Results of Power Generation in First Half of 2004

This announcement is issued pursuant to Rule 13.09(2) of the Rules Governing the Listing of Securities on The Stock Exchange of Hong Kong Limited.

Huaneng Power International, Inc. (the "Company") announced its power generation in the first half of 2004.

Based on preliminary statistics, as of 30th June 2004, the Company's total power generation based on the consolidated financial statement for the first half of 2004 was 48.83 billion kWh, an increase of 18.87% over the same period last year. The power generation of Fuzhou Power Plant, Dandong Power Plant, Weihai Power Plant and Nantong Power Plant increased significantly.

The increase in power generation of the Company's power plants in the first half of 2004 was mainly attributable to the following reasons:

1. Power generation contributed from Yushe Power Plant and Xindian Power Plant, which were acquired in 2003;
2. Stable generation capacity of the newly operated generating units 5 and 6 of Jining Power Plant;
3. The rapid growth of power consumption in the provinces of Fujian, Liaoning and Jiangsu where the Company's power plants operate provided favorable conditions for increasing the Company's power generation.

The power generation of each of the Company's power plants for the first half of 2004 was, respectively, as follows (in billion kWh):
