At September 30, 2009 and December 31, 2008, the Company held 100% of the Class B equity interests and 94.9% of the Class C equity interests.

<sup>(2)</sup> In addition to the Company's investment in Ciena included in the portfolio, the Company has amounts receivable from or related to Ciena that are included in other assets in the accompanying consolidated financial statements. See below.

During the nine months ended September 30, 2009, the Company funded \$97.4 million to support Ciena's term securitizations in lieu of draws under related standby letters of credit, including the funding of \$46.0 million during the third quarter of 2009. This was required primarily as a result of the issuer of the letters of credit not extending maturing standby letters of credit that were issued under the Company's former revolving line of credit. The amounts funded were recorded as other assets in the accompanying consolidated balance sheet. At September 30, 2009 and December 31, 2008, other assets included amounts receivable from or related to Ciena totaling \$112.7 million and \$15.4 million, respectively, at cost and \$2.0 million and \$2.1 million, respectively, at value. Net change in unrealized appreciation or depreciation included a net decrease related to the Company's investment in and receivables from Ciena of \$36.8 million and \$99.8 million for the three and nine months ended September 30, 2009, respectively. Net change in unrealized appreciation or depreciation included a net decrease in the Company's investment in and receivables from Ciena of \$151.9 million and \$220.5 million for the three and nine months ended September 30, 2008, respectively.

At September 30, 2009, the Company had no outstanding standby letters of credit issued under the Company's former line of credit. The Company has considered the letters of credit and the funding thereof in the valuation of Ciena at September 30, 2009 and December 31, 2008.

The Company's investment in Ciena was on non-accrual status, therefore the Company did not earn any interest and related portfolio income from its investment in Ciena for each of the three and nine months ended September 30, 2009 and 2008.

At September 30, 2009, Ciena had one non-recourse securitization SBA loan warehouse facility, which has reached its maturity date but remains outstanding. Ciena is working with the providers of the SBA loan warehouse facility with regard to the repayment of that facility. The Company has issued a performance guaranty whereby the Company agreed to indemnify the warehouse providers for any damages, losses, liabilities and related costs and expenses that they may incur as a result of Ciena's

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 3. Portfolio, continued

failure to perform any of its obligations as loan originator, loan seller or loan servicer under the warehouse securitizations.

The Office of the Inspector General of the SBA (OIG) and the United States Secret Service are conducting ongoing investigations of allegedly fraudulently obtained SBA guaranteed loans issued by Ciena. Ciena also is subject to other SBA and OIG audits, investigations, and reviews. In addition, the Office of the Inspector General of the U.S. Department of Agriculture is conducting an investigation of Ciena's lending practices under the Business and Industry Loan (B&I) program. The OIG and the U.S. Department of Justice are also conducting a civil investigation of Ciena's lending practices in various jurisdictions. The Company is unable to predict the outcome of these inquiries, and it is possible that third parties could try to seek to impose liability against the Company in connection with certain defaulted loans in Ciena's portfolio. These investigations, audits and reviews are ongoing.

These investigations, audits, reviews, and litigation have had and may continue to have a material adverse impact on Ciena and, as a result, could continue to negatively affect the Company's financial results. The Company has considered Ciena's voluntary filing for bankruptcy protection, the letters of credit and the funding thereof, current regulatory issues, ongoing investigations and litigation in performing the valuation of Ciena at September 30, 2009 and at December 31, 2008.

*Collateralized Loan Obligations ( CLOs ) and Collateralized Debt Obligations ( CDOs ).* At September 30, 2009, and December 31, 2008, the Company owned bonds and preferred shares/income notes in CLOs and bonds in a CDO as follows:

(\$ in millions)	Cost	2009 Value	Yield <sup>(1)</sup>	Cost	2008 Value	Yield <sup>(1)</sup>
<i>Bonds<sup>(2)</sup>:</i>

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

**Note 3. Portfolio, continued**

- (1) The weighted average yield is calculated as the (a) annual stated interest or the effective interest yield on the accruing bonds or the effective interest yield on the preferred shares/income notes, divided by (b) CLO and CDO assets at value. The yield on these debt and equity securities is included in interest income in the accompanying consolidated statement of operations. The market yield used in the valuation of the CLO and CDO assets may be different than the interest yields shown above.
- (2) These securities are included in private finance subordinated debt.
- (3) These funds are managed by the Company through a wholly-owned subsidiary.

The initial yields on the cost basis of the CLO preferred shares and income notes are based on the estimated future cash flows expected to be paid to these CLO classes from the underlying collateral assets. As each CLO preferred share or income note ages, the estimated future cash flows are updated based on the estimated performance of the underlying collateral assets, and the respective yield on the cost basis is adjusted as necessary. As future cash flows are subject to uncertainties and contingencies that are difficult to predict and are subject to future events that may alter current assumptions, no assurance can be given that the anticipated yields to maturity will be achieved.

The bonds, preferred shares and income notes of the CLOs and CDO in which the Company has invested are junior in priority for payment of interest and principal to the more senior notes issued by the CLOs and CDO. Cash flow from the underlying collateral assets in the CLOs and CDO is generally allocated first to the senior bonds in order of priority. Any remaining cash flow is then generally distributed to the preferred shareholders and income note holders. To the extent there are ratings downgrades, defaults and unrecoverable losses on the underlying collateral assets that result in reduced cash flows, the preferred shares/income notes will bear this loss first and then the subordinated bonds would bear any loss after the preferred shares/income notes. At both September 30, 2009, and December 31, 2008, the face value of the CLO and CDO assets held by the Company was subordinate to as much as 94% of the face value of the securities outstanding in these CLOs and CDO.

At September 30, 2009, and December 31, 2008, the underlying collateral assets of these CLO and CDO issuances, consisting primarily of senior corporate loans, were issued by 627 issuers and 658 issuers, respectively, and had balances as follows:

(\$ in millions)	2009	2008
Bonds	\$ 232.3	\$ 268.3
Syndicated loans	4,387.2	4,477.3
Cash <sup>(1)</sup>	107.9	89.6
Total underlying collateral assets at cost <sup>(2)</sup>	\$ 4,727.4	\$ 4,835.2

(1) Includes undrawn liability amounts.

(2) At September 30, 2009, and December 31, 2008, the total cost basis of defaulted obligations was \$139.6 million and \$95.0 million, respectively, or approximately 3.0% and 2.0% respectively, of the total underlying collateral assets.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 3. Portfolio, continued

**Loans and Debt Securities on Non-Accrual Status.** At September 30, 2009, and December 31, 2008, private finance loans and debt securities at value not accruing interest were as follows:

(\$ in millions)	2009	2008
Loans and debt securities		
Companies more than 25% owned	\$ 194.2	\$ 176.1
Companies 5% to 25% owned	15.3	
Companies less than 5% owned	96.3	151.8
Total	\$ 305.8	\$ 327.9

**Industry and Geographic Compositions.** The industry and geographic compositions of the private finance portfolio at value at September 30, 2009, and December 31, 2008, were as follows:

	2009	2008
<b>Industry</b>		
Business services	32%	36%
Consumer products	28	24
Private debt funds	8	6
Financial services	8	5
CLO/CDO <sup>(1)</sup>	6	8
Consumer services	5	5
Industrial products	3	5
Retail	2	5
Healthcare services	2	2
Other	6	4
Total	100%	100%
<b>Geographic Region<sup>(2)</sup></b>		
Mid-Atlantic	42%	41%
Midwest	30	28
Southeast	15	17
West	12	13
Northeast	1	1
Total	100%	100%

- (1) These funds primarily invest in senior corporate loans. Certain of these funds are managed by Callidus Capital, a portfolio company of Allied Capital.
- (2) The geographic region for the private finance portfolio depicts the location of the headquarters for the Company's portfolio companies. The portfolio companies may have a number of other locations in other geographic regions.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 3. Portfolio, continued

*Commercial Real Estate Finance*

At September 30, 2009, and December 31, 2008, the commercial real estate finance portfolio consisted of the following:

(\$ in millions)	2009			2008		
	Cost	Value	Yield <sup>(1)</sup>	Cost	Value	Yield <sup>(1)</sup>
Commercial mortgage loans	\$ 54.9	\$ 50.5	6.9%	\$ 52.5	\$ 53.5	7.4%
Real estate owned	5.9	6.2		18.2	20.8	
Equity interests	13.2	11.8		14.8	19.6	
Total	\$ 74.0	\$ 68.5		\$ 85.5	\$ 93.9	

<sup>(1)</sup> The weighted average yield on the commercial mortgage loans is computed as the (a) annual stated interest on accruing loans plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans less the annual amortization of origination costs, divided by (b) total interest-bearing investments at value. The weighted average yield is computed as of the balance sheet date.

**Commercial Mortgage Loans and Equity Interests.** The commercial mortgage loan portfolio contains loans that were originated by the Company or were purchased from third-party sellers. At September 30, 2009, and December 31, 2008, approximately 63% and 69% of the Company's commercial mortgage loan portfolio was composed of fixed interest rate loans, respectively, and 37% and 31% of the Company's commercial loan portfolio was composed of adjustable interest rate loans, respectively. At September 30, 2009, and December 31, 2008, loans with a value of \$9.2 million and \$7.7 million, respectively, were not accruing interest. Loans greater than 120 days delinquent generally do not accrue interest.

Equity interests primarily consist of equity securities issued by privately owned companies that invest in single real estate properties. These equity interests may be subject to certain restrictions on their resale and are generally illiquid. Equity interests generally do not produce a current return, but are generally held in anticipation of potential investment appreciation and ultimate realized gain on sale.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

Midwest	13	22
Northeast	9	9
Mid-Atlantic		
Total	100%	100%

***Fair Value Measurements***

The Company, as a BDC, has invested in illiquid securities including debt and equity securities of portfolio companies, CLO bonds and preferred shares/income notes, CDO bonds and investment funds. The Company's investments may be subject to certain restrictions on resale and generally have no established trading market. The Company values substantially all of its investments at fair value as determined in good faith by the Board of Directors in accordance with the Company's valuation policy and the provisions of the 1940 Act and ASC Topic 820. The Company determines fair value to be the price that would be received for an investment in a current sale, which assumes an orderly transaction between market participants on the measurement date. The Company's valuation policy considers the fact that no ready market exists for substantially all of the securities in which it invests and that fair value for its investments must typically be determined using unobservable inputs.

ASC Topic 820 establishes a fair value hierarchy that encourages the use of observable inputs, but allows for unobservable inputs when observable inputs do not exist. Inputs are classified into one of three categories:

Level 1 Quoted prices (unadjusted) in active markets for identical assets

Level 2 Inputs other than quoted prices that are observable to the market participant for the asset or quoted prices in a market that is not active

Level 3 Unobservable inputs

When there are multiple inputs for determining the fair value of an investment, the Company classifies the investment in total based on the lowest level input that is significant to the fair value measurement.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 3. Portfolio, continued

The Company has \$90.0 million in investments in money market and other securities, which the Company has determined are Level 1 assets but are not included in the Company's investment portfolio. Portfolio assets measured at fair value on a recurring basis by level within the fair value hierarchy at September 30, 2009, were as follows:

(\$ in millions)	Fair Value Measurement as of September 30, 2009	Quoted Prices in Active Markets for Identical Assets (Level 1)	Significant Other Observable Inputs (Level 2)	Significant Unobservable Inputs (Level 3)
Assets at Fair Value:				
Portfolio				
Private finance:				
Loans and debt securities	\$ 1,847.0	\$	\$	\$ 1,847.0
Preferred shares/income notes of CLOs	84.4			84.4
Subordinated certificates in Senior Secured Loan Fund LLC	165.0			165.0
Other equity securities	346.3			346.3
Commercial real estate finance	68.5			68.5
Total portfolio	\$ 2,511.2	\$	\$	\$ 2,511.2

The table below sets forth a summary of changes in the Company's assets measured at fair value using level 3 inputs.

(\$ in millions)	Loans and Debt Securities	Private Finance		Other Equity Securities	Commercial Real Estate Finance	Total
		Preferred Shares/ Income Notes of CLOs	Subordinated Certificates in Senior Secured Fund LLC			
Balance at December 31, 2008	\$ 2,591.8	\$ 179.2	\$ 125.4	\$ 502.7	\$ 93.9	\$ 3,493.0
Total gains or losses						
Net realized gains (losses) <sup>(1)</sup>	(116.5)	11.7		(40.9)	(3.7)	(149.4)
Net change in unrealized appreciation or depreciation <sup>(2)</sup>	(109.2)	(91.5)	(0.2)	(72.3)	(13.9)	(287.1)

Purchases, issuances, repayments and exits, net <sup>(3)</sup>	(519.1)	(15.0)	39.8	(43.2)	(7.8)	(545.3)
Transfers in and/or out of level 3						
Balance at September 30, 2009	\$ 1,847.0	\$ 84.4	\$ 165.0	\$ 346.3	\$ 68.5	\$ 2,511.2
Net unrealized appreciation (depreciation) during the period relating to assets still held at the reporting date <sup>(2)</sup>	\$ (205.0)	\$ (91.5)	\$ (0.2)	\$ (89.9)	\$ (15.3)	\$ (401.9)

- (1) Includes net realized gains (losses) (recorded as realized gains or losses in the accompanying consolidated statement of operations), and amortization of discounts and closing points (recorded as interest income in the accompanying consolidated statement of operations).
- (2) Included in change in net unrealized appreciation or depreciation in the accompanying consolidated statement of operations. Net change in unrealized appreciation or depreciation includes net unrealized appreciation (depreciation) resulting from changes in portfolio investment values during the reporting period and the reversal of previously recorded unrealized appreciation or depreciation when gains or losses are realized. The net change in unrealized appreciation or depreciation in the consolidated statement of operations also includes the change in value of escrow and other receivables from portfolio companies that are included in other assets on the consolidated balance sheet.
- (3) Includes interest and dividend income reinvested through the receipt of a debt or equity security (payment-in-kind income) (recorded as interest and dividend income in the accompanying consolidated statement of operations).

### ***Managed Funds***

In addition to managing its own assets, the Company manages certain funds that also invest in the debt and equity securities of primarily private middle market companies in a variety of industries and

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

**Note 3. Portfolio, continued**

broadly syndicated senior secured loans. At September 30, 2009, the Company had eight separate funds under its management (together, the Managed Funds ) for which the Company may earn management or other fees for its services. The Company may invest in the equity of these funds, along with other third parties, from which the Company may earn a current return and/or a future incentive allocation.

In the first quarter of 2009, the Company completed the acquisition of the management contracts of three middle market senior debt CLOs (together, the Emporia Funds ) and certain other related assets for approximately \$11 million (subject to post-closing adjustments). The acquired assets are included in other assets in the accompanying consolidated balance sheet and the cost will be amortized over the life of the contracts.

The assets of the Managed Funds at September 30, 2009 and December 31, 2008, and the Company's management fees as of September 30, 2009, were as follows:

(\$ in millions) Name of Fund	Assets of Managed Funds		Management Fee <sup>(2)</sup>
	September 30, 2009	December 31, 2008	
Senior Secured Loan Fund LLC <sup>(3)</sup>	\$ 921.2	\$ 789.8	0.375%
Allied Capital Senior Debt Fund, L.P.	351.4	412.9	1.625% <sup>(1)(2)</sup>
Knightsbridge CLO 2007-1 Ltd.	500.7	500.6	0.600%
Knightsbridge CLO 2008-1 Ltd.	304.6	304.8	0.600%
Emporia Preferred Funding I, Ltd.	419.8		0.625% <sup>(1)</sup>
Emporia Preferred Funding II, Ltd.	355.7		0.650% <sup>(1)</sup>
Emporia Preferred Funding III, Ltd.	406.1		0.650% <sup>(1)</sup>
AGILE Fund I, LLC	83.5	99.3	(1)
Total Assets	\$ 3,343.0	\$ 2,107.4	

(1) In addition to the management fees, the Company is entitled to an incentive allocation subject to certain performance benchmarks. There can be no assurance that the incentive allocation will be earned.

(2) Management fees are stated as a percent of assets except for the Allied Capital Senior Debt Fund, L.P. ( ACSDF ) which is stated as a percent of equity capital. The management fee paid by ACSDF was 2.000% at December 31, 2008 and was reduced to 1.625% effective January 1, 2009 for the 2009 calendar year.

(3) In June 2009, the Unitranche Fund LLC was renamed the Senior Secured Loan Fund LLC. In October 2009, the Company sold its investment, including the outstanding commitments and the provision of management services, in the Senior Secured Loan Fund LLC. See Note 14. Subsequent Events.

A portion of the management fees earned by the Company may be deferred under certain circumstances. Collection of the fees earned may be dependent in part on the performance of the relevant Managed Fund. The Company may pay a portion of management fees it receives to Callidus Capital Corporation, a wholly owned portfolio investment , for

services provided to the Allied Capital Senior Debt Fund, L.P., Knightsbridge CLO 2007-1 Ltd., Knightsbridge CLO 2008-1 Ltd. and the Emporia Funds.

The Company's responsibilities to the Managed Funds may include investment origination, underwriting, and portfolio monitoring services. Each of the Managed Funds may separately invest in the debt or equity of companies in the Company's portfolio, and these investments may be senior, pari passu or junior to the debt and equity investments held by the Company. The Company may or may not participate in investments made by the Managed Funds.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

**Note 3. Portfolio, continued**

The Company accounts for the sale of securities to funds with which it has continuing involvement as sales pursuant to ASC Topic 860, when the securities have been legally isolated from the Company, the Company has no ability to restrict or constrain the ability of the Managed Funds to pledge or exchange the transferred securities, and the Company does not have either the entitlement and the obligation to repurchase the securities or the ability to unilaterally cause the Managed Fund to put the securities back to the Company.

During the nine months ended September 30, 2009, the Company sold assets to certain of its Managed Funds for which the Company received proceeds of \$9.7 million and recognized a net realized gain of \$6.3 million. During the nine months ended September 30, 2008, the Company sold assets to certain of the Managed Funds, for which the Company received proceeds of \$352.7 million, and recognized realized gains of \$2.8 million.

In addition to managing these funds, the Company holds certain investments in the Managed Funds as follows:

(\$ in millions) Name of Fund	Investment Description	September 30, 2009		December 31, 2008	
		Cost	Value	Cost	Value
Senior Secured Loan Fund LLC <sup>(1)</sup>	Subordinated Certificates and Equity Interests	\$ 165.2	\$ 165.0	\$ 125.4	\$ 125.4
Allied Capital Senior Debt Fund, L.P.	Equity interests	31.8	33.0	31.8	31.8
Knightsbridge CLO 2007-1 Ltd.	Class E Notes and Income Notes	57.4	33.8	59.6	50.1
Knightsbridge CLO 2008-1 Ltd.	Class C Notes, Class D Notes, Class E Notes and Income Notes	53.2	49.2	52.7	52.7
AGILE Fund I, LLC	Equity Interests	0.7	0.4	0.7	0.5
Total		\$ 308.3	\$ 281.4	\$ 270.2	\$ 260.5

<sup>(1)</sup> The Company has committed up to a total of \$525.0 million of subordinated certificates to the Senior Secured Loan Fund. The Senior Secured Loan Fund will be capitalized as investment transactions are completed. In October 2009, the Company sold its investment, including the outstanding commitments and the provision of management services, in the Senior Secured Loan Fund LLC. See Note 14. Subsequent Events.

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

**Note 4. Debt**

At September 30, 2009, and December 31, 2008, the Company had outstanding debt as follows:

	2009			2008		
	Facility Amount	Amount Drawn at par	Annual Interest Cost <sup>(1)</sup>	Facility Amount	Amount Drawn at par	Annual Interest Cost <sup>(1)</sup>
<b>(\$ in millions)</b>						
Notes payable:						
Privately issued secured notes payable (formerly unsecured) <sup>(5)</sup>	\$ 841.0	\$ 841.0 <sup>(6)</sup>	13.8%	\$1,015.0	\$1,015.0	7.8%
Publicly issued unsecured notes payable	745.5	745.5	6.7%	880.0	880.0	6.7%
Total notes payable	1,586.5	1,586.5	10.5%	1,895.0	1,895.0	7.3%
Bank secured term debt (former revolver) <sup>(4)</sup>	50.0	50.0	17.0% <sup>(2)</sup>	632.5	50.0	4.3% <sup>(2)</sup>
Total debt	\$ 1,636.5	\$ 1,636.5	10.7% <sup>(3)</sup>	\$2,527.5	\$1,945.0	7.7% <sup>(3)</sup>

(1) The weighted average annual interest cost is computed as the (a) annual stated interest on the debt, plus the annual amortization of commitment fees, other facility fees and amortization of debt financing costs and original issue discount that are recognized into interest expense over the contractual life of the respective borrowings, divided by (b) debt outstanding on the balance sheet date.

(2) The annual interest cost reflects the interest rate payable for borrowings under the revolving line of credit in effect at the balance sheet date. In addition to the current interest payable, there were annual costs of commitment fees, other facility fees and amortization of debt financing costs of \$4.3 million at September 30, 2009, and \$8.5 million at December 31, 2008.

(3) The annual interest cost for total debt includes the annual cost of commitment fees, other facility fees and amortization of debt financing costs on the bank term debt regardless of the amount outstanding on the facility as of the balance sheet date. The annual interest cost reflects the facilities in place on the balance sheet date.

(4) During the three months ended September 30, 2009, the commitments under the facility were reduced to \$50.0 million subsequent to the funding of \$46.0 million to Ciena securitizations in lieu of draws under letters of credit issued under the facility.

(5) In the third quarter of 2009, the Company completed the restructuring of its private notes.

(6) The notes payable on the consolidated balance sheet are shown net of OID of approximately \$42.6 million as of September 30, 2009.

**Debt Restructure**

On August 28, 2009, the Company completed a comprehensive restructuring of its private notes (the Notes ) and its bank facility (the Facility ). Beginning in January 2009, the Company engaged in discussions with the revolving line of credit lenders (the Lenders ) and the private noteholders (the Noteholders ) to seek relief under certain terms of both the Facility and the Notes due to certain covenant defaults. As of December 31, 2008, the Company's asset coverage was less than the 200% then required by the revolving credit facility and the private notes. Asset coverage generally refers to the percentage resulting from assets less accounts payable and other liabilities, divided by total debt.

In connection with the restructuring, the Company granted the Noteholders and the Lenders a pari-passu blanket lien on a substantial portion of its assets, including a substantial portion of the assets of the Company's consolidated subsidiaries.

The financial covenants applicable to the Notes and the Facility were modified as part of the restructuring. The Consolidated Debt to Consolidated Shareholders' Equity covenant and the Capital Maintenance covenant were both eliminated. The Asset Coverage ratio was set at 1.35:1 initially, increasing to 1.4:1 at June 30, 2010 and to 1.55:1 at June 30, 2011, and maintained at that level thereafter. A new covenant, Total Adjusted Assets to Secured Debt, was set at 1.75:1 initially, increasing to 2.0:1 at June 30, 2010 and to 2.25:1 at June 30, 2011, and maintained at that level thereafter. The ratio of Adjusted EBIT to Adjusted Interest Expense was set at 1.05:1 initially, decreasing to 0.95:1 at December 31, 2009, 0.80:1 at March 31, 2010 and 0.75:1 at June 30, 2010. The covenant will then be increased to 0.80:1 on December 31, 2010 and 0.95:1 on December 31, 2011 and maintained at that level thereafter. At September 30, 2009, the Company was in compliance with these financial covenants.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 4. Debt, continued**

The Notes and Facility impose certain limitations on the Company's ability to incur additional indebtedness, including precluding the Company from incurring additional indebtedness unless its asset coverage of all outstanding indebtedness is at least 200%. Pursuant to the 1940 Act, the Company is not permitted to issue indebtedness unless immediately after such issuance the Company has asset coverage of all outstanding indebtedness of at least 200%. At September 30, 2009, the Company's asset coverage ratio was 175%, which is less than the 200% requirement. As a result, the Company will not be able to issue additional indebtedness until such time as its asset coverage returns to at least 200%.

The Company is required to apply 50% of all net cash proceeds from asset sales to the repayment of the Notes and 6% of all net cash proceeds from asset sales to the repayment of the Facility, subject to certain conditions and exclusions. In the case of certain events of default, the Company would be required to apply 100% of all net cash proceeds from asset sales to the repayment of its secured lenders. Under the new agreements, subject to a limit and certain liquidity restrictions, the Company may repurchase its public debt; however, the Company is prohibited from repurchasing its common stock and may not pay dividends in excess of the minimum the Company reasonably believes is required to maintain its tax status as a regulated investment company. In addition, upon the occurrence of a change of control (as defined in the Note Agreement and Credit Agreement), the Noteholders have the right to be prepaid in full and the Company is required to repay in full all amounts outstanding under the Facility.

The Note Agreement and Credit Agreement provide for customary events of default, including, but not limited to, payment defaults, breach of representations or covenants, cross-defaults, bankruptcy events and failure to pay judgments. Certain of these events of default are subject to notice and cure periods or materiality thresholds. Pursuant to the terms of the Notes, the occurrence of an event of default generally permits the holders of more than 50% in principal amount of outstanding Notes to accelerate repayment of all amounts due thereunder. The occurrence of an event of default would generally permit the administrative agent for the lenders under the Facility, or the holders of more than 51% of the aggregate principal debt outstanding under the Facility, to accelerate repayment of all amounts outstanding thereunder. Pursuant to the Notes, during the continuance of an event of default, the rate of interest applicable to the Notes would increase by 200 basis points. Pursuant to the terms of the Facility, during the continuance of an event of default, the applicable spread on any borrowings outstanding under the Facility would increase by 200 basis points.

In connection with the restructuring, the Company recorded a loss on the extinguishment of debt of \$117.5 million. In addition to the \$11 million of previously deferred unamortized debt costs associated with the Notes and Facility, the Company incurred and paid costs to the lenders of \$146 million and other third party advisory and other fees of approximately \$26 million in connection with the restructuring. Approximately \$20 million of the restructuring costs were deferred and are being amortized into interest expense over the life of the Notes and Facility. In addition, the Company recorded approximately \$45 million of original issue discount (OID) related to the restructuring of the Notes, which is being amortized into interest expense over the life of the Notes. After giving effect to the restructuring and the recording of the loss, the Company estimates that the weighted average interest cost,

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

## Note 4. Debt, continued

including amortization of the deferred debt cost and OID, for the Notes is approximately 13.75% and the for Facility is approximately 17%. The loss on extinguishment of debt is comprised of the following:

## (\$ in millions)

Previously deferred unamortized costs	\$ 11.3
Fees paid to Noteholders/Lenders	145.9
Advisory and other fees paid	26.0
Costs deferred and amortizing into interest expense	(20.3)
OID recorded and amortizing into interest expense	(45.4)
Loss on extinguishment of debt	\$ 117.5

**Privately Issued Notes Payable.** The Company had \$1,015.0 million of Notes outstanding at June 30, 2009. The Company made principal payments on the Notes at and prior to the closing of the restructuring and had \$841.0 million of Notes outstanding following the closing of the restructuring.

In connection with the restructuring, the existing Notes were exchanged for three new series of Notes containing the following terms:

(\$ in millions)	Principal Amount	Maturity Dates	Annual Stated Interest Rate Through December 31, 2009 <sup>(1)</sup>	Annual Stated Interest Rate Beginning January 1, 2010 <sup>(1)</sup>	Annual Stated Interest Rate Beginning January 1, 2011 <sup>(1)</sup>	Annual Stated Interest Rate Beginning January 1, 2012 <sup>(1)</sup>
Series A	\$ 253.8	June 15, 2010	8.50%	9.25%	N/A	N/A
Series B	\$ 253.8	June 15, 2011	9.00%	9.50%	9.75%	N/A
Series C	\$ 333.5	March 31 & April 1, 2012	9.50%	10.00%	10.25%	10.75%

<sup>(1)</sup> The Notes generally require payment of interest quarterly.

The Company made various cash payments in connection with the restructuring of its Notes. The Company paid an amendment fee at closing of \$15.2 million. In addition, the Company paid a make-whole fee of \$79.7 million related to a contractual provision in the old Notes. Due to the payment of this make-whole fee, the new Notes have no significant make-whole requirement. The Company also paid a restructuring fee of \$50.0 million at closing, which

will be applied toward the principal balance of the Notes if the Notes are refinanced in full on or before January 31, 2010.

**Bank Facility.** At June 30, 2009, the Company had an unsecured revolving line of credit that was due to expire on April 11, 2011. The Company's Facility was restructured from a revolving facility to a term facility maturing on November 13, 2010. Total commitments under the Facility were reduced at closing to \$96.0 million from \$115.0 million prior to closing. At closing, there were \$50.0 million of borrowings and \$46.0 million of standby letters of credit ( LCs ) outstanding under the Facility. The \$46.0 million of LCs terminated and/or expired prior to September 30, 2009 and the commitments under the Facility were reduced by a commensurate amount. As a result, the total commitment and outstanding balance was \$50.0 million at September 30, 2009.

Borrowings under the Facility bear interest at a floating rate of interest, subject to a floor. The floating rate spread increases by 0.5% per annum beginning on January 1, 2010 and continuing through maturity. At closing, the interest rate on the Facility was 8.5% per annum. The Facility requires the

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 4. Debt, continued**

payment of a commitment fee equal to 0.50% per annum of the committed amount. In addition, the Company agreed to pay an amendment fee at closing of \$1.0 million, and a restructuring fee payable on January 31, 2010 equal to 1.0% of the outstanding borrowings on such date if the Facility remains outstanding. The Facility generally requires payments of interest no less frequently than quarterly.

**Publicly Issued Unsecured Notes Payable.** At September 30, 2009, the Company had outstanding publicly issued unsecured notes as follows:

(\$ in millions)	Amount	Maturity Date
6.625% Notes due 2011	\$319.9	July 15, 2011
6.000% Notes due 2012	195.6	April 1, 2012
6.875% Notes due 2047	230.0	April 15, 2047
Total	\$745.5	

The 6.625% Notes due 2011 and the 6.000% Notes due 2012 require payment of interest only semi-annually, and all principal is due upon maturity. The Company has the option to redeem these notes in whole or in part, together with a redemption premium, as stipulated in the notes. In addition, the Company may purchase these notes in the market at par or at a discount to the extent permitted by the 1940 Act. During the nine months ended September 30, 2009, the Company paid \$30.1 million to repurchase certain of the 6.625% Notes due 2011 which had a face value of \$80.1 million, and \$20.2 million to repurchase certain of the 6.000% Notes due 2012 which had a face value of \$54.4 million. After recognizing the remaining unamortized original issue discount associated with the notes repurchased, the Company recognized a net gain on repurchase of debt of \$83.5 million for the nine months ended September 30, 2009.

The 6.875% Notes due 2047 require payment of interest only quarterly, and all principal is due upon maturity. These notes are redeemable in whole or in part at any time or from time to time on or after April 15, 2012, at par and upon the occurrence of certain tax events as stipulated in the notes.

The Company has certain financial and operating covenants that are required by the publicly issued unsecured notes payable. The Company is not permitted to issue indebtedness unless immediately after such issuance the Company has asset coverage of all outstanding indebtedness of at least 200% as required by the 1940 Act, as amended. At September 30, 2009, the Company's asset coverage ratio was 175%.

**Scheduled Maturities.** Scheduled future maturities of notes payable at September 30, 2009, were as follows:

<b>Amount Maturing at Par</b>	
<b>Privately</b>	<b>Publicly Issued</b>
<b>Issued</b>	<b>Publicly Issued</b>

(\$ in millions) Year	Bank Secured Term Debt	Secured Notes Payable	Unsecured Notes Payable	Total
2009	\$	\$	\$	\$

Total	\$ 50.0	\$ 841.0	\$ 745.5	\$ 1,636.5

## ALLIED CAPITAL CORPORATION AND SUBSIDIARIES

## NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)

**Note 4. Debt, continued****Fair Value of Debt**

The Company records debt at cost. The fair value of the Company's outstanding debt was approximately \$1.4 billion and \$1.4 billion at September 30, 2009 and December 31, 2008, respectively. The fair value of the Company's publicly issued 6.875% Notes due 2047 was determined using the market price of the retail notes at September 30, 2009 and December 31, 2008. The fair value of the Company's other debt was determined based on market interest rates for similar instruments as of the balance sheet dates.

**Note 5. Guarantees and Commitments**

In the ordinary course of business, the Company has issued guarantees and has extended standby letters of credit through financial intermediaries on behalf of certain portfolio companies. All standby letters of credit had been issued through Bank of America, N.A. As of September 30, 2009, and December 31, 2008, the Company had issued guarantees of debt and rental obligations aggregating \$9.1 million and \$19.2 million, respectively, and had extended standby letters of credit aggregating \$0.0 million and \$122.3 million, respectively. Under these arrangements, the Company would be required to make payments to third parties if the portfolio companies were to default on their related payment obligations or if the expiration dates of the letters of credit are not extended. The maximum amount of potential future payments was \$9.1 million and \$141.5 million at September 30, 2009, and December 31, 2008, respectively.

As of September 30, 2009, the guarantees and standby letters of credit expired as follows:

(in millions)	Total	2009	2010	2011	2012	2013	After 2013
Guarantees	\$ 9.1	\$ 5.0	\$ 3.2	\$	\$ 0.1	\$	\$ 0.8
Standby letters of credit <sup>(1)</sup>							
Total	\$ 9.1	\$ 5.0	\$ 3.2	\$	\$ 0.1	\$	\$ 0.8

<sup>(1)</sup> During the three months ended September 30, 2009, the Company funded \$46.0 million in lieu of draws under standby letters of credit and the remaining standby letters of credit expired/terminated. At September 30, 2009, there were no standby letters of credit issued under the facility.

In the ordinary course of business, the Company enters into agreements with service providers and other parties that may contain provisions for the Company to indemnify and guaranty certain minimum fees to such parties under certain circumstances.

At September 30, 2009, the Company had outstanding commitments to fund investments totaling \$543.9 million, including \$515.5 million related to private finance investments and \$28.4 million related to commercial real estate finance investments. Total outstanding commitments related to private finance investments included \$352.2 million to

the Senior Secured Loan Fund LLC. During October 2009, the Company sold its investment, including its outstanding commitments and the provision for management services, in the Senior Secured Loan Fund. See Note 14. Subsequent Events.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 6. Shareholders' Equity**

The Company did not sell any common stock during the nine months ended September 30, 2009. The Company sold 20.5 million shares of its common stock during the nine months ended September 30, 2008, for gross proceeds of \$417.1 million. The Company paid \$14.6 million in costs, including underwriting fees, for net proceeds of \$402.5 million.

The Company issued 0.7 million shares of common stock upon the exercise of stock options during the nine months ended September 30, 2009. No stock options were exercised during the nine months ended September 30, 2008.

The Company has a dividend reinvestment plan, whereby the Company may buy shares of its common stock in the open market or issue new shares in order to satisfy dividend reinvestment requests. If the Company issues new shares, the issue price is equal to the average of the closing sale prices reported for the Company's common stock for the five consecutive trading days immediately prior to the dividend payment date. The Company may not issue new shares below net asset value. During the nine months ended September 30, 2009, the Company did not pay dividends and there was no activity in the dividend reinvestment plan. During the nine months ended September 30, 2008, under the dividend reinvestment plan the Company issued 0.2 million shares at an average price of \$19.49 per share, and 0.5 million shares were purchased by a plan agent for shareholders at an average price of \$14.43 per share.

**Note 7. Earnings Per Common Share**

Earnings per common share for the three and nine months ended September 30, 2009 and 2008, were as follows:

(in millions, except per share amounts)	<b>For the Three Months Ended September 30,</b>		<b>For the Nine Months Ended September 30,</b>	
	<b>2009</b>	<b>2008</b>	<b>2009</b>	<b>2008</b>
Net increase (decrease) in net assets resulting from operations	\$ (140.7)	\$ (318.3)	\$ (517.4)	\$ (461.2)
Weighted average common shares outstanding - basic	179.1	178.7	178.8	171.1
Dilutive options outstanding				
Weighted average common shares outstanding - diluted	179.1	178.7	178.8	171.1
Basic earnings (loss) per common share	\$ (0.79)	\$ (1.78)	\$ (2.89)	\$ (2.70)
Diluted earnings (loss) per common share	\$ (0.79)	\$ (1.78)	\$ (2.89)	\$ (2.70)

**Note 8. Employee Compensation Plans**

The Company had an Individual Performance Award plan ( IPA ), and an Individual Performance Bonus plan ( IPB each individually a Plan, or collectively, the Plans ). These Plans generally were determined annually at the beginning of each year but could be adjusted throughout the year. In 2008, the IPA was paid in cash in two equal installments during the year. Through December 31, 2007, the IPA amounts were contributed into a trust and invested in the Company s common stock. The IPB was distributed in cash to award recipients throughout the year (beginning in February of each respective

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES****NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)****Note 8. Employee Compensation Plans, continued**

year) as long as the recipient remained employed by the Company. The Company currently has not established an IPA or IPB for 2009.

The trusts for the IPA payments were consolidated with the Company's accounts. The common stock was classified as common stock held in deferred compensation trust in the accompanying financial statements and the deferred compensation obligation, which represented the amount owed to the employees, was included in other liabilities. Changes in the value of the Company's common stock held in the deferred compensation trust were not recognized. However, the liability was marked to market with a corresponding charge or credit to employee compensation expense.

In December 2007, the Company's Board of Directors made a determination that it was in the best interests of the Company to terminate its deferred compensation arrangements. The Board of Directors' decision primarily was in response to increased complexity resulting from changes in the regulation of deferred compensation arrangements. The Board of Directors resolved that the accounts under these Plans would be distributed to participants in full on March 18, 2008, the termination and distribution date, or as soon as was reasonably practicable thereafter, in accordance with the provisions of each of these Plans.

The accounts under the deferred compensation arrangements totaled \$52.5 million at December 31, 2007. The balances on the termination date were distributed to participants in March 2008 subsequent to the termination date in accordance with the transition rule for payment elections under Section 409A of the Code. Distributions from the plans were made in cash or shares of the Company's common stock, net of required withholding taxes.

The IPA and IPB expenses are included in employee expenses and for the three and nine months ended September 30, 2009 and 2008, were as follows:

(\$ in millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
IPA	\$	\$ 2.0	\$	\$ 6.6
IPA mark to market expense (benefit)				(4.1)
Total IPA expense	\$	\$ 2.0	\$	\$ 2.5
Total IPB expense	\$	\$ 2.4	\$	\$ 6.8

**Note 9. Stock Option Plan**

The purpose of the stock option plan ( Option Plan ) is to provide officers and non-officer directors of the Company with additional incentives. Options are exercisable at a price equal to the fair market value of the shares on the day the option is granted. Each option states the period or periods of time within which the option may be exercised by the optionee, which may not exceed ten years from the date the option is granted. The options granted to officers generally vest ratably over up to a three year period. Options granted to non-officer directors vest on the grant date.

All rights to exercise options terminate 60 days after an optionee ceases to be (i) a non-officer director, (ii) both an officer and a director, if such optionee serves in both capacities, or (iii) an officer (if

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 9. Stock Option Plan, continued**

such officer is not also a director) of the Company for any cause other than death or total and permanent disability. In the event of a change of control of the Company, all outstanding options will become fully vested and exercisable as of the change of control.

At September 30, 2009, and December 31, 2008, there were 37.2 million shares authorized under the Option Plan and the number of shares available to be granted under the Option Plan was 3.8 million and 9.5 million, respectively.

Information with respect to options granted, exercised and forfeited under the Option Plan for the nine months ended September 30, 2009, was as follows:

(in millions, except per share amounts)	Shares	Weighted Average Exercise Price Per Share	Weighted Average Contractual Remaining Term (Years)	Aggregate Intrinsic Value at September 30, 2009 <sup>(1)</sup>
Options outstanding at January 1, 2009	19.7	\$ 26.56		
Granted	11.5	\$ 0.88		
Exercised	(0.7)	\$ 0.73		
Forfeited	(5.8)	\$ 21.65		
Options outstanding at September 30, 2009	24.7	\$ 16.48	5.10	\$ 21.3
Exercisable at September 30, 2009 <sup>(2)</sup>	15.2	\$ 22.25	4.53	\$ 6.8
Exercisable and expected to be exercisable at September 30, 2009 <sup>(3)</sup>	23.3	\$ 16.77	5.05	\$ 19.7

(1) Represents the difference between the market value of the options at September 30, 2009, and the cost for the option holders to exercise the options.

(2) Represents vested options.

(3) The amount of options expected to be exercisable at September 30, 2009, is calculated based on an estimate of expected forfeitures.

During the nine months ended September 30, 2008, 7.7 million options were granted, no options were exercised and 4.5 million options were forfeited. The fair value of the options vested during the nine months ended September 30, 2008 was \$13.5 million.

**Note 10. Dividends and Distributions and Taxes**

At December 31, 2008, the Company met its dividend distribution requirements for the 2008 tax year and therefore did not have excess taxable income available for distribution to shareholders in 2009. The Company's Board of Directors has not declared any dividends in 2009. The Company's Board of Directors declared and the Company paid a dividend of \$0.65 per common share for the first, second and third quarters of 2008, totaling \$340.4 million.

The Company generally will be required to pay an excise tax equal to 4% of the amount by which 98% of the Company's annual taxable income exceeds the distributions for the year. The Company records an excise tax based on the Company's estimated excess taxable income for the period. Such estimates may change from period to period. The Company did not record an excise tax for the three and

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 10. Dividends and Distributions and Taxes, continued**

nine months ended September 30, 2009. The Company recorded an excise tax of \$0.9 million and \$5.1 million for the three and nine months ended September 30, 2008, respectively.

In certain circumstances, the Company is restricted in its ability to pay dividends. Each of the Company's Notes and the Company's Facility contain provisions that limit the amount of dividends the Company can pay. In addition, pursuant to the 1940 Act, the Company may be precluded from declaring dividends or other distributions to its shareholders unless the Company's asset coverage of senior securities is at least 200%.

The Company had cumulative deferred taxable income related to installment sale gains of approximately \$218.9 million as of December 31, 2008. These gains have been recognized for financial reporting purposes in the respective years they were realized, but are generally deferred for tax purposes until the notes or other amounts received from the sale of the related investments are collected in cash. A substantial portion of these installment gains as of December 31, 2008 will be recognized for tax purposes in 2009 as certain notes received from the sale of the related investments have been sold.

The Company's undistributed book earnings of \$184.7 million as of December 31, 2008 resulted from undistributed ordinary income and long-term capital gains. The difference between undistributed book earnings at the end of the year and taxable income carried over from the current year into the next year relates to a variety of timing and permanent differences in the recognition of income and expenses for book and tax purposes.

The Company's consolidated subsidiary, AC Corp, is subject to federal and state income taxes. For the three months ended September 30, 2009 and 2008, AC Corp's income tax expense was \$1.9 million and \$1.2 million, respectively, and for the nine months ended September 30, 2009 and 2008, income tax expense was \$4.2 million and \$3.0 million, respectively. For the nine months ended September 30, 2009, paid in capital was decreased by \$3.1 million primarily for the reduction of the deferred tax asset related to stock options that expired unexercised.

**Note 11. Supplemental Disclosure of Cash Flow Information**

The Company paid interest of \$140.8 million and \$95.9 million, respectively, for the nine months ended September 30, 2009 and 2008. The Company paid income taxes, including excise taxes (net of refunds), of \$5.5 million and \$13.0 million the nine months ended September 30, 2009 and 2008, respectively.

Non-cash operating activities for the nine months ended September 30, 2009 and 2008, totaled \$71.4 million and \$107.7 million, respectively. Non-cash operating activities included the exchange of existing debt securities and accrued interest for new debt and equity securities.

Non-cash financing activities included the issuance of common stock in lieu of cash distributions totaling \$3.8 million for the nine months ended September 30, 2008.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 13. Litigation**

On June 23, 2004, the Company was notified by the SEC that the SEC was conducting an informal investigation of the Company. The investigation related to the valuation of securities in the Company's private finance portfolio and other matters. On June 20, 2007, the Company announced that it entered into a settlement with the SEC that resolved the SEC's informal investigation. As part of the settlement and without admitting or denying the SEC's allegations, the Company agreed to the entry of an administrative order. In the order the SEC alleged that, between June 30, 2001, and March 31, 2003, the Company did not maintain books, records and accounts which, in reasonable detail, supported or accurately and fairly reflected valuations of certain securities in the Company's private finance portfolio and, as a result, did not meet certain recordkeeping and internal controls provisions of the federal securities laws. In the administrative order, the SEC ordered the Company to continue to maintain certain of its current valuation-related controls. Specifically, during and following the two-year period of the order the Company has: (1) continued to employ a Chief Valuation Officer, or a similarly structured officer-level employee, to oversee its quarterly valuation processes; and (2) continued to employ third-party valuation consultants to assist in its quarterly valuation processes.

On December 22, 2004, the Company received letters from the U.S. Attorney for the District of Columbia requesting the preservation and production of information regarding the Company and Business Loan Express, LLC (currently known as Ciena Capital LLC) in connection with a criminal investigation relating to matters similar to those investigated by and settled with the SEC as discussed above. The Company produced materials in response to the requests from the U.S. Attorney's office and certain current and former employees were interviewed by the U.S. Attorney's Office. The Company has voluntarily cooperated with the investigation.

In late December 2006, the Company received a subpoena from the U.S. Attorney for the District of Columbia requesting, among other things, the production of records regarding the use of private investigators by the Company or its agents. The Board established a committee, which was advised by its own counsel, to review this matter. In the course of gathering documents responsive to the subpoena, the Company became aware that an agent of the Company obtained what were represented to be telephone records of David Einhorn and which purport to be records of calls from Greenlight Capital during a period of time in 2005. Also, while the Company was gathering documents responsive to the subpoena, allegations were made that the Company's management had authorized the acquisition of these records and that management was subsequently advised that these records had been obtained. The Company's management has stated that these allegations are not true. The Company has cooperated fully with the inquiry by the U.S. Attorney's Office.

On February 26, 2007, Dana Ross filed a class action complaint in the U.S. District Court for the District of Columbia in which she alleges that Allied Capital Corporation and certain members of management violated Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder. Thereafter, the court appointed new lead counsel and approved new lead plaintiffs. On July 30, 2007, plaintiffs served an amended complaint. Plaintiffs claim that, between November 7, 2005, and January 22, 2007, Allied Capital either failed to disclose or misrepresented information about its portfolio company, Business Loan Express, LLC. Plaintiffs seek unspecified compensatory and other damages, as well as other relief. The Company believes the lawsuit is without merit, and intends to defend the lawsuit vigorously. On September 13, 2007, the Company filed a motion to dismiss the lawsuit. A hearing was held on the motion to dismiss in April 2009. The motion is pending.

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 13. Litigation, continued**

As of November 6, 2009, the Company is aware of a putative class action and shareholder derivative complaint as well as an additional shareholder derivative complaint filed against the Company, its Board of Directors and Ares Capital Corporation. Both complaints allege that the Company's Board of Directors failed to discharge adequately its fiduciary duties to shareholders by failing to adequately value the Company's shares and ensure that its shareholders received adequate consideration in a proposed sale of Allied Capital to Ares Capital Corporation, that the proposed merger between the Company and Ares Capital is the product of a flawed sales process, that the Company's directors and officers breached their fiduciary duties by agreeing to a structure that was not designed to maximize the value of Allied's shares, and that Ares Capital aided and abetted the alleged breach of fiduciary duty. The plaintiffs demand, among other things, a preliminary and permanent injunction enjoining the sale and rescinding the transaction or any part thereof that has been implemented. The Company believes that each of the lawsuits is without merit, and it intends to defend each of these lawsuits vigorously.

In addition, the Company is party to certain lawsuits in the normal course of business. Furthermore, third parties may try to seek to impose liability on the Company in connection with the activities of its portfolio companies. For a discussion of civil investigations being conducted regarding the lending practice of Ciena Capital LLC, a portfolio company of the Company, see Note 3, Portfolio Ciena Capital LLC.

While the outcome of any of the open legal proceedings described above cannot at this time be predicted with certainty, the Company does not expect these matters will materially affect its financial condition or results of operations.

**Note 14. Subsequent Events**

In accordance with ASC Topic 855, the Company has evaluated events subsequent to September 30, 2009, and through the issuance of these consolidated financial statements, which occurred on November 6, 2009.

On October 26, 2009, the Company, entered into an Agreement and Plan of Merger (the Merger Agreement) with Ares Capital Corporation, a Maryland corporation (Ares Capital), and ARCC Odyssey Corp., a Maryland corporation and wholly-owned subsidiary of Ares Capital (Merger Sub). The Merger Agreement provides that, upon the terms and subject to the conditions set forth in the Merger Agreement, Merger Sub will merge with and into Allied Capital, with Allied Capital as the surviving company (the Merger). Immediately following the Merger, Allied Capital will merge with and into Ares Capital.

Upon consummation of the Merger, each share of common stock, par value \$0.0001 per share, of Allied Capital issued and outstanding immediately prior to the effective time of the Merger will be converted into and become exchangeable for 0.325 common shares, par value \$0.001 per share, of Ares Capital. Based on the number of shares of Allied Capital common stock outstanding on the date of the Merger Agreement and not including the effect of outstanding in-the-money options, this will result in approximately 58.3 million Ares Capital shares being exchanged for approximately 179.4 million outstanding Allied Capital shares, subject to adjustment in certain limited circumstances.

Following consummation of the transactions contemplated by the Merger Agreement, Ares Capital's Board of Directors will continue as directors of Ares Capital. However, Ares Capital's Board of Directors will be increased by at

least one member and Ares Capital will submit the name of one member of

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 14. Subsequent Events, continued**

Allied Capital's current Board of Directors for consideration to Ares Capital's Nominating and Governance Committee to fill the vacancy.

The Merger Agreement contains (a) customary representations and warranties of Allied Capital and Ares Capital, including, among others: corporate organization, capitalization, corporate authority and absence of conflicts, third party and governmental consents and approvals, reports and regulatory matters, financial statements, compliance with law and legal proceedings, absence of certain changes, taxes, employee matters, intellectual property, insurance, investment assets and certain contracts, (b) covenants of Allied Capital and Ares Capital to conduct their respective businesses in the ordinary course until the Merger is completed and (c) covenants of Allied Capital and Ares Capital not to take certain actions during this interim period.

Among other things, Allied Capital has agreed to, and will cause its affiliates, consolidated subsidiaries, and its and each of their respective officers, directors, managers, employees and other advisors, representatives and agents to, immediately cease and cause to be terminated all discussions and negotiations with respect to a Takeover Proposal (as defined in the Merger Agreement) from a third party and not to directly or indirectly solicit or take any other action (including providing information) with the intent to solicit any inquiry, proposal or offer with respect to a Takeover Proposal.

