COMMODORE APPLIED TECHNOLOGIES, INC. AND SUBSIDIARIES

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (UNAUDITED)

June 30, 2003

Note A - Basis of Presentation

The accompanying unaudited condensed consolidated financial statements for Commodore Applied Technologies, Inc. and subsidiaries (the "Company" or "Applied") have been prepared in accordance with U.S. generally accepted accounting principles for interim financial information and with the instructions to Form 10-Q and Article 10 of Regulation S-X. The financial statement information was derived from unaudited financial statements unless indicated otherwise. Accordingly, they do not include all of the information and footnotes required by generally accepted accounting principles for complete financial statements.

In the opinion of management, all adjustments (consisting of normal recurring accruals) considered necessary for a fair presentation have been included. Operating results for the three and six month periods ended June 30, 2003 are not necessarily indicative of the results that may be expected for the year ending December 31, 2003.

The accompanying unaudited condensed consolidated financial statements should be read in conjunction with the Company's audited financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2002.

Certain prior-year amounts have been reclassified to conform to the current year presentation.

The accompanying financial statements have been prepared under the assumption that Applied will continue as a going concern. Such assumption contemplates the realization of assets and the satisfaction of liabilities in the normal course of business. For the six-month period ended June 30, 2003, and the years ended December 31, 2002, 2001 and 2000, Applied incurred losses of (\$1,148,000), (\$5,972,000), (\$6,554,000) and (\$11,441,000), respectively. For the six month period ended June 30, 2003, and for the years ended December 31, 2002, 2001 and 2000, Applied has also experienced net cash inflows (outflows) from operating activities of \$(317,000), \$(123,000), \$965,000 and \$(2,629,000). The financial statements do not include any adjustments that might be necessary should Applied be unable to continue as a going concern. Applied's continuation as a going concern is dependent upon its ability to generate sufficient cash flow to meet its obligations on a timely basis, to obtain additional financing as may be required, and ultimately to attain profitability. Potential sources of cash include new contracts, external debt and the sale of new shares of company

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form 10-Q

stock or alternative methods such as mergers or sale transactions. No assurances can be given, however, that Applied will be able to obtain any of these potential sources of cash.

Anticipated losses on contracts are provided for by a charge to income during the period such losses are identified. Changes in job performance, job conditions, estimated profitability (including those arising from contract penalty provisions) and final contract settlements may result in revisions to cost and income and are recognized in the period in which the revisions are determined. Allowances for anticipated losses totaled \$398,000 and \$238,000 at June 30, 2003 and December 31, 2002, respectively. These allowances are included in other accrued liabilities in the accompanying financial statements.

5

In as much as Applied rescinded certain options during 2002 and reissued new options to the option holders, the options are considered variable options and will be revalued each quarter to determine the effect on operations, if any. During the quarter ended June 30, 2003, no expense has been recognized for the variable options as the fair market value of Applied's common stock at June 30, 2003 was lower than the exercise price of the variable options.

The consolidated financial statements include the accounts of the Company and its majority-owned subsidiaries. All significant intercompany balances and transactions have been eliminated. The preparation of consolidated financial statements in conformity with U.S. generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Note B - Supplemental Cash Flow Information

During the three and six month periods ended June 30, 2003, 19,500 and 128,500 shares of Series E Preferred Stock were converted into 8,391,418 and 24,528,133 shares of the Company's common stock, respectively. During the three and six month periods ended June 30, 2003, the Company paid dividends on the Series E Preferred Stock conversions of \$0 and \$141,929, respectively, converted into 0 and 1,566,989, shares of the Company's common stock, respectively. The Company accrued dividends on Preferred Stock Series E for the three and six-month periods ended June 30, 2003, of \$54,297 and \$130,519, respectively, which is included in Other Accrued Liabilities.

During the three and six month periods ended June 30, 2003, 0 and 17,500 shares of Preferred Stock Series F were converted into 0 and 2,450,514, shares of the Company's common stock, respectively. During the three and six month periods ended June 30, 2003, the Company paid dividends on the Series E Preferred Stock conversions of \$0 and \$39,387, respectively, converted into 0 and 551,571, shares of the Company's common stock, respectively. The Company accrued dividends on Preferred Stock Series F for the three and six-month periods ended June 30, 2003, of \$36,836 and \$68,785, respectively, which is included in Other Accrued Liabilities.

During the three and six month periods ended June 30, 2003, no shares of Preferred Stock Series H were converted into shares of common stock. The company paid no accrued dividends on Preferred Stock Series H. The Company accrued dividends on Preferred Stock Series H for the three and six-month periods ended June 30, 2003, of \$6,000 and \$12,000, respectively, which is

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form 10-Q

included in Other Accrued Liabilities.

