FORM 10-Q

(Mark One)

þ **QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the Quarterly Period Ended June 30, 2010

OR

o **TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934**

For the transition period from __________ to __________

Commission file number 0-23137

RealNetworks, Inc.
(Exact name of registrant as specified in its charter)

Washington	**91-1628146**
(State of incorporation)	*(I.R.S. Employer Identification Number)*
2601 Elliott Avenue, Suite 1000 Seattle, Washington	**98121**
(Address of principal executive offices)	*(Zip Code)*

(206) 674-2700
(Registrant s telephone number, including area code)

Indicate by check mark whether the registrant: (1) has filed all reports required to be filed by Section 13 or 15(d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days. Yes þ No o

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T (§232.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes o No o

Indicate by check mark whether the registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Exchange Act. (Check one):

Large accelerated filer o	Accelerated filer þ	Non-accelerated filer o (Do not check if a smaller reporting company)	Smaller reporting company o

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act). Yes o No þ

The number of shares of the registrant s Common Stock outstanding as of July 30, 2010 was 135,592,883.

REALNETWORKS, INC. AND SUBSIDIARIES
NOTES TO UNAUDITED CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
Quarters and Six Months Ended June 30, 2010 and 2009

Note 1. Summary of Significant Accounting Policies

Description of Business. RealNetworks, Inc. and subsidiaries (RealNetworks or Company) is a leading global provider of network-delivered digital media products and services. The Company also develops and markets software products and services that enable the creation, distribution and consumption of digital media, including audio and video.

Inherent in the Company s business are various risks and uncertainties, including limited history of certain of its product and service offerings and its limited history of offering premium subscription services on the Internet. The Company s success will depend on the acceptance of the Company s technology, products and services and the ability to generate related revenue.

Basis of Presentation. The unaudited condensed consolidated financial statements include the accounts of the Company and its wholly-owned and majority-owned subsidiaries. All intercompany balances and transactions have been eliminated in consolidation. Certain reclassifications have been made to 2009 amounts to conform to the current presentation.

On August 20, 2007, RealNetworks and MTV Networks, a division of Viacom International Inc. (MTVN), created Rhapsody America LLC (Rhapsody) to jointly own and operate a business-to-consumer digital audio music service. RealNetworks held a 51% equity interest in Rhapsody and Rhapsody s financial position and operating results has been consolidated into RealNetworks financial statements prior to March 31, 2010. MTVN s proportionate share of income (loss) was included in noncontrolling interest in Rhapsody in the unaudited condensed consolidated statements of operations and comprehensive income (loss). MTVN s proportionate share of equity was included in noncontrolling interest in Rhapsody in the unaudited condensed consolidated balance sheets. On March 31, 2010, the Company and MTVN restructured Rhapsody, and RealNetworks held slightly less than 47.5% of the outstanding shares of capital stock of Rhapsody after the restructuring and as of June 30, 2010. Since March 31, 2010, RealNetworks has not held a controlling interest in Rhapsody and therefore, the Company has treated its ownership interest in Rhapsody as an equity method investment. Rhapsody s financial position as of March 31, 2010 and its operating results beginning April 1, 2010 are no longer consolidated with RealNetworks consolidated financial statements.

The unaudited condensed consolidated financial statements reflect all adjustments, consisting only of normal, recurring adjustments that, in the opinion of the Company s management, are necessary for a fair presentation of the results of operations for the periods presented. Operating results for the quarter and six months ended June 30, 2010 are not necessarily indicative of the results that may be expected for any subsequent quarter or for the year ending December 31, 2010. Certain information and disclosures normally included in financial statements prepared in conformity with accounting principles generally accepted in the United States of America have been condensed or omitted pursuant to the rules and regulations of the Securities and Exchange Commission (SEC).

These unaudited condensed consolidated financial statements should be read in conjunction with the audited consolidated financial statements and related notes included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009.

Revenue Recognition. The Company recognizes revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is probable. Physical products are considered delivered to the customer once they have been shipped and title and risk of loss have been transferred. For online sales, the products or services are considered delivered at the time the products or services are made available, digitally, to the end user.

The Company recognizes revenue on a gross or net basis. In most arrangements, the Company contracts directly with end user customers, is the primary obligor and carries all collectability risk. In such arrangements, the Company recognizes revenue on a gross basis. In some cases, the Company utilizes third-party distributors to sell products or services directly to end user customers and carries no collectability risk. In such instances, the Company recognizes revenue on a net basis.

In the Company s direct to consumer business segments, which include Games, Media Software and Services (MSS), and prior to April 1, 2010, included Music, the Company derives revenue through (1) subscriptions, (2) sales of content downloads, software and licenses and (3) the sale of advertising and the distribution of third-party products on its websites and in the Company s games.

Beginning in the quarter ended June 30, 2010, revenue from the Company s Rhapsody joint venture is no longer consolidated within its financial statements and the Company is no longer recording any operating or other financial results for the former Music segment.

Consumer subscription products are paid in advance, typically for monthly, quarterly or annual duration. Subscription revenue is recognized ratably over the related subscription time period. Revenue from sales of content downloads, software and licenses is recognized at the time the product is made available, digitally, to the end user. Revenue generated from advertising on the Company s websites and from advertising and the distribution of third-party products included in the Company s products is recognized as revenue at the time of delivery.

The Company s business-to-business Technology Products and Solutions (TPS) segment generates revenue by providing services that enable wireless carriers to deliver audio and video content to their customers and through sales of software licenses and products and related support and other services.

Revenue generated from services provided to wireless carriers that enable the delivery of audio and video content to their customers is recognized as the services are provided. Setup fees to build these services are recognized ratably upon launch of the service over the remaining expected term of the service.

Accounting for Gains on Sale of Subsidiary Stock. Effective January 1, 2009, the Company adopted Statement of Financial Accounting Standards No. 160, *Non-controlling Interests in Consolidated Financial Statements, an amendment to ARB No. 51* (SFAS 160) which was primarily codified into FASB ASC 810 *Consolidation* (ASC 810). Current guidance requires that the difference between the carrying amount of the parent s investment in a subsidiary and the underlying net book value to be recorded as an equity transaction. The Company elected to recognize any such gain in its consolidated statement of operations prior to January 1, 2009.

Noncontrolling Interests. The Company records noncontrolling interest expense (benefit) which reflects the portion of the earnings (losses) of majority-owned entities which are applicable to the noncontrolling interest partners in the consolidated statement of operations. Redeemable noncontrolling interests that are redeemable at either fair value or are based on a formula that is intended to approximate fair value follow the Company s historical disclosure only policy for the redemption feature. Redeemable noncontrolling interests that are redeemable at either a fixed price or are based on a formula that is not akin to fair value are reflected as an adjustment to income attributable to common shareholders based on the difference between accretion as calculated using the terms of the redemption feature and the accretion entry for a hypothetical fair value redemption feature with the remaining amount of accretion to redemption value recorded directly to equity. Noncontrolling interest expense (benefit) is included within the consolidated statements of operations and comprehensive income (loss). The Company applied this accounting policy to the noncontrolling interest in Rhapsody that was held by MTVN for periods beginning when Rhapsody was formed in August 2007 through the quarter ended March 31, 2010. Due to the completion of the restructuring of Rhapsody on March 31, 2010, which resulted in the Company holding approximately 47.5% of the outstanding shares of capital stock of Rhapsody, this accounting policy will no longer apply with respect to the Company s investment as the Company no longer consolidates Rhapsody and no longer reports a noncontrolling interest.

Note 2. Recent Accounting Pronouncements

With the exception of those discussed below, there have been no recent accounting pronouncements or changes in accounting pronouncements during the six months ended June 30, 2010, to be implemented by the Company in future periods as compared to the recent accounting pronouncements described in the Company s Annual Report on Form 10-K for the year ended December 31, 2009, that are of significance, or potential significance to the Company.

In September 2009, the FASB ratified Accounting Standards Update (ASU) 2009-13 (ASU 2009-13) (previously Emerging Issues Task Force (EITF) Issue No. 08-1, *Revenue Arrangements with Multiple Deliverables* (EITF 08-1)). ASU 2009-13 supersedes EITF 00-21 and addresses criteria for separating the consideration in multiple-element arrangements. ASU 2009-13 will require companies to allocate the overall consideration to each deliverable by using a best estimate of the selling price of individual deliverables in the arrangement in the absence of vendor-specific objective evidence or other third-party evidence of the selling price. ASU 2009-13 will be effective prospectively for revenue arrangements entered into or materially modified in fiscal years beginning on or after June 15, 2010 and early adoption is permitted. The Company is currently evaluating the potential impact, if any, of the adoption of ASU 2009-13 on its consolidated results of operations and financial condition and whether it will adopt the standard early.

In September 2009, the FASB ratified ASU 2009-14 (ASU 2009-14) (previously EITF No. 09-3, *Certain Revenue Arrangements That Include Software Elements)*. ASU 2009-14 modifies the scope of Software Revenue Recognition to exclude (a) non-software

components of tangible products and (b) software components of tangible products that are sold, licensed, or leased with tangible products when the software components and non-software components of the tangible product function together to deliver the tangible product s essential functionality. ASU 2009-14 has an effective date that is consistent with ASU 2009-13. The Company is currently evaluating the potential impact, if any, of the adoption of ASU 2009-14 on its consolidated results of operations and financial condition and whether it will adopt the standard early.

Note 3. Stock-Based Compensation

Stock-based compensation cost is measured at the grant date based on the fair value of the award and is recognized as expense over the requisite service period, which is the vesting period. The Company uses the Black-Scholes option-pricing model to determine the fair-value of stock-based awards. The Company recognizes compensation cost related to options granted on a straight-line basis over the applicable vesting period.

The expected term of the options represents the estimated period of time until exercise and is based on historical experience of similar awards, including the contractual terms, vesting schedules, and expectations of employee behavior in the future. Expected stock price volatility is based on a combination of historical volatility of the Company s stock for the related expected term and the implied volatility of its traded options. The risk-free interest rate is based on the implied yield available on U.S. Treasury zero-coupon issues with a term equivalent to the expected term of the stock options. The Company has never paid dividends.

The fair value of options granted was determined using the Black-Scholes model and the following weighted-average assumptions:

	Quarters Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Expected dividend yield	0%	0%	0%	0%
Risk-free interest rate	1.65%	1.76%	1.91%	1.64%
Expected life (years)	4.0	4.2	4.0	4.2
Volatility	62%	63%	62%	63%

Recognized stock-based compensation expense is as follows (in thousands):

	Quarters Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Cost of revenue	$ 228	$ 363	$ 459	$ 993
Research and development	693	2,234	2,290	4,058
Sales and marketing	811	1,199	1,807	2,265
General and administrative	1,039	1,800	2,136	3,502
Total stock-based compensation expense	$ 2,771	$ 5,596	$ 6,692	$ 10,818

No stock-based compensation was capitalized as part of the cost of an asset during the quarters or six months ended June 30, 2010 or 2009. As of June 30, 2010, $17.8 million of total unrecognized compensation cost, net of estimated forfeitures, related to stock options, is expected to be recognized over a weighted-average period of 2.2 years.

Note 4. Rhapsody Joint Venture

Restructuring of Rhapsody

As described in Note 1, Summary of Significant Accounting Policies, the Company initially formed in August 2007 a joint venture with MTVN to own and operate a business-to-consumer digital audio music service known as Rhapsody. Prior to March 31, 2010, the Company owned 51% of the outstanding equity interests of Rhapsody and MTVN owned the remaining 49%. On March 31, 2010, restructuring transactions involving Rhapsody were completed, and Rhapsody was converted from a limited liability company to a corporation. Following the

completion of the restructuring transactions, RealNetworks owned slightly less than 47.5%, MTVN owned 47.5%, and two minority stockholders held slightly more than 5% of the outstanding shares of capital stock of Rhapsody. RealNetworks contributed $18.0 million in cash, the Rhapsody brand and certain other assets, including content licenses, in exchange for shares of convertible preferred stock of Rhapsody, carrying a $10.0 million preference upon certain liquidation events. As part of the transactions, RealNetworks repurchased the international radio business that was previously contributed to Rhapsody by

RealNetworks. MTVN contributed a $33.0 million advertising commitment in exchange for shares of common stock of Rhapsody, and MTVN s previous obligation to provide advertising of approximately $111 million as of December 31, 2009 was cancelled. In addition, the put and call rights held by RealNetworks and MTVN and MTVN s rights to receive a preferred return in connection with the exercise of RealNetworks put right were terminated. RealNetworks is also obligated to provide certain operational transition services to Rhapsody until December 31, 2010, unless earlier terminated by Rhapsody. Rhapsody will be initially governed by a Board of Directors with two directors appointed by each of the Company and MTVN and one independent director appointed by mutual agreement of the Company and MTVN.

RealNetworks no longer has a controlling interest in Rhapsody and therefore, the operating results of Rhapsody are accounted for under the equity method of accounting for investments, and the Company s proportionate share of the income or loss is recognized as a component of other income and expense, net in the Company s consolidated statements of operations in periods subsequent to March 31, 2010. Since March 31, 2010, Rhapsody has been classified as an equity method investment, and RealNetworks removed all Rhapsody related assets and liabilities that were previously consolidated from its unaudited condensed consolidated balance sheet. The removal of these assets and liabilities and the creation of the equity method investment resulted in a one-time net gain of $10.9 million recorded in other income and expense, net in the Company s unaudited condensed consolidated statement of operations for the quarter ended March 31, 2010, at which time the Company determined the fair value of its retained equity interest of approximately 47.5% to be approximately $29.7 million. During the quarter ended June 30, 2010, the Company recorded its share of losses in the operations of Rhapsody of approximately $5.4 million. These losses reduced the original carrying value of the equity investment accordingly to approximately $24.2 million. As a result of the deconsolidation of Rhapsody s operations from the Company s financial statements, the Company will no longer record any operating or financial results for its Music segment for periods subsequent to March 31, 2010. The Company now reports its share of Rhapsody s income or losses as Equity in net loss of Rhapsody and other equity method investments in Other income.

As mentioned above, MTVN s preferred return rights were terminated in connection with the restructuring of Rhapsody. Prior to the restructuring, if the appraised value of Rhapsody at a redemption date was less than $436.3 million, then the exercise price of the put would have included a preferred return to MTVN. The Company previously elected to accrete any excess of the redemption value over the carrying amount as an adjustment to income attributable to common shareholders, and adjusted earnings per share for the current quarter s accretion of the difference between accretion as calculated using the terms of the redemption feature and the accretion entry for a hypothetical fair value redemption feature. Due to the termination of MTVN s preferred return rights at the completion of the restructuring, the Company decreased the noncontrolling interest on the unaudited condensed consolidated balance sheet at March 31, 2010, by $10.4 million as part of the deconsolidation transactions, of which $3.7 million was an adjustment to income attributable to common shareholders for the purposes of calculating earnings per share for the quarter ended March 31, 2010. The Company increased the noncontrolling interest on the unaudited condensed consolidated balance sheet for the quarter and six months ended June 30, 2009, by $0.4 million and $1.8 million, respectively, which was an adjustment to income attributable to common shareholders for the purposes of calculating earnings per share. See Note 13, Earnings Per Share, for more information on this item.

Noncontrolling interest rollforward

Activity in noncontrolling interest and equity attributable to common shareholders is as follows (in thousands):

	Noncontrolling interest	Total Equity
Balances, December 31, 2008	$ 378	$ 553,558
Net loss	(12,081)	(200,465)
Contribution and other transactions with owners	13,475	7,237
Accretion of MTVN s equity interest in Rhapsody	5	(5)
Accretion of MTVN s preferred return in Rhapsody	1,850	(1,850)
		3,938

Unrealized holding losses on short-term and equity investments, net of taxes				
Foreign currency translation losses				1,218
Stock-based transactions and compensation expense, net of taxes				11,464
Balances, June 30, 2009	$	3,627	$	375,095

	Noncontrolling interest	Total Equity
Balances, December 31, 2009	$ 7,253	$ 375,811
Net loss	(2,910)	(22,679)
Contribution and other transactions with owners	616	619
Reversal of MTVN s accretion equity interest in Rhapsody	(6,736)	6,736
Reversal of MTVN s preferred return in Rhapsody	(3,700)	3,700
Deconsolidation	5,477	
Unrealized holding losses on short-term and equity investments, net of taxes		(1,609)
Foreign currency translation losses		(6,354)
Stock-based transactions and compensation expense, net of taxes		7,861
Balances, June 30, 2010	$	$ 364,085

Note 5. Fair Value Measurements

The Company measures certain financial assets at fair value on a recurring basis, including cash equivalents, short-term investments, and equity investments. The fair value of these financial assets was determined based on three levels of inputs:

Level 1: Observable inputs such as quoted prices in active markets for identical assets or liabilities

Level 2: Inputs other than quoted prices that are observable for the asset or liability, either directly or indirectly; these include quoted prices for similar assets or liabilities in active markets and quoted prices for identical or similar assets or liabilities in markets that are not active

Level 3: Unobservable inputs that reflect the reporting entity s own assumptions

Items Measured at Fair Value on a Recurring Basis

The following table presents information about the Company s financial assets that have been measured at fair value (in thousands) on a recurring basis as of June 30, 2010 and December 31, 2009 and indicates the fair value hierarchy of the valuation inputs utilized to determine such fair value.

	Fair Value Measurements as of June 30, 2010			
	Total	Level 1	Level 2	Level 3
	(In thousands)			
Cash equivalents				
Money market funds	$ 61,251	$ 61,251	$	$
Corporate notes and bonds	40,996	40,996	$	$
Short-term investments				
Corporate notes and bonds	104,403	104,403		
U.S. government agency securities	52,662	52,662		
Restricted cash equivalents and investments	10,000	10,000		
Available for sale securities	17,587	17,587		
Total	$ 286,899	$ 286,899	$	$

Fair Value Measurements as of December 31, 2009

	Total	**Level 1**	**Level 2**	**Level 3**
		(In thousands)		
Cash equivalents				
Money market funds	$ 223,909	$ 223,909	$	$
Short-term investments				
Corporate notes and bonds	73,462	73,462		
U.S. government agency securities	34,408	34,408		
Restricted cash equivalents and investments	13,700	13,700		
Available for sale securities	19,503	19,503		
Total	$ 364,982	$ 364,982	$	$

Investments in marketable securities classified as short-term investments and equity investments of public companies are measured at fair value using quoted market prices and are classified within Level 1 of the valuation hierarchy. The Company carries its equity

investments in private companies at cost and no fair value is derived. The Company has consistently applied these valuation techniques in all periods presented.

Items Measured at Fair Value on a Nonrecurring Basis

Certain assets and liabilities of the Company are measured at estimated fair value on a non-recurring basis. These instruments are subject to fair value adjustments only in certain circumstances (for example, when there is evidence of impairment). The Company performed a valuation using Level 3 inputs of its investment in the Rhapsody joint venture as of March 31, 2010. The Company performed the analysis as a result of the restructuring and related deconsolidation of Rhapsody, which is further described in Note 4, Rhapsody Joint Venture. The fair value analysis used multiple valuation models and was based on assumptions of future results made by management, including operating and cash flow projections.

The Company also performed a valuation using Level 3 inputs of its reporting units to test its goodwill for potential impairment as of June 30, 2009, resulting in goodwill impairment charges of $175.6 million during the quarter and six months ended June 30, 2009. The first step determined if there was an indication of impairment by comparing the estimated fair value of each reporting unit to its carrying value including existing goodwill. Goodwill is considered impaired if the carrying value of a reporting unit exceeds the estimated fair value. The second step calculated the implied fair value of goodwill by allocating the fair value of the reporting unit to all assets and liabilities other than goodwill and comparing it to the carrying amount of goodwill. The fair value analyses used multiple valuation models and were based on assumptions of future results made by management, including operating and cash flow projections.

Note 6. Cash, Cash Equivalents, Trading Securities, Short-Term Investments, and Restricted Cash Equivalents and Investments

Cash, cash equivalents, trading securities, short-term investments, and restricted cash equivalents and investments as of June 30, 2010 consist of the following (in thousands):

	Amortized Cost	Gross Unrealized Gains	Gross Unrealized Losses	Estimated Fair Value
Cash and cash equivalents:				
Cash	$ 53,908	$	$	$ 53,908
Money market mutual funds	61,251			61,251
Corporate notes and bonds	40,996			40,996
Total cash and cash equivalents:	156,155			156,155
Short-term investments:				
Corporate notes and bonds	103,759	665	(21)	104,403
U.S. Government agency securities	52,420	243	(1)	52,662
Total short-term investments:	156,179	908	(22)	157,065
Total cash, cash equivalents and short-term investments	$ 312,334	$ 908	$ (22)	$ 313,220
Restricted cash equivalents and investments	$ 10,000	$	$	$ 10,000

Cash, cash equivalents, short-term investments, and restricted cash equivalents as of December 31, 2009 consist of the following (in thousands):

	Amortized	Gross Unrealized	Gross Unrealized	Estimated

	Cost	Gains	Losses	Fair Value
Cash and cash equivalents:				
Cash	$ 53,121	$	$	$ 53,121
Money market mutual funds	223,909			223,909
Total cash and cash equivalents	277,030			277,030
Short-term investments:				
Corporate notes and bonds	72,731	732	(1)	73,462
U.S. Government agency securities	34,560	5	(157)	34,408
Total short-term investments	107,291	737	(158)	107,870
Total cash, cash equivalents and short-term investments	$ 384,321	$ 737	$ (158)	$ 384,900
Restricted cash equivalents and investments	$ 13,700	$	$	$ 13,700

At December 31, 2009, restricted cash equivalents and investments represent cash equivalents and short-term investments pledged as collateral against two letters of credit for a total of $13.7 million in connection with two lease agreements. During the quarter ended June 30, 2010, the Company completed its obligation with one of the two lease agreements, and as a result, $3.7 million was reclassified into cash and cash equivalents.

Realized gains or losses on sales of available-for-sale securities for the quarters and six months ended June 30, 2010 and 2009 were not significant.

Changes in estimated fair values of short-term investments are primarily related to changes in interest rates and are considered to be temporary in nature.

The contractual maturities of available-for-sale investments at June 30, 2010 are as follows (in thousands):

	Amortized Cost	Estimated Fair Value
Within one year	$ 58,626	$ 58,730
Between one year and five years	97,553	98,335
Total available-for-sale investments	$ 156,179	$ 157,065

Note 7. Allowance for Doubtful Accounts Receivable and Sales Returns

Activity in the allowance for doubtful accounts receivable and sales returns is as follows (in thousands):

	Allowance For Doubtful Accounts Receivable	Sales Returns
Balances, December 31, 2009	$ 2,912	$ 1,012
Additions charged to expenses	1,449	1,995
Amounts written off	(724)	(2,064)
Balances, June 30, 2010	$ 3,637	$ 943

Two customers accounted for 12% and 10% of trade accounts receivable, respectively, as of June 30, 2010. As of December 31, 2009, the same two customers accounted for 18% and 10% of trade accounts receivable. No one customer accounted for more than 10% of total revenue during the quarters and six months ended June 30, 2010 and 2009.

Note 8. Equity Method Investments and Available for Sale Securities

As of June 30, 2010 and December 31, 2009, the carrying value of the Company s equity interest in publicly traded companies primarily relates to J-Stream Inc., a Japanese media services company, and LoEn Entertainment, Inc., a Korean digital music distribution company. These investments are classified as available for sale. The market for these investments is relatively limited and the share price is volatile. On March 31, 2010, the Company restructured its investment in Rhapsody, and as a result, the Company treats its investment in Rhapsody as an equity method investment since March 31, 2010. See Note 4, Rhapsody Joint Venture, above for further discussion of the restructuring transactions. Although the carrying value of the equity method investments and available for sale securities was $41.8 million at June 30, 2010, there can be no assurance that any gain can be realized through the disposition of these shares.

Summary of investments is as follows (in thousands):

	June 30, 2010		December 31, 2009	
	Cost	Carrying Value	Cost	Carrying Value

Available for sale securities	$ 10,765	$ 17,587	$ 10,765	$ 19,503
Equity method investments	29,650	24,223	500	50
Total investments	$ 40,415	$ 41,810	$ 11,265	$ 19,553

Note 9. Other Intangible Assets

Other intangible assets consist of the following (in thousands):

	Gross Amount	Accumulated Amortization	Net
Customer relationships	$ 29,397	$ 22,528	$ 6,869
Developed technology	28,008	27,096	912
Patents, trademarks and tradenames	5,455	5,432	23
Service contracts and other	5,904	5,904	
Total other intangible assets, June 30, 2010	$ 68,764	$ 60,960	$ 7,804
Total other intangible assets, December 31, 2009	$ 78,128	$ 67,478	$ 10,650

Amortization expense related to other intangible assets during the quarter and six months ended June 30, 2010 was $1.2 million and $2.5 million, respectively. Amortization expense related to other intangible assets during the quarter and six months ended June 30, 2009 was $2.2 million and $4.5 million, respectively.

As of June 30, 2010, estimated future amortization of other intangible assets is as follows (in thousands):

2010 (remaining six months)	$ 1,922
2011	2,186
2012	1,938
2013	1,541
2014	153
Thereafter	64
Total	$ 7,804

The Company reviews long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of such assets may not be recoverable. Recoverability of these assets is measured by comparing their carrying amount to future undiscounted cash flows the assets are expected to generate. If long-lived assets are considered to be impaired, the impairment to be recognized equals the amount by which the carrying value of the assets exceeds their fair market value. The Company did not record any impairments to long-lived assets during the quarters or six months ended June 30, 2010 or 2009.

Note 10. Goodwill

In accordance with SFAS 142, goodwill is required to be tested for impairment annually and also if there is an event or change in conditions that would more likely than not reduce the fair value of a reporting unit below its carrying value. The Company performs its annual goodwill impairment test during its fiscal fourth quarter.

The Company considered whether a triggering event had occurred during the quarter ended June 30, 2009 in assessing whether an interim impairment analysis of goodwill was warranted. The Company noted its market capitalization, before adjusting for a reasonable control premium, was below its carrying value. In addition, the Company observed that the trading price per share of the Company s common stock had negatively diverged from the broader market during 2009. The Company also noted, more broadly, a continuation of macroeconomic instability as well as continued illiquidity in the overall credit market. As a result, the Company concluded that due to the sustained divergence in the Company s market capitalization and continued macroeconomic instability, an interim impairment analysis of goodwill as of June 30, 2009 was warranted.

The Company determined as part of its interim testing of impairment that the implied fair value of goodwill was zero for each of its reporting units. As a result, the Music, Technology Products and Solutions, Games, and Media Software and Services reporting units recorded impairments of $37.0 million, $50.5 million, $41.2 million and

$46.8 million, respectively, during the quarter ended June 30, 2009. No impairments were recognized in either the quarter or six months ended June 30, 2010.

Note 11. Accrued and Other Liabilities

Accrued and other liabilities consist of (in thousands):

	June 30, 2010	December 31, 2009
Royalties and other fulfillment costs	$ 31,224	$ 53,693
Employee compensation, commissions and benefits	22,770	20,077
Sales, VAT and other taxes payable	15,019	16,907
Legal fees and contingent legal fees	1,873	5,251
Other	17,635	29,006
Total	$ 88,521	$ 124,934

Note 12. Loss on Excess Office Facilities

In June 2010, the Company completed a business and operational reorganization which led to the reduction of its use of office space in its corporate headquarters in Seattle, Washington and one of its offices in Europe. As a result, the Company recorded losses of $7.1 million during the quarter ended June 30, 2010. These losses represented approximately $5.5 million of rent and contractual operating expenses over the remaining life of the lease, and approximately $1.6 million for the write-down of leasehold improvements to their estimated fair value. The Company regularly evaluates the market for office space. If the market for such space changes further in future periods, the Company may have to revise its estimates which may result in future gains or losses on excess office facilities.

The Company is also continuing to pay against the accrued loss on excess office facilities originally recorded in 2001 associated with the 10-year lease of additional office space near its corporate headquarters in Seattle, Washington.

The total accrued loss of $4.8 million for estimated future losses on excess office facilities at June 30, 2010, is shown net of expected future sublease income of $0.9 million, which was committed under sublease contracts at the time of the estimate. The Company regularly evaluates the market for office space in the cities where it has operations. If the market for such space declines further in future periods, the Company may have to revise its estimates further, which may result in additional losses on excess office facilities.

A summary of activity for accrued loss on excess office facilities is as follows (in thousands):

Accrued loss on excess office facilities, December 31, 2009	$ 3,228
Additional accrued loss on excess office facilities resulting from its June 2010 restructuring	7,082
Less write-down of leasehold improvements	(1,552)
Less amounts paid, net of sublease income	(3,949)
Accrued loss on excess office facilities, June 30, 2010	$ 4,809
Less current portion	(762)
Accrued loss on excess office facilities, non-current portion	$ 4,047

Note 13. Earnings Per Share

For periods beginning August 2007 through the quarter ended March 31, 2010, basic net income (loss) available to common shareholders per share is computed by dividing net income (loss) attributable to common shareholders less any accretion from MTVN s preferred return in Rhapsody by the weighted average number of common shares outstanding during the period. Diluted net income (loss) available to common shareholders per share is computed by dividing net income (loss) attributable to common shareholders less any accretion from MTVN s preferred return in

Rhapsody by the weighted average number of common and dilutive potential common shares outstanding during the period. On March 31, 2010, the restructuring transactions involving Rhapsody were completed. After the completion of the restructuring transactions, MTVN no longer holds a preferred return in Rhapsody. Therefore, the total amount of the previously recognized accretion of $3.7 million was reversed in the quarter ended March 31, 2010. For periods subsequent to March 31, 2010, no adjustment to net income (loss) available to common shareholders was required.
Basic and diluted net income available to common shareholders per share are calculated as follows (in thousands):

	Quarters Ended June 30,		Six Months Ended June 30,	
	2010	2009	2010	2009
Net income (loss) available to common shareholders:				
Net income (loss) attributable to common shareholders	$ (25,907)	$ (188,329)	$ (22,679)	$ (200,465)
Less accretion of MTVN s preferred return in Rhapsody		(416)	3,700	(1,850)
Net income (loss) available to common shareholders	$ (25,907)	$ (188,745)	$ (18,979)	$ (202,315)
Weighted average common shares outstanding used to compute basic net income (loss) per share available to common shareholders	135,277	134,420	135,209	134,394
Dilutive potential common shares:				
Stock options and restricted stock				
Shares used to compute diluted net income (loss) per share available to common shareholders	135,277	134,420	135,209	134,394
Basic net income (loss) per share available to common shareholders	$ (0.19)	$ (1.40)	$ (0.14)	$ (1.51)
Diluted net income (loss) per share available to common shareholders	$ (0.19)	$ (1.40)	$ (0.14)	$ (1.51)

During the quarter and six months ended June 30, 2010, 18.4 million and 18.6 million shares of common stock, respectively, potentially issuable from stock options were excluded from the calculation of diluted net income per share because of their antidilutive effect. During the quarter and six months ended June 30, 2009, 38.7 million and 38.9 million shares of common stock, respectively, potentially issuable from stock options were excluded from the calculation of diluted net income per share because of their antidilutive effect.

Note 14. Commitments and Contingencies

Borrowing Arrangements. The Company s subsidiary, WiderThan, has entered into lines of credit with a Korean domestic bank with an aggregate maximum available limit of $0.8 million at interest rates of approximately 6% over the rate earned on the underlying deposits. During the quarter or six months ended June 30, 2010, the Company did not draw on the line of credit and there was no balance outstanding as of June 30, 2010 or December 31, 2009.

