# F.N.B. CORPORATION AND SUBSIDIARIES NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

Dollars in thousands, except per share data (Unaudited) September 30, 2010

#### **BUSINESS**

F.N.B. Corporation (the Corporation) is a diversified financial services company headquartered in Hermitage, Pennsylvania. Its primary businesses include community banking, consumer finance, wealth management and insurance. The Corporation also conducts leasing and merchant banking activities. The Corporation operates its community banking business through a full service branch network in Pennsylvania and Ohio. The Corporation operates its wealth management and insurance businesses within the existing branch network. It also conducts selected consumer finance business in Pennsylvania, Ohio and Tennessee.

#### **BASIS OF PRESENTATION**

The Corporation s accompanying consolidated financial statements and these notes to the financial statements include subsidiaries in which the Corporation has a controlling financial interest. The Corporation owns and operates First National Bank of Pennsylvania (FNBPA), First National Trust Company, First National Investment Services Company, LLC, F.N.B. Investment Advisors, Inc., First National Insurance Agency, LLC, Regency Finance Company (Regency), F.N.B. Capital Corporation, LLC and Bank Capital Services, LLC, and includes results for each of these entities in the accompanying consolidated financial statements.

The accompanying consolidated financial statements include all adjustments that are necessary, in the opinion of management, to fairly reflect the Corporation's financial position and results of operations. All significant intercompany balances and transactions have been eliminated. Certain prior period amounts have been reclassified to conform to the current period presentation. Events occurring subsequent to the date of the balance sheet have been evaluated for potential recognition or disclosure in the consolidated financial statements through the date of the filing of the consolidated financial statements with the Securities and Exchange Commission (SEC).

Certain information and note disclosures normally included in consolidated financial statements prepared in accordance with U.S. generally accepted accounting principles (GAAP) have been condensed or omitted pursuant to the rules and regulations of the SEC. The interim operating results are not necessarily indicative of operating results the Corporation expects for the full year. These interim consolidated financial statements should be read in conjunction with the audited consolidated financial statements and notes thereto included in the Corporation s Annual Report on Form 10-K filed with the SEC on February 26, 2010.

#### **USE OF ESTIMATES**

The accounting and reporting policies of the Corporation conform with GAAP. The preparation of financial statements in conformity with GAAP requires management to make estimates and assumptions that affect the amounts reported in the consolidated financial statements and accompanying notes. Actual results could materially differ from those estimates. Material estimates that are particularly susceptible to significant changes include the allowance for loan losses, securities valuations, goodwill and other intangible assets and income taxes.

#### **CAPITAL**

On January 9, 2009, in conjunction with the U.S. Department of the Treasury (UST) Capital Purchase Program (CPP), the Corporation issued to the UST 100,000 shares of Fixed Rate Cumulative Perpetual Preferred Stock, Series C (Series C Preferred Stock) and a warrant to purchase up to 1,302,083 shares of the Corporation s common stock for an aggregate purchase price of \$100,000. The warrant has a ten-year term and an exercise price of \$11.52 per share.

On June 16, 2009, the Corporation completed a public offering of 24,150,000 shares of common stock at a price of \$5.50 per share. The net proceeds of the offering after deducting underwriting discounts and commissions and offering expenses were \$125,784. As a result of the completion of the public stock offering, the number of shares of the Corporation s common stock purchasable upon exercise of the warrant issued to the UST was reduced in half to 651,042 shares and the exercise price was unchanged.

On September 9, 2009, the Corporation utilized a portion of the proceeds of its public offering to redeem all of the Series C Preferred Stock issued to the UST under the CPP and to pay the related final accrued dividend. Since receiving the CPP funds on January 9, 2009, the Corporation paid the UST \$3,333 in cash dividends. Upon redemption, the remaining difference of \$4,319 between the Series C Preferred Stock redemption amount and the recorded amount of discount amortization was charged to retained earnings as non-cash deemed preferred stock dividends. The non-cash deemed preferred stock dividends had no impact on total equity, but reduced earnings per diluted common share by \$0.04.

The remaining offering proceeds were used for general corporate purposes and to enhance capital levels.

