- (a) Payment-in-kind security.
 - (b) This Senior Loan interest is non-income producing.
 - (c) The borrower is in the process of restructuring or amending the terms of this loan.
 - (d) This borrower has filed for protection in federal bankruptcy court.
 - (e) All or a portion of this security is designated in connection with unfunded loan commitments.
 - (f) 144A-Private Placement security which is exempt from registration under Rule 144A of the Securities Act of 1933, as amended. This security may only be resold in transactions exempt from registration which are normally those transactions with qualified institutional buyers.
- * Senior Loans in the Fund's portfolio generally are subject to mandatory and/or optional

prepayment. Because of these mandatory prepayment conditions and because there may be significant economic incentives for a Borrower to prepay, prepayments of Senior Loans in the Fund's portfolio may occur. As a result, the actual remaining maturity of Senior Loans held in the Fund's portfolio may be substantially less than the stated maturities shown. Although the Fund is unable to accurately estimate the actual remaining maturity of individual Senior Loans, the Fund estimates that the actual average maturity of the Senior Loans held in its portfolio will be approximately 18-24 months.

Edgar Filing: Van Kampen Dynamic Credit Opportunities Fund - Form N-Q

** Senior Loans in which the Fund invests generally pay interest at rates which are periodically redetermined by reference to a base lending rate plus a premium. These base lending rates are generally (i) the lending rate offered by one or more major European banks, such as the London Inter-Bank Offered Rate ("LIBOR"), (ii) the prime rate offered by one or more major United States banks or (iii) the certificate of deposit rate. Senior Loans are generally considered to be restricted in that the Fund ordinarily is contractually obligated to receive approval from the Agent Bank and/or Borrower prior to the disposition of a Senior Loan.