However, if Allied Capital receives a bona fide unsolicited Takeover Proposal from a third party, and its Board of Directors determines in good faith, after consultation with reputable outside legal counsel and financial advisers experienced in such matters, that failure to consider such proposal would breach the duties of the directors under applicable law, and the Takeover Proposal constitutes or is reasonably likely to result in a Superior Proposal (as defined in the Merger Agreement), Allied Capital may engage in discussions and negotiations with such third party so long as certain notice and other procedural requirements are satisfied. In addition, subject to certain procedural requirements (including the ability of Ares Capital to revise its offer) and the payment of a \$30 million termination fee, Allied Capital may terminate the Merger Agreement and enter into an agreement with a third party who makes a Superior Proposal.

The representations and warranties of each party set forth in the Merger Agreement (a) have been qualified by confidential disclosures made to the other party in connection with the Merger Agreement, (b) will not survive consummation of the Merger and cannot be the basis for any claims under the Merger Agreement by the other party after the Merger is consummated, (c) are qualified in certain circumstances by a materiality standard which may differ from what may be viewed as material by investors, (d) were made only as of the date of the Merger Agreement or such other date as is specified in the Merger Agreement, and (e) may have been included in the Merger Agreement for the purpose of allocating risk between Allied Capital and Ares Capital rather than establishing matters as facts.

Consummation of the Merger, which is currently anticipated to occur by the end of the first quarter of 2010, is subject to certain conditions, including, among others, Allied Capital stockholder approval, Ares Capital stockholder approval, required regulatory approvals (including expiration of the waiting period under the Hart-Scott-Rodino Act), receipt of certain Ares Capital and Allied Capital lender consents and other customary closing conditions.

The Merger Agreement also contains certain termination rights for Allied Capital and Ares Capital and provides that, in connection with the termination of the Merger Agreement under specified circumstances, Allied Capital may be

required to pay Ares Capital a termination fee of \$30 million

**ALLIED CAPITAL CORPORATION AND SUBSIDIARIES**

**NOTES TO CONSOLIDATED FINANCIAL STATEMENTS (Continued)**

**Note 14. Subsequent Events, continued**

(\$15 million if Allied Capital stockholders do not approve the Merger) and Ares Capital may be required to pay Allied Capital a termination fee of \$30 million.

In a separate transaction on October 30, 2009, the Company sold its interests, including its outstanding commitments and the provision of management services, in its Senior Secured Loan Fund LLC (the SL Fund, formerly known as the Unitranche Fund) to Ares Capital for \$165 million in cash. At September 30, 2009, the SL Fund held unitranche loans totaling approximately \$921 million. In addition, from September 30, 2009 through November 2, 2009, the Company has collected additional cash proceeds totaling approximately \$30 million and has identified approximately \$200 million of assets for potential future sale. The Company has also paid down an additional \$94 million of private debt since September 30, 2009 and has cash and money market and other securities of \$273 million as of November 2, 2009.

**Report of Independent Registered Public Accounting Firm**

**The Board of Directors and Shareholders**

**Allied Capital Corporation:**

We have reviewed the accompanying consolidated balance sheet of Allied Capital Corporation and subsidiaries (the Company), including the consolidated statement of investments, as of September 30, 2009, the related consolidated statements of operations for the three- and nine-month periods ended September 30, 2009 and 2008, and the consolidated statements of changes in net assets and cash flows and the financial highlights (included in Note 12) for the nine-month periods ended September 30, 2009 and 2008. These consolidated financial statements and financial highlights are the responsibility of the Company's management.

We conducted our reviews in accordance with standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with standards of the Public Company Accounting Oversight Board (United States), the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our reviews, we are not aware of any material modifications that should be made to the consolidated financial statements and financial highlights referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Allied Capital Corporation and subsidiaries, including the consolidated statement of investments, as of December 31, 2008, and the related consolidated statements of operations, changes in net assets and cash flows (not presented herein), and the financial highlights, for the year then ended; and in our report dated March 2, 2009, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet including the consolidated statement of investments as of December 31, 2008, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Washington, D.C.  
November 6, 2009

**\$ 352,760**

**\$ 178,253**

This schedule should be read in conjunction with the Company's consolidated financial statements, including the consolidated statement of investments and Note 3 to the consolidated financial statements. Note 3 includes additional information regarding activities in the private finance portfolio.

- (1) Common stock, preferred stock, warrants, options, and equity interests are generally non-income producing and restricted. The principal amount for loans and debt securities and the number of shares of common stock and preferred stock is shown in the consolidated statement of investments as of September 30, 2009.
- (2) Other includes interest, dividend, or other income which was applied to the principal of the investment and therefore reduced the total investment. These reductions are also included in the Gross Reductions for the investment, as applicable.
- (3) Gross additions include increases in the cost basis of investments resulting from new portfolio investments, paid-in-kind interest or dividends, the amortization of discounts and closing fees, the exchange of one or more existing securities for one or more new securities and the movement of an existing portfolio company into this category from a different category. Gross additions also include net increases in unrealized appreciation or net decreases in unrealized depreciation.
- (4) Gross reductions include decreases in the cost basis of investments resulting from principal collections related to investment repayments or sales, the exchange of one or more existing securities for one or more new securities and the movement of an existing portfolio company out of this category into a different category. Gross reductions also include net increases in unrealized depreciation or net decreases in unrealized appreciation.
- (5) Loan or debt security is on non-accrual status at September 30, 2009, and is therefore considered non-income producing. Loans or debt securities on non-accrual status at the end of the period may or may not have been on non-accrual status for the full period.
- (6) Represents the total amount of interest or dividends credited to income for the portion of the year an investment was included in the companies more than 25% owned or companies 5% to 25% owned categories, respectively.

## **Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following analysis of the financial condition and results of operations of the Company should be read in conjunction with the Company's Consolidated Financial Statements and the Notes thereto included herein and in the Company's annual report on Form 10-K for the year ended December 31, 2008. In addition, this quarterly report on Form 10-Q contains certain forward-looking statements. These statements include the plans and objectives of management for future operations and financial objectives and can be identified by the use of forward-looking terminology such as may, will, expect, intend, anticipate, estimate, or continue or the negative thereof or variations thereon or comparable terminology. These forward-looking statements are subject to the inherent uncertainties in predicting future results and conditions. Certain factors that could cause actual results and conditions to differ materially from those projected in these forward-looking statements are set forth below in Part II. Other Information, Item 1A. Risk Factors. Other factors that could cause actual results to differ materially include:*

*changes in the economy, including economic downturns or recessions;*

*risks associated with possible disruption in our operations due to terrorism;*

*future changes in laws or regulations or changes in accounting principles; and*

*other risks and uncertainties as may be detailed from time to time in our public announcements and SEC filings.*

*Financial or other information presented for private finance portfolio companies has been obtained from the portfolio companies, and the financial information presented may represent unaudited, projected or pro forma financial information, and therefore may not be indicative of actual results. In addition, the private equity industry uses financial measures such as EBITDA or EBITDAM (Earnings Before Interest, Taxes, Depreciation, Amortization and, in some instances, Management fees) in order to assess a portfolio company's financial performance and to value a portfolio company. EBITDA and EBITDAM are not intended to represent cash flow from operations as defined by U.S. generally accepted accounting principles and such information should not be considered as an alternative to net income, cash flow from operations or any other measure of performance prescribed by U.S. generally accepted accounting principles.*

### **OVERVIEW**

We are a business development company, or BDC, in the private equity business and we are internally managed. Specifically, we primarily invest in private middle market companies in a variety of industries through long-term debt and equity capital instruments. Our financing generally is used to fund buyouts, acquisitions, growth, recapitalizations, note purchases, and other types of financings. Our investment objective is to achieve current income and capital gains.

The United States and the global economies continue to operate in an unprecedented economic recession and the U.S. capital markets continue to experience volatility and a severe lack of liquidity. Our strategy in these difficult economic times has been focused on reducing costs and streamlining our organization; building liquidity through selected asset sales; retaining capital by limiting new investment activity and suspending dividend payments; and working with portfolio companies to help them position for growth when the economy recovers.

Our portfolio composition at September 30, 2009 and 2008, and December 31, 2008, was as follows:

**September 30,**

	<b>2009</b>	<b>2008</b>	<b>December 31, 2008</b>
Private finance	97 %	97%	97%
Commercial real estate finance	3 %	3%	3%

Our earnings primarily depend on the level of interest and dividend income, fee and other income, and net realized and unrealized gains or losses on our investment portfolio after deducting interest expense on borrowed capital, operating expenses and income taxes, including excise tax.

Interest income primarily results from the stated interest rate earned on a loan or debt security and the amortization of loan origination fees and discounts. The level of interest income is directly related to the balance of the interest-bearing investment portfolio outstanding during the period multiplied by the weighted average yield. Our ability to generate interest income is dependent on economic, regulatory, and competitive factors that influence new investment activity, interest rates on the types of loans we make, the level of repayments in the portfolio, the amount of loans and debt securities for which interest is not accruing and our ability to secure debt and equity capital for our investment activities. The level of fee income is primarily related to the level of new investment activity and the level of fees earned from portfolio companies and funds managed by us. The level of investment activity can vary substantially from period to period depending on many factors, including the general economic environment, the amount of debt and equity capital available to middle market companies, the level of merger and acquisition activity for such companies, the competitive environment for the types of investments we make and our ability to secure debt and equity capital for our investment activities.

In addition to managing our own assets, we manage certain funds that also invest in the debt and equity securities of primarily private middle market companies in a variety of industries. At September 30, 2009, we had eight separate funds under our management (together, the Managed Funds) for which we may earn management or other fees for our services. In some cases, we have invested in the equity of these funds, along with other third parties, from which we may earn a current return and/or a future incentive allocation. At September 30, 2009, the Managed Funds had total assets of approximately \$3.3 billion. In October 2009, we sold our investment, including our outstanding commitments and the provision of management services, in the Senior Secured Loan Fund LLC, which had assets of \$921.2 million at September 30, 2009, and we may sell additional Managed Funds. See [Managed Funds](#) below for further discussion.

In the aggregate, including the total assets on our balance sheet and assets under management in our Managed Funds, we had \$5.9 billion in managed assets at September 30, 2009.

On October 26, 2009, we entered into an Agreement and Plan of Merger with Ares Capital Corporation. The merger agreement provides that Allied Capital will merge into Ares Capital with Ares Capital being the surviving company. Upon consummation of the merger, each share of our common stock will be converted into and become exchangeable for 0.325 common shares of Ares Capital Corporation. Consummation of the merger, which is currently anticipated to occur by the end of the first quarter of 2010, is subject to certain conditions, including, among others, Allied Capital stockholder approval, Ares Capital stockholder approval, required regulatory approvals, receipt of certain Ares Capital and Allied Capital lender consents and other customary closing conditions. See [Recent Developments](#).

## PORTFOLIO AND INVESTMENT ACTIVITY

The total portfolio at value, investment activity, and the yield on interest-bearing investments at and for the three and nine months ended September 30, 2009 and 2008, and at and for the year ended December 31, 2008, were as follows:

(\$ in millions)	At and for the Three Months Ended September 30,		At and for the Nine Months Ended September 30,		At and for the Year Ended December 31,
	2009	2008	2009	2008	2008
Portfolio at value	\$ 2,511.2	\$ 4,208.5	\$ 2,511.2	\$ 4,208.5	\$ 3,493.0
Investments funded	\$ 19.4	\$ 433.8	\$ 118.1	\$ 1,027.8	\$ 1,078.2
	\$ 5.8	\$ 11.4	\$ 24.4	\$ 35.9	\$ 53.4

Edgar Filing: ALLIED CAPITAL CORP - Form 10-Q

Payment-in-kind interest and dividends, net of cash collections										
Principal collections related to investment repayments or sales <sup>(1)</sup>	\$	63.5	\$	280.6	\$	650.9	\$	878.2	\$	1,037.3
Yield on interest-bearing portfolio investments <sup>(2)</sup>		11.9%		11.9%		11.9%		11.9%		12.1%

- (1) Principal collections related to investment repayments or sales for the three and nine months ended September 30, 2009, included \$0.0 million and \$171.0 million, respectively, of cash collections related to notes and other receivables received from the sale of investments in portfolio companies in prior periods. Principal collections related to investment repayments or sales for the three and nine months ended September 30, 2009 and 2008, and year ended December 31, 2008, included collections of \$0.0 million, \$274.9 million, \$46.3 million, \$352.7 million and \$383.0 million, respectively, related to the sale of loans to certain of our Managed Funds.
- (2) The weighted average yield on interest-bearing investments is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, plus the effective interest yield on the preferred shares/income notes of CLOs, plus the effective stated interest yield on the subordinated certificates in the Senior Secured Loan Fund LLC divided by (b) total interest-bearing investments at value. The weighted average yield is computed as of the balance sheet date.

### Private Finance

The private finance portfolio at value, investment activity, and the yield on interest bearing investments at and for the three and nine months ended September 30, 2009 and 2008, and at and for the year ended December 31, 2008, were as follows:

- (1) The weighted average yield on loans and debt securities is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total loans and debt securities at value. The weighted average yield on the preferred shares/income notes of CLOs is calculated as the (a) effective interest yield on the preferred shares/income notes of CLOs, divided by (b) preferred shares/income notes of CLOs at value. The weighted average yield on the subordinated certificates in the Senior Secured Loan Fund LLC is computed as the (a) effective interest yield on the subordinated certificates divided by (b) total investment at value. The weighted average yields are computed as of the balance sheet date.
- (2) Investments in the preferred shares/income notes of CLOs and the subordinated certificates in the Senior Secured Loan Fund LLC earn a current return that is included in interest income in the consolidated statement of operations.
- (3) Includes \$0.0 million and \$171.0 million, respectively, cash collections during the three and nine months ended September 30, 2009, related to notes and other receivables received from the sale of investments in prior periods. Also includes collections from the sale or repayment of senior loans totaling \$13.4 million, \$77.6 million, \$101.2 million, \$225.4 million and \$285.3 million, respectively, for the three and nine months ended September 30, 2009 and 2008, and for the year ended December 31, 2008.

- (4) Includes \$10.6 million and \$38.7 million, respectively, funded under pre-existing commitments under revolving lines of credit during the three and nine months ended September 30, 2009. During the three and nine months ended September 30, 2009, a total of \$10.1 million and \$38.4 million, respectively, was repaid under these arrangements, which is included in principal collections related to investment repayments or sales.

Our private finance portfolio primarily is composed of debt and equity investments. Debt investments include senior loans, unitranche debt (an instrument that combines both senior and subordinated financing, generally in a first lien position), or subordinated debt (with or without equity features). The junior debt that we have in the portfolio is lower in repayment priority than senior debt and is also known as mezzanine debt. Our portfolio contains equity investments for a minority equity stake in portfolio companies and includes equity features such as nominal cost warrants received in conjunction with our debt investments. In a buyout transaction, we generally invest in senior and/or subordinated debt and equity (preferred and/or voting or non-voting common) where our equity ownership represents a significant portion of the equity, but may or may not represent a controlling interest.

**Investment Activity.** Investments funded and the weighted average yield on interest-bearing investments funded for the nine months ended September 30, 2009 and 2008, and for the year ended December 31, 2008, consisted of the following:

(1) The weighted average yield on interest-bearing investments is computed as the (a) annual stated interest on accruing interest-bearing investments, divided by (b) total interest-bearing investments funded. The weighted average yield on the preferred shares/income notes of CLOs is calculated as the (a) effective interest yield on the preferred shares/income notes of CLOs, divided by (b) preferred shares/income notes of CLOs funded. The weighted average yield on the subordinated certificates in the Senior Secured Loan Fund LLC is computed as the (a) effective interest yield on the subordinated certificates (b) total investment at value. The weighted average yield is calculated using yields as of the date an investment is funded.

(2) In June 2009, the Unitranche Fund LLC was renamed the Senior Secured Loan Fund LLC. In October 2009, we sold our investment, including our outstanding commitments and the provision of management services, in the Senior Secured Loan Fund. See Recent Developments.

(3) Unitranche debt is an investment that combines both senior and subordinated financing, generally in a first lien position. The yield on a unitranche investment reflects the blended yield of senior and subordinated debt.

(4) Subordinated debt investments for the nine months ended September 30, 2008, and year ended December 31, 2008, included \$43.8 million in investments in the bonds of collateralized loan obligations (CLOs). Certain of these CLOs are managed by Callidus Capital Corporation (Callidus), a wholly owned portfolio company. These CLOs primarily invest in senior corporate loans.

(5) CLO equity investments included preferred shares/income notes of CLOs that primarily invest in senior corporate loans. Certain of these CLOs are managed by us or by Callidus.

(6) The senior secured loan to Ciena Capital LLC was acquired on September 30, 2008, and was placed on non-accrual status on the purchase date.

(7) Excluding the senior secured loan to Ciena, the weighted average yield on new investments for the year ended December 31, 2008 was 10.8%.

For the nine months ended September 30, 2009, we made private finance investments totaling \$115.5 million. Investments arose primarily from fundings under pre-existing investment commitments, including fundings under revolving line of credit instruments and \$47.4 million to fund investments made by the Senior Secured Loan Fund LLC.

Historically, our focus for investments generally has been on higher return junior debt capital investments. Senior loans funded by us generally were funded with the intent to sell the loan or for the portfolio company to refinance the loan at some point in the future as discussed below. We have made fewer direct unitranche debt investments since the establishment of the Senior Secured Loan Fund LLC (formerly, the Unitranche Fund LLC) in the fourth quarter of 2007. Unitranche loans sourced by us in these periods generally were referred to the Senior Secured Loan Fund. Since its inception, we have invested \$172.8 million in the Senior Secured Loan Fund. See [Managed Funds](#) and [Recent Developments](#) below.

We generally fund new investments using cash. In addition, we may acquire securities in exchange for our common equity. Also, we may acquire new securities through the reinvestment of previously accrued interest and dividends in debt or equity securities, or the current reinvestment of interest and dividend income through the receipt of a debt or equity security (payment-in-kind income). From time to time we may opt to reinvest accrued interest receivable in a new debt or equity security in lieu of receiving such interest in cash.

We may underwrite or arrange senior loans related to our portfolio investments or for other companies that are not in our portfolio. When we underwrite or arrange senior loans, we may earn a fee for such activities. Senior loans underwritten or arranged by us may be funded by us at closing. When these senior loans are closed, we may fund all or a portion of the underwritten commitment pending sale of the loan to other investors, which may include loan sales to the Managed Funds or funds managed by Callidus Capital Corporation (Callidus), a wholly owned portfolio company. After completing loan sales, we may retain a position in these senior loans. We generally earn a fee on the senior loans we underwrite or arrange whether or not we fund the underwritten commitment. In addition,

we may fund most or all of the debt and equity capital upon the closing of certain buyout transactions, which may include investments in lower-yielding senior debt. Subsequent to the closing, the portfolio company may refinance all or a portion of the lower-yielding senior debt, which would reduce our investment.

We have focused our efforts on selling assets in our portfolio to generate capital. Principal collections related to private finance investment repayments or sales were \$644.2 million for the nine months ended September 30, 2009, including \$171.0 million of cash collections related to notes and other receivables received from the sale of investments in portfolio companies in prior periods. Principal collections include repayments of senior debt funded by us that was subsequently sold by us or refinanced or repaid by the portfolio companies. We plan to continue to sell assets and re-balance our portfolio with an emphasis on current income. However, there can be no assurance that we will be able to achieve these objectives.

**Outstanding Investment Commitments.** At September 30, 2009, we had outstanding private finance investment commitments as follows:

(\$ in millions)	Companies		Companies		Total
	More Than 25% Owned <sup>(1)</sup>	5% to 25% Owned	Less Than 5% Owned		
Senior loans	\$ 15.4	\$ 7.4	\$ 63.0	\$ 85.8	
Unitranche debt	3.0		11.6	14.6	
Subordinated debt	16.5	4.3		20.8	
Total loans and debt securities	34.9	11.7	74.6	121.2 <sup>(2)</sup>	
Senior Secured Loan Fund	352.2			352.2	
Equity securities	14.2	7.0	20.9	42.1 <sup>(3)</sup>	
Total	\$ 401.3	\$ 18.7	\$ 95.5	\$ 515.5	

<sup>(1)</sup> Includes a \$4.0 million revolving line of credit commitment for working capital to Callidus Capital Corporation (Callidus), a portfolio company controlled by us, which owns 100% of Callidus Capital Management, LLC, an asset management company that structures and manages collateralized loan obligations (CLOs), collateralized debt obligations (CDOs), and other related investments.

<sup>(2)</sup> Includes \$91.8 million in the form of revolving debt facilities to 22 companies.

<sup>(3)</sup> Includes \$26.7 million to 7 private equity and venture capital funds. These fund commitments are generally drawn over a multi-year period of time as the funds make investments.

Total commitments were \$515.5 million at September 30, 2009, or \$163.3 million excluding the \$352.2 million in commitments to the Senior Secured Loan Fund (see [Managed Funds](#) ). In October 2009, we sold our investment, including our outstanding commitments and the provision for management services, in the Senior Secured Loan Fund. See [Recent Developments](#).

In addition to these outstanding investment commitments at September 30, 2009, we also had outstanding guarantees to private finance portfolio companies. See [Financial Condition, Liquidity and Capital Resources](#) below. We intend to

fund these commitments with existing cash and through cash flows from operations before new investments, although there can be no assurance that we will generate sufficient cash flows to satisfy these commitments.

***Net Unrealized Depreciation on Private Finance Portfolio.*** At September 30, 2009, our private finance portfolio totaled \$4.2 billion at cost and \$2.4 billion at value, which included net unrealized depreciation of \$1.8 billion. \$1.0 billion or 59.7% of the total net unrealized depreciation of \$1.8 billion was related to our investments in four portfolio companies and our investment in CLO/CDO Assets as follows: \$445.3 million or 25.4% related to our investment in Ciena Capital, LLC; \$217.2 million or 12.4% related to investments in CLO/CDO Assets; \$186.8 million or 10.7% related to our investment in EarthColor, Inc.; \$106.8 million or 6.1% related to our investment in WMA Equity Corporation and Affiliates; and \$89.7 million or 5.1% related to our investment in Hot Stuff Foods, LLC.

**Investments in Collateralized Loan Obligations and Collateralized Debt Obligations (CLO/CDO Assets).** At both September 30, 2009, and December 31, 2008, we had investments in CLO issuances and a CDO bond, which totaled as follows:

(\$ in millions)	Cost	2009 Value	Yield <sup>(1)</sup>	Cost	2008 Value	Yield <sup>(1)</sup>
CLO/CDO bonds <sup>(2)</sup>	\$ 130.0	\$ 73.3	12.7%	\$ 127.7	\$ 86.1	18.5%
Preferred shares/income notes of CLOs	245.0	84.4	12.1%	248.2	179.2	16.4%
Total	\$ 375.0	\$ 157.7		\$ 375.9	\$ 265.3	
Percentage of total assets		5.6%			7.1%	

<sup>(1)</sup> The weighted average yield is calculated as the (a) annual stated interest or the effective interest yield on the accruing bonds or the effective interest yield on the preferred shares/income notes, divided by (b) CLO and CDO assets at value. The market yield used in the valuation of the CLO and CDO assets may be different than the interest yields shown above. See discussion below.

<sup>(2)</sup> Included in private finance subordinated debt.

The CLO and CDO issuances in which we have invested are primarily invested in senior corporate loans. Certain of these funds are managed by Callidus, and certain of these funds are managed by us. See also Note 3, Portfolio from our Notes to the Consolidated Financial Statements included in Item 1.

The initial yields on the cost basis of the CLO preferred shares and income notes are based on the estimated future cash flows expected to be paid to these CLO classes from the underlying collateral assets. As each CLO preferred share or income note ages, the estimated future cash flows are updated based on the estimated performance of the underlying collateral assets, and the respective yield on the cost basis is adjusted as necessary. As future cash flows are subject to uncertainties and contingencies that are difficult to predict and are subject to future events that may alter current assumptions, no assurance can be given that the anticipated yields to maturity will be achieved.

The CLO/CDO Assets in which we have invested are junior in priority for payment of interest and principal to the more senior notes issued by the CLOs and CDO. Cash flow from the underlying collateral assets in the CLOs and CDO generally is allocated first to the senior bonds in order of priority, then any remaining cash flow is generally distributed to the preferred shareholders and income note holders. To the extent there are ratings downgrades, defaults and unrecoverable losses on the underlying collateral assets that result in reduced cash flows, the preferred shares/income notes will bear this loss first and then the subordinated bonds would bear any loss after the preferred shares/income notes. At both September 30, 2009, and December 31, 2008, the face value of the CLO/CDO Assets held by us was subordinate to as much as 94% of the face value of the securities outstanding in these CLOs and CDO.

At September 30, 2009, and December 31, 2008, the underlying collateral assets of these CLO and CDO issuances, consisting primarily of senior corporate loans, were issued by 627 issuers and 658 issuers, respectively, and had balances as follows:

(\$ in millions)	2009	2008
Bonds	\$ 232.3	\$ 268.3

Syndicated loans	4,387.2	4,477.3
Cash <sup>(1)</sup>	107.9	89.6
Total underlying collateral assets at cost <sup>(2)</sup>	\$ 4,727.4	\$ 4,835.2

(1) Includes undrawn liability amounts.

(2) At September 30, 2009, and December 31, 2008, the total cost basis of defaulted obligations was \$139.6 million and \$95.0 million, respectively, or approximately 3.0% and 2.0%, respectively, of the total underlying collateral assets.

Throughout 2008, market yields for CLO securities increased. As the market yields for our investments in CLO preferred shares/income notes increased throughout 2008 and into 2009, the fair value of certain of our investments in these assets decreased. At September 30, 2009, the market yield used to value our preferred shares/income notes ranged from 27.5% to 31.5%. Ratings agencies have continued to downgrade the underlying collateral in these types

of structures regardless of the payment status of the loan or debt security. In the current economic environment, we expect ratings downgrades, defaults and losses to continue to increase, and we have also considered this in our valuation analysis. Net change in unrealized appreciation or depreciation for the nine months ended September 30, 2009, included a net increase of \$6.1 million related to our investments in CLO/CDO Assets. We received third-party valuation assistance for our investments in the CLO/CDO Assets in each quarter of 2008 and in the first three quarters of 2009. See Results of Operations Valuation Methodology Private Finance below for further discussion of the third-party valuation assistance we received.

As the debt capital markets show significant volatility, yield spreads may widen further. As a result, if the market yields for our investments in CLOs continue to increase, or should the performance of the underlying assets in the CLOs decrease or additional ratings downgrades occur, the fair value of our investments may decrease further.

**Ciena Capital LLC.** Ciena Capital LLC (Ciena) has provided loans to commercial real estate owners and operators. Ciena has been a participant in the Small Business Administration's 7(a) Guaranteed Loan Program, and its wholly-owned subsidiary is licensed by the SBA as a Small Business Lending Company (SBLC). Ciena remains subject to SBA rules and regulations. Ciena is headquartered in New York, NY.

On September 30, 2008, Ciena voluntarily filed for bankruptcy protection under Chapter 11 of Title 11 of the United States Code (the Bankruptcy Code) in the United States Bankruptcy Court for the Southern District of New York (the Court). Ciena continues to service and manage its assets as a debtor-in-possession under the jurisdiction of the Court and in accordance with the applicable provisions of the Bankruptcy Code and the orders of the Court.

As a result of Ciena's decision to file for bankruptcy protection, our unconditional guaranty of the obligations outstanding under Ciena's revolving credit facility became due and, in lieu of paying under our guarantee, we purchased the positions of the senior lenders under Ciena's revolving credit facility. As of September 30, 2009, the senior secured loan to Ciena had a cost basis of \$319.0 million and a value of \$102.2 million. We continue to guarantee the remaining principal balance of \$5 million, plus related interest, fees and expenses payable to a third party bank. In connection with our continuing guaranty of the amounts held by this bank, we have agreed that the amounts owing to the bank under the Ciena revolving credit facility will be paid before any of the secured obligations of Ciena now owed to us.

At September 30, 2009 and December 31, 2008, our investment in Ciena was as follows:

(\$ in millions)	September 30, 2009		December 31, 2008	
	Cost	Value	Cost	Value
Senior Loan	\$ 319.0	\$ 102.2	\$ 319.0	\$ 104.9
Class B Equity Interests <sup>(1)</sup>	119.5		119.5	
Class C Equity Interests <sup>(1)</sup>	109.1		109.3	
Total <sup>(2)</sup>	\$ 547.6	\$ 102.2	\$ 547.8	\$ 104.9

<sup>(1)</sup> At September 30, 2009 and December 31, 2008, we held 100% of the Class B equity interests and 94.9% of the Class C equity interests.

<sup>(2)</sup> In addition to our investment in Ciena included in the portfolio, we have amounts receivable from or related to Ciena that are included in other assets in the accompanying consolidated financial statements. See below.

During the nine months ended September 30, 2009, we funded \$97.4 million to support Ciena's term securitizations in lieu of draws under related standby letters of credit, including the funding of \$46.0 million during the third quarter of 2009. This was required primarily as a result of the issuer of the letters of credit not extending maturing standby letters of credit that were issued under our former revolving line of credit. The amounts funded were recorded as other assets in the accompanying consolidated balance sheet. At September 30, 2009 and December 31, 2008, other assets included amounts receivable from or related to Ciena totaling \$112.7 million and \$15.4 million, respectively at cost, and \$2.0 million and \$2.1 million, respectively at value. Net change in unrealized appreciation or depreciation included a net decrease related to our investment in and receivables from Ciena of \$36.8 million and \$99.8 million for the three and nine months ended September 30, 2009, respectively. Net change in unrealized appreciation or depreciation included a net decrease in our investment in and receivables from Ciena of \$151.9 million and \$220.5 million for the three and nine months ended September 30, 2008, respectively.

At September 30, 2009, we had no outstanding standby letters of credit issued under our former revolving line of credit. We have considered the letters of credit and the funding thereof in the valuation of Ciena at September 30, 2009 and December 31, 2008.

Our investment in Ciena was on non-accrual status, therefore we did not earn any interest and related portfolio income from our investment in Ciena for each of the three and nine months ended September 30, 2009 and 2008.

At September 30, 2009, Ciena had one non-recourse securitization SBA loan warehouse facility, which has reached its maturity date but remains outstanding. Ciena is working with the providers of the SBA loan warehouse facility with regard to the repayment of that facility. We have issued a performance guaranty whereby we agreed to indemnify the warehouse providers for any damages, losses, liabilities and related costs and expenses that they may incur as a result of Ciena's failure to perform any of its obligations as loan originator, loan seller or loan servicer under the warehouse securitizations.

The Office of the Inspector General of the SBA (OIG) and the United States Secret Service are conducting ongoing investigations of allegedly fraudulently obtained SBA guaranteed loans issued by Ciena. Ciena also is subject to other SBA and OIG audits, investigations, and reviews. In addition, the Office of the Inspector General of the U.S. Department of Agriculture is conducting an investigation of Ciena's lending practices under the Business and Industry Loan (B&I) program. The OIG and the U.S. Department of Justice are also conducting a civil investigation of Ciena's lending practices in various jurisdictions. We are unable to predict the outcome of these inquiries, and it is possible that third parties could try to seek to impose liability against us in connection with certain defaulted loans in Ciena's portfolio. These investigations, audits and reviews are ongoing.

These investigations, audits, reviews, and litigation have had and may continue to have a material adverse impact on Ciena and, as a result, could continue to negatively affect our financial results. We have considered Ciena's voluntary filing for bankruptcy protection, the letters of credit and the funding thereof, current regulatory issues, ongoing investigations and litigation in performing the valuation of Ciena at September 30, 2009 and December 31, 2008.

### Commercial Real Estate Finance

The commercial real estate finance portfolio at value, investment activity, and the yield on interest-bearing investments at and for the three and nine months ended September 30, 2009 and 2008, and at and for the year ended December 31, 2008, were as follows:

(\$ in millions)	At and for the Three Months Ended September 30,				At and for the Nine Months Ended September 30,				At and for the Year Ended December 31,	
	2009		2008		2009		2008		2008	
	Value	Yield <sup>(1)</sup>	Value	Yield <sup>(1)</sup>	Value	Yield <sup>(1)</sup>	Value	Yield <sup>(1)</sup>	Value	Yield <sup>(1)</sup>
Portfolio at value:										
Commercial mortgage loans	\$ 50.5	6.9%	\$ 51.4	7.4%	\$ 50.5	6.9%	\$ 51.4	7.4%	\$ 53.5	7.4%
Real estate owned	6.2		24.0		6.2		24.0		20.8	
Equity interests	11.8		31.2		11.8		31.2		19.6	
Total portfolio	\$ 68.5		\$ 106.6		\$ 68.5		\$ 106.6		\$ 93.9	

Edgar Filing: ALLIED CAPITAL CORP - Form 10-Q

Investments funded	\$ 0.8	\$ 4.9	\$ 2.6	\$ 7.1	\$ 10.1
Payment-in-kind interest, net of cash collections	\$	\$	\$	\$ 0.1	\$ 0.2
Principal collections related to investment repayments or sales	\$ 0.4	\$	\$ 6.0	\$ 16.7	\$ 16.8

(1) The weighted average yield on the interest-bearing investments is computed as the (a) annual stated interest on accruing loans plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing interest-bearing investments less the annual amortization of origination costs, divided by (b) total interest-bearing investments at value. The weighted average yield is computed as of the balance sheet date. Interest-bearing investments for the commercial real estate finance portfolio include all investments except for real estate owned and equity interests.

At September 30, 2009, we had outstanding funding commitments related to the commercial real estate portfolio of \$28.4 million.

### Managed Funds

In addition to managing our own assets, we manage certain funds that also invest in the debt and equity securities of primarily private middle market companies in a variety of industries and broadly syndicated senior secured loans. In some cases, we have invested in the equity of these funds, along with other third parties, from which we may earn a current return and/or a future incentive allocation. At September 30, 2009, we had eight separate funds under our management (together, the Managed Funds) for which we may earn management or other fees for our services. In October 2009, we sold our investment, including our outstanding commitments and the provision of management services, in the Senior Secured Loan Fund LLC, and we may sell additional Managed Funds.

In the first quarter of 2009, we completed the acquisition of the management contracts of three middle market senior debt CLOs (together, the Emporia Funds) and certain other related assets for approximately \$11 million (subject to post-closing adjustments). The acquired assets are included in other assets in the accompanying consolidated balance sheet and will be amortized over the life of the contracts.

The assets of the Managed Funds at September 30, 2009 and December 31, 2008, and our management fees as of September 30, 2009 were as follows:

(\$ in millions) Name of Fund	Assets of Managed Funds		Management Fee <sup>(2)</sup>
	September 30, 2009	December 31, 2008	
Senior Secured Loan Fund LLC <sup>(3)</sup>	\$ 921.2	\$ 789.8	0.375%
Allied Capital Senior Debt Fund, L.P.	351.4	412.9	1.625% <sup>(1)(2)</sup>
Knightsbridge CLO 2007-1 Ltd.	500.7	500.6	0.600%
Knightsbridge CLO 2008-1 Ltd.	304.6	304.8	0.600%
Emporia Preferred Funding I, Ltd.	419.8		0.625% <sup>(1)</sup>
Emporia Preferred Funding II, Ltd.	355.7		0.650% <sup>(1)</sup>
Emporia Preferred Funding III, Ltd.	406.1		0.650% <sup>(1)</sup>
AGILE Fund I, LLC	83.5	99.3	(1)
Total Assets	\$ 3,343.0	\$ 2,107.4	

- (1) In addition to the management fees, we are entitled to an incentive allocation subject to certain performance benchmarks. There can be no assurance that the incentive allocation will be earned.
- (2) Management fees are stated as a percent of assets except for the Allied Capital Senior Debt Fund, L.P. ( ACSDF ) which is stated as a percent of equity capital. The management fee paid by ACSDF was 2.000% at December 31, 2008 and was reduced to 1.625% effective January 1, 2009 for the 2009 calendar year.
- (3) In June 2009, the Unitranche Fund LLC was renamed the Senior Secured Loan Fund LLC. In October 2009, we sold our investment, including our commitments and the provision of management services, in the Senior Secured Loan Fund LLC. See Recent Developments.

A portion of the management fees earned by us may be deferred under certain circumstances. Collection of the fees earned is dependent in part on the performance of the relevant fund. We may pay a portion of management fees we receive to Callidus Capital Corporation, a wholly owned portfolio investment, for services provided to the Allied Capital Senior Debt Fund, L.P., Knightsbridge CLO 2007-1 Ltd., Knightsbridge CLO 2008-1 Ltd. and the Emporia Funds.

Our responsibilities to the Managed Funds may include investment origination, underwriting, and portfolio monitoring services. Each of the Managed Funds may separately invest in the debt or equity of companies in our

portfolio, and these investments may be senior, pari passu or junior to the debt and equity investments held by us. We may or may not participate in investments made by the Managed Funds.

During the nine months ended September 30, 2009, we sold assets to certain of the Managed Funds for which we received proceeds of \$9.7 million and we recognized a net realized gain of \$6.3 million. During the nine months ended September 30, 2008, we sold assets to certain of the Managed Funds, for which we received proceeds of \$352.7 million, respectively, and we recognized realized gains of \$2.8 million.

In addition to managing these funds, we hold certain investments in the Managed Funds as follows:

(\$ in millions) Name of Fund	Investment Description	September 30, 2009		December 31, 2008	
		Cost	Value	Cost	Value
Senior Secured Loan Fund LLC <sup>(1)</sup>	Subordinated Certificates and Equity Interests	\$ 165.2	\$ 165.0	\$ 125.4	\$ 125.4
Allied Capital Senior Debt Fund, L.P.	Equity interests	31.8	33.0	31.8	31.8
Knightsbridge CLO 2007-1 Ltd.	Class E Notes and Income Notes	57.4	33.8	59.6	50.1
Knightsbridge CLO 2008-1 Ltd.	Class C Notes, Class D Notes, Class E Notes and Income Notes	53.2	49.2	52.7	52.7
AGILE Fund I, LLC	Equity Interests	0.7	0.4	0.7	0.5
Total		\$ 308.3	\$ 281.4	\$ 270.2	\$ 260.5

<sup>(1)</sup> We have committed up to a total of \$525.0 million of subordinated certificates to the Senior Secured Loan Fund. The Senior Secured Loan Fund will be capitalized as investment transactions are completed. In October 2009, we sold our investment, including our outstanding commitments and the provision of management services, in the Senior Secured Loan Fund LLC. See Recent Developments.

## PORTFOLIO ASSET QUALITY

**Loans and Debt Securities on Non-Accrual Status.** In general, interest is not accrued on loans and debt securities if we have doubt about interest collection or where the enterprise value of the portfolio company may not support further accrual. In addition, interest may not accrue on loans to portfolio companies that are more than 50% owned by us depending on such company's capital requirements. To the extent interest payments are received on a loan that is not accruing interest, we may use such payments to reduce our cost basis in the investment in lieu of recognizing interest income.

At September 30, 2009, and December 31, 2008, loans and debt securities at value not accruing interest for the total investment portfolio were as follows:

(\$ in millions)	2009	2008
Private finance		
Companies more than 25% owned	\$ 194.2	\$176.1
Companies 5% to 25% owned	15.3	

Edgar Filing: ALLIED CAPITAL CORP - Form 10-Q

Companies less than 5% owned	96.3	151.8
Commercial real estate finance	9.2	7.7
Total	\$ 315.0	\$335.6
Percentage of total portfolio	12.5%	9.6%

At September 30, 2009 and December 31, 2008, private finance non-accruals included our senior secured debt in Ciena, which was \$102.2 million or 4.1% and \$104.9 million or 3.0%, respectively, of the total portfolio at value. The Ciena senior secured loan was acquired in the third quarter of 2008 and was placed on nonaccrual status upon its purchase. See Private Finance Ciena Capital LLC above. During the nine months ended September 30, 2009, we placed certain interest bearing investments in eight portfolio companies on non-accrual; however, non-accruals decreased primarily due to unrealized depreciation. The increase in loans and debt securities not accruing

interest as a percentage of the total portfolio as of September 30, 2009, as compared to December 31, 2008, is primarily the result of the overall decrease in the size of the portfolio. During the third quarter of 2009, one new loan was placed on non-accrual status with a fair value of approximately \$14.9 million. The remainder of the increase from June 30, 2009 to September 30, 2009 was the result of a net increase in the fair value of loans on non-accrual status.

**Loans and Debt Securities Over 90 Days Delinquent.** Loans and debt securities greater than 90 days delinquent at value at September 30, 2009, and December 31, 2008, were as follows:

(\$ in millions)	2009	2008
Private finance	\$ 124.8	\$106.6
Commercial mortgage loans	4.3	1.4
Total	\$ 129.1	\$108.0
Percentage of total portfolio	5.1%	3.1%

At September 30, 2009 and December 31, 2008, private finance loans and debt securities over 90 days delinquent included our senior secured debt in Ciena, which was \$102.2 million or 4.1% and \$104.9 million or 3.0%, respectively, of the total portfolio at value. The Ciena senior secured loan was acquired in the third quarter of 2008 and was placed on nonaccrual status upon its purchase. See Private Finance Ciena Capital LLC above. The increase in loans over 90 days delinquent from June 30, 2009 was due to the addition of two new loans with a fair value of approximately \$19.4 million. The remainder of the increase was the result of a net increase in the fair value of loans over 90 days delinquent.

The amount of the portfolio that is on non-accrual status or greater than 90 days delinquent may vary from period to period primarily resulting from changes in the composition of the portfolio as a result of new investment, repayment, and exit activity, and changes in investment values. The private equity business is, in part, about working with troubled portfolio companies to improve their businesses and protect our investment. We continue to follow our historical practice of working with portfolio companies in order to realize the potential of each investment. Loans and debt securities on non-accrual status and over 90 days delinquent should not be added together as they are two separate measures of portfolio asset quality. Loans and debt securities that are in both categories (i.e., on non-accrual status and over 90 days delinquent) totaled \$129.1 million and \$108.0 million at September 30, 2009, and December 31, 2008, respectively. Our assets on non-accrual are higher than our loans over 90 days delinquent primarily due to the effect of loans with payment-in-kind interest. Loans with payment-in-kind interest experience no payment delinquency, but collection of that payment-in-kind interest in the future may be doubtful and we may determine that the loan should be placed on non-accrual. Given the severity of this economic recession, we would expect that non-accruals and loans over 90 days delinquent may increase in the future.

**RESULTS OF OPERATIONS****Comparison of the Three and Nine Months Ended September 30, 2009 and 2008**

The following table summarizes our operating results for the three and nine months ended September 30, 2009 and 2008.

, except per share amounts)	For the Three Months Ended September 30,				For the Nine Months Ended September 30,		
	2009 (unaudited)	2008	Change	Percent Change	2009 (unaudited)	2008	Change

\* Comparisons may not be meaningful. Net change in unrealized appreciation or depreciation and net gains (losses) can fluctuate significantly from period to period.

**Interest and Related Portfolio Income.** Interest and related portfolio income includes interest and dividend income and fees and other income.

**Interest and Dividends.** Interest and dividend income for the three and nine months ended September 30, 2009 and 2008, was composed of the following:

(\$ in millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Interest				
Private finance loans and debt securities	\$ 55.9	\$ 95.8	\$ 193.8	\$ 311.0
Preferred shares/income notes of CLOs	2.3	9.4	11.7	24.8
Subordinated certificates in Senior Secured Loan Fund LLC	5.9	2.9	11.8	4.5
Commercial mortgage loans	0.9	0.9	2.7	3.1
Cash, U.S. Treasury bills, money market and other securities	0.0	1.2	0.5	3.6
Total interest	65.0	110.2	220.5	347.0
Dividends	0.6	2.0	9.5	19.1
Total interest and dividends	\$ 65.6	\$ 112.2	\$ 230.0	\$ 366.1

The level of interest income, which includes interest paid in cash and in kind, is directly related to the balance of the interest-bearing investment portfolio outstanding during the period multiplied by the weighted average yield. The interest-bearing investments in the portfolio at value and the yield on the interest-bearing investments in the portfolio at September 30, 2009 and 2008, were as follows:

(\$ in millions)	2009		2008	
	Value	Yield <sup>(1)</sup>	Value	Yield <sup>(1)</sup>
Private finance:				
Loans and debt securities:				
Senior loans	\$ 289.4	4.8%	\$ 434.9	4.2%
Unitranche debt	374.7	12.2%	579.3	12.0%
Subordinated debt	1,182.9	13.4%	2,062.6	13.1%
Equity securities:				
Preferred shares/income notes of CLOs	84.4	12.1%	218.3	17.1%
Subordinated certificates in Senior Secured Loan Fund LLC	165.0	14.0%	114.3	10.3%
Commercial real estate:				
Commercial mortgage loans	50.5	6.9%	51.4	7.4%

Total interest-bearing investments	\$	2,146.9	11.9%	\$	3,460.8	11.9%
------------------------------------	----	---------	-------	----	---------	-------

- (1) The weighted average yield on loans and debt securities is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total interest-bearing investments at value. The weighted average yield on the preferred shares/income notes of CLOs is calculated as the (a) effective interest yield on the preferred shares/income notes of CLOs, divided by (b) preferred shares/income notes of CLOs at value. The weighted average yield on the subordinated certificates in the Senior Secured Loan Fund LLC is computed as the (a) effective interest yield on the subordinated certificates divided by (b) total investment at value. This yield excludes any return from the potential future excess cash flows from portfolio earnings available to the subordinated certificate holders and from related structuring fees and management and sourcing fees. See Fees and Other Income below. The weighted average yields are computed as of the balance sheet date.

Interest income has decreased over the 2008 periods primarily as a result of decreases in the aggregate size of the interest-bearing portfolio due to disposition of certain investments as we have been selectively selling assets

from our portfolio in order to generate capital to repay our indebtedness and de-lever our balance sheet. The amount of subordinated debt in our portfolio, which carries a higher yield than other categories of loans and debt securities, has decreased from \$2.1 billion at September 30, 2008 to \$1.2 billion at September 30, 2009. Interest income also decreased by approximately \$11.4 million due to additional investments being placed on non-accrual status during the nine months ended September 30, 2009. The weighted average yield varies from period to period based on the current stated interest on interest-bearing investments, the yield on interest-bearing investments funded, the yield on amounts repaid, the amount of interest-bearing investments for which interest is not accruing, changes in the value of interest-bearing investments and the mix of interest-bearing investments in the portfolio. Because we recently have exited, and in the future intend to exit, several interest-bearing investments in order to accumulate capital for repayment of debt, we expect that income from our interest-bearing investments will continue to decrease for the remainder of 2009.

Dividend income results from the dividend yield on preferred equity interests, if any, or the declaration of dividends by a portfolio company on preferred or common equity interests. Dividend income for the nine months ended September 30, 2009, was \$9.5 million as compared to \$19.1 million for the nine months ended September 30, 2008. Dividend income for the nine months ended September 30, 2008 includes a \$7.1 million dividend received in connection with the recapitalization of Norwesco, Inc., and \$5.4 million of dividends received in connection with the sale of certain portfolio assets to AGILE Fund I, LLC. Dividend income will vary from period to period depending upon the timing and amount of dividends that are declared or paid by a portfolio company on preferred or common equity interests.

*Fees and Other Income.* Fees and other income primarily include fees related to financial structuring, diligence, transaction services, management and consulting services to portfolio companies, commitments, guarantees, and other services and loan prepayment premiums. As a BDC, we are required to make significant managerial assistance available to the companies in our investment portfolio. Managerial assistance includes, but is not limited to, management and consulting services related to corporate finance, marketing, human resources, personnel and board member recruiting, business operations, corporate governance, risk management and other general business matters.

Fees and other income for the three and nine months ended September 30, 2009 and 2008, included fees relating to the following:

(\$ in millions)	For the Three Months Ended		For the Nine Months Ended	
	September 30, 2009	September 30, 2008	September 30, 2009	September 30, 2008
Fund management fees <sup>(1)</sup>	\$ 4.4	\$ 1.8	\$ 11.5	\$ 4.0
Management, consulting and other services provided to portfolio companies	1.8	2.9	5.9	8.9
Structuring and diligence	0.0	2.3	1.5	15.8
Commitment, guaranty and other fees from portfolio companies	0.6	1.1	2.4	4.7
Loan prepayment premiums		0.3	0.9	0.6
Other income		0.1		0.1
Total fees and other income	\$ 6.8	\$ 8.5	\$ 22.2	\$ 34.1

<sup>(1)</sup> See Portfolio and Investment Activity Managed Funds above.

Fees and other income generally are related to specific transactions or services and therefore may vary substantially from period to period depending on the level of investment activity and types of services provided and the level of assets in Managed Funds for which we earn management or other fees. The increase in fund management fees for the three and nine months ended September 30, 2009 as compared to the three and nine months ended September 30, 2008 was due to an increase in assets under management related to our Managed Funds. The amount of fund management fees is directly based on the amount of assets under management. During

October 2009, we sold our interests, including our outstanding commitments and the provision of management services, in the Senior Secured Loan Fund LLC. See *Recent Developments*. For the three and nine months ended September 30, 2009, fee income related to the Senior Secured Loan Fund was approximately \$1.2 million and \$4.5 million, respectively. Despite the increase in assets under management for the three and nine months ended September 30, 2009, fees and other income were lower for the three and nine months ended September 30, 2009 than for the three and nine months ended September 30, 2008 due to the significant decrease in our investment activity. Loan origination fees that represent yield enhancement on a loan are capitalized and amortized into interest income over the life of the loan.

Structuring and diligence fees included fees earned by us in connection with investments made by the Senior Secured Loan Fund LLC of \$0.0 million and \$2.1 million for the three months ended September 30, 2009 and 2008, respectively, and \$1.4 million and \$9.3 million, for the nine months ended September 30, 2009 and 2008, respectively. See *Managed Funds* above. The remainder of the structuring and diligence fees for 2008 primarily related to the higher level of new investment originations in 2008. Because we expect new investment activity to continue to be at a low level, we expect structuring and diligence fees to be lower for 2009 than for 2008.

**Operating Expenses.** Operating expenses include interest, employee, employee stock options, administrative expenses and the impairment of a long-lived asset.

