[FOR IMMEDIATE RELEASE]

HUANENG POWER INTERNATIONAL, INC.  
UNIT 6 OF JINING POWER PLANT COMMENCES COMMERCIAL OPERATION

(Beijing, China, August 21, 2003) Huaneng Power International, Inc. (the "Company") [NYSE: HNP; HKEx: 902; SSE: 600011] today announced that the environmental-friendly coal-fired generating unit (unit 6) of Jining Power Plant expansion project (using Cycled Fluidized Bed Combustion Boiler) with capacity of 135MW has been put into commercial operation on August 17, 2003. Previously, the generating unit completed the 168 hours full-load trial run on August 5, 2003. In addition, after the technical renovation, the generation capacity of the units 3 and 4 of Jining Power Plant have been increased from 100MW to 115 MW and 110 MW, respectively. Now the total generation capacity of Jining Power Plant has reached 595 MW.

Meanwhile, the generation capacity of Nanjing Power Plant has increased from 600MW to 640 MW through technical renovation. The unit 6 of Xibu Power Plant with capacity of 300MW of Shenzhen Energy Group Co., Ltd., in which the Company has a minority interest, has been put into operation on July 13, 2003, thereby increasing the Company's generation capacity on an equity basis by 44MW.

Furthermore, the generation capacity of the Company's power plants were formerly calculated according to their relevant capacity class, but now some of them are adjusted by calculating according to the nameplate capacity of the generating units to conform the power industry's statistics: the generation capacity of Nantong Power Plant and Shantou Oil-fired Power Plant are therefore, adjusted from 1,400MW and 100MW to 1,404MW and 103MW, respectively.

Huaneng Power International, Inc. develops, constructs, operates and manages large thermal power plants in China nationwide, with a total generation capacity of 15,166MW on an equity basis. The Company wholly owns 13 power plants, and has controlling interests in three power plants and minority interests in three power companies. Today, it is one of the largest independent power producers in China.
