SECURITIES AND EXCHANGE COMMISSION
Washington, D.C. 20549

FORM 10-K
ANNUAL REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended December 31, 2002

Commission File Number 0-28732

SEABULK INTERNATIONAL, INC.
(Exact name of registrant as specified in its charter)

Delaware
(State or other jurisdiction of
incorporation or organization)

65-0966399
(I.R.S. Employer
Identification Number)

2200 Eller Drive, P.O. Box 13038
Ft. Lauderdale, Florida
(Address of principal executive offices)

33316
(Zip Code)

Registrant's telephone number, including area code: (954) 523-2200

Securities registered pursuant to Section 12(b) of the Act: None

Securities registered pursuant to Section 12(g) of the Act: Common Stock,
\$.01 par value

Indicate by check mark whether the registrant (1) has filed all reports
required to be filed by Section 13 or 15(d) of the Securities Exchange Act of
1934 during the preceding 12 months and (2) has been subject to such filing
requirements for the past 90 days. YES [X] NO ...

Indicate by check mark if disclosure of delinquent filers pursuant to Item
405 of Regulation S-K is not contained herein, and will not be contained, to the
best of registrant's knowledge, in definitive proxy or information statements
incorporated by reference in Part III of this Form 10-K or any amendment to this
Form 10-K. []

Indicate by check mark whether the registrant is an accelerated filer (as
defined in Rule 12b-2 of the Act). YES NO [X]

The aggregate market value of the voting stock held by non-affiliates of
the Registrant is approximately \$22,886,512 based upon the closing market price
on June 28, 2002 of \$7.84 per share of common stock on the NASDAQ National
Market as reported by the Wall Street Journal.

At March 1, 2003 there were 23,123,938 shares of the registrant's Common
Stock outstanding.

PART I

ITEM 1. BUSINESS

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

A. GENERAL

Seabulk International, Inc. is a competitor in each of its three main businesses - offshore energy support, marine transportation, and towing. Our offshore energy services fleet, numbering 129 vessels, is one of the world's largest and provides services to operators of offshore oil and gas exploration, development and production facilities in the Gulf of Mexico, the Arabian Gulf, offshore West Africa, South America and Southeast Asia. Our marine transportation fleet, numbering ten tankers, carries petroleum products, crude oil, and specialty chemicals in the U.S. domestic trade and includes five double-hull petroleum product and chemical carriers delivered in 1998 and 1999. Our towing fleet numbers 30 vessels and is one of the largest and most modern in the United States. We are the sole provider of commercial tug services at Port Canaveral, Florida; and a leading provider of those services in Port Everglades, Florida; Tampa, Florida; Mobile, Alabama; Lake Charles, Louisiana; and Port Arthur, Texas. We also provide offshore towing services primarily in the Gulf of Mexico. In March 2002, we sold the eight towboats and 14 barges in our marine transportation fleet, which was part of our Jacksonville, Florida-based Sun State Marine Services subsidiary. In March 2001, the Company changed its name from Hvide Marine Incorporated to Seabulk International, Inc. symbolizing the Company's transformation into new management and new ownership in 2000.

As used in this Report, the terms "we" and "the Company" refer to Seabulk International, Inc., a Delaware corporation, and its subsidiaries. Our principal executive offices are located at 2200 Eller Drive, P.O. Box 13038, Fort Lauderdale, Florida 33316, and our telephone number is (954) 523-2200.

B. PROJECTIONS AND OTHER FORWARD-LOOKING INFORMATION

This Report contains, and other communications by us may contain, projections or other "forward-looking" information. Forward-looking information includes all statements regarding our expected financial position, results of operations, cash flows, financing plans, business strategy, budgets, capital and other expenditures, competitive position, growth opportunities for existing or new services, management plans and objectives, and markets for securities. Like other businesses, we are subject to risks and other uncertainties that could cause our actual results to differ materially from any projections or that could cause other forward-looking information to prove incorrect. In addition to general economic and business risks, some of the specific risks to which our business is subject are:

- o declines in oil or gas prices, which tend to cause reductions in exploration, development and production activities and, in turn, reductions in the use of offshore energy support vessels and in the rates paid for their use;
- o increased construction of new offshore energy support vessels or construction of new Jones Act tankers by competitors, which can cause oversupply in the market and consequent reductions in the use of our offshore energy support vessels and Jones Act tankers and reductions in the rates paid for their use;
- o international political instability, which can lead to reductions in exploration, development and production activities, particularly in less developed regions;
- o fluctuations in weather, which can lead to declines in energy consumption

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

and resulting declines in oil or gas prices;

- o changes in laws and regulations affecting the marine transportation industry, including any possible weakening of the Jones Act, which could result in increased competition from non-U.S. companies in our domestic offshore energy support, towing, and petroleum and chemical product transportation businesses;
- o changes in environmental laws and regulations, including any possible weakening of the U.S. Oil Pollution Act of 1990 ("OPA 90"), which could result in increased competition for the petroleum and chemical product transportation services provided by our modern double-hull fleet;
- o risks associated with potential oil spills or other environmental pollution incidents, which, although believed to be covered by liability insurance, may result in adverse market reaction and loss of business; and
- o terrorist attacks or hijackings, which could disable or destroy one of our vessels and result in significant loss of hire and revenue.

Additional information regarding these and other factors affecting our business appears elsewhere in this Report under "Business Risk Factors."

C. LIQUIDITY

At December 31, 2002, the Company had working capital of approximately \$26.3 million. Day rates and utilization for offshore vessels working in the Gulf of Mexico continued to be weak, a trend that began in September 2001. The slowdown in the domestic offshore market was offset in part by continued strength in the Company's international offshore operations, where day rates remained strong during the year and contributed to increased revenue in West Africa and the Middle East, and in part by the improved performance of the marine transportation segment. The increased revenue in the offshore business in West Africa and the Middle East was driven by exploration and production spending as major oil companies continued to proceed with oil exploration and development programs outside the U.S. Since the September 11, 2001 attacks, the subsequent war on terrorism and then commencement of the war in Iraq, the U.S. economy continues to be subject to pressure. As we enter 2003, the timing of a recovery in the domestic offshore segment is still not certain. However, the increases in oil and natural gas prices during the fourth quarter of 2002 and the early part of 2003 reinforce the potential for an upturn in domestic exploration and development activity in the latter half of 2003. We do expect earnings in 2003 from the offshore segment to improve compared to 2002. The Company also expects to benefit in 2003 from higher earnings in its marine transportation business as a result of a full year of higher time charter rates for certain tankers.

The Company's capital requirements arise primarily from its need to service debt, fund working capital and maintain and improve its vessels. The Company anticipates capital requirements for debt service, vessel maintenance and fleet improvements in 2003 to total approximately \$98 million and expects that cash flow from operations will continue to be a significant source of funds for its working capital and capital requirements.

The Company's credit agreement contains certain restrictive financial covenants that among other things requires minimum levels of EBITDA and tangible net worth. The Company is in compliance with such covenants at December 31, 2002 and expects to be in compliance through the balance of 2003 based on current financial projections. However, the Company's financial projections contain assumptions with respect to economic recovery beginning in the second quarter of 2003 in the underperforming U.S. Gulf offshore market. If

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

the economic recovery does not occur or occurs later or to a lesser extent than the current forecast, the Company will need to reduce operating expenses to maintain compliance.

Management continues implementation of certain initiatives in an effort to improve profitability and liquidity. These initiatives include (1) selective acquisitions and charters of additional vessels, (2) repositioning certain vessels to take advantage of higher day rates, (3) selling unprofitable vessels, and (4) eliminating non-essential operating and overhead expenses. Management believes that its expense reduction initiatives will be sufficient to meet its financial covenants if the forecasted U.S. Gulf is other than expected.

Management recognizes that unforeseen events or business conditions, including unexpected deterioration in its markets, could prevent the Company from having sufficient liquidity to fund its operation or meeting targeted financial covenants.

If unforeseen events or business conditions prevent the Company from having sufficient liquidity to fund its operations, the Company has alternative sources including additional asset sales, and deferral of capital expenditures, which should enable it to satisfy essential capital requirements. If the Company does not meet its financial covenants, the Company would be required to seek an amendment or waiver to avoid default. While the Company believes it could successfully implement alternative plans, if necessary, there can be no assurance that such alternatives would be available or that the Company would be successful in their implementation.

3

D. RECENT DEVELOPMENTS

In January 2003, the Company took delivery of the Seabulk Africa, a newbuild, state-of-the-art, 236-foot, 5500 horsepower UT-755L platform supply vessel. The vessel is expected to join the Company's West African fleet. The Seabulk Africa was acquired for cash of approximately \$16 million and will be financed in April 2003 by means of a sale leaseback arrangement with TransAmerica Capital for a lease term of 10 years, after which the Company will have an option to acquire the vessel.

The Company also took delivery of two newbuild vessels as bareboat charterer in February and March 2003. The Seabulk Badamyar is a 3800-horsepower anchor handling tug/supply vessel and Seabulk Nilar is a 3800-horsepower platform supply vessel. The Company is bareboat chartering the vessels from the shipbuilder, the Labroy Group in Indonesia, for deployment under time charters with a major international oil company in the Southeast Asia market. The term of each bareboat charter is three years with an option to purchase.

On March 7, 2003, the Company formed a joint venture company in Nigeria, named Modant Seabulk Nigeria Limited, with CTC International, Inc., a company owned by Nigerian interests. The Company will have a minority interest in the joint venture. The Company will sell five of its crewboats operating in Nigeria to a related joint venture with CTC International in April 2003. Modant Seabulk Nigeria Limited will operate crewboats in Nigeria. The Company will provide certain management services for the joint venture.

In March 2003, the Company signed a memorandum of agreement to purchase a Brazilian flag line handling vessel for operations in Brazil. The purchase, which is subject to certain conditions, is expected to close by July 2003. The Company is also in discussions with a Brazilian shipyard for the construction of a modern platform supply vessel for offshore energy support operations in

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Brazil. In anticipation of such operations, the Company is establishing a Brazilian subsidiary called Seabulk Offshore do Brazil S.A.

In January 2003, Larry D. Francois succeeded Andrew W. Brauninger as President of Seabulk Offshore. In February 2003 Mr. Francois was also named a corporate Senior Vice President of the Company. Also in March 2003, John Teague and Gerald Gray were hired as Senior Vice President -

4

Seabulk Offshore Americas, and Senior Vice President - Seabulk Offshore International Operations, respectively.

On March 27, 2003, the Canaveral Port Authority served a sixty day notice of termination of the exclusive franchise to Port Canaveral Towing. Port Canaveral Towing intends to continue its operations on a non-exclusive basis at Port Canaveral.

E. FLEET OVERVIEW

The following table lists the types of vessels we owned, operated, or chartered as of March 1, 2003:

	VESSELS IN FLEET

of operation, see Note 12 to our consolidated financial statements.

5

F. LINES OF BUSINESS

(1) OFFSHORE ENERGY SUPPORT (SEABULK OFFSHORE)

The offshore energy support business accounted for approximately 53% of our total revenue in 2002. Offshore energy support vessels are used primarily to transport materials, supplies, equipment, and personnel to drilling rigs and to support the construction, positioning and ongoing operation of oil and gas production platforms. These vessels are hired, or "chartered," by oil companies and others engaged in offshore exploration and production activities.

The market for these services is fundamentally driven by the offshore exploration, development, and production activities of oil and gas companies worldwide. The level of these activities depends primarily on the capital expenditures of oil and gas producers, which has traditionally been a function of current and anticipated oil and gas prices. Oil and gas prices are influenced by a variety of factors, including worldwide demand, production levels, inventory levels, governmental policies regarding exploration and development of reserves, and political factors in producing countries.

Offshore energy support services are provided primarily by the following types of vessels:

- o Supply boats (also called workboats) are generally steel-hull vessels of at least 150 feet in length. They serve exploration and production facilities and support offshore construction and maintenance activities and are differentiated from other vessel types by cargo flexibility and capacity. In addition to transporting deck cargo, such as drill pipe and heavy equipment, supply boats transport liquid mud, potable and drilling water, diesel fuel, dry bulk cement, and dry bulk mud. With their relatively large liquid mud and dry bulk cement capacity and large areas of open deck space, they are generally in greater demand than other types of support vessels for exploration and workover drilling activities.
- o Anchor handling vessels, which include anchor handling tug/supply vessels and some tugs, are more powerful than supply boats and are used to tow and position drilling rigs, production facilities and construction barges. Some of these vessels are specially equipped to assist tankers while they are loading from single-point buoy mooring systems, and others are used in place of supply boats when not performing towing and positioning functions.
- o Crewboats (also called crew/supply boats) are faster and smaller than supply boats and are used primarily to transport personnel and light cargo, including food and supplies, to and among production platforms, rigs and other offshore installations. These vessels are chartered together with supply boats to support drilling or construction operations or, separately, to serve the various requirements of offshore production platforms. Crewboats are typically aluminum-hull vessels and generally have longer useful lives than steel-hull supply boats. Crewboats also provide a cost-effective alternative to helicopter transportation services and can operate reliably in all but the most severe weather conditions. However, the Company's strategy is to focus on higher-value, higher-margin vessels and reduce the smaller, lower-margin crewboat business. As a result, the Company sold nine crewboats during 2002 and its strategy is to continue to de-emphasize its crewboat business in 2003.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

About 28% of our 2002 offshore revenue was derived from domestic operations under U.S.-flag vessel registration in the Gulf of Mexico, directed from offices in Lafayette, Louisiana. The balance was derived from international operations, including offshore West Africa, the Arabian Gulf and adjacent areas, and Southeast Asia. We also operate offshore energy support vessels in other regions, including Central and South America and, to a limited extent, Europe. Operations in the Arabian Gulf, Southeast Asia and adjacent areas are directed from facilities in Dubai, United Arab Emirates; operations in offshore

6

West Africa and certain other international areas are directed from facilities in Nyon, Switzerland; and operations in Mexico are directed from our Lafayette, Louisiana facilities. We also have sales offices and/or maintenance and other facilities in many of the countries where our vessels operate.

The following table shows the deployment of our offshore energy support fleet at March 1, 2003.

LOCATION -----	VESSELS -----
Domestic Offshore Energy Support	
U.S. Gulf of Mexico	49
Other	1

	50
International Offshore Energy Support	
West Africa	40
Middle East	21
Southeast Asia	9
Other	9

Total International Offshore Energy Support	79

Total	129
	===

The average age of our offshore energy support vessels, based on the later of the date of construction or rebuilding, is approximately 17 years. About 25% of the offshore fleet is 10 or less years old, and approximately 53% is 20 or more years old. After a vessel has been in service for approximately 30 years, the costs of repair, vessel certification and maintenance may not be economically justifiable.

(2) MARINE TRANSPORTATION (SEABULK TANKERS)

We provide marine transportation services, principally for petroleum products and specialty chemicals, in the U.S. domestic or "coastwise" trade, a market largely insulated from direct international competition under the Jones Act. Marine transportation includes our ten tankers, five of which are double-hulled, and our inland tug-and-barge operation, Sun State Marine Services, which was sold in March 2002. This business accounted for approximately 37% of our total revenue in 2002.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Petroleum Product Transportation. In the domestic energy transportation trade, oceangoing and inland-waterway vessels transport fuel and other petroleum products, primarily from refineries and storage facilities along the coast of the U.S. Gulf of Mexico to utilities, waterfront industrial facilities and distribution facilities along the U.S. Gulf of Mexico, the Atlantic and Pacific coasts and inland rivers, as well as transportation of petroleum crude and product between Alaska, the West Coast and Hawaii. The number of U.S.-flag oceangoing vessels eligible to participate in the U.S. domestic trade and capable of transporting fuel or petroleum products has steadily decreased since 1980, as vessels have reached the end of their useful lives and the cost of constructing vessels in the United States (a requirement for U.S. domestic trade participation) has substantially increased. The decline in the number of available vessels has tightened the supply/demand balance and put upward pressure on freight rates, thereby benefiting the Company and our fleet of relatively young tankers.

7

At March 1, 2003 we operated the following petroleum product carriers:

NAME OF VESSEL -----	CAPACITY (IN BARRELS) -----	TONNAGE (IN DWT) -----
Seabulk Trader	360,000	49,000
Seabulk Challenge	360,000	49,000
S/R Bristol Bay (formerly known as Ambrose Channel) ..	341,000	45,000
Seabulk Arctic	340,000	46,000
Seabulk Mariner	340,000	46,000
Seabulk Pride	340,000	46,000
Defender	260,000	36,000

Since January 2002, the S/R Bristol Bay has been operated by a major oil company on a bareboat charter.

The S/R Bristol Bay, Seabulk Arctic, Seabulk Mariner and Seabulk Pride are four of our five double-hull carriers. These vessels are the newest and most technologically advanced product carriers in the Jones Act market. The fifth double-hull, Brenton Reef, is listed below under chemical tankers.

We acquired the Defender in March 1998. Under OPA 90, this vessel cannot be used to transport petroleum and petroleum products in U.S. commerce after 2008. We acquired the Seabulk Challenge and Seabulk Trader in August 1996. Their OPA 90 retirement date is 2011. The four double-hulls have no retirement date under OPA 90.

At March 1, 2003, six of our petroleum product carriers were operating under time charters and one under a bareboat charter.

Chemical Transportation. In the U.S. domestic chemical transportation trade, vessels carry chemicals, primarily from chemical manufacturing plants and storage tank facilities along the coast of the U.S. Gulf of Mexico to industrial users in and around Atlantic and Pacific coast ports. The chemicals transported consist primarily of caustic soda, alcohol, chlorinated solvents, paraxylene, alkylates, toluene, ethylene glycol, methyl tertiary butyl ether (MTBE) and lubricating oils. Some of the chemicals transported must be carried in vessels with specially coated or stainless steel cargo tanks; many of them are very

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

sensitive to contamination and require special cargo-handling equipment.

At March 1, 2003, we operated three vessels in the chemical trade:

NAME OF VESSEL	CAPACITY (IN BARRELS)	TONNAGE (IN DEAD-WEIGHT TONS OR "DWT")
Brenton Reef	341,000	45,000
Seabulk Magnachem	297,000	39,300
Seabulk America	297,000	46,300

Delivered in 1999, the Brenton Reef is a double-hull carrier in which we have a 100% equity interest. We operate the Seabulk Magnachem under a bareboat charter expiring in February 2007. We own a 67% equity interest in the Seabulk America; the remaining 33% interest is owned by Stolt Tankers (U.S.A.), Inc.

The Seabulk Magnachem and Seabulk America have full double bottoms (as distinct from double hulls). Double bottoms provide increased protection over single-hull vessels in the event of a grounding.

8

Delivered in 1977, the Seabulk Magnachem is a CATUG (or catamaran tug) integrated tug and barge, or ITB, which has a higher level of dependability, propulsion efficiency and performance than an ordinary tug and barge. The Seabulk America's stainless steel tanks were constructed without internal structure, which greatly reduces cargo residue from transportation and results in less cargo degradation. Stainless steel tanks, unlike epoxy-coated tanks, also do not require periodic sandblasting and recoating, which the Company deems to be a competitive advantage.

All three chemical carriers have from 13 to 24 cargo segregations which are configured, strengthened, and coated to handle various sized parcels of a wide variety of industrial chemical and petroleum products, giving them the ability to handle a broader range of chemicals than chemical-capable product carriers. Many of the chemicals we transport are hazardous substances. Current voyages are generally conducted from the Houston and Corpus Christi, Texas, and Lake Charles, Louisiana areas to such ports as New York, Philadelphia, Baltimore, Wilmington, North Carolina, Charleston, South Carolina, Los Angeles, San Francisco, and Kalama, Washington. Our chemical carriers are also suitable for transporting other cargoes, including grain.

Pursuant to OPA 90, the Seabulk America and Seabulk Magnachem cannot be used to transport petroleum and petroleum products in U.S. commerce after 2015 and 2007, respectively. The Brenton Reef has no retirement date under OPA 90.

We believe that the total capacity of these carriers represents a substantial portion of the capacity of the domestic specialty chemical carrier fleet. The two chemical carriers, Seabulk America and Seabulk Magnachem, can also be used as petroleum tankers. They are among the last independently owned carriers scheduled to be retired under OPA 90.

We book cargoes either on a spot (movement-by-movement) or contract of affreightment basis. Approximately 75.0% of contracts for cargo are committed on a 12- to 30-month basis, with minimum and maximum cargo tonnage specified over the period at fixed or escalating rates per ton. We are often able to generate

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

additional revenue by chartering cargo space on competitors' vessels.

Sun State. Our Sun State Marine Services subsidiary owned and operated a petroleum transportation fleet of eight towboats and 14 barges, all of which were primarily engaged in fuel transportation along the Atlantic intracoastal waterway and the St. Johns River in Florida.

The majority of Sun State's revenue was derived from a fuel transportation contract with Colonial Oil Industries (Colonial) (formerly known as Steuart Petroleum Company). In March 2002, Colonial acquired the eight tow boats and 14 barges, in which Sun State was responsible for handling all marine deliveries including the servicing of Colonial's paper mill, electric utility and vessel bunker customers. The remainder of Sun State's marine transportation revenue was derived from fuel transportation and towing contracts with other customers along with its marine maintenance, repair, drydocking and construction facility.

OTHER SERVICES

Sun State owned and operated a small vessel maintenance, repair and construction drydocking facility in Green Cove Springs, Florida, which was engaged principally in the maintenance and construction of tugs and barges, offshore support vessels, and other small vessels. The Sun State facility was shut down in August 2002 and equipment at the facility was sold for \$450,000.

The Company owned a 40-acre facility in Port Arthur, Texas that served as a regional office for our towing business, storage and supply base, and a facility for topside repairs of oceangoing vessels.

9

This facility was sold in May 2002. The regional office for the Port Arthur towing business continues to operate from a portion of the facility on a rental basis.

(3) TOWING (SEABULK TOWING)

Towing is the smallest of our three businesses and represents about 10% of our total revenue in 2002. Our harbor tugs serve seven ports in Florida, Alabama, Texas and Louisiana, where they assist petroleum product carriers, barges, container ships and other cargo vessels in docking and undocking and in proceeding within the port areas and harbors. We also operate four tugs with offshore towing capabilities that conduct a variety of offshore towing services in the Gulf of Mexico, Guayanilla, Puerto Rico, and the Atlantic Ocean. Our tug fleet consists of 20 conventional tugs and 10 tractor tugs, including four Ship Docking Module(TM) tractor tugs, known as SDMs(TM). SDMs(TM) are innovative ship docking vessels, designed and patented by us, that are more maneuverable, efficient and flexible, and require fewer crew members than conventional harbor tugs.

In August 2002, we bareboat-chartered the tug Hollywood for a term of one year to Signet for operations in the port of Brownsville, Texas. The name was subsequently changed to Signet Enterprise. In December 2002, we bareboat-chartered the tug Condor to Moran Towing for operations in New York harbor for a term of one year. The Signet Enterprise formerly operated in Tampa and the Condor formerly operated in Mobile.

Harbor Tug Operations. In most U.S. ports, competition is unregulated. However, a few ports grant non-exclusive franchises to harbor tug operators. These include Port Manatee (near Tampa), Florida, where we are currently the sole franchisee, and Port Everglades, Florida, where we are currently the

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

leading provider of tug services and one of two franchise holders. Port Canaveral is currently in settlement discussions with the Federal Maritime Commission to terminate its franchise system in which Seabulk Towing has been the sole franchise holder. Rates are unregulated in all ports that we serve, including the franchised ports. Generally, harbor tugs can be moved from port to port.

Port Everglades. Port Everglades is the second largest petroleum non-refining storage and distribution center in the United States, providing substantially all of the petroleum products for South Florida. Between 1958, when our tug operations commenced, and December 2001, we operated the franchise as the sole provider of docking services in the port. In August 2001, a second franchise was issued to a competitor by the port, who commenced operations in the port in December 2001. Seabulk Towing's franchise was amended in January 2002 to require Seabulk Towing to maintain a minimum of three tractor tugs in the port, rather than five tugs previously required. The franchise is not exclusive and expires in 2007. While we are regarded as a high-standards operator, there is no assurance the franchise will be renewed. As of March 1, 2003, we operated five tugs in Port Everglades.

Tampa. We expanded our harbor towing services to Tampa through the October 1997 acquisition of an established operator in the port. Because the port is comprised of three "sub-ports" (including Port Manatee) and a distant sea buoy, a greater number of tugs is required to be a competitive operator in Tampa than in other ports of similar size. On March 1, 2003, we operated eight tugs, including two tractor tugs and two SDMs(TM), in the port (including Port Manatee).

Port Canaveral. In Port Canaveral, we have been the sole franchise holder to provide harbor-docking services. We provide docking and undocking services for commercial cargo vessels serving central Florida and, on a very limited basis, for cruise ships, as well as for Navy vessels. The Canaveral Port Authority is currently in settlement discussions with the Federal Maritime Commission to terminate Seabulk Towing's franchise agreement as a result of a complaint filed against the Canaveral Port Authority by the Federal Maritime Commission, which means that Seabulk Towing may face competition

10

at Port Canaveral. In March 2003, the Canaveral Port Authority served a sixty day notice of termination of the exclusive franchise to Port Canaveral Towing. Port Canaveral Towing intends to continue its operations on a non-exclusive basis at Port Canaveral. We operate four tugs in Port Canaveral.

Mobile. At this port, we provide docking and undocking services primarily to commercial cargo vessels, including vessels transporting coal and other bulk exports. We operate two tugs at this port. There is a competing provider.

Port Arthur and Lake Charles. At these ports we operate seven tugs. Currently, four of these tugs serve Port Arthur, Texas; two serve Lake Charles, Louisiana, and one serves both harbors. Each of these ports has a competing provider of harbor tug services.

Offshore Towing Operations. We currently have two tugs working in the offshore towing market that conduct a variety of offshore towing services in the Gulf of Mexico and the Atlantic Ocean. Demand for towing services depends on vessel traffic and oilfield activity, which is in turn generally dependent on local, national and international economic conditions, including the volume of world trade.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

G. CUSTOMERS AND CHARTER TERMS

We offer our offshore energy support services primarily to oil companies and large drilling companies. Consistent with industry practice, our U.S. Gulf of Mexico operations are conducted primarily in the "term" market pursuant to short-term (less than six months) charters at varying day rates. Generally, such short-term charters can be terminated either by us or our customers upon notice of five days or less. Charters in our international markets have terms ranging from a few days to several years.

The primary purchasers of petroleum product transportation services are utilities, oil companies, and large industrial consumers of fuel with waterfront facilities. The primary purchasers of chemical transportation services are chemical and oil companies. Both services are generally contracted for on the basis of short-term or long-term time charters, voyage charters, contracts of affreightment, or other transportation agreements tailored to the shipper's requirements. CITGO and TESORO each accounted for 7% of our 2002 revenue, and represented our largest customers in 2002.

Our towing services are offered to vessel owners and operators and their agents. Our rates for harbor towing services are set forth in published tariffs and may be modified at any time, subject to competitive factors. We also grant volume discounts to major users of harbor services. Offshore towing services are priced based upon the service required on an ad hoc basis.

H. COMPETITION

We operate in a highly competitive environment in all our operations. The principal competitive factors in each of the markets in which we operate are suitability and reliability of equipment, safety record, personnel, price, service, and reputation. Competitive factors in the offshore energy support segment also include operating conditions and intended vessel use (both of which determine the suitability of vessel type), shallow water versus deepwater needs, the complexity of maintaining logistical support and the cost of transferring equipment from one market to another. Our vessels that provide marine transportation services compete with both other vessel operators and, in some areas and markets, with alternative modes of transportation, such as pipelines, rail tank cars, and tank trucks. Moreover, the users of such services are placing increased emphasis on safety, the environment and quality, partly due to heightened liability for the cargo owner in addition to the vessel owner/operator under OPA 90. With respect to towing services, we compete with other providers of tug services in all but two of the ports in which we operate. A new competitor entered the harbor tug market in Tampa in 1999, and another in

11

Port Everglades at the end of 2001. In March 2003 our franchise agreement with the Canaveral Port Authority was terminated and we may face tug competitors in Port Canaveral. Additional competitors may enter our markets in the future. While U.S. flag, coastwise-operated vessels are protected under the Jones Act and the Outer Continental Shelf Act, foreign-built, foreign-manned and foreign-owned vessels could be eligible to compete with our vessels operating in the domestic trade if the Jones Act were repealed or waived. There are no current indications that this will occur.

I. ENVIRONMENTAL AND OTHER REGULATIONS

Our operations are subject to significant federal, state, and local regulations, the principal provisions of which are described below.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Environmental. Our operations are subject to federal, state and local laws and regulations relating to safety and health and environmental protection, including the generation, storage, handling, emission, transportation, and discharge of hazardous and non-hazardous materials. The recent trend in environmental legislation and regulation is generally toward stricter standards, and this trend will likely continue. We believe that our operations currently are in substantial compliance with applicable environmental regulations.

Governmental authorities have the power to enforce compliance with applicable regulations, and violators are subject to fines, injunction, and consent agreements. We do not expect that we will be required in the near future to make capital expenditures that are material to our financial condition or operations by reason of environmental laws and regulations; however, because such laws and regulations are frequently changed and may impose increasingly stricter requirements, we cannot predict the ultimate cost of complying with these laws and regulations.

OPA 90. OPA 90 established an extensive regulatory and liability regime for the protection of the environment from oil spills. OPA 90 affects owners and operators of facilities operating near navigable waters and owners and operators of vessels operating in United States waters, which include the navigable waters of the United States and the 200-mile exclusive economic zone of the United States. Although it applies in general to all vessels, for purposes of its liability limits and financial-responsibility and response-planning requirements, OPA 90 differentiates between tank vessels (which include our chemical and petroleum product carriers) and "other vessels" (which include our tugs and offshore energy support vessels).

Under OPA 90, owners and operators of facilities and owners, operators and certain charterers of vessels are "responsible parties" and are jointly, severally and strictly liable for removal costs and damages arising from oil spills relating to their facilities and vessels, unless the spill results solely from the act or omission of a third party, an act of God or an act of war. Damages are defined broadly to include (i) natural resources damages and the costs of remediation thereof; (ii) damages for injury to, or economic losses resulting from the destruction of, real and personal property; (iii) the net loss of taxes, royalties, rents, fees and profits by the U.S. government, a state or political subdivision thereof; (iv) lost profits or impairment of earning capacity due to property or natural resources damage; (v) the net costs of providing increased or additional public services necessitated by a spill response, such as protection from fire, safety or other hazards; and (vi) the loss of subsistence use of natural resources.

For facilities, the statutory liability of responsible parties is limited to \$350.0 million. For tank vessels, the statutory liability of responsible parties is limited to the greater of \$1,200 per gross ton or \$10.0 million (\$2.0 million for a vessel of 3,000 gross tons or less) per vessel; for any "other vessel," such liability is limited to the greater of \$600 per gross ton or \$500,000 per vessel. Such liability limits do not apply, however, to an incident caused by violation of federal safety, construction or operating regulations

12

or by the responsible party's gross negligence or willful misconduct, or if the responsible party fails to report the incident or provide reasonable cooperation and assistance as required by a responsible official in connection with oil removal activities. Although we currently maintain maximum available pollution liability insurance, a catastrophic spill could result in liability in excess of available insurance coverage, resulting in a material adverse effect on our business.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Under OPA 90, with certain limited exceptions, all newly built or converted oil tankers operating in United States waters must be built with double hulls, and existing single-hull, double-side or double-bottom vessels must be phased out at some point, depending upon their size, age and place of discharge, through 2015 unless retrofitted with double hulls. As a result of this phase-out requirement, as interpreted by the U.S. Coast Guard, our five single-hull chemical and petroleum product carriers will be required to cease transporting petroleum products by 2015 with the first vessel phased out in 2007 and the last vessel phased out in 2015.

OPA 90 expanded pre-existing financial responsibility requirements and requires vessel owners and operators to establish and maintain with the United States Coast Guard evidence of insurance or qualification as a self-insurer or other evidence of financial responsibility sufficient to meet their potential liabilities under OPA 90. Coast Guard regulations require evidence of financial responsibility demonstrated by insurance, surety bond, self-insurance, or guaranty. The regulations also implement the financial responsibility requirements of the Comprehensive Environmental Response, Compensation and Liability Act of 1980 ("CERCLA"), which imposes liability for discharges of hazardous substances such as chemicals, in an amount equal to \$300 per gross ton, thus increasing the overall amount of financial responsibility from \$1,200 to \$1,500 per gross ton. We have obtained "Certificates of Financial Responsibility" pursuant to the Coast Guard regulations for our product and chemical carriers through self-insurance and commercial insurance.

OPA 90 also amended the federal Water Pollution Control Act to require the owner or operator of certain facilities or the owner or operator of a tank vessel to prepare facility or vessel response plans and to contract with oil spill removal organizations to remove to the maximum extent practicable a worst-case discharge. We have complied with these requirements. As is customary, our oil spill response contracts are executory in nature and are not activated unless required. Once activated, our pollution liability insurance covers the cost of spill removal subject to overall coverage limitations and deductibles.

OPA 90 does not prevent individual states from imposing their own liability regimes with respect to oil pollution incidents occurring within their boundaries, and many states have enacted legislation providing for unlimited liability for oil spills. Some states have issued implementing regulations addressing oil spill liability, financial responsibility, and vessel and facility response planning requirements. We do not anticipate that such legislation or regulations will have any material impact on our operations.

In addition to OPA 90, the following are examples of environmental, safety and health laws that relate to our operations:

Water. The Federal Water Pollution Control Act ("FWPCA") or Clean Water Act ("CWA") imposes restrictions and strict controls on the discharge of pollutants into navigable waters. Such discharges are typically regulated by National Pollutant Discharge Elimination System ("NPDES") permits. The FWPCA provides for civil, criminal and administrative penalties for any unauthorized discharges and imposes substantial potential liability for the costs of removal, remediation, and damages. State laws for the control of water pollution also provide varying civil, criminal and administrative penalties and liabilities in the case of a discharge of petroleum, its derivatives, hazardous substances, wastes and pollutants into state waters. In addition, the Coastal Zone Management Act authorizes state

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

implementation and development of programs of management measures for non-point source pollution to restore and protect coastal waters.

We manage our exposure to losses from potential discharges of pollutants through the use of well-maintained and well-managed facilities; well-maintained and well-equipped vessels; safety and environmental programs, including a maritime compliance program and our insurance program; and we believe we will be able to accommodate reasonably foreseeable environmental regulatory changes. There can be no assurance, however, that any new regulations or requirements or any discharge of pollutants by the Company will not have an adverse effect on us.

Solid Waste. Our operations may generate and result in the transportation, treatment and disposal of both hazardous and non-hazardous solid wastes that are subject to the requirements of the federal Resource Conservation and Recovery Act ("RCRA") and comparable state and local requirements. In August 1998, the EPA added four petroleum refining wastes to the list of RCRA hazardous wastes.

Remediation of Sun State. We have agreed to remediate certain portions of the former Sun State Marine facility in Green Cove Springs, Florida in cooperation with the state of Florida Department of Environmental Protection and the owner of the property. The Company has expended approximately \$100,000 to date in remediation expenses and anticipates approximately another \$100,000 to complete the project over the first nine months of 2003.

Clean Air Regulations. The federal Clean Air Act of 1970, as amended by the Clean Air Act Amendments of 1990, requires the EPA to promulgate standards applicable to the emission of volatile organic compounds and other air pollutants. Our vessels are subject to vapor control and recovery requirements when loading, unloading, ballasting, cleaning and conducting other operations in certain ports. Our chemical and petroleum product carriers are equipped with vapor control systems that satisfy these requirements. In addition, it is anticipated that the EPA will issue regulations addressing air emission requirements applicable to marine engines. Adoption of such standards could require modifications to existing marine diesel engines in some cases.

Coastwise Laws. A substantial portion of our operations is conducted in the U.S. domestic trade, which is governed by the coastwise laws of the United States (commonly referred to as the Jones Act). The coastwise laws reserve marine transportation (including harbor tug services) between points in the United States (including drilling rigs fixed to the ocean floor on the U.S. outer continental shelf, under the Outer Continental Shelf Act) to vessels built in and documented under the laws of the United States (U.S. flag) and owned and manned by U.S. citizens, with an exception to the ownership requirement with respect to foreign owned financial entities which own and lease U.S. vessels to U.S. citizen operators. Generally, a corporation is deemed a U.S. citizen so long as (i) it is organized under the laws of the U.S. or a state, (ii) each of its president or other chief executive officer and the chairman of its board of directors is a citizen, (iii) no more than a minority of the number of its directors necessary to constitute a quorum for the transaction of business are non-citizens, and (iv) 75.0% of the interest and voting power in the corporation is held by U.S. citizens. Because we could lose the privilege of operating our vessels in the U.S. domestic trade if non-citizens were to own or control in excess of 25.0% of our outstanding capital stock, our Certificate of Incorporation contains restrictions concerning foreign ownership and control of our stock.

Under the citizenship provisions of the U.S. Merchant Marine Act of 1920 (Jones Act) and the Shipping Act of 1916, the Company would lose the privilege of engaging in U.S. coastwise trade if more than 25% of the Company's outstanding stock was owned by non-U.S. citizens. The Company has a dual stock certificate system to prevent non-U.S. citizens from owning more than 25% of its

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

common stock. In addition, the Company's charter provides the Company with certain remedies with respect to any

14

transfer or purported transfer of shares of the Company's common stock that would result in the ownership by non-U.S. citizens of more than 25% of its common stock.

The laws of the United States provide that once a vessel is registered under a foreign flag it cannot thereafter engage in the U.S. coastwise trade. Therefore, the Company's non-U.S. flag vessels must continue to be operated abroad, and if the Company was not able to secure charters or contracts abroad for them, and work would otherwise have been available for them in the United States, its operations would be adversely affected. Of the total vessels owned or operated by the Company at March 1, 2003, 78 were registered under foreign flags and 91 were registered under the U.S. flag.

The Company's offshore vessels are subject to international safety and classification standards. U.S. flag tanker and offshore support vessels operating in the U.S. are required to undergo periodic inspections and to be recertified under drydock examination at least every five years. Vessels registered under flags other than the United States are subject to similar regulations as governed by the laws of the applicable jurisdictions.

There have been repeated efforts aimed to repeal or significantly change the Jones Act. Although we believe it is unlikely that the Jones Act will be substantially modified or repealed, there can be no assurance that Congress will not substantially modify or repeal it or that Coast Guard interpretations of it may weaken it. Such changes could have a material adverse effect on our operations and financial condition.

Occupational Health Regulations. Our shoreside facilities and, as of 2001, our U.S.-based vessels, are subject to occupational safety and health regulations issued by the U.S. Occupational Safety and Health Administration (OSHA) and comparable state programs. Such regulations currently require us to maintain a workplace free of recognized hazards, observe safety and health regulations, maintain records and keep employees informed of safety and health practices and duties. Our vessel operations are also subject to occupational safety and health regulations issued by the U.S. Coast Guard and, to an extent, OSHA. Such regulations currently require us to perform monitoring, medical testing and record keeping with respect to mariners engaged in the handling of the various cargoes transported by our chemical and petroleum product carriers.

Vessel Condition. Our chemical and petroleum product carriers, offshore energy support vessels, and certain of our tugs are subject to periodic inspection and survey by, and drydocking and maintenance requirements of, the Coast Guard and/or the American Bureau of Shipping and other marine classification societies.

We believe we are currently in compliance in all material respects with the environmental and other laws and regulations, including health and safety requirements, to which our operations are subject and are unaware of any pending or threatened litigation or other judicial, administrative or arbitration proceedings against us occasioned by any alleged non-compliance with such laws or regulations. We are currently conducting remediation of certain portions of the former Sun State Marine facility in cooperation with the State of Florida Department of Environmental Protection. The risks of substantial costs, liabilities, and penalties for environmental accidents and compliance are, however, inherent in marine operations, and there can be no assurance that

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

significant costs, liabilities or penalties for will not be incurred by or imposed on us in the future.

International Laws and Regulations. Our vessels that operate internationally are subject to various international conventions, including certain safety, environmental and construction standards. Among the more significant of the conventions applicable to the fleet are: (i) the International Convention for the Prevention of Pollution from Ships, 1973, 1978 Protocol, (ii) the International Convention on the

15

Safety of Life at Sea, 1978 Protocol, including the International Management Code for the Safe Operation of Ships and for Pollution Prevention, which went into effect for tank vessels on July 1, 1998, and (iii) the International Convention on Standards of Training, Certification and Watchkeeping for Seafarers, 1978, as amended in 1995. These conventions govern oil spills and other matters of environmental protection, worker health and safety, and the manning, construction and operation of vessels. Generally, surveys and inspections are performed by internationally recognized classification societies. The vessels that operate internationally are registered primarily in the Marshall Islands, Liberia and Panama.

Although we believe we are in substantial compliance with all applicable requirements, the risks of incurring substantial compliance costs and liabilities and penalties for noncompliance are inherent in offshore energy support operations and there can be no assurance that significant costs, liabilities and penalties will not be incurred by us or imposed on us in the future.

J. INSURANCE

Our marine transportation operations are subject to the normal hazards associated with operating vessels carrying large volumes of cargo and rendering services in a marine environment. These hazards include the risk of loss of or damage to our vessels, damage to third parties as a result of collision, loss, or contamination of cargo, personal injury of employees and third parties, and pollution and other environmental damages. We maintain insurance coverage against these hazards with certain deductibles for which we are responsible. Risk of loss of or damage to our vessels is insured through hull and machinery insurance policies in amounts that approximate fair market value, also subject to certain deductibles. Vessel operating liabilities, such as collision, cargo, environmental, and personal injury, are insured primarily through our participation in a mutual insurance association, the Steamship Mutual Underwriting Association (Bermuda) Limited. Because we maintain mutual insurance, we are subject to additional premiums for prior years due to funding requirements and coverage shortfalls in the event claims exceed available funds, reserves and reinsurance, and to future premium increases based on prior underwriting loss experience. Potential claims liabilities are recorded as insurance expense reserves when they become probable and can be reasonably estimated.

The Company carries workers' compensation, maritime employer's liability, general liability and other insurance customary in the industry. The Company also carries War Risk insurance for all of its vessels for both hull and machinery damage to the vessels and protection and indemnity liability. This insurance provides coverage for marine perils including war, terrorism, sabotage, riots, seizure and piracy.

The terrorist attacks on the United States on September 11, 2001 and the

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

continued threat of terrorist activity, together with significant investment losses due to the poor investment performance by most insurance companies, have created uncertainty in the insurance markets. It is also possible that acts of terrorism could be directed against U.S. companies such as ours. These uncertainties have contributed to significant increases in the premiums quoted for our insurance coverages, which in turn has also contributed to substantial increases in the Company's insurance deductibles and self insured retention levels.

In December 2001, the Company was notified by Steamship Mutual, its protection and indemnity ("P&I") marine insurance club (the "Club"), of additional insurance calls in the projected amount of \$4.1 million due to the Club's investment losses. The Company accrued the full \$4.1 million in 2001. Actual payments of these additional calls made during 2002 were \$2.1 million, and \$2.0 million is expected to be paid in 2003.

The increase in P&I costs due to higher deductibles and higher self insured retention levels will likely cause an increase in P&I insurance expense in 2003 of between \$1.5 million and \$2.5 million.

16

Premiums by both marine and non-marine insurers have been adversely impacted by the erosion of claims reserves (including our underwriters), claims underwriting losses and increased reinsurance costs, as well as our own loss experience. No assurance can be given that affordable and viable direct and reinsurance markets will be available to us in the future. We maintain high levels of self-insurance for P&I and hull and machinery risks through the use of substantial deductibles and self insured retentions, which may increase in the future. We carry coverage related to loss of earnings on revenues subject to fourteen day deductibles, for our tanker operations, but not for our offshore and tug operations.

K. SECURITY

Heightened awareness of security needs brought about by the events of September 11, 2001 have caused the U.S. Coast Guard, the International Maritime Organization, and the states and local ports to adopt heightened security procedures relating to ports and vessels. The Company is updating its procedures in light of the new requirements.

In 2002 Congress passed the Maritime Transportation Security Act which, together with the International Maritime Organization's recent security proposals (collectively known as The International Ship and Port Security Code), will require specific security plans for certain types of vessels and more rigorous crew identification requirements. The Company will continue its review and implementation of vessel security plans and procedures as rules implementing the Act are issued by the U.S. Coast Guard and go into effect. The costs of security are likely to rise.

L. RISKS OF OPERATING INTERNATIONALLY

The Company's international offshore vessel support operations are subject to the usual risks inherent in doing business in countries other than the United States. Such risks include changing political conditions, local cabotage and content laws, possible vessel seizure, company nationalization or other governmental actions, currency restrictions and revaluations, import/export restrictions, increases in duty taxes and royalties, war, and terrorist attacks, all of which are beyond the control of the Company. In the last year, there has been a higher than usual level of anti-Western hostility in parts of the Middle East and Southeast Asia, where the Company has substantial operations. In

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Nigeria there has recently been legislation enacted which will provide for certain Nigerian ownership and crew requirements for offshore vessel support operators such as the Company. The Company has entered into a joint venture with Nigerian interests to operate Nigerian flag crewboats in Nigeria, partially in response to such proposals. Although it is impossible to predict the effect of any of these developments on the Company, the Company believes these risks to be within acceptable limits and, in view of the mobile nature of the Company's principal revenue producing assets, does not consider them at this time to constitute a factor materially adverse to the conduct of its international offshore vessel support operations as a whole.

M. EMPLOYEES

As of March 1, 2003, we had 2,143 employees. Management considers relations with employees to be satisfactory. Renegotiations of labor contracts are on-going. The Seabulk America is manned by 38 officers and crew who are subject to a collective bargaining arrangement that expires on December 31, 2003. In addition, the Seabulk Trader, Seabulk Challenge, Seabulk Magnachem, Seabulk Defender, the five double-hull tankers, and twenty-eight harbor tugs are manned by approximately 400 members of national maritime labor unions.

In January 2003, an election was held among tug crew employees of Seabulk Towing, Inc. at its Mobile, Alabama facility, for the purpose of determining whether the crew would remain non-union, or would choose to be represented by the Marine Engineers Benevolent Association (MEBA) union or the

17

American Maritime Officers union. The results of the election, as certified by the U.S. National Labor Relations Board (NLRB), was that no union collective bargaining representative was selected. No timely objections were filed to the election. The Company is also vigorously objecting to alleged unfair labor practice charges filed against the Company before the NLRB by MEBA arising out of the discharge of three employees in Mobile and the conduct of the election campaign in Mobile.

N. ADDITIONAL BUSINESS AND CORPORATE RISK FACTORS

The Company operates in a business environment that has many risks. Listed below are some additional critical risk factors that affect the Company and particularly its offshore vessel support business and that should be considered when evaluating any forward-looking statement. The impact of any one risk factor or a combination of several risk factors could materially impact the Company's results of operations and financial condition and the accuracy of any forward-looking statement made in this Form 10-K.

Oil and Gas Prices Are Highly Volatile. Commodity prices for crude oil and natural gas are highly volatile. Prices are extremely sensitive to supply/demand. High demand for crude oil and natural gas and/or low inventory levels as well as perceptions about future supply interruptions can cause commodity prices for crude oil and natural gas to rise while, generally, low demand and/or increases in crude oil and natural gas supplies cause commodity prices to fall.

Factors that affect the supply of crude oil and natural gas include but are not limited to the following: the Organization of Petroleum Exporting Countries' (OPEC) ability to control crude oil production levels and pricing as well as the level of production by non-OPEC countries; political and economic instability and uncertainties, including war or the threat of war; advances in exploration and development technology; worldwide demand for energy resources; and

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

governmental restrictions placed on exploration and production of energy resources.

Changes in the Level of Capital Spending by Our Customers. The Company's principal customers are major oil and natural gas exploration, development and production companies. The Company's results of operations, particularly of its offshore vessel support business, are dependent on the level of capital spending by the energy industry. To the extent our customers reduce their level of capital spending, our business would be adversely affected.

The Offshore Vessel Support Industry is Highly Competitive. The Company's offshore vessel support business in particular operates in a highly competitive environment. Competitive factors include type of equipment, price and quality of service by vessel operators, and the quality, availability and age of vessels. Decreases in the level of offshore drilling and development activity by the energy industry can negatively affect the demand for the Company's vessels, consequently applying downward pressure on day rates. Extended periods of low vessel demand and/or low day rates will reduce the Company's revenues. Day rates for offshore support vessels also depend on the supply of vessels. Generally, excess offshore service capacity puts downward pressure on day rates. Excess capacity can occur when newly constructed vessels enter the market and when vessels are mobilized between market areas. While the Company has recently committed to the construction of several vessels, it has also sold a significant number of vessels over the last few years.

The Ability to Obtain Favorable Financing. The Company's ability to add vessels both for replacement of aging equipment and for expansion is largely dependent on its ability in the future to obtain favorable financing from commercial sources and through government maritime finance programs. The U.S. government maritime financing guarantee program (the Title XI Program), which has been used

18

in the past to finance five of the Company's tankers and three of the Company's tugs, has not been funded as yet for the government's current fiscal year.

The Ability to Obtain U.S. Shipyard Construction. We believe that there are a limited number of U.S. shipyards either interested in or capable of constructing U.S.-flag product tankers in accordance with our standards and cost requirements. Failure to agree with a shipyard on tanker newbuilds could adversely affect our ability to expand our Jones Act tanker fleet or replace our five single hull vessels, the first of which is scheduled to be retired under OPA '90 in 2007.

Our Controlling Shareholders Effectively Control the Outcome of Shareholder Voting. A group of shareholders currently beneficially owns approximately 76% of our voting power. As a result, this group of shareholders has the power to effectively control the outcome of shareholder votes and, therefore, corporate actions requiring such votes. Further, the existence of the controlling group of shareholders may adversely affect the prevailing market price of our shares if they are viewed as discouraging takeover attempts in the future.

Holders of our Common Stock may Experience Dilution in the Value of Their Equity Interest as a Result of the Issuance and Sale of Additional Shares of our Common Stock. A substantial number of shares of our common stock was issued in a private equity transaction in September 2002. They are, therefore, treated as "restricted securities" for purposes of Rule 144 under the Securities Act and are held by our affiliates and treated as "control securities". The controlling shareholders currently beneficially own approximately 76% of our outstanding

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

common stock. No prediction can be made as to the effect, if any, that the issuance and availability for future market sales of our common stock (including shares issued upon the exercise of stock options) or the perception that such sales could occur, could materially impair our future ability to raise capital through our offering of equity securities.

Changes in Operating and Financing Costs could have an Adverse Impact. The impact of changes in operating and financing costs, including foreign currency, interest rates, fuel, insurance and security costs could adversely affect results.

Failure to Attract and Retain Key Management and Technical Personnel. The Company's success depends upon the continued service of its executive officers and other key management and technical personnel, and our ability to attract, retain, and motivate highly qualified personnel. The loss of the services of a number of the Company's executive officers, area managers, fleet personnel or other key employees, or our ability to recruit replacements for such personnel or to otherwise attract, retain and motivate highly qualified personnel, could adversely affect the Company.

O. WEBSITE ACCESS TO REPORTS

We make available, free of charge, access to our Annual Report on Form 10-K and our most recent Quarterly Report on Form 10-Q as soon as reasonably practicable after such reports are electronically filed with or furnished to the SEC through our home page at www.seabulkinternational.com. We will also, in the near future, make all future Quarterly Reports on Form 10-Q, Current Reports on Form 8-K, and all amendments thereto available on our home page.

19

ITEM 2. PROPERTIES

The Company's fleet ownership is described in Item 1. Business. Substantially all of the Company's vessels are mortgaged to secure the Company's New Credit Facility or U.S. Maritime Administration Title XI financing.

The Company's principal offices are located in Fort Lauderdale, Florida, where the Company leases approximately 36,000 square feet of office and shop space under a lease expiring in 2009. The Company formerly owned a 40-acre facility in Port Arthur, Texas that served as a regional office and included 1,200 feet of dock space. This facility was sold in May of 2002. The Company also leases office and other facilities in Lafayette, Louisiana; Dubai, the United Arab Emirates; Nyon, Switzerland; Houston, Texas and Tampa, Florida. In addition, the Company leases sales offices and maintenance and other facilities in many of the locations where its vessels operate. The lease in Green Cove Springs was terminated in April 2002 as part of the sale of the Sun State Marine Services business. The Company believes that its facilities are generally adequate for current and anticipated future use, although the Company may from time to time close or consolidate facilities or lease additional facilities as operations require.

ITEM 3. LEGAL PROCEEDINGS

Under United States law, "United States persons" are prohibited from business activities and contracts in certain countries, including Sudan and Iran. The Company has filed three reports with and submitted documents to the Office of Foreign Asset Control ("OFAC") of the U.S. Department of Treasury. One of the reports was also filed with the Bureau of Export Administration of the U.S. Department of Commerce. The reports and documents related to certain

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

limited charters with third parties involving three of the Company's vessels which called in the Sudan for several months in 1999 and January 2000, and charters with third parties involving several of the Company's vessels which called in Iran in 1998. In March 2003, the Company received notification from OFAC that the case has been referred to its Civil Penalties Division. Should OFAC determine that these activities constituted violations of the laws or regulations, civil penalties, including fines, could be assessed against the Company and/or certain individuals who knowingly participated in such activities. The Company cannot predict the extent of such penalties; however, management does not believe the outcome of these matters will have a material impact on its financial position or results of operations.

The Company was sued by Maritime Transportation Development Corporation in January 2002 in Florida state court in Broward County alleging broker commissions due since 1998 from charters on two of its vessels, the Seabulk Magnachem and Seabulk Challenger, under an alleged broker commission agreement. The claim allegedly continues to accrue. The amount alleged to be due is over \$500,000, but is subject to offset claims and defenses by the Company. The Company is vigorously defending such charges and believes that it has good defenses, but the Company cannot predict the ultimate outcome.

From time to time the Company is also party to personal injury and property damage claims litigation arising in the ordinary course of our business. Protection and Indemnity marine liability insurance covers large claims in excess of the deductibles and self insured retentions.

ITEM 4. SUBMISSION OF MATTERS TO A VOTE OF SECURITY HOLDERS.

None.

20

ITEM 4A. EXECUTIVE OFFICERS OF THE REGISTRANT

The executive officers of the Company are:

NAME -----	AGE ---	CURRENT POSITIONS -----
Gerhard E. Kurz	63	Chairman of the Board, President and Chief Executive
Vincent J. deSostoa	58	Senior Vice President and Chief Financial Officer
Larry D. Francois	60	Senior Vice President and President, Seabulk Offshore
Kenneth M. Rogers	47	Senior Vice President and President, Seabulk Towing
Alan R. Twaits	55	Senior Vice President, General Counsel and Secretary
L. Stephen Willrich	50	Senior Vice President and President, Seabulk Tankers
Michael J. Pellicci	39	Vice President - Finance and Corporate Controller
Hubert E. Thyssen	55	Vice President - Seabulk Offshore

MR. KURZ has been Chief Executive Officer and a Director of the Company since April 2000, President since September 2000, and Chairman of the Board since September 2002. He formerly served as President of Mobil Shipping and Transportation Company (MOSAT), a Mobil Oil-affiliated company from which he retired in March 2000. Mr. Kurz joined Mobil in London in 1964 as a Chartering Assistant. In 1965 he was transferred to Mobil's Marine Division in New York. After a series of assignments, he was named Vice President of Planning, Middle East and Marine Transportation, and then President of MOSAT in 1989. He serves

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

on the Board of Directors of the American Bureau of Shipping and previously chaired its Finance and Nominating Committees. He also serves on the Boards of the Seamen's Church Institute, the Coast Guard Foundation, and the Newport News Mariners' Museum. Mr. Kurz is past Chairman of the Marine Preservation Association and the Oil Companies International Marine Forum. He is a founding member and Chairman of the Massachusetts Maritime Academy's International Business Advisory Council and a member of the International Advisory Board to the Panama Canal Authority. He is the recipient of numerous awards and honors, including the International Maritime Hall of Fame Award, the 1999 SeaTrade "Personality of the Year" award, the Seamen's Church Institute Silver Bell Award, and the U. S. Coast Guard Award and Medal for Meritorious Public Service. He holds an Honorary Doctorate Degree from Massachusetts Maritime Academy.

MR. DESOSTOA has been Senior Vice President and Chief Financial Officer since June 2002. He was previously President and Chief Financial Officer of Zeosoft Corporation, a provider of mobile service networks. Prior to that, he served as Senior Vice President and Chief Financial Officer of OMI Corporation, an international tanker operator with interests in real estate and energy. Mr. deSostoa was also Chief Financial Officer of the New York City Transit Authority and a partner with Peat Marwick, Mitchell & Co., which he joined in 1973. He is a Vietnam veteran and a recipient of the Navy Achievement Award.

MR. FRANCOIS was appointed Senior Vice President in February 2003 and President, Seabulk Offshore in January 2003. He previously served as Area Manager of domestic offshore marine operations for Tidewater Inc. Prior to that, he was Division Manager for Zapata Gulf Marine Corporation in Mexico, International Marketing Manager in London for Western Oceanic, Inc., and Area Executive for Tidewater in Egypt. He was also Marketing & Sales Manager for Dillingham Maritime, a division of the Dillingham Corporation. A Vietnam veteran, Mr. Francois served in the United States Air Force with the rank of Captain.

21

MR. ROGERS has been Senior Vice President and President, Seabulk Towing since July 2002. He was previously Senior Vice President of Marketing for Seabulk Towing, which he joined in October 2001. Prior to that, he was Managing Director of Maritime Audit Services for Carnival Corporation and President of Southern Ship Management. Mr. Rogers was successively Port Captain, Ship Manager, Assistant Vice President of Operations and Vice President of Operations for OMI Corporation, which he joined in 1986. He began his career, upon graduation from the United States Merchant Marine Academy, with Texaco Inc. as a Deck Officer.

MR. TWAITS has been Senior Vice President, General Counsel and Secretary since November 2000. He was previously Senior Vice President, General Counsel and Secretary of Premier Cruise Lines. Prior to his experience at Premier, he was in private practice and served as General Counsel and Secretary for Carnival Corporation as well as a Director and Vice President, General Counsel and Secretary of Carnival Air Lines. Mr. Twaits has also held senior counsel positions with Crowley Maritime Corporation, Trusthouse Forte, Inc., United States Lines, Inc., and a staff counsel position at Pan American World Airways. He is a member of the Florida Bar, the District of Columbia Bar, the American Bar Association and its International Law Section, the American Corporate Counsel Association, and the Association of Corporate Secretaries.

MR. WILLRICH has been Senior Vice President since June 2000 and President of Seabulk Tankers since March 1998, when he was also elected a corporate Vice President. He was appointed Senior Vice President of Seabulk Tankers in August 1996. He joined the Company as Vice President of Chartering in January 1988.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Prior to joining the Company, Mr. Willrich was employed by Diamond Shamrock Chemical Company from 1975 to 1988, where he rose to Division General Manager. Prior to his service with Diamond Shamrock, he worked for Gulf Oil Corporation as a Third Assistant Engineer on various company tankers. He has more than 27 years of experience in the management of Jones Act product tankers.

MR. PELLICCI has been Vice President - Finance since March 2002 and Controller since January 2001. He previously served as Director of Corporate Finance and Corporate Controller of Caraustar Industries, Inc. in Atlanta, which he joined in 1989. Prior to that, he was a Senior Auditor with Arthur Andersen & Co. He is a Certified Public Accountant.

MR. THYSSEN has been Vice President since August 2002. He is also Senior Vice President of Marketing & Sales for Seabulk Offshore and Managing Director of Seabulk Offshore, S.A. He joined the Company in 1998 when it acquired Care Offshore, where he served as Managing Director and Director of Marketing. Prior to that, he was Manager for Saunier Maritime SARL in Marseilles, a shipbroker and agent, which he joined in 1972. He is a member of the Association Francaise du Petrole.

PART II

ITEM 5. MARKET FOR REGISTRANT'S COMMON EQUITY AND RELATED STOCKHOLDER MATTERS

The Common Stock of Seabulk International, Inc. trades on the NASDAQ National Market under the symbol SBLK. Between January 2, 2001 and March 20, 2001, the stock traded on the NASDAQ National Market under the symbol HVDM. In 2000, the common stock traded on the OTC Bulletin Board under the symbol HVDM.

The Class A Warrants trade on the OTC Bulletin Board under the symbol SBLKW. In 2000 and through March 20, 2001, they traded under the symbol HVDMW. The warrants expire December 14, 2003 and entitle the holder, for each warrant held, to purchase one share of the Common Stock of the Company for \$38.49.

There is no established market for another series of warrants issued to noteholders (the Noteholder Warrants) to purchase 723,861 shares of common stock at an exercise price of \$0.01 per share.

The Company has not paid and does not expect to pay any dividends on its Common Stock.

The following tables set forth the high and low closing prices of the Company's Common Stock and Class A Warrants, as reported by the NASDAQ National Market and the OTC Bulletin Board.

- (1) The Company was reorganized under section 382 of the U.S. Bankruptcy Code (Chapter 11) on December 15, 1999.
- (2) Interest expense for the period from January 1, 1999 through December 15, 1999 excludes \$8.8 million of contractual interest that was not accrued during the Company's Chapter 11 proceeding.
- (3) Reorganization items are comprised of items directly related to the Predecessor Company's Chapter 11 proceeding.

26

ITEM 7. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

This discussion and analysis of the Company's financial condition and historical results of operations should be read in conjunction with the Company's consolidated financial statements and the related notes thereto included elsewhere in this Report.

In August 2002, the Company restated its consolidated financial statements as of and for the year ended December 31, 2001. The restatement was made in order to accrue an additional \$4.1 million operating expense in the fourth quarter of 2001 related to supplemental marine insurance calls.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

Our discussion and analysis of the Company's financial condition and results of operations are based upon the consolidated financial statements, which have been prepared in accordance with accounting principles generally accepted in the United States. The preparation of these financial statements requires the Company to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses, and related disclosure of contingent assets and liabilities. On an on-going basis, the Company evaluates its estimates, including those related to bad debts, useful lives of vessels and

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

equipment, deferred tax assets, and certain accrued liabilities. The Company bases its estimates on historical experience and on various other assumptions that are believed to be reasonable under the circumstances, the results of which form the basis for making judgments about the carrying values of assets and liabilities that are not readily apparent from other sources. Actual results may differ from these estimates under different assumptions or conditions. The Company believes the following critical accounting policies affect its more significant judgments and estimates used in the preparation of its consolidated financial statements.

Revenue Recognition.

Revenue is generally recorded when services are rendered, the Company has a signed charter agreement or other evidence of an arrangement, pricing is fixed or determinable and collection is reasonably assured. For the majority of the offshore energy and towing segments, revenues are recorded on a daily basis as services are rendered. For the marine transportation segment, revenues are earned under time charters or affreightment/voyage contracts. Revenue from time charters is earned and recognized on a daily basis. Certain time charters contain performance provisions, which provide for decreased fees based upon actual performance against established targets such as speed and fuel consumption. Revenue for affreightment/voyage contracts is recognized based upon the percentage of voyage completion. The percentage of voyage completion is based on the number of voyage days worked at the balance sheet date divided by the total number of days expected on the voyage.

Allowance for Doubtful Accounts.

The Company maintains allowances for doubtful accounts for estimated losses resulting from the inability of its customers to make required payments. The estimate of uncollectible amounts is based on the results of ongoing credit evaluations and the Company's historical experience. If the financial condition of our customers were to deteriorate, resulting in an impairment of their ability to make payments, additional allowances may be required.

Asset Impairment.

The Company records impairment losses on long-lived assets used in operations when indications of impairment are present and the estimated undiscounted cash flows to be generated by those assets are less than the assets carrying amounts. If the carrying value is not recoverable, the carrying value of the assets is reduced to estimated fair value. Undiscounted cash flows are estimated using expected average long-term day rates and utilization based largely on historical industry and Company experiences. If future market conditions do not meet expectations, the Company may be required to record impairment charges which could be material.

27

Useful Life Determination.

Management determines the useful lives of the vessels and equipment based upon regulatory requirements such as OPA 90, market conditions and operational considerations. The Company continues to evaluate the reasonableness of the useful lives of the vessels and equipment.

Drydocking Costs.

Substantially all of the Company's vessels must be periodically drydocked and pass certain inspections to maintain their operating classification, as

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

mandated by certain maritime regulations. Costs incurred to drydock the vessels are deferred and amortized on a straight line basis over the period to the next drydocking, generally 30 to 36 months. The alternative accounting policy for drydocking costs is to expense the expenditures as incurred. The Financial Accounting Standards Board and the American Institute of Certified Public Accountants have proposed that the deferral method of accounting for planned major maintenance activities such as drydocking expenditures should be eliminated. Under the proposal, the Company would expense drydocking expenditures as incurred. The unamortized drydocking costs were approximately \$27.2 million at December 31, 2002.

Valuation of Deferred Tax Assets.

The Company records a valuation allowance to reduce its deferred tax assets to the amount that is more likely than not to be realized. After application of the valuation allowance, the Company's net deferred tax assets and liabilities are zero at December 31, 2002 and 2001.

Stock-Based Compensation

As permitted by SFAS No. 123, Accounting for Stock-Based Compensation, the Company accounts for employee stock based compensation in accordance with Accounting Principles Board Opinion No. 25 ("APB 25"). Under APB 25, compensation expense is calculated at the time of option grant based upon the difference between the exercise prices of the option and the fair market value of the Company's common stock at the date of grant recognized over the vesting period. The Company had no stock-based compensation during 2002, 2001 and 2000.

REVENUE OVERVIEW

The Company derives its revenue from three main lines of business - Seabulk Offshore, Seabulk Tankers, and Seabulk Towing. Seabulk Offshore, the Company's domestic and international offshore energy support business, accounted for approximately 52.9% and 55.1% of Company revenue in 2002 and 2001, respectively. Marine transportation under the new name, Seabulk Tankers, consists of (1) the Company's Jones Act tanker business, in which it operates ten petroleum product and chemical carriers in the U.S. coastwise trade, and (2) its inland tug and barge operation and shipyard, Sun State Marine Services. Sun State's tug and barge assets were sold in March 2002, and the shipyard assets were sold in July 2002. Together, they accounted for approximately 37.5% and 35.2% of Company revenue in 2002 and 2001, respectively. Seabulk Towing, the Company's domestic harbor and offshore towing business, accounted for approximately 9.6% and 9.7% of the Company's 2002 and 2001 revenue, respectively.

SEABULK OFFSHORE

Revenue from the Company's offshore energy support operations is primarily a function of the size of the Company's fleet, vessel day rates or charter rates, and fleet utilization. Rates and utilization are primarily a function of offshore exploration, development, and production activities, which are in turn heavily dependent upon the price of crude oil and natural gas. Further, in certain areas where the Company conducts offshore energy support operations (particularly the U.S. Gulf of Mexico), contracts for the utilization of offshore energy support vessels commonly include termination provisions with three- to five-day notice requirements and no termination penalty. As a result, companies engaged in offshore energy support operations (including the Company) are particularly sensitive to changes in market demand.

As the Company's offshore energy support fleet gets older, the Company's strategy is to look for opportunities to upgrade its offshore fleet to higher value, newer vessels and to reduce the number of

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

older and smaller crewboats in its fleet. The Company sold 17 offshore energy support vessels during 2002 for an aggregate total of \$6.8 million and a gain of approximately \$55,000.

Periods for collection of receivables in certain foreign areas of operation in the offshore business tend to be longer than is usual for the United States. The Company regularly monitors all such receivables accounts and believes that it has accrued adequate reserves where necessary.

The following table represents revenue for Seabulk Offshore by major operating area as of December 31 (in thousands):

	YEAR ENDED DECEMBER 31,		
	2002	2001	2000
Domestic(1)	\$ 47,490	\$ 83,686	\$ 54,491
West Africa	84,576	69,305	48,268
Middle East	23,683	22,450	34,242
Southeast Asia	15,730	15,737	14,394
Total	\$171,479	\$191,178	\$151,395

(1) Domestic consists of vessels operating in the United States, the Gulf of Mexico, Mexico, the Caribbean, and South America.

The following tables set forth, by primary area of operation, average day rates achieved by the offshore energy fleet owned or operated by the Company and average utilization for the periods indicated. Average day rates are calculated by dividing total revenue by the number of days worked. Utilization percentages are based upon the number of working days over a 365/366-day year and the number of vessels in the fleet on the last day of the quarter.

- (4) Bareboat-out chartered vessels are not included in the day rate and utilization statistics. During Q3 2001, bareboat contracts for two crewboats in the Domestic operating region were terminated and the vessels were returned to the Company.

- (5) Effective utilization excludes laid-up vessels.

- (6) One vessel in the AHT/Tugs category worked in West Africa and Southeast Asia during Q2 2001 and earned sufficient revenue to be included in the statistics for both regions.

- (7) The Middle East - Other category includes a vessel that is in a 50/50 joint venture and not included in the day rate and utilization statistics.

- (8) During Q3 2001, one crewboat and one utility boat in Domestic region were transferred to "held-for-sale" status. Additionally, the Company transferred one crewboat from Domestic to West Africa. The reduction in the Domestic Crew/Utility vessel count was offset in part by the addition of two crewboats as bareboat-out contracts were terminated during Q3 2001.

- (9) During Q3 2001, the Company transferred one crewboat and one specialty vessel (Other) from the Middle East to Southeast Asia. Additionally, one crewboat was transferred to "held-for-sale" status.

- (10) During Q3 2001, one crewboat and one specialty vessel (Other) were transferred from West Africa to Southeast Asia. Also, one vessel in the AHT/Tugs category that worked in West Africa and Southeast Asia during Q2 2001 did not work in Southeast Asia during Q3. Additionally, the Company reactivated one crewboat from laid-up status during Q3 2001.

- (11) During Q4 2001, one supply vessel was transferred from Southeast Asia to Middle East. Also, one vessel in the AHT/Tugs category that worked in West Africa and Southeast Asia during Q2 2001 did not work in Southeast Asia during Q3. Additionally, the Company reactivated one crewboat from laid-up status during Q3 2001.

- (12) During Q4 2001, the Company transferred one crewboat to "held-for-sale" status. Additionally, three vessels were laid-up during Q4 2001.

-
- (1) Domestic consists of vessels operating in the United States, the U.S. Gulf of Mexico, Mexico, the Caribbean and South America.
 - (2) One vessel was sold in Q4 2000 from the Crew/Utility category. Since the vessel earned substantial revenue during the quarter, it was included in the statistics.
 - (3) One vessel in the Crew/Utility category changed reporting area from Domestic to West Africa after Q2 2000. The statistics reflected this move.
 - (4) Bareboat-out chartered vessels are not included in the day rate and utilization statistics.
 - (5) Effective utilization excludes laid-up vessels.
 - (6) The Middle East-AHT/Tugs and Other categories include a vessel that is a 44-foot harbor tug and in a 50/50 joint venture, respectively, which are not included in the day rate and utilization statistics.

32

Domestic revenue for 2002 was adversely affected by the slowdown in natural gas drilling activity in the U.S. Gulf of Mexico as a result of somewhat lower natural gas prices and high inventories. The lower level of natural gas prices resulted from above-average inventory buildups and reduced demand due to one of the mildest winters on record in 2001/2002 and a general slowdown in economic activity. Exploration and production companies in the U.S. Gulf of Mexico responded by cutting back their level of spending as evidenced by the significant drop in offshore rig fleet utilization rates during the last half of calendar year 2001 and in 2002. Although there is still uncertainty in the market, the rise in both crude oil and natural gas prices that began in the fourth quarter of 2002, driven by concern over a potential Middle East conflict, the temporary shutoff of Iraqi and Venezuelan imports, dwindling inventories of both crude oil and natural gas as the winter of 2002/2003 turned out to be much colder than expected, and other factors, should eventually aid a recovery in the Gulf of Mexico offshore vessel market.

As the demand for vessels in the domestic market is primarily driven by natural gas exploration and production, it is difficult to predict what effect the current high level of natural gas prices and the uncertainty in the economic environment will have on demand for the Company's vessels in the domestic market. In the meantime, the Company is exploring charter opportunities in Mexico which remains a healthy market. As noted earlier, however, we anticipate

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

an eventual upturn in offshore drilling activity and hence in the demand for our vessels.

The outbreak of war in Iraq in March 2003 is a further complicating factor, although it is not expected to have a material impact on the Company's operations. Depending on the length of the conflict, the cessation of hostilities is expected to produce a measure of moderation and stability in commodity prices and may eventually lead to the opening of the Iraqi market to U.S. companies.

International offshore revenues for 2002 benefited from increases in vessel count and utilization. In West Africa, the demand for vessels, and hence utilization, remained strong as this is an oil-driven market with longer time horizons and increasing exploration and production budgets primarily from oil company majors. The Company redeployed five vessels to its West African operations during 2002.

International vessel demand is primarily driven by crude oil production. During the fourth quarter crude oil prices and demand remained firm. The Company expects international exploration and production spending to continue to increase in West Africa, which should strengthen vessel demand in that area. Revenue and utilization were also up for the Company's Middle East operations. In Southeast Asia, revenue remained substantially the same as the year-earlier period.

Average day rates and utilization for the Company's anchor handling tug supply vessels and supply boats at March 1, 2003 for Domestic, West Africa, the Middle East and Southeast Asia were approximately \$5,500/33%, \$6,800/81%, \$3,200/100% and \$5,800/63%, respectively.

The Company had five offshore vessels in "held-for-sale" status as of December 31, 2002. The majority of these vessels were previously laid up. Subsequent to December 31, 2002, the Company sold three crewboats in the held-for-sale category.

SEABULK TANKERS

Revenue from the Company's marine transportation services is derived principally from the operations of 10 tankers carrying crude oil, petroleum products and chemical products in the Jones Act trade and, to a lesser extent, from the Sun State towboat and fuel barge operations in Green Cove Springs, Florida, which were sold in March 2002.

33

The Company's tanker fleet operates on either long-term time charters, bareboat charters, or pursuant to contracts of affreightment. The Company currently has six tankers operating under long-term charters, three on contracts of affreightment and one under a bareboat charter.

The following table sets forth the number of vessels and revenue for the Company's petroleum and chemical product carriers:

YEAR ENDED DECEMBER 31,		
2002	2001	2000 (1)
-----	-----	-----

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Number of vessels owned at end of period ...	10	10	10
Revenue (in thousands)	\$117,486	\$112,694	\$126,670

- (1) During 2000, the Company scrapped one tanker that was at the end of its OPA 90-mandated useful life and terminated a charter-in contract for another tanker.

Tanker revenue increased by 4.3% in 2002 as a result of improved rates for the Company's three chemical carriers operating under contracts of affreightment, as well as higher rates on the long-term time charters.

Petroleum Tankers. Demand for crude oil and petroleum product transportation services is dependent both on production and refining levels as well as on consumer and commercial consumption of petroleum products and chemicals. The Company owned eight petroleum product tankers at December 31, 2002. Five of these are double-hull, state-of-the-art vessels, of which two have chemical-carrying capability. At the end of December 2001, voyage charters for three vessels expired and were replaced by two multi-year time charters at time charter-equivalent rates 55% above the returns achieved for these vessels in 2001. For the third vessel, the Company entered into a ten-year bareboat charter agreement with a major oil company. Beginning in January 2002, the oil company charterer has exclusive possession and control of the vessel and is responsible for all operating and drydocking expenses of the vessel. The Company also entered into a time charter securing a fourth vessel, in the fourth quarter of 2001 at a 25% increase over the expiring rate. In the third quarter of 2002, a vessel previously trading under a voyage charter entered into a three-year time charter with a major oil company, and two of our existing time charters were extended through July 10, 2010. Under a time charter, fuel and port charges are borne by the charterer customer and are therefore not reflected in the charter rates. Consequently, both the revenue and cost side of time charter vessels are reduced by the amount of the fuel and port charges. Our Jones Act fleet is benefiting from a tightening domestic tanker market, which should see a further strengthening as OPA 90 forces out older, single-hull vessels. None of our single-hull vessels is scheduled for retirement under OPA 90 before 2007.

Chemical Tankers. Demand for industrial chemical transportation services generally coincides with overall economic activity. The Company operated two chemical tankers and one of the five double-hull vessels in the chemical trade as of December 31, 2002. The chemical tankers are double-bottom ships. The higher day rate environment for petroleum tankers is carrying over into the chemical tanker market as charterers look for quality tonnage to replace older single-hull vessels.

Inland Tugs and Barges. Revenue from the Company's Sun State Marine Services subsidiary was derived primarily from contracts of affreightment with Colonial Oil Industries (formerly known as Steuart Petroleum Co.) and Florida Power & Light (FPL) and from ship maintenance, repair, drydocking and construction activities. Revenue from all of Sun State's operations totaled \$3.9 and \$9.4 million, respectively, for the year ended December 31, 2002 and 2001. The decrease in Sun State revenue is due to the sale of its marine transportation tug and barge assets in March 2002. In July 2002, the Company also closed on the sale of drydock and related shipyard equipment of Sun State for \$450,000, resulting in a gain of approximately \$88,000.

SEABULK TOWING

Revenue derived from the Company's tug operations is primarily a function

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

of the number of tugs available to provide services, the rates charged for their services, the volume of vessel traffic requiring docking and other ship-assist services and competition. Vessel traffic, in turn, is largely a function of the general trade activity in the region served by the port.

The following table summarizes certain operating information for the Company's tugs.

	YEAR ENDED DECEMBER 31,		
	2002	2001	2000
Number of tugs at end of period	31	31	33
Towing revenue (in thousands)	\$31,147	\$33,493	\$33,106

Towing revenue decreased 7% to \$31.1 million in 2002 from \$33.5 million in 2001 primarily due to reduced vessel traffic in certain of the Company's ports reflecting the slowdown in international trade, increased competition, and reduced demand for towing services in the offshore market.

The Company has been the sole provider of docking services in Port Canaveral, the smallest of its harbor towing markets. As a result of the recent proceeding before the Federal Maritime Commission, the Company may soon have a competitor in Port Canaveral.

OVERVIEW OF OPERATING EXPENSES AND CAPITAL EXPENDITURES

The Company's operating expenses are primarily a function of fleet size and utilization. The most significant expense categories are crew payroll and benefits, depreciation and amortization, fuel, maintenance and repairs, and insurance. During periods of decreased demand for vessels, the Company temporarily ceases using certain vessels, i.e., lays up vessels, to reduce expenses for marine operating supplies, crew payroll and maintenance. At December 31, 2002, seven of the Company's offshore energy support vessels were laid up or held for sale.

The crews of Company-manned chemical and product tankers are paid on a time-for-time basis under which they receive paid leave in proportion to time served aboard a vessel. The crews of offshore energy support vessels and certain tugs and towboats are paid only for days worked.

The Company provides for depreciation on a straight-line basis over the estimated useful lives of the related assets. OPA 90 mandates the useful life of the Company's product and chemical carriers, except for the five double-hull carriers.

The Company overhauls main engines and key auxiliary equipment in accordance with a continuous planned maintenance program. Under applicable regulations, the Company's chemical and product carriers and offshore service vessels and its four largest tugs are required to be drydocked twice in each five-year period for inspection and routine maintenance and repairs. These vessels are also required to undergo special surveys every five years involving comprehensive inspection and corrective measures to insure their structural integrity and the proper functioning of their cargo and ballast tanks and piping systems, critical machinery and equipment, and coatings. The Company's harbor tugs generally are not required to be drydocked on a specific schedule. During the years ended December 31, 2002, 2001 and 2000, the Company drydocked 54, 66 and 62 vessels, respectively, at an aggregate cost (exclusive of lost

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

revenue) of \$23.4 million, \$29.4 million and \$14.4 million, respectively. The Company

35

accounts for its drydocking costs under the deferral method, under which capitalized drydocking costs are expensed over the period preceding the next scheduled drydocking. See Note 2 to the Company's consolidated financial statements.

The Company had capital expenditures, including drydocking costs, in the years ended December 31, 2002, 2001 and 2000 of \$27.2 million, \$38.7 million and \$26.4 million, respectively.

The cost of fuel is an item which has significant impact on the Company's operating results. Its cost was relatively stable in 2002, but has risen considerably during the first quarter of 2003. During 2002 fuel and consumables costs represented approximately 15.5% of operating costs.

Insurance costs consist primarily of premiums paid for (i) protection and indemnity insurance for the Company's marine liability risks, which are insured by a mutual insurance association of which the Company is a member and through the commercial insurance markets; (ii) hull and machinery insurance and other maritime-related insurance, which are provided through the commercial marine insurance markets; and (iii) general liability and other traditional insurance, which is provided through the commercial insurance markets. Insurance costs, particularly costs of marine insurance, are directly related to overall insurance market conditions and industry and individual loss records, which vary from year to year.

The increase in P&I costs due to higher deductibles and higher self insured retention levels will likely cause an increase in P&I insurance expense in 2003 of between \$1.5 million and \$2.5 million. Premiums by both marine and non-marine insurers have been adversely impacted by the erosion of claims reserves (including our underwriters), claims underwriting losses and increased reinsurance costs, as well as our own loss experience. No assurance can be given that affordable and viable direct and reinsurance markets will be available to us in the future. We maintain high levels of self-insurance for P&I and hull and machinery risks through the use of substantial deductibles and self insured retentions which may increase in the future. We carry coverage related to loss of earnings on revenues subject to fourteen day deductibles, for our tanker operations, but not for our offshore and tug operations. Insurance costs represented approximately 6.2% of operating costs in 2002.

36

RESULTS OF OPERATIONS

The following table sets forth certain selected financial data and percentages of net revenue for the periods indicated:

YEAR ENDED DECEMBER	
2002	2001
(DOLLARS IN MILLIO	

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

	=====	=====	=====	=====
Net loss	\$ (38.9)	\$ (12.0)%	\$ (12.0)	(3
	=====	=====	=====	=====

2002 COMPARED WITH 2001

Revenue. Revenue decreased 6.6% to \$324.0 million for 2002 from \$346.7 million for 2001 due to decreased revenue from the Company's offshore energy support segment.

Offshore energy support revenue decreased 10.3% to \$171.5 million for 2002 from \$191.2 million for the same period in 2001, primarily due to reduced revenue from the U.S. Gulf of Mexico. This was offset in part by higher revenue from the West Africa operating region. Revenue from the U.S. Gulf of Mexico decreased during 2002 compared to the same period in 2001 primarily due to reduced exploration and production activity in response to average natural gas prices, high inventories and reduced demand for energy. The increase in West Africa revenue was driven by higher day rates and an expanded vessel count as offshore exploration and production activity remained strong. The Company took advantage of the expanding West Africa market by (1) mobilizing three of its Gulf of Mexico supply boats and one Southeast Asia utility boat for redeployment to West Africa and (2) reactivating one anchor-handling tug from "held-for-sale" status to active status in West Africa during the first half of 2002.

Marine transportation revenue remained substantially the same at \$121.4 million for 2002 as compared to \$122.1 million for 2001. Tanker revenue increased by 4.3% as a result of improved rates for the Company's three chemical carriers operating under contracts of affreightments, as well as better rates on long-term time charters. This was offset by a decrease in revenue for Sun State as a result of discontinuing operations in March 2002.

37

Towing revenue decreased by 7.0% to \$31.1 million for 2002 from \$33.5 million for 2001. The decrease in revenue was due to reduced vessel traffic in certain of the Company's ports, reflecting the slowdown in international trade, as well as reduced demand for towing services in the offshore market.

Operating Expenses. Operating expenses decreased 8.4% to \$182.6 million from \$199.3 million for 2001 primarily due to the change from voyage charters to time charters for two tankers, the bareboat charter of a third tanker, and the sale of Sun State's marine transportation assets in the first quarter. Since two tankers were changed from voyage charters to time charters in 2002, fuel and port charges significantly decreased as these expenses are the responsibility of

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

the charterer under time charters. Under a bareboat contract, the charterer is responsible for crewing and operating the vessel. Operating expenses for 2001 were also adversely affected by a \$4.1 million charge reflecting current and anticipated investment losses sustained by the Company's protection and indemnity marine insurance club.

Overhead Expenses. Overhead expenses increased 4.5% to \$38.7 million in 2002 as compared to \$37.0 million for the same period in 2001. The increase was primarily due to an increase in insurance expenses as a result of purchasing a \$1.2 million D&O policy for the departing Board members due to the recapitalization in September 2002. Other overhead also increased due to higher bad debt reserve in our West African operations. As a percentage of revenue, overhead expenses increased to 11.9% for 2002 compared to 10.8% for the same period in 2001.

Depreciation, Amortization, Drydocking and Other Expenses. Depreciation, amortization, drydocking and other expenses increased 8.3% to \$66.4 million for 2002 from \$61.3 million for 2001, primarily due to higher planned drydocking expenditures for offshore energy support vessels and tankers during the second half of 2001 and in 2002. As a result, drydock amortization expense is also higher as drydock costs are amortized on a straight-line basis over the period to the next drydocking (generally 30 months).

Net Interest Expense. Net interest expense decreased 20.5% to \$44.2 million for 2002 from \$55.7 million for the same period in 2001. The decrease was primarily due to the combination of lower interest rates on variable rate debt and lower outstanding debt balances under our term loans and revolving credit facility. Interest expense also decreased as a result of the recapitalization in September 2002 (see Note 3 to the Company's consolidated financial statements). The interest rate on the New Credit Facility is substantially less than the rate on the Company's Senior Notes, which were redeemed on October 15, 2002. In November 2002, the interest rate under the New Credit Facility was increased by 100 basis points (1%) in accordance with the terms of the commitment letter with the lending banks to syndicate the New Credit Facility by November 13, 2002.

Other Income, Net. Other income, net increased to \$1.4 million in 2002 compared to other expense of (\$0.2) million in 2001. This increase in other income is primarily due to a gain on asset sales in 2002 of \$1.4 million.

2001 COMPARED WITH 2000

Revenue. Revenue increased 8.2% to \$346.7 million for 2001 from \$320.5 million for 2000 primarily due to increased revenue from the Company's offshore energy support segment offset in part by decreased revenue from the Company's marine transportation segment.

Offshore energy support revenue increased 26.3% to \$191.2 million for 2001 from \$151.4 million for 2000 primarily due to the significant increases in day rates for both supply and crew boats in the Gulf of Mexico and West Africa operating regions offset in part by decreased revenue from the Middle East

region. Additionally, the Company purchased two crewboats in December 2000 and May 2001 and placed those vessels into service in the Gulf of Mexico. During the first eight months of 2001, day rates and utilization for all vessels working in the Gulf of Mexico rose due to increased exploration and production activities. During the last four months of 2001, day rates and utilization for the Company's Gulf of Mexico-based vessels decreased as drilling activity fell sharply on the heels of lower natural gas prices and reduced energy demand. Nevertheless, the

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

strong first half of fiscal 2001 resulted in a significant increase in full-year revenue for the Gulf of Mexico operating region. In the West Africa operating region, average day rates rose across all vessel classes and utilization remained strong throughout 2001 as the market continued to expand in what is primarily an oil-driven, deepwater business. The Company mobilized two of its Gulf of Mexico-based supply boats for redeployment to West Africa during the first quarter of 2002. The decline in Middle East revenue in 2001 is attributable to fewer vessels (average of 72 vessels in 2000 compared to 30 vessels in 2001) as the Company sold a significant number of underperforming vessels that were working in the Middle East region in 2000 and 1999. The reduction in the number of vessels working in the Middle East is a direct result of the lack of profitability stemming from production cutbacks by the Organization of Petroleum Exporting Countries. During 2001, a total of 25 offshore energy support vessels were sold, most of which were based in the Middle East.

Marine transportation services revenue decreased \$13.9 million, or 10.2%, to \$122.1 million for 2001 from \$136.0 million for 2000. This decrease was primarily due to the mandated retirement of one of the Company's Jones Act tankers in the third quarter of 2000 and the termination of the Company's chartering-in of one tanker in the first quarter of 2000 through October 2000. Total 2000 revenue relating to the two additional tankers amounted to \$14.5 million. The decrease from the two tankers was offset in part by increased transportation activity with tankers working under various voyage contracts.

Towing revenue increased 1.2% to \$33.5 million in 2001 from \$33.1 in 2000 primarily due to increased port activity during the fourth quarter of 2001.

Operating Expenses. Operating expenses decreased 2.9% to \$199.3 million from \$205.2 million for 2000 primarily due to the lease termination and retirement of two tankers and the change of three tankers from spot trading to time charters in the Company's marine transportation services operations. This decrease was offset in part by higher crew salaries and benefits and consumables and supplies expenses in offshore energy support operations. Total 2000 operating expenses (primarily charter hire, fuel and port charges) relating to the two tankers noted above amounted to \$13.6 million. Since three tankers were changed from spot trading to time charters in 2001, fuel and port charges significantly decreased as these expenses are the responsibility of the charterer under time charters. Operating expenses for 2001 were also adversely affected by a \$4.1 million charge reflecting current and anticipated investment losses sustained by the Company's protection and indemnity marine insurance club. The increase in offshore crew salaries and benefits was primarily due to additional maritime staff resulting from (1) purchase of two crewboats in December 2000 and May 2001, (2) termination of a bareboat-out contract for two crewboats and (3) increased utilization of vessels in the Gulf of Mexico and West Africa. Under a bareboat contract, the charterer is responsible for crewing and operating the vessel. Additionally, expenses for consumables and supplies increased in the West Africa operating region due to increased operating activity.

In November 2001, the Company entered into a three-year e-procurement contract with an outside vendor. The contract consolidated the purchasing activity of the Company's three segments into one common platform and standard. Additionally, the contract included spare parts and consumable data base rationalization to reduce on-board and warehouse inventory and procurement costs, automated tendering to increase competitive quoting, sourcing enhancements to increase the number of qualified suppliers quoting, automated contract management to increase utilization of pre-negotiated contracts, and

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

automated supplier connectivity via the Internet to reduce transaction cost and time. Management expects that the contract will be a significant step toward our ongoing efforts to further reduce various operating costs such as supplies and consumables, and maintenance and repair. However, management cannot estimate the amount of the savings at this time.

Overhead Expenses. Overhead expenses decreased 6.6% to \$37.0 million in 2001 from \$39.6 million for 2000 primarily due to a decrease in professional fees and other overhead expenses offset in part by increases in salaries and benefits. Higher headcount and related salary expense for corporate activity resulted in savings on third-party consulting fees and services. The decrease in other overhead expenses is primarily due to lower charges for rent and other miscellaneous items as a result of the elimination of non-essential services and consolidation of administrative functions.

Depreciation, Amortization, Drydocking and Other Expenses. Depreciation, amortization, drydocking and other expenses increased 22.0% to \$61.3 million in 2001 from \$50.3 million in 2000 primarily due to higher planned drydocking expenditures for offshore energy support vessels and tankers and the write-down of the book value of vessels and equipment and deferred drydocking costs of Sun State Marine Services, Inc. Drydocking amortization expense increased 117.1% to \$14.7 million in 2001 from \$6.8 million in 2000. In response to increased activity in the offshore energy support segment in 2001, the Company increased the level of drydocking expenditures. Additionally, the Company had to drydock five tankers in 2001. Tanker drydocking expenditures are generally higher than expenditures for offshore vessels and tugs.

During the fourth quarter of fiscal 2001, management decided to sell the fixed assets (mostly tug barges) of Sun State Marine Services, Inc. The sale of the tug and barge assets was consummated in March 2002. The shipyard assets were sold in July 2002. Upon reclassifying Sun State's assets to assets held for sale, management considered recent appraisals, offers and bids and its estimate of future cash flows related to the fixed assets. As a result, the Company recorded a write-down of \$1.4 million.

Income from Operations. Income from operations increased 93.6% to \$49.1 million in 2001 compared to \$25.4 million in 2000 as a result of higher day rates in the Company's offshore energy support business and lower operating and overhead expenses.

Net Interest Expense. Net interest expense decreased 10.2% to \$55.7 million in 2001 from \$62.0 million in 2000 primarily due to lower interest rates on variable rate debt and lower outstanding balances under our term loans and revolving credit facility. The Eurodollar Rate for the term loans and revolving line of credit decreased from 6.7% at December 31, 2000 to 1.9% at December 31, 2001. The decline in the Eurodollar Rate resulted from the series of interest rate cuts by the Federal Reserve and the general slowdown of the global economy during 2001. This decrease was offset in part by interest expense on additional borrowings in 2001 for the remaining 24.25% interest in the five double-hull tankers and the purchase of two crewboats (financed through borrowings under the Company's revolving line of credit).

Other Income (expense). Other expense totaled \$(0.2) million in 2001 compared to other income of \$12.6 million in 2000. The decrease in other income was primarily due to a net loss of \$(0.1) million on vessel sales in 2001 compared to a net gain of \$3.9 million on vessel sales and a \$7.0 million favorable settlement of a disputed liability in 2000.

Net Loss. The Company's net loss decreased 58.7% to \$12.0 million in 2001 from \$29.0 million for 2000 as a result of higher revenue and lower operating and interest expenses. The provision for income taxes increased from \$4.8

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

million in 2000 to \$5.2 million in 2001 primarily due to higher foreign revenue. As of December 31, 2001 and 2000, management believes that it was more likely than not that

40

the deferred tax assets would not be realized. Therefore, a full valuation allowance is recorded reducing the net deferred tax assets to zero.

LIQUIDITY AND CAPITAL RESOURCES

At December 31, 2002, the Company had working capital of approximately \$26.3 million. Day rates and utilization for offshore vessels working in the Gulf of Mexico continued to be weak, a trend that began in September 2001. The slowdown in the domestic offshore market was offset in part by continued strength in the Company's international offshore operations, where day rates remained strong during the year and contributed to increased revenue in West Africa and the Middle East, and in part by the improved performance of the marine transportation segment. The increased revenue in the offshore business in West Africa and the Middle East was driven by exploration and production spending as major oil companies continued to proceed with oil exploration and development programs outside the U.S. Since the September 11, 2001 attacks, the subsequent war on terrorism and then commencement of the war in Iraq, the U.S. economy continues to be subject to pressure. As we enter 2003, the timing of a recovery in the domestic offshore segment is still not certain. However, the increases in oil and natural gas prices during the fourth quarter of 2002 and the early part of 2003 reinforce the potential for an upturn in domestic exploration and development activity in the latter half of 2003. We do expect earnings in 2003 from the offshore segment to improve compared to 2002. The Company also expects to benefit in 2003 from higher earnings in its marine transportation business as a result of a full year of higher time charter rates for certain tankers.

The Company's capital requirements arise primarily from its need to service debt, fund working capital and maintain and improve its vessels. The Company anticipates capital requirements for debt service, vessel maintenance and fleet improvements in 2003 to total approximately \$98 million and expects that cash flow from operations will continue to be a significant source of funds for its working capital and capital requirements.

The Company's credit agreement contains certain restrictive financial covenants that among other things requires minimum levels of EBITDA and tangible net worth. The Company is in compliance with such covenants at December 31, 2002 and expects to be in compliance through the balance of 2003 based on current financial projections. However, the Company's financial projections contain assumptions with respect to economic recovery beginning in the second quarter of 2003 in the underperforming U.S. Gulf offshore market. If the economic recovery does not occur or occurs later or to a lesser extent than the current forecast, the Company will need to reduce operating expenses to maintain compliance.

Management continues implementation of certain initiatives in an effort to improve profitability and liquidity. These initiatives include (1) selective acquisitions and charters of additional vessels, (2) repositioning certain vessels to take advantage of higher day rates, (3) selling unprofitable vessels, and (4) eliminating non-essential operating and overhead expenses. Management believes that its expense reduction initiatives will be sufficient to meet its financial covenants if the forecasted U.S. Gulf is other than expected.

Management recognizes that unforeseen events or business conditions,

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

including unexpected deterioration in its markets, could prevent the Company from having sufficient liquidity to fund its operation or meeting targeted financial covenants.

If unforeseen events or business conditions prevent the Company from having sufficient liquidity to fund its operations, the Company has alternative sources including additional asset sales, and deferral of capital expenditures, which should enable it to satisfy essential capital requirements. If the Company does not meet its financial covenants, the Company would be required to seek an amendment or waiver to avoid default. While the Company believes it could successfully implement alternative plans, if necessary, there can be no assurance that such alternatives would be available or that the Company would be successful in their implementation.

Recapitalization. On September 13, 2002, the Company completed the private placement of 12.5 million shares of newly issued Seabulk common stock at a cash price of \$8.00 per share (the "Private Placement") to a group of investors including an entity associated with DLJ Merchant Banking Partners III, L.P., an affiliate of CSFB Private Equity, and entities associated with Carlyle/Riverstone Global Energy and Power Fund I, L.P., an affiliate of The Carlyle Group of Washington, D.C. The stock issuance was previously approved by the Company's shareholders at a Special Meeting held on September 5, 2002.

The new investors also purchased, for \$8.00 per share, 5.1 million of the Company's common stock and common stock purchase warrants previously beneficially owned by accounts managed by Loomis, Sayles & Co., L.P., an SEC-registered investment advisor. Taken together, the two transactions give the new investors approximately 76% of the Company's outstanding common stock. Pursuant to the agreement with the investors, the Company's Board of Directors has been restructured to permit the new investors to hold a majority of seats on the Board.

On September 13, 2002, the Company completed an agreement with Fortis Capital Corp. and NIB Capital Bank N.V., as arrangers, for a \$180 million senior secured credit facility (the "New Credit Facility"), which replaced the Company's existing facility. The New Credit Facility consists of an \$80 million term loan and a \$100 million revolving credit facility and has a five-year maturity.

The revolving portion of the New Credit Facility is subject to semi-annual reductions commencing six months after closing. The principal reductions on the revolving loan are as follows: \$10 million each in 2003 and 2004, \$20 million in 2005, \$25 million in 2006, and \$33.7 million in 2007. The term loan portion is subject to semi-annual reductions commencing 36 months after closing. The principal reductions on the term loan are as follows: \$2.5 million in 2005, \$14.5 million in 2006, and \$63 million in 2007. Interest on the loans is payable monthly, with a variable interest rate. The rate is either a LIBOR or base rate plus a margin based upon certain financial ratios of the Company (5.42% and 5.92% for the revolving loan and term loan, respectively, at December 31, 2002). In November 2002, the interest rate under the New Credit Facility was increased by 100 basis points (1%) in accordance with the terms of the commitment letter with the lending banks to syndicate the New Credit Facility by November 13, 2002.

The New Credit Facility is secured by first ship mortgages on substantially all of the Company's vessels (excluding vessels financed with U.S. Maritime Administration Title XI financing) and is guaranteed by most of the subsidiaries of the Company. The New Credit Facility is also secured by second ship mortgages on two of the Company's tankers and three of the Company's tugs.

The New Credit Facility is subject to various financial covenants, including minimum adjusted tangible net worth requirements, minimum ratios of

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

adjusted EBITDA to adjusted interest expense, and a maximum ratio of adjusted funded debt to adjusted EBITDA. The Company is required to maintain a minimum fair market value of collateralized assets of at least 175% of outstanding borrowings under the New Credit Facility, based upon appraisals which may be requested not more than once during any 12-month period.

In November 2002, the Company and the lending banks entered into Amendment No. 1 to the Credit Agreement which permitted the Company to change the commercial and technical managers of its vessels to different Company subsidiaries and to transfer ownership of its vessels to different subsidiaries of the Company as part of the Company's reorganization into more distinctive business groups.

41

Proceeds from the Private Placement and New Credit Facility of approximately \$266.1 million, net of \$12.7 million of fees and expenses of the transaction, were used primarily to repay the Company's prior bank debt of approximately \$151.5 million and redeem its outstanding Senior Notes for approximately \$101.5 million.

On September 13, 2002, the Company deposited \$101.5 million to State Street Bank & Trust as Paying Agent for the redemption of the Senior Notes. As a result, the Company was released and discharged from all of its obligations under the Notes and they were effectively discharged at that date. The Senior Notes were administratively discharged on October 15, 2002.

Cash Flows. Net cash provided by operating activities totaled \$61.1 million for the year ended December 31, 2002 compared to \$66.8 million for the same period in 2001. The decrease in cash provided by operating activities was the result of an increase in net loss before extraordinary item of \$1.4 million from 2001 to 2002, as well as a reduction in accounts payable in 2002.

Net cash used in investing activities was \$14.5 million for the year ended December 31, 2002 compared to \$31.8 million for the same period in 2001. The reduction of cash used in investing activities was due primarily to a larger amount of proceeds from asset sales. In particular, in March 2002, the Company closed on the sale of the towboat/barge assets of Sun State for \$3.9 million in cash. In addition, there were higher planned drydock expenditures in 2001 as compared to 2002.

Net cash used in financing activities for the year ended December 31, 2002 was \$21.0 million compared to \$37.6 million for the same period in 2001. The decrease in cash used in financing activities is attributable to excess cash generated from the recapitalization and refinancing completed in September 2002.

Recent Expenditures and Future Cash Requirements. The Company's current and future capital needs relate primarily to debt service and maintenance and improvements of its fleet. Excluding the five double-hull product and chemical tankers, the Company's principal debt obligations for 2002 were \$114.9 million (including debt retired as part of recapitalization) and cash interest obligations were \$25.0 million. Excluding the five double-hull product and chemical tankers, the Company's principal debt obligations for 2003 are estimated to be approximately \$22.6 million and cash interest obligations will be approximately \$13.9 million.

During 2002, the Company paid \$4.4 million in principal and \$15.1 million in interest on the five double-hull tankers. For 2003, an estimated \$4.7 million of principal and \$14.8 million in interest payments are due on the Title XI ship financing bonds associated with the five double-hull product and chemical

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

tankers.

The Company is required to make deposits to a Title XI reserve fund based on a percentage of net income attributable to the operations of the five double-hull tankers, as defined by the Title XI bond agreement. Cash held in a Title XI reserve fund is invested by the trustee of the fund, and any income earned thereon is either paid to the Company or retained in the reserve fund. Withdrawals from the Title XI reserve fund may be made for limited purposes, subject to prior approval from MARAD. In the second quarter of 2003, the first deposits to the reserve fund are expected to be made. Additionally, according to the Title XI Financial Agreement, the Company is restricted from formally distributing excess cash from the operations of the five double-hull tankers until certain working capital ratios have been reached and maintained. Accordingly, at December 31, 2002, the Company had approximately \$19.5 million in cash and cash equivalents that are restricted for use for the operations of the five double-hull tankers and cannot be used to fund the Company's general working capital requirements, but has approximately \$4.3 million which is available for distribution and is expected to be available for general working capital purposes of the consolidating Company.

42

During 2002, the Company incurred \$27.2 million in capital improvements to its fleet, including drydock expenditures for 54 vessels. For 2003, these improvements are expected to aggregate \$46.1 million, including approximately \$16 million for the purchase of the Seabulk Africa in January 2003 (see Note 17).

The following summarizes the Company's contractual obligations at December 31, 2002, and the effect such obligations are expected to have on its liquidity and cash flow in future periods.

CONTRACTUAL OBLIGATIONS	PAYMENTS DUE BY PERIOD			
	TOTAL	LESS THAN 1 YEAR	1 - 3 YEARS	4 - 5 YEARS
Long-term debt	\$ 435.2 million	\$ 24.3 million	\$ 55.4 million	\$ 10.0 million
Capital lease obligations...	43.1 million	5.1 million	9.8 million	0.0 million
Operating leases	18.6 million	3.7 million	7.0 million	0.0 million
Total contractual cash obligations	\$ 496.9 million	\$ 33.1 million	\$ 72.2 million	\$ 10.0 million

Long-term debt consisted of the following at December 31, 2002:

FACILITY	2002 PAYMENTS	OUTSTANDING BALANCE AS OF DECEMBER 31, 2002
Fortis Tranche A revolver	\$0.1 million	\$98.7 million
Fortis Tranche B term loan	\$0.0 million	\$80.0 million
Title XI Financing Bonds	\$7.2 million	\$234.5 million
Other notes payable	\$10.8 million	\$22.0 million

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

In addition to the revolver balance of \$98.7 million, there are \$1.3 million in outstanding letters of credit as of December 31, 2002. The Company is required to make semi-annual principal repayments of the revolver commencing six months after closing with the final payment due in September 2007. The Company is also required to make semi-annual principal repayments on the term loan commencing 36 months after closing with the final payment due 54 months after closing.

The Company's capital requirements arise primarily from its need to service debt, fund working capital and maintain and improve its vessels. The Company's expected 2003 capital requirements for debt service, vessel maintenance and fleet improvements total approximately \$98 million. The Company expects that cash flow from operations will continue to be a significant source of funds for our working capital and capital requirements.

Management continues implementation of certain initiatives in an effort to improve profitability and liquidity. These initiatives include (1) selective acquisitions and charters of additional vessels, (2) repositioning certain vessels to take advantage of higher day rates, (3) selling unprofitable vessels, (4) eliminating non-essential operating and overhead expenses. As a result of the expanding market in West Africa and softening in the Gulf of Mexico, the Company mobilized two of its Gulf of Mexico supply boats for redeployment to West Africa during the first quarter of 2002. In August 2002, time charters for

43

two of the double-hull tankers were extended for five and six years and the rates were increased, commencing in July 2002 and July 2003, respectively.

In March 2002, the Company closed on the sale of the marine transportation assets of Sun State Marine for \$3.9 million in cash. In May 2002, the Company sold its Port Arthur facility for \$3 million, \$1.5 million in cash and \$1.5 million in credits and cash over the next three years.

Management recognizes that unforeseen events or business conditions, including deterioration in its markets, could prevent the Company from meeting targeted operating results.

If unforeseen events or business conditions prevent the Company from meeting targeted operating results, the Company has alternative means including additional asset sales, additional reductions in operating expenses and deferral of capital expenditures, which should enable it to satisfy essential capital requirements. While the Company believes it could successfully complete alternative plans, if necessary, there can be no assurance that such alternatives would be available or that the Company would be successful in their implementation.

EFFECTS OF INFLATION

The rate of inflation has not had a material impact on our operations. Moreover, if inflation remains at its recent levels, it is not expected to have a material impact on our operations for the foreseeable future.

PROSPECTIVE ACCOUNTING CHANGES

In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 14, and Technical Corrections, which eliminates the requirement that gains and losses from the extinguishment

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

of debt be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect, and eliminates an inconsistency between the accounting for sale-leaseback transactions and certain lease modifications that have economic effects that are similar to sale-leaseback transactions. Subsequent to the January 1, 2003 adoption date of the standard, the Company will be required to reclassify to continuing operations amounts previously reported as extinguishments of debt.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, which addresses the financial accounting and reporting for costs associated with exit or disposal activities. SFAS No. 146 is effective for fiscal years beginning after December 31, 2002. The adoption of the standard is not expected to have a significant impact on the Company.

In June 2001, the Accounting Executive Committee of the American Institute of Certified Public Accountants issued an exposure draft of a proposed Statement of Position ("SOP") entitled Accounting for Certain Costs and Activities Related to Property, Plant and Equipment. Under the proposed SOP, the Company would expense major maintenance costs as incurred and prohibit the use of the deferral of the entire cost of a planned major maintenance activity. Currently, the costs incurred to drydock the Company's vessels are deferred and amortized on a straight-line basis over the period to the next drydocking, generally 30 to 36 months. The proposed SOP would be effective for fiscal years beginning after June 15, 2002. Management has determined that this SOP, if issued as proposed, would have a material effect on the consolidated financial statements. In the year of adoption, the Company would write off the net book value of the deferred drydocking costs and record the write-off as a change in accounting principle (\$27.2 million as of December 31, 2002). Additionally, all drydock expenditures incurred after the adoption of the SOP would be expensed as incurred.

44

ITEM 7A. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The Company is exposed to market risk from changes in interest rates, which may adversely affect its results of operations and financial condition. The Company's policy is not to use financial instruments for trading or other speculative purposes, and the Company is not a party to any leveraged financial instruments. Except as set forth below, the Company manages market risk by restricting the use of derivative financial instruments to infrequent purchases of forward contracts for the purchase of fuel oil for its carrier fleet. These contracts have been terminated as of December 31, 2001. A discussion of the Company's credit risk and the fair value of financial instruments is included in Notes 2 and 13 of the Company's consolidated financial statements.

The Jones Act restricts the U.S. coastwise trade to vessels owned, operated and crewed substantially by U.S. citizens. The Jones Act continues to be in effect and supported by Congress and the Administration. However, it is possible that the Company's advantage as a U.S. citizen operator of Jones Act vessels could be somewhat eroded over time as there continue to be periodic efforts and attempts by foreign interests to circumvent certain aspects of the Jones Act.

Exposure To Short-Term Interest Rates. Short-term variable rate debt, primarily borrowings under the New Credit Facility, comprised approximately \$178.7 million of the Company's total debt at December 31, 2002. The Company's variable rate debt had an average interest rate of 5.67% at December 31, 2002. A hypothetical 2.0% increase in interest rates on \$178.7 million of debt would cause the Company's interest expense to increase on average approximately \$2.4 million per year over the term of the loans, with a corresponding decrease in income before taxes.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

ITEM 8. FINANCIAL STATEMENTS

The Company's consolidated financial statements are listed in Item 15(a), included at the end of this Report on Form 10-K beginning on page F-1, and incorporated herein by reference.

ITEM 9. CHANGES IN AND DISAGREEMENTS WITH ACCOUNTANTS ON ACCOUNTING AND FINANCIAL DISCLOSURE

None

45

PART III

ITEM 10. DIRECTORS AND EXECUTIVE OFFICERS OF THE REGISTRANT

The information required by Item 10 is incorporated herein by reference to our Proxy Statement for the 2003 Annual Meeting of Shareholders under the captions "Directors and Nominees" and "Compliance with Section 16(a) of the Securities Exchange Act of 1934," to be filed with the Commission not later than 120 days after the close of the fiscal year, except for information presented in Item 4A of this Report on Form 10-K.

ITEM 11. EXECUTIVE COMPENSATION

The information required by Item 11, including information concerning grants under the Company's employees' and directors' stock compensation plans, is incorporated by reference to our Proxy Statement for the 2003 Annual Meeting of Shareholders under the caption "Executive Compensation" to be filed with the Commission not later than 120 days after the close of the fiscal year.

ITEM 12. SECURITY OWNERSHIP OF CERTAIN BENEFICIAL OWNERS AND MANAGEMENT

The information required by Item 12, including information concerning ownership and options under the Company's employees' and directors' stock compensation plans, is incorporated by reference to our Proxy Statement for the 2003 Annual Meeting of Shareholders under the caption "Common Stock Ownership of Certain Beneficial Owners and Management" to be filed with the Commission not later than 120 days after the close of the fiscal year.

ITEM 13. CERTAIN RELATIONSHIPS AND RELATED TRANSACTIONS

The information required by Item 13 is incorporated by reference to our Proxy Statement for the 2003 Annual Meeting of Shareholders under the caption "Certain Transactions" to be filed with the Commission not later than 120 days after the close of the fiscal year.

ITEM 14. CONTROLS AND PROCEDURES

EVALUATION OF DISCLOSURE CONTROLS AND PROCEDURES.

Within the 90-day period prior to the filing of this annual report on Form 10-K, the Company performed an evaluation, under the supervision and participation of management, of the effectiveness of the design and operation of its disclosure controls and procedures pursuant to Exchange Act Rule 13a-14. Based upon that evaluation, the Chief Executive Officer and the Chief Financial Officer have concluded that these disclosure controls are effective in providing them with material information relating to the Company as required to be

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

disclosed in the Company's periodic filings with the Commission.

Appearing immediately following the signatures section of this annual report are certifications by our Chief Executive Officer and Chief Financial Officer, which are required by Section 302 of the Sarbanes-Oxley Act of 2002. The information set forth in this Item 14 should be read in conjunction with these Section 302 certifications. Additionally, our Chief Executive Officer and Chief Financial Officer have provided certain certifications to the Commission pursuant to Section 906 of Sarbanes-Oxley. These certifications are filed as exhibits to this annual report.

46

CHANGES IN INTERNAL CONTROLS.

There were no significant changes in the Company's internal controls or in other factors that could significantly affect these controls subsequent to the date of our most recent evaluation.

PART IV

ITEM 15. EXHIBITS, FINANCIAL STATEMENT SCHEDULES AND REPORTS ON FORM 8-K.

(A) FINANCIAL STATEMENTS AND SCHEDULES. See Index to consolidated financial statements and Schedules which appears on page F-1 herein.

(B) REPORTS ON FORM 8-K. The following reports on Form 8-K were filed during the quarter ended December 31, 2002:

1. The Company filed a Current Report on Form 8-K dated October 3, 2002. Item 5 was reported and no financial statements were filed.
2. The Company filed a current Report on Form 8-K dated October 31, 2002. Item 5 was reported and no financial statements were filed.

(C) LISTS OF EXHIBITS. The following is a list of exhibits furnished. Copies of exhibits will be furnished upon request of any stockholder at a charge of \$0.25 per page plus postage. The Company hereby files as part of this Form 10-K the exhibits required by Item 15(c) listed below. Exhibits which are incorporated herein by reference can be inspected and copied at the public reference facilities maintained by the Commission, 450 Fifth Street N.W., Room 1024, Washington, D.C. 29549 and at the Commission's regional office at CitiCorp Center, 500 West Madison Street, Suite 1400, Chicago, IL 60661-2511. Copies of such material can also be obtained from the Public Reference Section of the Commission, 450 Fifth Street N.W., Washington, D.C. 29549, at prescribed rates.

Consolidated Statements of Changes in Stockholders' Equity for the years ended December 31, 2002,

Notes to Consolidated Financial Statements.....

All schedules have been omitted because the information is not applicable or is not material or because the information required is included in the consolidated financial statements or the notes thereto.

F-1

REPORT OF INDEPENDENT CERTIFIED PUBLIC ACCOUNTANTS

Board of Directors and Stockholders
Seabulk International, Inc. and Subsidiaries

We have audited the accompanying consolidated balance sheets of Seabulk International, Inc. and Subsidiaries as of December 31, 2002 and 2001, and the related consolidated statements of operations, stockholders' equity, and cash flows for each of the three years in the period ended December 31, 2002. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audits.

We conducted our audits in accordance with auditing standards generally accepted in the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

In our opinion, the financial statements referred to above present fairly, in all material respects, the consolidated financial position of Seabulk International, Inc. and Subsidiaries at December 31, 2002 and 2001, and the consolidated results of their operations and their cash flows for each of the three years in the period ended December 31, 2002, in conformity with accounting principles generally accepted in the United States.

SEABULK INTERNATIONAL, INC. AND SUBSIDIARIES

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

1. ORGANIZATION AND BASIS OF PRESENTATION

Seabulk International, Inc. and subsidiaries (f/k/a Hvide Marine Incorporated) (collectively, the "Company") provides marine support and transportation services, serving primarily the energy and chemical industries. The Company operates offshore energy support vessels, principally in the U.S. Gulf of Mexico, the Arabian Gulf, offshore West Africa, and Southeast Asia. The Company's fleet of tankers transports petroleum products and specialty chemicals in the U.S. domestic trade. The Company also provides commercial tug services in several ports in the southeastern U.S.

The Company derives substantial revenue from international operations, primarily under U.S. dollar-denominated contracts with major international oil companies. Risks associated with operating in international markets include vessel seizure, foreign exchange restrictions, foreign taxation, political instability, nationalization, civil disturbances, and other risks that may limit or disrupt markets.

The accompanying consolidated financial statements include the accounts of Seabulk International, Inc. and its subsidiaries, both majority and wholly-owned. All intercompany transactions and balances have been eliminated in the consolidated financial statements.

F-9

2. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

Revenue. Revenue is generally recorded when services are rendered, the Company has a signed charter agreement or other evidence of an arrangement, pricing is fixed or determinable and collection is reasonably assured. For the majority of the offshore energy and towing segments, revenues are recorded on a daily basis as services are rendered. For the marine transportation segment, revenue is earned under time charters or affreightment/voyage contracts. Revenue from time charters is earned and recognized on a daily basis. Certain time charters contain performance provisions, which provide for decreased fees based upon actual performance against established targets such as speed and fuel consumption. Recorded revenue is based on actual performance. Affreightment/voyage contracts are contracts for cargoes that are committed on a 12 to 30 month basis, with minimum and maximum cargo tonnages specified over the period at fixed or escalating rates per ton. Revenue and voyage expenses for these affreightment contracts are recognized based upon the percentage of voyage completion. The percentage of voyage completion is based on the number of voyage days worked at the balance sheet date divided by the total number of days expected on the voyage.

Cash and Cash Equivalents. The Company considers all highly liquid investments with an original maturity of three months or less to be cash equivalents. Cash equivalents consist of money market instruments and overnight investments. The credit risk associated with cash and cash equivalents is considered low due to the high credit quality of the financial institutions.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Restricted Cash. At December 31, 2002 and 2001, restricted cash consisted of fixed deposits required in our foreign locations that allow our banks to issue short-term tender bonds. The bonds are issued during the process of securing contracts and have expiration dates ranging from three months to one year. Upon expiration of the bonds, the funds are returned to the Company.

Accounts Receivable. Substantially all of the Company's accounts receivable are due from entities that operate in the oilfield industry. The Company performs ongoing credit evaluations of its trade customers and generally does not require collateral. Expected credit losses are provided for in the consolidated financial statements and have been within management's expectations. Two customers each accounted for 7.0% and one customer accounted for 11.0% of the Company's total revenue for the years ended December 31, 2002 and 2001, respectively. During the years ended December 31, 2002, 2001, and 2000, the Company wrote off accounts receivable of approximately \$0.6 million, \$0.7 million and \$0.6 million, respectively.

F-10

Insurance Claims Receivable. Insurance claims receivable represents costs incurred in connection with insurable incidents for which the Company expects are probable of being reimbursed by the insurance carrier(s), subject to applicable deductibles. Deductible amounts related to covered incidents are generally expensed in the period of occurrence of the incident. Expenses incurred for insurable incidents in excess of deductibles are recorded as receivables pending the completion of all repair work and administrative claims process. The credit risk associated with insurance claims receivable is considered low due to the high credit quality and funded status of the insurance clubs in which the Company participates. Insurance claims receivable approximated \$4.1 million and \$12.0 million at December 31, 2002 and 2001, respectively, and is included in Other Receivables.

Marine Operating Supplies. Such amounts consist of fuel and supplies that are recorded at cost and charged to operating expenses as consumed.

Impairment of Long-Lived Assets. The Company accounts for the impairment of long-lived assets under the provisions of Statement of Financial Accounting Standards ("SFAS") No. 144, Accounting For the Impairment or Disposal of Long-Lived Asset, which requires impairment losses to be recorded on long-lived assets used in operations when indications of impairment are present and the estimated undiscounted cash flows to be generated by those assets are less than the assets' carrying value. It also establishes one accounting model to be used for long-lived assets to be disposed of by sale and broadens the presentation of discontinued operations to include more disposal transactions. If the carrying value of the assets will not be recoverable, as determined by the estimated undiscounted cash flows, the carrying value of the assets is reduced to fair value. Generally, fair value will be determined using valuation techniques such as expected discounted cash flows or appraisals, as appropriate.

Assets Held for Sale. It is Company policy to make available for sale vessels and equipment considered by management as excess and no longer necessary for the operations of the Company. In accordance with SFAS No. 144, these assets are valued at the lower of carrying value or fair value less costs to sell. Also, depreciation expense for these assets is terminated at the time of the reclassification. Total assets held for sale (primarily assets in the offshore energy segment) were approximately \$2.2 million and \$11.4 million at December 31, 2002 and 2001, respectively, and are included in other assets in the accompanying consolidated balance sheets.

Vessels and Equipment. Vessels and equipment are stated at cost less

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

accumulated depreciation. Depreciation is computed using the straight-line method over the estimated useful lives of the assets. At the time property is disposed of, the assets and related accumulated depreciation are removed from the accounts, and any resulting gain or loss is charged to other income. Major renewals and betterments that extend the life of the vessels and equipment are capitalized. Maintenance and repairs are expensed as incurred except for drydocking expenditures.

Vessels under capital leases are amortized over the lesser of the lease term or their estimated useful lives and included in depreciation expense. Included in vessels and equipment at December 31, 2002 and 2001 are vessels under capital leases of approximately \$36.0 million and \$45.4 million, net of accumulated amortization of approximately \$3.7 million and \$3.3 million, respectively.

F-11

Listed below are the estimated remaining useful lives of vessels and equipment at December 31, 2002:

	REMAINING USEFUL LIVES (IN YEARS)
Supply boats	3-24
Crewboats	2-23
Anchor handling tug/supply vessels	1-13
Other	1-8
Tankers(1)	3-26
Tugboats	1-37
Furniture and equipment	1-8

 (1) Range in years is determined by the Oil Pollution Act of 1990 and other factors

Deferred Costs. Deferred costs primarily represent drydocking and financing costs. Substantially all of the Company's vessels must be periodically drydocked and pass certain inspections to maintain their operating classification, as mandated by certain maritime regulations. Costs incurred to drydock the vessels are deferred and amortized over the period to the next drydocking, generally 30 to 36 months. Drydocking costs are comprised of painting the vessel hull and sides, recoating cargo and fuel tanks, and performing other engine and equipment maintenance activities to bring the vessels into compliance with classification standards. Deferred financing costs are amortized over the term of the related borrowings using the effective interest method. At December 31, 2002 and 2001, deferred costs included unamortized drydocking costs of approximately \$27.2 million and \$29.4 million, respectively, and net deferred financing costs of \$11.0 million and \$19.6 million, respectively.

Accrued Liabilities. Accrued liabilities included in current liabilities consist of the following at December 31, (in thousands):

2002	2001
-----	-----

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Voyage operating expenses	\$10,320	\$ 9,892

Total	\$42,181	\$38,719
	=====	=====

F-12

Stock-Based Compensation. As permitted by SFAS No. 123, Accounting for Stock-Based Compensation ("SFAS 123"), the Company has elected to follow Accounting Principles Board Opinion No. 25, Accounting for Stock Issued to Employees ("APB 25") and related interpretations in accounting for its employee stock-based transactions and has complied with the disclosure requirements of SFAS 123. Under APB 25, compensation expense is calculated at the time of option grant based upon the difference between the exercise prices of the option and the fair market value of the Company's common stock at the date of grant recognized over the vesting period.

On December 31, 2002, the FASB issued SFAS No. 148, Accounting for Stock-Based Compensation -- Transition and Disclosure. SFAS No. 148 amends SFAS 123 to provide alternative methods of transition to the fair value method of accounting for stock-based employee compensation. In addition, this statement amends the disclosure provisions of SFAS 123 to require expanded disclosure of the effects of an entity's accounting policy with respect to stock-based employee compensation on reported net income and earnings per share in annual and interim financial statements.

Had compensation expense for the stock option grants been determined based on the fair value at the grant date for awards consistent with the methods of SFAS No. 123, the Company's net loss would have increased to the pro forma amounts presented below for 2002, 2001 and 2000:

	2002	2001	2000
	-----	-----	-----
Net loss per common share--assuming dilution:			
As reported	\$ (2.72)	\$ (1.16)	\$ (2.89)
Pro forma	\$ (2.80)	(1.27)	(3.16)

Income Taxes. The Company files a consolidated tax return with substantially all corporate subsidiaries; the other subsidiaries file separate income tax returns. Each partnership files a separate tax return. Deferred income tax assets and liabilities are determined based on differences between financial reporting and tax bases of assets and liabilities, and are measured using the enacted tax rates and laws in effect when the differences are expected to reverse. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date.

Net Loss Per Share. Net loss per common share is computed in accordance

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

with SFAS No. 128, Earnings Per Share, which requires the reporting of both net loss per common share and diluted net loss per common share. The calculation of net loss per common share is based on the weighted average number of common shares outstanding and therefore excludes any dilutive effect of stock options and warrants while diluted net loss per common share includes the dilutive effect of stock options and warrants, unless the effects are antidilutive.

Foreign Currency Translation. In accordance with SFAS No. 52, Foreign Currency Translation, assets and liabilities denominated in foreign currencies are translated into U.S. dollars at the rate of exchange at the balance sheet date, while revenue and expenses are translated at the weighted average rates prevailing during the respective years. Components of stockholders' equity are translated at historical rates. Translation adjustments are deferred in accumulated other comprehensive loss, which is a separate component of stockholders' equity. The Company's foreign subsidiaries use the U.S. dollar as their functional currency and substantially all external transactions are denominated in U.S. dollars. Gains and losses resulting from changes in exchange rates from year to year are insignificant for all years presented and are included in the accompanying consolidated statements of operations.

Reorganization Items. Upon emergence from Chapter 11 Bankruptcy Protection on December 15, 1999, the Company adopted Fresh Start Reporting pursuant to the provisions of SOP 90-7.

Estimates. The preparation of financial statements in conformity with generally accepted accounting principles in the United States requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of assets and liabilities at the date of the financial statements, and the reported amounts of revenue and expenses during the periods. Significant estimates have been made by management, including the allowance for doubtful accounts, useful lives and valuation of vessels and equipment, realizability of deferred tax assets and certain accrued liabilities. Actual results will differ from those estimates.

Comprehensive Loss. SFAS No. 130, Reporting Comprehensive Income, establishes standards for reporting and the display of comprehensive loss, which is defined as the change in equity arising from non-owner sources. Comprehensive loss consists of net loss and foreign currency translation adjustments. Comprehensive loss is reflected in the consolidated statement of changes in stockholders' equity.

Recent Pronouncements. In April 2002, the FASB issued SFAS No. 145, Rescission of FASB Statements No. 4, 44 and 64, Amendment of FASB Statement No. 14, and Technical Corrections, which

F-13

eliminates the requirement that gains and losses from the extinguishment of debt be aggregated and, if material, classified as an extraordinary item, net of the related income tax effect, and eliminates an inconsistency between the accounting for sale-leaseback transactions and certain lease modifications that have economic effects that are similar to sale-leaseback transactions. Subsequent to the January 1, 2003 adoption date of the standard, the Company will be required to reclassify to continuing operations amounts previously reported as extinguishments of debt.

In June 2002, the FASB issued SFAS No. 146, Accounting for Costs Associated with Exit or Disposal Activities, which addresses the financial accounting and reporting for costs associated with exit or disposal activities. SFAS No. 146 is

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

effective for fiscal years beginning after December 31, 2002. The adoption of the standard is not expected to have a significant impact on the Company.

In June 2001, the Accounting Executive Committee of the American Institute of Certified Public Accountants issued an exposure draft of a proposed Statement of Position ("SOP") entitled Accounting for Certain Costs and Activities Related to Property, Plant and Equipment. Under the proposed SOP, the Company would expense major maintenance costs as incurred and prohibit the use of the deferral of the entire cost of a planned major maintenance activity. Currently, the costs incurred to drydock the Company's vessels are deferred and amortized on a straight-line basis over the period to the next drydocking, generally 30 to 36 months. The proposed SOP would be effective for fiscal years beginning after June 15, 2002. Management has determined that this SOP, if issued as proposed, would have a material effect on the consolidated financial statements. In the year of adoption, the Company would write-off the net book value of the deferred drydocking costs and record the write off as a change in accounting principle (\$27.2 million as of December 31, 2002). Additionally, all drydock expenditures incurred after the adoption of the SOP would be expensed as incurred.

3. LONG-TERM DEBT

Long-term debt consists of the following at December 31 (in thousands):

	2002	2001
	-----	-----
New Credit Facility	\$ 178,675	\$ --
Revolving line of credit	--	9,000
Term loan	--	154,996
Title XI debt	234,450	241,616
Notes payable	22,048	32,729
	-----	-----
	435,173	438,341
Less: current maturities	(24,315)	(38,367)
	-----	-----
	\$ 410,858	\$ 399,974
	=====	=====

On September 13, 2002, the Company completed an agreement with Fortis Capital Corp. and NIB Capital Bank N.V., as arrangers, for a \$180 million senior secured credit facility (the "New Credit Facility"), which replaced the Company's existing facility. The New Credit Facility consists of an \$80 million term loan and a \$100 million revolving credit facility and has a five-year maturity. The New Credit Facility replaced the Company's prior bank debt and Senior Notes.

The revolving portion of the New Credit Facility is subject to semi-annual reductions commencing six months after closing. The principal reductions on the revolving loan are as follows: \$10 million each in 2003 and 2004, \$20 million in 2005, \$25 million in 2006, and \$33.7 million in 2007. The term loan portion is subject to semi-annual reductions commencing 36 months after closing. The principal reductions on the term loan are as follows: \$2.5 million in 2005, \$14.5 million in 2006, and \$63 million in 2007. Interest on the loans is payable monthly, with a variable interest rate. The rate is either a LIBOR or base rate plus a margin based upon certain financial ratios of the

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

Company (5.42% and 5.92% for the revolving loan and term loan, respectively, at December 31, 2002). In November 2002, the interest rate under the New Credit Facility was increased by 100 basis points (1%) in accordance with the terms of the commitment letter with the lending banks to syndicate the New Credit Facility by November 13, 2002.

The New Credit Facility is secured by first ship mortgages on substantially all of the Company's vessels (excluding vessels financed with U.S. Maritime Administration Title XI financing) and is guaranteed by most of the subsidiaries of the Company. The New Credit Facility is also secured by second ship mortgages on two of the Company's tankers and three of the Company's tugs.

The New Credit Facility is subject to various financial covenants, including minimum adjusted tangible net worth requirements, minimum ratios of adjusted EBITDA to adjusted interest expense, and a maximum ratio of adjusted funded debt to adjusted EBITDA. The Company is required to maintain a minimum fair market value of collateralized assets of at least 175% of outstanding borrowings under the New Credit Facility, based upon appraisals which may be requested not more than once during any 12-month period.

The Company's five double-hull product and chemical tankers are financed through Title XI Government Guaranteed Ship Financing Bonds. There are a total of seven bonds with interest rates ranging from 6.50% to 7.54% that require principal amortization through June 2024. The aggregate outstanding principal balance of the bonds was \$215.7 million and \$220.1 million at December 31, 2002 and 2001, respectively. Principal payments during 2002 and 2001 were \$4.4 million and \$4.1 million, respectively, and interest payments were \$15.1 million and \$15.4 million, respectively.

Covenants under the Title XI Bond agreements contain financial tests which, if not met, among other things (1) restrict the withdrawal of capital; (2) restrict certain payments, including dividends, increases in employee compensation and payments of other indebtedness; (3) limit the incurrence of additional indebtedness; and (4) prohibit the Company from making certain investments or acquiring additional fixed assets. Vessels with a net book value of \$235.1 million, and all contract rights thereof, have been secured as collateral in consideration of the United States Government guarantee of the Title XI Bonds.

The Company is required to make deposits to a Title XI reserve fund based on a percentage of net income attributable to the operations of the five double-hull tankers, as defined by the Title XI Bond agreement. Cash held in a Title XI reserve fund is invested by the trustee of the fund, and any income earned thereon is either paid to the Company or retained in the reserve fund. Withdrawals from the Title XI reserve fund may be made for limited purposes, subject to prior approval from MARAD. In the second quarter of 2003, the first deposits to the reserve fund are expected to be made. Additionally, according to the Title XI Financial Agreement, the Company is restricted from formally distributing excess cash from the operations of the five double-hull tankers until certain working capital ratios have been reached and maintained. Accordingly, at December 31, 2002, the Company has approximately \$19.5 million in cash and cash equivalents that are restricted for use for the operations of the five double-hull tankers and cannot be used to fund the Company's general working capital requirements, but has approximately \$4.3 million which is available for distribution and is expected to be available for general working capital purposes of the consolidating Company during the second quarter of 2003.

As of December 31, 2002 and 2001, other Title XI debt of approximately \$18.8 million and \$21.5 million, respectively, was collateralized by first preferred mortgages on certain vessels and bears interest at rates ranging from 5.4% to 10.1%. The debt is due in semi-annual principal and interest payments through June 2021. Under the terms of the Other Title XI debt, the Company is

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

required to maintain a minimum level of working capital, as defined, and comply with certain other financial covenants. During

F-15

2002 and 2001, \$2.8 million and \$4.2 million, respectively, in principal and \$1.7 million and \$2.0 million, respectively, in interest were repaid on this debt.

The Company has two promissory notes aggregating approximately \$19.6 million relating to the purchase of equity interests in the double-hull product and chemical carriers. The notes bear interest at 8.5%. Semi-annual interest and principal payments are due through December 2003 on one note and quarterly principal and interest payments are due through January 2006 on the other. The promissory notes are collateralized by securities of certain subsidiaries. The outstanding balance of the notes was \$10.2 million and \$14.8 million as of December 31, 2002 and 2001, respectively.

The Company has various promissory notes relating to the acquisitions of various vessels. The promissory notes are collateralized by mortgages on certain vessels and bear interest at rates ranging from 8.1% to 8.5%. The debt is due in monthly installments of principal and interest through November 2011. The outstanding balance of the notes was \$11.9 million and \$13.1 million as of December 31, 2002 and 2001, respectively.

At December 31, 2002, the Company had letters of credit outstanding in the amount of approximately \$1.3 million, which expire on various dates through December 2025.

The aggregate annual future payments due on the long-term debt as of December 31, 2002 are as follows (in thousands):

Years ending December 31:

2003	\$ 24,315
2004	21,431
2005	33,967
2006	49,463
2007	105,425
Thereafter	200,572

	\$435,173

2004	4,908
2005	4,891
2006	3,933
2007	3,933
Thereafter	20,292

Total minimum lease payments	43,060
Less: amount representing interest	(11,307)

Present value of minimum lease payments (including current portion of \$3,005)	\$ 31,753
	=====

5. COMMITMENTS AND CONTINGENCIES

LEASE COMMITMENTS

The Company leases its office facilities and certain vessels under operating lease agreements, which expire at various dates through 2013. Rent expense was approximately \$4.5 million, \$4.9 million and \$4.4 million for the years ended December 31, 2002, 2001 and 2000, respectively. Aggregate annual future payments due under non-cancelable operating leases with remaining terms in excess of one year as of December 31, 2002 are as follows (in thousands):

Years ending December 31:

2003	\$ 3,714
2004	3,577
2005	3,451
2006	2,918
2007	1,565
Thereafter	3,368

	\$18,593
	=====

BAREBOAT CHARTER AND SUBLEASE

During 2001, the Company entered into a ten-year non-cancelable bareboat charter agreement for a double-hull tanker with a third party (the "charterer"). Beginning in January 2002 (commencement of contract), the charterer has exclusive possession and control of the vessel. As a result, the charter party will incur and pay all operating costs during the charter period. The Company receives a fixed amount per day for the charter of the vessel. Also, the Company

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

subleases certain office space in Houston, Texas and Tampa, Florida. The sublease in Houston is expected to terminate in January 2004 and the Tampa sublease is expected to terminate in December 2006. There are no renewal or escalation clauses relating to the bareboat charter or subleases.

F-17

Future minimum lease receipts under the bareboat charter and sublease as of December 31, 2002 (in thousands) are as follows:

Years ending December 31:

2003	\$ 7,132
2004	7,041
2005	7,033
2006	7,033
2007	6,935
Thereafter	28,291

	\$63,465
	=====

CONTINGENCIES

Under United States law, "United States persons" are prohibited from business activities and contracts in certain countries, including Sudan and Iran. The Company has filed three reports with and submitted documents to the Office of Foreign Asset Control ("OFAC") of the U.S. Department of Treasury. One of the reports was also filed with the Bureau of Export Administration of the U.S. Department of Commerce. The reports and documents related to certain limited charters with third parties involving three of the Company's vessels which called in the Sudan for several months in 1999 and January 2000, and charters with third parties involving several of the Company's vessels which called in Iran in 1998. In March 2003, the Company received notification from OFAC that the case has been referred to its Civil Penalties Division. Should OFAC determine that these activities constituted violations of the laws or regulations, civil penalties, including fines, could be assessed against the Company and/or certain individuals who knowingly participated in such activities. The Company cannot predict the extent of such penalties; however, management does not believe the outcome of these matters will have a material impact on its financial position or results of operations.

The Company was sued by Maritime Transportation Development Corporation in January 2002 in Florida state court in Broward County alleging broker commissions due since 1998 from charters on two of its vessels, the Seabulk Magnachem and Seabulk Challenger, under an alleged broker commission agreement. The claim allegedly continues to accrue. The amount alleged to be due is over \$500,000, but is subject to offset claims and defenses by the Company. The Company is vigorously defending such charges and believes that it has good defenses, but the Company cannot predict the ultimate outcome.

From time to time the Company is also party to personal injury and property damage claims litigation arising in the ordinary course of our business. Protection and Indemnity marine liability insurance covers large claims in excess of the deductibles and self insured retentions.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

At December 31, 2002, approximately 20% of the Company's employees were members of national maritime labor unions, or are subject to collective bargaining agreements. Management considers relations with employees to be satisfactory; however, the deterioration of these relations could have an adverse effect on the Company's operating results.

F-18

6. VESSELS AND EQUIPMENT

Vessels and equipment are summarized below (in thousands):

	YEAR ENDED DECEMBER 31,	
	2002	2001
Vessels and improvements	\$ 678,617	\$ 681,599
Furniture and equipment	9,842	11,729
	-----	-----
	688,459	693,328
Less: accumulated depreciation and amortization	(143,290)	(103,957)
	-----	-----
Vessels and equipment, net	\$ 545,169	\$ 589,371
	=====	=====

The Company did not acquire any vessels in 2002. In 2001, the Company acquired one vessel for approximately \$2.5 million in cash.

The Company sold 17 offshore energy support vessels during 2002 for an aggregate total of \$6.8 million and a gain of approximately \$55,000. In 2001, the Company sold 25 vessels for proceeds of \$6.6 million.

7. STOCK OPTION PLANS

In December 1999, the Company adopted the Hvide Marine Incorporated Stock Option Plan (the "1999 Plan"), a stock option plan which provided certain key employees of the Company the right to acquire shares of common stock. Pursuant to the plan, 500,000 shares of the Company's common stock were reserved for issuance to the participants in the form of nonqualified stock options. The options expire no later than 10 years from the date of the grant.

On June 15, 2000, the Company adopted the Amended and Restated Equity Ownership Plan (the "Plan"). The Plan amends and restates in its entirety the 1999 Plan. Pursuant to the Plan, 800,000 shares of the Company's stock were reserved for issuance to participants in the form of nonqualified or incentive stock options, restricted stock grants and other stock related instruments, subject to adjustment to reflect stock dividends, recapitalizations, reorganizations and other changes in the capital structure. In December 2001, the Compensation Committee agreed to amend the Plan by authorizing and reserving for issuance an additional 500,000 shares to be eligible for grants under the Plan, bringing the total under the Plan to 1,300,000 shares. The Committee's action was approved by the shareholders at the Company's Annual Meeting of Shareholders held on May 14, 2002. The vesting period and certain other terms of

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

stock options granted under the Plan are determined by the Compensation Committee. The Plan requires that the option price may not be less than 100% of the fair market value on the date of grant. The options expire no later than 10 years from the date of grant. There were no options granted under the Plan in 2002, and 283,000 options were granted in 2001. In addition, there were 75,000 shares of restricted stock granted in 2001 under the Plan.

F-19

On June 15, 2000, the Company also adopted the Stock Option Plan for Directors (the "Directors Plan"). Pursuant to the Directors Plan, an aggregate of 175,000 shares of common stock are authorized and reserved for issuance, subject to adjustments to reflect stock dividends, recapitalizations, reorganizations, and other changes in the capital structure of the Company. Eligible directors as of the effective date of the Plan were granted options to purchase 10,000 shares of common stock on the first option date, and the Chairman of the Board received 20,000 options, for a total granted of 80,000. Eligible directors receive 4,000 and the Chairman receives 8,000 options to purchase shares of common stock annually, effective as of each Annual Meeting of Shareholders of the Company commencing May 17, 2001. Under the Plan, the option price for each option granted is required to be 100% of the fair market value of common stock on the day after the date of grant. Options granted under the Director's Plan totaled 32,000 and 32,000 during 2002 and 2001, respectively.

The following table of data is presented in connection with the stock option plans:

	YEAR ENDED DECEMBER			
	2002		2001	
	NUMBER OF OPTIONS	WEIGHTED AVERAGE EXERCISE PRICE	NUMBER OF OPTIONS	WEIGHTED AVERAGE EXERCISE PRICE
Options outstanding at beginning of period	822,000	\$ 6.91	604,000	\$ 8.
Granted	32,000	6.19	315,000	5.
Exercised	(6,667)	6.31	--	
Cancelled	(72,831)	7.48	(97,000)	10.
	774,502	\$ 6.84	822,000	\$ 6.
Options outstanding at end of period	=====	=====	=====	=====
Options exercisable at end of period	562,856	\$ 7.30	333,837	\$ 8.
Options available for future grants at end of period	618,831	--	153,000	

F-20

Summarized information about stock options outstanding as of December 31, 2002 is as follows:

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

EXERCISE PRICE RANGE	NUMBER OF OPTIONS OUTSTANDING	REMAINING LIFE (IN YEARS)	WEIGHTED AVERAGE EXERCISE PRICE	NUMBER OF OPTIONS EXERCISABLE
Under \$6.25	181,834	9.00	\$ 4.34	50,844
\$6.25 to \$6.31	366,334	7.49	\$ 6.26	346,338
\$6.32 to \$7.30	32,000	8.38	\$ 7.30	32,000
\$7.31 to \$7.75	94,334	8.24	\$ 7.75	33,674
Over \$7.75	100,000	3.96	\$ 12.47	100,000

The weighted average fair value of options granted under the Company's stock option plans during 2002, 2001 and 2000 was \$4.91, \$5.54 and \$6.65, respectively. These values are based on the Black-Scholes option valuation model. Had compensation expense for the stock option grants been determined based on the fair value at the grant date for awards consistent with the methods of SFAS No. 123, the Company's net loss would have increased to the pro forma amounts presented below for 2002, 2001 and 2000 (in thousands, except per share amounts):

	2002	2001	2000
Net loss:			
As reported	\$ (38,870)	\$ (11,961)	\$ (28,952)
Pro forma	(39,930)	(13,067)	(31,676)
Net loss per common share--assuming dilution:			
As reported	\$ (2.72)	\$ (1.16)	\$ (2.89)
Pro forma	\$ (2.80)	(1.27)	(3.16)

The fair value of each option is estimated on the date of the grant using the Black-Scholes option-pricing model with the following assumptions applied to grants in 2002, 2001 and 2000.

	2002	2001	2000
Dividend yield	0.0%	0.0%	0.0%
Expected volatility factor	0.72	3.21	1.21
Approximate risk-free interest rate	4.25%	5.0%	5.0%
Expected life (in years)	10	10	10

The Black-Scholes options valuation model was developed for use in estimating the fair value of traded options that have no vesting restrictions and are fully transferable. In addition, option valuation models require the input of highly subjective assumptions including the expected stock price volatility. Because changes in the subjective input assumptions can materially affect the fair value estimate, the existing models, in management's opinion, do not necessarily provide a reliable single measure of the fair value of the Company's stock options.

F-21

8. EMPLOYEE BENEFIT AND STOCK PLANS

The Company sponsors a retirement plan and trust (the "Plan") established pursuant to Section 401(k) of the Internal Revenue Code, which covers substantially all administrative and non-union employees. Subject to certain dollar limitations, employees may contribute a percentage of their salaries to this Plan, and the Company will match a portion of the employees' contributions. Profit sharing contributions by the Company to the Plan are discretionary. Additionally, the Company contributed to various union-sponsored, collectively bargained pension plans for certain crew members in the marine transportation and towing segments. The plans are not administered by the Company, and contributions are determined in accordance with provisions of negotiated labor contracts. The expense resulting from Company contributions to the Plan and various union-sponsored plans amounted to approximately \$3.5 million, \$2.9 million and \$2.0 million for the years ended December 31, 2002, 2001 and 2000, respectively.

9. INCOME TAXES

The United States and foreign components of income (loss) before income taxes and extraordinary item are as follows (in thousands):

	YEAR ENDED DECEMBER 31,		
	2002	2001	2000
United States.....	\$ (7,755)	\$ (3,849)	\$ (1,502)
Foreign	1,350	(2,902)	(22,578)
Total	\$ (6,405)	\$ (6,751)	\$ (24,080)

The components of the provision for income tax expense (benefit) are as follows (in thousands):

	YEAR ENDED DECEMBER 31,		
	2002	2001	2000
Current:			
Federal	\$ (1,520)	\$ --	\$ --

Net deferred income tax assets	\$ --	\$ --
	=====	=====

SFAS No. 109 requires a valuation allowance to reduce the deferred tax

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

assets reported if, based on the weight of the evidence, it is more likely than not that some portion or all of the deferred tax assets will not be realized. After consideration of all the evidence, both positive and negative, management determined that a valuation allowance of approximately \$75.2 million and \$65.3 million was necessary at December 31, 2002, and 2001, respectively, to reduce the deferred tax assets to the amount that will more likely than not be realized. After application of the valuation allowance, the Company's net deferred tax assets and liabilities are zero at December 31, 2002 and 2001. The net change in the total valuation allowance was an increase of approximately \$9.9 million and \$7.9 million in 2002 and 2001, respectively.

F-23

Subsequently, recognized tax benefits relating to the valuation allowance for deferred tax assets as of December 31, 2002 will be allocated as follows (in thousands):

Income tax benefit that would be reported in the consolidated statement of operations	\$31
Additional paid-in capital	43

Total	\$75
	===

The Company has recognized a deferred tax asset of \$1.5 million for a 2001 federal net operating loss carryback. On March 9, 2002, the Job Creation and Worker Assistance Act of 2002 was signed into law, which allows a 2001 federal net operating loss to be carried back five years instead of two years. This new law converted the 2001 federal net operating loss carryforward into a federal net operating loss that will be fully absorbed within the five-year carryback period.

The stock issuance in September 2002 (see Note 10) resulted in an "ownership change" as broadly defined in Section 382 of the Internal Revenue Code. As the result of the ownership change, utilization of net operating loss carryforwards under federal income tax laws and certain other beneficial tax attributes will be subject to an annual limitation. The limitation of net operating losses that can be utilized annually will equal the product of applicable interest rate mandated under federal income tax laws and the value at the time of the ownership change.

At December 31, 2002, the Company had a net operating loss carryforward of approximately \$350.5 million, which is available to offset future federal taxable income through 2022. The Company also has foreign tax credit carryforwards, expiring in years 2003 through 2007, of approximately \$17.7 million, which are available to reduce future federal income tax liabilities. The annual limitation under Section 382 would limit utilization of the Company's pre- September net operating losses to a maximum of approximately \$4.2 million annually through their expiration date. A substantial portion of net operating loss carryforwards and tax credits may not be utilized due to this annual limitation.

The Company has a tax basis in its assets in excess of its basis for financial reporting purposes that will generate tax deductions in future periods. As a result of a "change in ownership" in December 1999, under the Internal Revenue Code Section 382, the Company's ability to utilize depreciation, amortization and other tax attributes will be limited to

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

approximately \$9.5 million per year through 2004. This limitation is applied to all net built-in losses, which existed on the "change of ownership" date (December 15, 1999), including all items giving rise to a deferred tax asset.

10. STOCKHOLDERS' EQUITY

In December 1999, all classes of the Predecessor Company's equity securities were canceled. Pursuant to a previous, pre-1999 Equity Ownership Plan, prior to December 1999, shares of the Predecessor Company's Class B common stock were converted to Class A common stock. Holders of Predecessor Company Class A common stock and holders of certain rights to obtain common stock under the Predecessor Company's compensation plans were issued 125,000 Class A warrants to purchase common stock of the Company on a pro rata basis. The warrants have a four-year term and an exercise price of \$38.49 per share.

Pursuant to the articles of incorporation of the Company, as amended in 2002, there are 40 million shares of common stock authorized for issuance.

F-24

In December 1999, holders of the Predecessor Company's Preferred Securities received 200,000 shares of Company common stock and 125,000 Class A warrants. The warrants have a four-year term and an exercise price of \$38.49 per share. There were no Class A warrant exercises during 2002 and 2001. The remaining weighted average contractual life is one year at December 31, 2002.

In December 1999, as part of the Company's reorganization under Chapter 11 bankruptcy, the holders of the Predecessor Company's Senior Notes received 9.8 million shares of Company common stock. The holders of Senior Notes received 536,193 common stock purchase warrants ("the Noteholder Warrants"). The warrants have a seven and one-half year term and an exercise price of \$0.01 per warrant. Also in connection with the former Senior Notes, the Company issued an additional 187,668 Noteholder Warrants to an investment advisor. The warrants have a seven and one-half year term and an exercise price of \$0.01 per warrant. During the years ended December 31, 2002 and 2001, 112,000 and 313,000 Noteholder Warrants were exercised, respectively. The amount of outstanding Noteholder Warrants amounted to approximately 210,000 at December 31, 2002. The weighted average contractual life is 4.5 years at December 31, 2002.

All of the Company's outstanding warrants contain customary anti-dilution provisions for issuances of common stock, splits, combinations and certain other events, as defined. In addition, the outstanding warrants have certain registration rights, as defined.

The Company is authorized to issue 5 million shares of preferred stock, no par value per share. The Company has no present plans to issue such shares.

At December 31, 2002 approximately 619,000 shares of Common Stock were reserved for issuance under the Company's Amended and Restated Equity Ownership Plan and the Stock Option Plan for Directors.

On September 13, 2002, the Company completed the private placement of 12.5 million shares of newly issued Seabulk common stock at a cash price of \$8.00 per share (the "Private Placement") to a group of investors including an entity associated with DLJ Merchant Banking Partners III, L.P., an affiliate of CSFB Private Equity, and entities associated with Carlyle/Riverstone Global Energy and Power Fund I, L.P., an affiliate of The Carlyle Group of Washington, D.C. The stock issuance was previously approved by the Company's Shareholders at a Special Meeting held on September 5, 2002.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

The new investors also purchased, for \$8.00 per share, 5.1 million of the Company's common stock and common stock purchase warrants beneficially owned by accounts managed by Loomis, Sayles

F-25

& Co., L.P., an SEC-registered investment advisor. Taken together, the two transactions gave the new investors approximately 76% of the Company's outstanding common stock. Pursuant to the agreement with the investors, the Company's Board of Directors has been restructured to permit the new investors to hold a majority of seats on the Board and to give minority shareholders certain minority rights.

11. NET LOSS PER SHARE

The following table sets forth the computation of basic and diluted net loss per share before extraordinary items (in thousands, except per share amounts):

	YEAR ENDED DECEMBER	
	2002	2001
Numerator:		
Numerator for basic and diluted loss per share--net loss before extraordinary item available to common shareholders.....	\$ (38,870) =====	\$ (11,960) =====
Denominator:		
Denominator for basic and diluted loss per share--weighted average shares.....	14,277 =====	10,277 =====
Net loss per common share before extraordinary item.....	\$ (2.72) =====	\$ (1.16) =====
Net loss per common share before extraordinary item--assuming Dilution.....	\$ (2.72) =====	\$ (1.16) =====

The weighted average diluted common shares outstanding for fiscal 2002, 2001 and 2000 excludes 774,502, 822,000 and 604,000 stock options, respectively. Additionally, 460,000, 572,000 and 885,000 warrants in 2002, 2001 and 2000, respectively, are excluded from the weighted average diluted common shares outstanding. These common stock equivalents are antidilutive because the Company incurred net losses for 2002, 2001 and 2000.

12. SEGMENT AND GEOGRAPHIC DATA

The Company organizes its business principally into three segments. The accounting policies of the reportable segments are the same as those described in Note 2. The Company does not have significant intersegment transactions.

These segments and their respective operations are as follows:

Offshore Energy Support (Seabulk Offshore) - Offshore energy support

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

includes vessels operating in U.S. and foreign locations used primarily to transport materials, supplies, equipment and personnel to drilling rigs and to support the construction, positioning and ongoing operations of oil and gas production platforms.

Marine Transportation Services (Seabulk Tankers) - Marine transportation services includes oceangoing vessels used to transport chemicals, fuel and other petroleum products, primarily from chemical manufacturing plants, refineries and storage facilities

F-26

along the U.S. Gulf of Mexico coast to industrial users and distribution facilities in and around the Gulf of Mexico, Atlantic and Pacific coast ports. Certain of the vessels also transport crude oil within Alaska and among Alaska, Pacific coast and Hawaiian ports.

Towing (Seabulk Towing) - Harbor and offshore towing services are provided by tugs to vessels utilizing the ports in which the tugs operate, and to vessels at sea to the extent required by offshore commercial contract opportunities and by environmental regulations, casualty or other emergency.

The Company evaluates performance by operating segment. Also, within the offshore energy support segment, the Company performs additional performance evaluation of vessels marketed in U.S. and foreign locations. Resources are allocated based on segment profit or loss from operations, before interest and taxes.

Revenue by segment and geographic area consists only of services provided to external customers, as reported in the Statements of Operations. Income from operations by geographic area represents net revenue less applicable costs and expenses related to that revenue. Unallocated expenses are primarily comprised of general and administrative expenses of a corporate nature. Identifiable assets represent those assets used in the operations of each segment or geographic area, and unallocated assets include corporate assets.

F-27

The following schedule presents information about the Company's operations in these segments (in thousands):

	----- 2002 -----
REVENUE	
Offshore energy support	\$ 171,47
Marine transportation services	121,37
Towing	31,14

	=====	=====

The Company is engaged in providing marine support and transportation services in the United States and foreign locations. The Company's foreign operations are conducted on a worldwide basis, primarily in West Africa, the Arabian Gulf, Southeast Asia and Mexico, with assets that are highly mobile. These operations are subject to risks inherent in operating in such locations.

The vessels generating revenue from offshore and marine transportation services move regularly and routinely from one country to another, sometimes in different continents depending on the charter party. Because of this asset mobility, revenue and long-lived assets attributable to the Company's foreign operations in any one country are not material, as defined in SFAS No. 131.

There were no customers from which the Company derived more than 10% of its total revenue for the year ended December 31, 2002. One customer, CITGO Petroleum, accounted for 11.0% and 12.0% of the Company's total revenue for the years ended December 31, 2001 and 2000. The revenue received from CITGO was approximately \$38.0 million and \$38.6 million in 2001 and 2000, respectively, which related to the marine transportation services segment.

F-29

The following table presents selected financial information pertaining to the Company's geographic operations for 2002, 2001 and 2000 (in thousands):

13. FAIR VALUE OF FINANCIAL INSTRUMENTS

The following methods and assumptions were used to estimate the fair value of financial instruments included in the following categories:

Cash, Cash Equivalents, Restricted Cash, Accounts Receivable, Accounts Payable and Accrued Liabilities. The carrying amounts reported in the balance sheet approximate fair value due to the short-term nature of such instruments.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

New Credit Facility and Title XI. The New Credit Facility and Title XI obligations provide for interest and principal payments at various rates and dates as discussed in Note 3. The Company estimates the fair value of such obligations using a discounted cash flow analysis at estimated market rates. The following table presents the carrying value and fair value of the financial instruments at December 31, 2002 and 2001 (in millions):

ISSUE	DECEMBER 31,		
	2002		2001
	CARRYING VALUE	FAIR VALUE	CARRYING VALUE
New Credit Facility	\$ 178.7	\$ 178.7	\$ --
Title XI	234.5	257.5	241.6

Notes Payable and Capital Lease Obligations. The carrying amounts reported in the balance sheet approximate fair value determined using a discounted cash flow analysis at estimated market rates.

14. EXTRAORDINARY ITEMS

In connection with the closing of the new equity investment and New Credit Facility in September 2002, the Company redeemed all of its 12.5% Secured Notes due 2007 and repaid its then existing bank debt.

The carrying value of the Senior Notes and bank debt at the time of the redemption and repayment was \$225.2 million, net of unamortized discount and unamortized financing costs. The price paid to retire the Senior Notes and bank debt was \$253.0 million. As a result, \$27.8 million was recorded as a loss on early extinguishment of debt, consisting of the write-off of the unamortized financing costs on the Senior Notes and bank debt of \$9.7 million, unamortized original issue discount on the Senior Notes of \$14.1 million and contractual redemption premiums on the Senior Notes of \$4.0 million. The tax benefit, net of the recorded valuation allowance, was zero.

15. SALE OF ASSETS OF SUN STATE AND PORT ARTHUR

On March 22, 2002, the Company closed on the sale of the marine transportation assets and trade name of Sun State for \$3.9 million in cash. The assets consisted of tugs, barges and fuel inventory with a carrying value of \$4.3 million. The name of this company was subsequently changed to Seabulk Marine Services, Inc. The Company recognized a loss on the disposal of these assets of approximately \$440,000.

On May 20, 2002, the Company closed on the sale of the marine terminal facility assets at Port Arthur, Texas for \$3.0 million. Fifty percent of the proceeds (\$1.5 million) were received at closing in cash and the remainder will be deferred and received over the next three years in the form of either cash or shipyard repair credits from the buyer. The assets consisted of land, an office building, docks and parking and warehouse storage facilities with a carrying value of \$1.3 million. As a result, the Company recognized a gain of \$1.7 million.

On July 9, 2002, the Company closed on the sale of the drydock and related

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

shipyard equipment assets of Seabulk Marine Services, Inc. (formerly Sun State Marine Services, Inc.) for \$450,000. The Company has no remaining operations at the Sun State location.

F-31

16. LIQUIDITY

At December 31, 2002, the Company had working capital of approximately \$26.3 million. Day rates and utilization for offshore vessels working in the Gulf of Mexico continued to be weak, a trend that began in September 2001. The slowdown in the domestic offshore market was offset in part by continued strength in the Company's international offshore operations, where day rates remained strong during the year and contributed to increased revenue in West Africa and the Middle East, and in part by the improved performance of the marine transportation segment. The increased revenue in the offshore business in West Africa and the Middle East was driven by exploration and production spending as major oil companies continued to proceed with oil exploration and development programs outside the U.S. Since the September 11, 2001 attacks, the subsequent war on terrorism and then commencement of the war in Iraq, the U.S. economy continues to be subject to pressure. As we enter 2003, the timing of a recovery in the domestic offshore segment is still not certain. However, the increases in oil and natural gas prices during the fourth quarter of 2002 and the early part of 2003 reinforce the potential for an upturn in domestic exploration and development activity in the latter half of 2003. We do expect earnings in 2003 from the offshore segment to improve compared to 2002. The Company also expects to benefit in 2003 from higher earnings in its marine transportation business as a result of a full year of higher time charter rates for certain tankers.

The Company's capital requirements arise primarily from its need to service debt, fund working capital and maintain and improve its vessels. The Company anticipates capital requirements for debt service, vessel maintenance and fleet improvements in 2003 to total approximately \$98 million and expects that cash flow from operations will continue to be a significant source of funds for its working capital and capital requirements.

The Company's credit agreement contains certain restrictive financial covenants that among other things requires minimum levels of EBITDA and tangible net worth. The Company is in compliance with such covenants at December 31, 2002 and expects to be in compliance through the balance of 2003 based on current financial projections. However, the Company's financial projections contain assumptions with respect to economic recovery beginning in the second quarter of 2003 in the underperforming U.S. Gulf offshore market. If the economic recovery does not occur or occurs later or to a lesser extent than the current forecast, the Company will need to reduce operating expenses to maintain compliance.

Management continues implementation of certain initiatives in an effort to improve profitability and liquidity. These initiatives include (1) selective acquisitions and charters of additional vessels, (2) repositioning certain vessels to take advantage of higher day rates, (3) selling unprofitable vessels, and (4) eliminating non-essential operating and overhead expenses. Management believes that its expense reduction initiatives will be sufficient to meet its financial covenants if the forecasted U.S. Gulf is other than expected.

Management recognizes that unforeseen events or business conditions, including unexpected deterioration in its markets, could prevent the Company from having sufficient liquidity to fund its operation or meeting targeted financial covenants.

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

If unforeseen events or business conditions prevent the Company from having sufficient liquidity to fund its operations, the Company has alternative sources including additional asset sales, and deferral of capital expenditures, which should enable it to satisfy essential capital requirements. If the Company does not meet its financial covenants, the Company would be required to seek an amendment or waiver to avoid default. While the Company believes it could successfully implement alternative plans, if necessary, there can be no assurance that such alternatives would be available or that the Company would be successful in their implementation.

17. SUBSEQUENT EVENTS

In January 2003, the Company took delivery of the Seabulk Africa, a newbuild, state-of-the-art, 236-foot, 5500 horsepower UT-755L platform supply vessel. The vessel is expected to join the Company's West African fleet. The Seabulk Africa was acquired for cash of approximately \$16 million and will be financed in April

F-32

2003 by means of a sale leaseback arrangement with TransAmerica Capital for a lease term of 10 years, after which the Company will have an option to acquire the vessel.

On March 7, 2003, the Company formed a joint venture company in Nigeria, named Modant Seabulk Nigeria Limited, with CTC International, Inc., a company owned by Nigerian interests. The Company will sell five of its crewboats operating in Nigeria to a related joint venture with CTC International in April 2003. Modant Seabulk Nigeria Limited will operate crewboats in Nigeria. Seabulk Offshore will provide certain management services for the joint venture.

On March 27, 2003, the Canaveral Port Authority served a sixty day notice of termination of the exclusive franchise to Port Canaveral Towing. Port Canaveral Towing intends to continue its operations on a non-exclusive basis at Port Canaveral.

F-33

18. SELECTED QUARTERLY FINANCIAL INFORMATION (UNAUDITED)

The following information is presented as supplementary financial information for 2002 and 2001 (in thousands, except per share information):

YEAR ENDED DECEMBER 31, 2002	FIRST QUARTER	SECOND QUARTER
Revenue	\$ 83,199	\$ 81,639
Income from operations	11,968	8,540
Loss before extraordinary item	(2,286)	(4,367)
Net loss(a)	(2,286)	(4,367)
Net loss per common share - basic and diluted (b):		
Loss before extraordinary item	\$ (0.22)	\$ (0.41)
Net loss	\$ (0.22)	\$ (0.41)

Edgar Filing: SEABULK INTERNATIONAL INC - Form 10-K

YEAR ENDED DECEMBER 31, 2001 -----	FIRST QUARTER -----	SECOND QUARTER -----
Revenue	\$ 81,420	\$ 91,424
Income from operations	8,409	18,903
Net (loss) income	(7,233)	2,750
Net (loss) earnings per common share--basic(b)	\$ (0.71)	\$ 0.27
Net (loss) earnings per common share--assuming dilution(b)	\$ (0.71)	\$ 0.27

-
- (a) Includes loss on early extinguishment of debt of \$27.8 million in the third quarter of 2002 (see Note 14).
 - (b) The sum of the four quarters' (loss) earnings per share will not necessarily equal the annual earnings per share, as the computations for each quarter are independent of the annual computation.
