**EXPLANATORY STATEMENT**

On November 11, 2005, Sykes Enterprises, Incorporated (the Company) determined that certain deferred revenues should be classified as current liabilities rather than long-term liabilities in the Company's Consolidated Financial Statements. The deferred revenues relate to various contracts in the Company's Canadian roadside assistance program for which the Company is prepaid for roadside assistance services that are generally carried out over a twelve-month or longer period. Accordingly, previously issued consolidated financial statements as presented herein have been restated to correct the classification of deferred revenue and the related deferred income taxes.

This Amendment No. 1 on Form 10-K/A which amends and restates the Company's Form 10-K for the year ended December 31, 2004, initially filed with Securities and Exchange Commission (the SEC) on March 23, 2005 (the Original Filing), is being filed to reflect the restatement of the consolidated financial statements and other financial information of the Company for the years ended December 31, 2004 and 2003. The Company reclassified \$19.0 million and \$19.0 million of deferred revenue from long-term liabilities to current liabilities as of December 31, 2004 and 2003, respectively. Additionally, the Company reclassified \$3.9 million and \$4.5 million of deferred revenue from other accrued expenses and current liabilities to deferred revenue in current liabilities as of December 31, 2004 and 2003, respectively. Finally, the Company reclassified \$2.1 million and \$1.6 million of the related deferred income taxes from long-term assets to current assets as of December 31, 2004 and 2003, respectively. Net Cash provided by Operating Activities for the years ended December 31, 2004, 2003 and 2002 were not impacted by the corrections of deferred revenue and the related deferred income taxes. However, cash flows in the amounts of \$0.5 million and \$0.4 million have been reclassified within operating cash flows from Prepaid expenses and other current assets to Deferred charges and other assets for the years ended December 31, 2004 and 2002, respectively, and from Deferred charges and other assets to Prepaid expenses and other current assets for the year ended December 31, 2003 in the amount of \$0.6 million. See Note 2 to the consolidated financial statements for further details.

For the convenience of the reader, this Form 10-K/A sets forth the Original Filing in its entirety except for certain exhibits not affected by the restatement. This Form 10-K/A includes such restated consolidated financial statements and related notes thereto for the years ended December 31, 2004, 2003 and 2002 and other information related to such restated consolidated financial statements, including revisions to Item 6 of Part II, Selected Financial Data, Item 9A of Part II, Controls and Procedures, and Item 15 of Part IV, Exhibits and Financial Statement Schedule. The foregoing items have not been updated to reflect other events occurring after the Original Filing or to modify or update those disclosures affected by subsequent events. Pursuant to the rules of the SEC, Item 15 of Part IV of the Original Filing has been amended to include an updated report and consent of the Company's independent registered public accounting firm and certifications re-executed as of the date of this Form 10-K/A from the Company's Chief Executive Officer and Chief Financial Officer. The certifications of the Chief Executive Officer and Chief Financial Officer are included in this Form 10-K/A as Exhibits 31.1, 31.2, 32.1 and 32.2.

Except for the foregoing amended information, this Form 10-K/A continues to describe conditions as of the date of the Original Filing, and the disclosures contained herein have not been updated to reflect events, results or developments that occurred after the Original Filing, or to modify or update those disclosures affected by subsequent events. Among other things, forward looking statements made in the Original Filing have not been revised to reflect events, results or developments that occurred or facts that became known to the Company after the date of the Original Filing (other than the restatement), and such forward looking statements should be read in their historical context.

**PART I**

**Item 1. Business**

**General**

Sykes Enterprises, Incorporated and consolidated subsidiaries ( Sykes, our, us or we ) is a global leader in providing outsourced customer contact management solutions and services in the business process outsourcing ( BPO ) arena. We provide an array of sophisticated customer contact management solutions to Fortune 1000 companies and medium sized businesses around the world primarily in the communications, technology/consumer, financial services, healthcare and transportation and leisure industries. We serve our clients through two geographic operating regions: the Americas (United States, Canada, Latin America, India and the Asia Pacific Rim) and EMEA (Europe, Middle East and Africa). Our Americas and EMEA groups primarily provide customer contact outsourcing services with an emphasis on inbound technical support and customer service. These services are delivered through multiple communications channels encompassing phone, e-mail, Web and chat. We also provide various enterprise support services in the United States that encompass services for our client s internal support operations, from technical staffing services to outsourced corporate help desk services. In Europe, we also provide fulfillment services including multilingual sales order processing via the Internet and phone, inventory control, product delivery and product returns handling. Our complete service offering helps our clients acquire, serve, retain and grow relationships with their customers. We have developed an extensive global reach with state-of-the-art customer contact management centers throughout the United States, Canada, Europe, Latin America, Asia and Africa.

Sykes was founded in 1977 in North Carolina and we moved our headquarters to Florida in 1993. In March 1996, we changed our state of incorporation from North Carolina to Florida. Our headquarters are located at 400 North Ashley Drive, 28th Floor, Tampa, Florida 33602, and our telephone number is (813) 274-1000.

Our annual report on Form 10-K, quarterly reports on Form 10-Q, current reports on Form 8-K, and amendments to those reports, as well as our proxy statements and other materials which are filed with or furnished to the Securities and Exchange Commission ( SEC ) are made available, free of charge, on or through our Internet website at [www.sykes.com/investors.asp](http://www.sykes.com/investors.asp) under the heading Financial Reports SEC Filings, as soon as reasonably practicable after they are filed with, or furnished to, the SEC.

**Industry Overview**

According to industry analysts, the outsourced customer contact management solutions market worldwide is estimated to be approximately \$51 billion in 2005. Also, the five primary verticals in which we participate communications, technology/consumer, financial services, healthcare and transportation and leisure constitute approximately 80% of the total worldwide market. We believe that growth for outsourced customer contact management solutions and services will be fueled by the trend of global Fortune 1000 companies and medium sized businesses turning to outsourcers to provide high quality, cost-effective, value added customer contact management solutions. Increasingly they are moving towards balanced solutions that consist of a combination of onshore and offshore support.

In today s ever-changing marketplace, companies require innovative customer contact management solutions that allow them to enhance the end user s experience with their products and services, strengthen and enhance company brands, maximize the lifetime value of customers, turn cost centers into profit centers, efficiently and effectively deliver human interaction when customers value it most, and deploy best in-class customer management strategies, processes and technologies.

Global competition, pricing pressures, softness in the global economy and rapid changes in technology are making it increasingly difficult for companies to cost effectively maintain the in-house personnel necessary to handle all of their customer contact management needs. As a result, companies are increasingly turning to outsourcers to perform specialized functions and services in the customer contact management arena. By working in a partnership with outsourcers, companies can ensure that the crucial task of retaining and growing their customer base is addressed without detracting from their competencies. Factors that are influencing companies to outsource customer contact management solutions include the following:

**Table of Contents**

Increasing importance for companies to focus on customer-facing activities and retain and grow client relationships;  
Growing capital requirements for entrance into new geographic markets offering a lower cost solution;  
Increasing need for companies to focus on core competencies;  
Increasing need for better utilization of internal customer contact management assets and time-to-market response;  
Growing need for consistent multi-site and multi-region support;  
Rapid changes in technology requiring personnel with specialized technical expertise;  
Growing capital requirements for sophisticated technology needed to maintain the necessary infrastructure to provide timely support;  
Increasing need to integrate and continually update complex systems incorporating a variety of hardware and software components spanning a number of technology generations; and  
Extensive and ongoing staff training and associated costs required for maintaining responsive, up-to-date, in-house technical support and customer service solutions.

To address these market factors, we offer a full, global customer contact management solution that focuses on proactively identifying and solving our clients' business problems through understanding our clients' industries and challenges and recommending solutions. We then can provide consistent support for our clients' customers across the globe in most languages leveraging our dynamic, secure communications infrastructure and a global footprint that reaches across 17 countries. This global footprint includes established operations in both onshore and highly strategic offshore geographic markets where companies have access to high quality customer contact management solutions at lower costs compared to other markets.

**Business Strategy**

Our goal is to provide enhanced customer contact management solutions and services in a proactive and responsive manner, acting as a partner in our clients' business. Sykes anticipates trends and delivers new ways of growing clients' customer satisfaction and retention rates, thus profit, through timely, insightful and proven solutions.

Our business strategy encompasses building long-term client relationships, capitalizing on our expert worldwide response team, leveraging our depth of relevant experience, expanding both organically and through acquisitions and diversifying our market reach. The principles of this strategy include the following:

***Build Long-term Client Relationships Through Service Excellence.*** We believe that providing superior, quality service is critical in our clients' decisions to outsource and in building long-term relationships with our clients. To ensure service excellence and consistency across each of our centers globally, we implemented an internally developed quality program titled Sykes Standard of Excellence (SSE). This quality certification standard is a compilation of more than 25 years of experience and best practices from industry standards such as the Malcom Baldrige National Quality Award and COPC (Customer Operations Performance Center Inc.). Every customer contact management center strives to meet or exceed the criteria set forth by SSE, which address leadership, hiring and training, performance management down to the agent level, forecasting and scheduling, and the client relationship including continuous improvement, disaster recovery plans and feedback.

***Capitalize on an Expert Worldwide Response Team.*** Companies are demanding a customer contact management solution that is global in nature—one of our key strengths. In addition to our network of customer contact management centers throughout North America and Europe, we continue to develop our global delivery model with operations in the Philippines, The Peoples Republic of China, Costa Rica and El Salvador, offering our clients a secure, high quality solution tailored to the needs of their diverse and global markets. These customer contact management centers were added to support the increasing demand for our worldwide customer contact management solutions and are fully integrated through our internally developed digital private Asynchronous Transfer Mode ( ATM ) communications network, which allows for effective call volume management and disaster recovery backup. Our converged voice and data ATM communications network provides a high quality, fault tolerant global network for the transport of Voice Over Internet Protocol communications and fully integrates with emerging Internet Protocol telephony systems as well as traditional Time Domain Multiplexing telephony systems. We continued to expand our global footprint, adding centers in El Salvador in 2004 and Slovakia in 2005. We also expanded our global market reach with the addition of client accounts based in The Peoples Republic of China, South Africa, and Latin America.

**Table of Contents**

***Maintain a Competitive Advantage Through Our Depth of Relevant Experience in Technology Solutions.*** For more than 25 years, Sykes has been an innovative pioneer in delivering customer contact management solutions. Through this experience, we have become a benchmark for innovation and excellent global solution delivery. We seek to maintain a competitive advantage and differentiation by utilizing technology in new and creative ways to consistently deliver innovative service solutions, ultimately enhancing the client's relationship with its customers and generating revenue growth. This includes knowledge solutions for agents and end customers, automatic call distributors, intelligent call routing and workforce management capabilities based on agent skill and availability, call tracking software, quality management systems and computer-telephony integration (CTI) that enable our customer contact management centers to serve as transparent extensions for our clients, receive telephone calls and data directly from our clients' systems, and report detailed information concerning the status and results of our services on a daily basis. We are also continuing to capitalize on sophisticated and specialized technological capabilities, including our current private ATM network that provides us the ability to manage call volumes more efficiently by load balancing calls and data between customer contact management centers over the same network. Our flexible, secure and scalable network infrastructure allows us to rapidly respond to changes in client voice and data traffic and quickly establish support operations for new and existing clients. Through strategic technology relationships, we are able to provide fully integrated communication services encompassing e-mail, chat and Web self-service platforms. In addition, the European deployment of Global Direct, our customer relationship management (CRM)/e-commerce application utilized within the fulfillment operations, establishes a platform whereby our clients can manage all customer profile and contact information from every communication channel, making it a viable customer-facing infrastructure solution to support their CRM initiatives.

***Continue to Grow Our Business Organically and through Acquisitions.*** We have grown our customer contact management outsourcing operations utilizing a strategy of both internal growth and external acquisitions. This plan has resulted in an increase from three U.S. customer contact management centers in 1994 to 35 customer contact management centers worldwide as of the end of 2004. Given the fragmented nature of the customer contact management industry, there may be other companies that could bring us certain complementary competencies. Acquisition candidates that can, among other competencies, expand our service offerings, broaden our geographic footprint, allow us access to new technology and are synergistic in nature, will be given consideration. We have and will continue to explore these options upon identification of strategic opportunities.

***Diversify Our Market Reach.*** We market our services on a worldwide basis to Fortune 1000 and medium sized businesses primarily in the communications, technology/consumer, financial services, healthcare, and transportation and leisure industries. We built our industry knowledge by initially focusing on software publishers, personal computer manufacturers and peripheral hardware manufacturers within the technology/consumer vertical market, providing us with a competitive advantage in technical support. In 2004, the technology/consumer vertical market represented 36% of our consolidated revenues. Beginning in 1999, our growth strategy targeted the communications vertical market, where we leveraged our technical support capabilities to capitalize on dial-up Internet, broadband Internet, wireless services and related opportunities. Revenues from the communications vertical market represented 32% of our consolidated revenues in 2004, compared to 9% in 1999. In 2001, we began targeting the financial services vertical market recognizing the potential growth this market offered and the added stability this market would provide our revenue mix. We entered into several new relationships with financial services companies in late 2001 and 2002, for which we provide an array of services from credit card inquiries to brokerage account assistance. For 2004, revenues from this vertical market represented 8% of our consolidated revenues, an increase from 6% in 2003, and we expect this market to continue to increase in the future. The healthcare vertical, which is primarily generated from our Canadian operations, represented 7% of our consolidated revenues in 2004 compared to 6% in 2003. While the transportation and leisure vertical market represented 6% of our consolidated revenues in 2004, compared to 5% in 2003, other vertical markets represented 11% of our consolidated revenues in 2004, compared to 7% in 2003. We believe the diversification of our business into focused vertical markets allows for a more predictable, steady revenue stream.

**Services**

We specialize in providing inbound outsourced customer contact management solutions in the BPO arena on a global basis. Our customer contact management services are provided through two operating segments the Americas and EMEA. The Americas region, representing 60.7% of consolidated revenues in 2004, includes the United States, Canada, Latin America and the Asia Pacific Rim. The sites within Latin America and the Asia Pacific Rim are included in the Americas region as they provide a significant service delivery vehicle for U.S. based companies that are utilizing our customer contact management solutions in these locations to support their customer care needs. The EMEA region, representing 39.3% of consolidated revenues in 2004, includes Europe, the Middle East and Africa. The following is a description of our customer contact management solutions:

## **Table of Contents**

***Outsourced Customer Contact Management Services.*** Our outsourced customer contact management services represented approximately 93.9% of total 2004 consolidated revenues. Every year, we handle over 100 million customer contacts including phone, e-mail, Web and chat throughout the Americas and EMEA regions. We provide these services utilizing our advanced technology infrastructure, human resource management skills and industry experience. These services include:

**Customer care** Customer care contacts primarily include product information requests, describing product features, activating customer accounts, resolving complaints, handling billing inquiries, changing addresses, claims handling, ordering/reservations, prequalification and warranty management, providing health information and roadside assistance;

**Technical support** Technical support contacts primarily include handling inquiries regarding hardware, software, communications services, communications equipment, Internet access technology and Internet portal usage; and

**Acquisition** Our acquisition services are primarily focused on inbound up-selling/cross-selling of our client's products and services.

We provide these services, primarily inbound customer calls, through our extensive global network of customer contact management centers, where our customer contact agents provide support in over 30 languages. Our technology infrastructure and managed service solutions allow for effective distribution of calls to one or more centers. These technology offerings provide our clients and us with the leading edge tools needed to maximize quality and customer satisfaction while controlling and minimizing costs.

***Fulfillment Services.*** In Europe, we offer fulfillment services that are fully integrated with our customer care and technical support services. Our fulfillment solutions include multilingual sales order processing via the Internet and phone, payment processing, inventory control, product delivery and product returns handling.

***Enterprise Support Services.*** In the United States, we provide a range of enterprise support services including technical staffing services and outsourced corporate help desk solutions.

## **Operations**

***Customer Contact Management Centers.*** We operate seventeen stand-alone customer contact management centers in Europe and South Africa, seven centers in the United States, one center in Canada and ten centers offshore, including The Peoples Republic of China, the Philippines, India, Costa Rica and El Salvador.

In an effort to stay ahead of industry off-shoring trends, we opened our first customer contact management centers in the Philippines and Costa Rica over seven years ago. By 2004, we expanded to five centers in the Philippines, two in Costa Rica, one in The People's Republic of China, one in India and one in El Salvador.

Due to shifts in business demand for offshore customer contact management centers, we closed several under-utilized customer contact management centers in the United States in 2004 and 2003. In addition, related to our efforts to reduce costs, we closed two centers in Europe and one center in the Middle East in 2004 and plan to close the center in India in 2005.

We utilize a sophisticated workforce management system to provide efficient scheduling of personnel. Our internally developed digital private communications network complements our workforce by allowing for effective call volume management and disaster recovery backup. Through this network and our dynamic intelligent call routing capabilities, we can rapidly respond to changes in client call volumes and move call volume traffic based on agent availability and skill throughout our network of centers, improving the responsiveness and productivity of our agents. We also can offer cost competitive solutions for taking calls to our offshore locations.

Our sophisticated data warehouse captures and downloads customer contact information for reporting on a daily, real time and historical basis. This data provides our clients with direct visibility into the services that we are providing for them. The data warehouse supplies information for our performance management systems such as our agent scorecarding application, which provides management with the information required for effective management of our operations.

## **Table of Contents**

Our customer contact management centers are protected by a fire extinguishing system, backup generators with significant capacity and 24 hour refueling contracts and short-term battery backups in the event of a power outage, reduced voltage or a power surge. Rerouting of call volumes to other customer contact management centers is also available in the event of a telecommunications failure, natural disaster or other emergency. Security measures are imposed to prevent unauthorized physical access. Software and related data files are backed up daily and stored off site at multiple locations. We carry business interruption insurance covering interruptions that might occur as a result of damage to our business.

***Fulfillment Centers.*** We currently have three fulfillment centers located in Europe. We provide our fulfillment services primarily to certain clients operating in Europe who desire this complementary service in connection with outsourced customer contact management services.

***Enterprise Support Services Offices.*** Our three enterprise support services offices are located in metropolitan areas in the United States to provide a strong recruiting platform for high-end knowledge workers and to establish a local presence to service major accounts.

### **Quality Assurance**

We believe that providing consistent high quality service is critical in our clients' decisions to outsource and in building long-term relationships with our clients. It is also our belief and commitment that quality is the responsibility of each individual at every level of the organization. To ensure service excellence and continuity across our organization, we have developed an integrated Quality Assurance program consisting of three major components:

- The certification of client accounts and customer contact management centers to the SSE program;
- The application of continuous improvement to all business processes through application of Six Sigma techniques; and
- The application of process audits to all work procedures.

The SSE program is a quality certification standard that was developed based on our more than 25 years of experience, and best practices from industry standards such as the COPC and Support Center Practices (SCP). It defines the requirements across all aspects of the business, and has a well-defined auditing process to ensure compliance and to gain certification.

The application of continuous improvement is established by SSE and is based upon the five-step Six Sigma cycle, which we have tuned to apply specifically to our service industry. All managers are responsible for continuous improvement in their operations.

Process audits are used to verify that client processes and procedures are consistently executed as required by established documentation. Process audits are applicable to all services being provided for the client. Quality monitoring and coaching are also core components of our approach to quality. We utilize industry best practices to ensure that our employees handle customer interactions with the care, accuracy and timeliness needed.

### **Sales and Marketing**

Our sales and marketing objective is to leverage our expertise and global presence to develop long-term relationships with existing and potential clients. Our customer contact solutions have been developed to help our clients acquire, retain, and increase the value of their customer relationships. We are implementing marketing and business development plans to increase visibility of our solutions in the vertical markets we serve. We believe that our client base provides excellent opportunities for further marketing and cross-selling of our customer contact management services. Our plans for increasing our visibility include market focused advertising, consultative personal visits with potential and existing clients, participation in market specific trade shows and seminars, speaking engagements, articles and white papers and our website.

Our sales force is composed of business development managers who pursue new business opportunities and strategic account managers that manage and grow relationships with existing accounts. We also have inside customer sales representatives who receive customer inquiries and provide outbound lead generation for the business development managers.

## **Table of Contents**

As part of our marketing efforts, we invite potential and existing clients to visit our customer contact management centers, where we can demonstrate the expertise of our skilled staff in partnering to deliver new ways of growing clients' customer satisfaction and retention rates, thus profit, through timely, insightful and proven solutions. During these visits, we demonstrate our ability to quickly and effectively support a new client or scale business from an existing client by emphasizing our systematic approach to implementing customer contact solutions throughout the world.

We emphasize account development to strengthen relationships with existing clients. Business development and strategic account managers are generally assigned to markets in their area of expertise in order to develop a complete understanding of each client's particular needs, to form strong client relationships and encourage cross-selling of our other service offerings. We utilize our marketing and sales visibility in the markets to lead our product development efforts to further meet growing market needs.

### **Clients**

In 2004, we provided service to hundreds of clients from our locations in the United States, Canada, Latin America, Europe, the Philippines, The Peoples Republic of China, India and South Africa. We market to Fortune 1000 corporations and medium sized businesses primarily within the communications, technology/consumer, financial services, healthcare, and transportation and leisure industries. Revenue by vertical market for 2004, as a percentage of our consolidated revenues, was 36% for technology/consumer, 32% for communications, 8% for financial services, 7% for healthcare, 7% for retail, 6% for transportation and leisure, and 4% for all other vertical markets, including, government-related and utilities. We believe our globally recognized client base presents opportunities for further cross marketing of our services.

For the years ended December 31, 2004 and 2003, total revenues included \$36.6 million, or 7.8% of consolidated revenues, and \$81.2 million, or 16.9% of consolidated revenues, respectively, from Accenture, a leading systems integrator that represents a major provider of communication services to whom we provide various outsourced customer contact management services. Effective May 1, 2003, we entered into a subcontractor services agreement (the Agreement) with Accenture following the execution of a primary services agreement between the major provider of communication services and Accenture. The revenues for the year ended December 31, 2002, as it relates to this relationship were \$71.6 million, or 15.8% of consolidated revenues. Under the terms of this three-year Agreement, which contains penalty provisions for failure to meet minimum service levels and is cancelable with 6 months written notice, we will continue to provide the products and services necessary to support and assist Accenture in the management and performance of its primary services agreement.

In addition, for the years ended December 31, 2004, 2003 and 2002, total revenues included \$33.8 million, or 7.3% of consolidated revenues, \$58.5 million, or 12.2% of consolidated revenues, and \$54.6 million, or 12.1% of consolidated revenues, respectively, from Microsoft Corporation, a major provider of software and related services.

Although no client represented 10% or more of 2004 consolidated revenues, our top ten clients accounted for approximately 45% of our consolidated revenues in 2004. The loss of (or the failure to retain a significant amount of business with) Accenture, Microsoft or any of our other key clients could have a material adverse effect on our performance. Many of our contracts contain penalty provisions for failure to meet minimum service levels and are cancelable by the client at any time or on short-term notice. Also, clients may unilaterally reduce their use of our services under our contracts without penalty.

### **Competition**

The industry in which we operate is extremely competitive and highly fragmented. While many companies provide customer contact management solutions and services, we believe no one company is dominant in the industry.

In most cases, our principal competition stems from our existing and potential clients' in-house customer contact management operations. When it is not the in-house operations of a client, our direct competition includes TeleTech, Sitel, APAC Customer Services, ICT Group, Client Logic, Convergys, West Corporation, Stream, PeopleSupport, EDS, IBM and NCO Group as well as the customer care arm of such companies as Accenture, WIPRO, 24/7, Infosys and SR Teleperformance. There are other numerous and varied providers of such services, including firms specializing in various CRM consulting, other customer management solutions providers' niche or large market companies, as well as product distribution companies that provide fulfillment services. Some of these companies

possess substantially greater resources, greater name recognition and a more established customer base than we.

**Table of Contents**

We believe that the most significant competitive factors in the sale of outsourced customer contact management services include service quality, tailored value added service offering, industry experience, advanced technology capabilities, global coverage, reliability, scalability, security and price. As a result of intense competition, outsourced customer contact management solutions and services frequently are subject to pricing pressure. Clients also require outsourcers to be able to provide services in multiple locations. Competition for contracts for many of our services takes the form of competitive bidding in response to requests for proposals.

**Intellectual Property**

We rely upon a combination of contract provisions and trade secret laws to protect the proprietary technology we use at our customer contact management centers and facilities. We also rely on a combination of copyright, trademark and trade secret laws to protect our proprietary software. We attempt to further protect our trade secrets and other proprietary information through agreements with employees and consultants. We do not hold any patents and do not have any patent applications pending. There can be no assurance that the steps we have taken to protect our proprietary technology will be adequate to deter misappropriation of our proprietary rights or third-party development of similar proprietary software. Sykes<sup>®</sup>, REAL PEOPLE. REAL SOLUTIONS.<sup>®</sup> and Sykes AnswerTeam<sup>®</sup> are our registered service marks. We hold a number of registered trademarks, including ETSC<sup>®</sup>, FS PRO<sup>®</sup> and FS PRO MARKETPLACE<sup>®</sup>.

**Employees**

At January 31, 2005, we had approximately 17,130 employees worldwide, consisting of 15,400 customer contact agents handling technical and customer support inquiries at our centers, 1,440 in management, administration and finance, 120 in enterprise support services, 150 in fulfillment services and 20 in sales and marketing. Our employees, with the exception of approximately 500 employees in Europe, are not represented by a labor union and we have never suffered an interruption of business as a result of a labor dispute. We consider our relations with our employees to be good.

We employ personnel through a continually updated recruiting network. This network includes a seasoned team of recruiters, a company-wide candidate database, Internet/newspaper advertising, candidate referral programs and job fairs. However, demand for qualified professionals with the required language and technical skills may exceed supply, as new skills are needed to keep pace with the requirements of customer engagements. Competition for such personnel is intense and employee turnover in this industry is high.

**Factors Influencing Future Results and Accuracy of Forward Looking Statements**

This report contains forward-looking statements (within the meaning of the Private Securities Litigation Reform Act of 1995) that are based on current expectations, estimates, forecasts, and projections about us, our beliefs, and assumptions made by us. In addition, we may make other written or oral statements, which constitute forward-looking statements, from time to time. Words such as may, expects, projects, anticipates, intends, plans, believes, estimates, variations of such words, and similar expressions are intended to identify such forward-looking statements. Similarly, statements that describe our future plans, objectives or goals also are forward-looking statements. These statements are not guarantees of future performance and are subject to a number of risks and uncertainties, including those discussed below and elsewhere in this report. Our actual results may differ materially from what is expressed or forecasted in such forward-looking statements, and undue reliance should not be placed on such statements. All forward-looking statements are made as of the date hereof, and we undertake no obligation to update any forward-looking statements, whether as a result of new information, future events or otherwise.

Factors that could cause actual results to differ materially from what is expressed or forecasted in such forward-looking statements include, but are not limited to: the marketplace's continued receptivity to our terms and elements of services offered under our standardized contract for future bundled service offerings; our ability to continue the growth of our service revenues through additional customer contact management centers; our ability to further penetrate into vertically integrated markets; our ability to expand revenues within the global markets; our ability to continue to establish a competitive advantage through sophisticated technological capabilities, and the following risk factors:

**Table of Contents**

***Dependence on Key Clients***

We derive a substantial portion of our revenues from a few key clients. For the years ended December 31, 2004 and 2003, total revenues included \$36.6 million, or 7.8% of consolidated revenues, and \$81.2 million, or 16.9% of consolidated revenues, respectively, from Accenture, a leading systems integrator that represents a major provider of communication services to whom we provide various outsourced customer contact management services. Effective May 1, 2003, we entered into a subcontractor services agreement (the Agreement) with Accenture following the execution of a primary services agreement between the major provider of communication services and Accenture. The revenues for the year ended December 31, 2002, as it relates to this relationship were \$71.6 million, or 15.8% of consolidated revenues. Under the terms of this three-year Agreement, which contains penalty provisions for failure to meet minimum service levels and is cancelable with 6 months written notice, we will continue to provide the products and services necessary to support and assist Accenture in the management and performance of its primary services agreement.

In addition, total revenue for the years ended December 31, 2004, 2003 and 2002, includes \$33.8 million, or 7.3% of consolidated revenues, \$58.5 million, or 12.2% of consolidated revenues and \$54.6 million, or 12.1% of consolidated revenues, respectively, from Microsoft Corporation, a major provider of software and related services. Our top ten clients accounted for approximately 45%, 59% and 60%, of consolidated revenue for the years ended December 31, 2004, 2003, and 2002, respectively.

Our loss of, or the failure to retain a significant amount of business with Accenture, Microsoft or any of our other key clients could have a material adverse effect on our business, financial condition and results of operations. Many of our contracts contain penalty provisions for failure to meet minimum service levels and are cancelable by the client at any time or on short-term notice. Also, clients may unilaterally reduce their use of our services under these contracts without penalty. Thus, our contracts with our clients do not ensure that we will generate a minimum level of revenues.

***Risks Associated With International Operations and Expansion***

We intend to continue to pursue growth opportunities in markets outside the United States. At December 31, 2004, our international operations were conducted from 24 customer contact management centers located in Sweden, the Netherlands, Finland, Germany, South Africa, Scotland, India, Ireland, Italy, Hungary, Spain, The Peoples Republic of China and the Philippines. Revenues from these operations for the years ended December 31, 2004, 2003, and 2002, were 59%, 44%, and 39% of consolidated revenues, respectively. We also conduct business from four customer contact management centers located in Canada, Costa Rica and El Salvador. International operations are subject to certain risks common to international activities, such as changes in foreign governmental regulations, tariffs and taxes, import/export license requirements, the imposition of trade barriers, difficulties in staffing and managing international operations, political uncertainties, longer payment cycles, foreign exchange restrictions that could limit the repatriation of earnings, possible greater difficulties in accounts receivable collection, potentially adverse tax consequences, and economic instability. As of December 31, 2004, we had cash balances of approximately \$79.0 million held in international operations, which may be subject to additional taxes if repatriated to the United States.

We conduct business in various foreign currencies and are therefore exposed to market risk from changes in foreign currency exchange rates and interest rates, which could impact our results of operations and financial condition. We are also subject to certain exposures arising from the translation and consolidation of the financial results of our foreign subsidiaries. We have, from time to time, taken limited actions, such as using foreign currency forward contracts, to attempt to mitigate our currency exchange exposure. However, there can be no assurance that we will take any actions to mitigate such exposure in the future, and if taken, that such actions will be successful or that future changes in currency exchange rates will not have a material impact on our future operating results. A significant change in the value of the dollar against the currency of one or more countries where we operate may have a material adverse effect on our results.

***Fundamental Shift Towards Global Service Delivery Markets***

Clients are increasingly requiring blended delivery models using a combination of onshore and offshore support. Our offshore delivery locations include The Peoples Republic of China, the Philippines, Costa Rica and El Salvador, and while we have operated in global delivery markets since 1996, there can be no assurance that we will be able to

successfully conduct and expand such operations, and a failure to do so could have a material adverse effect on our

## **Table of Contents**

business, financial condition, and results of operations. The success of our offshore operations will be subject to numerous contingencies, some of which are beyond our control, including general and regional economic conditions, prices for our services, competition, changes in regulation and other risks. In addition, as with all of our operations outside of the United States, we are subject to various additional political, economic, and market uncertainties (See Risks Associated with International Operations and Expansion. ). Additionally, a change in the political environment in the United States or the adoption and enforcement of legislation and regulations curbing the use of offshore customer contact management solutions and services could effectively have a material adverse effect on our business, financial condition and results of operations.

### ***Existence of Substantial Competition***

The markets for our services on a commoditized basis are highly competitive and subject to rapid change. While many companies provide outsourced customer contact management services, we believe no one company is dominant in the industry. There are numerous and varied providers of our services, including firms specializing in call center operations, temporary staffing and personnel placement, consulting and integration firms, and niche providers of outsourced customer contact management services, many of whom compete in only certain markets. Our competitors include both companies who possess greater resources and name recognition than we do, as well as small niche providers that have few assets and regionalized (local) name recognition instead of global name recognition. In addition to our competitors, many companies who might utilize our services or the services of one of our competitors may utilize in-house personnel to perform such services. Increased competition, our failure to compete successfully, pricing pressures, loss of market share and loss of clients could have a material adverse effect on our business, financial condition and results of operations.

Many of our large clients purchase outsourced customer contact management services from multiple preferred vendors. We have experienced and continue to anticipate significant pricing pressure from these clients in order to remain a preferred vendor. These companies also require vendors to be able to provide services in multiple locations. Although we believe we can effectively meet our clients' demands, there can be no assurance that we will be able to compete effectively with other outsourced customer contact management services companies on price. We believe that the most significant competitive factors in the sale of our core services include the standard requirements of quality, tailored value added service offerings, industry experience, global coverage, reliability, scalability, security and price.

### ***Inability to Attract and Retain Experienced Personnel May Adversely Impact Our Business***

Our business is labor intensive and places significant importance on our ability to recruit, train, and retain qualified technical and consultative professional personnel. We generally experience high turnover of our personnel and are continuously required to recruit and train replacement personnel as a result of a changing and expanding work force. Additionally, demand for qualified technical professionals conversant with the English language and/or certain technologies may exceed supply, as new and additional skills are required to keep pace with evolving computer technology. Our ability to locate and train employees is critical to achieving our growth objective. Our inability to attract and retain qualified personnel or an increase in wages or other costs of attracting, training, or retaining qualified personnel could have a material adverse effect on our business, financial condition and results of operations.

### ***Dependence on Senior Management***

Our success is largely dependent upon the efforts, direction and guidance of our senior management. Our growth and success also depend in part on our ability to attract and retain skilled employees and managers and on the ability of our executive officers and key employees to manage our operations successfully. We have entered into employment and non-competition agreements with our executive officers. The loss of any of our senior management or key personnel, or the inability to attract, retain or replace key management personnel in the future, could have a material adverse effect on our business, financial condition and results of operations.

### ***Dependence on Trend Toward Outsourcing***

Our business and growth depend in large part on the industry trend toward outsourced customer contact management services. Outsourcing means that an entity contracts with a third party, such as us, to provide customer contact services rather than perform such services in-house. There can be no assurance that this trend will continue, as organizations may elect to perform such services themselves. A significant change in this trend could have a

## **Table of Contents**

material adverse effect on our business, financial condition and results of operations. Additionally, there can be no assurance that our cross-selling efforts will cause clients to purchase additional services from us or adopt a single-source outsourcing approach.

### ***Our Strategy of Growing Through Selective Acquisitions and Mergers Involves Potential Risks***

We evaluate opportunities to expand the scope of our services through acquisitions and mergers. We may be unable to identify companies that complement our strategies, and even if we identify a company that complements our strategies, we may be unable to acquire or merge with the company. In addition, a decrease in the price of our common stock could hinder our growth strategy by limiting growth through stock acquisitions.

Our acquisition strategy involves other potential risks. These risks include:

- The inability to obtain the capital required to finance potential acquisitions on satisfactory terms;
- The diversion of our attention to the integration of the businesses to be acquired;
- The risk that the acquired businesses will fail to maintain the quality of services that we have historically provided;
- The need to implement financial and other systems and add management resources;
- The risk that key employees of the acquired business will leave after the acquisition;
- Potential liabilities of the acquired business;
- Unforeseen difficulties in the acquired operations;
- Adverse short-term effects on our operating results;
- Lack of success in assimilating or integrating the operations of acquired businesses within our business;
- The dilutive effect of the issuance of additional equity securities;
- The impairment of goodwill and other intangible assets involved in any acquisitions;
- The businesses we acquire not proving profitable; and
- Potentially incurring additional indebtedness.

### ***Uncertainties Relating to Future Litigation***

We cannot predict whether any material suits, claims, or investigations may arise in the future. Regardless of the outcome of any future actions, claims, or investigations, we may incur substantial defense costs and such actions may cause a diversion of management time and attention. Also, it is possible that we may be required to pay substantial damages or settlement costs which could have a material adverse effect on our financial condition and results of operations.

### ***Rapid Technological Change***

Rapid technological advances, frequent new product introductions and enhancements, and changes in client requirements characterize the market for outsourced customer contact management services. Our future success will depend in large part on our ability to service new products, platforms and rapidly changing technology. These factors will require us to provide adequately trained personnel to address the increasingly sophisticated, complex and evolving needs of our clients. In addition, our ability to capitalize on our acquisitions will depend on our ability to continually enhance software and services and adapt such software to new hardware and operating system requirements. Any failure by us to anticipate or respond rapidly to technological advances, new products and enhancements, or changes in client requirements could have a material adverse effect on our business, financial condition and results of operations.

### ***Reliance on Technology and Computer Systems***

We have invested significantly in sophisticated and specialized communications and computer technology and have focused on the application of this technology to meet our clients' needs. We anticipate that it will be necessary to continue to invest in and develop new and enhanced technology on a timely basis to maintain our competitiveness. Significant capital expenditures may be required to keep our technology up-to-date. There can be no assurance that any of our information systems will be adequate to meet our future needs or that we will be able to incorporate new technology to enhance and develop our existing services. Moreover, investments in technology, including future investments in upgrades and enhancements to software, may not necessarily maintain our competitiveness. Our future success will also depend in part on our ability to anticipate and develop information technology solutions that keep pace with evolving industry standards and changing client demands.

**Table of Contents*****Risk of Emergency Interruption of Customer Contact Management Center Operations***

Our operations are dependent upon our ability to protect our customer contact management centers and our information databases against damage that may be caused by fire and other disasters, power failure, telecommunications failures, unauthorized intrusion, computer viruses and other emergencies. The temporary or permanent loss of such systems could have a material adverse effect on our business, financial condition and results of operations. Notwithstanding precautions taken to protect us and our clients from events that could interrupt delivery of services, there can be no assurance that a fire, natural disaster, human error, equipment malfunction or inadequacy, or other event would not result in a prolonged interruption in our ability to provide services to our clients. Such an event could have a material adverse effect on our business, financial condition and results of operations.

***Control By Principal Shareholder and Anti-Takeover Considerations***

As of March 2, 2005, John H. Sykes, our founder and former Chairman of the Board and Chief Executive Officer, beneficially owned approximately 35.0% of our outstanding common stock. As a result, Mr. Sykes will have substantial influence in the election of our directors and in determining the outcome of other matters requiring shareholder approval.

Our Board of Directors is divided into three classes serving staggered three-year terms. The staggered Board of Directors and the anti-takeover effects of certain provisions contained in the Florida Business Corporation Act and in our Articles of Incorporation and Bylaws, including the ability of the Board of Directors to issue shares of preferred stock and to fix the rights and preferences of those shares without shareholder approval, may have the effect of delaying, deferring or preventing an unsolicited change in control. This may adversely affect the market price of our common stock or the ability of shareholders to participate in a transaction in which they might otherwise receive a premium for their shares.

***Volatility of Stock Price May Result in Loss of Investment***

The trading price of our common stock has been and may continue to be subject to wide fluctuations over short and long periods of time. We believe that market prices of outsourced customer contact management services stocks in general have experienced volatility, which could affect the market price of our common stock regardless of our financial results or performance. We further believe that various factors such as general economic conditions, changes or volatility in the financial markets, changing market conditions in the outsourced customer contact management services industry, quarterly variations in our financial results, the announcement of acquisitions, strategic partnerships, or new product offerings, and changes in financial estimates and recommendations by securities analysts could cause the market price of our common stock to fluctuate substantially in the future.

**Executive Officers**

The following table provides the names and ages of our executive officers, and the positions and offices currently held by each of them:

<b>Name</b>	<b>Age</b>	<b>Principal Position</b>
Charles E. Sykes	41	President and Chief Executive Officer
W. Michael Kipphut	51	Senior Vice President and Chief Financial Officer
James C. Hobby	54	Senior Vice President, Global Operations
Jenna R. Nelson	41	Senior Vice President, Human Resources
Daniel L. Hernandez	38	Senior Vice President, Global Strategy
David L. Pearson	46	Senior Vice President and Chief Information Officer
William N. Rocktoff	42	Vice President and Corporate Controller
James T. Holder	46	Vice President, General Counsel and Corporate Secretary

**Table of Contents**

**Charles E. Sykes** joined Sykes in 1986 and was named President and Chief Executive Officer in August 2004. From July 2003 to August 2004, Mr. Sykes was the Chief Operating Officer. From March 2000 to June 2001, Mr. Sykes was Senior Vice President, Marketing and in June 2001 he was appointed to the position of General Manager, Senior Vice President the Americas. From December 1996 to March 2000, he served as Vice President, Sales and held the position of Regional Manager of the Midwest Region for Professional Services from 1992 until 1996. Mr. Charles E. Sykes is the son of Mr. John H. Sykes.

**W. Michael Kipphut, C.P.A.**, joined Sykes in March 2000 as Vice President and Chief Financial Officer and was named Senior Vice President and Chief Financial officer in June 2001. From September 1998 to February 2000, Mr. Kipphut held the position of Vice President and Chief Financial Officer for USA Floral Products, Inc., a publicly held worldwide perishable products distributor. From September 1994 until September 1998, Mr. Kipphut held the position of Vice President and Treasurer for Spalding & Evenflo Companies, Inc., a global manufacturer of consumer products. Previously, Mr. Kipphut held various financial positions including Vice President and Treasurer in his 17 years at Tyler Corporation, a publicly held diversified holding company.

**James C. Hobby** joined Sykes in August 2003 as Senior Vice President, the Americas, overseeing the daily operations, administration and development of Sykes customer care and enterprise support operations throughout North America, Latin America, the Asia Pacific Rim and India and was named Senior Vice President, Global Operations in January 2005. Prior to joining Sykes, Mr. Hobby held several positions at Gateway, Inc., most recently serving as President of Consumer Customer Care since August 1999. From January 1999 to August 1999, Mr. Hobby served as Vice President of European Customer Care for Gateway, Inc. From January 1996 to January 1999, Mr. Hobby served as the Vice President of European Customer Service Centers at American Express. Prior to January 1996, Mr. Hobby held various senior management positions in customer care at FedEx Corporation since 1983, mostly recently serving as Managing Director, European Customer Service Operations.

**Jenna R. Nelson** joined Sykes in August 1993 and was named Senior Vice President, Human Resources in July 2001. From January 2001 until July 2001, Ms. Nelson held the position of Vice President, Human Resources. In August 1998, Ms. Nelson was appointed Vice President, Human Resources and held the position of Director, Human Resources and Administration from August 1996 to July 1998. From August 1993 until July 1996, Ms. Nelson served in various management positions within Sykes, including Director of Administration.

**Daniel L. Hernandez** joined Sykes in October 2003 as Senior Vice President, Global Strategy overseeing marketing, operations strategy and client relations worldwide. Prior to joining Sykes, Mr. Hernandez served as President and CEO of SBC Internet Services, a division of SBC Communications Inc., since March 2000. From February 1998 to March 2000, Mr. Hernandez held the position of Vice President/General Manager, Internet and System Operations at Ameritech Interactive Media Services. Prior to February 1998, Mr. Hernandez held various management positions at U S West Communications since joining the telecommunications provider in 1990.

**David L. Pearson** joined Sykes in February 1997 as Vice President, Engineering and was named Vice President, Technology Systems Management in 2000 and Senior Vice President and Chief Information Officer in August 2004. Prior to Sykes, Mr. Pearson held various engineering and technical management roles over a fifteen year period, including eight years at Compaq Computer Corporation and five years at Texas Instruments.

**William N. Rocktoff, C.P.A.**, joined Sykes in August 1997 as Corporate Controller and was named Treasurer and Corporate Controller in December 1999 and Vice President and Corporate Controller in March 2002. From November 1989 to August 1997, Mr. Rocktoff held various financial positions, including Corporate Controller at Kimmins Corporation, a publicly held contracting company.

**James T. Holder, J.D., C.P.A.** joined Sykes in December 2000 as General Counsel and was named Corporate Secretary in January 2001 and Vice President in January 2004. From November 1999 until November 2000, Mr. Holder served in a consulting capacity as Special Counsel to Checkers Drive-In Restaurants, Inc., a publicly held restaurant operator and franchisor. From November 1993 until November 1999, Mr. Holder served in various capacities at Checkers including Corporate Secretary, Chief Financial Officer and Senior Vice President and General Counsel.

**Table of Contents****Item 2. Properties**

Our principal executive offices are located in Tampa, Florida. This facility currently serves as the headquarters for senior management and the financial, information technology and administrative departments. We believe our existing facilities are adequate to meet current requirements, and that suitable additional or substitute space will be available as needed to accommodate any physical expansion. We operate from time to time in temporary facilities to accommodate growth before new customer contact management centers are available. The following table sets forth additional information concerning our facilities:

**Table of Contents**

**Item 3. Legal Proceedings**

From time to time we are involved in legal actions arising in the ordinary course of business. With respect to these matters, we believe we have adequate legal defenses and/or provided adequate accruals for related costs such that the ultimate outcome will not have a material adverse effect on our future financial position or results of operations.

**Item 4. Submission of Matters to a Vote of Security Holders**

No matter was submitted to a vote of security holders during the fourth quarter of the year covered by this report.

**Table of Contents****PART II****Item 5. Market for the Registrant's Common Equity, Related Shareholder Matters and Issuer Purchases of Securities**

Our common stock is quoted on the NASDAQ National Market under the symbol SYKE. The following table sets forth, for the periods indicated, certain information as to the high and low sale prices per share of our common stock as quoted on the NASDAQ National Market.

	<b>High</b>	<b>Low</b>
<b>Year ended December 31, 2004:</b>		
Fourth Quarter	\$ 7.20	\$ 4.51
Third Quarter	7.66	4.43
Second Quarter	7.71	5.34
First Quarter	10.07	5.22
<b>Year ended December 31, 2003:</b>		
Fourth Quarter	\$ 10.50	\$ 6.70
Third Quarter	8.29	4.57
Second Quarter	5.30	3.75
First Quarter	4.34	2.85

Holders of our common stock are entitled to receive dividends out of the funds legally available when and if declared by the Board of Directors. We have not declared or paid any cash dividends on our common stock in the past and do not anticipate paying any cash dividends in the foreseeable future.

As of March 3, 2005, there were 1,320 holders of record of the common stock. We believe that there were 6,111 beneficial owners of our common stock.

Below is a summary of stock repurchases for the quarter ended December 31, 2004 (in thousands, except average price per share). See Note 17, Earnings Per Share, to the Consolidated Financial Statements for information regarding our stock repurchase program.

<b>Period</b>		<b>Total Number of Shares Purchased (1)</b>	<b>Average Price Paid Per Share</b>	<b>Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs</b>	<b>Maximum Number Of Shares That May Yet Be Purchased Under Plans or Programs</b>
October 1, 2004	October 31, 2004			1,644	1,356
November 1, 2004	November 30, 2004			1,644	1,356
December 1, 2004	December 31, 2004			1,644	1,356

(1) All shares purchased as part of a repurchase plan

publicly  
announced on  
August 5, 2002.  
Total number of  
shares approved  
for repurchase  
under the plan  
was 3 million  
with no  
expiration date.

**Table of Contents****Item 6. Selected Financial Data**

The following selected financial data has been derived from our consolidated financial statements, as restated (see Note 2 to the consolidated financial statements). The information below should be read in conjunction with

Management's Discussion and Analysis of Financial Condition and Results of Operations, and our Consolidated Financial Statements and related notes.

(In thousands, except per share data)	Years Ended December 31,

**Table of Contents****Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations**

*The following should be read in conjunction with the Consolidated Financial Statements, as restated, and the notes thereto that appear elsewhere in this document. As discussed in the explanatory statement at the front of this report, and also in Note 2 to the consolidated financial statements included herein, we have restated the consolidated balance sheets as of December 31, 2004 and 2003 and the consolidated statements of cash flows for the years ended December 31, 2004, 2003 and 2002. The following discussion and analysis compares the year ended December 31, 2004 ( 2004 ) to the year ended December 31, 2003 ( 2003 ), and 2003 to the year ended December 31, 2002 ( 2002 ).*

*The following discussion and analysis and other sections of this document contain forward-looking statements that involve risks and uncertainties. Words such as may, expects, projects, anticipates, intends, plans, believes, seeks, estimates, variations of such words, and similar expressions are intended to identify such forward-looking statements. Similarly, statements that describe our future plans, objectives, or goals also are forward-looking statements. Future events and actual results could differ materially from the results reflected in these forward-looking statements, as a result of certain of the factors set forth below and elsewhere in this analysis and in this Form 10-K/A for the year ended December 31, 2004 in Item 1 in the section entitled Factors Influencing Future Results and Accuracy of Forward-Looking Statements.*

**Overview**

We provide outsourced customer contact management solutions and services with an emphasis on inbound technical support and customer service, which represented 93.9% of consolidated revenues in 2004, delivered through multiple communication channels encompassing phone, e-mail, Web and chat. Revenue from technical support and customer service, provided through our customer contact management centers, is recognized as services are rendered. These services are billed on an amount per e-mail, a fee per call, a rate per minute or on a time and material basis. Revenue from fulfillment services is generally billed on a per unit basis.

We also provide a range of enterprise support services for our client's internal support operations, from technical staffing services to outsourced corporate help desk services. Revenues usually are billed on a time and material basis, generally by the minute or hour, and revenues generally are recognized as the services are provided. Revenues from fixed price contracts, generally with terms of less than one year, are recognized using the percentage-of-completion method. A significant majority of our revenue is derived from non-fixed price contracts. We have not experienced material losses due to fixed price contracts and do not anticipate a significant increase in revenue derived from such contracts in the future.

Direct salaries and related costs include direct personnel compensation, statutory and other benefits associated with such personnel and other direct costs associated with providing services to customers. General and administrative expenses include administrative, sales and marketing, occupancy, depreciation and amortization, and other costs.

Recognition of income associated with grants from local or state governments of land and the acquisition of property, buildings and equipment is deferred and recognized as a reduction of depreciation expense included within general and administrative costs over the corresponding useful lives of the related assets. Amounts received in excess of the cost of the building are allocated to equipment and, only after the grants are released from escrow, recognized as a reduction of depreciation expense over the weighted average useful life of the related equipment, which approximates five years. Deferred property and equipment grants, net of amortization, totaled \$20.6 million and \$27.4 million at December 31, 2004 and 2003, respectively.

The net (gain) loss on disposal of property and equipment includes the net gain on the sale of various facilities in 2004 and 2003 offset by the net loss on the disposal of property and equipment.

The net gain on insurance settlement includes the insurance proceeds received for damage to our Marianna, Florida customer contact management center in September 2004.

Restructuring and other charges (reversals) consist of the following: 2004 and 2003 reversals of certain accruals related to the 2002, 2001 and 2000 restructuring plans; and 2002 charges of \$20.8 million related to the closure and consolidation of two U.S. and three European customer contact management centers, capacity reductions within the

**Table of Contents**

European fulfillment operations, the write-off of certain assets, lease termination and severance and related costs.

Impairment of long-lived assets charges of \$0.7 million in 2004 relate to certain property and equipment in Bangalore, India as a result of our plans to migrate the call volumes of the customer contact management services and related operations in India to other facilities in the Asia Pacific region in 2005. As a result of this plan of migration, the Company estimates that during the first quarter of 2005 it will incur charges of approximately \$0.3 million as a result of severance and related costs and \$0.3 million related to other exit costs. In connection with this migration, the Company expects to redeploy property and equipment located in India totaling approximately \$1.9 million to other more strategically-aligned offshore facilities in the Asia Pacific region. The total charges related to the plan of migration are anticipated to be approximately \$1.3 million. In 2002, impairment of long-lived assets charges of \$1.5 million include the write-off of certain intangible assets associated with a customer contact management agreement for which the level of call volumes fell below anticipated levels.

Other income (expense) consists primarily of interest income, net of interest expense, foreign currency transaction gains and losses, and a \$13.8 million charge for the uninsured portion of a litigation settlement and associated legal costs in September 2002. Foreign currency transaction gains and losses generally result from exchange rate fluctuations on intercompany transactions and the revaluation of cash and other current assets that are settled in a currency other than functional currency.

The Company's effective tax rate for the periods presented reflects the effects of foreign taxes, net of foreign income not taxed in the United States, and nondeductible expenses for income tax purposes.

**Table of Contents****Results of Operations**

The following table sets forth, for the periods indicated, the percentage of revenues represented by certain items reflected in our Statements of Operations:

	<b>Years Ended December 31,</b>		
	<b>2004</b>	<b>2003</b>	<b>2002</b>
<b>PERCENTAGES OF REVENUES:</b>

(2) *Includes litigation settlement of \$13.8 million in 2002.*

The following table summarizes our revenues, for the periods indicated, by geographic region (in thousands):

	<b>Years Ended December 31,</b>		
	<b>2004</b>	<b>2003</b>	<b>2002</b>
Revenues:			
Americas	<b>\$ 283,253</b>	\$ 321,195	\$ 299,185
EMEA	<b>183,460</b>	159,164	153,552
Consolidated	<b>\$ 466,713</b>	\$ 480,359	\$ 452,737

**Table of Contents****2004 Compared to 2003*****Revenues***

During 2004, we recognized consolidated revenues of \$466.7 million, a decrease of \$13.7 million or 2.9% from \$480.4 million of consolidated revenues for 2003.

On a geographic segmentation, revenues from the Americas region, including the United States, Canada, Latin America, India and the Asia Pacific Rim, represented 60.7%, or \$ 283.3 million for 2004 compared to 66.9%, or \$321.2 million for 2003. Revenues from the EMEA region, including Europe, the Middle East and Africa, represented 39.3 %, or \$ 183.4 million for 2004 compared to 33.1% or \$159.2 million for 2003.

The decrease in Americas revenue of \$ 37.9 million, or 11.8%, for 2004, compared to 2003, reflected the client-driven migration of call volumes from the United States to comparable or higher margin offshore operations, including Latin America and the Asia Pacific Rim, the resulting mix-shift in revenues from the United States to offshore (each offshore seat generates roughly half the revenue dollar equivalence of a U.S. seat) and the ramp down of a technology client late in the first quarter of 2003. In addition to the revenue mix-shift, the revenue decline reflected an overall reduction in U.S. customer call volumes primarily attributable to the decision by certain communications and technology clients to exit dial-up Internet service customer support programs in early 2004. This decrease was partially offset by an increase in revenues from our offshore operations, which represented 27.6% of consolidated revenues for 2004 compared to 16.9% for 2003. We expect this trend of generating more of our revenues from offshore operations to continue in 2005. We anticipate that as our offshore operations grow and become a larger percentage of revenues, the total revenue and revenue growth rate may decline since each offshore seat generates less average revenue per seat than in the United States. While the average offshore revenue per seat is less, the operating margins generated offshore are generally comparable or higher than those in the United States. However, our ability to maintain these offshore operating margins longer term is difficult to predict due to potential increased competition for the available workforce in offshore markets.

The increase in EMEA s revenue of \$24.2 million, or 15.3%, for 2004 was primarily related to the strengthening Euro, which positively impacted revenues for 2004 by approximately \$16.5 million compared to the Euro in 2003. Excluding this foreign currency benefit, EMEA s revenues would have increased \$7.7 million compared with last year reflecting an improvement in certain customer call volumes and higher incentive payments related to quality operating performance. However, the persistent economic sluggishness in our key European markets continues to present challenges for us. The increase in revenue in 2004, compared to the same period in 2003, also included the recognition of deferred revenues of \$0.8 million related to a former client.

***Direct Salaries and Related Costs***

Direct salaries and related costs decreased \$8.9 million or 2.9% to \$300.6 million for 2004, from \$309.5 million in 2003. Excluding the negative foreign currency impact of \$11.0 million related to the strengthening Euro in 2004 compared to the Euro in 2003, direct salaries and related costs decreased \$19.9 million compared with last year. This decrease was due to lower direct and indirect salaries and related benefits primarily attributable to an overall reduction in U.S. customer call volumes. This decrease was offset by 1) higher telephone costs related to transporting calls offshore, 2) higher staffing and training costs associated with the ramp-up offshore and certain duplicative costs as we simultaneously ramped-down U.S. customer contact management centers, 3) termination costs related to the consolidation of two European customer contact management centers and 4) higher claim costs associated with our automotive program in Canada related to higher fuel costs and the severe Canada winter. The migration offshore was substantially complete at the end of the third quarter of 2004. As a percentage of revenues, direct salaries and related costs was 64.4% in both 2004 and 2003.

***General and Administrative***

General and administrative expenses increased \$3.5 million or 2.2% to \$165.2 million for 2004, from \$161.7 million in 2003. Excluding the negative foreign currency impact of \$4.6 million related to the strengthening Euro in 2004 compared to the Euro in 2003, general and administrative expenses decreased \$1.1 million compared with last year. This decrease was principally attributable to a decrease in depreciation expense of \$1.0 million related to the 2003 expiration of two technology client contracts, lower insurance costs, technology related costs and bad debts. This decrease was partially offset by 1) higher compliance costs of \$3.3 million related to the Sarbanes-Oxley

Act, 2) compensation costs of \$1.7 million related to the former chairman's retirement and 3) lease and utilities costs

24

---

**Table of Contents**

associated with expansion of offshore facilities. As a percentage of revenues, general and administrative expenses increased to 35.4% in 2004 from 33.7% in 2003.

***Net Gain on Disposal of Property and Equipment***

The net gain on disposal of property and equipment of \$6.9 million for 2004 includes a \$2.8 million net gain on the sale of our Hays, Kansas facility, a \$2.7 million net gain on the sale of our Klamath Falls, Oregon facility, a \$0.1 million net gain on the sale of a parcel of land at our Pikeville, Kentucky facility and a \$1.5 million net gain on the sale of our Eveleth, Minnesota facility, offset by a \$0.2 million loss on disposal of property and equipment. This compares to a \$1.6 million net gain on disposal of property and equipment, which includes a \$1.9 million net gain on the sale of our Scottsbluff, Nebraska facility (closed in connection with the 2002 restructuring plan) and a \$0.2 million portion of the net gain related to the installment sale of our Eveleth, Minnesota facility offset by a \$0.5 million loss on disposal of property and equipment.

***Net Gain on Insurance Settlement***

In September 2004, the building and contents of our customer contact management center located in Marianna, Florida was severely damaged by Hurricane Ivan. Upon settlement with the insurer in December 2004, we recognized a net gain of \$5.4 million after write-off of the property and equipment, which had a net book value of \$3.4 million, net of the related deferred grants of \$2.2 million. We also received an insurance recovery for business interruption during 2004 and recognized \$0.1 million and \$0.2 million, respectively, as a reduction to Direct salaries and related costs and General and administrative costs in the accompanying Consolidated Statement of Operations for the year ended December 31, 2004. In December 2004, we reached an agreement with the City of Marianna to donate the underlying land to the city with \$0.1 million to assist with the site demolition and clean up of the property with no further obligation of the Company.

***Reversal of Restructuring and Other Charges***

In 2004, restructuring and other charges included a \$0.1 million reversal of certain charges related to the remaining lease termination and closure costs for two European customer contact management centers and one European fulfillment center.

In 2003, restructuring and other charges included a \$0.6 million reversal of certain charges related to the final termination settlements for the closure of two of our European customer contact management centers and one European fulfillment center, the remaining site closure costs for our Galashiels, Scotland print facility and our Scottsbluff, Nebraska facility, which were both sold in 2003, offset by additional accruals related to the final settlement of certain lease termination and site closure costs.

***Impairment of Long-Lived Assets***

During 2004, we recorded a charge for impairment of long-lived assets of \$0.7 million related to certain property and equipment in Bangalore, India as a result of our plans to migrate the call volumes of the customer contact management services and related operations in India to other facilities in the Asia Pacific region in 2005.

***Other Income and Expense***

Other income increased \$0.7 million to \$3.3 million for 2004, from \$2.6 million in 2003. This increase was primarily attributable to a \$0.4 million increase in interest earned on cash and cash equivalents, net of interest expense including \$0.8 million of interest received on a foreign income tax refund, and a \$0.6 million increase in other miscellaneous income offset by a \$0.3 million decrease in foreign currency translation gains, net of losses including \$0.7 million related to the liquidation of a foreign entity. Other income excludes the effects of cumulative translation effects included in Accumulated Other Comprehensive Loss in shareholders' equity in the accompanying Consolidated Balance Sheets.

***Provision (Benefit) for Income Taxes***

The 2004 provision for income taxes of \$5.1 million was based upon pre-tax book income of \$15.9 million, compared to the 2003 provision for income taxes of \$4.7 million based upon a pre-tax book income of \$14.0 million. The \$0.4 million change was primarily attributable to the \$1.9 million change in pre-tax book income.

**Table of Contents**

The effective tax rate was 31.8% for 2004 and 33.3% for 2003. This decrease in the effective tax rate resulted from a shift in our mix of earnings within tax jurisdictions and the related effects of permanent differences, state income taxes and foreign income tax rate differentials (including tax holiday jurisdictions) offset by a requisite valuation allowance for the year-to-date United States tax loss benefit provided during the second, third and fourth quarters of 2004 (partially reduced by the reversal of certain specific tax contingency reserves).

**Net Income (Loss)**

As a result of the foregoing, we reported income from operations for 2004 of \$12.6 million, an increase of \$1.2 million from 2003. This increase was principally attributable to an \$8.9 million decrease in direct salaries and related costs, a \$5.3 million increase in net gain on disposal of property and equipment and a \$5.4 million net gain on insurance settlement offset by a \$13.7 million decrease in revenues, a \$3.5 million increase in general and administrative costs, a \$0.7 million increase in impairment of long-lived assets and a \$0.5 million decrease in reversals of restructuring and other charges, as previously discussed. The \$1.2 million increase in income from operations and an increase in other income of \$0.7 million were offset by a \$0.4 million higher tax provision, resulting in net income of \$10.8 million for 2004, an increase of \$1.5 million compared to 2003.

**2003 Compared to 2002****Revenues**

During 2003, we recorded consolidated revenues of \$480.4 million, an increase of \$27.7 million or 6.1% from \$452.7 million of consolidated revenues for 2002.

On a geographic segmentation basis, revenues from the Americas region, including the United States, Canada, Latin America, India and the Asia Pacific Rim, represented 66.9%, or \$321.2 million for 2003 compared to 66.1%, or \$299.2 million for 2002. Revenues from the EMEA region, including Europe, the Middle East and Africa, represented 33.1%, or \$159.2 million for 2003 compared to 33.9% or \$153.5 million for 2002.

The increase in Americas revenue of \$22.0 million, or 7.4%, for 2003 was primarily attributable to an increase in revenues from our offshore operations, including Latin America, India and the Asia Pacific Rim, resulting from the continued acceleration in demand for a lower cost customer contact management solution as well as further diversification into new vertical markets. These offshore operations represented 16.9% of consolidated revenues for 2003 compared to 9.7% for 2002. We expect this trend of generating more of our revenues from offshore operations to continue into 2004. The increase in the Americas revenue was partially offset by the overall reduction in customer call volumes resulting from the economic downturn and the phasing out of two U.S. based original equipment manufacturer ( OEM ) technology clients. We anticipate that as our offshore operations grow and become a larger percentage of revenues, the total revenue and revenue growth rate may decline since the average revenue per seat generated offshore is less than it is in North America and Europe. While the average offshore revenue per seat is less, the operating margins generated offshore are generally comparable or higher than those in North America and Europe. However, our ability to maintain these offshore operating margins longer term is difficult to predict due to potential increased competition for the available workforce in offshore markets.

The increase in EMEA s revenue of \$5.7 million, or 3.7%, for 2003 was primarily related to the strengthening Euro, which positively impacted revenues for 2003 by approximately \$26.2 million compared to the Euro in 2002. Without this foreign currency benefit, EMEA s revenues would have declined \$20.5 million compared with last year due to the continued softness in customer call volumes resulting from the weak European economy.

**Direct Salaries and Related Costs**

Direct salaries and related costs increased \$22.4 million or 7.8% to \$309.5 million for 2003, from \$287.1 million in 2002. As a percentage of revenues, direct salaries and related costs increased to 64.4% in 2003 from 63.4% for 2002. This increase was primarily attributable to an increase in staffing and training costs associated with the ramp-up of new business in our offshore operations, lower call volumes in the United States and Europe and lower margin European centers that were closed in the first quarter of 2003 in connection with our 2002 restructuring plan. Although the strengthening Euro positively impacted revenues, it increased direct salaries and related costs for 2003 by approximately \$17.1 million compared to the Euro in 2002.

**Table of Contents****General and Administrative**

General and administrative expenses increased \$6.2 million or 4.0% to \$161.8 million for 2003, from \$155.6 million in 2002. As a percentage of revenues, general and administrative expenses decreased to 33.7% in 2003 from 34.4% in 2002. This decrease was principally attributable to lower depreciation and bad debt expense partially offset by higher insurance and compliance costs as well as higher lease, travel, training, utilities and maintenance costs associated with the expansion of offshore facilities and certain duplicative operating costs related to the call volumes migrating offshore. Similar to the negative effect on direct salaries and related costs, the strengthening Euro also increased general and administrative expenses for 2003 by approximately \$8.7 million compared to the Euro in 2002.

**Net Gain on Disposal of Property and Equipment**

The net gain on disposal of property and equipment of \$1.6 million for 2003 included a \$1.9 million net gain on the sale of our Scottsbluff, Nebraska facility (which was closed in connection with the 2002 restructuring plan) and a \$0.2 million portion of the net gain related to the installment sale of our Eveleth, Minnesota facility offset by a \$0.5 million loss on disposal of property and equipment. This compares to a \$1.0 million net gain on disposal of property and equipment for 2002, which included a \$1.8 million net gain on the sale of one of our Bismarck, North Dakota facilities offset by a \$0.2 million net loss on the sale of certain assets of the print facility in Galashiels, Scotland and a \$0.6 million loss on disposal of property and equipment.

**Restructuring and Other Charges (Reversals)**

In 2003, restructuring and other charges included a \$0.6 million reversal of certain charges related to the final termination settlements for the closure of two of our European customer contact management centers and one European fulfillment center, the remaining site closure costs for our Galashiels, Scotland print facility and our Scottsbluff, Nebraska facility, which were both sold in 2003, offset by additional accruals related to the final settlement of certain lease termination and site closure costs.

In 2002, restructuring and other charges included a \$20.8 million charge related to the write-off of certain assets, lease terminations and severance costs, related to the closure and consolidation of two U.S. and three European customer contact management centers, capacity reductions within the European fulfillment operations and the elimination of specialized e-commerce assets primarily in response to the October 2002 notification of the contractual expiration of two technology client programs in March 2003 with approximate annual revenues of \$25.0 million. The restructuring plan was designed to reduce costs and bring our infrastructure in-line with the current business environment.

**Impairment of Long-Lived Assets**

During 2002, we recorded a charge for impairment of long-lived assets of \$1.5 million related to the write-off of certain intangible assets associated with a customer contact management agreement for which the level of call volumes fell below anticipated levels.

**Other Income and Expense**

Other income was \$2.6 million for 2003, compared to other expense of \$13.2 million for 2002. This change of \$15.8 million was primarily attributable to a \$13.8 million charge for the uninsured portion of a class action settlement in 2002, a \$0.8 million increase in interest earned on cash and cash equivalents net of interest expense and a \$1.2 increase in foreign currency translation gains net of losses and other miscellaneous income.

**Provision (Benefit) for Income Taxes**

The 2003 tax provision of \$4.7 million was based upon pre-tax book income of \$14.0 million, whereas the 2002 tax benefit of \$5.8 million was based upon a pretax book loss of \$24.4 million. The \$10.5 million change was primarily attributable to the \$38.4 million change in pre-tax book income. The increase in the effective tax rate for 2003 resulted from a shift in our mix of earnings within tax jurisdictions and the related effects of permanent differences, state income taxes, varying foreign income tax rates (including tax holiday jurisdictions) and requisite valuation allowances.

**Table of Contents**

**Net Income (Loss)**

As a result of the foregoing, income from operations for 2003 was \$11.4 million, an increase of \$22.6 million from 2002. As previously discussed, this increase was principally attributable to a \$27.7 million increase in revenues, a \$0.6 million increase in net gain on disposal of property and equipment, a \$21.4 million decrease in restructuring and other charges and a \$1.5 million decrease in impairment of long-lived assets offset by a \$22.4 million increase in direct salaries and related costs and a \$6.2 million increase in general and administrative costs. The \$22.6 million increase in income from operations and an increase in other income of \$15.8 million were offset by a \$10.5 million higher tax provision resulting in net income of \$9.3 million for 2003, an increase of \$27.9 million compared to 2002.

**Table of Contents****Quarterly Results**

The following information presents our unaudited quarterly operating results for 2004 and 2003. The data has been prepared on a basis consistent with the Consolidated Financial Statements, as restated, included elsewhere in this Form 10-K/A, and include all adjustments, consisting of normal recurring accruals that we consider necessary for a fair presentation thereof.

(1) *The quarter ended September 30, 2004 includes a \$2.3 million estimated compensation accrual related to the Chairman's retirement and the quarter ended December 31, 2004 includes a \$0.6 million reversal of part of this accrual related to life insurance premiums to be paid directly to the insurer over the policy period rather than to the insured in a lump sum.*

(2) *The quarters ended December 31, 2003 and September 30, 2003 include a net gain of \$0.2 million and \$1.9 million*

*related to the partial recognition of the sale of the Eveleth, Minnesota and Scottsbluff, Nebraska facilities, respectively. In addition, the quarters ended September 30, 2004, June 30, 2004 and March 31, 2004 include a net gain of \$2.8 million related to the sale of the Hays, Kansas facility, \$1.6 million related to the sales of the Eveleth, Minnesota facility and the parcel of land at our Pikeville, Kentucky facility; and \$2.7 million related to the sale of the Klamath Falls, Oregon facility, respectively.*

- (3) *The Net (gain) loss on disposal of property and equipment of \$0.1 million and \$0.1 million were previously reported in Other income (expense) in our quarterly*

*reports on Form 10-Q for the quarters ended June 30, 2003 and March 31, 2003, respectively.*

*(4) The quarter ended December 31, 2004 includes a net gain on insurance settlement of \$5.4 million.*

*(5) The quarters ended December 31, 2004, December 31, 2003 and September 30, 2003 include reversals of restructuring and other charges of \$0.1 million, \$0.4 million and \$0.2 million, respectively.*

*(6) The quarter ended December 31, 2004 includes a \$0.7 million charge associated with the impairment of long-lived assets.*

*(7) Net income (loss) per basic and diluted share are computed independently*

*for each of the  
quarters  
presented and  
therefore may  
not sum to the  
total for the  
year.*

**Table of Contents****Liquidity and Capital Resources**

Our primary sources of liquidity are generally cash flows generated by operating activities and from available borrowings under our revolving credit facilities. We utilize these capital resources to make capital expenditures associated primarily with our customer contact management services, invest in technology applications and tools to further develop our service offerings and for working capital and other general corporate purposes, including repurchase of our common stock in the open market and to fund possible acquisitions. In future periods, we intend similar uses of these funds.

On August 5, 2002, the Company's Board of Directors authorized the Company to purchase up to three million shares of its outstanding common stock. A total of 1.6 million shares have been repurchased under this program since inception. The shares are purchased, from time to time, through open market purchases or in negotiated private transactions, and the purchases are based on factors, including but not limited to, the stock price and general market conditions. For the year ended December 31, 2004, the Company had repurchased approximately 1.1 million common shares under the 2002 repurchase program at prices ranging between \$5.55 and \$7.58 per share for a total cost of \$7.1 million.

During the year ended December 31, 2004, we generated \$13.7 million in cash from operating activities and received \$0.4 million in cash from issuance of stock, \$9.8 million in cash from the sale of facilities, property and equipment and \$6.9 million in cash from an insurance settlement and insurance payment for business interruption. Further, we used \$25.7 million in funds for capital expenditures and \$7.1 million to repurchase stock in the open market resulting in a \$1.8 million increase in available cash (including the favorable effects of international currency exchange rates on cash of \$3.8 million).

Net cash flows provided by operating activities for the year ended December 31, 2004 were \$13.7 million, compared to net cash flows provided by operating activities of \$34.2 million for the year ended December 31, 2003. The \$20.5 million decrease in net cash flows from operating activities was due to a net decrease in non-cash reconciling items of \$7.0 million such as deferred income taxes, net gain on disposal of property and equipment, gain on a property insurance settlement and foreign exchange gain, a net change in assets and liabilities of \$15.0 million, offset by an increase in net income of \$1.5 million. This \$15.0 million net change in assets and liabilities was principally a result of a \$5.8 million increase in receivables, a \$7.6 million decrease in income taxes payable and \$4.7 million decrease in deferred revenue and other liabilities offset by a \$3.1 million increase in other assets.

Capital expenditures, which are generally funded by cash generated from operating activities and borrowings available under our credit facilities, were \$25.7 million for the year ended December 31, 2004, compared to \$29.3 million for the year ended December 31, 2003, a decrease of \$3.6 million, which was driven primarily by declining investments in offshore facilities. During the year ended December 31, 2004, approximately 93% of the capital expenditures were the result of investing in new and existing customer contact management centers, primarily offshore, and 7% was expended primarily for maintenance and systems infrastructure. In 2005, we anticipate capital expenditures in the range of \$10.0 million to \$15.0 million.

One primary source of future cash flows from financing activities is from borrowings under our \$50.0 million revolving credit facility (the Credit Facility), which amount is subject to certain borrowing limitations. Pursuant to the terms of the Credit Facility, the amount of \$50.0 million may be increased up to a maximum of \$100.0 million with the prior written consent of the lenders. The \$50.0 million Credit Facility includes a \$10.0 million swingline subfacility, a \$15.0 million letter of credit subfacility and a \$40.0 million multi-currency subfacility.

The Credit Facility, which includes certain financial covenants, may be used for general corporate purposes including acquisitions, share repurchases, working capital support, and letters of credit, subject to certain limitations. The Credit Facility, including the multi-currency subfacility, accrues interest, at our option, at (a) the Base Rate (defined as the higher of the lender's prime rate or the Federal Funds rate plus 0.50%) plus an applicable margin up to 0.50%, or (b) the London Interbank Offered Rate (LIBOR) plus an applicable margin up to 2.25%. Borrowings under the swingline subfacility accrue interest at the prime rate plus an applicable margin up to 0.50% and borrowings under the letter of credit subfacility accrue interest at the LIBOR plus an applicable margin up to 2.25%. In addition, a commitment fee of up to 0.50% is charged on the unused portion of the Credit Facility on a quarterly basis. The borrowings under the Credit Facility, which will terminate on March 14, 2007, are secured by a pledge of 65% of the

stock of each of our direct foreign subsidiaries. The Credit Facility prohibits us from incurring additional indebtedness, subject to certain specific exclusions. There were no borrowings in 2004 and no outstanding balances

**Table of Contents**

as of December 31, 2004 with \$50.0 million availability under the Credit Facility. At December 31, 2004, we were in compliance with all loan requirements of the Credit Facility.

At December 31, 2004, we had \$93.9 million in cash, of which approximately \$79.0 million was held in international operations and may be subject to additional taxes if repatriated to the United States. On October 22, 2004 the President signed the American Jobs Creation Act of 2004 (the Act). The Act creates a temporary incentive for U.S. corporations to repatriate accumulated income earned abroad by providing an 85 percent dividends received deduction for certain dividends from controlled foreign corporations. The deduction is subject to a number of limitations and, as of today, uncertainty remains as to how to interpret numerous provisions in the Act. As such, we are not yet in a position to decide on whether, and to what extent, we might repatriate foreign earnings that have not yet been remitted to the U.S. Based on our analysis to date, however, it is reasonably possible that we may repatriate some amount up to \$50.0 million. The related range of income tax effects of such repatriation cannot reasonably be estimated. We expect to be in a position to finalize our assessment by December 31, 2005.

We believe that our current cash levels, accessible funds under our credit facilities and cash flows from future operations will be adequate to meet anticipated working capital needs, future debt repayment requirements (if any), continued expansion objectives, anticipated levels of capital expenditures for the foreseeable future and stock repurchases.

***Off-Balance Sheet Arrangements and Other***

At December 31, 2004, we did not have any material commercial commitments, including guarantees or standby repurchase obligations, or any relationships with unconsolidated entities or financial partnerships, including entities often referred to as structured finance or special purpose entities or variable interest entities, which would have been established for the purpose of facilitating off-balance sheet arrangements or other contractually narrow or limited purposes.

From time to time, during the normal course of business, we may make certain indemnities, commitments and guarantees under which we may be required to make payments in relation to certain transactions. These include: (i) indemnities to vendors and service providers pertaining to claims based on our negligence or willful misconduct and (ii) indemnities involving the accuracy of representations and warranties in certain contracts. In addition, we have agreements whereby we indemnify certain officers and directors for certain events or occurrences while the officer or director is, or was, serving at our request in such capacity. The indemnification period covers all pertinent events and occurrences during the officer's or director's lifetime. The maximum potential amount of future payments we could be required to make under these indemnification agreements is unlimited; however, we have director and officer insurance coverage that limits our exposure and enables us to recover a portion of any future amounts paid. We believe the applicable insurance coverage is generally adequate to cover any estimated potential liability under these indemnification agreements. The majority of these indemnities, commitments and guarantees do not provide for any limitation of the maximum potential for future payments we could be obligated to make. We have not recorded any liability for these indemnities, commitments and other guarantees in the accompanying Consolidated Balance Sheets.

**Table of Contents****Contractual Obligations**

The following table summarizes our contractual cash obligations at December 31, 2004, and the effect these obligations are expected to have on liquidity and cash flow in future periods (in thousands):

	<b>Total</b>	<b>Payments Due By Period</b>			
		<b>Less Than 1 Year</b>	<b>1 3 Years</b>	<b>4 5 Years</b>	<b>After 5 Years</b>
Operating leases <sup>(1)</sup>	\$ 51,546	\$ 14,375	\$ 14,271	\$ 7,331	\$ 15,569
Accrued restructuring charges <sup>(2)</sup>	478	478			
Purchase obligations <sup>(3)</sup>	26,819	14,315	12,504		
Other long-term liabilities <sup>(4)</sup>	21	21			
<b>Total contractual cash obligations</b>	<b>\$ 78,864</b>	<b>\$ 29,189</b>	<b>\$ 26,775</b>	<b>\$ 7,331</b>	<b>\$ 15,569</b>

(1) Amounts represent the expected cash payments of our operating leases as discussed in Note 18 to the Consolidated Financial Statements.

(2) Amounts represent the expected cash payments in connection with the 2002 and 2000 restructuring plans as discussed in Note 16 to the Consolidated Financial Statements.

(3) Purchase obligations include agreements to purchase goods or services that

*are enforceable and legally binding on us and that specify all significant terms, including: fixed or minimum quantities to be purchased; fixed, minimum or variable price provisions; and the approximate timing of the transaction. Purchase obligations exclude agreements that are cancelable without penalty.*

- (4) *Other long-term liabilities, which exclude deferred income taxes, represent the expected cash payments due minority shareholders of certain subsidiaries and others.*

#### **Critical Accounting Policies and Estimates**

The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires estimations and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. These estimates and assumptions are based on historical experience and various other factors that are believed to be reasonable under the circumstances. Actual results could differ from these estimates under different assumptions or conditions.

We believe the following accounting policies are the most critical since these policies require significant judgment or involve complex estimations that are important to the portrayal of our financial condition and operating results:

We recognize revenue pursuant to applicable accounting standards, including SEC Staff Accounting Bulletin ( SAB ) No. 101 (SAB 101), *Revenue Recognition in Financial Statements*, SAB 104, *Revenue Recognition* and the Emerging Issues Task force ( EITF ) No. 00-21, *Revenue Arrangements with Multiple Deliverables*. SAB 101, as amended, and SAB 104 summarize certain of the SEC staff's views in applying generally accepted accounting principles to revenue recognition in financial statements and provides guidance on revenue recognition issues in the absence of authoritative literature addressing a specific arrangement or a specific industry. EITF No. 00-21 provides

further guidance on how to account for multiple element contracts.

We recognize revenue from services as the services are performed under a fully executed contractual agreement and record estimated reductions to revenue for penalties and holdbacks for failure to meet specified minimum service levels and other performance based contingencies. Royalty revenue is recognized at the time royalties are earned and the remaining revenue is recognized on fixed price contracts using the percentage-of-completion method of accounting, which relies on estimates of total expected revenue and related costs. Revisions to these estimates, which could result in adjustments to fixed price contracts and estimated losses, are recorded in the period when such adjustments or losses are known. Product sales are recognized upon shipment to the customer and satisfaction of all obligations.

We recognize revenue from licenses of our software products and rights when the agreement has been executed, the product or right has been delivered or provided, collectibility is probable and the software license fees or

**Table of Contents**

rights are fixed and determinable. If any portion of the license fees or rights is subject to forfeiture, refund or other contractual contingencies, we postpone revenue recognition until these contingencies have been removed. Revenue from support and maintenance activities is recognized ratably over the term of the maintenance period and the unrecognized portion is recorded as deferred revenue.

Certain contracts to sell our products and services contain multiple elements or non-standard terms and conditions. As a result, we evaluate each contract and a thorough contract interpretation is sometimes required to determine the appropriate accounting, including whether the deliverables specified in a multiple element arrangement should be treated as separate units of accounting for revenue recognition purposes, and if so, how the price should be allocated among the deliverable elements and the timing of revenue recognition for each element. We recognize revenue for delivered elements only when the fair values of undelivered elements are known, uncertainties regarding client acceptance are resolved, and there are no client-negotiated refund or return rights affecting the revenue recognized for delivered elements. Changes in the allocation of the sales price between deliverable elements might impact the timing of revenue recognition, but would not change the total revenue recognized on the contract.

We recognize revenue associated with the grants of land and the cash grants for the acquisition of property, buildings and equipment for customer contact management centers over the corresponding useful lives of the related assets. Should the useful lives of these assets change for reasons such as the sale or disposal of the property, the amount of revenue recognized would be adjusted accordingly. Deferred grants totaled \$20.6 million as of December 31, 2004. Of the \$20.6 million, \$6.7 million is classified as current and the remaining \$13.9 million is classified as non-current. Income from operations included amortization of the deferred grants of \$2.1 million for the year ended December 31, 2004.

We maintain allowances for doubtful accounts of \$4.3 million as of December 31, 2004, or 4.8% of receivables, for estimated losses arising from the inability of our customers to make required payments. If the financial condition of our customers were to deteriorate, resulting in a reduced ability to make payments, additional allowances may be required which would reduce income from operations.

As of December 31, 2004, we had net deferred tax assets of \$16.1 million, which is net of a valuation allowance of \$30.4 million. We maintain a valuation allowance to reduce our deferred tax assets to the amount that is more likely than not to be realized. Deferred tax assets are reduced by a valuation allowance if, based on the weight of available evidence, both positive and negative, for each respective tax jurisdiction, it is more likely than not that some portion or all of such deferred tax assets will not be realized. Available evidence which is considered in determining the amount of valuation allowance required includes, but is not limited to, our estimate of future taxable income and any applicable tax-planning strategies. As of December 31, 2004, we determined the valuation allowance of \$30.4 million was necessary to reduce foreign deferred tax assets approximately \$20.0 million and US deferred tax assets approximately \$10.4 million, where it was more likely than not that some portion or all of such deferred tax assets will not be realized. The recoverability of the remaining net deferred tax assets of \$16.1 million is dependent upon future profitability within each tax jurisdiction. As of December 31, 2004, based on our estimates of future taxable income and any applicable tax-planning strategies within these tax jurisdictions, we believe that it is more likely than not that all of these deferred tax assets will be realized. (See Note 14 in the accompanying Consolidated Financial Statements).

We hold a 6.5% ownership interest in SHPS, Incorporated which is accounted for at cost of approximately \$2.1 million as of December 31, 2004. We will record an impairment charge or loss if we believe the investment has experienced a decline in value that is other than temporary. Future adverse changes in market conditions or poor operating results of the underlying investment could result in losses or an inability to recover the carrying value of the investment and, therefore, might require an impairment charge in the future.

We review long-lived assets, which had a carrying value of \$88.1 million as of December 31, 2004, including goodwill and property and equipment, for impairment whenever events or changes in circumstances indicate that the carrying value of an asset may not be recoverable and at least annually for impairment testing of goodwill. An asset is considered to be impaired when the carrying amount exceeds the fair value. Upon determination that the carrying value of the asset is impaired, we would record an impairment charge or loss to reduce the asset to its fair value. Future adverse changes in market conditions or poor operating results of the underlying investment could result in losses or an inability to recover the carrying value of the investment and, therefore, might require an impairment charge in the future.

Self-insurance related liabilities of \$1.7 million as of December 31, 2004 include estimates for, among other things, projected settlements for known and anticipated claims for worker's compensation and employee health

**Table of Contents**

insurance. Key variables in determining such estimates include past claims history, number of covered employees and projected future claims. We periodically evaluate and, if necessary, adjust the estimates based on information currently available. Revisions to these estimates, which could result in adjustments to the liability and additional charges, would be recorded in the period when such adjustments or charges are known.

**Recent Accounting Pronouncements**

In December 2004, the Financial Accounting Standards Board ( FASB ) issued SFAS No. 123R, *Share-Based Payment* ( SFAS No. 123R ), which requires, among other things, that all share-based payments to employees, including grants of stock options, be measured at their grant-date fair value and expensed in the consolidated financial statements. The accounting provisions of SFAS No. 123R are effective for reporting periods beginning after June 15, 2005; therefore, we are required to adopt SFAS No. 123R in the third quarter of 2005. The pro forma disclosures previously permitted under SFAS No. 123 will no longer be an alternative to financial statement recognition. See *Stock-Based Compensation* in Note 1 to the accompanying Consolidated Financial Statements for the pro forma net income (loss) and net income (loss) per share amounts for 2002 through 2004, as if the fair-value-based method had been used, similar to the methods required under SFAS No. 123R to measure compensation expense for employee stock awards. We have not yet determined whether the adoption of SFAS No. 123R will result in amounts that are materially different from those currently provided under the pro forma disclosures under SFAS No. 123 in Note 1 to the accompanying Consolidated Financial Statements. The adoption of SFAS No. 123R is not expected to have a material effect on our financial condition, results of operations, or cash flows.

In June 2004, the EITF reached a consensus on Issue No. 02-14, *Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock*. EITF 02-14 addresses whether the equity method of accounting should be applied to investments when an investor does not have an investment in voting common stock of an investee but exercises significant influence through other means. EITF 02-14 states that an investor should only apply the equity method of accounting when it has investments in either common stock or in-substance common stock of a corporation, provided that the investor has the ability to exercise significant influence over the operating and financial policies of the investee. The effective date of EITF 02-14 is the first reporting period beginning after September 15, 2004. The adoption of EITF No. 02-14 did not have a material impact on our financial condition, results of operations or cash flows.

In March 2004, the EITF reached a consensus on Issue No. 03-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*. EITF 03-1 provides guidance on other-than-temporary impairment evaluations for securities accounted for under SFAS No. 115, *Accounting for Certain Investments in Debt and Equity Securities*, and SFAS No. 124, *Accounting for Certain Investments Held by Not-for-Profit Organizations*, and non-marketable equity securities accounted for under the cost method. The EITF developed a basic three-step test to evaluate whether an investment is other-than-temporarily impaired. In September 2004, the FASB delayed the effective date of the recognition and measurement provisions of EITF No. 03-1. However, the disclosure provisions remain effective for fiscal years ending after June 15, 2004. The adoption of the recognition and measurement provisions of EITF No. 03-1 is not expected to have a material impact on our financial condition, results of operations or cash flows.

In January 2003, the FASB issued FIN No. 46, *Consolidation of Variable Interest Entities*, and a revised interpretation of FIN No. 46 (FIN No. 46-R) in December 2003, in an effort to expand upon existing accounting guidance that addresses when a company should consolidate the financial results of another entity. FIN No. 46 requires variable interest entities, as defined, to be consolidated by a company if that company is subject to a majority of expected losses of the entity or is entitled to receive a majority of expected residual returns of the entity, or both. A company that is required to consolidate a variable interest entity is referred to as the entity's primary beneficiary. The interpretation also requires certain disclosures about variable interest entities that a company is not required to consolidate, but in which it has a significant variable interest.

The consolidation and disclosure requirements apply immediately to variable interest entities created after January 31, 2003. We are not the primary beneficiary of any variable interest entity created after January 31, 2003 nor do we have a significant variable interest in a variable interest entity created after January 31, 2003.

For variable interest entities that existed before February 1, 2003, the consolidation requirements of FIN No. 46-R are effective as of March 31, 2004. The adoption of FIN No. 46-R did not have a material impact on our financial

condition, results of operations or cash flows.

**Table of Contents**

In December 2004, the FASB issued FASB Staff Position No. FAS 109-1 ( FAS 109-1 ), Application of FASB Statement No. 109, *Accounting for Income Taxes*, to the Tax Deduction on Qualified Production Activities Provided by the American Jobs Creation Act of 2004. The Act introduces a special 9% tax deduction on qualified production activities. FAS 109-1 clarifies that this tax deduction should be accounted for as a special tax deduction in accordance with SFAS No. 109. The adoption of these new tax provisions is not expected to have a material impact on our financial condition, results of operations or cash flows.

In December 2004, the FASB issued FASB Staff Position No. FAS 109-2 ( FAS 109-2 ), *Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creations Act of 2004*. The Act introduces a limited time 85% dividends received deduction on the repatriation of certain foreign earnings to a U.S. taxpayer (repatriation provision), provided certain criteria are met. FAS 109-2 provides accounting and disclosure guidance for the repatriation provision. Although FAS 109-2 is effective immediately, we do not expect to be able to complete the evaluation of the repatriation provision until after Congress or the Treasury Department provides additional clarifying language on key elements of the provision. In January 2005, the Treasury Department began to issue the first of a series of clarifying guidance documents related to this provision. The range of possible amounts that we are considering for repatriation under this provision is between zero and \$50.0 million. The related range of income tax effects of such repatriation cannot reasonably be estimated. We expect to complete an evaluation of the effects of the repatriation provision by the end of 2005.

**Item 7A. Quantitative and Qualitative Disclosures About Market Risk****Foreign Currency and Interest Rate Risk**

Our earnings and cash flows are subject to fluctuations due to changes in non-U.S. currency exchange rates. We are exposed to non-U.S. exchange rate fluctuations as the financial results of non-U.S. subsidiaries are translated into U.S. dollars in consolidation. As exchange rates vary, those results, when translated, may vary from expectations and adversely impact overall expected profitability. The cumulative translation effects for subsidiaries using functional currencies other than the U.S. dollar are included in accumulated other comprehensive loss in shareholders' equity. Movements in non-U.S. currency exchange rates may affect our competitive position, as exchange rate changes may affect business practices and/or pricing strategies of non-U.S. based competitors. Periodically, we use foreign currency forward contracts to hedge intercompany receivables and payables, and transactions initiated in the United States that are denominated in foreign currency. The principal foreign currency hedged is the Euro using foreign currency forward contracts ranging in periods from one to three months. Foreign exchange forward contracts are accounted for on a mark-to-market basis, with realized and unrealized gains or losses recognized in the current period, as we do not designate our foreign exchange forward contracts as accounting hedges. Unrealized and realized gains or losses related to foreign exchange forward contracts for the years ended December 31, 2004, 2003 and 2002 were immaterial.

Our exposure to interest rate risk results from variable debt outstanding under our revolving credit facility. Based on our level of variable rate debt outstanding during the year ended December 31, 2004, a one-point increase in the weighted average interest rate, which generally equals the LIBOR rate plus an applicable margin, would not have had a material impact on our annual interest expense.

At December 31, 2004, we had no debt outstanding at variable interest rates. We have not historically used derivative instruments to manage exposure to changes in interest rates.

**Item 8. Financial Statements and Supplementary Data**

The financial statements and supplementary data required by this item are located beginning on page 50 and page 29 of this report, respectively.

**Item 9. Changes in and Disagreements with Accountants on Accounting and Financial Disclosures**

None.

**Table of Contents**

**Item 9A. Controls and Procedures**

**Disclosure Controls and Procedures**

As of December 31, 2004, under the direction of our Chief Executive Officer and Chief Financial Officer, we evaluated the effectiveness of the design and operation of our disclosure controls and procedures, as defined in Rule 13a-15(e) under the Securities Exchange Act of 1934, as amended. Our disclosure controls and procedures are designed to provide reasonable assurance that the information required to be disclosed in our SEC reports is recorded, processed, summarized and reported within the time periods specified by the SEC's rules and forms, and is accumulated and communicated to management, including our Chief Executive Officer and Chief Financial Officer, as appropriate to allow timely decisions regarding required disclosure. The Company's evaluation of the effectiveness of the design and operation of disclosure controls and procedures, including the identification of a material weakness in the Company's internal control over financial reporting, lead the Company to conclude that as of December 31, 2004, our disclosure controls and procedures were not effective at the reasonable assurance level.

**Management's Report On Internal Control Over Financial Reporting (as revised)**

Management of the Company is responsible for establishing and maintaining adequate internal control over financial reporting (as defined in Rule 13a-15(f) under the Securities Exchange Act of 1934, as amended). Because of its inherent limitations, internal control over financial reporting may not prevent or detect misstatements. Projections of any evaluation of effectiveness to future periods are subject to the risk that controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In the Company's 2004 annual report on Form 10-K, filed on March 23, 2005, management of the Company included Management's Report on Internal Control Over Financial Reporting, which expressed a conclusion by management that as of December 31, 2004, the Company's internal control over financial reporting was effective. As a result of the restatement of its financial statements, as described further in Note 2 to the consolidated financial statements, management has concluded that a material weakness in internal control over financial reporting existed as of December 31, 2004 and, accordingly, has revised its assessment of the effectiveness of the Company's internal control over financial reporting as of December 31, 2004.

A material weakness is a control deficiency, or a combination of control deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. Due to the circumstances described in Note 2 to the consolidated financial statements, management has concluded that a material weakness existed in the Company's design of the existing controls as of December 31, 2004 as defined under standards established by the Public Company Accounting Oversight Board. Specifically, the material weakness related to the Company's design of controls surrounding the review of non-U.S. non-routine contracts to ensure that such contracts are recorded in accordance with generally accepted accounting principles in the United States. In making this assessment, the Company used the criteria established in Internal Control-Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. As a result of this identified material weakness, an error in accounting for the classification of deferred revenue, as more fully explained in Note 2 to the Consolidated Financial Statements, as of December 31, 2004 occurred and was not detected by the Company. As a result, we performed additional reviews and analysis to ensure the consolidated financial statements are prepared in accordance with generally accepted accounting principles. Accordingly, we believe that the consolidated financial statements included in this report fairly present in all material respects our financial condition, results of operations and cash flows for the periods presented.

We determined that, because of the material weakness described above, as of December 31, 2004, the Company's internal control over financial reporting was not effective, solely as a result of the material weakness described above.

Our independent registered public accounting firm has issued its attestation report on our revised assessment of our internal control over financial reporting.

**Changes In Internal Control Over Financial Reporting**

There were no significant changes in our internal controls over financial reporting during the quarter ended December 31, 2004 that have materially affected, or are reasonably likely to materially affect, our internal

**Table of Contents**

controls over financial reporting. As previously described, in 2005, the Company identified a material weakness in the Company's internal control over financial reporting and, as described below, the Company will make changes to its internal control over financial reporting during the fourth quarter of 2005 that are intended to remediate such weakness, including the establishment of additional controls to improve the design of internal controls with respect to accounting for non-U.S. non-routine contracts.

Specifically, the proposed changes will include a more formal process to document and review the terms and conditions of all significant contracts, including non-U.S. non-routine contracts, to ensure that such contracts are recorded in accordance with accounting principles generally accepted in the United States. This process will be completed at the inception of the contract and monitored during the term of the contract to ensure all and any changes to the contract are accounted for appropriately.

Management believes that this change in the design of internal controls will strengthen our disclosure controls and procedures, as well as our internal control over financial reporting, and will remediate the material weakness that the Company identified in its internal control over financial reporting as of December 31, 2004. We have discussed this material weakness and our remediation program with our Audit Committee.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Shareholders

Sykes Enterprises, Incorporated

Tampa, Florida

We have audited management's assessment, included in the accompanying Management's Report on Internal Control over Financial Reporting (as revised), as included in Item 9A, *Controls and Procedures*, that Sykes Enterprises, Incorporated and subsidiaries (the Company) did not maintain effective internal control over financial reporting as of December 31, 2004, because of the effect of the material weakness identified in management's assessment based on criteria established in *Internal Control - Integrated Framework* issued by the Committee of Sponsoring Organizations of the Treadway Commission. The Company's management is responsible for maintaining effective internal control over financial reporting and for its assessment of the effectiveness of internal control over financial reporting. Our responsibility is to express an opinion on management's assessment and an opinion on the effectiveness of the Company's internal control over financial reporting based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether effective internal control over financial reporting was maintained in all material respects. Our audit included obtaining an understanding of internal control over financial reporting, evaluating management's assessment, testing and evaluating the design and operating effectiveness of internal control, and performing such other procedures as we considered necessary in the circumstances. We believe that our audit provides a reasonable basis for our opinions. A company's internal control over financial reporting is a process designed by, or under the supervision of, the company's principal executive and principal financial officers, or persons performing similar functions, and effected by the company's Board of Directors, management, and other personnel to provide reasonable assurance regarding the reliability of financial reporting and the preparation of financial statements for external purposes in accordance with generally accepted accounting principles. A company's internal control over financial reporting includes those policies and procedures that (1) pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of the assets of the company; (2) provide reasonable assurance that transactions are recorded as necessary to permit preparation of financial statements in accordance with generally accepted accounting principles, and that receipts and expenditures of the company are being made only in accordance with authorizations of management and directors of the company; and (3) provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use, or disposition of the company's assets that could have a material effect on the financial statements.

Because of the inherent limitations of internal control over financial reporting, including the possibility of collusion or improper management override of controls, material misstatements due to error or fraud may not be prevented or detected on a timely basis. Also, projections of any evaluation of the effectiveness of the internal control over financial reporting to future periods are subject to the risk that the controls may become inadequate because of changes in conditions, or that the degree of compliance with the policies or procedures may deteriorate.

In our report dated March 22, 2005, we expressed an unqualified opinion on management's assessment that the Company maintained effective internal control over financial reporting and an unqualified opinion on the effectiveness of internal control over financial reporting. As described in the following paragraph, the Company subsequently identified material misstatements in its 2004 annual and interim financial statements, which caused such annual and interim financial statements to be restated. Management subsequently revised its assessment due to the identification of a material weakness, described in the following paragraph, in connection with the financial statement restatement. Accordingly, our opinion on the effectiveness of the Company's internal control over financial reporting as of December 31, 2004 expressed herein is different from that expressed in our previous report.

A material weakness is a significant deficiency, or combination of significant deficiencies, that results in more than a remote likelihood that a material misstatement of the annual or interim financial statements will not be prevented or detected. The following material weakness has been identified and included in management's revised assessment: The Company did not adequately design controls surrounding the review of non-U.S. non-routine contracts to provide reasonable assurance that such contracts are recorded in accordance with accounting principles generally accepted in

the United States. This material weakness resulted in the restatement of the Company's previously issued annual and interim financial statements as described more fully in Note 2 to the consolidated financial statements. This material weakness was considered in determining the nature, timing, and extent of audit tests

**Table of Contents**

applied in our audit of the consolidated financial statements as of and for the year ended December 31, 2004, of the Company and this report does not affect our report on such restated financial statements.

In our opinion, management's revised assessment that the Company did not maintain effective internal control over financial reporting as of December 31, 2004, is fairly stated, in all material respects, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission. Also in our opinion, because of the effect of the material weakness described above on the achievement of the objectives of the control criteria, the Company has not maintained effective internal control over financial reporting as of December 31, 2004, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission.

We do not express an opinion or any other form of assurance on management's statements regarding the remediation of the material weakness included in paragraph three of Management's Report on Internal Control over Financial Reporting (as revised).

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated financial statements and financial statement schedule as of and for the year ended December 31, 2004 of the Company and our report dated March 22, 2005 (December 19, 2005 as to the effects of the restatement described in Note 2 to the financial statements) expresses an unqualified opinion on those financial statements and financial statement schedule and includes an explanatory paragraph relating to the restatement described in Note 2 to the financial statements.

**REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM**

Board of Directors and Shareholders

Sykes Enterprises, Incorporated

Tampa, Florida

We have audited the accompanying consolidated balance sheets of Sykes Enterprises, Incorporated and subsidiaries (the Company) as of December 31, 2004 and 2003, and the related consolidated statements of operations, changes in shareholders' equity, and cash flows for each of the three years in the period ended December 31, 2004. Our audits also included the financial statement schedule listed in the Index at Item 15. These financial statements and financial statement schedule are the responsibility of the Company's management. Our responsibility is to express an opinion on the financial statements and financial statement schedule based on our audits.

We conducted our audits in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, such consolidated financial statements present fairly, in all material respects, the financial position of Sykes Enterprises, Incorporated and subsidiaries as of December 31, 2004 and 2003, and the results of their operations and their cash flows for each of the three years in the period ended December 31, 2004, in conformity with accounting principles generally accepted in the United States of America. Also, in our opinion, such financial statement schedule, when considered in relation to the basic consolidated financial statements taken as a whole, presents fairly, in all material respects, the information set forth therein.

We have also audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the effectiveness of the Company's internal control over financial reporting as of December 31, 2004, based on the criteria established in Internal Control - Integrated Framework issued by the Committee of Sponsoring Organizations of the Treadway Commission and our report dated March 22, (December 19, 2005 as to the effect of the material weakness described in Management's Report on Internal Control Over Financial Reporting (as revised)) expresses an unqualified opinion on management's assessment of the effectiveness of the Company's internal control over financial reporting and an adverse opinion on the effectiveness of the Company's internal control over financial reporting. As discussed in Note 2, the accompanying consolidated financial statements have been restated.

**Table of Contents****SYKES ENTERPRISES, INCORPORATED AND SUBSIDIARIES****Notes to Consolidated Financial Statements**

Sykes Enterprises, Incorporated and consolidated subsidiaries ( Sykes or the Company ) provides outsourced customer contact management solutions and services in the business process outsourcing ( BPO ) arena to companies, primarily within the communications, technology/consumer, financial services, healthcare, and transportation and leisure industries. Sykes provides flexible, high quality outsourced customer contact management services with an emphasis on inbound technical support and customer service. Utilizing Sykes' integrated onshore/offshore global delivery model, Sykes provides its services through multiple communications channels encompassing phone, e-mail, Web and chat. Sykes complements its outsourced customer contact management services with various enterprise support services in the United States that encompass services for a company's internal support operations, from technical staffing services to outsourced corporate help desk services. In Europe, Sykes also provides fulfillment services including multilingual sales order processing via the Internet and phone, inventory control, product delivery and product returns handling. The Company has operations in two geographic regions entitled (1) the Americas, which includes the United States, Canada, Latin America, India and the Asia Pacific Rim, in which the client base is primarily companies in the United States that are using the Company's services to support their customer management needs; and (2) EMEA, which includes Europe, the Middle East, and Africa.

**Note 1. Summary of Accounting Policies**

**Principles of Consolidation** The consolidated financial statements include the accounts of Sykes and its wholly-owned subsidiaries and controlled majority-owned subsidiaries. All significant intercompany transactions and balances have been eliminated in consolidation.

**Use of Estimates** The preparation of consolidated financial statements in conformity with accounting principles generally accepted in the United States requires the Company to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**Recognition of Revenue** Revenue is recognized pursuant to applicable accounting standards, including Securities and Exchange Commission ( SEC ) Staff Accounting Bulletin ( SAB ) No. 101 (SAB 101), *Revenue Recognition in Financial Statements*, SAB 104, *Revenue Recognition*, and the Emerging Issues Task Force ( EITF ) No. 00-21, *Revenue Arrangements with Multiple Deliverables*. SAB 101, as amended, and SAB 104 summarize certain of the SEC staff's views in applying generally accepted accounting principles to revenue recognition in financial statements and provides guidance on revenue recognition issues in the absence of authoritative literature addressing a specific arrangement or a specific industry. EITF No. 00-21 provides further guidance on how to account for multiple element contracts.

The Company primarily recognizes its revenue from services as those services are performed under a fully executed contractual agreement and records estimated reductions to revenue for penalties and holdbacks for failure to meet specified minimum service levels and other performance based contingencies. Royalty revenue is recognized at the time royalties are earned and the remaining revenue is recognized on fixed price contracts using the percentage-of-completion method of accounting. Adjustments to fixed price contracts and estimated losses, if any, are recorded in the period when such adjustments or losses are known. Product sales are recognized upon shipment to the customer and satisfaction of all obligations.

The Company recognizes revenue from software and contractually provided rights in accordance with the American Institute of Certified Public Accountants ( AICPA ) Statement of Position 97-2, *Software Revenue Recognition* ( SOP 97-2 ), as amended by Statement of Position 98-4, *Deferral of the Effective Date of a Provision of SOP 97-2* ( SOP 98-4 ), Statement of Position 98-9, *Modification of SOP 97-2, Software Revenue Recognition, With Respect to Certain Transactions* ( SOP 98-9 ), SAB 101, SAB 104 and EITF No. 00-21. Revenue is recognized from licenses of the Company's software products and rights when the agreement has been executed, the product or right has been delivered or provided, collectibility is probable and the software license fees or rights are fixed and determinable. If any portion of the license fees or rights is subject to forfeiture, refund or other contractual contingencies, the Company postpones revenue recognition until these contingencies have been removed. Sykes

generally accounts for consulting services separate from software license fees for those multi-element arrangements where consulting services are a separate element and are not essential to the customer s

**Table of Contents**

functionality requirements and there is vendor-specific objective evidence of fair value for these services. Revenue from support and maintenance activities is recognized ratably over the term of the maintenance period and the unrecognized portion is recorded as deferred revenue.

Revenue from contracts with multiple-deliverables to include hardware, software, consulting and other services, or related contracts with the same client, are allocated to separate units of accounting based on their relative fair value, if the deliverables in the contract(s) meet the criteria for such treatment. Fair value is the price of a deliverable when it is regularly sold on a standalone basis, which generally consists of vendor-specific objective evidence of fair value. If there is no evidence of the fair value for a delivered product or service, revenue is allocated first to the fair value of the undelivered product or service and then the residual revenue is allocated to the delivered product or service. If there is no evidence of the fair value for an undelivered product or service, the contract(s) is accounted for as a single unit of accounting, resulting in delay of revenue recognition for the delivered product or service until the undelivered product or service portion of the contract is complete. Revenue recognition is limited to the amount that is not contingent upon delivery of any future product or service or meeting other specified performance conditions.

**Cash and Cash Equivalents** Cash and cash equivalents consist of cash and highly liquid short-term investments. Cash in the amount of \$86.7 million and \$82.6 million at December 31, 2004 and 2003, respectively, was held in taxable interest bearing investments, which have an average maturity of less than 60 days. Cash and cash equivalents of \$79.0 million and \$67.5 million at December 31, 2004 and 2003, respectively, were held in international operations and may be subject to additional taxes if repatriated to the United States.

**Property and Equipment** Property and equipment is recorded at cost and depreciated using the straight-line method over the estimated useful lives of the respective assets. Improvements to leased premises are amortized over the shorter of the related lease term or the estimated useful lives of the improvements. Cost and related accumulated depreciation on assets retired or disposed of are removed from the accounts and any gains or losses resulting therefrom are credited or charged to income. Depreciation expense was \$32.3 million, \$33.0 million and \$36.8 million for the years ended December 31, 2004, 2003 and 2002, respectively. (See Note 1, Deferred Grants, for amortization, which is shown net of depreciation.) Property and equipment includes \$0.1 million, \$3.5 million and \$0.7 million of additions included in accounts payable at December 31, 2004, 2003 and 2002, respectively. Accordingly, non-cash transactions have been excluded from the accompanying Consolidated Statements of Cash Flows for the years ended December 31, 2004, 2003 and 2002, respectively.

The Company capitalizes certain costs incurred to internally develop software upon the establishment of technological feasibility. Costs incurred prior to the establishment of technological feasibility were expensed as incurred. Capitalized internally developed software costs, net of accumulated amortization, were \$0.7 million and \$0.6 million at December 31, 2004 and 2003, respectively.

The carrying value of property and equipment to be held and used is evaluated for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable in accordance with SFAS No. 144, *Accounting for the Impairment or Disposal of Long-Lived Assets*. An asset is considered to be impaired when the sum of the undiscounted future net cash flows expected to result from the use of the asset and its eventual disposition does not exceed its carrying amount. The amount of the impairment loss, if any, is measured as the amount by which the carrying amount of the asset exceeds its estimated fair value, which is generally determined based on appraisals or sales prices of comparable assets. Occasionally, the Company redeploys property and equipment from under-utilized centers to other locations to improve capacity utilization if it is determined that the related undiscounted future cash flows in the under-utilized centers would not be sufficient to recover the carrying amount of these assets.

Currently, the Company has closed several customer contact management centers, which are held for sale, and expects it may close additional centers in the future as a result of the client migration of call volumes from the U.S. to the Company's offshore operations, including Latin America and the Asia Pacific Rim, and the overall reduction in customer call volumes in the United States and Europe. As of December 31, 2004, the Company determined that its property and equipment, including those at the previously referenced customer contact management centers, were not impaired, except for certain property and equipment located in India as discussed below. Certain assets of the closed centers in the U.S., with a carrying value of \$9.7 million as of December 31, 2004, are included in *Assets Held for Sale* in the accompanying Consolidated Balance Sheet. The carrying value of these assets is offset by the related

deferred grants of \$6.7 million as of December 31, 2004 and included in Deferred grants related to assets held for sale in the accompanying Consolidated Balance Sheet. Upon reclassification as held for sale, the Company

55

---

**Table of Contents**

discontinued depreciating these assets and amortizing the related deferred grants. Property and equipment is classified as held for sale in the period in which management commits to a plan to sell the asset, the asset is available for immediate sale in its present condition, an active program to locate a buyer and other actions required to complete the plan to sell the asset have been initiated, the asset is being actively marketed for sale at a price that is reasonable in relation to its current fair value, it is probable that the asset will be sold in a reasonable period of time, and it is unlikely that significant changes to the plan to sell the asset will be made or that the plan will be withdrawn.

In connection with the plan to migrate the call volumes of the customer contact management services and related operations in Bangalore, India, the Company has determined that certain of its property and equipment in India was impaired as of December 31, 2004. Accordingly, the Company recorded a pre-tax impairment charge as of December 31, 2004 of \$0.7 million, to adjust the respective asset carrying amounts to their estimated fair market values.

**Investment in SHPS** The Company has a 6.5% remaining ownership interest in SHPS, Incorporated ( SHPS ) that is accounted for at cost. At December 31, 2004 and 2003, the carrying value of this investment was \$2.1 million and is included in Deferred charges and other assets in the accompanying Consolidated Balance Sheets. (See Note 9.) Fair value is not estimated if there are no identified events or changes in circumstances that may have a significant adverse effect on the fair value of the investment and it is not practicable to estimate the fair value of the investment without incurring excessive costs. We will record an impairment charge or loss if we believe the investment has experienced a decline in value that is other than temporary. Future adverse changes in market conditions or poor operating results of the underlying investment could result in losses or an inability to recover the carrying value of the investment and, therefore, might require an impairment charge in the future.

**Goodwill** On January 1, 2002, the Company adopted SFAS No. 142, *Goodwill and Other Intangible Assets*. According to this statement, goodwill and other intangible assets with indefinite lives are no longer subject to amortization, but instead must be reviewed at least annually, and more frequently in the presence of certain circumstances, for impairment by applying a fair value based test. Fair value for goodwill is based on discounted cash flows, market multiples and/or appraised values as appropriate. Under SFAS No. 142, the carrying value of assets is calculated at the lowest levels for which there are identifiable cash flows (the reporting unit ). If the fair value of the reporting unit is less than its carrying value, an impairment loss is recorded to the extent that the fair value of the goodwill within the reporting unit is less than its carrying value. Based on the results of the Company's initial transition impairment review as of January 1, 2002 and annual impairment reviews in the third quarter of each year in accordance with SFAS No. 142, the Company determined that there has been no impairment of goodwill. The Company expects to receive future benefits from previously acquired goodwill over an indefinite period of time. Accordingly, beginning January 1, 2002, the Company has foregone all related amortization expense. Prior to the adoption of this statement, the amortization of goodwill as it was reported on December 31, 2001 would have reduced 2004 and 2003 net income by approximately \$0.4 million, or \$0.01 per diluted share, and increased the 2002 net loss by approximately \$0.4 million, or \$0.01 per diluted share. Prior to January 1, 2002, the Company amortized goodwill over an estimated useful life of 10 to 20 years using the straight-line method. Accumulated amortization of goodwill was \$3.2 million as of December 31, 2001.

**Intangible Assets** Intangible assets, primarily existing technologies and covenants not to compete, are amortized using the straight-line method over their estimated period of benefit, generally ranging from two to five years. The Company periodically evaluates the recoverability of intangible assets and takes into account events or changes in circumstances that warrant revised estimates of useful lives or that indicate that an impairment exists. Amortization expense related to these intangible assets was \$0.5 million for the year ended December 31, 2002. As of December 31, 2004, 2003 and 2002, the intangible assets were fully amortized and had a carrying value of zero.

**Income Taxes** The Company accounts for income taxes under SFAS No. 109, *Accounting for Income Taxes*. Deferred income tax assets and liabilities are provided to reflect tax consequences of differences between the tax bases of assets and liabilities and their reported amounts in the accompanying Consolidated Financial Statements.

**Self-Insurance Programs** The Company self-insures for certain levels of workers' compensation and employee health insurance. Estimated costs of these self-insurance programs are accrued at the projected settlements for known and anticipated claims. Self-insurance liabilities of the Company amounted to \$1.7 million at December 31, 2004 and

2003.

56

---

**Table of Contents**

**Deferred Grants** Recognition of income associated with grants of land and the acquisition of property, buildings and equipment is deferred until after the completion and occupancy of the building and title has passed to the Company, and the funds have been released from escrow. The deferred amounts for both land and building are amortized and recognized as a reduction of depreciation expense included within general and administrative costs over the corresponding useful lives of the related assets. Amounts received in excess of the cost of the building are allocated to the cost of equipment and, only after the grants are released from escrow, recognized as a reduction of depreciation expense over the weighted average useful life of the related equipment, which approximates five years. Amortization of the deferred grants that is included in income was approximately \$2.1 million, \$2.9 million and \$3.0 million for the years ended December 31, 2004, 2003 and 2002, respectively.

Deferred grants of \$6.7 million related to *Assets Held for Sale* is classified as current in the accompanying Consolidated Balance Sheet as of December 31, 2004.

**Deferred Revenue** The Company invoices certain contracts in advance. The deferred revenue is earned over the service periods of the respective contracts, which range from six months to seven years. Deferred revenue also includes estimated penalties and holdbacks for failure to meet specified minimum service levels in certain contracts and other performance based contingencies. Deferred revenue included in current liabilities in the accompanying Consolidated Balance Sheets represents the amounts for services to be performed during the next ensuing twelve-month period and the amounts for services provided under contracts that contain short-term cancellation and refund provisions.

**Stock-Based Compensation** The Company has adopted the disclosure only provisions of SFAS No. 123, *Accounting for Stock-Based Compensation*. Under SFAS No. 123, companies have the option to measure compensation costs for stock options using the intrinsic value method prescribed by Accounting Principles Board Opinion No. 25, *Accounting for Stock Issued to Employees* ( APB No. 25 ). Under APB No. 25, compensation expense is generally not recognized when both the exercise price is the same as the market price and the number of shares to be issued is set on the date the employee stock option is granted. Since employee stock options are granted on this basis and the Company has chosen to use the intrinsic value method, no compensation expense is recognized for stock option grants.

If the Company had elected to recognize compensation expense for the issuance of options to employees of the Company based on the fair value method of accounting prescribed by SFAS No. 123, net income (loss) and earnings (loss) per share would have been reduced to the pro forma amounts as follows (in thousands except per share amounts):

	<b>Years Ended December 31,</b>		
	<b>2004</b>	<b>2003</b>	<b>2002</b>
<b>Net Income (Loss):</b>			
Net income (loss) as reported	\$ 10,814	\$ 9,305	\$ (18,631)
Pro forma compensation expense, net of tax	(404)	(1,887)	(11,163)
Pro forma net income (loss)	\$ 10,410	\$ 7,418	\$ (29,794)
<b>Net Income (Loss) Per Share:</b>			
Basic, as reported	\$ 0.27	\$ 0.23	\$ (0.46)
Basic, pro forma	\$ 0.26	\$ 0.18	\$ (0.74)
Diluted, as reported	\$ 0.27	\$ 0.23	\$ (0.46)
Diluted, pro forma	\$ 0.26	\$ 0.18	\$ (0.74)

The pro forma amounts were determined using the Black-Scholes valuation model with the following key assumptions: (i) a discount rate of 2.0% for 2003 and discount rates ranging from 3.0% to 3.82% for 2002 (no options were issued in 2004); (ii) a volatility factor of 83.91% for 2003 and 85.1% for 2002 based upon the average trading price of the Company's common stock since it began trading on the NASDAQ National Market; (iii) no dividend

yield; and (iv) an average expected option life of three years in 2003 and five years in 2002 (three years for the Employee Stock Purchase Plan). In addition, the pro forma amount for 2004, 2003 and 2002 includes approximately \$0.1 million, \$0.1 million and \$0.2 million, respectively, related to purchase discounts offered under the Employee Stock Purchase Plan.

**Table of Contents**

In accordance with APB No. 25, as discussed in Note 20, Stock Options and Common Stock Units, the Company applies variable plan accounting for grants of common stock units issued under the 2004 Non-Employee Director Fee Plan and recognizes compensation cost over the vesting period.

***Fair Value of Financial Instruments*** The following methods and assumptions were used to estimate the fair value of each class of financial instruments for which it is practicable to estimate that value:

Cash, Accounts Receivable and Accounts Payable. The carrying amounts reported in the balance sheet for cash, accounts receivable and accounts payable approximates their fair values.

Long-Term Debt. The fair value of the Company's long-term debt, including the current portion thereof, is estimated based on the quoted market price for the same or similar types of borrowing arrangements. The carrying value of the Company's long-term debt approximates fair value.

***Foreign Currency Translation*** The assets and liabilities of the Company's foreign subsidiaries, whose functional currency is other than the U.S. Dollar, are translated at the exchange rates in effect on the reporting date, and income and expenses are translated at the weighted average exchange rate during the period. The net effect of translation gains and losses is not included in determining net income, but is included in accumulated other comprehensive income (loss), which is reflected as a separate component of shareholders' equity until the sale or until the complete or substantially complete liquidation of the net investment in the foreign subsidiary. Foreign currency transactional gains and losses are included in determining net income. Such gains and losses are included in other income (expense) in the accompanying Consolidated Statements of Operations.

***Foreign Currency and Derivative Instruments*** Periodically, the Company enters into foreign currency forward exchange contracts with financial institutions to protect against currency exchange risks associated with existing assets and liabilities denominated in a foreign currency. These contracts require the Company to exchange currencies in the future at rates agreed upon at the contract's inception. The forward exchange contracts entered into by the Company have been primarily related to the Euro. A foreign currency forward exchange contract acts as an economic hedge as the gains and losses on these contracts typically offset or partially offset gains and losses on the assets, liabilities, and transactions being hedged. The Company does not designate its foreign exchange forward contracts as accounting hedges and does not hold or issue financial instruments for speculative or trading purposes. Foreign exchange forward contracts are accounted for on a mark-to-market basis, with unrealized gains or losses recognized as a component of income in the current period.

Unrealized and realized gains or losses related to foreign exchange forward contracts for the three years ended December 31, 2004 were immaterial.

***Recent Accounting Pronouncements*** In December 2004, the Financial Accounting Standards Board ( FASB ) issued SFAS No. 123R, *Share-Based Payment* ( SFAS No. 123R ), which requires, among other things, that all share-based payments to employees, including grants of stock options, be measured at their grant-date fair value and expensed in the consolidated financial statements. The accounting provisions of SFAS No. 123R are effective for reporting periods beginning after June 15, 2005; therefore, the Company is required to adopt SFAS No. 123R in the third quarter of 2005. The pro forma disclosures previously permitted under SFAS No. 123 will no longer be an alternative to financial statement recognition. See *Stock-Based Compensation* in Note 1 to the Consolidated Financial Statements for the pro forma net income (loss) and net income (loss) per share amounts for 2002 through 2004, as if the fair-value-based method had been used, similar to the methods required under SFAS No. 123R to measure compensation expense for employee stock awards. Management has not yet determined whether the adoption of SFAS No. 123R will result in amounts that are materially different from those currently provided under the pro forma disclosures under SFAS No. 123 in Note 1 to the Consolidated Financial Statements. The adoption of SFAS No. 123R is not expected to have a material effect on the financial condition, results of operations, or cash flows of the Company.

In June 2004, the EITF reached a consensus on Issue No. 02-14, *Whether an Investor Should Apply the Equity Method of Accounting to Investments Other Than Common Stock*. EITF 02-14 addresses whether the equity method of accounting should be applied to investments when an investor does not have an investment in voting common stock of an investee but exercises significant influence through other means. EITF 02-14 states that an investor should only

apply the equity method of accounting when it has investments in either common stock or in-substance common stock of a corporation, provided that the investor has the ability to exercise significant influence over the operating and financial policies of the investee. The effective date of EITF 02-14 is the first reporting period beginning after September 15, 2004. The adoption of EITF No. 02-14 did not have a material impact on the financial condition, results of operations or cash flows of the Company.

**Table of Contents**

In March 2004, the EITF reached a consensus on Issue No. 03-1, *The Meaning of Other-Than-Temporary Impairment and Its Application to Certain Investments*. EITF 03-1 provides guidance on other-than-temporary impairment evaluations for securities accounted for under SFAS No. 115, Accounting for Certain Investments in Debt and Equity Securities, and SFAS No. 124, Accounting for Certain Investments Held by Not-for-Profit Organizations, and non-marketable equity securities accounted for under the cost method. The EITF developed a basic three-step test to evaluate whether an investment is other-than-temporarily impaired. In September 2004, the FASB delayed the effective date of the recognition and measurement provisions of EITF No. 03-1. However, the disclosure provisions remain effective for fiscal years ending after June 15, 2004. The adoption of the recognition and measurement provisions of EITF No. 03-1 is not expected to have a material impact on the financial condition, results of operations or cash flows of the Company.

In January 2003, the FASB issued FIN No. 46, *Consolidation of Variable Interest Entities*, and a revised interpretation of FIN No. 46 (FIN No. 46-R) in December 2003, in an effort to expand upon existing accounting guidance that addresses when a company should consolidate the financial results of another entity. FIN No. 46 requires variable interest entities, as defined, to be consolidated by a company if that company is subject to a majority of expected losses of the entity or is entitled to receive a majority of expected residual returns of the entity, or both. A company that is required to consolidate a variable interest entity is referred to as the entity's primary beneficiary. The interpretation also requires certain disclosures about variable interest entities that a company is not required to consolidate, but in which it has a significant variable interest.

The consolidation and disclosure requirements apply immediately to variable interest entities created after January 31, 2003. The Company is not the primary beneficiary of any variable interest entity created after January 31, 2003 nor does the Company have a significant variable interest in a variable interest entity created after January 31, 2003.

For variable interest entities that existed before February 1, 2003, the consolidation requirements of FIN No. 46-R are effective as of March 31, 2004. The adoption of FIN No. 46-R did not have a material impact on the financial condition, results of operations or cash flows of the Company.

In December 2004, the FASB issued FASB Staff Position No. FAS 109-1 ( FAS 109-1 ), Application of FASB Statement No. 109, *Accounting for Income Taxes*, to the Tax Deduction on Qualified Production Activities Provided by the American Jobs Creation Act of 2004. The Act introduces a special 9% tax deduction on qualified production activities. FAS 109-1 clarifies that this tax deduction should be accounted for as a special tax deduction in accordance with SFAS No. 109. The adoption of these new tax provisions is not expected to have a material impact on the financial condition, results of operations or cash flows of the Company.

In December 2004, the FASB issued FASB Staff Position No. FAS 109-2 ( FAS 109-2 ), *Accounting and Disclosure Guidance for the Foreign Earnings Repatriation Provision within the American Jobs Creations Act of 2004*. The Act introduces a limited time 85% dividends received deduction on the repatriation of certain foreign earnings to a U.S. taxpayer (repatriation provision), provided certain criteria are met. FAS 109-2 provides accounting and disclosure guidance for the repatriation provision. Although FAS 109-2 is effective immediately, management does not expect to be able to complete the evaluation of the repatriation provision until after Congress or the Treasury Department provides additional clarifying language on key elements of the provision. In January 2005, the Treasury Department began to issue the first of a series of clarifying guidance documents related to this provision. The range of possible amounts that we are considering for repatriation under this provision is between zero and \$50.0 million. The related range of income tax effects of such repatriation cannot reasonably be estimated. Management expects to complete an evaluation of the effects of the repatriation provision by the end of 2005.

**Reclassifications** Certain amounts from prior years have been reclassified to conform to the current year's presentation.

**Note 2 Restatement**

On November 11, 2005, the Company determined that certain deferred revenues should be classified as current liabilities rather than long-term liabilities in the Company's Consolidated Financial Statements. The deferred revenues relate to various contracts in the Company's Canadian roadside assistance program for which the Company

**Table of Contents**

is prepaid for roadside assistance services that are generally carried out over a twelve-month or longer period. Accordingly, previously issued financial statements as presented herein have been restated to correct the classification of deferred revenue and the related deferred income taxes. Net Cash provided by Operating Activities for the years ended December 31, 2004, 2003 and 2002 were not impacted by the corrections of deferred revenue and the related deferred income taxes. However, cash flows in the amounts of \$0.5 million and \$0.4 million have been reclassified within operating cash flows from Prepaid expenses and other current assets to Deferred charges and other assets for the years ended December 31, 2004 and 2002, respectively, and from Deferred charges and other assets to Prepaid expenses and other current assets for the year ended December 31, 2003 in the amount of \$0.6 million. A summary of the effects of the restatement on the Financial Statements as of December 31, 2004 and 2003 is presented below (in thousands):

	December 31, 2004			December 31, 2003

**Note 3. Acquisitions and Dispositions**

In April 2002, the Company acquired the rights to a multi-year customer service and technical support agreement and the net assets of a call center in Bocholt, Germany for \$1.9 million in cash. In connection with the purchase, the Company recognized identifiable intangible assets of \$1.8 million related to the underlying customer support agreement and recorded net assets of \$0.1 million. During the fourth quarter of 2002, call volumes fell below anticipated levels and, after the Company evaluated the Bocholt assets for recoverability, the remaining balance of the intangible asset was written off and a \$1.5 million impairment charge was recorded in 2002.

**Table of Contents**

On July 1, 2002, the Company sold the land and building related to one of its Bismarck, North Dakota facilities for \$2.0 million cash, resulting in a net gain of \$1.8 million. The net book value of the facilities of \$1.7 million was offset by the related deferred grants of \$1.5 million. In addition, on September 30, 2002, the Company sold certain assets of its print facilities in Galashiels, Scotland having a net book value of \$1.1 million for \$0.9 million for which the Company received \$0.2 million cash and a \$0.7 million note receivable, resulting in a net loss of \$0.2 million. The balance due under the note was paid in varying monthly installments over a two-year period. The net gain on the sale of the Bismarck facility of \$1.8 million less the net loss on the sale of the print facilities in Galashiels of \$0.2 million is included in *Net gain on disposal of property and equipment* in the accompanying 2002 Consolidated Statement of Operations.

On September 30, 2003, the Company sold the land and building related to its Scottsbluff, Nebraska facility, which was closed in connection with the 2002 restructuring plan, for \$2.0 million cash, resulting in a net gain of \$1.9 million. The net book value of the facilities of \$1.9 million was offset by the related deferred grants of \$1.8 million. The net gain on the sale of the Scottsbluff facility of \$1.9 million is included in *Net gain on disposal of property and equipment* in the accompanying 2003 Consolidated Statement of Operations.

On December 31, 2003, the Company sold the land and building related to its Eveleth, Minnesota facility for \$2.3 million, for which the Company received \$0.3 million cash and a \$2.0 million note receivable, resulting in a net gain of \$1.7 million recognized over the term of the note using the installment sales method of accounting. The net book value of the facilities of \$3.5 million was offset by the related deferred grants of \$2.9 million. The Company recognized \$0.2 million of the \$1.7 million net gain on the sale of the Eveleth facility in 2003, which is included in *Net gain on disposal of property and equipment* in the accompanying 2003 Consolidated Statement of Operations. The remaining \$1.5 million net gain was recognized in 2004 when the note receivable balance was paid in full and is included in *Net gain on disposal of property and equipment* in the accompanying 2004 Consolidated Statement of Operations.

On January 15, 2004, the Company sold the land, building and its contents related to its Klamath Falls, Oregon facility for \$4.0 million in cash, resulting in a net gain of \$2.7 million in the first quarter of 2004. The net book value of the facilities of \$2.3 million was offset by the related deferred grants of \$1.0 million. On March 31, 2004, the Company sold a parcel of land at its Pikeville, Kentucky facility for \$0.2 million in cash, resulting in a net gain of \$0.1 million in the first quarter of 2004. On July 9, 2004, the Company sold the land, building and its contents related to its Hays, Kansas facility for \$3.0 million cash, resulting in a net gain of \$2.8 million in the third quarter of 2004. The net book value of the facilities of \$1.5 million was offset by the related deferred grants of \$1.3 million.

Accordingly, the net gains on the sale of these facilities of \$7.1 million related to the Eveleth, Klamath Falls, Pikeville and Hays facilities are included in *Net gain on disposal of property and equipment* in the accompanying 2004 Consolidated Statement of Operations.

In April 2004, related to the Company's efforts to realign the EMEA cost structure with current business levels, the Company proposed a liquidation plan to close its operations in Turkey. Accordingly, the Company transferred one remaining contract to other Sykes subsidiaries and shutdown the operations. In May 2004, the Company substantially completed the liquidation of its net investment in Turkey. As a result, the net effect of the translation gains and losses of \$0.7 million was recognized as a gain on liquidation of a foreign entity and included in *Other income* in the accompanying 2004 Consolidated Statement of Operations. Due to the immaterial amounts, the financial data related to the Company's net investment in Turkey has not been classified as discontinued operations.

The Company reported net income or net loss from Turkey's operations, excluding the \$0.7 million previously mentioned foreign translation gain, of \$0.3 million net loss for 2004, breakeven for 2003 and net income of \$0.1 million for 2002. Turkey's net assets included in the accompanying Consolidated Balance Sheets as of December 31, 2004 and December 31, 2003, were \$0.2 million and \$0.8 million, respectively.

Subsequent to year end, on March 1, 2005, the Company purchased the shares of Kelly, Luttmer & Associates Limited (KLA) located in Calgary, Alberta, Canada which included net assets of approximately \$0.1 million. KLA is a customer contact management center specializing in organizational health, employee assistance, occupational health, and disability management services. The Company acquired these operations in an effort to broaden its operations in the healthcare sector. Total cash consideration paid was approximately \$3.0 million. Pro-forma results of operations,

in respect to this acquisition have not been presented because the effect of this acquisition was not material.

**Table of Contents****Note 4. Concentrations of Credit Risk**

Financial instruments that potentially subject the Company to concentrations of credit risk consist principally of trade receivables. The Company's credit concentrations are limited due to the wide variety of customers and markets in which the Company's services are sold, with the exception of two major customers as discussed in Note 21.

**Note 5. Receivables**

Receivables consist of the following (in thousands):

	<b>December 31,</b>	
	<b>2004</b>	<b>2003</b>
Trade accounts receivable	\$ 89,950	\$ 77,190
Income taxes receivable	3,255	6,396
Other	1,749	3,071
	<b>94,954</b>	86,657
Less allowance for doubtful accounts	<b>4,293</b>	4,242
	<b>\$ 90,661</b>	\$ 82,415

**Note 6. Prepaid Expenses and Other Current Assets**

Prepaid expenses and other current assets consist of the following (in thousands):

	<b>December 31,</b>	
	<b>2004</b>	<b>2003</b>
Deferred tax asset (Note 14)	\$ 4,419	\$ 5,927
Prepaid maintenance	2,080	2,775
Inventory, at cost	1,334	1,089
Prepaid rent	1,086	1,273
Prepaid insurance	560	588
Prepaid telephone	499	132
Prepaid other	1,241	1,644
	<b>\$ 11,219</b>	\$ 13,428

**Note 7. Assets Held for Sale**

Assets held for sale at four customer contact management centers in the United States consist of the following (in thousands):

	<b>December 31,</b>	
	<b>2004</b>	<b>2003</b>
Land	\$ 1,352	\$
Buildings and leasehold improvements	9,124	
Equipment, furniture and fixtures	7,931	
Capitalized software development costs	114	
	<b>18,521</b>	
Less accumulated depreciation	<b>8,779</b>	

\$ 9,742 \$

The carrying value of these assets is offset by the related deferred grants of \$6.7 million as of December 31, 2004 and included in Deferred grants related to assets held for sale in the accompanying Consolidated Balance Sheet.

62

---

**Table of Contents****Note 8. Property and Equipment**

Property and equipment consist of the following (in thousands):

	December 31,	
	2004	2003
Land	\$ 2,578	\$ 6,244
Buildings and leasehold improvements	48,872	59,901
Equipment, furniture and fixtures	173,281	179,331
Capitalized software development costs	9,442	8,322
Transportation equipment	464	365
Construction in progress	1,749	737
	<b>236,386</b>	<b>254,900</b>
Less accumulated depreciation	<b>153,495</b>	<b>147,706</b>
	<b>\$ 82,891</b>	<b>\$ 107,194</b>

On June 8, 2004, the Company leased the land, building and its contents related to its Manhattan, Kansas facility to an unrelated third party effective August 1, 2004 for a period of 5 years, cancelable by the lessee at the end of each year for varying penalties not exceeding one year's rent. As of December 31, 2004, the leased property consists of the following (in thousands):

	Amount
Building and improvements, net of deferred grants of \$2.4 million	\$ 78
Equipment, furniture and fixtures	3,893
	3,971
Less accumulated depreciation	(3,791)
	\$ 180

As of December 31, 2004, future minimum rental payments, including penalties for failure to renew, to be received on non-cancelable operating leases are contractually due in the amount of \$0.8 million in 2005.

In January 2005, the Company leased the Pikeville, Kentucky facility to a third party. As a result, the net carrying value of \$2.6 million of Land, Building and Equipment related to this site was reclassified from Assets Held for Sale to Property and Equipment as of December 31, 2004. The carrying value of \$2.6 million is offset by a related deferred grant in the amount of \$1.8 million as of December 31, 2004.

In September 2004, the building and contents of the customer contact management center located in Marianna, Florida was severely damaged by Hurricane Ivan. After settlement with the insurer in December 2004, the Company recognized a net gain of \$5.4 million after write-off of the property and equipment, which had a net book value of \$3.4 million, net of the related deferred grants of \$2.2 million. The Company also received an insurance recovery for business interruption during 2004 and recognized \$0.1 million and \$0.2 million, respectively, as a reduction to Direct salaries and related costs and General and administrative costs in the accompanying Consolidated Statement of Operations for the year ended December 31, 2004. In December 2004, the Company reached an agreement with the City of Marianna to donate the underlying land to the city with \$0.1 million in cash to assist with the site demolition and clean up of the property with no further obligation of the Company.

**Note 9. Deferred Charges and Other Assets**

Deferred charges and other assets consist of the following (in thousands):

	<b>December 31,</b>	
	<b>2004</b>	<b>2003</b>
Non-current deferred tax asset (see Note 14)	\$ 14,225	\$ 13,334
Investment in SHPS, Incorporated, at cost	2,089	2,089
Other	2,607	2,545
	<b>\$ 18,921</b>	<b>\$ 17,968</b>

**Table of Contents****Note 10. Accrued Employee Compensation and Benefits**

Accrued employee compensation and benefits consist of the following (in thousands):

	December 31,	
	2004	2003
Accrued compensation	\$ 14,582	\$ 12,768
Accrued vacation	6,754	7,676
Accrued employment taxes	5,498	5,874
Other	3,482	4,551
	<b>\$ 30,316</b>	<b>\$ 30,869</b>

**Note 11. Other Accrued Expenses and Current Liabilities**

Other accrued expenses and current liabilities consist of the following (in thousands):

	December 31,	
	2004	2003
Accrued legal and professional fees	\$ 2,981	\$ 2,307
Accrued roadside assistance claim costs	1,417	1,182
Accrued telephone charges	1,088	1,179
Accrued rent	610	501
Accrued restructuring charges (see Note 16)	285	887
Accrued property taxes	209	552
Other	2,796	3,110
	<b>\$ 9,386</b>	<b>\$ 9,718</b>

**Note 12. Long-Term Debt**

Long-term debt consists of the following (in thousands):

	December 31,	
	2004	2003
Notes payable and capital leases, principal and interest payable in monthly installments through December 2004, interest at varying rates up to 19.0%, collateralized by certain equipment	\$	\$ 87
Total debt		87
Less current portion		87
Long-term debt	\$	\$

As of December 31, 2003, the Company elected to cancel its then existing revolving credit facility. As a result, the Company charged off the remaining deferred loan costs of \$0.2 million, which is included as a component of other income (expense) in the accompanying in 2003 Consolidated Statement of Operations.

On March 15, 2004, the Company entered into a new \$50.0 million revolving credit facility with a group of lenders (the Credit Facility), which amount is subject to certain borrowing limitations. Pursuant to the terms of the Credit

Facility, the amount of \$50.0 million may be increased up to a maximum of \$100.0 million with the prior written consent of the lenders. The \$50.0 million Credit Facility includes a \$10.0 million swingline subfacility, a \$15.0 million letter of credit subfacility and a \$40.0 million multi-currency subfacility.

The Credit Facility, which includes certain financial covenants, may be used for general corporate purposes including acquisitions, share repurchases, working capital support, and letters of credit, subject to certain limitations. The Credit Facility, including the multi-currency subfacility, accrues interest, at the Company's option, at (a) the Base Rate (defined as the higher of the lender's prime rate or the Federal Funds rate plus 0.50%) plus an applicable margin up to 0.50%, or (b) the London Interbank Offered Rate ( LIBOR ) plus an applicable margin up to 2.25%. Borrowings under the swingline subfacility accrue interest at the prime rate plus an applicable margin up to 0.50% and borrowings under the letter of credit subfacility accrue interest at the LIBOR plus an applicable margin up to

**Table of Contents**

2.25%. In addition, a commitment fee of up to 0.50% is charged on the unused portion of the Credit Facility on a quarterly basis. The borrowings under the Credit Facility, which will terminate on March 14, 2007, are secured by a pledge of 65% of the stock of each of the Company's direct foreign subsidiaries. The Credit Facility prohibits the Company from incurring additional indebtedness, subject to certain specific exclusions. There were no borrowings in 2004 and no outstanding balances as of December 31, 2004 with \$50.0 million availability under the Credit Facility.

**Note 13. Accumulated Other Comprehensive Income (Loss)**

The Company presents data in the Consolidated Statements of Changes in Shareholders' Equity in accordance with SFAS No. 130, *Reporting Comprehensive Income*. SFAS No. 130 establishes rules for the reporting of comprehensive income (loss) and its components. The components of other accumulated comprehensive income (loss) include foreign currency translation adjustments as follows (in thousands):

	<b>Accumulated Other Comprehensive Income (Loss)</b>
Balance at January 1, 2002	\$ (20,212)
Foreign currency translation adjustment	9,111
Balance at December 31, 2002	(11,101)
Foreign currency translation adjustment	10,893
Balance at December 31, 2003	(208)
<b>Foreign currency translation adjustment</b>	<b>5,713</b>
<b>Less: foreign currency translation gain included in net income (no tax effect)</b>	<b>(634)</b>
<b>Balance at December 31, 2004</b>	<b>\$ 4,871</b>

Earnings associated with the Company's investments in its international subsidiaries are considered to be permanently invested and no provision for United States federal and state income taxes on those earnings or translation adjustments has been provided.

**Note 14. Income Taxes**

The income (loss) before provision (benefit) for income taxes includes the following components (in thousands):

	<b>Years Ended December 31,</b>		
	<b>2004</b>	<b>2003</b>	<b>2002</b>
United States	\$ (14,585)	\$ (14,013)	\$ (35,662)
Foreign	<b>30,446</b>	27,969	11,216
Total income (loss) before provision (benefit) for income taxes	<b>\$ 15,861</b>	\$ 13,956	\$ (24,446)

**Table of Contents**

Significant components of the income tax provision (benefit) are as follows (in thousands):

	<b>Years Ended December 31,</b>		
	<b>2004</b>	<b>2003</b>	<b>2002</b>
Current:			
Federal	\$ (1,777)	\$ (1,279)	\$ (4,628)
State	(295)	(212)	(569)
Foreign	6,471	7,198	7,987
Total current provision (benefit) for income taxes	<b>4,399</b>	5,707	2,790
Deferred:			
Federal	1,093	(1,532)	(5,126)
State	280	(692)	(452)
Foreign	(725)	1,168	(3,027)
Total deferred provision (benefit) for income taxes	<b>648</b>	(1,056)	(8,605)
Total provision (benefit) for income taxes	<b>\$ 5,047</b>	\$ 4,651	\$ (5,815)

The temporary differences that give rise to significant portions of the deferred income tax provision (benefit) are as follows (in thousands):

	<b>Years Ended December 31,</b>		
	<b>2004</b>	<b>2003</b>	<b>2002</b>
Accrued expenses	\$ 3,110	\$ (2,163)	\$ (1,609)