6

Note C - Other Accrued Liabilities

Other accrued liabilities consist of the following:

	June 30, 2003	December 31, 2002
	-----	-----
Dividend payable	\$ 1,238	\$ 1,210
Compensation and employee benefits	1,105	842

Other	107	93
	-----	-----
	\$ 3,688	\$ 2,723
	=====	=====

Note D - Liability to Issue Shares of Common Stock

During March 2003, a shareholder and officer agreed to convert his \$250,000 note payable and \$37,000 of accrued interest due from the Company into 13,189,841 shares of the Company's common stock. As the issuance of the common stock has not occurred as of June 30, 2003, the Company has included these amounts in Other Accrued Liabilities at June 30, 2003. The Company anticipates issuing the shares of common stock when the shares are authorized to be issued. These shares have not been issued as of August 14, 2003.

Note E - Stock Based Compensation

The Company accounts for stock-based compensation under the recognition and measurement principles of APB Opinion No. 25, Accounting for Stock Issued to Employees, and related Interpretations. No stock-based employee compensation cost is reflected in net income (loss), as all options vested had an exercise price equal to the market value of the underlying common stock on the date of grant or the date of repricing. No options were issued or vested during the quarters ended June 30, 2003 and 2002, therefore, there would be no effect on net income and earnings per share if the company had applied the fair value recognition provisions of FASB Statement No. 123, Accounting for Stock-Based Compensation, to stock-based employee compensation.

Note F - Segment Information

The Company has identified three reportable segments in which it operates, based on the guidelines set forth in the Financial Accounting Standards Board's Statement of Financial Accounting Standards No. 131. These three segments are as follows: (i) Commodore Advanced Sciences, Inc., which primarily provides various engineering, legal, sampling, and public relations services to Government agencies on a cost plus basis; (ii) Commodore Solution Technologies, Inc., which is commercializing technologies to treat mixed and hazardous waste; and (iii) Corporate overhead and other miscellaneous

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form 10-Q

activities.

Dispute Resolution Management, Inc. ("DRM"), from August 30, 2000 (date of acquisition of 81% of DRM by the Company) to May 16, 2002 (date of dissolution of 81% of DRM by the Company), provided a package of services to help companies recover financial settlements from insurance policies to defray costs associated with environmental liabilities. Loss from DRM is recorded in the discontinued operations section of the segment information.

7

Applied evaluates segment performance based on the segment's net income (loss). Applied's foreign and export sales and assets located outside of the United States are not significant. Summarized financial information concerning Applied's reportable segments is shown in the following tables.

Note G - Net Loss per Common Share

Basic net loss per common share ("Basic EPS") excludes dilution and is computed by dividing net loss available to common shareholders by the weighted average number of common shares outstanding during the period. Diluted net loss per common share ("Diluted EPS") reflects the potential dilution that could occur if stock options or other contracts to issue common stock were exercised or converted into common stock. The computation of Diluted EPS does not assume exercise or conversion of securities that would have an anti-dilutive effect on net loss per common share.

Options and warrants to purchase 34,274,905 and 26,485,113 shares of common stock as of June 30, 2003 and 2002, respectively, were not included in the computation of Diluted EPS. The inclusion of the options would have been anti-dilutive, thereby decreasing net loss per common share.

Note H - Contingencies

Applied has matters of litigation arising in the ordinary course of business which in the opinion of management will not have a material adverse effect on its financial condition or results of operations.

Note I - Subsequent Events

Issuance of Common Stock subsequent to June 30, 2003

The Company issued a total of 9,608,701 shares of its common stock during the period from June 30, 2003 to August 14, 2003, in connection with various conversion notices from the holders of the Company's Series E Convertible Preferred Stock, par value (\$0.001) per share (the "Series E Preferred") and the holders of the Company's Series F Convertible Preferred Stock, par value (\$0.001) per share (the "Series F Preferred").

ITEM 2. Management's Discussion and Analysis of Financial Condition ----- and Results of Operations -----

Overview

Commodore Applied Technologies, Inc. and subsidiaries (the "Company" or "Applied"), is engaged in providing a range of engineering, technical, and

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form 10-Q

financial services to the public and private sectors related to (i) remediating contamination in soils, liquids and other materials and disposing of or reusing certain waste by-products by utilizing SET; and (ii) providing services related to, environmental management for on-site and off-site identification, investigation remediation and management of hazardous, mixed and radioactive waste.

Applied discontinued the operations of its previously 81% owned subsidiary DRM, on May 16, 2002 as a result of Applied's inability to meet the terms and conditions of the Stock Purchase Agreement with DRM. The loss from the disposition of DRM is recorded at \$4,134,000 to Applied. The Company's loss of the DRM subsidiary may have a material adverse effect on the financial condition of the Company and its cash flow problems. The Company currently requires additional cash to sustain existing operations and to meet current obligations and ongoing capital requirements. Excluding DRM, the Company's current monthly operating expenses exceed cash revenues by approximately \$80,000.

The Company is currently working on the commercialization of these technologies through development efforts, licensing arrangements and joint ventures. Through Commodore Advanced Sciences, Inc. ("Advanced Sciences") formerly Advanced Sciences, Inc., a subsidiary acquired on October 1, 1996, the Company has contracts with various government agencies and private companies in the U.S. As some government contracts are funded in one-year increments, there is a possibility for cutbacks as these contracts constitute a major portion of Advanced Sciences' revenues, and such a reduction would materially affect the operations. Advanced Sciences has experienced a significant decrease in revenue caused by fewer contracts and overall, less work being performed by Advanced Sciences. However, management believes its existing client relationships will allow the Company to obtain new contracts in the future.

RESULTS OF OPERATIONS

Three and Six Months Ended June 30, 2003 Compared to Three and Six Months Ended June 30, 2002

Revenues from continuing operations were \$132,000 and \$296,000 for the three and six months ended June 30, 2003 compared to \$1,190,000 and \$2,277,000 for the three and six months ended June 30, 2002. Such revenues were primarily from the Company's subsidiary ASI.

In the case of ASI, revenues were \$132,000 and \$296,000 respectively for the three and six months ended June 30, 2003 as compared with \$1,157,000 and \$2,244,000 for the three and six months ended June 30, 2002. Advanced Sciences has experienced a significant decrease in revenue caused by fewer contracts and overall, less work being performed by Advanced Sciences. The revenues from Advanced Sciences consisted of engineering and scientific services performed for the United States government under a variety of contracts, most of which provide for reimbursement of cost plus fixed fees. Revenue under cost-reimbursement contracts is recorded under the percentage of completion method as costs are incurred and include estimated fees in the proportion that costs to date bear to total estimated costs. ASI has two major customers, each of which represent more than 10% of total revenue. The combined revenue for these two customers was \$132,000 and \$296,000 respectively (100% of total revenues) for the three and six months ended June 30, 2003. Cost of sales was \$198,000 and \$403,000 respectively for the three and six months ended June 30, 2003 compared to \$606,000 and \$1,451,000 respectively for the three and six months ended June 30, 2002. The decrease in cost of sales is due to greater efficiencies in staffing and further reduction of sales associated expenses in the three and six months ended June 30, 2003.

Edgar Filing: COMMODORE APPLIED TECHNOLOGIES INC - Form 10-Q

In the case of Commodore Solution, Inc. ("Solution"), revenues were \$0 and \$0 respectively for the three and six months ended June 30, 2003 as compared with \$33,000 and \$33,000 respectively for three and six months ended June 30, 2002. There were no revenues recorded for the three and six month period ended June 30, 2003 due to (i) SET processing contracts being completed but not yet billable under current revenue recognition guidelines, (ii) United States Environmental Protection Agency (the "USEPA") demonstration of the SL-2 system at a client location in Oak Ridge, Tennessee for inclusion to the Company's nationwide permit for PCB destruction; and (iii) the relocations of the SET equipment to Hanford, Washington. Revenues, when recognized, are primarily from remediation services performed for engineering and waste treatment companies in the U.S. under a variety of contracts. Cost of sales was \$0 and \$0 respectively for the three and six months ended June 30, 2003 as compared to \$82,000 and \$180,000 respectively for the three and six months ended June 30, 2002. The cost of sales, when incurred, is attributable to sales and marketing expenses for the SET technology. Anticipated losses on engagements, if any, will be provided for by a charge to income during the period such losses are first identified.

For the three and six months ended June 30, 2003, the Company incurred research and development costs of \$0 and \$59,000 respectively as compared to \$36,000 and \$113,000 respectively for the three and six months ended June 30, 2002. Research and development costs include salaries, wages, and other related costs of personnel engaged in research and development activities, contract services and materials, test equipment and rent for facilities involved in research and development activities. Research and development costs are expensed when incurred, except those costs related to the design or construction of an asset having an economic useful life are capitalized, and then depreciated over the estimated useful life of the asset. The decrease in research and development expense is due to the continued commercialization focus of the Company.

General and administrative expenses for continuing operations for the three and six months ended June 30, 2003 were \$472,000 and \$686,000 respectively as compared to \$330,000 and \$868,000 respectively for the three and six months ended June 30, 2002. This difference is due to the reduction in staffing and other expenses.

Interest income was \$0 and \$0, respectively, for the three and six month periods ended June 30, 2003 compared to \$0 and \$0, respectively for the three and six month period ended June 30, 2002. The Company did not have a material amount of monies on deposit to generate interest income for these periods.

Interest expense for continuing operations for the three and six months ended June 30, 2003 was \$108,000 and \$158,000, respectively as compared to \$26,000 and \$68,000, respectively for the three and six months ended June 30, 2002. The increase in interest expense is primarily related to amortization of interest costs associated with the Brewer Promissory Note, the amortization of interest costs associated with the Weiss Group Notes, the amortization of interest costs and exit fees associated with the Milford/Shaar Bridge Loan Notes.
