McDERMOTT INTERNATIONAL, INC.
NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS
MARCH 31, 2007
(UNAUDITED)

NOTE 1 BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

We have presented our condensed consolidated financial statements in U.S. dollars in accordance with accounting principles generally accepted in the United States (GAAP) for interim financial information. Accordingly, they do not include all of the information and GAAP footnotes required for complete financial statements. We have included all adjustments, consisting only of normal recurring adjustments, necessary for a fair presentation. These condensed consolidated financial statements include the accounts of McDermott International, Inc. and its subsidiaries and controlled joint ventures consistent with Financial Accounting Standards Board (FASB) Interpretation No. 46(R),

Consolidation of Variable Interest Entities (revised December 2003). We use the equity method to account for investments in joint ventures and other entities we do not control, but over which we have significant influence. We have eliminated all significant intercompany transactions and accounts. We have reclassified certain amounts previously reported to conform to the presentation at March 31, 2007 and for the three months ended March 31, 2007, primarily related to our adoption of a new accounting principle for drydocking costs, as discussed further below. We present the notes to our condensed consolidated financial statements on the basis of continuing operations, unless otherwise stated.

McDermott International, Inc. (MII), incorporated under the laws of the Republic of Panama in 1959, is an engineering and construction company with specialty manufacturing and service capabilities and is the parent company of the McDermott group of companies, which includes:

J. Ray McDermott, S.A., a Panamanian subsidiary of MII (JRMSA), and its consolidated subsidiaries;

McDermott Holdings, Inc., a Delaware subsidiary of MII (MHI), and its consolidated subsidiaries;

J. Ray McDermott Holdings, LLC, a Delaware subsidiary of MHI (JRMH), and its consolidated subsidiaries;

McDermott Incorporated, a Delaware subsidiary of MHI (MI), and its consolidated subsidiaries;

The Babcock & Wilcox Companies, a Delaware subsidiary of MI (B&WC), and its consolidated subsidiaries;

BWX Technologies, Inc., a Delaware subsidiary of B&WC (BWXT), and its consolidated subsidiaries; and

The Babcock & Wilcox Company, a Delaware subsidiary of B&WC (B&W), and its consolidated subsidiaries.

We operate in three business segments:

Offshore Oil and Gas Construction includes the results of operations of JRMSA and its subsidiaries and JRMH and its subsidiaries, which we refer to collectively as JRM, which supply services primarily to offshore oil and gas field developments worldwide. This segment's principal activities include the front-end design and detailed engineering, fabrication and installation of offshore drilling and production facilities and installation of marine pipelines and subsea production systems. This segment operates in most major offshore oil and gas producing regions throughout the world, including the United States, Mexico, the Middle East, India, the Caspian Sea and Asia Pacific.

Government Operations includes the results of operations of BWXT and its subsidiaries. This segment supplies nuclear components and provides various services to the U.S. Government, including uranium processing, environmental site restoration services and management and operating services for various U.S.

Government-owned facilities, primarily within the nuclear weapons complex of the U.S. Department of Energy (DOE).

Power Generation Systems primarily includes the results of operations of B&W and its subsidiaries. B&W is a leading supplier of fossil-fired steam generating systems, replacement commercial nuclear steam generators, environmental equipment and components, and related services to customers around the world. It designs, engineers, manufactures and services large utility and industrial power generation systems, including boilers used to generate steam in electric power plants, pulp and paper making, chemical and process applications and other industrial uses. On February 22, 2006, B&W and three of its subsidiaries exited from their asbestos-related Chapter 11 Bankruptcy proceedings that were commenced on February 22, 2000. Due to the

Table of Contents

Chapter 11 proceedings, we did not consolidate B&W's and its subsidiaries' results of operations in our consolidated financial statements from February 22, 2000 through February 22, 2006.

In this quarterly report on Form 10-Q, unless the context otherwise indicates, we, us and our mean MII and its consolidated subsidiaries.

Operating results for the three months ended March 31, 2007 are not necessarily indicative of the results that may be expected for the year ending December 31, 2007. For further information, refer to the consolidated financial statements and footnotes thereto included in our annual report on Form 10-K for the year ended December 31, 2006.

Inventories

Inventories are summarized below:

	March 31, 2007 (Unaudited)	December 31, 2006
	(In thousands)	
Raw Materials and Supplies	\$61,493	\$ 56,955
Work in Progress	10,319	7,453
Finished Goods	13,736	13,361
Total Inventories	\$85,548	\$ 77,769

Adoption of New Accounting Principle for Drydock Costs

Through December 31, 2006, we accrued estimated drydocking costs, including labor, raw materials, equipment and regulatory fees, for our marine fleet over the period of time between drydockings, which is generally three to five years. We accrued drydocking costs in advance of the anticipated future drydocking, in accordance with the method commonly known as the accrue-in-advance method. Actual drydocking costs were charged against the liability when incurred, and any differences between actual costs and accrued costs were recognized over the remaining months of the drydocking cycle. Pursuant to FASB Staff Position (FSP) AUG AIR-1, Accounting for Planned Major Maintenance Activities, issued during September 2006, we changed our accounting policy from the accrue-in-advance method to the deferral method, effective January 1, 2007. This FSP requires that all periods presented in our consolidated financial statements reflect the period-specific adjustments of applying the new accounting principle. As a result of applying this change, we have restated our condensed consolidated balance sheet at December 31, 2006 for an increase to assets and stockholders' equity of approximately \$39.6 million and \$54.7 million, respectively, and a decrease to liabilities of approximately \$15.1 million. Additionally, we have restated our condensed consolidated statement of income for the three months ended March 31, 2006 to reflect a decrease in our cost of operations of approximately \$1.2 million.

Recent Pronouncements

There have been no material changes to the recent pronouncements discussed in our annual report on Form 10-K for the year ended December 31, 2006.

NOTE 2 DISCONTINUED OPERATIONS

Discontinued operations for the three months ended March 31, 2006 include the operations of our Mexican subsidiary, Talleres Navales del Golfo, S.A. de C.V., a component of our Offshore Oil and Gas Construction segment, which was sold in April 2006.

NOTE 3 INCOME TAXES

Effective January 1, 2007, we adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). As a result of this adoption, we recognized a charge of approximately \$12 million to our accumulated deficit component of stockholders' equity. Additionally, as of the adoption date, we had gross tax-effected unrecognized tax benefits of approximately \$70 million, of which approximately \$68 million would impact our effective tax rate if recognized.

As part of the adoption of FIN 48, we will begin to recognize interest and penalties related to unrecognized tax benefits in income tax expense. As of January 1, 2007, we have recorded a liability of approximately \$27 million for the payment of tax-related interest and penalties.

Table of Contents

During the three months ended March 31, 2007, we recorded an additional FIN 48 liability of \$1.5 million, including estimated tax-related interest and penalties.

We conduct business globally, and as a result, we or one or more of our subsidiaries files income tax returns in the U.S. federal jurisdiction and in many state and foreign jurisdictions. In the normal course of business, we are subject to examination by taxing authorities throughout the world, including such major jurisdictions as Canada, Indonesia, Malaysia, China, Singapore, Saudi Arabia, Kuwait, India, Qatar, Azerbaijan and the United States. With few exceptions, we are no longer subject to non-U.S. tax examinations for years prior to 2000.

The MI and JRMH groups are currently under audit by the Internal Revenue Service (the IRS) for the 1993 through 2004 and 1996 through 2003 tax years, respectively. The IRS examination of the years 1993 through 2003 for the MI group is completed, and the unresolved issues are awaiting an appellate conference with the IRS. The IRS examination of the years 1996 through 2003 for the JRMH group is complete and is pending review by the Joint Committee on Taxation. We have been notified that the 2004 tax year for the MI group is to be subject to a limited scope audit by the IRS, which is to begin within the next 12 months. It is anticipated that a settlement with the IRS for all years under audit may be reached within the next 12 months.

State income tax returns are generally subject to examination for a period of three to five years after filing the respective returns. With few exceptions, most notably the Commonwealth of Virginia, we do not have any state returns under examination for years prior to 2000. The Commonwealth of Virginia returns are under audit for the 1990 through 1993 and 1999 tax years, all of which we expect will be resolved within the next 12 months. We expect that any assessments under the remaining audits will not have a material impact on our consolidated financial position, results of operations or cash flows.

NOTE 4 PENSION PLANS AND POSTRETIREMENT BENEFITS

Components of net periodic benefit cost are as follows:

	Pension Benefits		Other Benefits	
	Quarter Ended March 31,		Quarter Ended March 31,	
	2007	2006	2007	2006
	(Unaudited)			
	(In thousands)			
Service cost	\$ 9,997	\$ 2,730	\$ 55	\$ 13
Interest cost	36,390	11,533	1,855	1,270
Expected return on plan assets	(42,638)	(11,943)

Unrecognized Losses on Benefit Obligations	(379,338)	(386,989)

Accumulated Other Comprehensive Loss	\$(355,591)	\$(365,611)
--------------------------------------	-------------	-------------

NOTE 6 COMMITMENTS AND CONTINGENCIES

Investigations and Litigation

Other than as noted below, there have been no material changes in the status of the legal proceedings disclosed in Note 10 to the consolidated financial statements in Part II of our annual report on Form 10-K for the year ended December 31, 2006.

Table of Contents

Other Litigation and Settlements

In the proceeding entitled *Iroquois Falls Power Corp v. Jacobs Canada Inc., et al.*, filed in the Superior Court of Justice, in Ontario, Canada and alleging damages of approximately \$16 million (Canadian) for remedial work, loss of profits and related engineering/redesign costs due to the alleged breach by one of our former subsidiaries of its engineering design obligations relating to the supply and installation of heat recovery steam generators, MI, which provided a guarantee to certain obligations of that former subsidiary, and two bonding companies, with whom MII entered into an indemnity arrangement, were also named as defendants. On March 20, 2007, the Court granted summary judgment in favor of all defendants and dismissed all claims of Iroquois Falls Power Corp. On April 5, 2007, Iroquois Falls Power Corp. filed a notice of appeal.

In the proceeding entitled *Antoine, et al. v. J. Ray McDermott, Inc., et al.*, filed in the 24th Judicial District Court, Jefferson Parish, Louisiana by approximately 88 plaintiffs against approximately 215 defendants, including J. Ray McDermott, Inc. (JRMI) and Delta Hudson Engineering Corporation, another affiliate of ours, the Court dismissed the Plaintiffs' claims on January 10, 2007, without prejudice to their right to refile. On January 29, 2007, in a matter entitled *Boudreaux, et al v. McDermott, Inc., et al.*, originally filed in the United States District Court for the Southern District of Texas, 21 plaintiffs originally named in the *Antoine* matter filed suit against JRMI, MI and approximately 30 other employer defendants, alleging Jones Act seaman status and generally alleging exposure to welding fumes, solvents, dyes, industrial paints and noise. On May 2, 2007, Boudreaux was transferred to the United States District Court for the Eastern District of Louisiana. Additionally, on January 29, 2007, in a matter entitled *Antoine, et al. v. McDermott, Inc., et al.*, filed in the 164th Judicial District Court for Harris County, Texas, 43 plaintiffs originally named in the *Antoine* Louisiana State Court action filed suit against JRMI, MI and approximately 65 other employer defendants and 42 maritime products defendants, alleging Jones Act seaman status and generally alleging personal injuries for exposure to asbestos and noise. The Plaintiffs seek monetary damages in an unspecified amount in both cases and attorneys' fees in the new *Antoine* case. We intend to continue to vigorously defend these claims.

Other

We have been advised by the IRS of potential proposed unfavorable tax adjustments related to the 2001 through 2003 tax years. We have reviewed the IRS positions and disagree with certain proposed adjustments. Accordingly, we have filed a protest with the IRS regarding the resolution of these issues. We have provided for amounts that we believe will be ultimately payable under the proposed adjustments; however, these proposed IRS adjustments, should they be sustained, would result in a tax liability of approximately \$15 million in excess of amounts provided for in our condensed consolidated financial statements.

The reorganization of the MI and JRMH U.S. tax groups, which was completed on December 31, 2006, resulted in a material, favorable impact on our consolidated financial results for the year ended December 31, 2006. Although we believe that the tax result of the reorganization as reported in our consolidated financial statements for the year ended December 31, 2006 is accurate, the tax results derived will likely be subject to audit, or other challenge, by the IRS. Should the IRS' interpretation of the tax law in this regard differ from our interpretation, such that adjustments are proposed or sustained by the IRS, there could be a material adverse effect on our consolidated financial results as reported and our expected future cash flows.

For a detailed description of these and other pending proceedings, please refer to Notes 10 and 20 to the consolidated financial statements included in Part II of our annual report on Form 10-K for the year ended December 31, 2006.

Additionally, due to the nature of our business, we are, from time to time, involved in routine litigation or subject to disputes or claims related to our business activities, including, among other things:

- performance-related or warranty-related matters under our customer and supplier contracts and other business arrangements; and

- workers' compensation claims, Jones Act claims, premises liability claims and other claims.

In our management's opinion, based upon our prior experience, none of these other litigation proceedings, disputes and claims are expected to have a material adverse effect on our consolidated financial position, results of operations or cash flows.

Table of Contents**NOTE 7 STOCK-BASED COMPENSATION**

Total stock-based compensation expense recognized for the three months ended March 31, 2007 and 2006 was as follows:

	Comp Expense	Tax Benefit (Unaudited) (In thousands)	Net Impact
	Quarter Ended March 31, 2007		
Stock Options	\$ 911	\$ (274)	\$ 637
Restricted Stock	86	(21)	65
Performance Shares	2,997	(957)	2,040
Performance Units	649	(217)	432
TOTAL	\$ 4,643	\$ (1,469)	\$ 3,174
	Quarter Ended March 31, 2006		
Stock Options	\$ 1,139	\$ (258)	\$ 881
Restricted Stock	184	(39)	145
Performance Units	5,800	(1,499)	4,301
TOTAL	\$ 7,123	\$ (1,796)	\$ 5,327

NOTE 8 SEGMENT REPORTING

An analysis of our operations by segment is as follows:

	Three Months Ended March 31, 2007 2006⁽²⁾ (Unaudited) (In thousands)	
REVENUES		
Offshore Oil and Gas Construction	\$ 550,269	\$295,439
Government Operations	161,399	160,999
Power Generation Systems	655,414	189,023
Adjustments and Eliminations ⁽¹⁾	(3,652)	(554)
	\$ 1,363,430	\$644,907

⁽¹⁾Segment revenues are net of the following intersegment transfers and other adjustments:

Offshore Oil and Gas Construction Transfers	\$ 3,497	\$ 486
Government Operations Transfers	140	43
Power Generation Systems Transfers	15	25
	\$ 3,652	\$ 554

- (2) Our Power Generation Systems segment for the three months ended March 31, 2006 includes approximately one month (March 2006) of results attributable to B&W. We began consolidating the results of B&W when B&W emerged from bankruptcy, effective February 22, 2006. B&W's revenues and operating income included in the three months ended March 31, 2006 total approximately \$189.0 million and \$26.3 million, respectively.

Adjusted weighted average common shares and assumed conversions	114,219,206	112,954,929
Diluted earnings per common share	\$ 1.38	\$ 0.49

NOTE 10 RESTRICTED CASH

At March 31, 2007, we had restricted cash and cash equivalents totaling \$114.6 million, of which \$1.1 million is required to meet reinsurance reserve requirements of our captive insurance companies and \$113.5 million is held in restricted foreign accounts.

NOTE 11 SUBSEQUENT EVENT***Contract Termination and Settlement***

As disclosed in Parts I and II of our annual report on Form 10-K for the year ended December 31, 2006, B&W received notice from TXU Generation Development Company LLC (TXU) to suspend activity on five of the eight supercritical coal-fired boilers and selective catalytic reduction systems that were originally planned for TXU s solid-fuel power generation program in Texas. At December 31, 2006, the value of all eight units was excluded from our consolidated backlog, as TXU announced it did not intend to pursue any of these projects. In the three months ended March 31, 2007, B&W recognized revenues based on percentage-of-completion accounting for these eight units totaling approximately \$110 million.

On April 13, 2007, B&W and TXU entered into a termination and settlement agreement on the five suspended units. Under this settlement agreement, B&W received a payment from TXU of approximately \$79 million in April 2007, which completes TXU s \$243 million financial obligation to B&W related to units four through eight, other than ongoing storage and commission expenses. B&W will record the termination and settlement in the three

months ending June 30, 2007 and expects to record additional revenues totaling approximately \$120 million as a result of completion of the settlement.

B&W is continuing to fulfill its contracts to supply the three units not covered by the termination and settlement agreement, and TXU and B&W have agreed to cooperate in the marketing and modification of these units, as may be necessary, to help meet expanding U.S. electrical power demands. Consistent with our treatment at December 31, 2006, we have excluded the dollar value of these three units from our consolidated ending backlog at March 31,

Table of Contents

2007, as TXU still does not intend to use these units and a new buyer has not yet contracted to purchase these units. We believe if a new buyer does not emerge, TXU will likely terminate these units.

Tax Refund

On April 12, 2007, MI received a \$272 million federal tax refund from the IRS. This federal tax refund resulted from carrying back to prior tax years the tax loss generated in 2006, primarily as a result of the \$955 million of asbestos-related payments made during 2006 in connection with the settlement of B&W's Chapter 11 reorganization proceedings. A number of these prior tax years are currently open and, therefore, certain adjustments may still occur before final settlement of these tax years.

Retirement of Debt

On April 12, 2007, B&W retired the \$250 million term loan portion of its credit facility. Under the terms of the facility, B&W had the right to prepay without penalty.

Acquisition of Marine Mechanical Corporation

On May 1, 2007, BWXT completed the previously announced acquisition of Marine Mechanical Corporation (MMC) for approximately \$75 million. MMC, headquartered in Euclid, Ohio, designs, manufactures and supplies electro-mechanical equipment used by the United States Navy.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations
CAUTIONARY STATEMENT CONCERNING FORWARD-LOOKING STATEMENTS

The following information should be read in conjunction with the unaudited condensed consolidated financial statements and the notes thereto included under Item 1 and the audited consolidated financial statements and the notes thereto and Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations included in our annual report on Form 10-K for the year ended December 31, 2006.

In this quarterly report on Form 10-Q, unless the context otherwise indicates, we, us and our mean MII and its consolidated subsidiaries.

We are including the following discussion to inform our existing and potential security holders generally of some of the risks and uncertainties that can affect our company and to take advantage of the safe harbor protection for forward-looking statements that applicable federal securities law affords.

From time to time, our management or persons acting on our behalf make forward-looking statements to inform existing and potential security holders about our company. These statements may include projections and estimates concerning the timing and success of specific projects and our future backlog, revenues, income and capital spending. Forward-looking statements are generally accompanied by words such as estimate, project, predict, believe, expect, anticipate, plan, goal or other words that convey the uncertainty of future events or outcomes. In addition, sometimes we will specifically describe a statement as being a forward-looking statement and refer to this cautionary statement.

In addition, various statements in this quarterly report on Form 10-Q, including those that express a belief, expectation or intention, as well as those that are not statements of historical fact, are forward-looking statements. These forward-looking statements speak only as of the date of this report; we disclaim any obligation to update these statements unless required by securities law, and we caution you not to rely on them unduly. We have based these forward-looking statements on our current expectations and assumptions about future events. While our management considers these expectations and assumptions to be reasonable, they are inherently subject to significant business, economic, competitive, regulatory and other risks, contingencies and uncertainties, most of which are difficult to predict and many of which are beyond our control. These risks, contingencies and uncertainties relate to, among other matters, the following:

general economic and business conditions and industry trends;

general developments in the industries in which we are involved;

decisions about offshore developments to be made by oil and gas companies;

decisions on spending by the U.S. Government and electric power generating companies;

the highly competitive nature of most of our businesses;

the ability of our suppliers to deliver raw materials in sufficient quantities and in a timely manner;

Table of Contents

our future financial performance, including compliance with covenants in our credit agreements and other debt instruments and availability, terms and deployment of capital;

the continued availability of qualified personnel;

the operating risks normally incident to offshore construction operations and nuclear operations;

changes in, or our failure or inability to comply with, government regulations and adverse outcomes from legal and regulatory proceedings;

changes in, and liabilities relating to, existing or future environmental regulatory matters;

rapid technological changes;

the realization of deferred tax assets, including through the reorganization we completed in December 2006;

the consequences of significant changes in interest rates and currency exchange rates;

difficulties we may encounter in obtaining regulatory or other necessary approvals of any strategic transactions;

social, political and economic situations in foreign countries where we do business, including countries in the Middle East and Asia Pacific and the former Soviet Union;

the possibilities of war, other armed conflicts or terrorist attacks;

the effects of asserted and unasserted claims;

our ability to obtain surety bonds and letters of credit;

our ability to maintain builder's risk, liability, property and other insurance in amounts and on terms we consider adequate and at rates that we consider economical;

the aggregated risks retained in our insurance captives; and

the impact of the insurance coverage surrendered as part of the B&W Chapter 11 Settlement.

We believe the items we have outlined above are important factors that could cause estimates in our financial statements to differ materially from actual results and those expressed in a forward-looking statement made in this report or elsewhere by us or on our behalf. We have discussed many of these factors in more detail elsewhere in this report and in our annual report on Form 10-K for the year ended December 31, 2006. These factors are not necessarily all the important factors that could affect us. Unpredictable or unknown factors we have not discussed in this report could also have material adverse effects on actual results of matters that are the subject of our forward-looking statements. We do not intend to update our description of important factors each time a potential important factor arises, except as required by applicable securities laws and regulations. We advise our security holders that they should (1) be aware that important factors not referred to above could affect the accuracy of our forward-looking statements and (2) use caution and common sense when considering our forward-looking statements.

GENERAL

In general, our business segments are composed of capital-intensive businesses that rely on large contracts for a substantial amount of their revenues. Each of our business segments is financed on a stand-alone basis. Our debt covenants generally preclude using the financial resources or the movement of excess cash from one segment for the

benefit of the other. For further discussion, see Liquidity and Capital Resources below.

As of March 31, 2007, in accordance with the percentage-of-completion method of accounting, we have provided for our estimated costs to complete all our ongoing contracts. However, it is possible that current estimates could change due to unforeseen events, which could result in adjustments to overall contract costs. The risk on fixed-priced contracts is that revenue from the customer does not rise to cover increases in our costs. It is possible that current estimates could materially change for various reasons, including, but not limited to, changes in job conditions, variations in labor and equipment productivity and increases in the cost of raw materials, including various types of steel. Increases in costs on our fixed-price contracts could have a material adverse impact on our results of operations, financial condition and cash flow. Alternatively, reductions in overall contract costs at completion could materially improve our results of operations, financial condition and cash flow.

Offshore Oil and Gas Construction Segment

The revenues of our Offshore Oil and Gas Construction segment largely depend on the level of oil and gas development activity in the world's major hydrocarbon-producing regions. The decision-making process for oil and gas companies in making capital expenditures on offshore oil and gas construction for a development project differs depending on whether the project involves new or existing development. In the case of new development projects, the demand for offshore oil and gas construction generally follows the exploratory drilling and, in some cases, initial development drilling activities. Based on the results of these activities and evaluations of field economics, customers

Table of Contents

determine whether to install new platforms and new infrastructure, such as subsea gathering lines and pipelines. For existing development projects, demand for offshore oil and gas construction is generated by decisions to, among other things, expand development in existing fields and expand existing infrastructure.

Government Operations Segment

The revenues of our Government Operations segment primarily depend on spending by the U.S. Government. As a supplier of major nuclear components for certain U.S. Government programs, BWXT is a significant participant in the defense industry. Additionally, with BWXT's unique capability of full life-cycle management of special nuclear materials, facilities and technologies, BWXT is well-positioned to continue to participate in the continuing cleanup and management of the Department of Energy's nuclear sites and weapons complexes.

Power Generation Systems

The revenues of our Power Generation Systems segment are largely a function of capital spending by electric power generating companies and other steam-using industries. B&W is a leading supplier of fossil fuel-fired steam generating systems, large replacement commercial nuclear steam generators, environmental equipment and components and related services to customers around the world. It designs, engineers, manufactures, constructs and services large utility and industrial power generation systems, including boilers used to generate steam in electric power plants, pulp and paper making, chemical and process applications and other industrial uses.

For a summary of the critical accounting policies and estimates that we use in the preparation of our unaudited condensed consolidated financial statements, see Item 7 Management's Discussion and Analysis of Financial Condition and Results of Operations in our annual report on Form 10-K for the year ended December 31, 2006. There have been no material changes to these policies during the three months ended March 31, 2007, except as disclosed in the notes to condensed consolidated financial statements included in this report.

RESULTS OF OPERATIONS THREE MONTHS ENDED MARCH 31, 2007 VS. THREE MONTHS ENDED MARCH 31, 2006**McDermott International, Inc. (Consolidated)**

Our revenues increased approximately 111%, or \$718.5 million, to \$1,363.4 million for the three months ended March 31, 2007, compared to \$644.9 million for the three months ended March 31, 2006, primarily due to B&W being consolidated in our results of operations for approximately one month in the three-month period ending March 31, 2006 compared to the full period in the three months ended March 31, 2007. In addition, our Offshore Oil and Gas Construction segment produced an 86% increase in its revenues in the three months ended March 31, 2007 compared to the three months ended March 31, 2006. Our Middle East and Asia Pacific regions of our Offshore Oil and Gas Construction segment in particular yielded revenue increases exceeding four times their March 31, 2006 levels. Our Government Operations segment revenues were up slightly in the three months ended March 31, 2007 compared to the three months ended March 31, 2006.

Segment Operating Income, which is before equity in income of investees and gains (losses) on asset disposals and impairments net, increased from \$84.6 million in the three months ended March 31, 2006 to \$190.5 million in the three months ended March 31, 2007. Our three operating segments each improved substantially in the three months ended March 31, 2007 compared to the three months ended March 31, 2006, with our Offshore Oil and Gas Construction segment yielding segment operating income in excess of three times its 2006 level. Our Government Operations segment experienced an increase of approximately 34% in its segment operating income in the three months ended March 31, 2007 compared to the three months ended March 31, 2006. Results for our Power Generation Systems segment include segment operating income for approximately one month attributable to B&W in the three months ended March 31, 2006, compared to a full period for the three months ending March 31, 2007.

Offshore Oil and Gas Construction

Revenues increased approximately 86%, or \$254.8 million, to \$550.3 million in the three months ended March 31, 2007 compared to the three months ended March 31, 2006, primarily due to an increase in activities in our Middle East, Asia Pacific and Caspian regions.

Segment operating income, which is before equity in loss of investees and gains (losses) on asset disposals and impairments net, increased \$83.1 million from \$38.9 million in the three months ended March 31, 2006 to \$122.0 million in the three months ended March 31, 2007. This increase was primarily attributable to our Middle East

region's higher fabrication activities and productivity improvements, along with cost savings in our marine projects. In addition, our Caspian region improved due to contract change orders and agreements which were finalized as part

Table of Contents

of our contract close-out process on projects. Also, our Asia Pacific region improved due to increased fabrication activity, and our Americas region improved due to increased fabrication activity and settlements on completed contracts. For the three months ended March 31, 2007, we realized benefits from project close-outs, change orders and settlements totaling approximately \$40 million, compared to approximately \$9 million for the three months ended March 31, 2006. These increases were partially offset by higher general and administrative expenses in the three months ended March 31, 2007 compared to the three months ended March 31, 2006.

Gains (losses) on asset disposals and impairments net increased by \$16.1 million in the three months ended March 31, 2007, primarily attributable to an impairment of \$16.4 million in the three months ended March 31, 2006 associated with our former joint venture in Mexico.

Equity in loss of investees increased from \$0.7 million in the three months ended March 31, 2006 to \$0.8 million in the three months ended March 31, 2007, primarily attributable to our share of expenses in our deepwater solutions joint venture formed in 2005.

Government Operations

Revenues increased approximately 0.2%, or \$0.4 million, to \$161.4 million in the three months ended March 31, 2007, compared to \$161.0 million in the three months ended March 31, 2006, primarily due to higher volumes in the manufacture of nuclear components for certain U. S. Government programs. In addition, we experienced higher revenues in our management and operating contracts principally in South Carolina and New Mexico. These increases were partially offset by lower revenues from the completion of our contract for the recovery of uranium, lower revenues attributable to our commercial nuclear environmental services activities, and lower fees for engineering services at certain DOE sites

Segment operating income, which is before equity in income of investees and gains on asset disposals and impairments net, increased \$6.8 million to \$26.7 million in the three months ended March 31, 2007, compared to \$19.9 million in the three months ended March 31, 2006, primarily attributable to higher volume and margins from our manufacture of nuclear components for certain U.S. Government programs, including the completion of a multi-award agreement with our DOE customer. In addition, we experienced additional fees for our management and operating contracts mainly in South Carolina and New Mexico and lower pension plan expense in the three months ended March 31, 2007. These increases were partially offset by lower volume and margins from our other U.S. Government recovery efforts where our contract has terminated and the lower volume and margins on our nuclear environmental commercial activities.

Gains on asset disposals and impairments net increased \$1.6 million in the three months ended March 31, 2007, primarily due to the sale of certain assets of our fuel cell and reformer business.

Equity in income of investees remained unchanged at \$6.5 million in the three months ended March 31, 2007, as compared to the three months ended March 31, 2006. We experienced additional fees from our joint venture in Texas, which were offset by lower fees from our joint venture in Idaho.

Power Generation Systems

Revenues increased approximately 247%, or \$466.4 million, to \$655.4 for the three months ended March 31, 2007, compared to \$189.0 million for the three months ended March 31, 2006, primarily due to B&W being consolidated in our results of operations for approximately one month in the three-month period ending March 31, 2006 compared to the full period in the three months ended March 31, 2007.

Segment operating income, which is before equity in income of investees and gains on asset disposals and impairments net, increased approximately \$16.2 million to \$41.9 million for the three months ended March 31, 2007, as compared to \$25.7 million for the three months ended March 31, 2006. In addition to the increase attributable to B&W being consolidated in our results of operations for approximately one month in the three-month period ending March 31, 2006 compared to a full period in the three months ended March 31, 2007, the increase was partially attributable to higher margins in operations and maintenance contracts, higher margin and volumes in replacement parts and nuclear service activities, higher volume in utility steam system fabrication and the fabrication, repair and retrofit of existing facilities. In addition, we experienced lower Chapter 11 reorganization expenses in the three months ended March 31, 2007 compared to the three months ended March 31, 2006. These increases were partially offset by lower margins in utility steam system fabrication and the fabrication, repair, and retrofit of existing facilities.

Table of Contents

Equity in income of investees decreased \$0.2 million to \$1.6 million in the three months ended March 31, 2007, primarily attributable to a decrease in income recognized from our joint venture in China, partially offset by an increase in income recognized from our joint venture in Pennsylvania.

Corporate

Unallocated corporate expenses decreased approximately \$1.4 million to \$6.9 million for the three months ended March 31, 2007, as compared to \$8.4 million for the three months ended March 31, 2006, primarily due to a decrease in stock-based compensation expense.

Other Income Statement Items

Interest income increased \$4.8 million to \$12.3 million for the three months ended March 31, 2007, primarily due to an increase in average cash equivalents and investments.

Other expense net increased \$2.3 million to \$3.9 million for the three months ended March 31, 2007, primarily due to higher currency exchange losses in the current period.

Provision for Income Taxes

For the three months ended March 31, 2007, the provision for income taxes increased \$12.9 million to \$33.3 million, while income before provision for income taxes increased \$114.7 million to \$191.3 million. Our effective tax rate for the three months ended March 31, 2007 was approximately 17.4%.

We have provided for income taxes based on the tax laws and rates in the countries in which we conduct our operations. MII is a Panamanian corporation that has earned all of its income outside of Panama. As a result, we are not subject to income tax in Panama. We operate in the United States taxing jurisdiction and various other taxing jurisdictions around the world. Each of these jurisdictions has a regime of taxation that varies from the others. The taxation regimes vary not only with respect to nominal rates, but also with respect to the allowability of deductions, credits and other benefits and tax bases (for example, revenue versus income). These variances, along with variances in our mix of income from these jurisdictions, contribute to shifts in our effective tax rate.

As more fully described in Parts I and II of our annual report on Form 10-K for the year ended December 31, 2006, the reorganization of the MI and JRMH U.S. tax groups into a single consolidated U.S. tax group was completed on December 31, 2006. Beginning January 1, 2007, the results of the former separate U.S. tax groups are consolidated through MHI, and a single U.S. tax return will be filed.

Income before provision for income taxes, provision for income taxes and effective tax rates for MII major subsidiaries are as shown below. To provide for a better comparison with the results for the three-month period ended March 31, 2006, we continue to disclose the separate company results of MI and JRMH, which, as indicated above, will be consolidated for tax purposes effective January 1, 2007.

	Income before Provision for Income Taxes		Provision for Income Taxes (Unaudited)		Effective Tax Rate	
	For the three months ended March 31,					
	2007 (In thousands)	2006	2007 (In thousands)	2006	2007	2006
Primarily United States:						
MI	\$ 49,287	\$ 59,541	\$20,044	\$12,624	40.67%	21.20%
JRMH	(6,396)	(31,728)	(2,035)	6	31.82%	(0.02)%
Subtotal (MHI for 2007)	42,891	27,813	18,009	12,630	41.99%	45.41%
Non-United States:						
International Subsidiaries	148,446	48,796	15,267	7,764	10.28%	15.91%

Total MII	\$191,337	\$ 76,609	\$33,276	\$20,394	17.39%	26.62%
------------------	-----------	-----------	----------	----------	--------	--------

We are subject to U.S. federal income tax at the rate of 35% on our U.S. operations. The effective tax rate of our U.S. operations is primarily affected by applicable state income taxes on our profitable U.S. subsidiaries.

In the three months ended March 31, 2006, MI reached a settlement in a tax dispute with United States and Canadian tax authorities, primarily related to transfer pricing matters, resulting in an adjustment to the tax liability

20

Table of Contents

and associated accrued interest established for the disputed item. This favorably impacted MI's income before income taxes and provision for income taxes by \$13.2 million and \$4.7 million, respectively. In addition, in the three months ended March 31, 2006, a valuation allowance for the realization of deferred tax assets was provided against JRMH's current losses in accordance with SFAS No. 109.

On April 12, 2007, MI received a \$272 million federal income tax refund from the United States Internal Revenue Service. This federal tax refund resulted from carrying back to prior tax years the tax loss generated in 2006, primarily as a result of the \$955 million of asbestos-related payments made during 2006 in connection with the settlement of asbestos-related claims made in B&W's Chapter 11 bankruptcy proceedings. A number of these prior tax years are currently open and, therefore, certain adjustments may still occur before final settlement of these tax years.

Effective January 1, 2007, we adopted the provisions of FASB Interpretation No. 48, Accounting for Uncertainty in Income Taxes (FIN 48). As a result of this adoption, we recognized a charge of approximately \$12 million to our accumulated deficit component of stockholders' equity. Additionally, as of the adoption date, we had gross tax-effected unrecognized tax benefits of approximately \$70 million, of which approximately \$68 million would impact our effective tax rate if recognized.

As part of the adoption of FIN 48, we will begin to recognize interest and penalties related to unrecognized tax benefits in income tax expense. As of January 1, 2007, we have recorded a liability of approximately \$27 million for the payment of tax-related interest and penalties.

Backlog

	March 31, 2007	December 31, 2006
	(Unaudited)	
	(In thousands)	
Offshore Oil and Gas Construction	\$4,208,217	\$4,138,545
Government Operations	1,456,593	1,269,328
Power Generation Systems	2,260,520	2,225,149
Total Backlog	\$7,925,330	\$7,633,022

Of the March 31, 2007 backlog, we expect to recognize revenues as follows:

	Q2 2007	Q3 2007	Q4 2007	2008	Thereafter
	(Unaudited)				
	(In approximate millions)				
Offshore Oil and Gas Construction	\$ 600	\$ 650	\$ 760	\$1,770	\$ 430
Government Operations	140	150	150	440	580
Power Generation Systems	340	360	280	640	640
Total Backlog	\$1,080	\$1,160	\$1,190	\$2,850	\$1,650

At March 31, 2007, Government Operations' backlog with the U. S. Government was \$1.4 billion, which is substantially fully funded. Only \$15.1 million had not been funded as of March 31, 2007.

At March 31, 2007, Power Generation Systems' backlog with the U. S. Government was \$56.4 million, which was fully funded.

As disclosed in Parts I and II of our annual report on Form 10-K for the year ended December 31, 2006, B&W received notice from TXU Generation Development Company LLC (TXU) to suspend activity on five of the eight supercritical coal-fired boilers and selective catalytic reduction systems that were originally planned for TXU's

solid-fuel power generation program in Texas. At December 31, 2006, the value of all eight units was excluded from our consolidated backlog, as TXU announced it did not intend to pursue any of these projects. In the three months ended March 31, 2007, B&W recognized revenues based on percentage-of-completion accounting for these eight units totaling approximately \$110 million.

On April 13, 2007, B&W and TXU entered into a termination and settlement agreement on the five suspended units. Under this settlement agreement, B&W received a payment from TXU of approximately \$79 million in April 2007, which completes TXU's \$243 million financial obligation to B&W related to units four through eight, other

Table of Contents

than ongoing storage and commission expenses. B&W will record the termination and settlement in the three months ending June 30, 2007 and expects to record additional revenues totaling approximately \$120 million as a result of completion of the settlement.

B&W is continuing to fulfill its contracts to supply the three units not covered by the termination and settlement agreement, and TXU and B&W have agreed to cooperate in the marketing and modification of these units, as may be necessary, to help meet expanding U.S. electrical power demands. Consistent with our treatment at December 31, 2006, we have excluded the dollar value of these three units from our consolidated ending backlog at March 31, 2007, as TXU still does not intend to use these units and a new buyer has not yet contracted to purchase these units. We believe if a new buyer does not emerge, TXU will likely terminate these units.

Liquidity and Capital Resources***JRM***

On June 6, 2006, JRM entered into a \$500 million senior secured credit facility with a syndicate of lenders (the JRM Credit Facility). The JRM Credit Facility comprises a five-year, \$400 million revolving credit (all of which may be used for the issuance of letters of credit and \$250 million of which may be used for revolver borrowings), which matures on June 6, 2011, and a six-year, \$100 million synthetic letter of credit subfacility, which matures on June 6, 2012. The proceeds of the JRM Credit Facility are available for working capital needs and other general corporate purposes of JRM and its subsidiaries.

JRM's obligations under the JRM Credit Facility are unconditionally guaranteed by substantially all of JRM's wholly owned subsidiaries and secured by liens on substantially all of JRM's and these subsidiaries' assets (other than cash, cash equivalents, equipment and certain foreign assets), including their major marine vessels. JRM is permitted to prepay amounts outstanding under the JRM Credit Facility at any time without penalty. Other than customary mandatory prepayments on certain contingent events, the JRM Credit Facility requires only interest payments on a quarterly basis until maturity. Loans outstanding under the revolving credit subfacility bear interest at either the Eurodollar rate plus a margin ranging from 2.25% to 2.50% per annum or the base rate plus a margin ranging from 1.25% to 1.50% per annum. The applicable margin for revolving loans varies depending on JRM's credit ratings. JRM is charged a commitment fee on the unused portions of the \$400 million revolving credit subfacility, and that fee varies between 0.375% and 0.50% per annum depending on JRM's credit ratings. Additionally, JRM is charged a letter of credit fee of between 2.25% and 2.50% per annum with respect to the amount of each letter of credit issued under the revolving credit subfacility. JRM is also charged a fee of 2.60% per annum on the full amount of the synthetic letter of credit subfacility, regardless of whether the subfacility is drawn upon. An additional 0.125% annual fee is charged on the amount of each letter of credit issued under both subfacilities.

The JRM Credit Facility contains customary financial covenants relating to leverage and interest coverage and includes covenants that restrict, among other things, debt incurrence, liens, investments, acquisitions, asset dispositions, dividends, prepayments of subordinated debt, mergers, transactions with affiliates and capital expenditures. JRM was in compliance with these covenants at March 31, 2007.

At March 31, 2007, JRM had no borrowings outstanding, and letters of credit issued on the JRM Credit Facility totaled \$272.2 million. In addition, JRM had \$130.8 million in outstanding unsecured letters of credit under separate arrangements with financial institutions at March 31, 2007.

On December 22, 2005, JRM, as guarantor, and its subsidiary, J. Ray McDermott Middle East, Inc., entered into a \$105.2 million unsecured performance guarantee issuance facility with a syndicate of commercial banking institutions. The outstanding amount under this facility is included in the \$130.8 million outstanding referenced above. This facility provides credit support for bank guarantees issued in favor of three projects awarded to JRM. The term of this facility is for the duration of these projects, and the average commission rate is less than 4.50% on an annualized basis.

At March 31, 2007, JRM had approximately \$28 million in accounts and notes receivable due from its former joint venture in Mexico. This joint venture has experienced liquidity problems. Recognition of a gain of approximately \$5.4 million on the sale of the *DB17* in September 2004 is currently being deferred. JRM expects to collect all net accounts and notes receivable currently owed from this joint venture.

Table of Contents

Based on JRM's liquidity position, we believe JRM has sufficient cash and letter of credit and borrowing capacity to fund its operating requirements for at least the next 12 months.

BWXT

On December 9, 2003, BWXT entered into a three-year, unsecured, \$125 million credit facility (the BWXT Credit Facility). The BWXT Credit Facility may be increased to a total of \$150 million at our discretion, and in fact, it was increased to \$135 million in January 2004. In March 2005, the maturity date was extended to March 18, 2010, and on November 7, 2005, BWXT and its lenders amended the BWXT Credit Facility to, among other things, permit the full amount of the facility to be used for loans.

The BWXT Credit Facility is a revolving credit agreement providing for borrowings and issuances of letters of credit in an aggregate amount of up to \$135 million. The BWXT Credit Facility requires BWXT to comply with various financial and nonfinancial covenants and reporting requirements. The financial covenants require BWXT to maintain a maximum leverage ratio, a minimum fixed charge coverage ratio and a maximum debt to capitalization ratio. BWXT was in compliance with these covenants at March 31, 2007. The interest rate at March 31, 2007 was 8.75%. BWXT is charged an annual commitment fee of 0.375%, which is payable quarterly. Additionally, BWXT is charged a letter of credit fee of between 1.50% and 2.50% per annum with respect to the amount of each letter of credit issued. An additional 0.125% per annum fee is charged on the amount of each letter of credit issued. At March 31, 2007, BWXT had no borrowings outstanding, and letters of credit outstanding under the facility totaled \$50.8 million.

Based on BWXT's liquidity position, we believe BWXT has sufficient cash and letter of credit and borrowing capacity to fund its operating requirements for at least the next 12 months.

B&W

On February 22, 2006, B&W entered into a \$650 million senior secured credit facility with a syndicate of lenders (the B&W Facility). The B&W Facility includes a five-year, \$200 million revolving credit subfacility (the entire availability of which may be used for the issuance of letters of credit or working capital requirements) and a six-year, \$200 million letter of credit subfacility.

The B&W Facility also originally included a commitment by certain of the lenders to loan B&W up to \$250 million in term debt to refinance the \$250 million promissory note payable to a trust under the B&W Chapter 11 plan of reorganization. On November 30, 2006, B&W drew down \$250 million on its term loan under the B&W Facility and completed its obligation to pay the \$250 million promissory note to the trust on December 1, 2006. On April 12, 2007, B&W retired the \$250 million term loan portion of its credit facility without penalty. This payment was made using cash on hand, including B&W's portion of the \$272 million federal tax refund received by MI on April 12, 2007.

B&W's obligations under the B&W Facility are unconditionally guaranteed by all of B&W's domestic subsidiaries and secured by liens on substantially all of B&W's and these subsidiaries' assets, excluding cash and cash equivalents.

Loans outstanding under the revolving credit subfacility bear interest at either the Eurodollar rate plus a margin ranging from 2.75% and 3.25% per annum or the base rate plus a margin ranging from 1.75% to 2.25% per annum. The applicable margin for revolving loans varies depending on B&W's credit ratings. The applicable margin for the \$250 million term loan, which was a Eurodollar rate loan, was 3.0% per annum. The interest rate for the term loan at March 31, 2007 was 8.32%. B&W is charged a commitment fee on the unused portion of the revolving credit subfacility, and that fee varies between 0.25% and 0.50% per annum depending on B&W's credit ratings. Additionally, B&W is charged a letter of credit fee of between 2.75% and 3.25% per annum with respect to the amount of each letter of credit issued under the revolving credit subfacility. B&W is also charged a fee of 2.85% per annum on the full amount of the synthetic letter of credit subfacility, regardless of whether the subfacility is drawn upon. An additional 0.125% per annum fee is charged on the amount of each letter of credit issued under each subfacility.

The B&W Facility only requires interest payments for the revolving credit subfacility and the letter of credit subfacility on a quarterly basis until maturity, which is February 22, 2011 and February 22, 2012, respectively. B&W may prepay amounts outstanding under the B&W Facility at any time without penalty.

Table of Contents

The B&W Facility contains customary financial covenants, including maintenance of a maximum leverage ratio and a minimum interest coverage ratio, and covenants that, among other things, restrict B&W's ability to incur debt, create liens, make investments and acquisitions, sell assets, pay dividends, prepay subordinated debt, merge with other entities, engage in transactions with affiliates and make capital expenditures. The B&W Facility also contains customary events of default. B&W was in compliance with these covenants at March 31, 2007.

As of March 31, 2007, B&W had outstanding borrowings of \$250 million under its term loan feature of the B&W Facility, and letters of credit issued on the B&W Facility totaled \$244.3 million. As discussed above, the \$250 million term loan was paid in full in April 2007.

Based on B&W's liquidity position, we believe B&W has sufficient cash and letter of credit and borrowing capacity to fund its operating requirements for at least the next 12 months.

OTHER

One of B&W's Canadian subsidiaries has received notice of a possible warranty claim on one of its projects on a contract executed in 1998. This project included a limited-term performance bond totaling approximately \$140 million, for which MII entered into an indemnity arrangement with the surety underwriters. At this time, we are continuing to analyze the facts and circumstances surrounding this issue. It is possible that B&W's subsidiary may incur warranty costs in excess of amounts provided for as of March 31, 2007. It is also possible that a claim could be initiated by the B&W subsidiary's customer against the surety underwriter should certain events occur. If such a claim were successful, the surety could seek to recover from B&W's subsidiary the costs incurred in satisfying the customer claim. If the surety should seek recovery from B&W's subsidiary, we believe that B&W's subsidiary would have adequate liquidity to satisfy its obligations. However, the ultimate resolution of this possible claim is uncertain, and an adverse outcome could have a material adverse impact on our consolidated financial position, results of operations and cash flows.

We are currently exploring growth strategies across our segments through acquisitions to expand and complement our existing businesses. As we pursue these opportunities, we expect they would be funded by cash on hand, external financing or both.

On May 1, 2007, BWXT completed the previously announced acquisition of Marine Mechanical Corporation (MMC) for approximately \$75 million. MMC, headquartered in Euclid, Ohio, designs, manufactures and supplies electro-mechanical equipment used by the United States Navy.

At March 31, 2007, we had restricted cash and cash equivalents totaling \$114.6 million, of which \$1.1 million is required to meet reinsurance reserve requirements of our captive insurance companies and \$113.5 million is held in restricted foreign accounts.

At March 31, 2007 and December 31, 2006, our balance in cash and cash equivalents on our consolidated balance sheets included approximately \$15.8 million and \$18.0 million, respectively, in adjustments for bank overdrafts, with a corresponding increase in accounts payable for these overdrafts.

Our working capital, excluding restricted cash and cash equivalents, increased by approximately \$386.1 million from negative \$422.8 million at December 31, 2006 to negative \$36.7 million at March 31, 2007, primarily attributable to the reclassification of approximately \$274 million of income taxes receivable from noncurrent to current at March 31, 2007 and the increase in accounts receivable discussed below.

Our net cash provided by operations was approximately \$74.6 million for the three months ended March 31, 2007, compared to approximately \$140.8 million for the three months ended March 31, 2006. This decrease was primarily attributable to an increase in accounts receivable, which reflects an increase in revenue generating activities.

Our net cash provided by investing activities decreased by approximately \$64.4 million to \$4.8 million for the three months ended March 31, 2007, compared to \$69.2 million for the three months ended March 31, 2006. This decrease was primarily attributable to the cash acquired from the reconsolidation of B&W and its subsidiaries during the three months ended March 31, 2006 and an increase in restricted cash and cash equivalents, partially offset by higher net maturities/sales of available-for-sale securities during the three months ended March 31, 2007.

Table of Contents

Our net cash provided by financing activities increased by approximately \$0.9 million to \$3.9 million in the three months ended March 31, 2007 from \$3.0 million in the three months ended March 31, 2006, primarily attributable to an increase in excess tax benefits from stock options exercised and restricted stock vested, partially offset by other financing activities.

At March 31, 2007, we had investments with a fair value of \$239.8 million. Our investment portfolio consists primarily of investments in government obligations and other highly liquid money market instruments. As of March 31, 2007, we had pledged approximately \$35.0 million fair value of these investments to secure a letter of credit in connection with certain reinsurance agreements.

See Note 1 to our unaudited condensed consolidated financial statements included in this report for information on new accounting standards.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Our exposures to market risks have not changed materially from those disclosed in Item 7A included in Part II of our annual report on Form 10-K for the year ended December 31, 2006.

Item 4. Controls and Procedures

As of the end of the period covered by this quarterly report, we carried out an evaluation, under the supervision and with the participation of our management, including our Chief Executive Officer and Chief Financial Officer, of the effectiveness of the design and operation of our disclosure controls and procedures (as that term is defined in Rules 13a-15(e) and 15d-15(e) adopted by the SEC under the Securities Exchange Act of 1934, as amended (the Exchange Act)). Our disclosure controls and procedures were developed through a process in which our management applied its judgment in assessing the costs and benefits of such controls and procedures, which, by their nature, can provide only reasonable assurance regarding the control objectives. You should note that the design of any system of disclosure controls and procedures is based in part upon various assumptions about the likelihood of future events, and we cannot assure you that any design will succeed in achieving its stated goals under all potential future conditions, regardless of how remote. Based on the evaluation referred to above, our Chief Executive Officer and the Chief Financial Officer concluded that the design and operation of our disclosure controls and procedures are effective as of March 31, 2007 to provide reasonable assurance that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the rules and forms of the Securities and Exchange Commission, and such information is accumulated and communicated to management as appropriate to allow timely decisions regarding disclosure. There has been no change in our internal control over financial reporting during the quarter ended March 31, 2007 that has materially affected, or is reasonably likely to materially affect, our internal control over financial reporting.

**PART II
OTHER INFORMATION**

Item 1. Legal Proceedings

For information regarding ongoing investigations and litigation, see Note 6 to our unaudited condensed consolidated financial statements in Part I of this report, which we incorporate by reference into this Item.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds

The following table provides information on our purchases of equity securities during the quarter ended March 31, 2007, all of which involved repurchases of restricted shares of MII common stock pursuant to the provisions of employee benefit plans that permit the repurchase of restricted shares to satisfy statutory tax withholding obligations associated with the lapse of restrictions applicable to those shares:

Table of Contents

Period	Total number of shares purchased	Average price paid per share	Total number of shares purchased as part of publicly announced plans or programs	Maximum number of shares that may yet be purchased under the plans or program
January 1, 2007 - March 31, 2007	86,830	\$47.11	not applicable	not applicable
Total	86,830	\$47.11	not applicable	not applicable

Item 5. Other Information

The Compensation Committee of our Board of Directors administers the Executive Incentive Compensation Plan (EICP), a cash bonus plan under which our executive officers participate. The payment amount, if any, of an EICP award is determined based on: (1) the attainment of financial performance measures (85% of the target award); (2) the attainment of individual performance measures (15% of the target award), and (3) the exercise of the Compensation Committee's discretionary authority. On February 27, 2007, our Compensation Committee established 2007 target award opportunities and confidential financial performance goals relative to those opportunities for our named executive officers, Messrs. Bruce W. Wilkinson, Michael S. Taff, Francis S. Kalman, Robert A. Deason, John A. Fees and John T. Nesser III. Those target opportunities and financial performance goals were reported on a Form 8-K dated March 2, 2007. On May 4, 2007, the Company established the following individual performance goals relating to these named executive officers for the year ending December 31, 2007.

For Bruce W. Wilkinson, our Chief Executive Officer, the individual measures of the target EICP award include: achieve specific levels of company-wide health, safety and environmental performance averages; and

positive assessment by the Board of Directors regarding six performance categories selected by the Board of Directors including financial results, strategic planning, communication and succession planning.

For Michael S. Taff, our Senior Vice President and Chief Financial Officer, the individual measures of the target EICP award include:

assess and alter as necessary the capital and organization structure of the Company and its subsidiaries to support Company growth initiatives and facilitate measures to lower cost of capital;

position and lead communication of the Company's results to the investment community; and

develop and implement specific strategies designed to increase financial discipline.

For Francis S. Kalman, our Executive Vice President, the individual measure of the target EICP award was set as follows:

effect successful transition of the CFO function.

For Robert A. Deason, President and Chief Operating Officer of J. Ray McDermott, S.A., the individual measures of the target EICP award include:

achieve specific levels of health, safety and environmental performance averages at our Offshore Oil and Gas Construction segment;

develop a long-term human resource management plan of our Offshore Oil and Gas Construction segment; and

develop and implement diversified strategies for our Offshore Oil and Gas Construction segment approved by our Chief Executive Officer and Board of Directors.

For John A. Fees, President and Chief Executive Officer of The Babcock & Wilcox Companies, the individual measures of the target EICP award include:

achieve specific levels of health, safety and environmental performance averages at our Power Generation Systems and Government Operations segment; and

achieve specific level of synergies from the combination of The Babcock & Wilcox Company and BWX Technologies, Inc. under a common management structure.

Table of Contents

For John T. Nesser, our Executive Vice President, Chief Administrative and Legal Officer, the individual measures of the target EICP award include:

achieve specific levels of company-wide health, safety and environmental performance averages;

effect successful integration of Chief Information Officer and Corporate Health Safety and Environmental functions; and

develop enterprise risk management and business continuation program.

From time to time, our directors, officers and employees may adopt trading plans pursuant to Exchange Act Rule 10b5-1(c). Messrs. Bruce Wilkinson and John Fees each adopted a 10b5-1 trading plan on March 6, 2007.