#### MERGERS AND ACQUISITIONS

Pending Acquisition

On August 9, 2010, the Corporation announced the signing of a definitive merger agreement to acquire Comm Bancorp, Inc. (CBI), a bank holding company with approximately \$641,765 in assets based in Clarks Summit, Pennsylvania. The transaction is valued at approximately \$67,727. Under the terms of the merger agreement, CBI shareholders will be entitled to receive 3.4545 shares of F.N.B. Corporation common stock and \$10.00 in cash for each share of CBI common stock. The transaction is expected to be completed in the fourth quarter of 2010, pending regulatory approvals, the approval of shareholders of CBI and the satisfaction of other closing conditions.

#### NEW ACCOUNTING STANDARDS

Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit Losses
In July 2010, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update
(ASU) No. 2010-20, Disclosures about the Credit Quality of Financing Receivables and the Allowance for Credit
Losses, to provide financial statement users with greater transparency about credit quality of financing receivables and allowance for credit losses. This update requires additional disclosures as of the end of a reporting period and

allowance for credit losses. This update requires additional disclosures as of the end of a reporting period and additional disclosures about activity that occurs during a reporting period that will assist financial statement users in assessing credit risk exposures and evaluating the adequacy of the allowance for credit losses.

The additional disclosures are required to be provided on a disaggregated basis. ASU No. 2010-20 defines two levels of disaggregation and provides additional implementation guidance to determine the appropriate level of disaggregation of information. The disclosures should facilitate evaluation of the nature of the credit risk inherent in a portfolio of financing receivables, how that risk is analyzed and assessed in arriving at the allowance for credit losses, and the changes and reasons for those changes in the allowance for credit losses.

The disclosures as of the end of a reporting period are effective for interim and annual reporting periods ending on or after December 15, 2010. The disclosures about activity that occurs during a reporting period are effective for interim and annual reporting periods beginning on or after December 15, 2010. The adoption of this standard is not anticipated to have a material effect on the financial statements, results of operations or liquidity of the Corporation. *Modification of a Loan That is Part of a Pool That is Accounted for as a Single Asset* 

In April 2010, the FASB issued ASU No. 2010-18, *Effect of a Loan Modification When the Loan is Part of a Pool That is Accounted for as a Single Asset.* ASU No. 2010-18 provides that modifications of acquired loans with deteriorated credit quality that are accounted for within a pool do not result in removal of those loans from the pool even if the modification of those loans would otherwise be considered a troubled asset restructuring. ASU No. 2010-18 is effective for modifications occurring in the first interim or annual reporting period ending on or after July 15, 2010. The adoption of this standard did not have a material effect on the financial statements, results of operations or liquidity of the Corporation.

Fair Value Disclosures

In January 2010, the FASB issued ASU No. 2010-06, *Improving Disclosures about Fair Value Measurements*. The ASU clarifies existing disclosure requirements and requires additional disclosures regarding fair value measurements. This standard clarifies that an entity should provide fair value disclosures by class rather than major

category of assets and liabilities, resulting in a greater level of disaggregated information presented in all fair value disclosures. ASU 2010-06 also clarifies that, for fair value measurements using significant other observable inputs (Level 2) and significant unobservable inputs (Level 3), an entity is required to describe valuation techniques and the inputs used in determining the fair values of each class of assets and liabilities and to disclose a change in valuation technique and the reason for making that change. Additionally, the ASU requires an entity to discuss the reasons for transfers in or out of Level 3 and, if significant, to disclose these transfers on a gross basis, to disclose on a gross basis the amounts and reasons for significant transfers between Level 2 and Level 3 of the fair value hierarchy, and to disclose its policy for determining when transfers between Levels are recognized. This standard is effective for interim and annual reporting periods that begin after December 15, 2009. The adoption of this standard did not have a material effect on the financial statements, results of operations or liquidity of the Corporation.

Transfers and Servicing of Financial Assets and Extinguishments of Liabilities

In June 2009, the FASB issued an accounting standard which amends current GAAP related to the accounting for transfers and servicing of financial assets and extinguishments of liabilities, including the removal of the concept of a qualifying special-purpose entity from GAAP. This accounting standard also clarifies that a transferor must evaluate whether it has maintained effective control of a financial asset by considering its continuing involvement with the transferred financial asset. This accounting standard is effective for interim and annual reporting periods that begin after November 15, 2009. The adoption of this standard did not have a material effect on the financial condition, results of operations or liquidity of the Corporation.

#### Variable Interest Entities

In June 2009, the FASB issued an accounting standard which requires a qualitative rather than a quantitative analysis to establish the primary beneficiary for determining whether the consolidation of a variable interest entity (VIE) is required. The primary beneficiary of a VIE is the enterprise that has: (a) the power to direct the activities of the VIE that most significantly impact its economic performance, and (b) the obligation to absorb losses of the VIE that could potentially be significant to the VIE or the right to receive benefits of the VIE that could potentially be significant to the VIE. This accounting standard is effective for interim and annual reporting periods that begin after November 15, 2009. The adoption of this standard did not have a material effect on the financial condition, results of operations or liquidity of the Corporation.

The Corporation classifies securities as trading securities when management intends to sell such securities in the near term. Such securities are carried at fair value, with unrealized gains (losses) reflected through the consolidated statement of income. As of September 30, 2010 and December 31, 2009, the Corporation did not hold any trading securities.

The Corporation recognized a gain of \$2,291 for the nine months ended September 30, 2010 relating to the sale of a \$6,016 U.S. government agency security and \$52,625 of mortgage backed securities. These securities were sold to better position the balance sheet for the remainder of 2010. Additionally, the Corporation recognized a gain of \$226 for the nine months ended September 30, 2010 relating to other securities sold during that period. The Corporation recognized a gain of \$206 for the nine months ended September 30, 2009 relating to the acquisition by a third party of a company in which the Corporation owned stock. Additionally, the Corporation recognized a gain of \$292 for the nine

months ended September 30, 2009 relating to securities sold and called during that period. No security sales were at a loss.

Gross gains and gross losses were realized on sales of securities as follows:

		ee Mo Septer	Nine Months Ended September 30,		
	20	10	2009	2010	2009
Gross gains Gross losses	\$	80	\$ 154	\$ 2,517	\$ 498
	\$	80	\$ 154	\$ 2,517	\$ 498

As of September 30, 2010, the amortized cost and fair value of securities, by contractual maturities, were as follows:

	Available	e for Sale	Held to Maturity		
	Amortized	Fair	Amortized	Fair	
	Cost	Value	Cost	Value	
Due in one year or less	\$ 12,880	\$ 12,900	\$ 6,438	\$ 6,477	
Due from one to five years	267,218	269,199	23,776	24,902	
Due from five to ten years	17,178	17,722	16,405	17,270	
Due after ten years	75,792	61,502	83,829	86,869	
	373,068	361,323	130,448	135,518	
Residential mortgage-backed securities:					
Agency mortgage-backed securities	215,623	222,051	655,652	685,132	
Agency collateralized mortgage obligations	151,042	153,385	45,390	46,112	
Non-agency collateralized mortgage obligations	39	40	38,275	37,827	
Equity securities	1,918	2,029			
	\$ 741,690	\$738,828	\$ 869,765	\$ 904,589	

Maturities may differ from contractual terms because borrowers may have the right to call or prepay obligations with or without penalties. Periodic payments are received on mortgage-backed securities based on the payment patterns of the underlying collateral.

At September 30, 2010 and December 31, 2009, securities with a carrying value of \$746,674 and \$598,078, respectively, were pledged to secure public deposits, trust deposits and for other purposes as required by law. Securities with a carrying value of \$763,352 and \$616,000 at September 30, 2010 and December 31, 2009, respectively, were pledged as collateral for short-term borrowings.

Following are summaries of the fair values and unrealized losses of securities, segregated by length of impairment:

#### **December 31, 2009**

Residential mortgage-backed securities: Agency mortgage-backed securities \$ \$ \$ \$20,650 \$ \$ 20,650 (261)(261)Non-agency collateralized mortgage obligations (80)30,221 15,534 (3.165)45,755 (3,245)States of the U.S. and political subdivisions 13,055 (362)1,968 (37)15,023 (399)Collateralized debt obligations 2,778 (812)2,778 (812)Other debt securities 1,192 (143)1,192 (143)\$49,239 \$ (703)\$ 36,159 (4,157)\$85,398 (4,860)

As of September 30, 2010, securities with unrealized losses for less than 12 months include 1 investment in a residential mortgage-backed security, 5 investments in states of the U.S. and political subdivision securities, 1 investment in an other debt security and 2 investments in equity securities. Securities with unrealized losses of greater than 12 months include 2 investments in residential mortgage-backed securities (non-agency collateralized mortgage obligations (CMOs)),1 investment in states of the U.S. and political subdivisions, 13 investments in collateralized debt obligations (CDOs), 6 investments in other debt securities and 4 investments in equity securities. The unrealized losses relating to the residential mortgage-backed securities and states of the U.S. and political subdivisions are considered temporary resulting primarily from changes in interest rates.

The Corporation s unrealized losses on CDOs primarily relate to investments in trust preferred securities (TPS). The Corporation s portfolio of TPS consists of single-issuer and pooled securities. The single-issuer securities are primarily from money-center and large regional banks. The pooled securities consist of securities issued primarily by banks, with some of the pools including a limited number of insurance companies. The non-credit portion of unrealized losses on investments in TPS is attributable to temporary illiquidity and the uncertainty affecting these markets, as well as changes in interest rates.

#### Other-Than-Temporary Impairment

The Corporation evaluates its investment securities portfolio for other-than-temporary impairment (OTTI) on a quarterly basis. Impairment is assessed at the individual security level. The Corporation considers an investment security impaired if the fair value of the security is less than its cost or amortized cost basis.

When impairment of an equity security is considered to be other-than-temporary, the security is written down to its fair value and an impairment loss is recorded as a loss within non-interest income in the consolidated statement of income. When impairment of a debt security is considered to be other-than-temporary, the amount of the OTTI recorded as a loss within non-interest income and thereby recognized in earnings depends on whether the Corporation intends to sell the security or whether it is more likely than not that the Corporation will be required to sell the security before recovery of its amortized cost basis.

If the Corporation intends to sell the debt security or if it is more likely than not that the Corporation will be required to sell the security before recovery of its amortized cost basis, OTTI shall be recognized in earnings equal to the entire difference between the investment s amortized cost basis and its fair value.

If the Corporation does not intend to sell the debt security and it is not more likely than not the Corporation will be required to sell the security before recovery of its amortized cost basis, OTTI shall be separated into the amount representing credit loss and the amount related to all other market factors. The amount related to credit loss shall be recognized in earnings. The amount related to other market factors shall be recognized in other comprehensive income, net of applicable taxes.

The Corporation performs its OTTI evaluation process in a consistent and systematic manner and includes an evaluation of all available evidence. Documentation of the process is as extensive as necessary to support a conclusion as to whether a decline in fair value below cost or amortized cost is other-than-temporary and includes documentation supporting both observable and unobservable inputs and a rationale for the conclusions reached. In making these determinations for pooled TPS, the Corporation consults with third-party advisory firms to provide additional valuation assistance.

This process considers factors such as the severity, length of time and anticipated recovery period of the impairment, recoveries or additional declines in fair value subsequent to the balance sheet date, recent events specific to the issuer, including investment downgrades by rating agencies and economic conditions of its industry, and the issuer s financial condition, repayment capacity, capital strength and near-term prospects.

For debt securities, the Corporation also considers the payment structure of the debt security, the likelihood of the issuer being able to make future payments, failure of the issuer of the security to make scheduled interest and principal payments, whether the Corporation has made a decision to sell the security and whether the Corporation s cash or working capital requirements or contractual or regulatory obligations indicate that the debt security will be required to be sold before a forecasted recovery occurs. For equity securities, the Corporation also considers its intent and ability to retain the security for a period of time sufficient to allow for a recovery in fair value. Among the factors that are considered in determining the Corporation s intent and ability to retain the security is a review of its capital adequacy, interest rate risk position and liquidity. The assessment of a security s ability to recover any decline in fair value, the ability of the issuer to meet contractual obligations, the Corporation s intent and ability to retain the security, and whether it is more likely than not the Corporation will be required to sell the security before recovery of its amortized cost basis require considerable judgment.

Debt securities with credit ratings below AA at the time of purchase that are repayment-sensitive securities are evaluated using the guidance of ASC Topic 325, *Investments - Other*. All other debt securities are required to be evaluated under ASC Topic 320, *Investments - Debt Securities*.

The Corporation invested in TPS issued by special purpose vehicles (SPVs) which hold pools of collateral consisting of trust preferred and subordinated debt securities issued by banks, bank holding companies and insurance companies. The securities issued by the SPVs are generally segregated into several classes known as tranches. Typically, the structure includes senior, mezzanine and equity tranches. The equity tranche represents the first loss position. The Corporation generally holds interests in mezzanine tranches. Interest and principal collected from the collateral held by the SPVs are distributed with a priority that provides the highest level of protection to the senior-most

tranches. In order to provide a high level of protection to the senior tranches, cash flows are diverted to higher-level tranches if the principal and interest coverage tests are not met.

The Corporation prices its holdings of TPS using Level 3 inputs in accordance with ASC Topic 820, *Fair Value Measurements and Disclosures*, and guidance issued by the SEC. In this regard, the Corporation evaluates current available information in estimating the future cash flows of these securities and determines whether there have been favorable or adverse changes in estimated cash flows from the cash flows previously projected. The Corporation considers the structure and term of the pool and the financial condition of the underlying issuers. Specifically, the evaluation incorporates factors such as over-collateralization and interest coverage tests, interest rates and appropriate risk premiums, the timing and amount of interest and principal payments and the allocation of payments to the various tranches. Current estimates of cash flows are based on the most recent trustee reports, announcements of deferrals or defaults, and assumptions regarding expected future default rates, prepayment and recovery rates and other relevant information. In constructing these assumptions, the Corporation considers the following:

that current defaults would have no recovery;

that some individually analyzed deferrals will cure at rates varying from 10% to 90% after the deferral period ends;

recent historical performance metrics, including profitability, capital ratios, loan charge-offs and loan reserve ratios, for the underlying institutions that would indicate a higher probability of default by the institution;

that institutions identified as possessing a higher probability of default would recover at a rate of 10% for banks and 15% for insurance companies;

that financial performance of the financial sector continues to be affected by the economic environment resulting in an expectation of additional deferrals and defaults in the future;

whether the security is currently deferring interest; and

the external rating of the security and recent changes to its external rating.

The primary evidence utilized by the Corporation is the level of current deferrals and defaults, the level of excess subordination that allows for receipt of full principal and interest, the credit rating for each security and the likelihood that future deferrals and defaults will occur at a level that will fully erode the excess subordination based on an assessment of the underlying collateral. The Corporation combines the results of these factors considered in estimating the future cash flows of these securities to determine whether there has been an adverse change in estimated cash flows from the cash flows previously projected.

The Corporation s portfolio of trust preferred CDOs consists of 13 pooled issues and seven single issue securities. One of the pooled issues is a senior tranche; the remaining 12 are mezzanine tranches. At September 30, 2010, the 13 pooled TPS had an estimated fair value of \$7,915 while the single-issuer TPS had an estimated fair value of \$12,472. The Corporation has concluded from the analysis performed at September 30, 2010 that it is probable that the Corporation will collect all contractual principal and interest payments on all of its single-issuer and pooled TPS sufficient to recover the amortized cost basis of the securities.

Upon adoption of ASC Topic 320, the Corporation determined that \$7,021 of OTTI charges previously recorded were non-credit related. As such, a \$4,564 (net of \$2,457 of taxes) increase to retained earnings and a corresponding decrease to accumulated other comprehensive income were recorded as the cumulative effect of adopting ASC Topic 320 as of April 1, 2009.

The Corporation recognized net impairment losses on securities of \$2,288 and \$4,234 for the nine months ended September 30, 2010 and 2009, respectively, due to the write-down of securities that the Corporation deemed to be other-than-temporarily impaired. Impairment losses related to bank stocks for the nine months ended September 30, 2010 and 2009 amounted to \$7 and \$665, respectively. For the nine months ended September 30, 2010, impairment

losses on pooled TPS amounted to \$9,539, which includes \$7,251 (\$4,713, net of tax) for non-credit related impairment

losses recognized directly in other comprehensive income and \$2,288 of credit-related impairment losses recognized in earnings.

The impairment losses on bank stocks relate to securities that were in an unrealized loss position for an extended period of time or the percentage of unrealized loss was such that management believes it would be unlikely to recover in the near term. In accordance with GAAP, management has deemed these impairments to be other-than-temporary given the low likelihood that they will recover in value in the foreseeable future. At September 30, 2010, the Corporation held 14 bank stocks with an adjusted cost basis of \$1,892 and fair value of \$2,002.

At September 30, 2010, all 12 of the pooled trust preferred security investments on which OTTI has been recognized are classified as non-performing investments.

The following table presents a summary of the cumulative credit-related OTTI charges recognized as components of earnings for securities for which a portion of an OTTI is recognized in other comprehensive income:
