ITEM 8.01. Other Events

As previously announced, Texas Instruments Incorporated (“TI,” “we” or “our”) has restructured its Wireless business to focus investments on embedded markets with greater potential for sustainable growth instead of the smartphone and consumer tablet markets. Consistent with this restructuring, effective January 1, 2013, the Wireless segment was eliminated and our embedded wireless products are now included in our Embedded Processing segment. The remaining Wireless products are now included in Other. We also reclassified certain products, primarily radio frequency identification (RFID) products, from Other to Embedded Processing. Our Quarterly Report on Form 10-Q for the quarter ended March 31, 2013, reflects these changes.

We are filing this Current Report on Form 8-K to recast the description of business, certain notes to the financial statements and management's discussion and analysis for the periods presented in our Annual Report on Form 10-K for the year ended December 31, 2012 (the “2012 Form 10-K”), to reflect the change in reportable segments. Only the following notes to the financial statements have been recast from their previous presentation:

Note 1 - Description of business and significant accounting policies and practices

Note 3 - Restructuring charges/other

Note 10 - Goodwill and acquisition-related intangibles

Note 16 - Segment and geographic area data

Exhibits 99.1 and 99.2 to this Report contain the recast information. The information presented in Exhibits 99.1 and 99.2 does not reflect events occurring after the filing of the 2012 Form 10-K. For information concerning significant developments and other changes to our business since the filing of the 2012 Form 10-K, please review our subsequent SEC filings.
