Forward-Looking Statements

From time to time, The Greenbrier Companies, Inc. and its subsidiaries (Greenbrier or the Company) or their representatives have made or may make forward-looking statements within the meaning of the Private Securities Litigation Reform Act of 1995, including, without limitation, statements as to expectations, beliefs and strategies regarding the future. Such forward-looking statements may be included in, but not limited to, press releases, oral statements made with the approval of an authorized executive officer or in various filings made by us with the Securities and Exchange Commission. These forward-looking statements rely on a number of assumptions concerning future events and include statements relating to:

- availability of financing sources and borrowing base for working capital, other business development activities, capital spending and railcar warehousing activities;
- ability to maintain compliance with or obtain appropriate amendments to covenants in various credit agreements;
- ability to renew or obtain sufficient lines of credit and performance guarantees on acceptable terms;
- ability to utilize beneficial tax strategies;
- ability to grow our refurbishment & parts and lease fleet and management services businesses;
- ability to obtain sales contracts which contain provisions for the escalation of prices due to increased costs of materials and components;
- ability to obtain adequate certification and licensing of products; and
- short- and long-term revenue and earnings effects of the above items.

Forward-looking statements are subject to a number of uncertainties and other factors outside Greenbrier s control. The following are among the factors that could cause actual results or outcomes to differ materially from the forward-looking statements:

- a delay or failure of acquired businesses, start-up operations, products or services to compete successfully;
- decreases in carrying value of inventory, goodwill or other assets due to impairment;
- severance or other costs or charges associated with lay-offs, shutdowns, or reducing the size and scope of operations;
- changes in future maintenance or warranty requirements;
- fluctuations in demand for newly manufactured railcars or failure to obtain orders as anticipated in developing forecasts;
- effects of local statutory accounting;
- domestic and global business conditions and growth or reduction in the surface transportation industry;
- ability to maintain good relationships with third party labor providers or collective bargaining units;
- steel price fluctuations, scrap surcharges, steel scrap prices and other commodity price fluctuations and their impact on railcar and wheel demand and margin;

ability to deliver railcars in accordance with customer specifications;

changes in product mix and the mix among reporting segments;

labor disputes, energy shortages or operating difficulties that might disrupt manufacturing operations or the flow of cargo;

production difficulties and product delivery delays as a result of, among other matters, changing technologies or non-performance of alliance partners, subcontractors or suppliers;

ability to obtain suitable contracts for railcars held for sale;

lower than anticipated residual values for leased equipment;

discovery of defects in railcars resulting in increased warranty costs or litigation;

resolution or outcome of pending or future litigation and investigations;

the ability to consummate expected sales;

delays in receipt of orders, risks that contracts may be canceled during their term or not renewed and that customers may not purchase as much equipment under the contracts as anticipated;

financial condition of principal customers;

market acceptance of products;

ability to determine and obtain adequate levels of insurance and at acceptable rates;

disputes arising from creation, use, licensing or ownership of intellectual property in the conduct of the Company s business;

Table of Contents

competitive factors, including introduction of competitive products, price pressures, limited customer base and competitiveness of our manufacturing facilities and products;

industry overcapacity and our manufacturing capacity utilization;

changes in industry demand for railcar products;

domestic and global political, regulatory or economic conditions including such matters as terrorism, war, embargoes or quotas;

ability to adjust to the cyclical nature of the railcar industry;

the effects of car hire deprescription on leasing revenue;

changes in interest rates and financial impacts from interest rates;

actions by various regulatory agencies;

changes in fuel and/or energy prices;

risks associated with intellectual property rights of Greenbrier or third parties, including infringement, maintenance, protection, validity, enforcement and continued use of such rights;

expansion of warranty and product support terms beyond those which have traditionally prevailed in the rail supply industry;

availability of a trained work force and availability and/or price of essential raw materials, specialties or components, including steel castings, to permit manufacture of units on order;

failure to successfully integrate acquired businesses;

ability to maintain sufficient availability of credit facilities and compliance with financial covenants;

discovery of unknown liabilities associated with acquired businesses;

failure of or delay in implementing and using new software or other technologies;

ability to replace maturing lease revenue and earnings with revenue and earnings from additions to the lease fleet and management services; and

financial impacts from currency fluctuations and currency hedging activities in our worldwide operations.

Any forward-looking statements should be considered in light of these factors. Greenbrier assumes no obligation to update or revise any forward-looking statements to reflect actual results, changes in assumptions or changes in other factors affecting such forward-looking statements or if Greenbrier later becomes aware that these assumptions are not likely to be achieved, except as required under securities laws.

THE GREENBRIER COMPANIES, INC.

Notes to Condensed Consolidated Financial Statements

(Unaudited)

Note 1 Interim Financial Statements

The Condensed Consolidated Financial Statements of The Greenbrier Companies, Inc. and Subsidiaries (Greenbrier or the Company) as of February 28, 2009 and for the three and six months ended February 28, 2009 and February 29, 2008 have been prepared without audit and reflect all adjustments (consisting of normal recurring accruals except for special charges) which, in the opinion of management, are necessary for a fair presentation of the financial position and operating results for the periods indicated. The results of operations for the three and six months ended February 28, 2009 are not necessarily indicative of the results to be expected for the entire year ending August 31, 2009.

Certain notes and other information have been condensed or omitted from the interim financial statements presented in this Quarterly Report on Form 10-Q. Therefore, these financial statements should be read in conjunction with the Consolidated Financial Statements contained in the Company s 2008 Annual Report on Form 10-K.

Management estimates The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires judgment on the part of management to arrive at estimates and assumptions on matters that are inherently uncertain. These estimates may affect the amount of assets, liabilities, revenue and expenses reported in the financial statements and accompanying notes and disclosure of contingent assets and liabilities within the financial statements. Estimates and assumptions are periodically evaluated and may be adjusted in future periods. Actual results could differ from those estimates.

Initial Adoption of Accounting Policies In February 2007, the Financial Accounting Standards Board (FASB) issued Statement of Financial Accounting Standard (SFAS) No. 159, *The Fair Value Option for Financial Assets and Financial Liabilities* which permits entities to choose to measure many financial assets and financial liabilities at fair value rather than historical value. Unrealized gains and losses on items for which the fair value option is elected are reported in earnings. This statement was effective for the Company beginning September 1, 2008 and the Company has not elected the fair value option for any additional financial assets and liabilities beyond those already prescribed by generally accepted accounting principles.

In March 2008, the FASB issued SFAS No. 161, *Disclosures about Derivative Instruments and Hedging Activities an amendment of SFAS No. 133*. This statement changes the presentation of the disclosure of the Company s derivative and hedging activity and was effective for the Company beginning September 1, 2008.

Prospective Accounting Changes In September 2006, the FASB issued SFAS No. 157, *Fair Value Measurements*. This statement defines fair value, establishes a framework for measuring fair value and enhances disclosures about fair value measurements. The measurement and disclosure requirements are effective for the Company for the fiscal year beginning September 1, 2008. The adoption did not have an effect on the Company. In January 2008, the FASB issued FASB Staff Position (FSP) FAS 157-2 to defer SFAS No. 157 s effective date for all non-financial assets and liabilities, except those items recognized or disclosed at fair value on an annual or more frequently recurring basis. In October 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset is Not Active*. This FSP provides examples to illustrate key considerations in determining fair value of a financial asset when the market for that financial asset is not active. This position is effective for the Company beginning September 1, 2009. Management is evaluating whether there will be any impact on the Consolidated Financial Statements from the adoption of FSP 157-2 and 157-3.

In December 2007, the FASB issued SFAS No. 141R, *Business Combinations*. This statement establishes the principles and requirements for how an acquirer: recognizes and measures the assets acquired, liabilities assumed, and non-controlling interest; recognizes and measures goodwill; and identifies disclosures. This statement is effective for the Company for business combinations entered into on or after September 1, 2009.

In December 2007, the FASB issued SFAS No. 160, *Noncontrolling Interests in Consolidated Financial Statements an amendment of ARB No. 51*. This statement establishes reporting standards for non-controlling interests in

subsidiaries. This standard is effective for the Company beginning September 1, 2009. Management is evaluating the impact of this statement on its Consolidated Financial Statements.

In May 2008, the FASB issued FSP APB 14-1, *Accounting for Convertible Debt Instruments That May Be Settled in Cash upon Conversion (Including Partial Cash Settlement).* This FSP specifies that issuers of such instruments should separately account for the liability and equity components in a manner that will reflect the entity s nonconvertible debt borrowing rate when interest cost is recognized in subsequent periods. This FSP is effective for the Company beginning September 1, 2009 with respect to its $100.0 million of outstanding convertible debt. This FSP cannot be early adopted and requires retrospective adjustments for all periods the Company had the convertible debt. On September 1, 2009 the Company expects to record, on its Consolidated Balance Sheet, a debt discount of $17.0 million, a deferred tax liability of $6.7 million and a $10.3 million increase to equity. The debt discount will be amortized through May 2013 and the amortization expense is expected to be included in Interest and foreign exchange on the Consolidated Statements of Operations. The pre-tax amortization is expected to be approximately $4.1 million in fiscal year 2010, $4.5 million in fiscal year 2011, $4.8 million in fiscal year 2012 and $3.6 million in fiscal year 2013.

Note 2 Acquisitions

Roller Bearing Industries

On April 4, 2008 the Company purchased substantially all of the operating assets of Roller Bearing Industries, Inc. (RBI) for $7.8 million in cash. The purchase price was paid from existing cash balances and credit facilities. RBI operates a railcar bearings reconditioning business in Elizabethtown, Kentucky. These bearings are used in the reconditioning of railcar wheelsets. The financial results of this operation since the acquisition are reported in the Company s Consolidated Financial Statements as part of the Refurbishment & Parts segment. The impact of this acquisition was not material to the Company s consolidated results of operations; therefore, pro forma financial information has not been included.

The fair value of the net assets acquired from RBI was as follows:

(In thousands)	
Accounts receivable	$ 479
Inventories	2,963
Property, plant and equipment	1,644
Intangibles and other	1,178
Goodwill	1,742
Total assets acquired	8,006
Accounts payable and accrued liabilities	165
Total liabilities assumed	165
Net assets acquired	$ 7,841

American Allied Railway Equipment Company

On March 28, 2008 the Company purchased substantially all of the operating assets of American Allied Railway Equipment Company and its affiliates (AARE) for $83.3 million in cash. The purchase price was paid from existing cash balances and credit facilities. AARE s two wheel facilities in Washington, Illinois and Macon, Georgia, supply new and reconditioned wheelsets to freight car maintenance locations as well as new railcar manufacturing facilities. AARE also operates a parts reconditioning business in Peoria, Illinois, where it reconditions railcar yokes, couplers, side frames and bolsters. The financial results since the acquisition are reported in the Company s Consolidated

Financial Statements as part of the Refurbishment & Parts segment.

On January 31, 2009, the wheel facility in Washington Illinois was extensively damaged by fire. Substantially all the work scheduled to be completed at this facility has been shifted to other wheel facilities in the Refurbishment & Parts network, with no significant disruptions in service to our customers. The Company believes it is adequately covered by insurance for this loss.

The fair value of the net assets acquired from AARE was as follows:

(In thousands)

Accounts receivable	$ 10,228
Inventories	12,966
Property, plant and equipment	8,377
Intangibles and other	27,800
Goodwill	29,405
Total assets acquired	88,776
Accounts payable and accrued liabilities	5,451
Total liabilities assumed	5,451
Net assets acquired	$ 83,325

The unaudited pro forma financial information presented below for the three and six months ended February 29, 2008 has been prepared to illustrate Greenbrier s consolidated results had the acquisition of AARE occurred at the beginning of each period presented. The financial information for the three and six months ended February 28, 2009 is included for comparison purposes only.

(In thousands except per share amounts)

	Three Months Ended		Six Months Ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Revenue	$287,132	$281,812	$543,262	$589,794
Net earnings (loss)	$ (6,878)	$ 2,622	$ (10,207)	$ 4,886
Basic earnings (loss) per share	$ (0.41)	$ 0.16	$ (0.61)	$ 0.30
Diluted earnings (loss) per share	$ (0.41)	$ 0.16	$ (0.61)	$ 0.30

The unaudited pro forma financial information is not necessarily indicative of what the actual results would have been had the transaction occurred at the beginning of the fiscal year, and may not be indicative of the results of future operations of the Company.

Note 3 Special Charges

In April 2007, the Company s board of directors approved the permanent closure of the Company s Canadian railcar manufacturing facility, TrentonWorks Limited (TrentonWorks). As a result of the facility closure decision, special charges of $2.1 million and $2.3 million were recorded during the three and six months ended February 29, 2008 consisting of severance costs and professional and other fees associated with the closure.

Note 4 De-consolidation of Subsidiary

On March 13, 2008 TrentonWorks filed for bankruptcy with the Office of the Superintendent of Bankruptcy Canada whereby the assets of TrentonWorks are being administered and liquidated by an appointed trustee. The Company has not guaranteed any obligations of TrentonWorks and does not believe it will be liable for any of TrentonWorks liabilities. Under generally accepted accounting principles, consolidation is generally required for investments of more than 50% ownership, except when control is not held by the majority owner. Under these principles, bankruptcy represents a condition which may preclude consolidation in instances where control rests with the bankruptcy court and trustee, rather than the majority owner. As a result, the Company discontinued consolidating TrentonWorks

financial statements beginning on March 13, 2008 and began reporting its investment in TrentonWorks using the cost method. Under the cost method, the investment is reflected as a single amount on the Company s Consolidated Balance Sheet. De-consolidation resulted in a negative investment in the subsidiary of $15.3 million which is included as a liability on the Company s Consolidated Balance Sheet titled Losses in excess of investment in de-consolidated subsidiary. In addition, a $3.4 million loss is included in Accumulated other comprehensive loss. The Company may recognize up to $11.9 million of income with the reversal of the $15.3 million liability, net of the $3.4 million other comprehensive loss, when the bankruptcy is resolved and the Company is legally released from any future obligations.

Note 5 Inventories

(In thousands)

	February 28, 2009	August 31, 2008
Supplies and raw materials	$ 116,422	$ 150,505
Work-in-process	91,423	106,542
Lower of cost or market adjustment	(3,627)	(4,999)
	$ 204,218	$ 252,048

Note 6 Assets Held for Sale

(In thousands)

	February 28, 2009	August 31, 2008
Finished goods parts	$ 20,102	$ 22,017
Railcars held for sale	17,588	23,559
Railcars in transit to customer	7,599	6,787
	$ 45,289	$ 52,363

Note 7 Goodwill

The Company periodically acquires businesses in purchase transactions in which the allocation of the purchase price may result in the recognition of goodwill. Goodwill is evaluated annually for impairment unless a qualifying event triggers interim testing.

Changes in the carrying value of goodwill for the six months ended February 28, 2009 are as follows:

(In thousands)

	Manufacturing	Refurbishment & Parts	Leasing & Services	Total
Balance August 31, 2008	$ 1,287	$ 195,790	$ 3,071	$ 200,148
Reserve reversal		(7,415)		(7,415)
Balance February 28, 2009	$ 1,287	$ 188,375	$ 3,071	$ 192,733

The reduction in goodwill of $7.4 million relates to a release of a tax reserve that was recorded as a purchase accounting adjustment on the acquisition of Meridian Rail Holdings Corp. The contingency requiring this reserve lapsed in the first quarter of fiscal year 2009.

The Company tests goodwill annually during the third quarter using a testing date of February 28th. In accordance with the provision of SFAS 142, *Goodwill and Other Intangible Assets*, the Company performed Step 1 of the SFAS

142 analysis as of February 28, 2009. This analysis included an equity test whereby the fair value of each reporting unit s total equity is compared to the carrying value of equity and an asset test whereby the fair value of each reporting unit s total assets was estimated and compared to the carrying value of assets. Greenbrier s reporting units for this test are the same as its segments. The fair value of the Company s reporting units was determined based on a weighting of income and market approaches. Under the income approach, the fair value of a reporting unit is based on the present value of estimated future cash flows. Under the market approach, the fair value is based on observed market multiples for comparable businesses and guideline transactions. The Company also considered the premium of the implied value of its reporting units over the current market value of its stock. Results of the Step 1 analysis indicated that the carrying amounts of all reporting units were in excess of their fair value indicating that an impairment is probable. Accordingly, the Company is required to perform Step 2 of the SFAS 142 impairment analysis to determine the amount, if any, of goodwill impairment to be recorded.

THE GREENBRIER COMPANIES, INC.

Under Step 2 of the SFAS 142 analysis, the implied fair value of goodwill requires valuation of a reporting unit s tangible and intangible assets and liabilities in a manner similar to the allocation of purchase price in a business combination. If the carrying value of a reporting unit s goodwill exceeds its implied fair value, goodwill is deemed impaired and is written down to the extent of the difference. As of the filing of this Form 10-Q, the Company had not completed its analysis due to the complexities involved in determining the implied fair value of the goodwill for each reporting unit, which is based on the determination of the fair value of all assets and liabilities in the reporting unit. The Company is currently unable to estimate the range of the possible impairment. The evaluation will be completed in the third quarter and any resulting impairment will be reflected in the third quarter financial statements.

Note 8 Intangibles and other assets

Intangible assets that are determined to have finite lives are amortized over their useful lives. Intangible assets with indefinite useful lives are not amortized and are periodically evaluated for impairment.

The following table summarizes the Company s identifiable intangible assets balance:

(In thousands)

	February 28, 2009	August 31, 2008
Intangible assets subject to amortization:		
Customer relationships	$ 66,825	$ 66,825
Accumulated amortization	(7,472)	(5,395)
Other intangibles	4,747	5,713
Accumulated amortization	(1,909)	(1,737)
	62,191	65,406
Intangible assets not subject to amortization	912	912
Prepaid and other assets	30,640	32,743
Total intangible and other assets	$ 93,743	$ 99,061

Intangible assets with finite lives are amortized using the straight line method over their estimated useful lives and include the following: proprietary technology, 10 years; trade names, 5 years; patents, 11 years; and long-term customer agreements and relationships, 5 to 20 years. Amortization expense for the three and six months ended February 28, 2009 was $1.2 million and $2.4 million and for the three and six months ended February 29, 2008 was $0.8 million and $1.5 million.

Note 9 Revolving Notes

All amounts originating in foreign currency have been translated at the February 28, 2009 exchange rate for the following discussion. Senior secured revolving credit facilities, consisting of two components, aggregated $315.2 million as of February 28, 2009. A $290.0 million revolving line of credit is available through November 2011 to provide working capital and interim financing of equipment, principally for the United States and Mexican operations. Advances under this facility bear interest at variable rates that depend on the type of borrowing and the defined ratio of debt to total capitalization. In addition, current lines of credit totaling $25.2 million, with various variable rates, are available for working capital needs of the European manufacturing operation. Currently these European credit facilities have maturities that range from April 30, 2009 through August 2009. European credit facility renewals are continually under negotiation and the Company expects the available credit facilities to be approximately $25.0 million through August 31, 2009, but dependent on the outcome of negotiations, these amounts could be reduced to $20.0 million as of May 31, 2009 and $15.0 million as of August 31, 2009.

As of February 28, 2009 outstanding borrowings under our facilities aggregated $101.5 million in revolving notes and $3.6 million in letters of credit. This consists of $80.0 million in revolving notes and $3.6 million in letters of credit outstanding under the United States credit facility and $21.5 million in revolving notes outstanding under the European credit facilities. Available borrowings for all credit facilities are generally based on defined levels of

inventory, receivables, property, plant and equipment and leased equipment, as well as total debt to consolidated capitalization and interest coverage ratios which as of February 28, 2009 levels would provide for maximum additional borrowing of $84.0 million.

Note 10 Accounts Payable and Accrued Liabilities

(In thousands)

	February 28, 2009	August 31, 2008
Trade payables and other accrued	$ 181,513	$ 207,173
Accrued payroll and related liabilities	19,378	25,478
Accrued maintenance	16,165	17,067
Accrued warranty	10,146	11,873
Other	1,036	12,731
	$ 228,238	$ 274,322

Note 11 Warranty Accruals

Warranty costs are estimated and charged to operations to cover a defined warranty period. The estimated warranty cost is based on the history of warranty claims for each particular product type. For new product types without a warranty history, preliminary estimates are based on historical information for similar product types. The warranty accrual, included in accounts payable and accrued liabilities on the Consolidated Balance Sheet, are reviewed periodically and updated based on warranty trends.

Warranty accrual activity:

(In thousands)

	Three Months Ended		Six Months Ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Balance at beginning of period	$ 11,077	$ 16,390	$ 11,873	$ 15,911
Charged to cost of revenue	471	401	676	1,312
Payments	(1,114)	(1,203)	(1,611)	(2,237)
Currency translation effect	(288)	279	(792)	881
Balance at end of period	$ 10,146	$ 15,867	$ 10,146	$ 15,867

Note 12 Comprehensive Income (Loss)

The following is a reconciliation of net earnings (loss) to comprehensive income (loss):
(In thousands)

	Three Months Ended		Six Months Ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Net earnings (loss)	$ (6,878)	$ 1,423	$ (10,207)	$ 4,065
Reclassification of derivative financial instruments recognized in net earnings (loss) (net of tax)	(182)	(24)	(270)	(48)
Unrealized gain (loss) on derivative financial instruments (net of tax)	(6,707)	501	(12,996)	494
Pension plan adjustment *(1)*		(6,913)		(6,913)
Foreign currency translation adjustment (net of tax)	(4,440)	1,349	(9,892)	3,772
Comprehensive income (loss)	$ (18,207)	$ (3,664)	$ (33,365)	$ 1,370

(1) The prior year pension plan adjustment related to retroactive legislation enacted by the Province of Nova Scotia, Canada requiring TrentonWorks to contribute deficit funding and grow-in benefits to the pension plan for employees covered by a collective bargaining agreement at TrentonWorks. The Company has not guaranteed any obligations of

TrentonWorks and does not believe it will be liable for any of TrentonWorks liabilities.

Accumulated other comprehensive income (loss), net of tax effect, consisted of the following:
(In thousands)

	Unrealized Gains (Losses) on Derivative Financial Instruments	Pension Plan Adjustment	Foreign Currency Translation Adjustment	Accumulated Other Comprehensive Income (Loss)
Balance, August 31, 2008	$ 571	$ (7,118)	$ 5,242	$ (1,305)
Six month activity	(13,266)		(9,892)	(23,158)
Balance, February 28, 2009	$ (12,695)	$ (7,118)	$ (4,650)	$ (24,463)

Note 13 Earnings Per Share

The shares used in the computation of the Company s basic and diluted earnings per common share are reconciled as follows:
(In thousands)

	Three Months Ended		Six Months Ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008
Weighted average basic common shares outstanding	16,694	16,290	16,694	16,230
Dilutive effect of employee stock options (1)		21		24
Weighted average diluted common shares outstanding	16,694	16,311	16,694	16,254

(1) Dilutive effect of common stock equivalents excluded from per share calculation for the three and six months ended February 28, 2009 due to net

loss

Weighted average diluted common shares outstanding include the incremental shares that would be issued upon the assumed exercise of stock options. No options were anti-dilutive for the three and six months ended February 29, 2008.

13

Note 14 Stock Based Compensation

All stock options were vested prior to September 1, 2005 and accordingly no compensation expense was recorded for stock options for the three and six months ended February 28, 2009 and February 29, 2008. The value of stock awarded under restricted stock grants is amortized as compensation expense over the vesting period which is generally two to five years. For the three and six months ended February 28, 2009, $1.3 million and $2.4 million in compensation expense was recognized related to restricted stock grants. For the three and six months ended February 29, 2008, $0.9 million and $1.7 million in compensation expense was recognized related to restricted stock grants.

Note 15 Derivative Instruments

Foreign operations give rise to market risks from changes in foreign currency exchange rates. Foreign currency forward exchange contracts with established financial institutions are utilized to hedge a portion of that risk in Pound Sterling and Euro. The Company has fully utilized all existing foreign currency hedge facilities. Interest rate swap agreements are utilized to reduce the impact of changes in interest rates on certain debt. The Company s foreign currency forward exchange contracts and interest rate swap agreements are designated as cash flow hedges, and therefore the unrealized gains and losses are recorded in accumulated other comprehensive loss.

At February 28, 2009 exchange rates, forward exchange contracts for the sale of Euro aggregated $36.8 million and sale of Pound Sterling aggregated $6.8 million which qualify for hedge accounting under SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*. Adjusting the foreign currency exchange contracts to the fair value of the cash flow hedges at February 28, 2009 resulted in an unrealized pre-tax loss of $10.0 million that was recorded in accumulated other comprehensive loss. The fair value of the contracts is included in accounts payable and accrued liabilities on the Consolidated Balance Sheets. As the contracts mature at various dates through November 2010, any such gain or loss remaining will be recognized in manufacturing revenue along with the related transactions. In the event that the underlying sales transaction does not occur or does not occur in the period designated at the inception of the hedge, the amount classified in accumulated other comprehensive loss would be reclassified to the current year s results of operations. Certain forward exchange contracts for the sale of Euro did not qualify for hedge accounting which resulted in fair value adjustments of $1.2 million pre-tax expense in the first quarter and $1.4 million pre-tax expense in the second quarter, for a total of $2.6 million pre-tax expense that was included in interest and foreign exchange on the Consolidated Statements of Operations. As of the end of January 2009 these contracts qualified for hedge accounting treatment through their maturity.

At February 28, 2009 exchange rates, interest rate swap agreements had a notional amount of $54.1 million and mature at various dates through March 2014. The fair value of these cash flow hedges at February 28, 2009 resulted in an unrealized pre-tax loss of $4.4 million. The loss is included in accumulated other comprehensive loss and the fair value of the contracts is included in accounts payable and accrued liabilities on the Consolidated Balance Sheet. As interest expense on the underlying debt is recognized, amounts corresponding to the interest rate swaps are reclassified from accumulated other comprehensive loss and charged or credited to interest expense. At February 28, 2009 interest rates, approximately $0.9 million would be reclassified to interest expense in the next 12 months.

THE GREENBRIER COMPANIES, INC.

Note 16 Segment Information

Greenbrier operates in three reportable segments: Manufacturing, Refurbishment & Parts and Leasing & Services. The accounting policies of the segments are described in the summary of significant accounting policies in the Consolidated Financial Statements contained in the Company s 2008 Annual Report on Form 10-K. Performance is evaluated based on margin. Intersegment sales and transfers are generally accounted for at fair value as if the sales or transfers were to third parties. While intercompany transactions are treated like third-party transactions to evaluate segment performance, the revenues and related expenses are eliminated in consolidation and therefore do not impact consolidated results.

The information in the following table is derived directly from the segments internal financial reports used for corporate management purposes.

(In thousands)

	Three Months Ended		Six Months Ended	
	February 28, 2009	February 29, 2008	February 28, 2009	February 29, 2008

Note 17 Commitments and Contingencies

Environmental studies have been conducted of the Company s owned and leased properties that indicate additional investigation and some remediation on certain properties may be necessary. The Company s Portland, Oregon manufacturing facility is located adjacent to the Willamette River. The United States Environmental Protection Agency (EPA) has classified portions of the river bed, including the portion fronting Greenbrier s facility, as a federal National Priority List or Superfund site due to sediment contamination (the Portland Harbor Site). Greenbrier and more than 80 other parties have received a General Notice of potential liability from the EPA

15

relating to the Portland Harbor Site. The letter advised the Company that it may be liable for the costs of investigation and remediation (which liability may be joint and several with other potentially responsible parties) as well as for natural resource damages resulting from releases of hazardous substances to the site. At this time, ten private and public entities, including the Company, have signed an Administrative Order of Consent to perform a remedial investigation/feasibility study (RI/FS) of the Portland Harbor Site under EPA oversight, and several additional entities have not signed such consent, but are nevertheless contributing money to the effort. The study is expected to be completed in 2011. In February 2008, the EPA sought information from over 200 additional entities, including other federal agencies in order to determine whether additional General Notice letters were warranted. In addition, the Company has entered into a Voluntary Clean-Up Agreement with the Oregon Department of Environmental Quality in which the Company agreed to conduct an investigation of whether, and to what extent, past or present operations at the Portland property may have released hazardous substances to the environment. The Company is also conducting groundwater remediation relating to a historical spill on the property which antedates its ownership.

Because these environmental investigations are still underway, the Company is unable to determine the amount of ultimate liability relating to these matters. Based on the results of the pending investigations and future assessments of natural resource damages, Greenbrier may be required to incur costs associated with additional phases of investigation or remedial action, and may be liable for damages to natural resources. In addition, the Company may be required to perform periodic maintenance dredging in order to continue to launch vessels from its launch ways in Portland Oregon, on the Willamette River, and the river s classification as a Superfund site could result in some limitations on future dredging and launch activities. Any of these matters could adversely affect the Company s business and results of operations, or the value of its Portland property.

From time to time, Greenbrier is involved as a defendant in litigation in the ordinary course of business, the outcome of which cannot be predicted with certainty. The most significant litigation is as follows:

On April 20, 2004, BC Rail Partnership initiated litigation against the Company and TrentonWorks in the Supreme Court of Nova Scotia, alleging breach of contract and negligent manufacture and design of railcars which were involved in a 1999 derailment. No trial date has been set.

Greenbrier and a customer, SEB Finans AB (SEB), have raised performance concerns related to a component that the Company installed on 372 railcar units with an aggregate sales value of approximately $20.0 million produced under a contract with SEB. On December 9, 2005, SEB filed a Statement of Claim in an arbitration proceeding in Stockholm, Sweden, against Greenbrier alleging that the cars were defective and could not be used for their intended purpose. A settlement agreement was entered into effective February 28, 2007 pursuant to which the railcar units previously delivered were to be repaired and the remaining units completed and delivered to SEB. Greenbrier is proceeding with repairs of the railcars in accordance with terms of the settlement agreement. Current estimates of potential costs of such repairs do not exceed amounts accrued in warranty.

When the Company acquired the assets of the Freight Wagon Division of DaimlerChrysler in January 2000, it acquired a contract to build 201 freight cars for Okombi GmbH, a subsidiary of Rail Cargo Austria AG. Subsequently, Okombi made breach of warranty and late delivery claims against the Company which grew out of design and certification problems. All of these issues were settled as of March 2004. Additional allegations have been made, the most serious of which involve cracks to the structure of the cars. Okombi has been required to remove all 201 freight cars from service, and a formal claim has been made against the Company. Legal and commercial evaluations are on-going to determine what obligations the Company might have, if any, to remedy the alleged defects.

Management intends to vigorously defend its position in each of the open foregoing cases. While the ultimate outcome of such legal proceedings cannot be determined at this time, management believes that the resolution of these actions will not have a material adverse effect on the Company s Consolidated Financial Statements.

As part of an order to deliver 500 railcar units, the Company has an obligation to guarantee the purchaser minimum earnings. The obligation runs from date of the railcar delivery through December 31, 2011. The maximum potential obligation totals $13.4 million and in certain defined instances the obligation may be reduced due to early

termination. The purchaser has agreed to utilize the railcars on a preferential basis, and the Company is entitled to re-market the railcar units when they are not being utilized by the purchaser during the obligation period. Any earnings generated from the railcar units will offset the obligation and be recognized as revenue and margin in future periods. The Company believes its actual obligation will be less than the $13.4 million. The Company delivered 360 railcar units under this contract during the quarter. The balance of the deliveries is currently expected to occur by the end of this fiscal year. Upon delivery of the railcar units, the entire purchase price is recorded as revenue and due in full. The minimum earnings due to the purchaser are considered a reduction of revenue and are recorded as deferred revenue. During the quarter ended February 28, 2009 the Company recorded $9.9 million of the potential obligation to deferred revenue.

The Company has entered into contingent rental assistance agreements, aggregating $5.8 million, on certain railcars subject to leases that have been sold to third parties. These agreements guarantee the purchasers a minimum lease rental, subject to a maximum defined rental assistance amount, over remaining periods of up to five years. A liability is established and revenue is reduced in the period during which a determination can be made that it is probable that a rental shortfall will occur and the amount can be estimated. For the three and six months ended February 28, 2009 no accrual was made to cover estimated obligations as management determined no additional rental shortfall was probable. For the three and six months ended February 29, 2008 an accrual of $0.4 million and $1.0 million was recorded to cover future obligations. There was no remaining balance of the accrued liability as of February 28, 2009. All of these agreements were entered into prior to December 31, 2002 and have not been modified since. The accounting for any future rental assistance agreements will comply with the guidance required by FASB Interpretation (FIN) 45 which pertains to contracts entered into or modified subsequent to December 31, 2002.

A portion of leasing & services revenue is derived from car hire which is a fee that a railroad pays for the use of railcars owned by other railroads or third parties. Car hire earned by a railcar is usually made up of hourly and mileage components. Railcar owners and users have the right to negotiate car hire rates. If the railcar owner and railcar user cannot come to an agreement on a car hire rate then either party has the right to call for arbitration. In arbitration either the owner s or user s rate is selected and that rate becomes effective for a one-year period. There is some risk that car hire rates could be negotiated or arbitrated to lower levels in the future. This could reduce future car hire revenue for the Company which amounted to $5.0 million and $10.9 million for the three and six months ended February 28, 2009 and $6.6 million and $13.2 million for the three and six months ended February 29, 2008.

In accordance with customary business practices in Europe, the Company has $11.3 million in bank and third party performance and warranty guarantee facilities, all of which have been utilized as of February 28, 2009. To date no amounts have been drawn under these performance and warranty guarantee facilities.

The Company has outstanding letters of credit aggregating $3.6 million associated with facility leases and payroll.

At February 28, 2009, an unconsolidated subsidiary had $3.7 million of third party debt, for which the Company has guaranteed one-third or approximately $1.2 million. In the event that there is a change in control or insolvency by any of the three one-third investors that have guaranteed the debt, the remaining investors share of the guarantee will increase proportionately.

Note 18 Guarantor/Non Guarantor

The $235 million combined senior unsecured notes (the Notes) issued on May 11, 2005 and November 21, 2005 and $100 million of convertible senior notes issued on May 22, 2006 are fully and unconditionally and jointly and severally guaranteed by substantially all of Greenbrier s material wholly owned United States subsidiaries: Autostack Company LLC, Greenbrier-Concarril, LLC, Greenbrier Leasing Company LLC, Greenbrier Leasing Limited Partner, LLC, Greenbrier Management Services, LLC, Greenbrier Leasing, L.P., Greenbrier Railcar LLC, Gunderson LLC, Gunderson Marine LLC, Gunderson Rail Services LLC, Meridian Rail Holdings Corp., Meridian Rail Acquisition Corp., Meridian Rail Mexico City Corp., Brandon Railroad LLC and Gunderson Specialty Products, LLC. No other subsidiaries guarantee the Notes including Greenbrier Europe B.V., Greenbrier Germany GmbH, WagonySwidnica S.A., Gunderson-Concarril, S.A. de C.V., Greenbrier-Gimsa, LLC and Gunderson-Gimsa S de RL de CV.

THE GREENBRIER COMPANIES, INC.

The following represents the supplemental consolidated condensed financial information of Greenbrier and its guarantor and non guarantor subsidiaries, as of February 28, 2009 and August 31, 2008 and for the three and six months ended February 28, 2009 and February 29, 2008. The information is presented on the basis of Greenbrier accounting for its ownership of its wholly owned subsidiaries using the equity method of accounting. The equity method investment for each subsidiary is recorded by the parent in intangibles and other assets. Intercompany transactions of goods and services between the guarantor and non guarantor subsidiaries are presented as if the sales or transfers were at fair value to third parties and eliminated in consolidation.

(1) Our Mexican joint venture is shown as a non-guarantor subsidiary in the current year s presentation. In the prior year s presentation financial information for the joint venture, while immaterial, was allocated among the guarantor, non-guarantor and eliminations categories.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

Executive Summary

We operate in three primary business segments: Manufacturing, Refurbishment & Parts and Leasing & Services. These three business segments are operationally integrated. The Manufacturing segment, operating from four facilities in the United States, Mexico and Poland, produces double-stack intermodal railcars, conventional railcars, tank cars and marine vessels. The Refurbishment & Parts segment performs railcar repair, refurbishment and maintenance activities in the United States and Mexico as well as wheel, axle and bearing servicing, and production and reconditioning of a variety of parts for the railroad industry. The Leasing & Services segment owns approximately 9,000 railcars and provides management services for approximately 217,000 railcars for railroads, shippers, carriers, and other leasing and transportation companies in North America. Segment performance is evaluated based on margins. We also produce rail castings through an unconsolidated joint venture.

The 217,000 railcars that the Leasing & Services segment manages include approximately 80,000 railcars from a new agreement that commenced on January 1, 2009.

All segments of the North American and European freight car markets in which we operate are currently experiencing a softening of demand in a weaker economy, market saturation of certain freight car types and tight capital markets, all contributing to caution on the part of our customers and increased competitiveness. These market factors have led and may continue to lead to lower revenues and reduced margins for some of our operations in the current year. These conditions may also lead to the temporary closure of some of our facilities.

Customer orders may be subject to cancellations and other customary industry terms and conditions. Historically, little variation has been experienced between the product ordered and the product actually delivered. Recent economic conditions have caused some customers to consider renegotiation, delay or cancellation of orders. The backlog is not necessarily indicative of future results of operations.

We are currently in discussions with General Electric Railcar Services Corporation (GE) concerning our long-term contract to build 11,900 tank cars and covered hoppers over an eight-year period with a current value of $1.0 billion. Deliveries of the railcar units commenced in December 2008 and are on-going. Approximately 40 units were delivered during the quarter with approximately 500 units scheduled for delivery in the remainder of the fiscal year. GE has advised us of their desire to substantially reduce, delay or otherwise cancel railcar deliveries under the contract. We believe the contract contains adequate protection in the event of an attempted cancellation or renegotiation of railcar deliveries.

Our total manufacturing backlog, which includes the GE order, of railcars for sale and lease as of February 28, 2009 was approximately 15,100 units with an estimated value of $1.31 billion compared to 18,800 units valued at $1.64 billion as of February 29, 2008. Based on current production plans, approximately 1,900 units in backlog are scheduled for delivery in the remainder of fiscal year 2009. The current backlog includes approximately 8,500 units under the GE contract, that are subject to our fulfillment of certain competitive or contractual conditions. There are currently 400 units in backlog that are subject to certain cancellations provisions. A portion of the orders included in backlog reflect an assumed product mix. Under terms of the order, the exact mix will be determined in the future which may impact the dollar amount of backlog. In addition, a substantial portion of our backlog consists of orders for tank cars which are a new product type for us in North America.

Marine backlog was approximately $173.0 million as of February 28, 2009, of which approximately $50.0 million is scheduled for delivery in the remainder of fiscal year 2009 and the balance through 2012.

Prices for steel, a primary component of railcars and barges, and related surcharges have fluctuated significantly and remain volatile. In addition, the price of certain railcar components, which are a product of steel, are affected by steel price fluctuations. Subsequent to year end, prices for steel, railcar components and scrap steel have declined but remain volatile. New railcar and marine backlog generally either includes fixed price contracts which anticipate material price increases and surcharges, or contracts that contain actual pass through of material price increases and surcharges. On certain fixed price railcar contracts actual material cost increases and surcharges have caused the

total manufacturing cost of the railcar to exceed the amounts originally anticipated, and in some cases, the actual contractual sale price of the railcar. When the anticipated loss on production of railcars in backlog is both probable and estimable, we accrue a loss contingency. We have accrued loss contingencies for production in backlog. As of February 28, 2009 the reserve balance was $2.5 million. We are aggressively working to mitigate these exposures. The Company s integrated business model has helped offset some of the effects of fluctuating steel and scrap steel prices, as a portion of our business segments benefit from rising steel scrap prices while other segments benefit from lower steel and scrap steel prices through enhanced margins.

As part of an order to deliver 500 railcar units, we have an obligation to guarantee the purchaser minimum earnings. The obligation runs from the date of the railcar delivery through December 31, 2011. The maximum potential obligation totals $13.4 million and in certain defined instances the obligation may be reduced due to early termination. The purchaser has agreed to utilize the railcars on a preferential basis, and we are entitled to re-market the railcar units when they are not being utilized by the purchaser during the obligation period. Any earnings generated from the railcar units will offset the obligation and be recognized as revenue and margin in future periods. We believe our actual obligation will be less than the $13.4 million. We delivered 360 railcar units under this contract during the quarter. The balance of the deliveries is currently expected to occur by the end of this fiscal year. Upon delivery of the railcar units, the entire purchase price is recorded as revenue and due in full. The minimum earnings due to the purchaser are considered a reduction of revenue and are recorded as deferred revenue. During the quarter ended February 28, 2009 we recorded $9.9 million of the potential obligation to deferred revenue and $3.5 million was included in the calculation of the loss contingency for production in backlog.

We are currently implementing measures to reduce our selling and administrative and overhead costs, including reductions in headcount. As a result, during the six months ended February 28, 2009 $1.5 million was expensed for severance costs, of which $0.7 million was recorded in Cost of revenue and $0.8 million in Selling and administrative cost.

We test goodwill annually during the third quarter using a testing date of February 28th. In accordance with the provision of SFAS 142, Goodwill and Other Intangible Assets, we performed Step 1 of the SFAS 142 analysis as of February 28, 2009. This analysis included an equity test whereby the fair value of each reporting unit s total equity is compared to the carrying value of equity and an asset test whereby the fair value of each reporting unit s total assets was estimated and compared to the carrying value of assets. Our reporting units for this test are the same as our segments. The fair value of our reporting units was determined based on a weighting of income and market approaches. Under the income approach, the fair value of a reporting unit is based on the present value of estimated future cash flows. Under the market approach, the fair value is based on observed market multiples for comparable businesses and guideline transactions. We also considered the premium of the implied value of its reporting units over the current market value of its stock. Results of the Step 1 analysis indicated that the carrying amounts of all reporting units were in excess of their fair value indicating that an impairment is probable. Accordingly, we are required to perform Step 2 of the SFAS 142 impairment analysis to determine the amount, if any, of goodwill impairment to be recorded.

Under Step 2 of the SFAS 142 analysis, the implied fair value of goodwill requires valuation of a reporting unit s tangible and intangible assets and liabilities in a manner similar to the allocation of purchase price in a business combination. If the carrying value of a reporting unit s goodwill exceeds its implied fair value, goodwill is deemed impaired and is written down to the extent of the difference. As of the filing of this Form 10-Q, we had not completed this analysis due to the complexities involved in determining the implied fair value of the goodwill for each reporting unit, which is based on the determination of the fair value of all assets and liabilities in the reporting unit. We are currently unable to estimate the range of the possible impairment. The evaluation will be completed in the third quarter and any resulting impairment will be reflected in the third quarter financial statements.

Effective February 27, 2009 we entered into an agreement with our Mexican joint venture partner, Grupo Industrial Monclova (GIMSA), whereby Greenbrier converted working capital advances to our Mexican joint venture of $27.0 million to a secured, interest bearing loan. Greenbrier may from time to time provide additional loans to the joint venture. In addition, Greenbrier has acquired an option from our joint venture partner to increase our current fifty

percent ownership to sixty six and two-thirds percent.

THE GREENBRIER COMPANIES, INC.

On January 31, 2009, the wheel facility in Washington, Illinois was extensively damaged by fire. Substantially all the work scheduled to be completed at this facility has been shifted to other wheel facilities in the Refurbishment & Parts network and we have not experienced significant disruptions in service to our customers. We believe we are adequately covered by insurance for any such loss associated with this fire.

Critical Accounting Policies

The preparation of financial statements in conformity with accounting principles generally accepted in the United States requires judgment on the part of management to arrive at estimates and assumptions on matters that are inherently uncertain. These estimates may affect the amount of assets, liabilities, revenue and expenses reported in the financial statements and accompanying notes and disclosure of contingent assets and liabilities within the financial statements. Estimates and assumptions are periodically evaluated and may be adjusted in future periods. Actual results could differ from those estimates.

Income taxes For financial reporting purposes, income tax expense is estimated based on planned tax return filings. The amounts anticipated to be reported in those filings may change between the time the financial statements are prepared and the time the tax returns are filed. Further, because tax filings are subject to review by taxing authorities, there is also the risk that a position taken in preparation of a tax return may be challenged by a taxing authority. If the taxing authority is successful in asserting a position different than that taken by us, differences in tax expense or between current and deferred tax items may arise in future periods. Such differences, which could have a material impact on our financial statements, would be reflected in the financial statements when management considers them probable of occurring and the amount reasonably estimable. Valuation allowances reduce deferred tax assets to an amount that will more likely than not be realized. Our estimates of the realization of deferred tax assets is based on the information available at the time the financial statements are prepared and may include estimates of future income and other assumptions that are inherently uncertain.

Maintenance obligations We are responsible for maintenance on a portion of the managed and owned lease fleet under the terms of maintenance obligations defined in the underlying lease or management agreement. The estimated maintenance liability is based on maintenance histories for each type and age of railcar. These estimates involve judgment as to the future costs of repairs and the types and timing of repairs required over the lease term. As we cannot predict with certainty the prices, timing and volume of maintenance needed in the future on railcars under long-term leases, this estimate is uncertain and could be materially different from maintenance requirements. The liability is periodically reviewed and updated based on maintenance trends and known future repair or refurbishment requirements. These adjustments could be material due to the inherent uncertainty in predicting future maintenance requirements.

Warranty accruals Warranty costs to cover a defined warranty period are estimated and charged to operations. The estimated warranty cost is based on historical warranty claims for each particular product type. For new product types without a warranty history, preliminary estimates are based on historical information for similar product types. These estimates are inherently uncertain as they are based on historical data for existing products and judgment for new products. If warranty claims are made in the current period for issues that have not historically been the subject of warranty claims and were not taken into consideration in establishing the accrual or if claims for issues already considered in establishing the accrual exceed expectations, warranty expense may exceed the accrual for that particular product. Conversely, there is the possibility that claims may be lower than estimates. The warranty accrual is periodically reviewed and updated based on warranty trends. However, as we cannot predict future claims, the potential exists for the difference in any one reporting period to be material.

Revenue recognition Revenue is recognized when persuasive evidence of an arrangement exists, delivery has occurred or services have been rendered, the price is fixed or determinable and collectibility is reasonably assured. Railcars are generally manufactured, repaired or refurbished under firm orders from third parties. Revenue is recognized when railcars are completed, accepted by an unaffiliated customer and contractual contingencies removed. Direct finance lease revenue is recognized over the lease term in a manner that produces a constant rate of return on the net investment in the lease. Operating lease revenue is recognized as earned under the lease terms.

Certain leases are operated under car hire arrangements whereby revenue is earned based on utilization, car hire rates and terms specified in the lease agreement. Car hire revenue is reported from a third party source two months in arrears; however, such revenue is accrued in the month earned based on estimates of use from historical activity and is adjusted to actual as reported. These estimates are inherently uncertain as they involve judgment as to the estimated use of each railcar. Adjustments to actual have historically not been significant. Revenues from construction of marine barges are either recognized on the percentage of completion method during the construction period or on the completed contract method based on the terms of the contract. Under the percentage of completion method, judgment is used to determine a definitive threshold against which progress towards completion can be measured to determine timing of revenue recognition.

Impairment of long-lived assets When changes in circumstances indicate the carrying amount of certain long-lived assets may not be recoverable, the assets are evaluated for impairment. If the forecast undiscounted future cash flows are less than the carrying amount of the assets, an impairment charge to reduce the carrying value of the assets to fair value is recognized in the current period. These estimates are based on the best information available at the time of the impairment and could be materially different if circumstances change.

Goodwill and acquired intangible assets The Company periodically acquires businesses in purchase transactions in which the allocation of the purchase price may result in the recognition of goodwill and other intangible assets. The determination of the value of such intangible assets requires management to make estimates and assumptions. These estimates affect the amount of future period amortization and possible impairment charges.

We perform a goodwill impairment test annually during the third quarter. Goodwill is also tested more frequently if changes in circumstances or the occurrence of events indicates that a potential impairment exists. The provisions of SFAS 142, *Goodwill and Other Intangible Assets*, require that we perform a two-step impairment test on goodwill. In the first step, we compare the fair value of each reporting unit with its carrying value. We determine the fair value of our reporting units based on a weighting of income and market approaches. Under the income approach, we calculate the fair value of a reporting unit based on the present value of estimated future cash flows. Under the market approach, we estimate the fair value based on observed market multiples for comparable businesses. The second step of the goodwill impairment test is required only in situations where the carrying value of the reporting unit exceeds its fair value as determined in the first step. In the second step we would compare the implied fair value of goodwill to its carrying value. The implied fair value of goodwill is determined by allocating the fair value of a reporting unit to all of the assets and liabilities of that unit as if the reporting unit had been acquired in a business combination and the fair value of the reporting unit was the price paid to acquire the reporting unit. The excess of the fair value of a reporting unit over the amounts assigned to its assets and liabilities is the implied fair value of goodwill. An impairment loss is recorded to the extent that the carrying amount of the reporting unit goodwill exceeds the implied fair value of that goodwill.

Loss contingencies On certain railcar contracts the total cost to produce the railcar may exceed the actual fixed or determinable contractual sale price of the railcar. When the anticipated loss on production of railcars in backlog is both probable and estimable the Company will accrue a loss contingency. These estimates are based on the best information available at the time of the accrual and may be adjusted at a later date to reflect actual costs.

Results of Operations

Three Months Ended February 28, 2009 Compared to Three Months Ended February 29, 2008

Overview

Total revenues for the three months ended February 28, 2009 were $287.1 million, an increase of $27.5 million from revenues of $259.6 million in the prior comparable period. Net losses were $6.9 million for the three months ended February 28, 2009 compared to net earnings of $1.4 million for the three months ended February 29, 2008.

Manufacturing Segment

Manufacturing revenue includes results from new railcar and marine production. New railcar delivery information includes all facilities.

Manufacturing revenue for the three months ended February 28, 2009 was $145.6 million compared to $123.4 million in the corresponding prior period, an increase of $22.2 million. The increase was primarily the result of a change in product mix with higher per unit sales prices, partially offset by the $9.9 million obligation of guaranteed minimum earnings under a certain contract. New railcar deliveries were approximately 1,300 units in both the current period and the prior comparable period.

Manufacturing margin as a percentage of revenue for the three months ended February 28, 2009 was negative 4.4% compared to a positive margin of 4.2% for the three months ended February 29, 2008. The decrease was primarily the result of a $9.9 million obligation, $0.7 million in loss accruals on future production, higher material costs and scrap surcharge expense, severance of $0.6 million and less absorption of overhead due to lower levels of plant utilization.

Refurbishment & Parts Segment

Refurbishment & Parts revenue of $121.7 million for the three months ended February 28, 2009 increased by $9.1 million from revenue of $112.6 million in the prior comparable period. The increase was primarily due to acquisition related growth of approximately $17.3 million associated with the acquisition of American Allied Railway Equipment Company (AARE) which occurred early in third quarter of fiscal 2008. This was partially offset by a decrease in average scrap pricing and reduced volumes of railcar repair and refurbishment work in the current economic environment.

Refurbishment & Parts margin as a percentage of revenue was 11.7% for the three months ended February 28, 2009 compared to 16.2% for the three months ended February 29, 2008. The decrease is due to lower volumes and a less favorable mix of repair and refurbishment work and lower net scrap pricing.

Leasing & Services Segment

Leasing & Services revenue decreased $3.7 million to $19.9 million for the three months ended February 28, 2009 compared to $23.6 million for the three months ended February 29, 2008. The change was primarily a result of lower earnings on certain car hire utilization leases and a $1.2 million decrease in gains on disposition of assets from the fleet.

Pre-tax earnings of $0.1 million were realized on the disposition of leased equipment, compared to $1.2 million in the prior comparable period. Assets from Greenbrier s lease fleet are periodically sold in the normal course of business in order to take advantage of market conditions, manage risk and maintain liquidity.

Leasing & Services margin as a percentage of revenue was 41.9% and 48.0% for the three-month periods ended February 28, 2009 and February 29, 2008. The decrease was primarily a result of decreased gains on disposition of assets from the lease fleet, which have no associated cost of revenue, lower lease fleet utilization, downward pressure on lease renewal rates and lower earnings on certain car hire utilization leases.

Other Costs

Selling and administrative expense was $16.3 million for the three months ended February 28, 2009 compared to $21.0 million for the comparable prior period, a decrease of $4.7 million. The decrease was primarily due to lower employee related costs, continued cost reduction efforts in the current economic environment and the reversal of $0.8 million of certain accruals. The decrease was partially offset by severance costs of $0.8 million related to work force reductions.

Interest and foreign exchange decreased $1.7 million to $8.2 million for the three months ended February 28, 2009, compared to $9.9 million in the prior comparable period. Interest expense decreased $0.8 million to $8.9 million due to lower debt levels and more favorable interest rates on our variable rate debt. Current period results include foreign exchange gains of $0.7 million compared to foreign exchange losses of $0.2 million in the prior comparable period principally due to the continued fluctuations in the Polish Zloty and Mexican Peso relative to other currencies. Included in the $0.7 million foreign exchange gain is a $1.4 million foreign exchange loss that was recorded in association with foreign currency forward exchange contracts that did not qualify for hedge accounting treatment under SFAS 133. These contracts became eligible for hedge accounting treatment at the end of January 2009.

Special Charges

In April 2007, the Board of Directors approved the permanent closure of our Canadian railcar manufacturing facility. As a result of the facility closure decision, special charges of $2.1 million were recorded during the three months ended February 29, 2008 consisting of severance costs and professional and other fees associated with the closure.

Income Taxes

The provision for income taxes was a $1.3 million benefit and $1.9 million expense for the three months ended February 28, 2009 and February 29, 2008. The provision for income taxes is based on projected geographical mix of consolidated results from operations for the entire year which results in an estimated 33.2% annual effective tax rate on pre-tax results. The effective tax rate fluctuates from year to year due to the geographical mix of pre-tax earnings and losses, minimum tax requirements in certain local jurisdictions and operating results for certain operations with no related tax effect. The actual tax rate for the second quarter of fiscal year 2009 was 15.9% as compared to 111.6% in the prior comparable period. The actual rate of 15.9% differs from the estimated effective rate of 33.2% due to revisions to our projected geographical mix of consolidated results from operations.

Equity in Earnings (Loss) of Unconsolidated Subsidiaries

Equity in earnings (loss) of the castings joint venture was a loss of $0.3 million for the three months ended February 28, 2009 compared to earnings of $0.3 million for the three months ended February 29, 2008. The decrease was associated with lower sales volumes of rail castings.

Six Months Ended February 28, 2009 Compared to Six Months Ended February 29, 2008

Overview

Total revenues for the six months ended February 28, 2009 were $543.3 million, a decrease of $2.7 million from revenues of $546.0 million in the prior comparable period. Net losses were $10.2 million for the six months ended February 28, 2009 compared to net earnings of $4.1 million for the six months ended February 29, 2008.

Manufacturing Segment

Manufacturing revenue for the six months ended February 28, 2009 was $248.3 million compared to $282.6 million in the corresponding prior period, a decrease of $34.3 million. The decrease was due to lower deliveries in the North American market and a $9.9 million obligation of guaranteed minimum earnings under a certain contract. The decrease was somewhat offset by a change in product mix with higher per unit sales prices. New railcar deliveries were approximately 2,100 units in the current and compared to 3,200 units in the prior comparable periods.

Manufacturing margin as a percentage of revenue for the six months ended February 28, 2009 was a negative 4.3% compared to 4.9% for the six months ended February 29, 2008. The decrease was primarily the result of the $9.9 million obligation, $1.1 million in loss accruals on future production, higher material costs and scrap surcharge expense, severance of $0.7 million and less absorption of overhead due to lower production levels and plant utilization.

Refurbishment & Parts Segment

Refurbishment & Parts revenue of $254.0 million for the six months ended February 28, 2009 increased by $37.5 million from revenue of $216.5 million in the prior comparable period. The increase was primarily due to acquisition related growth of approximately $38.4 million associated with the acquisition of American Allied Railway Equipment Company (AARE) which occurred early in third quarter of fiscal 2008 and strong wheel and parts volumes. This was partially offset by reduced volumes of railcar repair and refurbishment work in the current economic environment.

Refurbishment & Parts margin as a percentage of revenue was 10.7% for the six months ended February 28, 2009 compared to 15.8% for the six months ended February 29, 2008. The decrease was primarily due to a less favorable mix of repair and refurbishment work and lower net scrap pricing.

Leasing & Services Segment

Leasing & Services revenue decreased $5.9 million to $41.0 million for the six months ended February 28, 2009 compared to $46.9 million for the six months ended February 29, 2008. The change was primarily a result of lower earnings on certain car hire utilization leases and a $1.6 million decrease in gains on disposition of assets from the lease fleet.

Pre-tax earnings of $0.4 million were realized on the disposition of leased equipment, compared to $2.0 million in the prior comparable period. Assets from Greenbrier s lease fleet are periodically sold in the normal course of business in order to take advantage of market conditions, manage risk and maintain liquidity.

Leasing & Services margin as a percentage of revenue decreased to 42.8% for the six months ended February 28, 2009 compared to 48.4% for the six months ended February 29, 2008. The change was primarily a result of decreases in gains on disposition of assets from the lease fleet, which have no associated cost of revenue, lower lease fleet utilization downward pressure on lease renewal rates and lower earnings on certain car hire utilization leases.

The percent of owned units on lease as of February 28, 2009 was 94.3% compared to 97.0% at February 29, 2008.

Other Costs

Selling and administrative costs were $32.2 million for the six months ended February 28, 2009 compared to $41.2 million for the comparable prior period, a decrease of $9.0 million. The decrease was primarily due to lower employee related costs, continued cost reduction efforts in the current economic environment and reversal of $2.1 million of certain accruals. The decrease was partially offset by severance costs of $0.8 million related to reductions in work force.

Interest and foreign exchange decreased $1.3 million to $19.0 million for the six months ended February 28, 2009, compared to $20.3 million in the prior comparable period. Interest expense decreased $0.4 million to $18.5 million due to lower debt levels and more favorable interest rates on our variable rate debt. Current period results include foreign exchange losses of $0.5 million compared to foreign exchange losses of $1.4 million in the prior comparable period principally due to the continued fluctuations in the Polish Zloty and Mexican Peso relative to other currencies. Included in the $0.5 million foreign exchange loss is a $2.6 million foreign exchange loss that was recorded in association with foreign currency forward exchange contracts that did not qualify for hedge accounting treatment under SFAS 133. These contracts became eligible for hedge accounting treatment at the end of January 2009.

Special Charges

In April 2007, the Board of Directors approved the permanent closure of our Canadian railcar manufacturing facility. As a result of the facility closure decision, special charges of $2.3 million were recorded during six months ended February 29, 2008 consisting of severance costs and professional and other fees associated with the closure.

Income Tax

The provision for income taxes was a $5.9 million benefit and a $4.9 million expense for the six months ended February 28, 2009 and February 29, 2008. The provision for income taxes is based on projected consolidated results of operations for the entire year which results in an estimated 33.2% annual effective tax rate on pre-tax results. The effective tax rate fluctuates from year to year due to the geographical mix of pre-tax earnings and losses, minimum tax requirements in certain local jurisdictions and operating results for certain operations with no related tax effect. The actual tax rate for the first six months of the fiscal year 2009 was 34.2% as compared to 70.9% in the prior comparable period. The actual rate of 34.2% differs from the estimated effective rate of 33.2% due to revisions to our projected geographical mix of consolidated results from operations.

Equity in Earnings (Loss) of Unconsolidated Subsidiaries

Equity in earnings of the castings joint venture was $0.2 million for the six months ended February 28, 2009 compared to earnings of $0.3 million for the six months ended February 29, 2008. The decrease in earnings was associated with lower sales volumes of rail castings.

Liquidity and Capital Resources

We have been financed through cash generated from operations and borrowings. During the six months ended February 28, 2009, cash increased $35.1 million to $41.1 million from $6.0 million at August 31, 2008.

Cash provided by operations for the six months ended February 28, 2009 was $55.8 million compared to cash used in operations of $70.9 million for the six months ended February 29, 2008. The change is due primarily to changes in working capital needs including purchases and sales of railcars held for sale, timing of inventory purchases and varying customer payment terms.

Cash used in investing activities was $13.3 million for the six months ended February 28, 2009 compared to $8.5 million in the prior comparable period. Cash usage during the current year is primarily for capital expenditures.

Capital expenditures totaled $15.1 million and $16.0 million for the six months ended February 28, 2009 and February 29, 2008. Of these capital expenditures, approximately $6.6 million and $3.5 million were attributable to Leasing & Services operations for the six months ended February 28, 2009 and February 29, 2008. We regularly sell assets from our lease fleet, some of which may have been purchased within the current year and included in capital expenditures. Depending on market conditions and fleet management objectives, Leasing & Services capital expenditures for 2009, net of proceeds from sales of equipment, are expected to be nominal. Proceeds from the sale of equipment were $1.4 million and $6.4 million for the six months ended February 28, 2009 and February 29, 2008.

Approximately $6.8 million and $9.8 million of capital expenditures for the six months ended February 28, 2009 and February 29, 2008 were attributable to manufacturing operations. Capital expenditures for manufacturing operations are expected to be approximately $10.0 million in 2009 and primarily relate to start up of our tank car line at the Mexican joint venture, ERP implementation and maintenance of existing equipment.

Refurbishment & Parts capital expenditures for the six months ended February 28, 2009 and February 29, 2008 were $1.7 million and $2.7 million and are expected to be approximately $13.0 million in 2009 for maintenance of existing equipment, ERP implementation and some expansion.

Cash provided by financing activities was $5.7 million for the six months ended February 28, 2009 compared to $63.9 million in the six months ended February 29, 2008. During the six months ended February 28, 2009 we received $11.3 million in net proceeds from borrowings under revolving credit lines. In the prior period, we received $64.3 million in net proceeds from borrowings under revolving credit lines.

All amounts originating in foreign currency have been translated at the February 28, 2009 exchange rate for the following discussion. Senior secured revolving credit facilities, consisting of two components, aggregated $315.2 million as of February 28, 2009. A $290.0 million revolving line of credit is available through November 2011 to provide working capital and interim financing of equipment, principally for the United States and Mexican operations. Advances under this facility bear interest at variable rates that depend on the type of borrowing and the defined ratio of debt to total capitalization. In addition, current lines of credit totaling $25.2 million, with various variable rates, are available for working capital needs of the European manufacturing operation. Currently these European credit facilities have maturities that range from April 30, 2009 through August 2009. European credit facility renewals are continually under negotiation and the Company expects the available credit facilities to be approximately $25.0 million through August 31, 2009, but dependent on the outcome of negotiations, these amounts could be reduced to approximately $20.0 million as of May 31, 2009 and $15.0 million as of August 31, 2009.

As of February 28, 2009 outstanding borrowings under our facilities aggregated $101.5 million in revolving notes and $3.6 million in letters of credit. This consists of $80.0 million in revolving notes and $3.6 million in letters of credit outstanding under the United States credit facility and $21.5 million in revolving notes outstanding under the European credit facilities. Available borrowings for all credit facilities are generally based on defined levels of inventory, receivables, property, plant and equipment and leased equipment, as well as total debt to consolidated capitalization and interest coverage ratios which as of February 28, 2009 levels would provide for maximum additional borrowing of $84.0 million.

The revolving and operating lines of credit, along with notes payable, contain covenants with respect to the Company and various subsidiaries, the most restrictive of which, among other things, limit the ability to: incur additional indebtedness or guarantees; pay dividends or repurchase stock; enter into sale leaseback transactions; create liens; sell assets; engage in transactions with affiliates, including joint ventures and non U.S. subsidiaries, including but not limited to loans, advances, equity investments and guarantees; enter into mergers, consolidations or sales of substantially all the Company s assets; and enter into new lines of business. The covenants also require certain minimum levels of net worth, maximum ratios of debt to equity or total capitalization and minimum levels of interest coverage.

Effective February 28, 2009, the Company received a waiver of an interest coverage ratio covenant on certain corporate and European debt aggregating $6.5 million. During the third quarter we intend to seek amendments to certain covenants in our $290.0 million revolving line of credit and certain corporate and European debt aggregating $6.5 million.

We have operations in Mexico, Germany and Poland that conduct business in their local currencies as well as other regional currencies. To mitigate the exposure to transactions denominated in currencies other than the functional currency of each entity, we enter into foreign currency forward exchange contracts to protect the margin on a portion of forecast foreign currency sales. The Company has fully utilized all existing foreign currency hedge facilities. Foreign operations give rise to risks from changes in foreign currency exchange rates. Greenbrier utilizes foreign currency forward exchange contracts with established financial institutions to hedge a portion of that risk. No provision has been made for credit loss due to counterparty non-performance.

Currently we are seeking a third party line of credit to support our Mexican joint venture due in part to current limitations in our existing loan covenants. In the interim, Greenbrier is financing the working capital needs of the joint venture through a $27.0 million secured, interest bearing loan.

In accordance with customary business practices in Europe, we have $11.3 million in third party performance and warranty guarantee facilities all of which have been utilized as of February 28, 2009. To date, no amounts have been drawn under these performance and warranty guarantees.

We have outstanding letters of credit aggregating $3.6 million associated with facility leases and payroll.

Quarterly dividends of $.08 per share have been paid from the fourth quarter of 2005 through the first quarter of 2009. The quarterly dividend was decreased to $.04 per share during the second quarter of 2009. During the third quarter of 2009 the quarterly dividend was suspended.

We have advanced $0.5 million in long term advances to an unconsolidated subsidiary which are secured by accounts receivable and inventory. As of February 28, 2009, this same unconsolidated subsidiary had $3.7 million in third party debt for which we have guaranteed one-third or approximately $1.2 million.

We expect existing funds and cash generated from operations, together with proceeds from financing activities including borrowings under existing credit facilities and long-term financing, to be sufficient to fund working capital needs, planned capital expenditures and expected debt repayments or redemptions for the foreseeable future.

Off Balance Sheet Arrangements

We do not currently have off balance sheet arrangements that have or are likely to have a material current or future effect on our Consolidated Financial Statements.

Item 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

Foreign Currency Exchange Risk

We have operations in Mexico, Germany and Poland that conduct business in their local currencies as well as other regional currencies. To mitigate the exposure to transactions denominated in currencies other than the functional currency of each entity, we enter into foreign currency forward exchange contracts to protect the margin on a portion of forecast foreign currency sales. At February 28, 2009, $37.7 million of forecast sales were hedged by foreign exchange contracts. Because of the variety of currencies in which purchases and sales are transacted and the interaction between currency rates, it is not possible to predict the impact a movement in a single foreign currency exchange rate would have on future operating results. We believe the exposure to foreign exchange risk is not material.

In addition to exposure to transaction gains or losses, we are also exposed to foreign currency exchange risk related to the net asset position of our foreign subsidiaries. At February 28, 2009, net assets of foreign subsidiaries aggregated $0.2 million and a uniform 10% strengthening of the United States dollar relative to the foreign currencies would result in a decrease in stockholders equity of twenty three thousand dollars, 0.01% of total stockholders equity. This calculation assumes that each exchange rate would change in the same direction relative to the United States dollar.

Interest Rate Risk

We have managed our floating rate debt with interest rate swap agreements, effectively converting $54.1 million of variable rate debt to fixed rate debt. At February 28, 2009, the exposure to interest rate risk is reduced since 66% of our debt has fixed rates and 34% has floating rates. As a result, we are exposed to interest rate risk relating to our revolving debt and a portion of term debt. At February 28, 2009, a uniform 10% increase in interest rates would result in approximately $0.6 million of additional annual interest expense.

Item 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Our management has evaluated, under the supervision and with the participation of our President and Chief Executive Officer and our Chief Financial Officer, the effectiveness of the Company s disclosure controls and procedures as of the end of the period covered by this report pursuant to Rule 13a-15(b) under the Securities Exchange Act of 1934 (the Exchange Act). Based on that evaluation, our President and Chief Executive Officer and Chief Financial Officer have concluded that, as of the end of the period covered by this report, our disclosure controls and procedures were effective in ensuring that information required to be disclosed in our Exchange Act reports is (1) recorded, processed, summarized and reported in a timely manner, and (2) accumulated and communicated to our management, including our President and Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Controls over Financial Reporting

There have been no changes in our internal control over financial reporting that occurred during the quarter ended February 28, 2009 that have materially affected, or are reasonably likely to materially affect, the Company s internal controls over financial reporting.

Item 4T. Controls and Procedures

Not applicable

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

There is hereby incorporated by reference the information disclosed in Note 17 to Consolidated Financial Statements, Part I of this quarterly report.

Item 1A. Risk Factors

There have been no material changes in our risk factors described in our Annual Report on Form 10-K for the year ended August 31, 2008.

Item 4. Submission of Matters to a Vote of Security Holders

At the Annual Meeting of Stockholders of the Company, held on January 9, 2009, four proposals were voted upon by the Company s stockholders. A brief discussion of each proposal voted upon at the Annual Meeting and the number of votes cast for, against, withheld, abstentions and broker non-votes to each proposal are set forth below.

A vote was taken at the Annual Meeting for the election of three Directors of the Company to hold office until the Annual Meeting of Stockholders to be held in 2012 or until their successors are elected and qualified. The aggregate numbers of shares of Common Stock voted in person or by proxy for each nominee were as follows:

Nominee	Votes for Election	Votes Withheld	Votes Abstained	Broker Non-Votes
William A. Furman	14,191,090	733,603		
C. Bruce Ward	14,009,161	915,532		
Charles J. Swindells	11,538,526	3,386,167		

A vote was taken at the Annual Meeting for the proposal to approve the amendment of the 2005 Stock Incentive Plan to increase the number of shares available under the plan. The aggregate number of shares of Common Stock in person or by proxy which voted for, voted against, abstained and broker non-votes from the vote were as follows:

Votes for Approval	Votes against Approval	Votes Abstained	Broker Non-Votes
10,545,804	1,967,921	417,066	

A vote was taken at the Annual Meeting for the proposal to approve the adoption of the 2009 Employee Stock Purchase Plan. The aggregate number of shares of Common Stock in person or by proxy which voted for, voted against, abstained and broker non-votes from the vote were as follows:

Votes for Approval	Votes against Approval	Votes Abstained	Broker Non-Votes
12,372,795	141,705	416,291	

A vote was taken at the Annual Meeting on the proposal to ratify the appointment of Deloitte & Touche LLP as the Company s independent auditors for the year ended August 31, 2009. The aggregate number of shares of Common Stock in person or by proxy which voted for, voted against, abstained and broker non-votes from the vote were as follows:

Votes for Ratification	Votes against Ratification	Votes Abstained	Broker Non-Votes
14,414,846	106,893	402,953	

The foregoing proposals are described more fully in the Company s definitive proxy statement dated November 25, 2008, filed with the Securities and Exchange Commission pursuant to Section 14 (a) of the Securities Exchange Act of 1934, as amended, and the rules and regulations promulgated thereunder.

Item 6. Exhibits

(a) List of Exhibits:

10.1	Form of Amendment dated as of March 1, 2009 to Employment Agreements between Registrant and certain of Registrant s Executive Officers.
10.2	Amended and Restated Credit Agreement dated November 7, 2006 among the Registrant, TrentonWorks Limited, a Nova Scotia company, Bank of America, N.A. as U.S. Administrative Agent, Bank of America, N.A. through its Canada branch as Canadian Administrative Agent, U.S. Bank National Association as Documentation Agent, Banc of America Securities LLC as Sole Lead Arranger and Sole Book Manager, and the other lenders party thereto is incorporated herein by reference to Exhibit 10.1 of the Registrant s Form 8-K filed November 13, 2006.
10.3	First Amendment to Amended and Restated Credit Agreement dated January 8, 2008.
10.4	Second Amendment to Amended and Restated Credit Agreement dated May 8, 2008.
10.5	Amendment dated April 6, 2009 to Employment Agreement between Registrant and William A. Furman.
10.6	Employment Agreement dated April 6, 2009 between Alejandro Centurion and Registrant.
31.1	Certification pursuant to Rule 13 (a) 14 (a).
31.2	Certification pursuant to Rule 13 (a) 14 (a).
32.1	Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
32.2	Certification pursuant to 18 U.S.C. Section 1350 as adopted pursuant to Section 906 of the Sarbanes-Oxley Act of 2002.
