- o Pre-commencement communications pursuant to Rule 13e-4(c) under the Exchange Act (17 CFR 240.13e-4(c))

#### Item 8.01. Other Events

#### Introduction

On February 14, 2007, Granite Construction Incorporated (Granite or the Company) announced an organizational realignment of its business operations designed to accommodate growth of the Company s vertically integrated Branch business in the West and improve profitability of its large, complex Heavy Construction Division (HCD) projects. As a result, Granite has revised its segment reporting to represent its newly aligned operating divisions into Granite West and Granite East, effective with the quarter ended June 30, 2007.

As a convenience to investors who may want to consider the effects of the above in advance of third quarter earnings, Granite today is making available restated historical segment results for the quarters and year ended 2006. Specifically, three projects from the Company's legacy Heavy Construction Division were reassigned to the new Granite West division. The following table shows the impact to Granite West and Granite East revenue and gross profit relating to these three projects. The reassignment of these projects was completed during the quarter ended June 30, 2007.

#### **Former Reportable Segments**

As indicated in Note 16, Business Segment Information, of the notes to the Company s consolidated financial statements, set forth in Item 15 of Part IV of Granite s Annual Report on Form 10-K for the fiscal year ended December 31, 2006, the Company previously operated in two reportable business segments: (1) Branch Division and (2) Heavy Construction Division. The Branch Division segment comprised the Company s branch offices, including Wilder Construction Company, its majority owned subsidiary, and substantially all of the Company s revenue from the sale of construction materials. The HCD segment comprised major infrastructure projects throughout the nation.

#### **Overview of New Reportable Segments**

Granite West

This new segment is comprised of decentralized branch offices in the western United States that perform various heavy civil construction projects with a large portion of the work focused on new construction and improvement of streets, roads, highways and bridges, as well as site preparation for housing and commercial development. Although most Granite West projects are started and completed within a year, the division also has the capability of constructing larger projects. Each of the 13 Granite West branch locations are aligned under one of three operating groups: Northwest, Northern California and Southwest.

All of the Company s revenue from the sale of construction materials is from Granite West. Each of the branch locations under Granite West operate facilities that process aggregates into construction materials for internal use or for sales to third parties. These activities are vertically integrated into the Granite West construction business, providing a source of profits and a competitive advantage to our construction business. *Granite East* 

This new segment operates in the eastern portion of the United States with a focus on large, complex infrastructure projects including major highways, large dams, mass transit facilities, bridges, pipelines, canals, tunnels, waterway locks and dams, and airport infrastructure. Granite East operates out of three regional offices: the Central Region, based in Lewisville, Texas; the Southeast Region, based in Tampa, Florida; and the Northeast Region, based in Tarrytown, New York. Granite East construction contracts are typically greater than two years.