WiderThan uses corporate charge cards issued by a Korean domestic bank with an aggregate line of credit of up to $4.1 million. The charged amounts are generally payable in the following month depending on the billing cycle and are included in accounts payable in the accompanying unaudited condensed consolidated balance sheets. In general, the term of the arrangement is one year, with automatic renewal in April of each year. The arrangement may be terminated in writing by mutual agreement between the bank and the Company. The Company is not subject to any financial or other restrictive covenants under the terms of this arrangement.

WiderThan has a letter of credit of up to $1.0 million with a Korean domestic bank for importing goods, with one-year maturity (renewable every April), which bears interest at 2.5% over the London Inter-Bank Offer Rate (LIBOR). Borrowings under this letter of credit are collateralized by import documents and goods being imported under such documentation. To the extent that the Company has any outstanding balance, the Company is subject to standard covenants and notice requirements under the terms of this facility, such as covenants to consult with the lender prior to engaging in certain events, which include, among others, mergers and acquisitions or sale of material assets or to furnish certain financial and other information. The Company is not, however, subject to any financial covenant requirements or other restrictive covenants that restrict the Company s ability to utilize this facility or to

obtain financing elsewhere. During the quarter or six months ended June 30, 2010, the Company did not draw on the letter of credit and there was no balance outstanding as of June 30, 2010 or December 31, 2009.

WiderThan has purchase guarantees amounting to $0.9 million from Seoul Guarantee Insurance which guarantees payments for one year under certain supply contracts the Company has with a customer in Korea.

Litigation. On April 25, 2007, a lawsuit was filed by Greenville Communications, LLC in the U.S. District Court for the Northern District of Mississippi against a number of cell phone carriers, including the Company s partners T-Mobile USA, Inc. and Alltel Corporation, alleging that they infringe its patents by providing ringback tone services. The Company agreed to indemnify T-Mobile and Alltel against the claims based on an indemnity that is claimed to be owed by the Company s subsidiary, WiderThan. On August 27, 2007, the Company s motion to transfer this matter to the U.S. District Court for the District of New Jersey was granted. The parties briefed claim construction, but the case was subsequently stayed pending reexamination of the patents at issue. In December

2009, the U.S. Patent and Trademark Office (PTO) issued notice of its intent to issue reexamination certificates for the patents in suit. The Court lifted the stay on the litigation on January 29, 2010 and discovery has resumed. The Company disputes the plaintiff s allegations regarding both the validity of its patents and its claims of infringement against the Company s partners.

The Company has also been involved in a proceeding in the U.S. District Court for the Southern District of New York to determine a royalty rate for the public performance of music contained in the American Society of Composers, Authors and Publishers (ASCAP) catalogue. In April 2008, the district court issued a preliminary ruling that sets forth, among other things, a methodology to be used to calculate the royalties owed to ASCAP and subsequently issued additional rulings. After working with ASCAP to make a final determination of amounts due under the court s rulings, the Company reached a partial agreement with ASCAP on January 12, 2009. The Company believes it has sufficiently accrued for expected royalties under the agreement, but the Company and ASCAP appealed some aspects of the court s rulings that underlie the agreement, which appeal remains pending before the U.S. Court of Appeals for the Second Circuit.

From time to time the Company is, and expects to continue to be, subject to legal proceedings and claims in the ordinary course of business, including employment claims, contract-related claims, and claims of alleged infringement of third-party patents, trademarks and other intellectual property rights. These claims, including those described above, even if not meritorious, could force the Company to spend significant financial and managerial resources. The Company is not aware of any other legal proceedings or claims that the Company believes will have, individually or taken together, a material adverse effect on the Company s business, prospects, financial condition or results of operations. However, the Company may incur substantial expenses in defending against third-party claims and certain pending claims are moving closer to trial. The Company expects that its potential costs of defending these claims may increase as the disputes move into the trial phase of the proceedings. In the event of a determination adverse to the Company, the Company may incur substantial monetary liability, and/or be required to change its business practices. Either of these could have a material adverse effect on the Company s financial position and results of operations.

Note 15. Segment Information

The Company reports four business segments based on factors such as how the Company manages its operations and how its Chief Operating Decision Maker reviews results. The Company s Chief Operating Decision Maker is considered to be the Company s CEO Staff (CEOS), which includes the Company s Chief Executive Officer, Chief Financial Officer, Executive Vice President and certain Senior Vice Presidents. The CEOS reviews financial information presented on both a consolidated basis and on a business segment basis, accompanied by disaggregated information about products and services and geographical regions for purposes of making decisions and assessing financial performance. The CEOS reviews discrete financial information regarding profitability of the Company s TPS, MSS, Games, and, prior to April 1, 2010, Music segments and, therefore, the Company reports these as operating segments. The accounting policies used to derive segment results are generally the same as those described in Note 1, Summary of Business and Summary of Significant Accounting Policies.

The TPS segment includes revenue and costs from: sales of application services such as ringback tones, music on demand, video on demand, messaging, and information services; sales of media delivery system software and licenses, including Helix system software and related authoring and publishing tools, directly to customers and indirectly through original equipment manufacturer channels; sales of support and maintenance services to customers who purchase software products; sales of broadcast hosting services; and sales of consulting and professional services. These products and services are primarily sold to corporate customers.

The MSS segment primarily includes revenue from sales of the Company s SuperPass premium subscription service; sales of RealPlayer Plus and related products; sales and distribution of third-party software products; and all advertising other than that related directly to the Company s Games and former Music businesses. Beginning with the quarter ended June 30, 2010, MSS revenue also includes sales of the RadioPass subscription service that the Company repurchased from Rhapsody in connection with the restructuring transactions that were completed on March 31, 2010.

The Games segment primarily includes revenue from the sale of individual games on the Company s websites RealArcade.com, GameHouse.com and Zylom.com; the sale of games subscription services; advertising through the Company s games websites; the sale of games through syndication on partner sites; and sales of games through

wireless carriers.

For periods prior to April 1, 2010, the Music segment primarily includes the operations of Rhapsody. The revenue and costs from these businesses include: digital music subscription services, such as Rhapsody and RadioPass, and sales of digital music content and

advertising. These products and services are sold and provided primarily through the Internet, and the Company charges customers credit cards at the time of sale. Billings for subscription services typically occur monthly, quarterly or annually, depending on the term of the service purchased. As a result of the deconsolidation of Rhapsody s operations from the Company s financial statements effective following the restructuring of Rhapsody on March 31, 2010, the Company will not record any operating or financial results for its Music segment for periods subsequent to March 31, 2010. The Company now reports its share of Rhapsody s income or losses as Equity in net loss of Rhapsody and other equity method investments in Other income.

Amounts that are not included within the above segment descriptions are shown below as Reconciling Amounts. Included within these amounts are items such as interest income.

Segment net income (loss) attributable to common shareholders for the quarter ended June 30, 2010 is as follows (in thousands):

	Technology Products and Solutions	Media Software and Services	Games	Music	Reconciling Amounts	Consolidated
Net revenue	$ 41,122	$ 19,617	$ 28,145	$	$	$ 88,884
Cost of revenue	17,526	4,243	7,380			29,149
Gross profit	23,596	15,374	20,765			59,735
Loss on excess office facilities					7,082	7,082
Restructuring and other charges					4,792	4,792
Operating expenses	25,663	16,132	27,784		(24)	69,555
Operating income (loss)	(2,067)	(758)	(7,019)		(11,850)	(21,694)
Total non-operating income, net					(3,932)	(3,932)
Income (loss) before income taxes	(2,067)	(758)	(7,019)		(15,782)	(25,626)
Income taxes					(281)	(281)
Net income (loss)	(2,067)	(758)	(7,019)		(16,063)	(25,907)
Net income (loss) attributable to noncontrolling interest in Rhapsody						
Net income (loss) attributable to common shareholders	$ (2,067)	$ (758)	$ (7,019)	$	$ (16,063)	$ (25,907)

Segment net income (loss) attributable to common shareholders for the six months ended June 30, 2010 is as follows (in thousands):

Rest of the World	11,202	10,034
Total net assets	$ 364,085	$ 375,811

Note 16. Related Party Transactions

Transactions with MTVN. As part of the initial formation of Rhapsody in 2007, MTVN contributed a $230 million five-year note payable in partial consideration for acquiring MTVN s interest in the venture. In February 2009, RealNetworks and MTVN signed an amendment to the Rhapsody joint venture agreement which reduced the amount payable under the MTVN note to $213.8 million over the original five-year term. During the quarter and six months ended June 30, 2009, Rhapsody received $6.9 million and $14.5 million, respectively, in cash as note payments and spent $6.9 million and $14.3 million, respectively, in advertising with MTVN. During the quarter ended March 31, 2010, Rhapsody received $1.2 million in cash as note payments and spent $1.1 million in advertising with MTVN. These amounts are included within RealNetworks results for the six months ended June 30, 2010. The remainder of this marketing note was cancelled, and MTVN agreed to a $33 million marketing commitment as part of the restructuring transactions that were completed on March 31, 2010. RealNetworks no longer consolidates Rhapsody s financial position and results, and consequently these transactions are no longer considered related party transactions. See Note 4, Rhapsody Joint Venture, for more information on the restructuring transactions.

Transactions with Rhapsody. For periods between August 2007 and March 31, 2010, the Company also provided various support services, including items such as facilities, information technology systems, personnel support and some overhead charges associated with the support services, directly to Rhapsody. The allocation of these and other support service costs were based on various measures depending on the service provided, including employee headcount, time employees spent on providing services to Rhapsody, server usage or number of users of a service. The allocations of these costs were billed directly to Rhapsody. Prior to March 31, 2010, the Company treated these allocations as intercompany transactions and all such transactions were eliminated in consolidation. As of March 31, 2010, the Company no longer consolidates these transactions.

Following the restructuring transactions, the Company is obligated to provide Rhapsody with a reduced amount of support services until December 31, 2010, unless earlier terminated by Rhapsody. The support services include information technology and limited operational support provided directly to Rhapsody. The amount of these and other support service costs were based on various measures depending on the service provided, including vendor fees, an allocation of fixed costs and time employees spend on providing services to Rhapsody. RealNetworks treated any income resulting from providing these support services as a reduction to the related expense in the period for which it was incurred. During the quarter ended June 30, 2010, the Company charged Rhapsody $1.8 million for the support services. These charges are included within the Related Party Payable Rhapsody of $0.5 million as of June 30, 2010.

Transactions with LoEn Entertainment, Inc. During the fourth quarter of 2008, the Company paid $9.9 million to acquire approximately 11% of the outstanding shares of LoEn Entertainment, Inc. (LoEn). The Company paid market price for approximately 2.8 million common shares of LoEn which are traded on the Korean Securities Dealers Automated Quotations. The Company s investment in LoEn is treated as an equity investment of a public company and is marked-to-market each period with resulting gains/losses recognized in equity as unrealized holding gains/losses on investment. During the quarters ended June 30, 2010, and 2009, the Company recorded revenue from LoEn of approximately $3.7 million and $3.5 million, respectively. During the six months ended June 30, 2010, and 2009, the Company recorded revenue from LoEn of approximately $7.4 million and $5.9 million, respectively. This revenue

consisted primarily of sales of application service provider services, which includes sales of ringback tones, music-on-demand, video-on-demand, and inter-carrier messaging services. Associated with these transactions, RealNetworks also

recorded accounts receivable of approximately $1.8 million as of June 30, 2010. Accounts payable and cost of revenue balances associated with LoEn as of and for the quarters ended March 31, 2010 and 2009 were nominal.

Note 17. Income Taxes

As of June 30, 2010, there have been no material changes to the Company s uncertain tax positions disclosures as provided in Note 15 to the Company s audited financial statements included in the Company s Annual Report on Form 10-K for the year ended December 31, 2009. The Company filed formal and informal refund claims with the Internal Revenue Service (IRS) in 2009 for the years 2001-2007, primarily related to Extraterritorial Income Exclusion and previously acquired net operating losses. In April 2010 the Company agreed to significant adjustments proposed by the IRS related to the formal and informal refund claims. Therefore, the Company believes it is reasonably possible that the total unrecognized tax benefits will be reduced significantly within the next twelve months. However, the Company does not believe that an estimate of the range of the reduction can be made at present.

The Company files numerous consolidated and separate income tax returns in the United States federal, as well as state, local, and foreign jurisdictions. With few exceptions, the Company is no longer subject to United States federal, state, local, or foreign income tax examinations for years before 1993. The Company is currently under United States federal audit for the consolidated group RealNetworks, Inc. and Subsidiaries for the years ended December 31, 2005, 2006 and 2007. RealNetworks, Inc. and/or subsidiaries are also under audit by various states and foreign jurisdictions for certain tax years subsequent to 1993.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

This Quarterly Report on Form 10-Q and the documents incorporated herein by reference contain forward-looking statements that have been made pursuant to the provisions of the Private Securities Litigation Reform Act of 1995. These forward-looking statements are based on current expectations, estimates, and projections about RealNetworks industry, products, management s beliefs, and certain assumptions made by management. Words such as anticipates, expects, intends, plans, believes, seeks, estimates, and similar expressions are intended to identify forward-lo statements. All statements contained in this report that do not relate to matters of historical fact should be considered forward-looking statements. Forward-looking statements include statements with respect to:

future revenues, operating expenses, income and other taxes, tax benefits, net income (loss) per diluted share available to common shareholders, acquisition costs and related amortization, and other measures of results of operations;

the effects of our past acquisitions and expectations for future acquisitions;

plans, strategies and expected opportunities for future growth, increased profitability and innovation;

the prospects for creation and growth of strategic partnerships and the resulting financial benefits from such partnerships;

the expected financial position, performance, growth and profitability of our businesses and the availability of resources;

our involvement in potential claims and legal proceedings, the expected course and costs of existing claims and legal proceedings, and the potential outcomes and effects of both existing and potential claims and legal proceedings on our business, prospects, financial condition or results of operations;

our intention to separate our Games business and to restructure our remaining businesses;

the expected benefits and other consequences from restructuring Rhapsody and from our other strategic initiatives;

our expected introduction of new products and services across our businesses;

the effects of legislation, regulations, administrative proceedings, court rulings, settlement negotiations and other factors that may impact music publishing royalty rates;

---

the continuation and expected nature of certain customer relationships;

impacts of competition and certain customer relationships on the future financial performance and growth of our businesses;

the effects of U.S. and foreign income and other taxes on our business, prospects, financial condition or results of operations; and

the effect of economic and market conditions on our business, prospects, financial condition or results of operations.

These statements are not guarantees of future performance and actual actions or results may differ materially. These statements are subject to certain risks, uncertainties and assumptions that are difficult to predict, including those noted in the documents incorporated herein by reference. Particular attention should also be paid to the cautionary language in Item 1 of Part II entitled Legal Proceedings and Item 1A of Part II entitled Risk Factors. RealNetworks undertakes no obligation to update publicly any forward-looking statements as a result of new information, future events or otherwise, unless required by law. Readers should, however, carefully review the risk factors included in other reports or documents filed by RealNetworks from time to time with the Securities and Exchange Commission, particularly the Quarterly Reports on Form 10-Q and any Current Reports on Form 8-K.

Overview

Our mission is to create the best products and services for people to enjoy their digital media everywhere. We pioneered the development of technology for streaming digital media over the Internet and have sustained our focus on creating and delivering digital media, technology, services and content such as music, games and video to consumers around the world. We provide easy-to-use and affordable software products and services that enable consumers to discover, save, store and access their digital media on many different devices. We distribute our products and services directly to consumers and also through wireless network operators, original equipment manufacturers and other communications companies who offer these products and services to their customers. Our direct to consumer activities and financial results are reflected in revenue and profit (loss) for our Media Software and Services (MSS) and Games segments, while our business to business activities and financial results are reflected in revenue and profit (loss) for our Technology Products and Solutions (TPS) segment. Each of these segments is described further below under Revenue by Segment and Costs of Revenue by Segment.

Through the quarter ended March 31, 2010, we owned a controlling interest in and operated a music business that was conducted primarily through our Rhapsody joint venture formed in 2007 with the MTVN division of Viacom International, Inc. (MTVN). Rhapsody s operations were included within our consolidated statement of operations for the period beginning August 2007 through the quarter ended March 31, 2010. Since restructuring our investment in Rhapsody on March 31, 2010, we no longer consolidate Rhapsody s operating and financial results with our consolidated financial statements or record any operating or financial results for our Music segment. For more details on the restructuring transactions and the related financial impacts, see Note 4. Rhapsody Joint Venture to the Condensed Consolidated Financial Statements included within Part I, Item 1 of this report.

During the quarter ended June 30, 2010, we reorganized our business and operational structure as part of our strategy to simplify, restructure and grow our business. Our restructuring activities included the elimination of approximately 85 positions, including approximately 25% of our executive ranks, and reduced our use of office space in Seattle and Europe. As a result of these changes, we recorded restructuring charges of $11.9 million for the quarter ended June 30, 2010, of which $4.8 million primarily related to the reduction in force and $7.1 million was recorded as a loss on excess office facilities.

We are focused on two key businesses: (1) our software as a service (SaaS) offerings of our TPS business segment (formerly referred to as our application service provider, or ASP, offerings) and (2) our RealPlayer media player software and related businesses. In addition to the recently completed restructuring of our Rhapsody joint venture and business reorganization, we also intend to further simplify and restructure our company by, among other things, separating the operations of our Games business from the rest of our business, discontinuing certain unprofitable products and services offerings and reducing overhead and other operating costs of our company. We believe the

restructuring of our Rhapsody joint venture and our plan to separate our Games business will enable those businesses to operate more efficiently and to compete more effectively in their markets. We have not yet determined the structure of the separated Games business, including whether we will retain control of the business or enter into another strategic transaction involving the business.

In the quarter ended June 30, 2010, our total revenue declined 35%, or $46.8 million, to $88.9 million compared with $135.7 million in the quarter ended June 30, 2009. The decline was due primarily to the absence of any revenue in our Music segment due to the deconsolidation of our Rhapsody joint venture, which accounted for approximately $40.5 million of the decrease. Also contributing to the overall reduction were declines in revenue from our TPS and Games segments totaling $5.1 million and $1.6 million, respectively. Revenue in our TPS segment declined due to a reduction in professional services contracts and a combination of several market and subscriber-based factors that reduced SaaS-derived revenue. Our Games segment is continuing to face increased pricing pressures as well as a shift in the marketplace towards online social games. We recorded net loss attributable to common shareholders of $25.9 million for the quarter ended June 30, 2010 compared with a net loss attributable to common shareholders of $188.3 million for the year earlier period. Net loss attributable to common shareholders for the prior year quarter was primarily impacted by a goodwill impairment of $175.6 million. See Results of Operations-Revenue by Segment below for further explanations of changes in our segment revenue for the quarter ended June 30, 2010.

Our operating expenses for the quarter ended June 30, 2010, declined 70%, or $191.6 million, compared with the year-earlier period. The decline in operating expenses resulted primarily from a $175.6 million impairment of goodwill recorded during the quarter ended June 30, 2009, as well as the deconsolidation of our Rhapsody joint venture that accounted for $11.9 million of the decrease. Although we reduced operating expenses, we continued to invest in research and development of new and existing products. Cash, cash equivalents, restricted cash and short-term investments declined to $323.2 million from $398.6 million at December 31, 2009, principally due to uses of cash related to Rhapsody, including the restructuring, and ordinary course fluctuation in working capital. See Liquidity and Capital Resources below for further explanation of uses of our cash.

We intend to continue to focus on implementing the strategic initiatives described above including the separation of our Games business and the execution of operating plans for our other businesses. For the rest of 2010, our overall reported revenue, cost of revenue and operating expenses will continue to be lower compared to the same period last year primarily because Rhapsody s financial results are no longer consolidated with our consolidated financial statements and, accordingly, we will not record any operating or financial results for our Music segment for periods subsequent to March 31, 2010. In addition, in conjunction with the execution of our strategic initiatives, we expect to continue to reduce our overall operating costs and potentially to record additional cash and non-cash charges associated with these activities. Whether and to what extent we realize any benefits from the restructuring of Rhapsody or any of our other strategic initiatives are subject to risks that are described in Item 1A of this report under *Risks Related to Our Business in General*.

Critical Accounting Policies and Estimates

The preparation of our financial statements requires us to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reported period. Our critical accounting policies and estimates are as follows:

- Revenue recognition;
- Estimating music publishing rights and music royalties;
- Estimating recoverability of deferred costs;
- Estimating allowances for doubtful accounts and sales returns;
- Estimating losses on excess office facilities;
- Determining whether declines in the fair value of investments are other-than-temporary and estimating fair market value of investments in privately held companies;
- Valuation of long-lived assets;

Valuation of goodwill;

Stock-based compensation;

Noncontrolling interest;

Accounting for gains on sale of subsidiary stock; and

Accounting for income taxes.

Revenue Recognition. We recognize revenue when persuasive evidence of an arrangement exists, delivery has occurred, the sales price is fixed or determinable, and collection is probable. Physical products are considered delivered to the customer once they have been shipped and title and risk of loss have been transferred. For online sales, the products or services are considered delivered at the time the product or services are made available, digitally, to the end user.

We recognize revenue on a gross or net basis. In most arrangements, we contract directly with end user customers, are the primary obligor and carry all collectability risk. In such arrangements, we recognize revenue on a gross basis. In some cases, we utilize third-party distributors to sell products or services directly to end user customers and carry no collectability risk. In such instances, we recognize revenue on a net basis.

In our direct to consumer business segments, which include MSS, Games, and prior to April 1, 2010, included Music, we derive revenue through (1) subscriptions, (2) sales of content downloads, software and licenses and (3) the sale of advertising and the distribution of third-party products on our websites and in our games.

Consumer subscription products are paid in advance, typically for monthly, quarterly or annual duration. Subscription revenue is recognized ratably over the related subscription time period. Revenue from sales of content downloads, software and licenses is recognized at the time the product is made available, digitally, to the end user. Revenue generated from advertising on our websites and from advertising and the distribution of third-party products included in our products is recognized as revenue at the time of delivery.

Our business-to-business TPS segment generates revenue by providing services that enable wireless carriers to deliver audio and video content to their customers and through sales of software licenses and products and related support and other services.

Revenue generated from services provided to wireless carriers that enable the delivery of audio and video content to their customers is recognized as the services are provided. Setup fees to build these services are recognized ratably upon launch of the service over the remaining expected term of the service.

Estimating Music Publishing Rights and Music Royalty Accruals. We make material estimates of amounts owed related to our music publishing rights and music royalties for our domestic and international music services primarily incurred by Rhapsody which was separated from our operating results beginning April 1, 2010. Unsettled obligations incurred prior to April 1, 2010 remain our liability. Material differences in the actual amounts paid may impact the amount and timing of expense in future periods should management need to revise judgments or estimates. Under copyright law, we may be required to pay licensing fees for digital sound recordings and compositions we deliver. Copyright law generally does not specify the rate and terms of the licenses, which are determined by voluntary negotiations among the parties or, for certain compulsory licenses where voluntary negotiations are unsuccessful, by arbitration. There are certain geographies and agencies for which we have not yet completed negotiations with regard to the royalty rate to be applied to the current or historic sales of our digital music offerings. Our estimates were based on contracted or statutory rates, when established, or management s best estimates based on facts and circumstances regarding the specific music services and agreements in similar geographies or with similar agencies. While we based our estimates on historical experience and on various other assumptions that management believed to be reasonable under the circumstances, actual results may differ materially from these estimates under different assumptions or conditions.

Estimating Recoverability of Deferred Costs. We defer costs on projects for service revenue and system sales. Deferred costs consist primarily of direct and incremental costs to customize and install systems, as defined in individual customer contracts, including costs to acquire hardware and software from third parties and payroll costs for our employees and other third parties.

We recognize such costs as a component of cost of goods sold and match the recognition of the costs with the recognition of revenue for each project. At each balance sheet date, we review deferred costs to ensure they are ultimately recoverable. Any anticipated losses on uncompleted contracts are recognized when evidence indicates the estimated total cost of a contract exceeds its estimated total revenue.

Estimating Allowances for Doubtful Accounts and Sales Returns. We make estimates of the uncollectible portion of our accounts receivable. We specifically analyze the age of accounts receivable and historical bad debts, customer credit-worthiness and current economic trends when evaluating the adequacy of the allowance for doubtful accounts. Similarly, we make estimates of potential future product returns related to current period revenue. We analyze historical returns, current economic trends, and changes in customer demand and acceptance of our products when evaluating the adequacy of the sales returns allowance. Significant judgments and estimates are made and used in connection with establishing allowances for doubtful accounts and sales returns in any accounting period. Material differences may result in the amount and timing of our revenue for any period if we were to make different judgments or utilize different estimates or actual future experience was different from the judgments and estimates.

Estimating Losses on Excess Office Facilities. We made significant estimates in determining the appropriate amount of accrued loss on excess office facilities. If we made different estimates, our loss on excess office facilities could be significantly different from that recorded, which could have a material impact on our operating results. Changes in market conditions for commercial real estate in the area where the excess office facilities are located, or changes to reflect negotiated modifications in sublease rates charged to occupying tenants could materially change our current estimates of losses on excess office facilities.

Impairment of Investments. We periodically evaluate whether any declines in the fair value of our investments are other-than-temporary. Significant judgments and estimates are made to assess whether an other-than-temporary decline in fair value of investments has occurred and to estimate the fair value of investments in privately held companies. Material differences may result in the amount and timing of any impairment charge if we were to make different judgments or utilize different estimates or actual future experience was different from the judgments and estimates.

Valuation of Long-Lived Assets. Long-lived assets consist primarily of property, plant and equipment, as well as amortizable intangible assets acquired in business combinations. Long-lived assets are amortized on a straight line basis over their estimated useful lives. We review long-lived assets for impairment whenever events or changes in circumstances indicate the carrying amount of such assets may not be recoverable. Recoverability of these assets is measured by comparison of their carrying amount to future undiscounted cash flows the assets are expected to generate. If long-lived assets are considered to be impaired, the impairment to be recognized equals the amount by which the carrying value of the assets exceeds their fair market value. The impairment analysis of long-lived assets is based upon estimates and assumptions relating to our future revenue, cash flows, operating expenses, costs of capital and capital purchases. These estimates and assumptions are complex and subject to a significant degree of judgment with respect to certain factors including, but not limited to, the cash flows of our long-term operating plans, market and interest rate risk, and risk-commensurate discount rates and cost of capital. Significant or sustained declines in future revenue or cash flows, or adverse changes in our business climate, among other factors, and their resulting impact on the estimates and assumptions relating to the value of our long-lived assets could result in the need to perform an impairment analysis in future periods which could result in a significant impairment. While we believe our estimates and assumptions are reasonable, due to their complexity and subjectivity, these estimates and assumptions could vary period to period.

Valuation of Goodwill. We assess the impairment of goodwill on an annual basis, in our fourth quarter, or whenever events or changes in circumstances indicate that the fair value of the reporting unit to which goodwill relates is less than the carrying value. We consider a synthesis of the following important factors that could trigger an impairment review include the following:

poor economic performance relative to historical or projected future operating results;

significant negative industry, economic or company specific trends;

market and interest rate risk;

changes in the manner of our use of the assets or the plans for our business; and

loss of key personnel.

In addition, we perform a reconciliation of our market capitalization plus a reasonable control premium to the aggregated implied fair value of all of our reporting units.

If we were to determine that the fair value of a reporting unit was less than its carrying value, including goodwill, based upon the annual test or the existence of one or more of the above indicators of impairment, we would measure impairment based on a comparison of the implied fair value of reporting unit goodwill with the carrying amount of goodwill. The implied fair value of goodwill is determined by allocating the fair value of a reporting unit to its assets (recognized and unrecognized) and liabilities in a manner similar to a purchase price allocation. The residual fair value after this allocation is the implied fair value of the goodwill of the reporting unit. To the extent the carrying amount of reporting unit goodwill is greater than the implied fair value of reporting unit goodwill, we would record an impairment charge for the difference. Judgment is required in determining our reporting units and assessing fair value of the reporting units.

The impairment analysis of goodwill is based upon estimates and assumptions relating to our future revenue, cash flows, operating expenses, costs of capital and capital purchases. These estimates and assumptions are complex and subject to a significant degree of judgment with respect to certain factors including, but not limited to, the cash flows of our long-term operating plans, market and interest rate risk, and risk-commensurate discount rates and cost of capital.

Stock-Based Compensation. Stock-based compensation cost is estimated at the grant date based on the award s fair-value as calculated by the Black-Scholes option-pricing model and is recognized as expense over the requisite service period, which is the vesting period. The Black-Scholes model requires various assumptions including volatility in our common stock price and expected option life. If any of the assumptions used in the Black-Scholes model change significantly, stock-based compensation expense may differ materially in the future from the amounts recorded in our consolidated statements of operations. We are required to estimate forfeitures at the time of grant and revise those estimates in subsequent periods if actual forfeitures differ from those estimates. We use historical data to estimate pre-vesting option forfeitures and record stock-based compensation expense only for those awards that are expected to vest.

Noncontrolling Interests. We record noncontrolling interest expense (benefit) which reflects the portion of the earnings (losses) of majority-owned entities which are applicable to the noncontrolling interest partners in the consolidated statement of operations. Redeemable noncontrolling interests that are redeemable at either fair value or are based on a formula that is intended to approximate fair value follow our historical disclosure only policy for the redemption feature. Redeemable noncontrolling interests that are redeemable at either a fixed price or are based on a formula that is not akin to fair value are reflected as an adjustment to income attributable to common shareholders based on the difference between accretion as calculated using the terms of the redemption feature and the accretion entry for a hypothetical fair value redemption feature with the remaining amount of accretion to redemption value recorded directly to equity. Noncontrolling interest expense (benefit) is included within the consolidated statements of operations and comprehensive income (loss). We applied this accounting policy to the noncontrolling interest in Rhapsody that was held by MTVN for periods beginning when Rhapsody was formed in August 2007 through the quarter ended March 31, 2010. Due to the completion of the restructuring of Rhapsody on March 31, 2010 which resulted in us holding approximately 47.5% of the outstanding shares of capital stock of Rhapsody, this accounting policy will no longer apply with respect to our investment in Rhapsody as we no longer consolidate Rhapsody and no longer report a noncontrolling interest.

Accounting for Gains on Sale of Subsidiary Stock. Effective January 1, 2009, we adopted Statement of Financial Accounting Standards No. 160, *Noncontrolling Interests in Consolidated Financial Statements, an amendment to ARB No. 51 (*SFAS 160) which was primarily codified into FASB ASC 810 *Consolidation* (ASC 810). Current guidance requires the difference between the carrying amount of the parent s investment in a subsidiary and the underlying net book value of the subsidiary after the issuance of stock by the subsidiary to be recorded as equity transactions. We elected to recognize any such gain in our consolidated statement of operations prior to January 1, 2009 as was allowable under generally accepted accounting principles in place at that time if certain recognition criteria were met.

Accounting for Income Taxes. We compute income taxes using the asset and liability method, under which deferred income taxes are provided for temporary differences between financial reporting basis and tax basis of our assets and liabilities and operating loss and tax credit carryforwards. A valuation allowance is established when necessary to

reduce deferred tax assets to the amount expected to be realized. Deferred tax assets and liabilities and operating loss and tax credit carryforwards are measured using enacted

tax rates expected to apply to taxable income in the years in which those temporary differences and operating loss and tax credit carryforwards are expected to be recovered or settled.

Results of Operations

Revenue by Segment

Revenue by segment is as follows (dollars in thousands):

	Quarter Ended June 30,					Six Months Ended June 30,

Technology Products and Solutions. TPS license revenue is derived from the sales of Helix system software and related authoring and publishing tools, OEM licenses installed on mobile platforms, and messaging gateways. TPS service revenue is derived from the sale of support and maintenance services related to our Helix license sales, sale of products and SaaS offerings that enable communications businesses to distribute digital media content to PCs, mobile phones, and other non-PC devices. SaaS revenue comprises revenue from sales of ringback tones (RBT), music on demand (MOD), video on demand (VOD), and inter-carrier messaging services, primarily sold to wireless carriers.

Total TPS revenue declined $5.1 million, or 11%, in the quarter ended June 30, 2010, compared with the year-earlier period. This decline was primarily due to reduced service revenue from our SaaS offerings of approximately $3.2 million. The decline in SaaS revenue was due to several factors, including the merger of two mobile carriers, which resulted in lower pricing for our services, and the expiration of a contractual minimum guarantee. Also contributing to the decline was a reduction in sales of our professional services of approximately $2.2 million resulting from a one-time project in 2009 with one of our wireless carrier customers. No other single factor contributed materially to the change in total TPS revenue during the quarter ended June 30, 2010. TPS revenue as a

percentage of total revenue increased primarily as a result of the decrease in total net revenue due to the deconsolidation of Rhapsody, which is described in more detail in the section Revenue by Segment Music .

Total TPS revenue declined $6.8 million, or 8%, in the six months ended June 30, 2010, compared with the year-earlier period. This decline was primarily due to a one-time benefit of approximately $2.9 million recorded in the first quarter of 2009 from resolution of a dispute with a customer. Also contributing to the decline was a reduction in service revenue from our SaaS offerings of approximately $1.1 million and a reduction in sales of our professional services of approximately $3.0 million resulting from a one-time project in 2009 with one of our wireless carrier customers. No other single factor contributed materially to the change in total TPS revenue during the six months ended June 30, 2010. TPS revenue as a percentage of total revenue increased primarily as a result of the decrease in total net revenue due to the deconsolidation of Rhapsody, which is described in more detail in the section Revenue by Segment Music .

Media Software and Services. MSS license revenue primarily includes revenue from sales of RealPlayer Plus and related products. MSS service revenue primarily includes revenue from sales of our SuperPass premium subscription service, distribution of third-party software products, and all advertising other than that related directly to Games and former Music businesses. Beginning in the quarter ended June 30, 2010, MSS service revenue also includes sales of the RadioPass subscription service that we repurchased from Rhapsody in connection with the restructuring transactions that were completed on March 31, 2010.

Total MSS revenue increased $0.3 million, or 2%, during the quarter ended June 30, 2010, compared with the year-earlier period. The increase was primarily due to our repurchase of the international radio business that included the RadioPass subscription service from Rhapsody as part of the restructuring that occurred on March 31, 2010. We began recording the revenue associated with RadioPass in our MSS segment beginning in the quarter ended June 30, 2010. It was previously recorded as part of Rhapsody s results, which were reported in our Music segment. Sales of RadioPass contributed approximately $1.9 million of the total increase in MSS revenue during the quarter ended June 30, 2010. This increase was partially offset by a decrease in revenue from our SuperPass subscription service of approximately $1.2 million due primarily to a decrease in the number of subscribers and related revenue from the service. No other single factor contributed materially to the change during the quarter ended June 30, 2010. MSS revenue as a percentage of total revenue increased primarily as a result of the decrease in total net revenue due to deconsolidation of Rhapsody, which is described in more detail in the section Revenue by Segment Music .

Total MSS revenue increased $0.7 million, or 2%, during the six months ended June 30, 2010, compared with the year-earlier period. The increase was primarily due to our repurchase of the RadioPass product from Rhapsody, which contributed approximately $1.9 million of additional revenue during the six months ended June 30, 2010. Also contributing to the total increase in revenue was advertising and other revenue generated from the distribution of third-party products of approximately $1.9 million during the six months ended June 30, 2010. The increase was partially offset by a decline in revenue from our SuperPass subscription service of approximately $3.2 million due primarily to a decrease in the number of subscribers and related revenue from the service. No other single factor contributed materially to the change during the six months ended June 30, 2010. MSS revenue as a percentage of total revenue increased primarily as a result of the decrease in total net revenue due to deconsolidation of Rhapsody, which is described in more detail in the section Revenue by Segment Music .

Games. Games license revenue primarily includes revenue from the sale of individual games on our websites GameHouse.com and Zylom.com; the sale of games through syndication on partner sites; and sales of games through wireless carriers. Games service revenue primarily includes revenue from the sales of games subscription services and advertising through our games websites.

Total Games revenue decreased $1.6 million, or 5%, during the quarter ended June 30, 2010, compared with the year-earlier period. Prices for games declined largely due to competitive pressures, and as a result, total license revenue from the sale of games declined $3.0 million, or 23%, compared with the year-earlier period. Games revenue from advertising and other increased $0.9 million, or 15%. No other single factor contributed materially to the change in total Games revenue during the quarter ended June 30, 2010. Games revenue as a percentage of total revenue increased primarily as a result of the decrease in total net revenue due to the deconsolidation of Rhapsody, which is described in more detail in the section Revenue by Segment Music .

Total Games revenue decreased $4.2 million, or 7%, during the six months ended June 30, 2010, compared with the year-earlier period. Prices for games declined largely due to competitive pressures, and as a result, total license revenue from the sale of games declined $4.4 million, or 16%, compared with the year-earlier period. No other single factor contributed materially to the change in total Games revenue during the six months ended June 30, 2010. Games revenue as a percentage of total revenue increased primarily

as a result of the decrease in total net revenue due to deconsolidation of Rhapsody, which is described in more detail in the section Revenue by Segment Music .

Music. Prior to April 1, 2010, Music license revenue primarily included revenue from sales of digital music content through Rhapsody s MP3 music store and Music service revenue primarily included revenue from the Rhapsody and RadioPass subscription services, and advertising from Rhapsody s music websites.

On March 31, 2010, we completed the restructuring of Rhapsody, which resulted in our ownership decreasing to approximately 47.5% of Rhapsody s outstanding equity and the loss of operating control over Rhapsody. Since the restructuring was completed on the last day of the quarter ended March 31, 2010, our revenue for the first quarter includes results from Rhapsody s operations. Beginning with the quarter ended June 30, 2010, Rhapsody s revenue and other operating results are no longer consolidated within our financial statements and we are not recording any operating or other financial results for our Music segment. We now report our share of Rhapsody s income or losses as Equity in net loss of Rhapsody and other equity-method investments in Other income.

Geographic Revenue

Revenue by geographic region is as follows (dollars in thousands):

	Quarters Ended June 30,			Six Months Ended June 30,		
	2010	**Change**	**2009**	**2010**	**Change**	**2009**
United States	$ 48,351	(47)%	$ 90,685	$ 132,901	(29)%	$ 187,351
Europe	19,316	(18)	23,469	41,798	(9)	46,134
Rest of the world	21,217	(2)	21,571	42,785	(1)	43,013
Total net revenue	$ 88,884	(35)%	$ 135,725	$ 217,484	(21)%	$ 276,498

Revenue in the U.S. declined $42.3 million, or 47%, for the quarter ended June 30, 2010, compared with the year-earlier period. During the six months ended June 30, 2010, revenue in the U.S. declined $54.5 million, or 29%, compared with the year-earlier period. The decreases resulted primarily from the loss of revenue from the deconsolidation of Rhapsody, which generated its revenue primarily in the United States. Also contributing to the decline were reductions in revenue generated from our SuperPass subscription service, our SaaS offerings and sales of our games of approximately $2.9 million, $6.0 million and $2.5 million, respectively, for the six month period ended June 30, 2010. See the section Revenue by Segment above for further discussion of these changes.

Revenue in Europe decreased $4.2 million, or 18%, in the quarter ended June 30, 2010, compared with the year-earlier period. During the six months ended June 30, 2010, revenue in Europe decreased $4.3 million, or 9%, compared with the year-earlier period. These decreases were due primarily to a decline in revenue in our TPS segment derived from minimum revenue guarantees associated with a customer contract of approximately of $1.4 million and $3.5 million for the quarter and six months ended June 30, 2010, respectively. A decline in the sales of games licenses also contributed $1.4 and $1.3 million to the decline for the quarter and six months ended June 30, 2010, respectively. See the sections Revenue by Segment -Technology Products and Solutions and Revenue by Segment - Games above for further discussion of these changes.

Revenue in the rest of world decreased $0.4 million, or 2%, in the quarter ended June 30, 2010, compared with the year-earlier period. During the six months ended June 30, 2010, revenue in rest of world decreased $0.2 million, or 1%, compared with the year-earlier period. The decline during the six months ended June 30, 2010, was primarily due to a one-time benefit recorded in the first quarter of 2009 from resolution of a dispute with a customer of approximately $2.9 million. This decrease was partially offset by an increase in royalties received from sales of our Helix system software of approximately $3.2 million. No other factor contributed materially to the change during the periods. See the section Revenue by Segment -Technology Products and Solutions above for further discussion of these changes.

Cost of Revenue by Segment

Cost of revenue by segment is as follows (dollars in thousands):

	Quarter Ended June 30,					Six Months Ended June 30,				
	2010	% of Segment Revenue	2009	% of Segment Revenue	Change	2010	% of Segment Revenue	2009	% of Segment Revenue	Change

Service	23,481		45,745		(49)	65,091		92,520		(30)
Total cost of revenue	$ 29,149	33%	$ 55,614	41%	(48)%	$ 78,308	36%	$ 111,635	40%	(30)%

Cost of Technology Products and Solutions. Cost of TPS license revenue includes amounts paid for licensed technology and costs of product media. Cost of TPS service revenue includes fees paid to mobile service carriers and third-party vendors for order fulfillment, cost of personnel providing support and consulting services, and expenses incurred in providing our SaaS hosting services.

Cost of TPS revenue declined $1.8 million, or 9%, for the quarter ended June 30, 2010, compared with the year-earlier period. Cost of TPS revenue declined $1.5 million, or 4%, for the six months ended June 30, 2010,

compared with the year-earlier period. Materially all of the decline in both periods was due to a decrease in the costs associated with providing professional services to wireless carriers as a result of the decrease in the related revenue during the quarter and six months ended June 30, 2010.

Cost of Media Software and Services Revenue. Cost of MSS license revenue consists primarily of amounts paid for licensed technology and fees paid to third-party vendors. Cost of MSS service revenue consists primarily of cost of royalties and delivery of content included in our SuperPass subscription service offerings, and fees paid to third-party vendors for support services. Beginning in the quarter ended June 30, 2010, MSS cost of service revenue also includes costs from the RadioPass subscription services that we repurchased from Rhapsody in connection with the restructuring transactions that were completed on March 31, 2010.

Cost of MSS revenue increased $1.7 million, or 64%, for the quarter ended June 30, 2010, compared with the year-earlier period. Cost of MSS revenue increased $0.7 million, or 11%, for the six months ended June 30, 2010, compared with the year-earlier period. The increase in both periods was due primarily to the one-time recognition of costs paid for the rights to use certain technologies within our RealPlayer software in the amount of $1.5 million for the quarter and six months ended June 30, 2010. Cost of MSS revenue as a percentage of MSS revenue for the quarter and six month periods ended June 30, 2010, increased primarily as a result of the one-time rights payment mentioned above.

Cost of Games Revenue. Cost of Games license revenue consists primarily of royalties paid on sales of games. Cost of Games service revenue consists primarily of costs incurred to provide our subscription service offerings and fees paid to third-party vendors for support services.

Cost of Games revenue decreased $1.4 million, or 16%, during the quarter ended June 30, 2010, compared with the year-earlier period. Cost of Games revenue decreased $2.2 million, or 13%, during the six months ended June 30, 2010, compared with the year-earlier period. A reduction in royalty costs in proportion to license revenue accounted for substantially all of the decline in cost of Games revenue during the period.

Cost of Music Revenue. Prior to April 1, 2010, cost of Music license revenue consisted primarily of cost of royalties paid on sales of music tracks and hardware devices and accessories, and cost of Music service revenue consisted primarily of cost of content and delivery of the content included in our music subscription service offerings and fees paid to third-party vendors for support services.

On March 31, 2010, we completed the restructuring of Rhapsody, which resulted in our ownership decreasing to approximately 47.5% of Rhapsody s outstanding equity and the loss of operating control over Rhapsody. Because the restructuring was completed on the last day of the quarter ended March 31, 2010, our cost of revenue for the first quarter includes results from Rhapsody s operations. Beginning with the quarter ended June 30, 2010, Rhapsody s cost of revenue and other operating results are no longer consolidated within our financial statements and we are not recording any operating or other financial results for our Music segment. We now report our share of Rhapsody s income or losses as Equity in net loss of Rhapsody and other equity method investments in Other income.

Operating Expenses

Research and Development

Research and development expenses consist primarily of salaries and related personnel costs, expense associated with stock-based compensation, and consulting fees associated with product development. To date, all research and development costs have been expensed as incurred because technological feasibility for software products is generally not established until substantially all development is complete. Research and developments costs and changes are as follows (dollars in thousands):

	Quarters Ended June 30,			Six Months Ended June 30,		
	2010	Change	2009	2010	Change	2009
Research and development	$ 27,583	(5)%	$ 28,923	$ 62,258	8%	$ 57,482
As a percentage of total net revenue	31%		21%	29%		21%

Research and development expenses, including non-cash stock-based compensation, decreased $1.3 million in the quarter ended June 30, 2010 compared with the year-earlier period. This decrease was primarily due to the removal of Rhapsody s operating expenses from our consolidated financial results, which represented approximately $2.3 million of the total decrease. Partially offsetting this decrease was an increase in research and development expenses of an additional $1.1 million for the acceleration of depreciation expense related to our Games information technology platform. No other single factor contributed materially to these changes during the period. The increase in research and development expenses as a percentage of total net revenue is due primarily to our continued investment in the development of our products despite a decline in total net revenue.

Research and development expenses, including non-cash stock-based compensation, increased $4.8 million, or 8%, in the six months ended June 30, 2010 compared with the year-earlier period. This increase was primarily due to an increase in research and development personnel and related costs of approximately $2.7 million as a result of an increase in average headcount working on new initiatives, as well as an additional $2.6 million for the acceleration of depreciation expense related to our Games information technology platform. The increase was partially offset by a decrease due to the removal of Rhapsody s operating expenses from our consolidated financial results, since beginning April 1, 2010, Rhapsody s results are no longer consolidated. Research and development expenses directly related to our Rhapsody joint venture in the six months ended June 30, 2010, were $2.5 million compared with $5.0 million in the year-earlier period. No other single factor contributed materially to these changes during the period. The increase in research and development expenses as a percentage of total net revenue is due primarily to our decision to continue to invest in the development of our products despite a decline in total net revenue.

Sales and Marketing

Sales and marketing expenses consist primarily of salaries and related personnel costs, sales commissions, amortization of certain intangible assets capitalized in our acquisitions, credit card fees, subscriber acquisition costs, consulting fees, trade show expenses, advertising costs and costs of marketing collateral. Sales and marketing costs and changes are as follows (dollars in thousands):

	Quarters Ended June 30,			Six Months Ended June 30,		
	2010	**Change**	**2009**	**2010**	**Change**	**2009**
Sales and marketing	$ 27,382	(35)%	$ 42,273	$ 65,209	(24)%	$ 85,958
As a percentage of total net revenue	31%		31%	30%		31%

Sales and marketing expenses, including non-cash stock-based compensation, decreased $14.9 million, or 35%, in the quarter ended June 30, 2010 compared with the year-earlier period. The removal of Rhapsody s operating expenses from our consolidated financial results represented approximately $8.5 million of the decrease. Also contributing to the decline were savings from our continued cost reduction efforts including a decrease in sales and marketing headcount and marketing services expenses of approximately $2.6 million and $0.6 million, respectively. No other single factor contributed materially to these changes during the period.

Sales and marketing expenses, including non-cash stock-based compensation, decreased $20.7 million, or 24%, in the six months ended June 30, 2010 compared with the year-earlier period. The decrease was primarily a result of the removal of Rhapsody s operating expenses from our consolidated financial results, since beginning April, 1, 2010, Rhapsody s results are no longer consolidated. Sales and Marketing expenses directly related to our Rhapsody joint venture in the six months ended June 30, 2010, were $6.3 million compared with $17.4 million in the year-earlier period. Also contributing to the decline were savings from our continued cost reduction efforts including a decrease in sales and marketing headcount and marketing services expenses of approximately $3.5 million and $2.5 million, respectively. No other single factor contributed materially to these changes during the period.

Advertising with Related Party

On August 20, 2007, RealNetworks and MTVN formed the Rhapsody joint venture. Under the original joint venture agreement, as amended, Rhapsody was obligated to purchase $213.8 million in advertising and related integrated marketing on MTVN cable channels over the term of the agreement. On March 31, 2010, the restructuring transactions involving Rhapsody were completed. As part of the restructuring, MTVN contributed a $33 million advertising commitment and MTVN s previous advertising obligation was cancelled. For periods after March 31, 2010, we no longer consolidate Rhapsody s results, and therefore incurred no advertising with related parties for the quarter ended June 30, 2010. Prior to the restructuring and during the quarter ended March 31, 2010, Rhapsody spent $1.1 million in advertising with MTVN. During the quarter and six months ended June 30, 2009, Rhapsody spent $6.9 million and $14.3 million, respectively, in advertising with MTVN.

General and Administrative

General and administrative expenses consist primarily of salaries and related personnel costs, fees for professional and temporary services and contractor costs, stock-based compensation, and other general corporate costs. General and administrative costs and changes are as follows (dollars in thousands):

	Quarters Ended June 30,			Six Months Ended June 30,		
	2010	**Change**	**2009**	**2010**	**Change**	**2009**
General and administrative	$ 14,590	(25)%	$ 19,338	$ 29,511	(30)%	$ 42,169
As a percentage of total net revenue	16%		14%	14%		15%

General and administrative expenses, including non-cash stock-based compensation, decreased $4.7 million, or 25%, in the quarter ended June 30, 2010 compared with the year-earlier period. The decrease was due primarily to a reduction in legal and other professional services expenses of approximately $2.4 million in the quarter ended June 30, 2010, compared with the year-earlier period. A majority of the decrease in legal and professional fees was a result of the expenses recorded in 2009 related to the VeriSign arbitration and RealDVD lawsuit that have since concluded. A reduction in personnel and related costs and the removal of Rhapsody s operating expenses from our consolidated financial results also contributed approximately $1.5 million and $1.0 million, respectively, to the overall decrease in general and administrative expenses during the period. No other single factor contributed materially to the decreases during the periods. The decrease in general and administrative expenses as a percentage of total net revenue is due primarily to the reductions in personnel and related costs in 2010 as described above.

General and administrative expenses, including non-cash stock-based compensation, decreased $12.7 million, or 30%, in the six months ended June 30, 2010 compared with the year-earlier period. The decrease was due primarily to a reduction in legal and other professional services expenses of approximately $7.2 million in the six months ended June 30, 2010, compared with the year-earlier period. A majority of the decrease in legal and professional fees was a

result of the expenses recorded in 2009 related to the VeriSign arbitration and RealDVD lawsuit that have since concluded.

A reduction in personnel and related costs also contributed approximately $2.5 million to the overall decrease in general and administrative expenses during the period. Further contributing to the decrease was the removal of Rhapsody s operating expenses from our consolidated financial results, since beginning April 1, 2010, Rhapsody s results are no longer consolidated. General and Administrative expenses directly related to our Rhapsody joint venture in the six months ended June 30, 2010, were $0.4 million compared with $2.2 million in the year-earlier period. No other single factor contributed materially to the decreases during the periods. The decrease in general and administrative expenses as a percentage of total net revenue is due primarily to reduced legal expenses as well as the reductions in personnel and related costs in 2010 as described above.

Restructuring and Other Charges

Restructuring and other charges consist of costs associated with the realignment and reorganization of our operations and primarily include separation costs for employees, including severance, and other benefit costs as well as the impairment of certain long-lived assets. During the quarter and six months ended June 30, 2010, we recorded $4.8 million and $10.4 million, respectively, in restructuring charges as part of our strategy to simplify and restructure our business. No such charges were incurred during the quarter ended June 30, 2009. During the six months ended June 30, 2009, we recorded approximately $0.8 million in restructuring charges.

Loss on excess office facilities

As part of our efforts to reorganize our business and operational structure, including the recent restructuring of Rhapsody, we reduced the use of our current office space in our headquarters in Seattle, as well as other offices in Europe. For the quarter and six months ended June 30, 2010, the estimated loss on excess office facilities including the write-down of leasehold improvements was approximately $7.1 million. Our estimates are based upon many factors including projections of sublease rates and the time period required to locate tenants. Although we believe our estimates are reasonable, additional adjustments may result if our actual experience differs from our projections.

Impairment of Goodwill

Goodwill is required to be tested for impairment annually and if an event or conditions change that would more likely than not reduce the fair value of a reporting unit below its carrying value. We perform our annual goodwill impairment test during our fiscal fourth quarter.

A two step process is used to test for goodwill impairment. The first step is to determine if there is an indication of impairment by comparing the estimated fair value of each reporting unit to its carrying value including existing goodwill. Goodwill is considered impaired if the carrying value of a reporting unit exceeds the estimated fair value. Upon an indication of impairment from the first step, a second step is performed to determine the amount of the impairment. This involves calculating the implied fair value of goodwill by allocating the fair value of the reporting unit to all assets and liabilities other than goodwill and comparing it to the carrying amount of goodwill. In 2009, and through the quarter ended March 31, 2010, we had four reporting units; TPS, MSS, Games, and Music.

We determined that a triggering event had occurred during the quarter ended June 30, 2009, warranting an interim impairment analysis of goodwill. During the impairment analysis, we concluded that the implied fair value of goodwill was zero for each of our reporting units. As a result, the TPS, MSS, Games, and Music reporting units recorded impairments of $50.5 million, $46.8 million, $41.2 million and $37.0 million, respectively, during the quarter ended June 30, 2009. No other impairments of goodwill were recorded in 2009 and no such impairments were recognized in either the quarter or six months ended June 30, 2010, as the zero balance for goodwill precludes any impairment.

Other Income (Expenses), Net

Other income, net consists primarily of: interest income on our cash, cash equivalents, and short-term investments, which are net of interest expense from amortization of offering costs related to our convertible debt and equity in net loss of investments. Other income, net and quarter-over-quarter changes are as follows (dollars in thousands):

	Quarters Ended June 30,			Six Months Ended June 30,		
	2010	Change	2009	2010	Change	2009
Interest income, net	$ 551	(27)%	$ 754	$ 931	(52)%	$ 1,937
Equity in net loss of Rhapsody and other investments	(5,427)	n/m	(269)	(5,427)	n/m	(924)
Gain on sale of equity investments, net	(50)	n/m	68	(50)	n/m	205
Gain on deconsolidation of Rhapsody		n/a		10,929	n/a	
Other income, net	994	n/m	(449)	1,093	n/m	406
Other income, net	$ (3,932)	n/m%	$ 104	$ 7,476	n/m%	$ 1,624

Other income (expense), net decreased during the quarter ended June 30, 2010, due primarily to the loss recorded from our investment in Rhapsody and other investments. Other income (expense), net increased during the six months ended June 30, 2010, due primarily to the gain recognized on the deconsolidation of Rhapsody. See Note 4 Rhapsody Joint Venture to the Condensed Consolidated Financial Statements included within Part I, Item 1 of this report.

Income Taxes

During the quarters ended June 30, 2010 and 2009, we recognized income tax expense of $0.3 million and $1.2 million, respectively, related to U.S. and foreign income taxes. The decrease in income tax expense and the change in income tax expense as a percentage of pre-tax loss during the quarter ended June 30, 2010, was largely the result of a change in our jurisdictional income mix. During the six months ended June 30, 2010 and 2009, we recognized income tax benefit of $3.3 million and income tax expense of $2.8 million, respectively, related to U.S. and foreign income taxes. The decrease in income tax expense and the change in income tax expense as a percentage of pre-tax loss was largely the result of the restructuring of Rhapsody and partial release of valuation allowance on international net operating losses, which occurred in the quarter ended March 31, 2010.

As of June 30, 2010, there have been no material changes to our uncertain tax positions disclosures as provided in Note 15 to our audited financial statements included in our Annual Report on Form 10-K for the year ended December 31, 2010. We filed formal and informal refund claims with the Internal Revenue Service (IRS) in 2009 for the years 2001-2007, primarily related to Extraterritorial Income Exclusion and previously acquired net operating losses. In April 2010, we agreed to significant adjustments proposed by the IRS related to the formal and informal refund claims. Therefore, we believe it is reasonably possible that the total unrecognized tax benefits will be significantly reduced within the next twelve months. However, we do not believe that an estimate of the range of the reduction can be made at present.

We file numerous consolidated and separate income tax returns in the United States federal, as well as state, local, and foreign jurisdictions. With few exceptions, we are no longer subject to United States federal, state, local, or foreign income tax examinations for years before 1993. We are currently under United States federal audit for the consolidated group RealNetworks, Inc. and Subsidiaries for the years ended December 31, 2005, 2006 and 2007. RealNetworks, Inc. and /or subsidiaries are also under audit by the various states and foreign jurisdictions for certain tax years subsequent to 1993.

New Accounting Pronouncements

See Note 2 Recent Accounting Pronouncements to Condensed Consolidated Financial Statements included in Part I, Item 1 of this report for information regarding new accounting pronouncements.

Liquidity and Capital Resources

The following summarizes working capital, cash, cash equivalents, short-term investments, and restricted cash (in thousands):

	June 30, 2010	December 31, 2009
Working capital	$ 253,423	$ 278,198
Cash, cash equivalents, and short-term investments	313,220	384,900
Restricted cash	10,000	13,700

Cash, cash equivalents, and short-term investments decreased from December 31, 2009, primarily due to $18.0 million in cash paid to Rhapsody in connection with the restructuring of our investment, $30.4 million in cash used to pay Rhapsody-related payables,

capital expenditures of $9.5 million, and payment of the settlement obligation and related legal expenses of $5.5 million relating to the RealDVD litigation that was accrued in the quarter ended December 31, 2009.

The following summarizes cash flows (in thousands):

	Six Months Ended June 30,	
	2010	2009
Cash used in operating activities	$ (56,336)	$ (18,241)
Cash used in investing activities	(67,133)	(39,916)
Cash provided by financing activities	2,503	20,365

Cash used in operating activities consisted of net loss adjusted for certain non-cash items including depreciation, amortization, stock-based compensation, deferred income taxes, gain on the deconsolidation of the Rhapsody joint venture, and the effect of changes in certain operating assets and liabilities, net of acquisitions and disposals.

Cash used in operating activities in the six months ended June 30, 2010, was $56.3 million and consisted of net loss of $25.6 million, adjustments for cash provided by non-cash items of $23.7 million and cash used in activities related to changes in certain operating assets and liabilities, net of acquisitions and disposals, of $54.4 million. Adjustments for cash provided by non-cash items primarily consisted of $14.0 million of depreciation and amortization expense, $6.7 million of stock-based compensation, $6.5 million of accrued loss on excess office facilities, $5.4 million of equity in the net loss of Rhapsody and other equity investments, and $3.6 million for amounts accrued relating to restructuring expenses incurred during the quarter, partially offset by $10.9 million of gain related to the deconsolidation of the Rhapsody joint venture.

Changes in certain operating assets and liabilities, net of acquisitions, in the six months ended June 30, 2010 primarily consisted of uses of cash from the decrease in accrued and other liabilities of $52.3 million. These decreases were related to reductions in accrued royalties and other fulfillment costs as well as a reduction in amounts payable to MTVN for related party advertising incurred during the quarter ended March 31, 2010 as compared to the quarter ended December 31, 2009. Also contributing to the decline was the payment of the legal settlement and related legal expenses attributable to the RealDVD litigation of $5.5 million that was accrued for in the quarter ended December 31, 2009.

Cash used in operating activities in the six months ended June 30, 2009 was $18.2 million and consisted of a net loss of $212.5 million, adjustments for cash provided by non-cash items of $196.3 million and cash used in activities related to changes in certain operating assets and liabilities, net of acquisitions, of $2.0 million. Adjustments for cash provided by non-cash items primarily consisted of $175.6 million of impairments of goodwill, $15.5 million of depreciation and amortization expense and $10.8 million of stock-based compensation, partially offset by $3.7 million for payments made related to our restructuring and other impairments, which were accrued for in the fourth quarter of 2008.

Changes in certain operating assets and liabilities, net of acquisitions, in the six months ended June 30, 2009 primarily consisted of a decrease in accounts payable of $2.0 million related to the timing of payments made to certain third party content providers, as well as a decrease in accrued and other liabilities of $5.4 million related to a reduction in amounts payable to MTVN for related party advertising incurred during the quarter ended June 30, 2009 as compared to the quarter ended December 31, 2008. These decreases were partially offset by a decrease in accounts receivable of $5.7 million related to the timing of customer collections.

In the six months ended June 30, 2010, investing activities used cash primarily for payments made in connection with the restructuring of Rhapsody of $18.0 million as well as purchases of equipment, software, and leasehold improvements of $9.5 million. These uses of cash were partially offset by the repayment of temporary funding upon the deconsolidation of Rhapsody of approximately $5.9 million. Purchases, net of sales and maturities, of short-term investments used cash of $49.2 million during 2010. In the six months ended June 30, 2009, investing activities used cash primarily for purchases of equipment, software, and leasehold improvements of $7.6 million and acquisition costs of $3.2 million, from the last payment of accrued anniversary and performance payments relating to the acquisition of Zylom. Purchases, net of sales and maturities of short-term investments used cash of $27.5 million

during 2009.

Financing activities provided cash from the proceeds of sales of common stock under employee stock purchase plans and the exercise of stock options of $1.3 million as well as payments received from the MTVN marketing note for our Rhapsody joint venture

of $1.2 million in 2010 and $14.5 million in 2009. We also received an additional $5.0 million from MTVN as a capital contribution to our Rhapsody joint venture.

We currently have no planned significant capital expenditures for 2010 other than those in the ordinary course of business. In the future, we may seek to raise additional funds through public or private equity financing, or through other sources such as credit facilities. The sale of additional equity securities could result in dilution to our shareholders. In addition, in the future, we may enter into cash or stock acquisition transactions or other strategic transactions that could reduce cash available to fund our operations or result in dilution to shareholders.

A continued downturn in the economy could result in lower interest income in future periods due to a continued decline in interest rates. There also continues to be an elevated risk that we may not be able to access cash balances held in U.S. or foreign financial institutions or that deposits held in financial institutions may be rendered worthless due to the nationalization or failure of such financial institutions, or that severe market conditions return causing an increased inability to sell the securities and the institutional money market funds we hold as short-term investments. These risks and the potential impact of these risks on our financial condition and results of operations are discussed further below in Risk Factors Risks Related to Our Business in General. If any of these risks are realized, we may experience a material adverse impact on our financial condition and results of operations in future periods.

Our contractual obligations include office leases and contractual payments due to content and other service providers. We believe that our current cash, cash equivalents, and short-term investments will be sufficient to meet our anticipated cash needs for working capital and capital expenditures for at least the next 12 months.

We do not hold derivative financial instruments or equity securities in our short-term investment portfolio. Our cash equivalents and short-term investments consist of high quality securities, as specified in our investment policy guidelines. The policy limits the amount of credit exposure to any one non-U.S. Government or non-U.S. Agency issue or issuer to a maximum of 5% of the total portfolio. These securities are subject to interest rate risk and will decrease in value if interest rates increase. Because we have historically had the ability to hold our fixed income investments until maturity, we do not expect our operating results or cash flows to be significantly affected by a sudden change in market interest rates in our securities portfolio.

We conduct our operations primarily in five functional currencies: the U.S. dollar, the Korean won, the Japanese yen, the British pound and the Euro. Historically, neither fluctuations in foreign exchange rates nor changes in foreign economic conditions have had a significant impact on our financial condition or results of operations. We currently do not hedge the majority of our foreign currency exposures and are therefore subject to the risk of exchange rate fluctuations. We invoice our international customers primarily in U.S. dollars, except in Korea, Japan, Germany, France, the United Kingdom and Australia, where we invoice our customers primarily in won, yen, euros, pounds, and Australian dollars, respectively. We are exposed to foreign exchange rate fluctuations as the financial results of foreign subsidiaries are translated into U.S. dollars in consolidation. Our exposure to foreign exchange rate fluctuations also arises from intercompany payables and receivables to and from our foreign subsidiaries.

Off-Balance Sheet Arrangements

Our only significant off-balance sheet arrangements relate to operating lease obligations for office facility leases and other contractual obligations related primarily to minimum contractual payments due to content and other service providers.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

The following discussion about our market risk involves forward-looking statements. All statements that do not relate to matters of historical fact should be considered forward-looking statements. Actual results could differ materially from those projected in any forward-looking statements.

Interest Rate Risk. Our exposure to interest rate risk from changes in market interest rates relates primarily to our short-term investment portfolio. We do not hold derivative financial instruments or equity investments in our short-term investment portfolio. Our short-term investments consist of high quality debt securities as specified in our investment policy. Investments in both fixed and floating rate instruments carry a degree of interest rate risk. The fair value of fixed rate securities may be adversely impacted due to a rise in interest rates, while floating rate securities may produce less income than expected if interest rates fall. Additionally, a declining rate environment creates reinvestment risk because as securities mature the proceeds are reinvested at a lower rate,

generating less interest income. Due in part to these factors, our future interest income may be adversely impacted due to changes in interest rates. In addition, we may incur losses in principal if we are forced to sell securities that have declined in market value due to changes in interest rates. Because we have historically had the ability to hold our short-term investments until maturity and the substantial portion of our short-term investments mature within one year of purchase, we would not expect our operating results or cash flows to be significantly impacted by a sudden change in market interest rates. There have been no material changes in our investment methodology regarding our cash equivalents and short-term investments during the quarter ended June 30, 2010. Based on our cash, cash equivalents, short-term investments, and restricted cash equivalents at June 30, 2010, a hypothetical 10% increase/decrease in interest rates would increase/decrease our annual interest income and cash flows by approximately $0.1 million.

Investment Risk. As of June 30, 2010, we had investments in voting capital stock of both publicly traded and privately-held technology companies for business and strategic purposes. Our investments in publicly traded companies are accounted for as available-for-sale, carried at current market value and are classified as long-term as they are strategic in nature. We periodically evaluate whether any declines in fair value of our investments are other-than-temporary based on a review of qualitative and quantitative factors. For investments with publicly quoted market prices, these factors include the time period and extent by which its accounting basis exceeds its quoted market price. We consider additional factors to determine whether declines in fair value are other-than-temporary, such as the investee s financial condition, results of operations, and operating trends. The evaluation also considers publicly available information regarding the investee companies. For investments in private companies with no quoted market price, we consider similar qualitative and quantitative factors as well as the implied value from any recent rounds of financing completed by the investee. Based upon an evaluation of the facts and circumstances during the quarters ended June 30, 2010 and 2009, we determined that no additional other-than-temporary decline in fair value had occurred and therefore no impairment charges were recorded.

Foreign Currency Risk. We conduct business internationally in several currencies. As such, we are exposed to adverse movements in foreign currency exchange rates.

Our exposure to foreign exchange rate fluctuations arise in part from: (1) translation of the financial results of foreign subsidiaries into U.S. dollars in consolidation; (2) the remeasurement of non-functional currency assets, liabilities and intercompany balances into U.S. dollars for financial reporting purposes; and (3) non-U.S. dollar denominated sales to foreign customers. A portion of these risks is managed through the use of financial derivatives, but fluctuations could impact our results of operations and financial position.

Generally, our practice is to manage foreign currency risk for the majority of material short-term intercompany balances through the use of foreign currency forward contracts. These contracts require us to exchange currencies at rates agreed upon at the contract s inception. Because the impact of movements in currency exchange rates on forward contracts offsets the related impact on the short-term intercompany balances, these financial instruments help alleviate the risk that might otherwise result from certain changes in currency exchange rates. We do not designate our foreign exchange forward contracts related to short-term intercompany accounts as hedges and, accordingly, we adjust these instruments to fair value through results of operations. However, we may periodically hedge a portion of our foreign exchange exposures associated with material firmly committed transactions, long-term investments, highly predictable anticipated exposures and net investments in foreign subsidiaries. Some of our unhedged exposures are reconciled through our statement of operations on a mark-to-market basis each quarter, so to the extent we continue to experience adverse economic conditions, we may record losses related to such unhedged exposures in future periods that may have a material adverse effect on our financial condition and results of operations.

Our foreign currency risk management program reduces, but does not entirely eliminate, the impact of currency exchange rate movements.

Foreign currency transaction gains and losses were not material for the quarters or six months ended June 30, 2010 and 2009.

Item 4. Controls and Procedures

(a) *Evaluation of Disclosure Controls and Procedures.* Based on an evaluation as of the end of the period covered by this report, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as

amended (the Exchange Act)) were effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act (1) is recorded, processed, summarized and reported within the time periods specified in Securities and Exchange Commission rules and forms, and (2) is

accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate to allow timely decisions regarding required disclosure.

(b) *Changes in Internal Controls.* There have not been any changes in our internal control over financial reporting (as such term is defined in Rule 13a-15(f) and 15d-15(f) under the Exchange Act) during the quarter ended June 30, 2010 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

See Note 14 Commitment and Contingencies to Condensed Consolidated Financial Statements included in Part I, Item 1 of this report for information regarding legal proceedings.

Item 1A. Risk Factors

You should carefully consider the risks described below together with all of the other information included in this quarterly report on Form 10-Q. The risks and uncertainties described below are not the only ones facing our company. If any of the following risks actually occurs, our business, financial condition or operating results could be harmed. In such case, the trading price of our common stock could decline, and investors in our common stock could lose all or part of their investment.

Risks Related to Our Technology Products and Solutions Business

Contracts with our carrier customers subject us to significant risks that could negatively impact our revenue or otherwise harm our operating results.

We derive a material portion of our revenue from our SaaS offerings we provide to carriers. Many of our SaaS contracts with carriers provide for revenue sharing arrangements, but we have little control over the pricing decisions of our carrier customers. Furthermore, most of these contracts do not provide for guaranteed minimum payments or usage levels. Because most of our carrier customer contracts are nonexclusive, it is possible that our wireless carriers could purchase similar services from third parties and cease to use our services in the future. As a result, our revenue derived under these agreements could be substantially reduced depending on the pricing and usage decisions of our carrier customers.

In addition, none of our SaaS contracts with carriers obligates our carrier customers to market or distribute any of our SaaS offerings. Despite the lack of marketing commitments, revenue related to our SaaS offerings is, to a large extent, dependent upon the marketing and promotion activities of our carrier customers. In addition, many of our carrier contracts are short term and allow for early termination by the carrier with or without cause. These contracts are therefore subject to renegotiation of pricing or other key terms that could be adverse to our interests and leave us vulnerable to non-renewal by the carriers. The loss of carrier customers, a reduction in marketing or promotion of our SaaS offerings, or the termination, non-renewal or renegotiation of contract terms that are less favorable to us would likely result in the loss of future revenues from our SaaS offerings.

Finally, certain of our carrier contracts obligate us to indemnify the carrier customer for certain liabilities and losses incurred by them, including liabilities resulting from third party claims for damages that arise out of the use of our technology. These indemnification terms provide us with certain procedural safeguards, including the right to control the defense of the indemnified party. We have accepted tenders of indemnification from two of our carrier customers related to one pending patent infringement proceeding, and we are vigorously defending them. This pending proceeding or future claims against which we may be obligated to defend our carrier customers could result in paying amounts pursuant to these obligations that could materially harm our operating results.

The mobile entertainment market is evolving rapidly and highly competitive.

The market for mobile entertainment services, including RBT, MOD and VOD solutions, is highly competitive and evolving rapidly, particularly with the growth in the use of smartphones. Increased use of smartphones has resulted in a proliferation of applications and services that compete with our SaaS services and, in many cases, are not dependent upon our carrier customers to

make them available to subscribers. To maintain or enhance our competitive position, we may need to develop new SaaS services that enable our carrier customers to compete with the broad range of applications and other services available in the market. We face competition, and may face future competition, from major media companies, Internet portal companies, content aggregators, wireless software providers and other pure-play wireless entertainment publishers, some of which have greater financial resources than we do. In addition, the major music labels may demand more aggressive revenue sharing arrangements or impose an alternative business model less favorable to us. Furthermore, while most of our carrier customers do not offer internally developed services that compete with ours, if our carrier customers begin developing these services internally, we could be forced to lower our prices or increase the amount of service we provide in order to maintain our business with those carrier customers. Increased competition has in the past resulted in pricing pressure, forcing us to lower the selling price of our services. If we are unable to develop or provide services that compete effectively in the mobile entertainment market, our operating results and financial condition may be materially harmed.

A majority of the revenue that we generate in our Technology Products and Solutions business is dependent upon our relationship with a few customers, including SK Telecom and Verizon; any deterioration of these relationships could materially harm our business.

We generate a significant portion of our revenue from sales of our mobile entertainment services to a few of our mobile carrier customers, including SK Telecom, a leading wireless carrier in South Korea. In the near term, we expect that we will continue to generate a significant portion of our total revenue from these customers, particularly SK Telecom and Verizon. If these customers fail to market or distribute our services or terminate their business contracts with us, or if our relationships with these customers deteriorate in any significant way, we may be unable to replace the affected business arrangements with acceptable alternatives. Furthermore, our relationship with SK Telecom may be affected by the general state of the economy of South Korea. Failure to maintain our relationships with these customers could have a material negative impact on our revenue and operating results.

Risks Related to Our Media Software and Services and Games Businesses

Our Media Software and Services and Games businesses face substantial competitive and other challenges that may prevent us from being successful in, and negatively impact future growth in, those businesses.

Many of our current and potential competitors in our Media Software and Services and Games businesses have longer operating histories, greater name recognition, more employees and significantly greater resources than we do. Our competitors across the breadth of our product lines in these businesses include a number of large and powerful companies, such as Apple, Amazon.com and Microsoft. To effectively compete in the markets for our Media Software and Services and Games businesses, we may experience the following consequences, any of which would adversely affect our operating results and the trading price of our stock:

- reduced prices or margins,
- loss of current and potential customers, or partners and potential partners who provide content we distribute to our customers,
- changes to our products, services, technologies, licenses or business practices or strategies,
- lengthened sales cycles,
- industry-wide changes in content distributions to customers,
- pressure to prematurely release products or product enhancements, or
- degradation in our stature and reputation in the market.

In addition, we face the following competitive risks relating to our Media Software and Services and Games businesses:

Media Software and Services. Our media software and services face competition from existing competitive alternatives and other emerging services and technologies. Our SuperPass subscription service faces competition from a broad variety of entertainment sources, including traditional media outlets and emerging Internet media sources. We expect this competition to continue to be intense as the market and business models for Internet video content mature and more competitors enter these new markets. Competing

services may be able to obtain better or more favorable access to compelling video content than us, may develop better offerings than us and may be able to leverage other assets or technologies to promote or distribute their offerings successfully. Our RealPlayer software services compete with alternative streaming media playback technologies and audio and video formats including Microsoft Windows Media Player and Adobe Flash and their related file formats, each of which has obtained very broad market penetration. In addition, our overall ability to sell subscription services depends in part on the use of RealNetworks formats on the Internet, and declines in the use of our formats have and are expected to continue to negatively affect our subscription revenue and increase costs of obtaining new subscribers. If we are unable to compete successfully, including through the introduction of compelling new products and services, our MSS business could continue to decline.

Games. Our RealArcade, GameHouse, Zylom and Atrativa branded services compete with other online aggregators and distributors of online, downloadable and social casual PC games. Some of these competitors have high volume distribution channels and greater financial resources than we do. Our Games business also competes with many other smaller companies that may be able to adjust to market conditions, including responding effectively to the growing popularity of casual games on social networks, faster than us. We also face an increasingly price competitive casual games market, and some of our competitors may be able to compete on price more effectively than us. We expect competition to intensify in this market from these and other competitors, and no assurance can be made that we will be able achieve growth in our revenue. Our development studios compete primarily with other developers of online, downloadable, mobile and social casual PC games and must continue to develop popular and high-quality game titles and to execute on opportunities to expand the play of our games on a variety of non-PC platforms, including social networks, to maintain our competitive position and help maintain the growth of our Games business.

The success of our subscription services businesses depends upon our ability to increase subscription revenue and to license compelling content on commercially reasonable terms.

Our operating results could be adversely impacted by the loss of subscription revenue. Internet subscription businesses are a relatively new media delivery model, and we cannot predict with accuracy our long-term ability to maintain or increase subscription revenue. Subscribers may cancel their subscriptions to our services for many reasons, including a perception that they do not use the services sufficiently or that the service does not provide enough value, a lack of attractive or exclusive content generally or as compared with competitive service offerings (including Internet piracy), or because customer service issues are not satisfactorily resolved. In addition, we must continue to obtain compelling digital media content for our video and games services in order to maintain and increase usage and overall customer satisfaction for these products.

We may not be successful in maintaining and growing our distribution of digital media products.

We cannot predict whether consumers will continue to download and use our digital media products consistent with past usage, especially in light of the fact that Microsoft bundles its competing Windows Media Player with its Windows operating system and the popularity of the Adobe Flash format. Our inability to maintain continued high volume distribution of our digital media products could hold back the growth and development of related revenue streams from these market segments, including the distribution of third-party products and sales of our subscription services, and therefore could harm our business and our prospects. In addition, our revenue from the distribution of third party products is currently significantly dependent on a single customer contract. If that contract is not renewed and cannot be replaced by another similar customer contract, our financial results would be harmed.

Risks Related to Our Business in General

Our operating results are difficult to predict and may fluctuate, which may contribute to volatility in our stock price.

The trading price for our common stock has been volatile, ranging from $2.53 to $5.41 per share during the 52-week period ended June 30, 2010. As a result of the rapidly changing markets in which we compete, our operating results may fluctuate from period-to-period, which may continue to contribute to the volatility of our stock price. In past periods, our operating results have been affected by personnel reductions and related charges, charges relating to losses on excess office facilities, and impairment charges for certain of our equity investments, goodwill and other long-lived assets. Our operating results may be adversely affected by similar or other charges or events in future periods, including, but not limited to:

39

- impairments of long-lived assets,

- integrating and operating newly acquired businesses and assets,

- the seasonality of our business, which has experienced increased revenues in the fourth quarter of our fiscal year, and

- the general difficulty in forecasting our operating results and metrics, which could result in actual results that differ significantly from expected results.

Certain of our expense decisions (for example, research and development and sales and marketing efforts) are based on predictions regarding business and the markets in which we compete. Fluctuations in our operating results, particularly when experienced beyond what we expected, could cause the trading price of our stock to continue to fluctuate.

Uncertainty and adverse conditions in the economy could have a material adverse impact on our business, financial condition and results of operations.

The national and global economic downturn has resulted in a decline in overall consumer and corporate spending, declines in consumer and corporate access to credit, fluctuations in foreign exchange rates, declines in the value of assets and increased liquidity risks, all of which could materially impact our business, financial condition and results of operations. We provide digital entertainment services to consumers, and payment for our products and services may be considered discretionary on the part of many of our current and potential customers. As a result, consumers considering whether to purchase our products or services may be influenced by macroeconomic factors that affect consumer spending such as unemployment, conditions in the residential real estate and mortgage markets and access to credit when making a determination whether to commence, continue, or stop subscribing to or otherwise purchasing our products and services. We are also experiencing a decline in advertising revenue as businesses are reducing their sales and marketing spending in the current economy. A significant decrease in the demand for our products or services or declines in our advertising revenue could have a material adverse impact on our operating results and financial condition.

Uncertainty and adverse economic conditions may also lead to a decreased ability to collect payment for our products and services due primarily to a decline in the ability of consumers to use or access credit, including through credit cards, which is how most of our customers pay for our products and services. We also expect to continue to experience volatility in foreign exchange rates, which could negatively impact the amount of revenue and net assets we record in future periods. The functional currency of our foreign subsidiaries is the local currency of the country in which each subsidiary operates. We translate our subsidiaries revenues into U.S. dollars in our financial statements, and continued volatility in foreign exchange rates, particularly if the U.S. dollar strengthens against the euro or the Korean won, may result in lower reported revenue. If economic conditions continue to deteriorate or remain uncertain for a sustained period of time, we may also record additional impairments to our assets in future periods. A continued decline in the economy may also result in (1) declines in interest income, (2) an increased risk that we may not be able to access cash balances held in U.S. or foreign financial institutions or that our deposits held in financial institutions may become worthless due to the nationalization or failure of such financial institutions, and (3) decreased ability to sell the securities and the institutional money market funds we hold as short-term investments. In addition, the decline in the trading price of shares of our common stock may make it difficult to use our common stock as purchase price consideration for future acquisitions and to raise funds through equity financings. If any of these risks are realized, we may experience a material adverse impact on our financial condition and results of operations.

New products and services may not achieve market acceptance or may be subject to legal challenge that could negatively affect our operating results.

The process of developing new, and enhancing existing, products and services is complex, costly and uncertain. Our business depends on providing products and services that are attractive to subscribers and consumers, which, in part, is subject to unpredictable and volatile factors beyond our control, including end-user preferences and competing products and services. Any failure by us to timely respond to or accurately anticipate consumers changing needs and

emerging technological trends could significantly harm our current market share or result in the loss of market opportunities. In addition, we must make long-term investments, develop or obtain appropriate intellectual property and commit significant resources before knowing whether our predictions will accurately reflect consumer demand for our products and services, which may result in no return or a loss on our investments. Furthermore, new products and services may be subject to legal challenge. Responding to these potential claims may require us to enter into royalty and licensing agreements on unfavorable terms, require us to stop distributing or selling, or to redesign our products or services, or to pay damages.

We plan to implement significant strategic and operational initiatives to restructure and simplify our business and operations. If we are not successful in implementing these initiatives, our stock price and business may be adversely affected, our operating results and financial condition may be adversely affected by fixed costs we cannot easily reduce in the short-term, and we may not realize the anticipated benefits of these initiatives.

Our current business and operational strategy involves restructuring the operating and overhead costs of, and taking other measure to simplify, our business and operations, including separating our Games businesses from our core operations. We have never before pursued initiatives to this extent and there is no assurance that our efforts will be successful. Our business and operations may be harmed to the extent there is customer or employee uncertainty surrounding the future direction of our product and service offerings and strategy for our businesses. In addition, restructuring activities may include implementing cost-cutting initiatives and recording non-cash charges, which could materially impact our operating results and financial condition. In addition, we may not be able to reduce some of our fixed operating costs in the short-term which could adversely impact our ability to generate a profit in future periods and result in other adverse consequences on our financial condition. If we do not effectively re-align the cost structure of our remaining businesses or our proposed Games separation transactions are not completed, we and our shareholders will not realize the anticipated financial, operational and other benefits from such initiatives.

The restructuring of Rhapsody may not yield the anticipated benefits to us or to Rhapsody.

On March 31, 2010, we completed the restructuring transactions of our digital audio music service joint venture, Rhapsody America LLC (Rhapsody). As a result of the restructuring, we no longer have operational control over Rhapsody, and beginning April 1, 2010, Rhapsody s operating performance is no longer consolidated with our consolidated financial statements. We believe the restructuring will provide Rhapsody with the financial, intellectual property and other key assets and the operational flexibility to compete more effectively in the digital music market. For a period of time following closing, the newly structured joint venture may experience disruptions due to employee, partner and customer uncertainty and other operational challenges as it transitions to becoming an independent company. These disruptions or Rhapsody s inability to operate and compete effectively as an independent company could adversely impact its financial condition and results of operations, which in turn could materially impact our reported net income (loss) in future periods. In addition, Rhapsody has generated losses since its inception, and the new structure may not alter this trend. If Rhapsody continues to incur losses, or if it otherwise experiences a significant decline in its business, we may incur a loss on our investment, which would have a material adverse effect on our financial condition and results of operations.

We depend upon our executive officers and key personnel, but may be unable to attract and retain them, which could significantly harm our business and results of operations.

Our success depends on the continued employment of certain executive officers and key employees. In January 2010, Rob Glaser, our founder and the only Chief Executive Officer in our history, resigned as Chief Executive Officer. Although Mr. Glaser remains the Chairman of our Board of Directors, we are now facing our first transition at the Chief Executive Officer level. We cannot provide assurance that we will effectively manage this transition, particularly in light of our proposed restructuring initiatives, which may impact our ability to retain our remaining key executive officers. The loss of the services of our key executive officers or employees could harm our business.

Our success is also dependent upon our ability to identify, attract and retain highly skilled management, technical, and sales personnel, both in our domestic operations and as we expand internationally. Qualified individuals are in high demand and competition for such qualified personnel in our industry is intense, and we may incur significant costs to retain or attract them. Our ability to attract and retain personnel may also be made more difficult by our restructuring initiatives. There can be no assurance that we will be able to attract and retain the key personnel necessary to sustain our business or support future growth.

Acquisitions involve costs and risks that could harm our business and impair our ability to realize potential benefits from acquisitions.

As part of our business strategy, we have acquired technologies and businesses in the past and expect that we will continue to do so in the future. The failure to adequately manage the costs and address the financial, legal and operational risks raised by acquisitions of technology and businesses could harm our business and prevent us from

realizing the benefits of the acquisitions.

Acquisition-related costs and financial risks related to completed and potential future acquisitions may harm our financial position, reported operating results, or stock price. Previous acquisitions have resulted in significant expenses, including amortization of purchased technology, amortization of acquired identifiable intangible assets and the incurrence of charges for the impairment of goodwill and other intangible assets, which are reflected in our operating expenses. New acquisitions and any potential additional future impairment of the value of purchased assets, including goodwill, could have a significant negative impact on our future operating results.

Acquisitions also involve operational risks that could harm our existing operations or prevent realization of anticipated benefits from an acquisition. These operational risks include:

- difficulties and expenses in assimilating the operations, products, technology, information systems, and/or personnel of the acquired company;
- retaining key management or employees of the acquired company;
- entrance into unfamiliar markets, industry segments, or types of businesses;
- operating and integrating acquired businesses in remote locations;
- integrating and managing businesses based in countries in which we have little or no prior experience;
- diversion of management time and other resources from existing operations to integration activities for acquired businesses;
- impairment of relationships with employees, affiliates, advertisers or content providers of our business or acquired business; and
- assumption of known and unknown liabilities of the acquired company, including intellectual property claims.

We may be unable to adequately protect our proprietary rights or leverage our patent portfolio, and may face risks associated with third-party claims relating to our intellectual property.

Our ability to compete across our businesses partly depends on the superiority, uniqueness and value of our patent portfolio and other technology, including both internally developed technology and technology licensed from third parties. To protect our proprietary rights, we rely on a combination of patent, trademark, copyright and trade secret laws, confidentiality agreements with our employees and third parties, and protective contractual provisions. However, our efforts to protect our intellectual property rights may not assure our ownership rights in our intellectual property, protect or enhance the competitive position of our products and services or effectively prevent misappropriation of our technology. We also routinely receive challenges to our trademarks and other proprietary intellectual property that we are using in our business activities in China. As disputes regarding the validity and scope of patents or the ownership of technologies and rights associated with streaming media, digital distribution, and online businesses are common and likely to arise in the future, we may be forced to litigate to enforce or defend our patents and other intellectual property rights or to determine the validity and scope of other parties proprietary rights, enter into royalty or licensing agreements on unfavorable terms or redesign our product features and services. Any such dispute would likely be costly and distract our management, and the outcome of any such dispute could fail to improve our business prospects or otherwise harm our business.

From time to time we receive claims and inquiries from third parties alleging that our technology may infringe the third parties proprietary rights, especially patents. Third parties have also asserted and most likely will continue to assert claims against us alleging infringement of copyrights, trademark rights, trade secret rights or other proprietary rights, or alleging unfair competition or violations of privacy rights. Currently we are investigating or litigating a variety of such pending claims, some of which are described in Note 14, Commitments and Contingencies to Consolidated Financial Statements included in Part I, Item 1 of this report.

Our business and operating results will suffer if our systems or networks fail, become unavailable, unsecured or perform poorly so that current or potential users do not have adequate access to our products, services and websites.

Our ability to provide our products and services to our customers and operate our business depends on the continued operation and security of our information systems and networks. A significant or repeated reduction in the performance, reliability, security or availability of our information systems and network infrastructure could harm our ability to conduct our business, and harm our reputation and ability to attract and retain users, customers, advertisers and content providers. We have on occasion experienced system errors and failures that caused interruption in availability of products or content or an increase in response time. Problems with our systems and networks could result from our failure to adequately maintain and enhance these systems and networks, natural disasters and similar events, power failures, HVAC failures, intentional actions to disrupt our systems and networks and many other causes. The vulnerability of a large portion of our computer and communications infrastructure is enhanced because much of it is located at a single leased facility in Seattle, Washington, an area that is at heightened risk of earthquake, flood, and volcanic events. Many of our services do not currently have fully redundant systems or a formal disaster recovery plan, and we may not have adequate business interruption insurance to compensate us for losses that may occur from a system outage.

The growth of our business is dependent in part on successfully managing our international operations.

Our international operations involve risks inherent in doing business on an international level, including difficulties in managing operations due to distance, language, and cultural differences, local economic conditions, different or conflicting laws and regulations, taxes, and exchange rate fluctuations. Any of these factors could harm our operating results and financial condition. Our foreign currency exchange risk management program reduces, but does not eliminate, the impact of currency exchange rate movements.

We may be subject to market risk and legal liability in connection with the data collection capabilities of our products and services.

Many of our products are interactive Internet applications that by their very nature require communication between a client and server to operate. To provide better consumer experiences and to operate effectively, our products send information to our servers. Many of the services we provide also require that a user provide certain information to us. We have an extensive privacy policy concerning the collection, use and disclosure of user data involved in interactions between our client and server products. Any failure by us to comply with our posted privacy policy and existing or new legislation regarding privacy issues could impact the market for our products and services, subject us to litigation, and harm our business.

We may be subject to assessment of sales and other taxes for the sale of our products, license of technology or provision of services.

Currently we do not collect sales, value-added tax (VAT), transactional or other taxes on the sale of our products, license of technology or provision of services in states and countries other than those in which we have offices, employees or other taxable presence. However, one or more states or foreign countries may seek to impose sales, VAT, transactional or other tax collection obligations on us in the future. A successful assertion by one or more states or foreign countries that we should be collecting sales, VAT, transactional or other taxes on the sale of our products, licenses of technology, provision of services or from our Internet commerce activities could result in substantial tax liabilities for past sales, discourage customers from purchasing our products from us or otherwise substantially harm our business.

Currently, decisions by the U.S. Supreme Court restrict the ability of states to force remote sellers to collect state and local sales and use taxes. However, a number of states and the U.S. Congress have been considering various

initiatives that could limit or supersede the Supreme Court s position regarding sales and use taxes on products and services sold through the Internet. If these initiatives are successful, we could be required to collect and remit sales and use taxes in additional states. States are also continuing to define the taxability of digital goods. Taxation of digital goods is subject to complex evolving tax rules that could result in additional

taxation of our products and services. The imposition of additional tax obligations related to our business activities by state and local governments could materially adversely affect our operating results, create administrative burdens for us and decrease our future sales.

In those countries where we have taxable presence, we collect VAT on sales of electronically supplied services provided to European Union residents, including software products, games, data, publications, music, video and fee-based broadcasting services. The collection and remittance of VAT subjects us to additional currency fluctuation risks.

We may be subject to additional income tax assessments.

We are subject to income taxes in the U.S. and numerous foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes, income taxes payable, and net deferred tax assets. In the ordinary course of business, there are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different than that which is reflected in our historical financial statements. An audit or litigation can result in significant additional income taxes payable in the U.S. or foreign jurisdictions which could have a material adverse effect on our financial condition and results of operations.

Risks Related to the Securities Markets and Ownership of Our Common Stock

Our Chairman of the Board beneficially owns more than 38% of our stock, which gives him significant control over certain major decisions on which our shareholders may vote, may discourage an acquisition of us, and any significant sales of stock by our Chairman could have a negative effect on our stock price.

Robert Glaser, our Chairman of the Board, beneficially owns more than 38% of our common stock. As a result, Mr. Glaser and his affiliates will have significant influence to:

- elect or defeat the election of our directors;
- amend or prevent amendment of our articles of incorporation or bylaws;
- effect or prevent a merger, sale of assets or other corporate transaction; and
- control the outcome of any other matter submitted to the shareholders for vote.

The stock ownership of Mr. Glaser and his affiliates may discourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of RealNetworks, which in turn could reduce our stock price or prevent our shareholders from realizing a premium over our stock price.

Provisions of our charter documents, Shareholder Rights Plan, and Washington law could discourage our acquisition by a third-party.

Our articles of incorporation provide for a strategic transaction committee of the board of directors. Without the prior approval of this committee, and subject to certain limited exceptions, the board of directors does not have the authority to:

- adopt a plan of merger;
- authorize the sale, lease, exchange or mortgage of assets representing more than 50% of the book value of our assets prior to the transaction or on which our long-term business strategy is substantially dependent;
- authorize our voluntary dissolution; or
- take any action that has the effect of any of the above.

In addition, Mr. Glaser has special rights under our articles of incorporation to appoint or remove members of the strategic transaction committee at his discretion that could make it more difficult for RealNetworks to be sold or to complete another change of control transaction without Mr. Glaser s consent. RealNetworks has also entered into an agreement providing Mr. Glaser with certain contractual rights relating to the enforcement of our charter documents and Mr. Glaser s roles and authority within RealNetworks. These rights, together with Mr. Glaser s significant beneficial ownership, create unique potential for concentrated influence of Mr. Glaser over potentially material transactions involving RealNetworks.

We have adopted a shareholder rights plan, which was amended and restated in December 2008, which provides that shares of our common stock have associated preferred stock purchase rights. The exercise of these rights would make the acquisition of RealNetworks by a third-party more expensive to that party and has the effect of discouraging third parties from acquiring RealNetworks without the approval of our board of directors, which has the power to redeem these rights and prevent their exercise.

Washington law imposes restrictions on some transactions between a corporation and certain significant shareholders. The foregoing provisions of our charter documents, shareholder rights plan, our agreement with Mr. Glaser, and Washington law, as well as our charter provisions that provide for a classified board of directors and the availability of blank check preferred stock, could have the effect of making it more difficult or more expensive for a third-party to acquire, or of discouraging a third-party from attempting to acquire, control of us. These provisions may therefore have the effect of limiting the price that investors might be willing to pay in the future for our common stock.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds
