**b. Use of estimates**

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

**c. Investment valuation and income recognition**

The Plan's investments are stated at fair market value. Investments in the Goodyear Stock Fund are valued at the last reported sales price on the last business day of the month. If no sales were reported on that date, the shares are valued at the last bid price. All other plan investments are valued based on units of participation in commingled funds or mutual funds as reported by the fund manager, which approximates fair market value. The allocation of assets, interest and dividend income, and realized and unrealized appreciation and depreciation is made based upon contributions received and benefits paid by each participating plan on a daily basis.

Employer and employee contributions are recognized in Plan assets on the accrual basis of accounting.

Dividend income is recorded on the ex-dividend date.

Interest income is recorded as earned.

Appreciation or depreciation on Goodyear common stock distributed to participants is the difference between the weighted average cost and the current market value at the time of distribution.

**d. Payment of benefits**

Benefits are recorded when paid. In accordance with guidance from the American Institute of Certified Public Accountants, the financial statements do not include distributions payable to participants.

**e. Participant loans**

Participant loans and related repayments are treated as a transfer to (from) the investment fund from (to) the participant loans fund.