**Interest Expense.** The fluctuations in interest expense during the three and nine months ended September 30, 2009 and 2008, primarily were attributable to increases in our weighted average cost of debt capital as well as changes in the level of our borrowings under various notes payable and our former revolving line of credit. Our contractual borrowing activity and weighted average cost of debt, including fees and debt financing costs, at and for the three and nine months ended September 30, 2009 and 2008, were as follows:

(\$ in millions)	At and for the Three Months Ended September 30,		At and for the Nine Months Ended September 30,	
	2009	2008	2009	2008
Total outstanding debt at par	\$ 1,636.5	\$ 2,131.0	\$ 1,636.5	\$ 2,131.0
Average outstanding debt	\$ 1,711.8	\$ 1,967.2	\$ 1,839.0	\$ 2,072.8
Weighted average cost <sup>(1)</sup>	10.7%	6.8%	10.7%	6.8%

(1) The weighted average annual interest cost is computed as the (a) annual stated interest rate on the debt plus the annual amortization of commitment fees, other facility fees and debt financing costs that are recognized into interest expense over the contractual life of the respective borrowings, divided by (b) debt outstanding on the balance sheet date.

On December 30, 2008, we amended our former private notes and former revolving line of credit, which increased the stated interest rate on those obligations by 100 basis points. Subsequent to this amendment, events of default occurred on these instruments. Pursuant to the terms of the former revolving credit facility, during the continuance of an event of default, the applicable spread on outstanding borrowings and fees on any letters of credit outstanding under the former revolving credit facility increased by an additional 200 basis points. Pursuant to the private notes, during the continuance of an event of default, the rate of interest borne by the former private notes increased by an additional 200 basis points. During the three and nine months ended September 30, 2009, we incurred additional interest expense totaling \$3.2 million and \$12.0 million, respectively, related to the default interest. On August 28, 2009, we completed the restructuring of our private notes and bank facility. The restructuring significantly increases our cost of capital. See *Financial Condition, Liquidity and Capital Resources* below.

In addition, interest expense included interest paid to the Internal Revenue Service related to installment sale gains totaling \$1.5 million and \$2.0 million for the three months ended September 30, 2009 and 2008, respectively, and \$4.9 million and \$5.8 million for the nine months ended September 30, 2009 and 2008, respectively. Installment interest expense for the year ended December 31, 2009, is estimated to be approximately \$7.8 million. See Dividends and Distributions below.

*Employee Expense.* Employee expenses for the three and nine months ended September 30, 2009 and 2008, were as follows:

(\$ in millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Salaries and employee benefits	\$ 10.0	\$ 17.0	\$ 27.5	\$ 48.1
Bonuses and performance awards <sup>(1)</sup>	0.9		5.4	
Individual performance award (IPA)		2.0		6.6
IPA mark to market expense (benefit)				(4.1)
Individual performance bonus (IPB)		2.4		6.8
Total employee expense <sup>(2)</sup>	\$ 10.9	\$ 21.4	\$ 32.9	\$ 57.4
Number of employees at end of period	112	155	112	155

<sup>(1)</sup> Amounts for the three and nine months ended September 30, 2008, include the reversal of previously accrued bonuses.

<sup>(2)</sup> Excludes employee stock options expense. See below.

During the second half of 2008, we consolidated our investment execution activities to our Washington, DC headquarters and our office in New York in an effort to improve our operating efficiencies and reduced our headcount by approximately 50 employees. Our employee expense for the first three quarters of 2009 reflects this reduction in headcount. During the third quarter of 2009, we further reduced headcount by approximately 22 employees. In connection with this reduction in headcount, we incurred approximately \$1.6 million of severance expense in the third quarter of 2009.

The quarterly accrual for employee bonuses is based upon an estimate of annual bonuses and is subject to change. The amount of the current year bonuses will be finalized by the Compensation Committee and the Board of Directors at the end of the year. Employee bonuses generally are paid after the completion of the fiscal year.

The IPA and IPB were part of an incentive compensation program for certain officers and generally were determined annually at the beginning of each year but could be adjusted throughout the year. In 2008, the IPA was paid in cash in two equal installments during the year. Through December 31, 2007, the IPA amounts were contributed into a trust and invested in our common stock. The IPB was distributed in cash to award recipients throughout the year (beginning in February of each respective year) as long as the recipient remained employed by us. We have not established an IPA or IPB for 2009.

The trusts for the IPA payments were consolidated with our accounts. The common stock was classified as common stock held in deferred compensation trust in the accompanying financial statements and the deferred compensation obligation, which represented the amount owed to the employees, was included in other liabilities. Changes in the value of our common stock held in the deferred compensation trust were not recognized. However, the liability was marked to market with a corresponding charge or credit to employee compensation expense. In December 2007, our Board of Directors made a determination that it was in Allied Capital's best interest to terminate our deferred compensation arrangements. The Board of Directors' decision primarily was in response to increased complexity resulting from changes in the regulation of deferred compensation arrangements. The Board of Directors resolved that

the accounts under these Plans would be distributed to participants in full on March 18, 2008, the termination and distribution date, or as soon as was reasonably practicable thereafter, in accordance with the provisions of each of these Plans.

The accounts under the deferred compensation arrangements totaled \$52.5 million at December 31, 2007. The balances on the termination date were distributed to participants in March 2008 subsequent to the termination date, in accordance with the transition rule for payment elections under Section 409A of the Code. Distributions from the plans were made in cash or shares of our common stock, net of required withholding taxes. The distribution of the

accounts under the deferred compensation arrangements resulted in a tax deduction for 2008, subject to the limitations set by Section 162(m) of the Code for persons subject to such section.

*Employee Stock Options Expense.* The employee stock options expense for the three and nine months ended September 30, 2009 and 2008, was as follows:

(\$ in millions)	For the Three Months Ended		For the Nine Months Ended	
	September 30,		September 30,	
	2009	2008	2009	2008
Employee Stock Option Expense:				
Previously awarded, unvested options as of January 1, 2006	\$	\$	\$	\$ 3.9
Options granted on or after January 1, 2006	0.4	1.5	2.4	5.6
Total employee stock option expense	\$ 0.4	\$ 1.5	\$ 2.4	\$ 9.5

On March 3, 2009, the Compensation Committee of our Board of Directors granted 10.6 million options with an exercise price of \$0.73 per share. The options vest in three equal installments on June 30, 2009, June 30, 2010 and June 30, 2011. On May 13, 2009, the Compensation Committee of our Board of Directors granted 0.9 million options with an exercise price of \$2.63 per share. A total of 55,000 options vested immediately and the remaining options vest as follows: 166,667 on June 30, 2009, 333,333 on April 30, 2010, 180,000 on June 30, 2010 and 180,000 on June 30, 2011.

We estimate that the employee-related stock options expense will be approximately \$3.4 million, \$3.9 million, and \$4.0 million for the years ended December 31, 2009, 2010, and 2011, respectively. This estimate does not include any expense related to stock option grants after September 30, 2009, as the fair value of those stock options will be determined at the time of grant. This estimate may change if our assumptions related to future option forfeitures change.

*Administrative Expense.* Administrative expenses include legal and accounting fees, valuation assistance fees, insurance premiums, the cost of leases for our headquarters in Washington, DC, and our regional offices, portfolio origination and development expenses, travel costs, stock record expenses, directors' fees and stock option expense, and various other expenses.

Administrative expenses were \$7.2 million and \$14.1 million, for the three months ended September 30, 2009 and 2008, respectively, and \$25.5 million and \$36.1 million for the nine months ended September 30, 2009 and 2008, respectively. Administrative expenses decreased primarily due to a decrease in travel costs and other professional fees.

*Impairment of Long-Lived Asset.* In our efforts to reduce overall administrative expenses, we sold our corporate aircraft during 2009. The sales price of the aircraft was less than our carrying cost, therefore, we recorded an impairment charge of \$2.9 million during the quarter ended March 31, 2009.

*Loss on Extinguishment of Debt.* During the third quarter of 2009, we completed a comprehensive restructuring of our private notes and bank facility and recorded a loss on the extinguishment of debt of \$117.5 million. In addition to

the \$11 million of previously deferred unamortized debt costs associated with the private notes and bank facility, we incurred and paid costs to the lenders of \$146 million and other third party advisory and other fees of approximately \$26 million in connection with the restructuring. Approximately \$20 million of the restructuring costs were deferred and are being amortized into interest expense over the life of the private notes and bank facility. In addition, we recorded approximately \$45 million of original issue discount

(OID) related to the restructuring of the private notes, which is being amortized into interest expense over the life of the private notes. The loss on extinguishment of debt is comprised of the following:

**(\$ in millions)**

Previously deferred unamortized costs	\$ 11.3
Fees paid to Noteholders/Lenders	145.9
Advisory and other fees paid	26.0
Costs deferred and amortizing into interest expense	(20.3)
OID recorded and amortizing into interest expense	(45.4)
 Loss on extinguishment of debt	 \$ 117.5

**Gain on Repurchase of Debt.** During the nine months ended September 30, 2009, we purchased publicly issued notes in the market with a total par value of \$134.5 million, which consisted of \$80.1 million of our 6.625% Notes due 2011 and \$54.4 million of our 6.000% Notes due 2012, for a total cost of \$50.3 million. After recognizing the remaining unamortized original issue discount associated with the notes repurchased, we recognized a net gain on repurchase of debt of \$0.0 million and \$83.5 million for the three and nine months ended September 30, 2009, respectively.

**Income Tax Expense (Benefit), Including Excise Tax.** Income tax expense (benefit) for the three and nine months ended September 30, 2009 and 2008, was as follows:

(\$ in millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Income tax expense (benefit)	\$ 1.9	\$ 1.2	\$ 4.2	\$ 3.0
Excise tax expense <sup>(1)</sup>		0.9		5.1
Income tax expense (benefit), including excise tax	\$ 1.9	\$ 2.1	\$ 4.2	\$ 8.1

<sup>(1)</sup> While excise tax expense is presented in the consolidated statement of operations as a reduction to net investment income, excise tax relates to both net investment income and net realized gains (losses).

Our wholly-owned subsidiary, A.C. Corporation, is a corporation subject to federal and state income taxes and records a benefit or expense for income taxes as appropriate based on its operating results in a given period. We did not record an excise tax for the three and nine months ended September 30, 2009. See [Dividends and Distributions](#) below.

**Realized Gains and Losses.** Net realized gains or losses primarily result from the sale of portfolio investments. Net realized gains (losses) for the three and nine months ended September 30, 2009 and 2008, were as follows:

(\$ in millions)	For the Three Months Ended September 30,		For the Nine Months Ended September 30,	
	2009	2008	2009	2008
Realized gains	\$ 14.5	\$ 97.5	\$ 35.9	\$ 135.2
Realized losses	(19.6)	(35.5)	(194.2)	(87.9)
Net realized gains (losses)	\$ (5.1)	\$ 62.0	\$ (158.3)	\$ 47.3

When we exit an investment and realize a gain or loss, we make an accounting entry to reverse any unrealized appreciation or depreciation, respectively, that we had previously recorded to reflect the appreciated or depreciated value of the investment. For the three and nine months ended September 30, 2009 and 2008, we reversed previously

recorded unrealized appreciation or depreciation when gains or losses were realized or dividends were received as follows:

(\$ in millions)	For the Three Months Ended		For the Nine Months Ended	
	September 30, 2009	2008	September 30, 2009	2008
Reversal of previously recorded net unrealized appreciation associated with realized gains	\$ (8.9)	\$ (80.4)	\$ (20.8)	\$ (115.1)
Reversal of previously recorded net unrealized appreciation associated with dividends received	(0.4)	(1.6)	(10.8)	(15.1)
Reversal of previously recorded net unrealized depreciation associated with realized losses	18.0	34.8	151.3	80.2
Total reversal	\$ 8.7	\$ (47.2)	\$ 119.7	\$ (50.0)

Realized gains for the three months ended September 30, 2009 and 2008, were as follows:

During the nine months ended September 30, 2009, we focused our efforts on selectively selling assets from our portfolio in order to generate capital to repay indebtedness and de-lever our balance sheet. These asset sales have been completed under distressed conditions in a very difficult market, and consequently we have realized net losses upon their disposition. For the nine months ended September 30, 2009, we sold or had repayments on portfolio investments that generated cash proceeds of \$650.8 million.

Realized gains and losses for the nine months ended September 30, 2009 and 2008, include net realized gains of \$6.3 million and \$2.8 million, respectively (subsequent to post-closing adjustments), from the sales of certain investments to our Managed Funds. See [Managed Funds](#) above.

***Change in Unrealized Appreciation or Depreciation.*** We determine the value of each investment in our portfolio on a quarterly basis, and changes in value result in unrealized appreciation or depreciation being recognized in our statement of operations. Value, as defined in Section 2(a)(41) of the Investment Company Act of 1940, is (i) the market price for those securities for which a market quotation is readily available and (ii) for all other securities and assets, fair value is as determined in good faith by the Board of Directors. Since there is typically no readily available market value for the investments in our portfolio, we value substantially all of our portfolio investments at fair value as determined in good faith by the Board of Directors in accordance with our valuation policy and the provisions of the 1940 Act and ASC 820, which includes the codification of FASB Statement No. 157, *Fair Value Measurements* and related interpretations. We determine fair value to be the price that would be received for an investment in a current sale, which assumes an orderly transaction between market participants on the measurement date. At September 30, 2009, portfolio investments recorded at fair value using level 3 inputs (as defined under the Statement) were approximately 88% of our total assets. Because of the inherent uncertainty of

determining the fair value of investments that do not have a readily available market quotation in an active market, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material.

There is no single approach for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses. Instead, we are required to specifically value each individual investment on a quarterly basis. We will record unrealized depreciation on investments when we determine that the fair value of a security is less than its cost basis, and we will record unrealized appreciation when we determine that the fair value is greater than its cost basis. Changes in fair value are recorded in the statement of operations as net change in unrealized appreciation or depreciation.

As a BDC, we invest in illiquid securities including debt and equity securities of portfolio companies, CLO bonds and preferred shares/income notes, CDO bonds and investment funds. The structure of each debt and equity security is specifically negotiated to enable us to protect our investment and maximize our returns. We include many terms governing interest rate, repayment terms, prepayment penalties, financial covenants, operating covenants, ownership parameters, dilution parameters, liquidation preferences, voting rights, and put or call rights. Our investments may be subject to certain restrictions on resale and generally have no established trading market.

Because of the type of investments that we make and the nature of our business, our valuation process requires an analysis of various factors. Our fair value methodology includes the examination of, among other things, the underlying investment performance, financial condition, and market changing events that impact valuation.

*Valuation Methodology.* We adopted the standards in ASC Topic 820, on a prospective basis in the first quarter of 2008. These standards require us to assume that the portfolio investment is to be sold in the principal market to market participants, or in the absence of a principal market, the most advantageous market, which may be a hypothetical market. Market participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact. In accordance with the standards, we have considered our principal market, or the market in which we exit our portfolio investments with the greatest volume and level of activity.

We have determined that for our buyout investments, where we have control or could gain control through an option or warrant security, both the debt and equity securities of the portfolio investment would exit in the merger and acquisition (M&A) market as the principal market generally through a sale or recapitalization of the portfolio company. We believe that the in-use premise of value (as defined in ASC Topic 820), which assumes the debt and equity securities are sold together, is appropriate as this would provide maximum proceeds to the seller. As a result, we use the enterprise value methodology to determine the fair value of these investments. Enterprise value means the entire value of the company to a market participant, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. Enterprise value is determined using various factors, including cash flow from operations of the portfolio company, multiples at which private companies are bought and sold, and other pertinent factors, such as recent offers to purchase a portfolio company, recent transactions involving the purchase or sale of the portfolio company's equity securities, liquidation events, or other events. We allocate the enterprise value to these securities in order of the legal priority of the securities.

There is no one methodology to determine enterprise value and, in fact, for any one portfolio company, enterprise value is best expressed as a range of fair values. However, we must derive a single estimate of enterprise value. To determine the enterprise value of a portfolio company, we analyze its historical and projected financial results. This

financial and other information is generally obtained from the portfolio companies, and may represent unaudited, projected or pro forma financial information. We generally require portfolio companies to provide annual audited and quarterly unaudited financial statements, as well as annual projections for the upcoming fiscal year. Typically in the private equity business, companies are bought and sold based on multiples of EBITDA, cash flow,

net income, revenues or, in limited instances, book value. The private equity industry uses financial measures such as EBITDA or EBITDAM (Earnings Before Interest, Taxes, Depreciation, Amortization and, in some instances, Management fees) in order to assess a portfolio company's financial performance and to value a portfolio company. EBITDA and EBITDAM are not intended to represent cash flow from operations as defined by U.S. generally accepted accounting principles and such information should not be considered as an alternative to net income, cash flow from operations, or any other measure of performance prescribed by U.S. generally accepted accounting principles. When using EBITDA to determine enterprise value, we may adjust EBITDA for non-recurring items. Such adjustments are intended to normalize EBITDA to reflect the portfolio company's earnings power. Adjustments to EBITDA may include compensation to previous owners, acquisition, recapitalization, or restructuring related items or one-time non-recurring income or expense items.

In determining a multiple to use for valuation purposes, we generally look to private merger and acquisition statistics, the entry multiple for the transaction, public trading multiples or industry practices. In estimating a reasonable multiple, we consider not only the fact that our portfolio company may be a private company relative to a peer group of public comparables, but we also consider the size and scope of our portfolio company and its specific strengths and weaknesses. In some cases, the best valuation methodology may be a discounted cash flow analysis based on future projections. If a portfolio company is distressed, a liquidation analysis may provide the best indication of enterprise value.

While we typically exit our securities upon the sale or recapitalization of the portfolio company in the M&A market, for investments in portfolio companies where we do not have control or the ability to gain control through an option or warrant security, we cannot typically control the exit of our investment into the principal market (the M&A market). As a result, in accordance with ASC Topic 820, we are required to determine the fair value of these investments assuming a sale of the individual investment (the in-exchange premise of value) in a hypothetical market to a hypothetical market participant. We continue to perform an enterprise value analysis for the investments in this category to assess the credit risk of the loan or debt security and to determine the fair value of our equity investment in these portfolio companies. The determined equity values are generally discounted when we have a minority ownership position, restrictions on resale, specific concerns about the receptivity of the capital markets to a specific company at a certain time, or other factors. For loan and debt securities, we perform a yield analysis assuming a hypothetical current sale of the investment. The yield analysis requires us to estimate the expected repayment date of the instrument and a market participant's required yield. Our estimate of the expected repayment date of a loan or debt security may be shorter than the legal maturity of the instruments as our loans have historically been repaid prior to the maturity date. The yield analysis considers changes in interest rates and changes in leverage levels of the loan or debt security as compared to market interest rates and leverage levels. Assuming the credit quality of the loan or debt security remains stable, we will use the value determined by the yield analysis as the fair value for that security. A change in the assumptions that we use to estimate the fair value of our loans and debt securities using the yield analysis could have a material impact on the determination of fair value. If there is deterioration in credit quality or a loan or debt security is in workout status, we may consider other factors in determining the fair value of a loan or debt security, including the value attributable to the loan or debt security from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis.

Our equity investments in private debt and equity funds are generally valued based on the fund's net asset value, unless other factors lead to a determination of fair value at a different amount. The value of our equity securities in public companies for which quoted prices in an active market are readily available is based on the closing public market price on the measurement date.

The fair value of our CLO/CDO Assets is generally based on a discounted cash flow model that utilizes prepayment, re-investment, loss and ratings assumptions based on historical experience and projected performance, economic factors, the characteristics of the underlying cash flow, and comparable yields for similar bonds and preferred shares/

income notes, when available. We recognize unrealized appreciation or depreciation on our CLO/CDO Assets as comparable yields in the market change and/or based on changes in estimated cash flows resulting from changes in prepayment, re-investment, loss or ratings assumptions in the underlying collateral pool or changes

in redemption assumptions for the CLO/CDO Assets, if applicable. We determine the fair value of our CLO/CDO Assets on an individual security-by-security basis. If we were to sell a group of these CLO/CDO Assets in a pool in one or more transactions, the total value received for that pool may be different than the sum of the fair values of the individual assets.

We record unrealized depreciation on investments when we determine that the fair value of a security is less than its cost basis, and record unrealized appreciation when we determine that the fair value is greater than its cost basis. Because of the inherent uncertainty of valuation, the values determined at the measurement date may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the values determined at the measurement date. In accordance with Topic ASC 820 (discussed below), we do not consider a transaction price that is associated with a transaction that is not orderly to be indicative of fair value or market participant risk premiums, and accordingly would place little, if any, weight on transactions that are not orderly in determining fair value. When considering recent potential or completed transactions, we use judgment in determining if such offers or transactions were pursuant to an orderly process for purposes of determining how much weight is placed on these data points in accordance with the applicable guidelines in ASC Topic 820.

As a participant in the private equity business, we invest primarily in private middle market companies for which there is generally no publicly available information. Because of the private nature of these businesses, there is a need to maintain the confidentiality of the financial and other information that we have for the private companies in our portfolio. We believe that maintaining this confidence is important, as disclosure of such information could disadvantage our portfolio companies and could put us at a disadvantage in attracting new investments. Therefore, we do not intend to disclose financial or other information about our portfolio companies, unless required, because we believe doing so may put them at an economic or competitive disadvantage, regardless of our level of ownership or control.

We work with third-party consultants to obtain assistance in determining fair value for a portion of the private finance portfolio each quarter. We work with these consultants to obtain assistance as additional support in the preparation of our internal valuation analysis. In addition, we may receive third-party assessments of a particular private finance portfolio company's value in the ordinary course of business, most often in the context of a prospective sale transaction or in the context of a bankruptcy process.

The valuation analysis prepared by management is submitted to our Board of Directors who is ultimately responsible for the determination of fair value of the portfolio in good faith. Valuation assistance from Duff & Phelps, LLC (Duff & Phelps) for our private finance portfolio consisted of certain limited procedures (the Procedures) we identified and requested them to perform. Based upon the performance of the Procedures on a selection of our final portfolio company valuations, Duff & Phelps concluded that the fair value of those portfolio companies subjected to the Procedures did not appear unreasonable. In addition, we also received third-party valuation assistance from other third-party consultants for certain private finance portfolio companies. For the three and nine months ended September 30, 2009 and 2008, we received third-party valuation assistance as follows:

	2009			2008		
	Q1	Q2	Q3	Q1	Q2	Q3
Number of private finance portfolio companies reviewed	93	91	78	124	119	128
	94.0%	96.9%	97.8%	94.0%	94.9%	97.2%

Percentage of private finance portfolio  
reviewed at value

Professional fees for third-party valuation assistance were \$1.9 million for the year ended December 31, 2008, and are estimated to be approximately \$1.3 million for 2009.

*Net Change in Unrealized Appreciation or Depreciation.* Net change in unrealized appreciation or depreciation for the three and nine months ended September 30, 2009 and 2008, consisted of the following:

(\$ in millions)	For the Three Months September 30,		For the Nine Months September 30,	
	2009 <sup>(1)</sup>	2008 <sup>(1)</sup>	2009 <sup>(1)</sup>	2008 <sup>(1)</sup>
Net unrealized appreciation (depreciation)	\$ (36.4)	\$ (378.7)	\$ (500.2)	\$ (637.5)
Reversal of previously recorded unrealized appreciation associated with realized gains	(8.9)	(80.4)	(20.8)	(115.1)
Reversal of previously recorded net unrealized appreciation associated with dividends received	(0.4)	(1.6)	(10.8)	(15.1)
Reversal of previously recorded unrealized depreciation associated with realized losses	18.0	34.8	151.3	80.2
Net change in unrealized appreciation or depreciation	\$ (27.7)	\$ (425.9)	\$ (380.5)	\$ (687.5)

<sup>(1)</sup> The net change in unrealized appreciation or depreciation can fluctuate significantly from period to period. As a result, quarterly comparisons may not be meaningful.

**Per Share Amounts.** All per share amounts included in the Management's Discussion and Analysis of Financial Condition and Results of Operations section have been computed using the weighted average common shares used to compute diluted earnings per share, which were 179.1 million and 178.7 million for the three months ended September 30, 2009 and 2008, respectively, and were 178.8 million and 171.1 million for the nine months ended September 30, 2009 and 2008, respectively.

## OTHER MATTERS

**Regulated Investment Company Status.** We have elected to be taxed as a regulated investment company (or RIC) under Subchapter M of the Code. In order to maintain our status as a RIC and obtain RIC tax benefits, we must, in general, (1) continue to qualify as a BDC; (2) derive at least 90% of our gross income from dividends, interest, gains from the sale of securities and other specified types of income; (3) meet asset diversification requirements as defined in the Code; and (4) timely distribute to shareholders at least 90% of our annual investment company taxable income (i.e., net ordinary investment income) as defined in the Code. With respect to taxable realized net long-term capital gains, we may choose to (i) distribute, (ii) deem to distribute, or (iii) retain and pay corporate level tax on such gains. We currently qualify as a RIC. However, there can be no assurance that we will continue to qualify for such treatment in future years.

As long as we qualify as a regulated investment company, we are not taxed on our investment company taxable income or realized net capital gains, to the extent that such taxable income or gains are distributed, or deemed to be distributed, to shareholders on a timely basis. Taxable income includes our taxable interest, dividend and fee income, as well as taxable net capital gains. Taxable income generally differs from net income for financial reporting purposes due to temporary and permanent differences in the recognition of income and expenses, and generally excludes net unrealized appreciation or depreciation, as gains or losses generally are not included in taxable income until they are realized. In addition, gains realized for financial reporting purposes may differ from gains included in taxable income as a result of our election to recognize gains using installment sale treatment, which generally results in the deferment of gains for tax purposes until notes or other amounts, including amounts held in escrow, received as consideration

from the sale of investments are collected in cash. Taxable income includes non-cash income, such as payment-in-kind interest and dividends and the amortization of discounts and fees. Cash collections of income resulting from contractual payment-in-kind interest or the amortization of discounts and fees generally occur upon the repayment of the loans or debt securities that include such items. Noncash taxable income is reduced by non-cash expenses, such as realized losses and depreciation and amortization expense.

Taxable income available for distribution includes investment company taxable income and, to the extent not deemed to be distributed or retained, net long-term capital gains. To the extent that annual taxable income available for distribution exceeds dividends paid or deemed distributed from such taxable income for the year, we may carry over the excess taxable income into the next year and such excess income will be available for distribution in the next year as permitted under the Code (see discussion below). Such excess income will be treated under the Code as having been distributed during the prior year for purposes of our qualification for RIC tax treatment for such year. The maximum amount of excess taxable income that we may carry over for distribution in the next year under the Code is the total amount of dividends paid in the following year, subject to certain declaration and payment guidelines. Excess taxable income carried over and paid out in the next year is generally subject to a nondeductible 4% excise tax.

## DIVIDENDS AND DISTRIBUTIONS

We have elected to be taxed as a RIC under Subchapter M of the Code. As a RIC, we are required to distribute substantially all of our investment company taxable income to shareholders through the payment of dividends. In certain circumstances, we are restricted in our ability to pay dividends. Each of our private notes and our bank facility contain provisions that limit the amount of dividends we can pay. In addition, pursuant to the 1940 Act, we may be precluded from declaring dividends or other distributions to our shareholders unless our asset coverage is at least 200%.

We have met our dividend distribution requirements for the 2008 tax year. We intend to retain capital in 2009 in order to achieve the 200% asset coverage threshold under the 1940 Act and currently estimate that we will have no distribution requirement for 2009; therefore, we currently do not expect to declare dividends in 2009. In August 2009, we completed a restructuring of our bank facility and our private notes. The restructured debt significantly increases our cost of capital. As a result, we expect our profitability will be substantially reduced and that we will not be able to pay a cash dividend for an extended period of time. No dividends were paid or declared for the three and nine months ended September 30, 2009. Dividends to common shareholders were \$0.65 per share each quarter for the first three quarters of 2008.

We currently qualify as a RIC. However there can be no assurance that we will be able to comply with the RIC requirements to distribute income for the current and future years and we may be required to pay a corporate level income tax.

## FINANCIAL CONDITION, LIQUIDITY AND CAPITAL RESOURCES

At September 30, 2009, and December 31, 2008, our cash and investments in money market and other securities, total assets, total debt outstanding, total shareholders' equity, debt to equity ratio and asset coverage for senior indebtedness were as follows:

(\$ in millions)	2009	2008
Cash and investments in money market and other securities (including money market and other securities: 2009-\$90.0; 2008-\$0.3)	\$ 153.4	\$ 50.7
Total assets	\$ 2,840.2	\$ 3,722.2
Total debt outstanding	\$ 1,636.5	\$ 1,945.0
Total shareholders' equity	\$ 1,201.3	\$ 1,718.4
Debt to equity ratio	1.33	1.13
Asset coverage ratio <sup>(1)</sup>	175%	188%

- (1) As a business development company, we generally are required to maintain a minimum ratio of 200% of total assets to total borrowings in order to incur additional indebtedness, declare dividends or other distributions or repurchase shares of our common stock.

At September 30, 2009, our asset coverage ratio was 175%, and we remain precluded under the 1940 Act from incurring additional indebtedness, declaring dividends or other distributions to our shareholders, or repurchasing shares of our common stock until such time as our asset coverage would be at least 200%. In addition, we generally

are not able to issue and sell our common stock at a price below net asset value per share without the approval of our stockholders. Our common stock currently is trading at a price below our net asset value of \$6.70 per share.

We may continue to engage in a variety of activities as a means to improve our asset coverage ratio and net asset value, which may include but are not limited to: continuing to sell assets to generate capital to retire debt; refinancing or repurchasing, at par or at a discount, our outstanding debt; and foregoing or limiting dividend payments in order to retain capital. We also plan to continue to carefully manage our employee and administrative expenses. There can be no assurance that we will be able to increase our asset coverage ratio or net asset value.

During the nine months ended September 30, 2009, we paid \$30.1 million to repurchase certain of the 6.625% Notes due 2011 which had a face value of \$80.1 million, and \$20.2 million to repurchase certain of the 6.000% Notes due 2012 which had a face value of \$54.4 million. In the third quarter of 2009, we repaid \$174 million of our privately issued unsecured notes payable.

During the nine months ended September 30, 2009, we sold or had repayments on portfolio investments that generated \$650.8 million of cash proceeds. These asset sales have been completed under distressed conditions in a very difficult market and consequently we have realized net losses upon their disposition (see Realized Gains and Losses above). We expect to complete additional asset sales throughout the course of the year and given the challenging market and our desire to sell assets to generate liquidity, we may incur additional realized losses upon such dispositions. We expect that the cash generated from asset sales and repayments will be used to repay indebtedness and provide ongoing liquidity.

Cash generated from the portfolio includes cash flow from net investment income and net realized gains and principal collections related to investment repayments or sales. Cash flow provided by our operating activities before new investment activity for the nine months ended September 30, 2009 and 2008, was as follows:

(\$ in millions)	2009	2008
Net cash provided by operating activities	\$ 302.2	\$ 298.5
Add: portfolio investments funded	118.1	1,019.8
Total cash provided by operating activities before new investments	\$ 420.3	\$ 1,318.3

Given the severe economic recession we are experiencing in the United States, we believe that our cash flows from investment exits for 2009 will be lower than prior years when we were in a more robust economy. We believe, however, that we will generate sufficient cash flow to fund our operations and meet our scheduled debt service requirements, although there can be no assurance that we will generate sufficient cash flow.

At September 30, 2009, and December 31, 2008, the value and yield of the cash and investments in money market and other securities were as follows:

(\$ in millions)	2009		2008	
	Value	Yield	Value	Yield
Money market and other securities	\$ 90.0		\$ 0.3	1.7%
Cash and cash equivalents	62.7	0.1%	50.4	0.1%

Total	\$ 152.7	0.0%	\$ 50.7	0.1%
-------	----------	------	---------	------

We invest otherwise uninvested cash in U.S. government- or agency-issued or guaranteed securities that are backed by the full faith and credit of the United States, or in high quality, short-term securities. We place our cash with financial institutions and, at times, cash held in checking accounts in financial institutions may be in excess of the Federal Deposit Insurance Corporation insured limit.

We evaluate our interest rate exposure on an ongoing basis. Generally, we seek to fund our primarily fixed-rate debt portfolio and our equity portfolio with fixed-rate debt or equity capital. To the extent deemed necessary, we may hedge variable and short-term interest rate exposure through interest rate swaps or other techniques.

During the nine months ended September 30, 2008, we sold new equity of \$402.5 million in public offerings. In addition, for the nine months ended September 30, 2008 shareholders' equity increased through capital share transactions by \$4.6 million through the exercise of stock options, the collection of notes receivable from the sale of common stock, and the issuance of shares through our dividend reinvestment plan. Shareholders' equity also increased by \$26.4 million during the nine months ended September 30, 2008, as a result of the distribution of the common stock held in deferred compensation trusts.

At September 30, 2009, and December 31, 2008, we had outstanding debt as follows:

(\$ in millions)	Facility Amount	2009 Amount Outstanding at Par	Annual Interest Cost <sup>(1)</sup>	Facility Amount	2008 Amount Outstanding at Par	Annual Interest Cost <sup>(1)</sup>
Notes payable:						
Privately issued secured notes payable <sup>(5)</sup>	\$ 841.0	\$ 841.0 <sup>(6)</sup>	13.8%	\$ 1,015.0	\$ 1,015.0	7.8%
Publicly issued unsecured notes payable	745.5	745.5	6.7%	880.0	880.0	6.7%
Total notes payable	1,586.5	1,586.5	10.5%	1,895.0	1,895.0	7.3%
Bank secured term debt (former revolver) <sup>(4)</sup>	50.0	50.0	17.0% <sup>(2)</sup>	632.5	50.0	4.3% <sup>(2)</sup>
Total debt	\$ 1,636.5	\$ 1,636.5	10.7% <sup>(3)</sup>	\$ 2,527.5	\$ 1,945.0	7.7% <sup>(3)</sup>

(1) The weighted average annual interest cost is computed as the (a) annual stated interest on the debt, plus the annual amortization of commitment fees, other facility fees and the amortization of debt financing costs and original issue discount that are recognized into interest expense over the contractual life of the respective borrowings, divided by (b) debt outstanding on the balance sheet date.

(2) The annual interest cost reflects the interest rate payable for borrowings under the revolving line of credit in effect at the balance sheet date. In addition to the current interest rate payable, there were annual costs of commitment fees, other facility fees and amortization of debt financing costs of \$4.3 million at September 30, 2009, and \$8.5 million at December 31, 2008.

(3) The annual interest cost for total debt includes the annual cost of commitment fees, other facility fees and amortization of debt financing costs on the bank term debt regardless of the amount outstanding on the facility as of the balance sheet date. The annual interest cost reflects the facilities in place on the balance sheet date.

(4) During the three months ended September 30, 2009, the commitments under the facility were reduced to \$50.0 million subsequent to the funding of \$46.0 million to Ciena securitizations in lieu of draws under letters of credit issued under the facility.

(5) In the third quarter of 2009, the Company completed the restructuring of its private notes.

(6) The notes payable on the consolidated balance sheet are shown net of OID of approximately \$42.6 million as of September 30, 2009.

### **Debt Restructure**

On August 28, 2009, we completed a comprehensive restructuring of our private notes (the Notes) and our bank facility (the Facility). Beginning in January 2009, we engaged in discussions with the revolving line of credit lenders

(the Lenders) and the private noteholders (the Noteholders) to seek relief under certain terms of both the Facility and the Notes due to certain covenant defaults. As of December 31, 2008, our asset coverage was less than the 200% then required by the revolving credit facility and the private notes. Asset coverage generally refers to the percentage resulting from assets less accounts payable and other liabilities, divided by total debt.

In connection with the restructuring, we granted the Noteholders and the Lenders a pari-passu blanket lien on a substantial portion of our assets, including a substantial portion of the assets of our consolidated subsidiaries.

The financial covenants applicable to the Notes and the Facility were modified as part of the restructuring. The Consolidated Debt to Consolidated Shareholders Equity covenant and the Capital Maintenance covenant were both eliminated. The Asset Coverage ratio was set at 1.35:1 initially, increasing to 1.4:1 at June 30, 2010 and to 1.55:1 at June 30, 2011, and maintained at that level thereafter. A new covenant, Total Adjusted Assets to Secured Debt, was set at 1.75:1 initially, increasing to 2.0:1 at June 30, 2010 and to 2.25:1 at June 30, 2011, and maintained at that level thereafter. The ratio of Adjusted EBIT to Adjusted Interest Expense was set at 1.05:1 initially, decreasing to 0.95:1 at December 31, 2009, 0.80:1 at March 31, 2010 and 0.75:1 at June 30, 2010. The covenant will then be increased to 0.80:1 on December 31, 2010 and 0.95:1 on December 31, 2011 and maintained at that level thereafter. At September 30, 2009, we were in compliance with these financial covenants.

The Notes and Facility impose certain limitations on our ability to incur additional indebtedness, including precluding us from incurring additional indebtedness unless our asset coverage of all outstanding indebtedness is at least 200%. Pursuant to the 1940 Act, we are not permitted to issue indebtedness unless immediately after such issuance we have asset coverage of all outstanding indebtedness of at least 200%. At September 30, 2009, our asset coverage ratio was 175%, which is less than the 200% threshold. As a result, we will not be able to issue additional indebtedness until such time as our asset coverage returns to at least 200%.

We are required to apply 50% of all net cash proceeds from asset sales to the repayment of the Notes and 6% of all net cash proceeds from asset sales to the repayment of the Facility, subject to certain conditions and exclusions. In the case of certain events of default, we would be required to apply 100% of all net cash proceeds from asset sales to the repayment of our secured lenders. Under the new agreements, subject to a limit and certain liquidity restrictions, we may repurchase our public debt; however, we are prohibited from repurchasing our common stock and may not pay dividends in excess of the minimum we reasonably believe is required to maintain our tax status as a regulated investment company. In addition, upon the occurrence of a change of control (as defined in the Note Agreement and Credit Agreement), the Noteholders have the right to be prepaid in full and we are required to repay in full all amounts outstanding under the Facility.

The Note Agreement and Credit Agreement provide for customary events of default, including, but not limited to, payment defaults, breach of representations or covenants, cross-defaults, bankruptcy events and failure to pay judgments. Certain of these events of default are subject to notice and cure periods or materiality thresholds. Pursuant to the terms of the Notes, the occurrence of an event of default generally permits the holders of more than 50% in principal amount of outstanding Notes to accelerate repayment of all amounts due thereunder. The occurrence of an event of default would generally permit the administrative agent for the lenders under the Facility, or the holders of more than 51% of the aggregate principal debt outstanding under the Facility, to accelerate repayment of all amounts outstanding thereunder. Pursuant to the Notes, during the continuance of an event of default, the rate of interest applicable to the Notes would increase by 200 basis points. Pursuant to the terms of the Facility, during the continuance of an event of default, the applicable spread on any borrowings outstanding under the Facility would increase by 200 basis points.

In connection with the restructuring, we recorded a loss on the extinguishment of debt of \$117.5 million. In addition to the \$11 million of previously deferred unamortized debt costs associated with the Notes and Facility, we incurred and paid costs to the lenders of \$146 million and other third party advisory and other fees of approximately \$26 million in connection with the restructuring. Approximately \$20 million of the restructuring costs were deferred and are being amortized into interest expense over the life of the Notes and Facility. In addition, we recorded approximately \$45 million of original issue discount (OID) related to the restructuring of the Notes, which is being amortized into interest expense over the life of the Notes. After giving effect to the restructuring and the recording of the loss, we estimate that the weighted average interest cost, including amortization of the deferred debt cost and OID, for the Notes is approximately 13.75% and for the Facility is approximately 17%. The loss on extinguishment of debt is comprised of the following:

	(\$ in millions)
Previously deferred unamortized costs	\$ 11.3
Fees paid to Noteholders/Lenders	145.9
Advisory and other fees paid	26.0
Costs deferred and amortizing into interest expense	(20.3)
OID recorded and amortizing into interest expense	(45.4)

Loss on extinguishment of debt	\$	117.5
--------------------------------	----	-------

***Privately Issued Notes Payable.*** We had \$1,015.0 million of Notes outstanding at June 30, 2009. We made principal payments on the Notes at and prior to the closing of the restructuring and had \$841.0 million of Notes outstanding following the closing of the restructuring.

In connection with the restructuring, the existing Notes were exchanged for three new series of Notes containing the following terms:

(\$ in millions)	Principal Amount	Maturity Dates	Annual Stated Interest Rate Through December 31, 2009 <sup>(1)</sup>	Annual Stated Interest Rate Beginning January 1, 2010 <sup>(1)</sup>	Annual Stated Interest Rate Beginning January 1, 2011 <sup>(1)</sup>	Annual Stated Interest Rate Beginning January 1, 2012 <sup>(1)</sup>
Series A	\$ 253.8	June 15, 2010	8.50%	9.25%	N/A	N/A
Series B	\$ 253.8	June 15, 2011	9.00%	9.50%	9.75%	N/A
Series C	\$ 333.5	March 31 & April 1, 2012	9.50%	10.00%	10.25%	10.75%

<sup>(1)</sup> The Notes generally require payment of interest quarterly.

We made various cash payments in connection with the restructuring of our Notes. We paid an amendment fee at closing of \$15.2 million. In addition, we paid a make-whole fee of \$79.7 million related to a contractual provision in the old Notes. Due to the payment of this make-whole fee, the new Notes have no significant make-whole requirement. We also paid a restructuring fee of \$50.0 million at closing, which will be applied toward the principal balance of the Notes if the Notes are refinanced in full on or before January 31, 2010.

**Bank Facility.** At June 30, 2009, we had an unsecured revolving line of credit that was due to expire on April 11, 2011. Our Facility was restructured from a revolving facility to a term facility maturing on November 13, 2010. Total commitments under the Facility were reduced at closing to \$96.0 million from \$115.0 million prior to closing. At closing, there were \$50.0 million of borrowings and \$46.0 million of standby letters of credit (LCs) outstanding under the Facility. The \$46.0 million of LCs terminated and/or expired prior to September 30, 2009 and the commitments under the Facility were reduced by a commensurate amount. As a result, the total commitment and outstanding balance was \$50.0 million at September 30, 2009.

Borrowings under the Facility bear interest at a floating rate of interest, subject to a floor. The floating rate spread increases by 0.5% per annum beginning on January 1, 2010 and continuing through maturity. At closing, the interest rate on the Facility was 8.5% per annum. The Facility requires the payment of a commitment fee equal to 0.50% per annum of the committed amount. In addition, we agreed to pay an amendment fee at closing of \$1.0 million, and a restructuring fee payable on January 31, 2010 equal to 1.0% of the outstanding borrowings on such date if the Facility remains outstanding. The Facility generally requires payments of interest no less frequently than quarterly.

**Publicly Issued Unsecured Notes Payable.** At September 30, 2009, we had outstanding publicly issued unsecured notes as follows:

(\$ in millions)	Amount	Maturity Date
6.625% Notes due 2011	\$ 319.9	July 15, 2011
6.000% Notes due 2012	195.6	April 1, 2012
6.875% Notes due 2047	230.0	April 15, 2047

Total \$ 745.5

The 6.625% Notes due 2011 and the 6.000% Notes due 2012 require payment of interest only semi-annually, and all principal is due upon maturity. We have the option to redeem these notes in whole or in part, together with a redemption premium, as stipulated in the notes. In addition, we may purchase these notes in the market at par or at a discount to the extent permitted by the 1940 Act. During the nine months ended September 30, 2009, we paid \$30.1 million to repurchase certain of the 6.625% Notes due 2011 which had a face value of \$80.1 million, and \$20.2 million to repurchase certain of the 6.000% Notes due 2012 which had a face value of \$54.4 million. After recognizing the remaining unamortized original issue discount associated with the notes repurchased, we recognized a net gain on repurchase of debt of \$83.5 million for the nine months ended September 30, 2009.

The 6.875% Notes due 2047 require payment of interest only quarterly, and all principal is due upon maturity. These notes are redeemable in whole or in part at any time or from time to time on or after April 15, 2012, at par and upon the occurrence of certain tax events as stipulated in the notes.

We have certain financial and operating covenants that are required by the publicly issued unsecured notes payable. We are not permitted to issue indebtedness unless immediately after such issuance we have asset coverage of all outstanding indebtedness of at least 200% as required by the 1940 Act. At September 30, 2009, our asset coverage ratio was 175%, which is less than the 200% requirement. As a result, under the publicly issued unsecured notes payable, we will not be able to issue indebtedness until such time as our asset coverage returns to at least 200%.

**Contractual Obligations.** The following table shows our significant contractual obligations for the repayment of debt and payment of other contractual obligations as of September 30, 2009.

(\$ in millions)	Payments Due By Year						After 2013
	Total	2009	2010	2011	2012	2013	
Privately issued secured notes payable	\$ 841.0	\$	\$ 253.7	\$ 253.8	\$ 333.5	\$	\$
Publicly issued unsecured notes payable	745.5			319.9	195.6		230.0
Bank Term Debt (former revolver) <sup>(1)</sup>	50.0		50.0				
Operating leases	11.8	1.2	4.4	1.7	1.7	1.7	1.1
Total contractual obligations	\$ 1,648.3	\$ 1.2	\$ 308.1	\$ 575.4	\$ 530.8	\$ 1.7	\$ 231.1

<sup>(1)</sup> At September 30, 2009, \$50.0 million was borrowed on the bank term debt and there were no outstanding standby letters of credit.

### Off-Balance Sheet Arrangements

In the ordinary course of business, we have issued guarantees and have extended standby letters of credit through financial intermediaries on behalf of certain portfolio companies. We generally have issued guarantees and have obtained standby letters of credit under our line of credit for the benefit of counterparties to certain portfolio companies. Under these arrangements, we would be required to make payments to third parties if the portfolio companies were to default on their related payment obligations or if the expiration dates of the letters of credit are not extended. The following table shows our guarantees and standby letters of credit that may have the effect of creating, increasing, or accelerating our liabilities as of September 30, 2009.

(\$ in millions)	Amount of Commitment Expiration Per Year						After 2013
	Total	2009	2010	2011	2012	2013	
Guarantees	\$ 9.1	\$ 5.0	\$ 3.2	\$	\$ 0.1	\$	\$ 0.8
Standby letters of credit <sup>(1)</sup>							

Total commitments	\$ 9.1	\$ 5.0	\$ 3.2	\$	\$ 0.1	\$	\$ 0.8
-------------------	--------	--------	--------	----	--------	----	--------

(1) During the three months ended September 30, 2009, we funded \$46.0 million of standby letters of credit and the remaining standby letters of credit expired. As part of the debt restructure and subsequent to funding of \$46.0 million under the standby letters of credit, the availability on the Bank Term Debt, which could be used to fund the then outstanding standby letters of credit, was reduced to zero.

In addition, we had outstanding commitments to fund investments totaling \$543.9 million at September 30, 2009, including \$515.5 million related to private finance investments and \$28.4 million related to commercial real estate finance investments. Outstanding commitments related to private finance investments included \$352.2 million to the Senior Secured Loan Fund LLC. During October 2009, we sold our investment, including our outstanding

commitments and the provision of management services, in the Senior Secured Loan Fund. See Recent Developments.

We intend to fund these commitments with existing cash and through cash flow from operations before new investments although there can be no assurance that we will generate sufficient cash flow to satisfy these commitments. Should we not be able to satisfy these commitments, there could be a material adverse effect on our financial condition, liquidity and results of operations.

## RECENT DEVELOPMENTS

On October 26, 2009, we entered into an Agreement and Plan of Merger (the Merger Agreement) with Ares Capital Corporation, a Maryland corporation (Ares Capital), and ARCC Odyssey Corp., a Maryland corporation and wholly-owned subsidiary of Ares Capital (Merger Sub). The Merger Agreement provides that, upon the terms and subject to the conditions set forth in the Merger Agreement, Merger Sub will merge with and into Allied Capital, with Allied Capital as the surviving company (the Merger). Immediately following the Merger, Allied Capital will merge with and into Ares Capital.

Upon consummation of the Merger, each share of common stock, par value \$0.0001 per share, of Allied Capital issued and outstanding immediately prior to the effective time of the Merger will be converted into and become exchangeable for 0.325 common shares, par value \$0.001 per share, of Ares Capital. Based on the number of shares of Allied Capital common stock outstanding on the date of the Merger Agreement and not including the effect of outstanding in-the-money options, this will result in approximately 58.3 million Ares Capital shares being exchanged for approximately 179.4 million outstanding Allied Capital shares, subject to adjustment in certain limited circumstances.

Following consummation of the transactions contemplated by the Merger Agreement, Ares Capital's Board of Directors will continue as directors of Ares Capital. However, Ares Capital's Board of Directors will be increased by at least one member and Ares Capital will submit the name of one member of Allied Capital's current Board of Directors for consideration to Ares Capital's Nominating and Governance Committee to fill the vacancy.

The Merger Agreement contains (a) customary representations and warranties of Allied Capital and Ares Capital, including, among others: corporate organization, capitalization, corporate authority and absence of conflicts, third party and governmental consents and approvals, reports and regulatory matters, financial statements, compliance with law and legal proceedings, absence of certain changes, taxes, employee matters, intellectual property, insurance, investment assets and certain contracts, (b) covenants of Allied Capital and Ares Capital to conduct their respective businesses in the ordinary course until the Merger is completed and (c) covenants of Allied Capital and Ares Capital not to take certain actions during this interim period.

Among other things, Allied Capital has agreed to, and will cause its affiliates, consolidated subsidiaries, and its and each of their respective officers, directors, managers, employees and other advisors, representatives and agents to, immediately cease and cause to be terminated all discussions and negotiations with respect to a Takeover Proposal (as defined in the Merger Agreement) from a third party and not to directly or indirectly solicit or take any other action (including providing information) with the intent to solicit any inquiry, proposal or offer with respect to a Takeover Proposal.

However, if Allied Capital receives a bona fide unsolicited Takeover Proposal from a third party, and its Board of Directors determines in good faith, after consultation with reputable outside legal counsel and financial advisers experienced in such matters, that failure to consider such proposal would breach the duties of the directors under applicable law, and the Takeover Proposal constitutes or is reasonably likely to result in a Superior Proposal (as

defined in the Merger Agreement), Allied Capital may engage in discussions and negotiations with such third party so long as certain notice and other procedural requirements are satisfied. In addition, subject to certain procedural requirements (including the ability of Ares Capital to revise its offer) and the payment of a \$30 million termination

fee, Allied Capital may terminate the Merger Agreement and enter into an agreement with a third party who makes a Superior Proposal.

The representations and warranties of each party set forth in the Merger Agreement (a) have been qualified by confidential disclosures made to the other party in connection with the Merger Agreement, (b) will not survive consummation of the Merger and cannot be the basis for any claims under the Merger Agreement by the other party after the Merger is consummated, (c) are qualified in certain circumstances by a materiality standard which may differ from what may be viewed as material by investors, (d) were made only as of the date of the Merger Agreement or such other date as is specified in the Merger Agreement, and (e) may have been included in the Merger Agreement for the purpose of allocating risk between Allied Capital and Ares Capital rather than establishing matters as facts.

Consummation of the Merger, which is currently anticipated to occur by the end of the first quarter of 2010, is subject to certain conditions, including, among others, Allied Capital stockholder approval, Ares Capital stockholder approval, required regulatory approvals (including expiration of the waiting period under the Hart-Scott-Rodino Act), receipt of certain Ares Capital and Allied Capital lender consents and other customary closing conditions.

The Merger Agreement also contains certain termination rights for Allied Capital and Ares Capital and provides that, in connection with the termination of the Merger Agreement under specified circumstances, Allied Capital may be required to pay Ares Capital a termination fee of \$30 million (\$15 million if Allied Capital stockholders do not approve the Merger) and Ares Capital may be required to pay Allied Capital a termination fee of \$30 million.

In a separate transaction on October 30, 2009, we sold our interests in the Senior Secured Loan Fund LLC (the SL Fund, formerly known as the Unitranche Fund) to Ares Capital for \$165 million in cash. At September 30, 2009, the SL Fund held unitranche loans totaling approximately \$921 million. In addition, from September 30, 2009 through November 2, 2009, we have collected additional cash proceeds totaling approximately \$30 million and have identified approximately \$200 million of assets for potential future sale. We have also paid down an additional \$94 million of private debt since September 30, 2009 and have cash and money market and other securities of \$273 million as of November 2, 2009.

## **CRITICAL ACCOUNTING POLICIES**

The consolidated financial statements are based on the selection and application of critical accounting policies, which require management to make significant estimates and assumptions. Critical accounting policies are those that are both important to the presentation of our financial condition and results of operations and require management's most difficult, complex, or subjective judgments. Our critical accounting policies are those applicable to the valuation of investments, certain revenue recognition matters and certain tax matters as discussed below.

***Valuation of Portfolio Investments.*** We, as a BDC, have invested in illiquid securities including debt and equity securities of portfolio companies, CLO bonds and preferred shares/income notes, CDO bonds and investment funds. Our investments may be subject to certain restrictions on resale and generally have no established trading market. We value substantially all of our investments at fair value as determined in good faith by the Board of Directors in accordance with our valuation policy and the provisions of the Investment Company Act of 1940 and ASC Topic 820, which includes the codification of FASB Statement No. 157, *Fair Value Measurements* and related interpretations. We determine fair value to be the price that would be received for an investment in a current sale, which assumes an orderly transaction between market participants on the measurement date. Our valuation policy considers the fact that no ready market exists for substantially all of the securities in which we invest and that fair value for our investments must typically be determined using unobservable inputs. Our valuation policy is intended to provide a consistent basis for determining the fair value of the portfolio.

We adopted the standards in ASC Topic 820 on a prospective basis in the first quarter of 2008. These standards require us to assume that the portfolio investment is to be sold in the principal market to market participants, or in the absence of a principal market, the most advantageous market, which may be a hypothetical market. Market

participants are defined as buyers and sellers in the principal or most advantageous market that are independent, knowledgeable, and willing and able to transact. In accordance with the standards, we have considered our principal market, or the market in which we exit our portfolio investments with the greatest volume and level of activity.

We have determined that for our buyout investments, where we have control or could gain control through an option or warrant security, both the debt and equity securities of the portfolio investment would exit in the merger and acquisition (M&A) market as the principal market, generally through a sale or recapitalization of the portfolio company. We believe that the in-use premise of value (as defined in ASC Topic 820), which assumes the debt and equity securities are sold together, is appropriate as this would provide maximum proceeds to the seller. As a result, we use the enterprise value methodology to determine the fair value of these investments. Enterprise value means the entire value of the company to a market participant, including the sum of the values of debt and equity securities used to capitalize the enterprise at a point in time. Enterprise value is determined using various factors, including cash flow from operations of the portfolio company, multiples at which private companies are bought and sold, and other pertinent factors, such as recent offers to purchase a portfolio company, recent transactions involving the purchase or sale of the portfolio company's equity securities, liquidation events, or other events. We allocate the enterprise value to these securities in order of the legal priority of the securities.

While we typically exit our securities upon the sale or recapitalization of the portfolio company in the M&A market, for investments in portfolio companies where we do not have control or the ability to gain control through an option or warrant security, we cannot typically control the exit of our investment into our principal market (the M&A market). As a result, in accordance with ASC Topic 820, we are required to determine the fair value of these investments assuming a sale of the individual investment (the in-exchange premise of value) in a hypothetical market to a hypothetical market participant. We continue to perform an enterprise value analysis for the investments in this category to assess the credit risk of the loan or debt security and to determine the fair value of our equity investment in these portfolio companies. The determined equity values are generally discounted when we have a minority ownership position, restrictions on resale, specific concerns about the receptivity of the capital markets to a specific company at a certain time, or other factors. For loan and debt securities, we perform a yield analysis assuming a hypothetical current sale of the investment. The yield analysis requires us to estimate the expected repayment date of the instrument and a market participant's required yield. Our estimate of the expected repayment date of a loan or debt security may be shorter than the legal maturity of the instruments as our loans historically have been repaid prior to the maturity date. The yield analysis considers changes in interest rates and changes in leverage levels of the loan or debt security as compared to market interest rates and leverage levels. Assuming the credit quality of the loan or debt security remains stable, we will use the value determined by the yield analysis as the fair value for that security. A change in the assumptions that we use to estimate the fair value of our loans and debt securities using a yield analysis could have a material impact on the determination of fair value. If there is deterioration in credit quality or a loan or debt security is in workout status, we may consider other factors in determining the fair value of a loan or debt security, including the value attributable to the loan or debt security from the enterprise value of the portfolio company or the proceeds that would be received in a liquidation analysis.

Our equity investments in private debt and equity funds are generally valued based on the fund's net asset value, unless other factors lead to a determination of fair value at a different amount. The value of our equity securities in public companies for which quoted prices in an active market are readily available is based on the closing public market price on the measurement date.

The fair value of our CLO bonds and preferred shares/income notes and CDO bonds (CLO/CDO Assets) is generally based on a discounted cash flow model that utilizes prepayment, re-investment, loss and ratings assumptions based on historical experience and projected performance, economic factors, the characteristics of the underlying cash flow, and comparable yields for similar bonds and preferred shares/income notes, when available. We recognize unrealized appreciation or depreciation on our CLO/CDO Assets as comparable yields in the market change and/or based on

changes in estimated cash flows resulting from changes in prepayment, re-investment, loss or ratings assumptions in the underlying collateral pool or changes in redemption assumptions for the CLO/CDO Assets, if applicable. We determine the fair value of our CLO/CDO Assets on an individual security-by-security basis.

We record unrealized depreciation on investments when we determine that the fair value of a security is less than its cost basis, and record unrealized appreciation when we determine that the fair value is greater than its cost basis. Because of the inherent uncertainty of valuation, the values determined at the measurement date may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material. Additionally, changes in the market environment and other events that may occur over the life of the investments may cause the gains or losses ultimately realized on these investments to be different than the values determined at the measurement date. In accordance with ASC Topic 820 (discussed below), we do not consider a transaction price that is associated with a transaction that is not orderly to be indicative of fair value or market participant risk premiums, and accordingly would place little, if any, weight on transactions that are not orderly in determining fair value. When considering recent potential or completed transactions, we use judgment in determining if such offers or transactions were pursuant to an orderly process for purposes of determining how much weight is placed on these data points in accordance with the applicable guidelines in ASC Topic 820.

See Results of Operations Change in Unrealized Appreciation or Depreciation above for more discussion on portfolio valuation.

***Net Realized Gains or Losses and Net Change in Unrealized Appreciation or Depreciation.*** Realized gains or losses are measured by the difference between the net proceeds from the repayment or sale and the cost basis of the investment without regard to unrealized appreciation or depreciation previously recognized, and include investments charged off during the period, net of recoveries. Net change in unrealized appreciation or depreciation primarily reflects the change in portfolio investment values during the reporting period, including the reversal of previously recorded unrealized appreciation or depreciation when gains or losses are realized. Net change in unrealized appreciation or depreciation also reflects the change in the value of U.S. Treasury bills, when applicable, and depreciation on accrued interest and dividends receivable and other assets where collection is doubtful.

***Interest and Dividend Income.*** Interest income is recorded on an accrual basis to the extent that such amounts are expected to be collected. For loans and debt securities with contractual payment-in-kind interest, which represents contractual interest accrued and added to the loan balance that generally becomes due at maturity, we will not accrue payment-in-kind interest if the portfolio company valuation indicates that the payment-in-kind interest is not collectible. In general, interest is not accrued on loans and debt securities if we have doubt about interest collection or where the enterprise value of the portfolio company may not support further accrual. Interest may not accrue on loans or debt securities to portfolio companies that are more than 50% owned by us depending on such company's capital requirements.

When we receive nominal cost warrants or free equity securities (nominal cost equity), we allocate our cost basis in our investment between debt securities and nominal cost equity at the time of origination. At that time, the original issue discount basis of the nominal cost equity is recorded by increasing the cost basis in the equity and decreasing the cost basis in the related debt securities. Loan origination fees, original issue discount, and market discount are capitalized and then amortized into interest income using a method that approximates the effective interest method. Upon the prepayment of a loan or debt security, any unamortized loan origination fees are recorded as interest income and any unamortized original issue discount or market discount is recorded as a realized gain.

The weighted average yield on loans and debt securities is computed as the (a) annual stated interest on accruing loans and debt securities plus the annual amortization of loan origination fees, original issue discount, and market discount on accruing loans and debt securities less the annual amortization of loan origination costs, divided by (b) total loans and debt securities at value. The weighted average yield is computed as of the balance sheet date.

We recognize interest income on the CLO preferred shares/income notes using the effective interest method, based on the anticipated yield that is determined using the estimated cash flows over the projected life of the investment. Yields

are revised when there are changes in actual or estimated cash flows due to changes in prepayments and/or re-investments, credit losses, ratings or asset pricing. Changes in estimated yield are recognized as an adjustment to the estimated yield over the remaining life of the preferred shares/income notes from the date the estimated yield was changed. CLO and CDO bonds have stated interest rates. The weighted average yield on the

CLO/CDO Assets is calculated as the (a) annual stated interest or the effective interest yield on the accruing bonds or the effective yield on the preferred shares/income notes, divided by (b) CLO/CDO Assets at value. The weighted average yields are computed as of the balance sheet date.

Dividend income on preferred equity securities is recorded as dividend income on an accrual basis to the extent that such amounts are expected to be collected and to the extent that we have the option to receive the dividend in cash. Dividend income on common equity securities is recorded on the record date for private companies or on the ex-dividend date for publicly traded companies.

**Fee Income.** Fee income includes fees for loan prepayment premiums, guarantees, commitments, and services rendered by us to portfolio companies and other third parties such as diligence, structuring, transaction services, management and consulting services, and other services. Loan prepayment premiums are recognized at the time of prepayment. Guaranty and commitment fees are generally recognized as income over the related period of the guaranty or commitment, respectively. Diligence, structuring, and transaction services fees are generally recognized as income when services are rendered or when the related transactions are completed. Management, consulting and other services fees, including fund management fees, are generally recognized as income as the services are rendered. Fees are not accrued if we have doubt about collection of those fees.

**Federal and State Income Taxes and Excise Tax.** We have complied with the requirements of the Internal Revenue Code that are applicable to regulated investment companies (RIC) and real estate investment trusts (REIT). We and any of our subsidiaries that qualify as a RIC or a REIT intend to distribute or retain through a deemed distribution all of our annual taxable income to shareholders; therefore, we have made no provision for income taxes exclusive of excise taxes for these entities.

If we do not distribute at least 98% of our annual taxable income in the year earned, we will generally be required to pay an excise tax equal to 4% of the amount by which 98% of our annual taxable income exceeds the distributions from such taxable income during the year earned. To the extent that we determine that our estimated current year annual taxable income will be in excess of estimated current year dividend distributions from such taxable income, we accrue excise taxes on estimated excess taxable income as taxable income is earned using an annual effective excise tax rate. The annual effective excise tax rate is determined by dividing the estimated annual excise tax by the estimated annual taxable income.

Income taxes for AC Corp are accounted for under the asset and liability method. Deferred tax assets and liabilities are recognized for the future tax consequences attributable to differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases as well as operating loss and tax credit carryforwards. Deferred tax assets and liabilities are measured using enacted tax rates expected to apply to taxable income in the years in which those temporary differences are expected to be recovered or settled.

**Recent Accounting Pronouncements. Fair Value Measurements.** In September 2006, the FASB issued Statement No. 157, which was primarily codified into ASC Topic 820, defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles, and expands disclosures about fair value measurements.

We adopted this statement on a prospective basis beginning in the quarter ended March 31, 2008. The initial adoption of this statement did not have a material effect on our consolidated financial statements.

ASC Topic 820 also includes the codification of *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly* (FSP 157-4), which was issued by the FASB in April 2009. These provisions provide guidance on how to determine the fair value of assets under ASC Topic 820 in the current economic environment and reemphasize that the objective of a fair value

measurement remains an orderly transaction (that is, not a forced liquidation or distressed sale) between market participants at the measurement date under current market conditions. These provisions state that a transaction price that is associated with a transaction that is not orderly is not determinative of fair value or market-participant risk premiums and companies should place little, if any, weight (compared with other indications of fair value) on transactions that are not orderly when estimating fair value or market risk premiums.

We adopted these provisions of ASC Topic 820 on a prospective basis beginning in the quarter ending March 31, 2009. The adoption of these provisions did not have a material effect on our consolidated financial statements.

*Subsequent Events* (SFAS 165). In May 2009, the FASB issued SFAS 165, which was primarily codified into ASC Topic 855, which establishes general standards for reporting events that occur after the balance sheet date, but before financial statements are issued or are available to be issued. This standard requires the disclosure of the date through which an entity has evaluated subsequent events and whether that date represents the date the financial statements were issued or were available to be issued.

We adopted these provisions of Topic 855 in the quarter ended June 30, 2009. The adoption of these provisions did not have a material impact on our financial statements.

*Accounting for Transfers of Financial Assets* (SFAS 166). In June 2009, the FASB issued SFAS 166, which has not yet been codified. SFAS 166 changes the conditions for reporting a transfer of a portion of a financial asset as a sale and requires additional year-end and interim disclosures. SFAS 166 is effective for fiscal years beginning after November 15, 2009. The implementation of SFAS 166 did not have a material impact on our financial statements.

*Amendments to FASB Interpretation No. 46(R)* ( SFAS 167 ), which will be codified into ASC Topic 810, *Consolidation*. In June 2009, the FASB issued SFAS 167, which amends the guidance on accounting for variable interest entities. SFAS 167 is effective for fiscal years beginning after November 15, 2009 and interim periods within that fiscal year. We have not completed the process of evaluating the impact of adopting this standard.

*The FASB Accounting Standards Codification and the Hierarchy of Generally Accepted Accounting Principles* (SFAS 168), which was primarily codified into ASC Topic 105, was issued by the FASB in July 2009. This standard establishes the FASB Accounting Standards Codification, which will become the source of authoritative U.S. generally accepted accounting principles recognized by the FASB. This standard is effective for the period ending after September 15, 2009.

The implementation of this standard is not expected to have a material impact on our financial statements.

### **Item 3. *Quantitative and Qualitative Disclosures About Market Risk***

There has been no material change in quantitative or qualitative disclosures about market risk since December 31, 2008.

### **Item 4. *Controls and Procedures***

(a) As of the end of the period covered by this quarterly report on Form 10-Q, the Company's chairman of the board, chief executive officer, chief financial officer and chief accounting officer conducted an evaluation of the Company's disclosure controls and procedures (as defined in Rules 13a-15 and 15d-15 of the Securities Exchange Act of 1934). Based upon this evaluation, the Company's chairman of the board, chief executive officer, chief financial officer and chief accounting officer concluded that the Company's disclosure controls and procedures are effective to allow timely decisions regarding required disclosure of any material information relating to the Company that is required to be disclosed by the Company in the reports it files or submits under the Securities Exchange Act of 1934.

(b) There have been no changes in the Company's internal control over financial reporting that occurred during the quarter ended September 30, 2009, that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

## PART II. OTHER INFORMATION

### Item 1. *Legal Proceedings*

On June 23, 2004, we were notified by the SEC that they were conducting an informal investigation of us. The investigation related to the valuation of securities in our private finance portfolio and other matters. On June 20, 2007, we announced that we entered into a settlement with the SEC that resolved the SEC's informal investigation. As part of the settlement and without admitting or denying the SEC's allegations, we agreed to the entry of an administrative order. In the order the SEC alleged that, between June 30, 2001, and March 31, 2003, we did not maintain books, records and accounts which, in reasonable detail, supported or accurately and fairly reflected valuations of certain securities in our private finance portfolio and, as a result, did not meet certain recordkeeping and internal controls provisions of the federal securities laws. In the administrative order, the SEC ordered us to continue to maintain certain of our current valuation-related controls. Specifically, during and following the two-year period of the order we have: (1) continued to employ a Chief Valuation Officer, or a similarly structured officer-level employee, to oversee our quarterly valuation processes; and (2) continued to employ third-party valuation consultants to assist in our quarterly valuation processes.

On December 22, 2004, we received letters from the U.S. Attorney for the District of Columbia requesting the preservation and production of information regarding us and Business Loan Express, LLC (currently known as Ciena Capital LLC) in connection with a criminal investigation relating to matters similar to those investigated by and settled with the SEC as discussed above. We produced materials in response to the requests from the U.S. Attorney's office and certain current and former employees were interviewed by the U.S. Attorney's Office. We have voluntarily cooperated with the investigation.

In late December 2006, we received a subpoena from the U.S. Attorney for the District of Columbia requesting, among other things, the production of records regarding the use of private investigators by us or our agents. The Board established a committee, which was advised by its own counsel, to review this matter. In the course of gathering documents responsive to the subpoena, we became aware that an agent of Allied Capital obtained what were represented to be telephone records of David Einhorn and which purport to be records of calls from Greenlight Capital during a period of time in 2005. Also, while we were gathering documents responsive to the subpoena, allegations were made that our management had authorized the acquisition of these records and that management was subsequently advised that these records had been obtained. Our management has stated that these allegations are not true. We have cooperated fully with the inquiry by the U.S. Attorney's Office.

On February 26, 2007, Dana Ross filed a class action complaint in the U.S. District Court for the District of Columbia in which she alleges that Allied Capital Corporation and certain members of management violated Sections 10(b) and 20(a) of the Securities Exchange Act of 1934 and Rule 10b-5 thereunder. Thereafter, the court appointed new lead counsel and approved new lead plaintiffs. On July 30, 2007, plaintiffs served an amended complaint. Plaintiffs claim that, between November 7, 2005, and January 22, 2007, Allied Capital either failed to disclose or misrepresented information about our portfolio company, Business Loan Express, LLC. Plaintiffs seek unspecified compensatory and other damages, as well as other relief. We believe the lawsuit is without merit, and we intend to defend the lawsuit vigorously. On September 13, 2007, we filed a motion to dismiss the lawsuit. A hearing was held on the motion to dismiss in April 2009. The motion is pending.

As of November 6, 2009, we are aware of a putative class action and shareholder derivative complaint as well as an additional shareholder derivative complaint filed against us, our Board of Directors and Ares Capital Corporation. Both complaints allege that our Board of Directors failed to discharge adequately its fiduciary duties to shareholders

by failing to adequately value our shares and ensure that our shareholders received adequate consideration in a proposed sale of Allied Capital to Ares Capital Corporation, that the proposed merger between us and Ares Capital is the product of a flawed sales process, that our directors and officers breached their fiduciary duties by agreeing to a structure that was not designed to maximize the value of Allied's shares, and that Ares Capital aided and abetted the alleged breach of fiduciary duty. The plaintiffs demand, among other things, a

preliminary and permanent injunction enjoining the sale and rescinding the transaction or any part thereof that has been implemented. We believe that each of the lawsuits is without merit, and we intend to defend each of these lawsuits vigorously.

In addition to the above matters, we are party to certain lawsuits in the normal course of business. Furthermore, third parties may try to seek to impose liability on us in connection with the activities of our portfolio companies. For a discussion of civil investigations being conducted regarding the lending practices of Ciena Capital LLC, one of our portfolio companies, see Note 3, Portfolio Ciena Capital LLC from our Notes to the Consolidated Financial Statements included in Item 1.

While the outcome of any of the open legal proceedings described above cannot at this time be predicted with certainty, we do not expect these matters will materially affect our financial condition or results of operations; however, there can be no assurance whether any pending legal proceedings will have a material adverse effect on our financial condition or results of operations in any future reporting period.

#### **Item 1A. Risk Factors.**

*Investing in Allied Capital involves a number of significant risks relating to our business and investment objective. As a result, there can be no assurance that we will achieve our investment objective.*

#### **Risks Related to Liquidity**

**Our use of leverage magnifies the potential for gain or loss on amounts invested and may increase the risk of investing in us.** Borrowings, also known as leverage, magnify the potential for gain or loss on amounts invested and, therefore, increase the risks associated with investing in our securities. We borrow from and issue senior debt securities to banks, insurance companies, and other lenders or investors. Holders of these senior securities have fixed dollar claims on our consolidated assets that are superior to the claims of our common shareholders. In the case of the holders of our privately issued secured notes and the lenders under our secured bank credit facility, these claims are secured by a substantial portion of our assets. If the value of our consolidated assets increases, then leveraging would cause the net asset value attributable to our common stock to increase more sharply than it would have had we not leveraged. Conversely, if the value of our consolidated assets decreases, leveraging would cause net asset value to decline more sharply than it otherwise would have had we not leveraged. Similarly, any increase in our consolidated income in excess of consolidated interest payable on the borrowed funds would cause our net income to increase more than it would without the leverage, while any decrease in our consolidated income would cause net income to decline more sharply than it would have had we not borrowed. Leverage is generally considered a speculative investment technique. We and, indirectly, our stockholders will bear the cost associated with our leverage activity. Our bank credit facility and private notes payable contain financial and operating covenants that restrict certain of our business activities, including our ability to declare dividends. Breach of any of those covenants could cause a default under those instruments. Such a default, if not cured or waived, could have a material adverse effect on us.

At September 30, 2009, we had \$1.6 billion of outstanding indebtedness bearing a weighted average annual interest cost of 10.7% and a debt to equity ratio of 1.33 to 1.00. If our portfolio of investments fails to produce adequate returns, we may be unable to make interest or principal payments on our indebtedness when they are due. In order for us to cover annual interest payments on indebtedness, we must achieve annual returns on our assets of at least 6.12% as of September 30, 2009.

**Regulations governing our operation as a BDC affect our ability to, and the way in which we, raise additional debt and equity capital.** We will continue to need capital to fund growth in our investments. Under the 1940 Act, we are not permitted to issue indebtedness unless immediately after such borrowing we have an asset coverage for total

borrowings of at least 200%. As of September 30, 2009, our asset coverage was 175%. There can be no assurance as to when we will be able to satisfy the asset coverage requirements of the 1940 Act, if at all, and

our failure to do so would have a material adverse impact on our liquidity, financial condition, results of operations, and ability to pay dividends.

We generally are not able to issue and sell our common stock at a price below net asset value per share. We may, however, sell our common stock, warrants, options, or rights to acquire our common stock at a price below the current net asset value per share of the common stock if our Board of Directors determines that such sale is in our best interests and the best interests of our stockholders and, in certain instances, our stockholders approve such sale. In any such case, the price at which our securities are to be issued and sold may not be less than the price which, in the determination of our Board of Directors, closely approximates the market value of such securities (less any commission or discount). If our common stock continues to trade at a discount to net asset value, this restriction could adversely affect our ability to raise capital. Shares of BDCs, including shares of our common stock, have been trading at discounts to their net asset values. As of September 30, 2009, our net asset value per share was \$6.70. The closing price of our shares on the NYSE at September 30, 2009 was \$3.07. If our common stock trades below net asset value, the higher cost of equity capital may result in it being unattractive to raise new equity, which may limit our ability to grow. The risk of trading below net asset value is separate and distinct from the risk that our net asset value per share may decline.

**Our credit ratings may change and may not reflect all risks of an investment in the debt securities.** At September 30, 2009, our long-term debt carries a non-investment grade credit rating of B1 by Moody's Investors Service, BB+ by Standard & Poor's, and BB by FitchRatings. Our credit ratings are an assessment of our ability to pay our obligations. Consequently, real or anticipated changes in our credit ratings will generally affect the market value of the publicly issued debt securities. There can be no assurance that the long-term debt ratings will be maintained.

**Our independent registered public accounting firm has expressed substantial doubt about our ability to continue as a going concern.** Prior to our debt restructure, certain events of default occurred under our bank credit facility and our private notes. These events of default provided the respective lenders the right to declare immediately due and payable unpaid amounts approximating \$1.1 billion at June 30, 2009. Had the lenders accelerated these obligations, we would not have had available cash resources to satisfy all of the obligations under the bank credit facility and the private notes. These factors raised substantial doubt about our ability to continue as a going concern. In its audit report on our financial statements for our fiscal year ended December 31, 2008, our independent registered public accounting firm included an explanatory paragraph indicating that our consolidated financial statements were prepared assuming that we will continue as a going concern.

### **Risks Related to the Merger Agreement**

**On October 26, 2009, we entered into an Agreement and Plan of Merger with Ares Capital Corporation. The merger is subject to closing conditions, including stockholder approval, that, if not satisfied or waived, will result in the merger not being completed, which may result in material adverse consequences to our business and operations.** The merger is subject to closing conditions, including the approval of our stockholders that, if not satisfied, will prevent the merger from being completed. The closing condition that our stockholders adopt the merger agreement may not be waived under applicable law and must be satisfied for the merger to be completed. If our stockholders do not adopt the merger agreement and the merger is not completed, the resulting failure of the merger could have a material adverse impact on our business and operations. In addition, due to the interim operating covenants in the merger agreement, we may not be able to refinance our private notes by January 31, 2010 and may therefore not have the opportunity to apply the \$50 million restructuring fee to the repayment of the private notes.

**Under certain circumstances, we are obligated to pay a termination fee or other amounts upon termination of the merger agreement.** The merger agreement with Ares Capital Corporation contains certain termination rights for Allied Capital and Ares Capital and provides that, in connection with the termination of the merger agreement under

specified circumstances, Allied Capital may be required to pay Ares Capital a termination

fee of \$30 million (\$15 million if Allied Capital stockholders do not approve the merger) and Ares Capital may be required to pay Allied Capital a termination fee of \$30 million. There can be no assurance that the merger will be completed, and the obligation to make that payment may adversely affect our ability to engage in another transaction in the event the merger is not completed and may have an adverse impact on our financial condition.

**The merger agreement severely limits our ability to pursue alternatives to the merger.** The merger agreement contains no shop and other provisions that, subject to limited exceptions, limit our ability to discuss, facilitate or commit to competing third-party proposals to acquire all or a significant part of Allied Capital. These provisions might discourage a potential competing acquiror that might have an interest in acquiring all or a significant part of us from considering or proposing that acquisition even if it were prepared to pay consideration with a higher per share market price than that proposed in the merger. We can consider and participate in discussions and negotiations with respect to an alternative proposal only in very limited circumstances so long as certain notice and other procedural requirements are satisfied. In addition, subject to certain procedural requirements (including the ability of Ares Capital to revise its offer) and the payment of a \$30 million termination fee, we may terminate the merger agreement and enter into an agreement with a third party who makes a superior proposal.

### **Risks Related to Current Economic and Market Conditions**

**We are currently in a period of capital markets disruption and severe recession and we do not expect these conditions to improve in the near future. These market conditions have materially and adversely affected the debt and equity capital markets in the United States, which has had and could continue to have a negative impact on our business and operations.** The U.S. capital markets have been experiencing extreme volatility and disruption for more than 12 months as evidenced by a lack of liquidity in the debt capital markets, significant write-offs in the financial services sector, the repricing of credit risk in the credit market and the failure of major financial institutions. These events have contributed to worsening general economic conditions that are materially and adversely impacting the broader financial and credit markets and reducing the availability of credit and equity capital for the markets as a whole and financial services firms in particular. We believe these conditions may continue for a prolonged period of time or worsen in the future. A prolonged period of market illiquidity will continue to have an adverse effect on our business, financial condition, and results of operations. Unfavorable economic conditions also could increase our funding costs, limit our access to the capital markets or result in a decision by lenders not to extend credit to us. Equity capital may be difficult to raise because, subject to some limited exceptions, we generally are not able to issue and sell our common stock at a price below our net asset value per share. In addition, the debt capital that will be available, if at all, may be at a higher cost and on less favorable terms and conditions. These events and the inability to raise capital has and may continue to significantly limit our investment originations, limited our ability to grow and negatively impacted our operating results.

**Economic recessions, including the current global recession, could impair our portfolio companies and harm our operating results.** Many of the companies in which we have made or will make investments are susceptible to economic slowdowns or recessions. An economic recession, including the current and any future recessions or economic slowdowns, may affect the ability of a company to repay our loans or engage in a liquidity event such as a sale, recapitalization, or initial public offering. Our non-performing assets are likely to increase and the value of our portfolio is likely to decrease during these periods. Current adverse economic conditions also have decreased the value of any collateral securing our loans, if any, and a prolonged recession or depression may further decrease such value. These conditions are contributing to and if prolonged could lead to further losses of value in our portfolio and a decrease in our revenues, net income, assets and net worth.

### **Risks Related to Asset Values**

**Declining asset values and illiquidity in the corporate debt markets have adversely affected, and may continue to adversely affect, the fair value of our portfolio investments, reducing the value of our assets.** As a BDC, we are required to carry our investments at market value or, if no market value is readily available, at fair value as determined in good faith by our Board of Directors. Decreases in the values of our investments are recorded

as unrealized depreciation. The unprecedented declines in asset values and liquidity in the corporate debt markets have resulted in significant net unrealized depreciation in our portfolio. Conditions in the debt and equity markets may continue to deteriorate and pricing levels may continue to decline. As a result, we have incurred and, depending on market conditions, we may incur further unrealized depreciation in future periods, which could have a material adverse impact on our business, financial condition and results of operations.

**Substantially all of our portfolio investments, which are generally illiquid, are recorded at fair value as determined in good faith by our Board of Directors and, as a result, there is uncertainty regarding the value of our portfolio investments.** At September 30, 2009, portfolio investments recorded at fair value were 88% of our total assets. Pursuant to the requirements of the 1940 Act, we value substantially all of our investments at fair value as determined in good faith by our Board of Directors on a quarterly basis. Since there is typically no market quotation in an active market for the investments in our portfolio, our Board of Directors determines in good faith the fair value of these investments pursuant to a valuation policy and a consistently applied valuation process.

There is no single approach for determining fair value in good faith. As a result, determining fair value requires that judgment be applied to the specific facts and circumstances of each portfolio investment while employing a consistently applied valuation process for the types of investments we make. In determining fair value in good faith, we generally obtain financial and other information from portfolio companies, which may represent unaudited, projected or pro forma financial information. Unlike banks, we are not permitted to provide a general reserve for anticipated loan losses; we are instead required by the 1940 Act to specifically value each individual investment on a quarterly basis. We will record unrealized depreciation on investments when we determine that the fair value of a security is less than its cost basis, and unrealized appreciation when we determine that the fair value of a security is greater than its cost basis. Without a market quotation in an active market and because of the inherent uncertainty of valuation, the fair value of our investments determined in good faith by the Board of Directors may differ significantly from the values that would have been used had a ready market existed for the investments, and the differences could be material. Our net asset value could be affected if our determination of the fair value of our investments is materially different than the value that we ultimately realize.

### **Risks Related to Our Portfolio**

**Our portfolio of investments is illiquid.** We generally acquire our investments directly from the issuer in privately negotiated transactions. The majority of the investments in our portfolio are subject to certain restrictions on resale or otherwise have no established trading market. We typically exit our investments when the portfolio company has a liquidity event such as a sale, recapitalization, or initial public offering of the company. The illiquidity of our investments may adversely affect our ability to dispose of debt and equity securities at times when we may need to or when it may be otherwise advantageous for us to liquidate such investments. In addition, if we were forced to immediately liquidate some or all of the investments in the portfolio, the proceeds of such liquidation could be significantly less than the current value of such investments.

Our business of making private equity investments and positioning them for liquidity events also may be affected by current and future market conditions. Current economic and capital markets conditions in the U.S. have severely reduced capital availability, senior lending activity and middle market merger and acquisition activity. The absence of an active senior lending environment and the slowdown or stalling in middle market merger and acquisition activity has slowed the amount of private equity investment activity generally. As a result, our investment activity has also significantly slowed. In addition, significant changes in the capital markets, including the recent extreme volatility and disruption, has had and may continue to have a negative effect on the valuations of our investments, and on the potential for liquidity events involving such investments. This could affect the timing of exit events in our portfolio, reduce the level of net realized gains from exit events in a given year, and could negatively affect the amount of gains or losses upon exit.

**Investing in private companies involves a high degree of risk.** Our portfolio primarily consists of long-term loans to and investments in middle market private companies. Investments in private businesses involve a high

degree of business and financial risk, which can result in substantial losses for us in those investments and accordingly should be considered speculative. There is generally no publicly available information about the companies in which we invest, and we rely significantly on the diligence of our employees and agents to obtain information in connection with our investment decisions. If we are unable to identify all material information about these companies, among other factors, we may fail to receive the expected return on our investment or lose some or all of the money invested in these companies. In addition, these businesses may have shorter operating histories, narrower product lines, smaller market shares and less experienced management than their competition and may be more vulnerable to customer preferences, market conditions, loss of key personnel, or economic downturns, which may adversely affect the return on, or the recovery of, our investment in such businesses. As an investor, we are subject to the risk that a portfolio company may make a business decision that does not serve our interest, which could decrease the value of our investment. Deterioration in a portfolio company's financial condition and prospects may be accompanied by deterioration in the collateral for a loan, if any.

**Our borrowers may default on their payments, which may have a negative effect on our financial performance.** We make long-term loans and invest in equity securities primarily in private middle market companies, which may involve a higher degree of repayment risk. We primarily invest in companies that may have limited financial resources, may be highly leveraged and may be unable to obtain financing from traditional sources. Numerous factors may affect a borrower's ability to repay its loan, including the failure to meet its business plan, a downturn in its industry, or negative economic conditions. A portfolio company's failure to satisfy financial or operating covenants imposed by us or other lenders could lead to defaults and, potentially, termination of its loans or foreclosure on its secured assets, which could trigger cross defaults under other agreements and jeopardize our portfolio company's ability to meet its obligations under the loans or debt securities that we hold. In addition, our portfolio companies may have, or may be permitted to incur, other debt that ranks senior to or equally with our securities. This means that payments on such senior-ranking securities may have to be made before we receive any payments on our subordinated loans or debt securities. Deterioration in a borrower's financial condition and prospects may be accompanied by deterioration in any related collateral and may have a negative effect on our financial results.

**We may be unable to fund our commitments to our portfolio companies as they become due, which may have a material adverse effect on our business.** We have outstanding investment commitments that at September 30, 2009 totaled \$543.9 million. Our asset coverage is less than the 200% required by the 1940 Act for us to issue new debt. As a result, we are currently unable to borrow additional money to fund these commitments. In addition, because our common stock trades at a price that is less than our net asset value per share, we may not be able to raise funds through additional equity offerings in order to fund these commitments. To the extent we are unable to fund these commitments, it could have a material adverse effect on our portfolio companies, and as a result, have a material adverse effect on our results of operations.

**Our private finance investments may not produce current returns or capital gains.** Our private finance portfolio includes loans and debt securities that require the payment of interest currently and equity securities such as conversion rights, warrants, or options, minority equity co-investments, or more significant equity investments in the case of buyout transactions. Our private finance debt investments are generally structured to generate interest income from the time they are made and our equity investments may also produce a realized gain. We cannot be sure that our portfolio will generate a current return or capital gains.

**Our financial results could be negatively affected if a significant portfolio investment fails to perform as expected.** Our total investment in companies may be significant individually or in the aggregate. As a result, if a significant investment in one or more companies fails to perform as expected, our financial results could be more negatively affected and the magnitude of the loss could be more significant than if we had made smaller investments in more companies.

At September 30, 2009, our investment in Ciena Capital LLC (Ciena) totaled \$547.6 million at cost and \$102.2 million at value, after the effect of unrealized depreciation of \$445.3 million. Other assets includes additional amounts receivable from or related to Ciena totaling \$112.7 million, which have a value of \$2.0 million at

September 30, 2009. During the three months ended September 30, 2009, we funded the remaining \$46.0 million of standby letters of credit issued in connection with term securitization transactions completed by Ciena. In addition, we have issued a performance guarantee in connection with Ciena's non-recourse warehouse facility. On September 30, 2008, Ciena voluntarily filed for bankruptcy.

Ciena has been a participant in the SBA's 7(a) Guaranteed Loan Program and its wholly-owned subsidiary is licensed by the SBA as a Small Business Lending Company (SBLC). Ciena remains subject to SBA rules and regulations. The Office of the Inspector General of the SBA (OIG) and the United States Secret Service are conducting ongoing investigations of allegedly fraudulently obtained SBA-guaranteed loans issued by Ciena. Ciena is also subject to other SBA and OIG audits, investigations, and reviews. In addition, the Office of the Inspector General of the U.S. Department of Agriculture is conducting an investigation of Ciena's lending practices under the Business and Industry Loan program. The OIG and the U.S. Department of Justice are also conducting a civil investigation of Ciena's lending practices in various jurisdictions. These investigations, audits, and reviews are ongoing. These investigations, audits, and reviews have had and may continue to have a material adverse impact on Ciena and, as a result, could negatively affect our financial results. We are unable to predict the outcome of these inquiries, and it is possible that third parties could try to seek to impose liability against us in connection with certain defaulted loans in Ciena's portfolio. See Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations - Private Finance, Ciena Capital LLC.

**We operate in a competitive market for investment opportunities.** We compete for investments with a large number of private equity funds and mezzanine funds, other business development companies, investment banks, other equity and non-equity based investment funds, and other sources of financing, including specialty finance companies and traditional financial services companies such as commercial banks. Some of our competitors may have greater resources than we do. Increased competition would make it more difficult for us to purchase or originate investments at attractive prices. As a result of this competition, sometimes we may be precluded from making otherwise attractive investments.

#### **Risks Related to Regulation as a Business Development Company and Regulated Investment Company**

**Loss of regulated investment company tax treatment could negatively impact our ability to service our debt and pay dividends.** We have operated so as to qualify as a regulated investment company under Subchapter M of the Code. If we meet source of income, asset diversification, and distribution requirements, we generally will not be subject to corporate-level income taxation on income we timely distribute, or deem to distribute, to our shareholders as dividends. We would cease to qualify for such tax treatment if we were unable to comply with these requirements. In addition, we may have difficulty meeting the requirement to make distributions to our shareholders because in certain cases we may recognize income before or without receiving cash representing such income. If we fail to qualify as a regulated investment company, we will have to pay corporate-level taxes on all of our income whether or not we distribute it, which could negatively impact our ability to service our debt and pay dividends to our shareholders. Even if we qualify as a regulated investment company, we generally will be subject to a corporate-level income tax on the income we do not distribute. If we do not distribute at least 98% of our annual taxable income (excluding net long-term capital gains retained or deemed to be distributed) in the year earned, we generally will be required to pay an excise tax on amounts carried over and distributed to shareholders in the next year equal to 4% of the amount by which 98% of our annual taxable income available for distribution exceeds the distributions from such income for the current year.

**Failure to invest a sufficient portion of our assets in qualifying assets could preclude us from investing in accordance with our current business strategy.** As a business development company, we may not acquire any assets other than qualifying assets unless, at the time of and after giving effect to such acquisition, at least 70% of our total assets are qualifying assets. Therefore, we may be precluded from investing in what we believe are attractive

investments if such investments are not qualifying assets for purposes of the 1940 Act. If we do not invest a sufficient portion of our assets in qualifying assets, we could lose our status as a business development company, which would have a material adverse effect on our business, financial condition and results of operations. Similarly, these rules could prevent us from making additional investments in existing portfolio companies, which could result in the dilution of our position, or could require us to dispose of investments at inopportune times in order to comply

with the 1940 Act. If we were forced to sell nonqualifying investments in the portfolio for compliance purposes, the proceeds from such sale could be significantly less than the current value of such investments.

**Changes in the law or regulations that govern us could have a material impact on us or our operations.** We are regulated by the SEC. In addition, changes in the laws or regulations that govern business development companies, regulated investment companies, asset managers, and real estate investment trusts may significantly affect our business. There are proposals being considered by the current administration to change the regulation of financial institutions that may affect, possibly adversely, investment managers or investment funds. Any change in the law or regulations that govern our business could have a material impact on us or our operations. Laws and regulations may be changed from time to time, and the interpretations of the relevant laws and regulations also are subject to change, which may have a material effect on our operations.

### **Risks Related to Our Ability to Pay Dividends to Our Shareholders**

**There is a risk that our common stockholders may not receive dividends or distributions.** We may not be able to achieve operating results that will allow us to make distributions at a specific level or at all. In addition, due to the asset coverage test applicable to us as a business development company, we may be precluded from making distributions. Also, certain of our credit facilities limit our ability to declare dividends if we default under certain provisions. As of September 30, 2009 we had an asset coverage of 175%. Therefore, we may be precluded from declaring dividends or other distributions to our shareholders unless our asset coverage is at least 200%.

If we do not meet the distribution requirements for regulated investment companies, we will suffer adverse tax consequences. In addition, in accordance with U.S. generally accepted accounting principles and tax regulations, we include in income certain amounts that we have not yet received in cash, such as contractual payment-in-kind interest, which represents contractual interest added to the loan balance that becomes due at the end of the loan term, or the accrual of original issue discount. The increases in loan balances as a result of contractual payment-in-kind arrangements are included in income in advance of receiving cash payment and are separately included in payment-in-kind interest and dividends, net of cash collections in our consolidated statement of cash flows. Since we may recognize income before or without receiving cash representing such income, we may have difficulty meeting the requirement to distribute at least 90% of our investment company taxable income to obtain tax benefits as a regulated investment company.

### **Risks Related to Changes in Interest Rates**

**Changes in interest rates may affect our cost of capital and net investment income.** Because we borrow money to make investments, our net investment income is dependent upon the difference between the rate at which we borrow funds and the rate at which we invest these funds. As a result, there can be no assurance that a significant change in market interest rates will not have a material adverse effect on our net investment income. In periods of rising interest rates, our cost of funds would increase, which would reduce our net investment income. In addition, defaults under our borrowing arrangements may result in higher interest costs during the continuance of an event of default. In August 2009, we completed a comprehensive restructuring of our bank facility and our private notes, which significantly increased our cost of capital. We may use interest rate risk management techniques in an effort to limit our exposure to interest rate fluctuations. Such techniques may include various interest rate hedging activities to the extent permitted by the 1940 Act.

### **Risks Related to Asset Management Activities**

**There are potential conflicts of interest between us and the funds managed by us.** Certain of our officers serve or may serve in an investment management capacity to funds managed by us. As a result, investment professionals may

allocate such time and attention as is deemed appropriate and necessary to carry out the operations of the managed funds. In this respect, they may experience diversions of their attention from us and

potential conflicts of interest between their work for us and their work for the managed funds in the event that the interests of the managed funds run counter to our interests.

Although managed funds may have a different primary investment objective than we do, the managed funds may, from time to time, invest in the same or similar asset classes that we target. In addition, more than one fund managed by us may invest in the same or similar asset classes. These investments may be made at the direction of the same individuals acting in their capacity on behalf of us and one or more of the managed funds. As a result, there may be conflicts in the allocation of investment opportunities between us and the managed funds or among the managed funds. We may or may not participate in investments made by investment funds managed by us or one of our affiliates. See Management's Discussion and Analysis and Results of Operations Managed Funds.

We have sold assets to certain managed funds and, as part of our investment strategy, we may offer to sell additional assets to managed funds or we may purchase assets from managed funds. In addition, funds managed by us may offer assets to or may purchase assets from one another. While assets may be sold or purchased at prices that are consistent with those that could be obtained from third parties in the marketplace, there is an inherent conflict of interest in such transactions between us and funds we manage.

**Our financial results could be negatively affected if our Managed Funds fail to perform as expected.** In the event that any of our Managed Funds were to perform below our expectations, our financial results could be negatively affected as a result of a reduction in management fees, the deferral in payment of management fees or a reduction in incentive fees we earn. Also, if the Managed Funds perform below expectations, investors could demand lower fees or fee concessions which could also cause a decline in our income. In addition, certain of our Managed Funds are required to meet various compliance and maintenance tests related to, among other things, the ratings on fund assets and the ratio of collateral to a fund's outstanding debt. If a Managed Fund fails to comply with these tests, the payment of a portion of our management fees could be deferred until a fund regains compliance with such tests.

Moreover, because we are also an investor in certain of our Managed Funds, we could experience losses on our investments.

## **Other Risks**

**Our business depends on our key personnel.** We depend on the continued services of our executive officers and other key management personnel. If we were to lose certain of these officers or other management personnel, such a loss could result in inefficiencies in our operations and lost business opportunities, which could have a negative effect on our business.

**Results may fluctuate and may not be indicative of future performance.** Our operating results may fluctuate and, therefore, you should not rely on current or historical period results to be indicative of our performance in future reporting periods. Factors that could cause operating results to fluctuate include, but are not limited to, variations in the investment origination volume and fee income earned, changes in the accrual status of our loans and debt securities, variations in timing of prepayments, variations in and the timing of the recognition of net realized gains or losses and changes in unrealized appreciation or depreciation, the level of our expenses, the degree to which we encounter competition in our markets, and general economic conditions.

**Our common stock price may be volatile.** The trading price of our common stock may fluctuate substantially. The capital and credit markets have been experiencing extreme volatility and disruption for more than 12 months, reaching unprecedented levels. We have experienced significant stock price volatility. In general, the price of the common stock may be higher or lower than the price paid by stockholders, depending on many factors, some of which are beyond our control and may not be directly related to our operating performance. These factors include, but are not

limited to, the following:

price and volume fluctuations in the overall stock market from time to time;

significant volatility in the market price and trading volume of securities of business development companies or other financial services companies;

volatility resulting from trading in derivative securities related to our common stock including puts, calls, long-term equity anticipation securities, or LEAPs, or short trading positions;

the financial performance of the specific industries in which we invest on a recurring basis;

changes in laws or regulatory policies or tax guidelines with respect to business development companies or regulated investment companies;

actual or anticipated changes in our earnings or fluctuations in our operating results or changes in the expectations of securities analysts;

general economic conditions and trends;

loss of a major funding source; or

departures of key personnel.

**The trading market or market value of our publicly issued debt securities may be volatile.** Our publicly issued debt securities may or may not have an established trading market. We cannot assure that a trading market for our publicly issued debt securities will ever develop or be maintained if developed. In addition to our creditworthiness, many factors may materially adversely affect the trading market for, and market value of, our publicly issued debt securities. These factors include, but are not limited to, the following:

the time remaining to the maturity of these debt securities;

the outstanding principal amount of debt securities with terms identical to these debt securities;

the ratings assigned by national statistical ratings agencies;

the general economic environment;

the supply of debt securities trading in the secondary market, if any;

the redemption or repayment features, if any, of these debt securities;

the level, direction and volatility of market interest rates generally; and

market rates of interest higher or lower than rates borne by the debt securities.

There also may be a limited number of buyers for our debt securities. This too may materially adversely affect the market value of the debt securities or the trading market for the debt securities.

**Our common stock could be delisted from the New York Stock Exchange if we trade below \$1.00 or if we fail to meet other listing criteria.** In order to maintain our listing on the New York Stock Exchange (NYSE), we must continue to meet the NYSE minimum share price listing rule, the minimum market capitalization rule and other

continued listing criteria. Under the NYSE continued listing criteria, the average closing price of our common stock must not be below \$1.00 per share for 30 or more consecutive trading days. In the event that the average closing price of our common stock is below \$1.00 per share over a consecutive 30-day trading period, we would have a six-month cure period to attain both a \$1.00 share price and a \$1.00 average share price over 30 trading days.

If our common stock were delisted, it could (i) reduce the liquidity and market price of our common stock; (ii) negatively impact our ability to raise equity financing and access the public capital markets; and (iii) materially adversely impact our results of operations and financial condition.

**Item 2. Unregistered Sales of Equity Securities and Use of Proceeds**

No unregistered sales of equity securities occurred during the three months ended September 30, 2009 and 2008.

**Issuer Purchases of Equity Securities**

We did not purchase shares of our equity securities during the three months ended September 30, 2009. During the three months ended September 30, 2008, we purchased a total of 250,198 shares by a plan agent for shareholders pursuant to our dividend reinvestment plan at an aggregate cost of \$3.6 million.

**Item 3. Defaults Upon Senior Securities**

None.

**Item 4. Submission of Matters to a Vote of Security Holders**

None.

**Item 5. Other Information**

None.

**Item 6. Exhibits**

(a) List of Exhibits

Exhibit Number	Description
3.1	Restated Articles of Incorporation. <i>(Incorporated by reference to Exhibit a.2 filed with Allied Capital's Post-Effective Amendment No. 1 to registration statement on Form N-2 (File No. 333-141847) filed on June 1, 2007).</i>
3.2	Amended and Restated Bylaws. <i>(Incorporated by reference to Exhibit 3.2 filed with Allied Capital's Form 10-K on March 2, 2009).</i>
4.1	Specimen Certificate of Allied Capital's Common Stock, par value \$0.0001 per share. <i>(Incorporated by reference to Exhibit d. filed with Allied Capital's registration statement on Form N-2 (File No. 333-51899) filed on May 6, 1998).</i>
4.3	Form of Note under the Indenture relating to the issuance of debt securities. <i>(Contained in Exhibit 4.4). (Incorporated by reference to Exhibit d.1 filed with Allied Capital's registration statement on Form N-2/A (File No. 333-133755) filed on June 21, 2006).</i>
4.4	Indenture by and between Allied Capital Corporation and The Bank of New York, dated June 16, 2006. <i>(Incorporated by reference to Exhibit d.2 filed with Allied Capital's registration statement on Form N-2/A (File No. 333-133755) filed on June 21, 2006).</i>
4.5	Statement of Eligibility of Trustee on Form T-1. <i>(Incorporated by reference to Exhibit d.3 filed with Allied Capital's registration statement on Form N-2 (File No. 333-133755) filed on May 3, 2006).</i>
