

All American Gold Corp.
Form 10-K
August 22, 2012

**UNITED STATES
SECURITIES AND EXCHANGE COMMISSION**
Washington, D.C. 20549

FORM 10-K

ANNUAL REPORT UNDER SECTION 13 OR 15(d) OF THE SECURITIES EXCHANGE ACT OF 1934

For the fiscal year ended MAY 31, 2012

TRANSITION REPORT UNDER SECTION 13 OR 15(d) OF THE EXCHANGE ACT

For the transition period from _____ to _____

Commission file number: 000-54008

ALL AMERICAN GOLD CORP.

(Exact name of small business issuer in its charter)

Wyoming

(State or jurisdiction of incorporation or organization)

26-0665571

(I.R.S. Employer Identification No.)

700 North High School Road, Suite 203

Indianapolis, IN 46214

(Address of principal executive offices)

(Zip Code)

Issuer's telephone number: (317) 926-4653 or (888) 755-9766 Issuer's

Web site: www.allamericangoldcorp.com

Issuer's email address: info@allamericangoldcorp.com

Securities Registered Under Section 12(b) of the Exchange Act: None

Securities Registered Under Section 12(g) of the Exchange Act:

Common Stock, \$0.001 par value

(Title of class)

Indicate by check mark if the registrant is a well-known seasoned issuer as defined by Rule 405 of the Securities Act
Yes No .

Indicate by check mark if the registrant is not required to file reports pursuant to Rule 13 or Section 15(d) of the Act
Yes No .

Indicate by check mark whether the issuer (1) has filed all reports required to be filed by Section 13 or 15(d) of the Exchange Act during the past 12 months (or for such shorter period that the registrant was required to file such

Edgar Filing: All American Gold Corp. - Form 10-K

reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate web site, if any, every Interactive Data File required to be submitted and posted pursuant Rule 405 of Regulation S-T (s 220.405 of this chapter) during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Check if disclosure of delinquent filers in response to Item 405 of Regulation S-K is not contained in this form, and no disclosure will be contained, to the best of registrant's knowledge, in definitive proxy or information statements incorporated by reference in Part III of this Form 10-K or any amendment to this Form 10-K.

Indicate by check mark whether the registrant is a large accelerated filer, a non-accelerated filer or a smaller reporter.

Large accelerated filer

Accelerated filer

Non-accelerated filer

Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Rule 12b-2 of the Exchange Act).

Yes No

Issuer's revenues for its current fiscal year: \$0.

The aggregate market value of the voting and non-voting common equity held by non-affiliates computed by reference to the price at which the common equity was sold, or the average bid and asked price of such common equity, as of the last business day of the registrant's most recently completed fiscal quarter: 42,136,122 common shares at \$0.03 = \$1,264,084.

(APPLICABLE ONLY TO CORPORATE REGISTRANTS)

State the number of shares outstanding of each of the Issuer's classes of common stock, as of the latest practicable date. 96,636,122 common shares issued and outstanding as of the date of this report.

Transitional Small Business Disclosure Format (Check one): Yes [] No [x]

DOCUMENTS INCORPORATED BY REFERENCE

List hereunder the following documents if incorporated by reference and the Part of the Form 10-K into which the document is incorporated: (1) any annual report to shareholders; (2) Any proxy or information statement and (3) any prospectus filed pursuant to Rule 424(b) or (c) under the Securities Act of 1933: Nil.

Cautionary Statement Regarding Forward-Looking Statements

Edgar Filing: All American Gold Corp. - Form 10-K

This annual report contains forward-looking statements as that term is defined in the Private Securities Litigation Reform Act of 1995. These statements relate to future events or our future financial performance. Some discussions in this report may contain forward-looking statements that involve risk and uncertainty. A number of important factors could cause our actual results to differ materially from those expressed in any forward-looking statements made in this report. Forward-looking statements are often identified by words like: believe , expect , estimate , anticipate , in project and similar expressions or words which, by their nature, refer to future events.

In some cases, you can also identify forward-looking statements by terminology such as *may*, *will*, *should*, *plan*, *predicts*, *potential* or *continue* or the negative of these terms or other comparable terminology. These statements are only predictions and involve known and unknown risks, uncertainties and other factors, including the risks in the section entitled *Risk Factors* beginning on page 5, that may cause our or our industry's actual results, levels of activity, performance or achievements to be materially different from any future results, levels of activity, performance or achievements expressed or implied by these forward-looking statements.

Although we believe that the expectations reflected in the forward-looking statements are reasonable, we cannot guarantee future results, levels of activity or achievements. Except as required by applicable law, including the securities laws of the United States, we do not intend to update any of the forward-looking statements to conform these statements to actual results.

Our financial statements are stated in United States Dollars (US\$) and are prepared in accordance with United States Generally Accepted Accounting Principles. References to common shares refer to common shares in our capital stock.

As used in this annual report, the terms *we*, *us*, *our* and *All American* mean All American Gold Corp. unless otherwise indicated.

All American is an exploration stage Corporation. There is no assurance that commercially viable mineral deposits exist on the claims we hold or may have under option. Further exploration and/or drilling will be required before a final evaluation as to the economic and legal feasibility of our projects is determined.

Glossary of Exploration Terms

The following terms, when used in this report, have the respective meanings specified below:

Development	Preparation of a mineral deposit for commercial production, including installation of plant and machinery and the construction of all related facilities. The development of a mineral deposit <u>can only</u> be made after a commercially viable mineral deposit, a reserve, has been appropriately evaluated as economically and legally feasible.
Diamond drill	A type of rotary drill in which the cutting is done by abrasion rather than percussion. The cutting bit is set with diamonds and is attached to the end of long hollow rods through which water is pumped to the cutting face. The drill cuts a core of rock, which is recovered in long cylindrical sections an inch or more in diameter.
Exploration	Prospecting, trenching, mapping, sampling, geochemistry, geophysics, diamond drilling and other work involved in searching for mineral bodies.
Geochemistry	Broadly defined as all parts of geology that involve chemical changes or narrowly defined as the distribution of the elements in the earth's crust; the distribution and migration of the individual elements in the various parts of the earth.
Geology	The science that deals with the history of the earth and its life especially as recorded in the rocks; a chronological account of the events in the earth's history.
Geophysics	The science of the earth with respect to its structure, components and development.
Mineral	

Edgar Filing: All American Gold Corp. - Form 10-K

A naturally occurring inorganic element or compound having an orderly internal structure & characteristic chemical composition, crystal form & physical properties.

Mineral Reserve A mineral reserve is that part of a mineral deposit which could be economically and legally extracted or produced at the time of the reserve determination.

Mineralization	Rock containing an undetermined amount of minerals or metals.
Oxide	Mineralized rock in which some of the original minerals, usually sulphide, have been oxidized. Oxidation tends to make the mineral more porous and permits a more complete permeation of cyanide solutions so that minute particles of gold in the interior of the minerals will be more readily dissolved.

PART I

Item 1. Description of Business.

Overview

We were incorporated in the State of Wyoming on May 17, 2006, as Osprey Ventures, Inc. and established a fiscal year end of May 31. On October 15, 2010 we changed our name to All American Gold Corp. and effected an 10:1 forward split of our common stock. Our statutory registered agent's office is located at 1620 Central Avenue, Suite 202, Cheyenne, Wyoming 82001 and our business office is located at 700 North High School Road, Suite 203, Indianapolis, IN 46214. Our telephone number is (317) 926-4653 or (888) 755-9766 and our e-mail address is info@allamericangoldcorp.com.

There have been no material reclassifications, mergers, consolidations or purchases or sales of any significant amount of assets not in the ordinary course of business since the date of incorporation. We are a start-up, exploration stage company engaged in the search for gold and related minerals. There is no assurance that a commercially viable mineral deposit, a reserve, exists in our mineral properties or can be shown to exist until sufficient and appropriate exploration is done and a comprehensive evaluation of such work concludes economic and legal feasibility.

Our Current Business Mineral Exploration Mining Projects

Mineral Property Interests State of Nevada U.S.A. (with TAC and Minquest)

On August 23, 2010, we entered into three agreements with TAC Gold Inc. (TAC), a Canadian reporting issuer which trades on the Canadian National Stock Exchange (CNSX), in regards to the acquisition of certain property interests. The interests that we acquired are as follows:

- A 70% interest in a mineral exploration property called the Belleville property in Mineral County, Nevada subject to our making certain payments, share issuances and exploration expenditures through 2016. TAC has an underlying option agreement with Minquest Inc. for the acquisition of a 100% interest in the property (under which agreement Minquest has retained a 3% net smelter return royalty);
- A 35% interest in a mineral exploration property called the Goldfield West property in Esmeralda County, Nevada subject to our making certain payments, share issuances and exploration expenditures through 2017. TAC has an underlying option agreement with Minquest Inc. for the acquisition of a 100% interest in the property; and
- A right of first refusal on an exploration property called the Iowa Canyon property in Lander County, Nevada for period of 12½ months to September 9, 2011, as amended on August 10, 2011.

A map of the overall locations of the three properties follows:

Belleville Property - Mineral County, Nevada

Pursuant to the terms of the agreement, we have assumed 70% of the obligations of TAC under their agreement with Minquest which consists of All American:

- Making payments in the aggregate amount of \$170,000 in annual periodic payments ranging from \$20,000 to \$50,000, to the sixth anniversary of the underlying option agreement.
- Incurring exploration expenditures in the aggregate amount of \$1,320,000 in annual amounts ranging from \$120,000 to \$400,000, to the seventh anniversary of the underlying option agreement.

In addition, TAC is required to make certain share issuances to Minquest under the terms of the option agreements between them (700,000 shares periodically over the terms of the agreement). We are obligated to reimburse TAC in either cash for the fair market value of the TAC shares that are issued to Minquest or in the issuance of the equivalent value of All American shares as have a market value equal to the amount of the payment then due.

The schedule of payments, stock issuances & required property expenditures to be incurred by All American under the Belleville agreement is as follows

All American's Portion	(70% of total)		(70% of total)
Anniversary Date	Payment	Share Issuance	Property Expenditure
August 4, 2010	Paid by TAC	Paid by TAC	Paid by TAC
August 4, 2011	\$20,000 (paid)	9,804 (issued)	\$120,000 (paid)
August 4, 2012	\$30,000	TBD	\$150,000
August 4, 2013	\$30,000	TBD	\$200,000
August 4, 2014	\$40,000	TBD	\$200,000
August 4, 2015	\$50,000	TBD	\$250,000
August 4, 2016	\$0	TBD	\$400,000
TOTALS	\$133,000		\$1,320,000

Technically, as of the date of this report, we are in default of the agreement for not having issued shares to TAC and for not having paid the \$150,000 property expenditure and the property payment. However, TAC has not yet submitted the appropriate documentation for their share issuance to Minquest so we currently do not have a basis upon which to make our share issuance to TAC. We have been informed that TAC will complete their submission by the end of the first full week of September at which time we intend to make our payment to TAC. Further, we are still awaiting a formalized exploration program from TAC, Minquest and their engineers as to the planned exploration program for the current work season; we expect to be in a position to move forward in September, 2012 and will make whatever expenditures are required at that time. In the event that we elect to terminate the agreement, no payment or share issues would be required to be made. Should TAC fail to issue the shares under its agreements with Minquest or fail to make its required property expenditures, All American would either have to negotiate with Minquest and form a new agreement between Minquest and All American or terminate the agreement and lose our interest in the property or make some other mutually agreeable arrangement with the parties involved.

Edgar Filing: All American Gold Corp. - Form 10-K

The Belleville Project is approximately 175 miles southeast of Reno, Nevada, and approximately 250 miles northwest of Las Vegas, Nevada, located near recent and historic producing mines including the Candelaria Silver Mine, which is ten miles to the east, and the Marietta Mine, six miles to the west. Both of these past producing mines lie within the Walker Lane structural and mineral belt, as does the Belleville Project, which is comprised of 10 unpatented mining claims spanning 74 acres.

Exposed rocks at Belleville are meta-sediments and meta-volcanics of the Triassic Excelsior formation. Also exposed on the property is a granite intrusion of late Mesozoic age. Several old pits and adits are developed along two semi-parallel shears in the Excelsior package. These shears contain quartz veins, stockworks and varying amounts of iron and copper minerals. Rock chip samples from these workings have revealed as much as 53 parts per million (ppm) gold.

Goldfields West Property, Esmeralda County, Nevada

In regards to the agreement for the Goldfields West property, the obligations assumed consist of:

- Making payments in the aggregate amount of \$398,000 in annual periodic payments ranging from \$7,000 to \$24,500, to the seventh anniversary of the underlying option agreement and initial payments totalling \$307,000 (paid); and
- Incurring exploration expenditures in the aggregate amount of \$770,000 in annual amounts ranging from \$70,000 to \$175,000, to the seventh anniversary of the underlying option agreement.

Upon payment of the \$300,000 to TAC (paid as to \$200,000 on September 14, 2011 and \$100,000 on November 24, 2011 payment of which included a credit for the annualized payment due at January 20, 2012), we earned a 35% interest in the Goldfield West Property. In order to maintain this 35% interest, we are required to aggregate cash payments of \$98,000 over a seven year period and incur an aggregate of \$770,000 in exploration expenditures over a seven year period as described in the table below.

In addition, TAC is required to make certain share issuances to Minquest under the terms of the option agreement between them (1,000,000 shares periodically over the terms of the agreements). We are obligated to reimburse TAC in either cash for the fair market value of the TAC shares that are issued to Minquest or in the issuance of the equivalent value of All American shares as have a market value equal to the amount of the payment then due.

The schedule of payments, stock issuances & required property expenditures to be incurred by All American under the Goldfields West agreement is as follows:

All American's Portion	(35% of total)		(35% of total)
Anniversary Date	Payment	Share Issuance	Property Expenditure
September 14, 2010	\$200,000 (paid)	Nil	Nil
November 21, 2010	\$100,000 (paid)	Nil	Nil
January 20, 2011	\$7,000 (paid) *	9,651 (issued)	\$70,000 (paid)
September 20, 2012	\$10,500 (paid)	41,667	\$70,000
January 20, 2013	\$10,500	TBD	\$87,500
January 20, 2014	\$14,000	TBD	\$105,000
January 20, 2015	\$14,000	TBD	\$122,500
January 20, 2016	\$17,500	TBD	\$140,000
January 20, 2017	\$24,500	TBD	\$175,000

TOTALS	\$398,000		\$770,000
---------------	-----------	--	-----------

* included as part of the cost of the acquisition of the agreement and paid by TAC

We are awaiting a formalized exploration program from TAC, Minquest and their engineers as to the planned exploration program for the current work season. We expect to be in a position to move forward in mid-September, 2012 and will make whatever expenditures are required at that time. In the event that we elected to terminate the option agreement, no payment or share issues would be required to be made. Should TAC fail to issue the shares under its agreements with Minquest or fail to make its required property expenditures, All American would either have to negotiate with Minquest and form a new option agreement between Minquest and All American or terminate the option and lose our interest in the property or make some other mutually agreeable arrangement with the parties involved.

The Goldfield West property is an advanced exploration property with defined targets comprised of 105 unpatented mining claims covering a total of 850 hectares or 2100 acres. It is approximately 3.5 hours northwest of Las Vegas, Nevada, by car; approximately 3 miles west of the town of Goldfield and adjacent to International Minerals (IMZ) Goldfield properties. It is easily accessed via well graded dirt roads.

Geologically, the Goldfield West property encompasses an area of Tertiary volcanic and volcanoclastic rocks. The USGS and several mineral exploration companies hypothesize that the western edge of a caldera rim runs through the property. Historic work conducted by Bear Creek, Placer Amex, U.S. Borax, North Mining and Bonaventure Enterprises has led to the completion of 138 drill holes. The data compiled from drilling results and a wealth of information gathered through geological mapping, geochemical sampling and geophysical surveys have identified three distinct targets over a strike length of 3.5 miles.

We believe that the property has the potential to host a gold resource in these Tertiary age volcanic and volcanoclastic rocks. Surface samples collected from old workings and outcrops have exceeded 15 g/t.

Mineral Property Interests State of Nevada U.S.A. (with Desert Pacific Explorations, Inc.)

Essex Mineral Property White Pine County, Nevada

On April 9, 2012, we entered into a non-binding Letter of Intent (the "Desert Pacific Essex LOI") with Desert Pacific Exploration, Inc. ("Desert Pacific") that set out the general terms and conditions between Desert Pacific and the Corporation for the Essex mineral property located in White Pine County, Nevada, which allowed us to exclusively investigate the mineral property until May 12, 2012, and whereby the Corporation had an exclusive right to enter into a mining option agreement with Desert Pacific at any time prior to May 10, 2012. In consideration of signing the Letter of Intent, we have paid to Desert Pacific sum of \$2,500 concurrently with the execution and delivery of the LOI. review historical records on the Essex property, discuss their implications with Desert Pacific and our engineers so as to determine if we wish to enter into a mining option agreement with Desert Pacific to explore the project.

The Essex Project is comprised of 18 unpatented mining claims covering a total of 360 acres within the Nevada mining district, White Pine County, Nevada and is located approximately 10 miles southeast of Ely, Nevada. This project represents an advanced stage exploration property with no defined resource. However, drilling on roughly 400 feet centers with significant underground workings have identified a mineralized zone approximately 4,500 feet in length and open in both directions. The project area encompasses a northwesterly trending structural zone which can be followed along strike for over 2,500 meters. The structure cuts Devonian Guillemette limestone, Devonian/Mississippian Pilot shale, Mississippian Joana limestone, and Mississippian Chainman shale which are the host rocks in the Alligator Ridge district. Workings and drill holes have encountered gold and silver within a jasperoid developed along Joana-Chainman contact zone where it plunges to the west. The mineralization has been followed to depths of 700 feet in historic workings.

Historic work in the area was initiated as early as 1869 when a minor amount of silver was produced. Production started again in the early 1900's when manganese ore was shipped. Gold and silver was mined from 1936 to 1939.

Recent exploration includes 2 holes by Newmont in 1978, 7 holes by Homestake in 1980, and 26 holes by Echo Bay from 1988 to 1989. This work defines a corridor of gold and silver mineralization trending northwesterly for over 2,500 meters. The zone is lost under alluvial cover to the southeast and northwest, but appears to continue based on CSMT surveys conducted by Cominco in 1996.

Desert Pacific believes the property shares similarities with Alligator Ridge and has gold mining potential. Targets within the Pilot Shale, the main host for Alligator Ridge ore deposits, remain untested.

Subsequent to the end of the financial year, on May 21, 2012, the Board of Directors following consultation with our geological engineer elected not to proceed with exploration work or to enter into an option agreement with Desert Pacific in regards to the Essex mineral property.

Bell Flats Mineral Property – Churchill County, Nevada

On May 7, 2012, we entered into a non-binding Letter of Intent (the "Desert Pacific Bell Flats LOI") with Desert Pacific Exploration, Inc. ("Desert Pacific") that set out the general terms and conditions between Desert Pacific and the Corporation for the Bell Flats mineral property located in Churchill County, Nevada, which allowed us to exclusively investigate the mineral property for a forty-five (45) day period until June 22, 2012, and whereby the Corporation has an exclusive right to enter into a mining option agreement with Desert Pacific at any time prior to June 22, 2012. In consideration of signing the Letter of Intent, we paid to Desert Pacific sum of \$2,500 concurrently with the execution and delivery of the LOI.

The Bell Flats Project is comprised of 14 unpatented mining claims covering a total of 280 acres within the Nevada mining district, Churchill County, Nevada and is located approximately 5 miles north of Gabbs, Nevada and 25 miles north of the Paradise Peak mine. This project represents an advanced stage exploration property with no defined resource. Extensive soil and rock sampling, geophysical surveys and drilling have identified several alteration zones along a corridor approximately 3,500 meters in length. Gold and silver occur developed along the contact of jasperoid and argillized Tertiary volcanic rock intermittently along the corridor. The mineralization has been encountered from surface to depths of 160 meters in drilling. Gold values exceed 5.1 g/t in trenching while silver values reach 200 g/t from historic drilling. The mineralized zone is open in all directions. A Santa Fe type model is indicated for the project based on the geology and alteration.

The project area encompasses a northwesterly trending structural zone. The structure cuts Tertiary felsic volcanic rocks and Triassic sediments which are the host rocks at the nearby Santa Fe gold-silver deposits. Alteration as jasperoid follows the contact of the Triassic limestone and Tertiary volcanic rocks. Shallow pits, trenches and drill holes have encountered gold and silver within argillized shale and jasperoid developed along this contact and within a clay altered felsic volcanic. Altered rocks are capped by post-mineral basalt and wind-blown sand.

Historic work in the area was initiated in the early 1900s when prospectors discovered copper oxides within an exposed granitic sill on the south end of the property. There is no reported production from the property.

Recent exploration includes several holes by Dome exploration in 1985 and 9 holes by Hemlo Gold in 1993. Hemlo also conducted an IP survey resulting in 9 lines on the north half of the property. Homeland Precious Metals collected over 300 auger soil samples in 2005. The various exploration programs define a corridor of gold and silver mineralization trending northwesterly for over 3,500 meters under alluvial cover to the northwest.

Subsequent to the end of the financial year, on June 22, 2012, the Board of Directors following consultation with our geological engineer elected not to proceed with exploration work or to enter into an option agreement with Desert Pacific in regards to the Bell Flats mineral property.

After reviewing all of the available data on both projects our engineers advised that there was insufficient merit to the projects and that All American was advised to not enter into a mining option agreement with Desert Pacific to explore the project. As a result, All American has no further obligations under the Letters of Intent on either project.

Gao Feng Gold Mining Property – Jiangxi, China

On April 22, 2007, as amended on May 15, 2009, we optioned a 25 percent interest in a gold exploration and mining property referred to as the Gao Feng Gold Mining Property located in north-eastern Jiangxi Province, China by entering into an Option To Purchase And Royalty Agreement with Jiujiang Gao Feng Mining Industry Limited Corporation, the beneficial owner of the property. On January 31, 2011, the agreement was terminated as a result of insufficient results being obtained from the first phase of exploration and the high costs of a projected second phase as reported and recommended in a geological engineering report dated January 18, 2011. No further payments or consideration are required as a result of the termination of the agreement.

We do not claim to have any ores or reserves whatsoever at this time on any of our mineral properties.

Item 1A Risk Factors

Our business operations are subject to a number of risks and uncertainties, including, but not limited to those set forth below:

1. We need to continue as a going concern if our business is to succeed.

Our registered public accounting firm's report to our audited financial statements for the year ended May 31, 2012, indicates that there are a number of factors that raise substantial doubt about our ability to continue as a going concern. Such factors identified in the report are our lack of sufficient working capital, significant operating losses, our failure to attain profitable operations and our dependence upon adequate financing to pay our liabilities.

2. Because of the unique difficulties and uncertainties inherent in mineral exploration ventures, we face a high risk of business failure.

Potential investors should be aware of the difficulties normally encountered by new mineral exploration companies and the high rate of failure of such enterprises. The likelihood of success must be considered in light of the problems, expenses, difficulties, complications and delays encountered in connection with the exploration of the mineral properties that we plan to undertake. These potential problems include, but are not limited to, unanticipated problems relating to exploration, and additional costs and expenses that may exceed current estimates. The expenditures to be made by us in the exploration of the mineral claim may not result in the discovery of mineral deposits. Problems such as unusual or unexpected formations and other conditions are involved in mineral exploration and often result in unsuccessful exploration efforts. If the results of our exploration do not reveal viable commercial mineralization, we may decide to abandon our claim and acquire new claims for new exploration. The acquisition of additional claims will be dependent upon us possessing capital resources at the time in order to purchase such claims.

3. Because we have limited business operations, we face a high risk of business failure.

We were incorporated on May 17, 2006, and have been involved primarily in organizational activities, acquisition and exploration of our mineral properties. We have not earned any revenues as of the date of this Annual Report on Form 10-K.

Prior to completion of our exploration stage, we anticipate that we will incur increased operating expenses without realizing any revenues. We therefore expect to incur significant losses into the foreseeable future. We recognize that if we are unable to generate significant revenues from development of the mineral claims and the production of minerals from the claims, we will not be able to earn profits or continue operations.

There is no history upon which to base any assumption as to the likelihood that we will prove successful, and we can provide investors with no assurance that we will generate any operating revenues or ever achieve profitable operations.

4. We lack an operating history and we expect to have losses in the future.

We have not realized any revenues. We have no operating history upon which an evaluation of our future success or failure can be made. Our ability to achieve and maintain profitability and positive cash flow is dependent upon the following:

- Our ability to locate a profitable mineral property
- Our ability to generate revenues; and
- Our ability to reduce exploration costs.

Based upon current plans, we expect to incur operating losses in future periods. This will happen because there are expenses associated with the exploration of our mineral properties. We cannot guarantee that we will be successful in generating revenues in the future.

5. Because of the inherent dangers involved in mineral exploration, there is a risk that we may incur liability or damages as we conduct our business.

The search for valuable minerals involves numerous hazards. As a result, we may become subject to liability for such hazards, including pollution, cave-ins and other hazards against which we cannot insure or against which we may elect not to insure. The payment of such liabilities may have a material adverse effect on our financial position.

6. If we become subject to onerous government regulation or other legal uncertainties, our business will be negatively affected.

There are several governmental regulations that materially restrict mineral property exploration and development. Under the mining laws of Nevada, we are required to obtain work permits, the posting of bonds, and the performance of remediation work for any physical disturbance to the land. While these current laws do not affect our current exploration plans, if we proceed to commence drilling operations on the mineral claims, we will incur modest regulatory compliance costs.

In addition, the legal and regulatory environment that pertains to the exploration of ore is uncertain and may change. Uncertainty and new regulations could increase our costs of doing business and prevent us from exploring for ore deposits. The growth of demand for ore may also be significantly slowed. This could delay growth in potential demand for and limit our ability to generate revenues. In addition to new laws and regulations being adopted, existing laws may be applied to mining that have not as yet been applied. These new laws may increase our cost of doing business with the result that our financial condition and operating results may be harmed.

7. We may not have access to all of the supplies and materials we need to begin exploration that could cause us to delay or suspend operations.

Competition and unforeseen limited sources of supplies in the industry could result in occasional spot shortages of supplies, such as explosives, and certain equipment such as bulldozers and excavators that we might need to conduct exploration. We have not attempted to locate or negotiate with any suppliers of products, equipment or materials. If we cannot find the products and equipment we need, we will have to suspend our exploration plans until we do find the products and equipment we need.

8. Because the SEC imposes additional sales practice requirements on brokers who deal in our shares because they are classed as penny stocks, some brokers may be unwilling to trade them. Thus you may have difficulty in reselling your shares and which may cause the price of the shares to decline.

Our shares qualify as penny stocks and are covered by Section 15(g) of the Securities Exchange Act of 1934, which imposes additional sales practice requirements on broker/dealers who sell our securities in this offering or in the aftermarket. In particular, prior to selling a penny stock, broker/dealers must give the prospective customer a risk disclosure document that contains a description of the nature and level of risk in the market for penny stocks in both public offerings and secondary trading; contains a description of the broker/dealers' duties to the customer and of the rights and remedies available to the customer with respect to violations of such duties or other requirements of Federal securities laws; contains a brief, clear, narrative description of a dealer market, including "bid" and "ask" prices for penny stocks and the significance of the spread between the bid and ask prices; contains the toll free telephone number for inquiries on disciplinary actions established pursuant to section 15(A)(i); defines significant terms used in the disclosure document or in the conduct of trading in penny stocks; and contains such other information, and is in such form (including language, type size, and format), as the SEC requires by rule or regulation. Further, for sales of our securities, the broker/dealer must make a special suitability determination and receive from you a written agreement before making a sale to you. Because of the imposition of the foregoing additional sales practices, it is possible that brokers will not want to make a market in our shares. This could prevent you from reselling your shares and may cause the price of the shares to decline.

9. Rain and snow may make the road leading to our property impassable. This will delay our proposed exploration operations and could prevent us from working.

While we do not plan to conduct our exploration year round, it is possible that when we plan to proceed with exploration that snow or rain could cause roads leading to our claims to be impassable. When roads are impassable, we are unable to work.

10. As we face intense competition in the mining industry, we will have to compete with our competitors for financing and for qualified managerial and technical employees.

The mining industry is intensely competitive in all of its phases. Competition includes large established mining companies with substantial capabilities and with greater financial and technical resources than we have. As a result of this competition, we may be unable to acquire additional attractive mining claims or financing on terms we consider acceptable. We also compete with other mining companies in the recruitment and retention of qualified managerial and technical employees. If we are unable to successfully compete for financing or for qualified employees, our exploration and development programs may be slowed down or suspended.

11. Trading of our stock may be restricted by the SEC's Penny Stock Regulations which may limit a stockholder's ability to buy and sell our stock.

The SEC has adopted regulations which generally define "penny stock" to be any equity security that has a market price (as defined) less than \$5.00 per share or an exercise price of less than \$5.00 per share, subject to certain exceptions. Our securities are covered by the penny stock rules, which impose additional sales practice requirements on broker-dealers who sell to persons other than established customers and "accredited investors". The term "accredited investor" refers generally to institutions with assets in excess of \$5,000,000 or individuals with a net worth in excess of \$1,000,000 or annual income exceeding \$200,000 or \$300,000 jointly with their spouse. The penny stock rules require a broker-dealer, prior to a transaction in a penny stock not otherwise exempt from the rules, to deliver a standardized risk disclosure document in a form prepared by the SEC which provides information about penny stocks and the nature and level of risks in the penny stock market. The broker-dealer also must provide the customer with current bid and offer quotations for the penny stock, the compensation of the broker-dealer and its salesperson in the transaction and monthly account statements showing the market value of each penny stock held in the customer's account. The bid and offer quotations, and the broker-dealer and salesperson compensation information, must be given to the customer orally or in writing prior to effecting the transaction and must be given to the customer in writing before or with the customer's confirmation. In addition, the penny stock rules require that prior to a transaction in a penny stock not otherwise exempt from these rules, the broker-dealer must make a special written determination that the penny stock is a suitable investment for the purchaser and receive the purchaser's written agreement to the transaction. These disclosure requirements may have the effect of reducing the level of trading activity in the secondary market for the stock that is subject to these penny stock rules. Consequently, these penny stock rules may affect the ability of broker-dealers to trade our securities. We believe that the penny stock rules discourage investor interest in and limit the marketability of, our common stock.

12. Trends, Risks and Uncertainties

We have sought to identify what we believe to be the most significant risks to our business, but we cannot predict whether, or to what extent, any of such risks may be realized nor can we guarantee that we have identified all possible risks that might arise. Investors should carefully consider all of such risk factors before making an investment decision with respect to our common stock.

Item 1B. Unresolved Staff Comments

None

Item 2. Properties

Our principal office is located at 700 North High School Road, Suite 203, Indianapolis, IN 46214. Our telephone number is (317) 926-4653 or (888) 755-9766. Our principal office is provided by our senior officer and director at no cost. We believe that the condition of our principal office is satisfactory, suitable and adequate for our current needs.

We hold the following property interests:

- A 70% interest in a mineral exploration property called the Belleville property in Mineral County, Nevada subject to our making certain payments, share issuances and exploration expenditures through 2016. TAC has an underlying option agreement with Minquest Inc. for the acquisition of a 100% interest in the property (under which agreement Minquest has retained a 3% net smelter return royalty);
- A 35% interest in a mineral exploration property called the Goldfield West property in Esmeralda County, Nevada subject to our making certain payments, share issuances and exploration expenditures through 2016. TAC has an underlying option agreement with Minquest Inc. for the acquisition of a 100% interest in the property; and

Item 3. Legal Proceedings

We know of no material, existing or pending legal proceedings against us, nor are we involved as a plaintiff in any material proceeding or pending litigation. There are no proceedings in which any of our directors, officers or affiliates, or any registered or beneficial shareholder, is an adverse party or has a material interest adverse to All American.

Item 4. Submission of Matters to a Vote of Security Holders

Our last Annual General Meeting (AGM) was held on November 26, 2011, at which time stockholders approved the following actions:

1. received the financial statements of the Corporation for its financial year ended May 31, 2011, together with the report of the independent auditors thereon;
 2. fixed the number of directors at two for the coming year;
 3. elected two directors, Brent Welke and Dr. Gaspar R. Gonzalez, Jr. to serve until the next Annual General Meeting of Shareholders or until his respective successor(s) is/are elected or appointed;
 4. ratified the appointment of M&K CPAs, PLLC, of Houston, Texas to act as independent certifying accountants and auditors of the Corporation for the financial year ended May 31, 2012.
-

PART II

Item 5. Market for Registrant's Common Equity, Related Stockholder Matters and Issuer Purchases of Equity Securities

Shares of our common stock became available for quotation on the Over-the-Counter Bulletin Board (the OTC-BB or BB) under the symbol AAGC on October 15, 2010 they previously traded under the symbol OSPR commencing on June 30, 2010. The market for our common shares is limited and can be volatile. The following table sets forth the high and low bid prices relating to our common stock on a quarterly basis for the periods indicated as quoted on the OTC-BB quotation service. These quotations reflect inter-dealer prices without retail mark-up, mark-down or commissions and may not reflect actual transactions.

Quarter Ended	High Bid	Low Bid
September 30, 2011	\$0.92	\$0.17
November 30, 2011	\$0.33	\$0.10
February 29, 2012	\$0.15	\$0.05
May 31, 2012	\$0.10	\$0.02

Our common shares are issued in registered form through Madison Stock Transfer, Inc. of 1688 East 16th Avenue, Suite 7, Brooklyn, NY 11229-0145 which is our stock transfer agent. They can be contacted by telephone at (718) 627-4453 and by facsimile at (718) 627-6341.

On May 31, 2012, the shareholders' list of our common shares showed 19 registered shareholders holding 68,425,122 shares with a further 28,211,000 shares being held by broker-dealers. There are 96,636,122 shares outstanding.

We have not declared any dividends since incorporation and do not anticipate that we will do so in the foreseeable future. Although there are no restrictions that limit the ability to pay dividends on our common shares, our intention is to retain future earnings for use in our operations and the expansion of our business.

Item 6. Selected Financial Data

As a smaller reporting company, we are not required to provide the information required by this Item.

Item 7. Management's Discussion and Analysis of Financial Condition and Results of Operations

We were incorporated in the State of Wyoming on May 17, 2006 as Osprey Ventures, Inc. and established a fiscal year end of May 31. On October 15, 2012, we changed our name to All American Gold Corp. and effected a 10:1 forward split of our common stock. Our statutory registered agent's office is located at 1620 Central Avenue, Suite 202, Cheyenne, Wyoming 82001 and our business office is located at 700 North High School Road, Suite 203 Indianapolis, IN 46214. Our telephone number is (317) 926-4653 or (888) 755-9766. We are a start-up, exploration stage company engaged in the search for gold and related minerals. There is no assurance that a commercially viable mineral deposit, a reserve, exists on our mineral properties or can be shown to exist until sufficient and appropriate exploration is done and a comprehensive evaluation of such work concludes economic and legal feasibility.

Results and Plan of Operation for Mining Properties

Mineral Properties United States of America - Nevada

We hold interests in the Belleville property and the Goldfield West property subject to our making certain payments, share issuances and exploration expenditures through 2016 and 2017 respectively. For a description of the agreements, please see the section entitled "Our Current Business" on pages 5 to 8 above.

Belleville Property

Location and Access

The Belleville project lies about equidistant from the towns of Hawthorne and Tonopah (approximately 60 miles to either). It is situated in T4N, R34E, Mineral County, Nevada, about 175 miles south-southeast of Reno and approximately 250 miles northwest of Las Vegas (see Figure 1, Location Map). Labor force, drill water and supplies would be available from Tonopah or Hawthorne, Nevada. Access is from Nevada SR 360, which junctions with US 95 about 12 miles north of the old abandoned mining and milling site of Belleville. From just south of Belleville, an unimproved gravel road heads westward across an alluvial fan and accesses the eastern part of the claims. The remainder of the claim block is not accessible by vehicle.

Elevations range from 5,600 feet at the range front to over 6,200 feet on the ridges to the west. Vegetation is sparse; range front is relatively steep and drainages are typically steep and rocky. The climate is typical high desert, western Nevada, with hot summers, cool evenings and some snow in the winter, especially at higher elevations. Exploration or mining could be conducted year round. The project is comprised of ten, unpatented mining claims (approximately 75 acres) on land administered by the US Bureau of Land Management (BLM).

Figure 1 General Location of Belleville Property Esmeralda County, Nevada

History

Prior to the involvement of All American, exploration efforts at Belleville had consisted of a mapping and sampling program, geophysical surveys, and a limited reverse circulation program completed in 2009. Three potential drilling targets were been identified, one of which is a set of gold bearing shear zones. The second drill target is a geophysical anomaly indicating the apparent extension of the mineralized shears under pediment. Belleville's third target occurs at the intersection of the mineralized structures with a major lithologic contact.

Mineralization

Exposed rocks at Belleville are meta-sediments and meta-volcanics of the Triassic Excelsior formation. Also exposed on the property is a granite intrusion of late Mesozoic age. Several old pits and adits are developed along two semi-parallel shears in the Excelsior package. These shears contain quartz veins, stockworks and varying amounts of iron and copper minerals. Rock chip samples from these workings have revealed as much as 53 parts per million (ppm) gold.

Significant gold and silver mineralization has so far been detected only within the NESW trending shear/vein systems described above. Although these shears are rarely more than a few feet wide, they persist for at least 1000 feet along strike. Surface samples were mainly grab samples from prospect pits and dumps. Sampling of the many short adits that occur on the property consisted of chip channel sampling across the ceilings (backs) which gives information on width as well as grade. All adit samples were across the veins using a 2.0 foot width (0.6 meters).

Adit sampling shows the northern vein zone to be the strongest. Within this zone adit BA-3 shows the best values with a high of 7.29 ppm gold. This part of the vein appears to be bending to the left which is consistent with dilation of a left lateral fault. This area is considered the best portion of a drilling target that extends from above the range front approximately 1,200 feet to the southwest. At the range front the structure is present but appears to be only weakly altered. This is the second drilling target defined at Belleville.

Examination of the surface geology within the Belleville project reveals a disconformable contact between a meta-andesite/basalt unit and underlying lithologies. This unit appears to sit unconformably not only on the slightly older meta-sediments and meta-volcanics, but also upon the gold-bearing shears. This scenario could produce a pooling of mineralization underneath the meta-andesite, with the meta-andesite acting as a physical barrier to ascending mineral fluids. This is the third drilling target defined at Belleville.

Results of Operations

Drilling was initiated at the Belleville project on December 5, 2011. The plan was to drill two to four angle drill holes into a pediment covered geophysical anomaly interpreted to be a buried structure, which could be mineralized, similar to nearby veins within the exposed mountain range. The first hole, drilled at -45 degrees using an RC rig, was lost after drilling 120 feet of alluvium. A second hole at -60 degrees was attempted and was also lost before reaching bedrock. Upon encountering unexpectedly thick alluvium (gravel), the company contracted an expert in reverse circulation mud drilling to supervise the drilling of the IP target and brought in special equipment to facilitate placing casing through the gravel. Following this work, we again attempted to drill the IP target in January, 2012 with a mud rotary hole being attempted. After a number of problems 90 feet of casing was finally installed. A tricone bit was then used to extend the hole to avoid the heavy vibration caused by a hammer bit. Initially this was successful down to 200 feet where the hole remained in gravel. Caving again became a problem and to avoid losing the entire drill string the hole was abandoned at 235 feet.

The single deepest hole drilled at Belleville was logged and sent for geochemical analysis to check for possible alluvial gold. Anomalous gold ranging from 0.04 to 0.08 g/t was detected from 65 to 70 feet, 190 to 200 feet and 225 to 230 feet. Although these values are anomalous they are far below what would be considered ore grade mineralization.

At this time no further work on the IP target is planned given the unstable nature of the alluvium. Additional drilling methods will be studied before considering further testing. All American Gold plans to review other targets on the property for future exploration with its technical team. Minquest and TAC along with our engineers are reviewing the property to determine alternate drilling locations or a method of avoiding the alluvium and being able to continue to be able to drill the planned target. We do not expect a decision on the method of attack until some time in 2013. TAC has agreed to postpone our obligation to make further payments on the property by one year, to delay the 2012

exploration program until at least May 31, 2013, and to extend the option agreement by one full year.

Goldfield West Property

Location and Access

The Goldfield West Property is an advanced exploration property with defined targets comprised of 105 unpatented mining claims covering a total of 850 hectares, or 2100 acres. The property is located approximately 3.5 hours northwest of Las Vegas, Nevada, by car, and approximately 3 miles west of the town of Goldfield. The Goldfield West property is accessible by well-graded dirt roads.

Figure 2, General Location of Goldfield West Property Nevada

Mineralization

Geologically, the Goldfield West property encompasses an area of Tertiary volcanic and volcanoclastic rocks. The USGS (US Geological Survey) and several mineral exploration companies hypothesize that the western edge of a caldera rim runs through the property. Historic work conducted has led to the completion of 138 drill holes. Combined geophysical surveys, geochemical sampling and 23 reverse circulation drill holes within the Nevada Eagle and South targets have tended to confirm the existence of a gold-bearing hydrothermal system associated with the argillization and silification of host rocks proximal to feeder structures.

Results of Operations and Plan of Operation

Drilling was initiated on September 24th, 2011, using a reverse circulation (RC) drill rig. A total of five angled RC holes totaling 3,510 feet were drilled. Two east-west fences of two holes each were drilled in the South target (See Figure 1 below) attempting to identify major feeder faults interpreted from geophysical surveys conducted over the area. The two fences are 300 feet apart. A fifth hole was drilled 4,500 feet north near a historic hole containing a significant thickness of anomalous gold.

Four near-vertical feeder faults were identified in the three sections drilled (See Figures 2, 3 and 4 below). Faults were identified by intervals containing much higher silver values than those within the volcanoclastic hosted gold/silver zones. Volcanoclastic hosted mineralization spread from these feeders. It is hypothesized that densely welded tuffaceous rocks at depth are brittle enough to form openings in which high-grade veins might form. The targets identified can easily be tested with angle RC holes which will need to be approximately 1,500 feet in depth.

Drill holes GFW1101 and 1102 were drilled on Section 83300N (Feet North) on the same section as GFW1002C, a steeply dipping core hole drilled in 2010 which defined the stratigraphy of the area and contained numerous +0.01 g/t gold intercepts with some quartz/sulfide veining. GFW1101 intersected 10 feet of 0.17 g/t gold and 18.6 g/t silver at 140-150 feet. The hole has an additional 160 feet total thickness of +0.10 g/t gold, but no other high silver grades. This intercept appears to be a north-south trending steeply west dipping feeder fault. The association of high silver with or without gold in feeder faults was discovered while drilling the Nevada Eagle vein extension several years ago. Brittle rocks occur roughly 900 to 1,100 feet below the surface on Section 83300N and where the interpreted fault crosses these rocks is a high-grade vein target.

Drill holes GFW1103 and 1104 were drilled on Section 83500N. GFW1103 contained two high silver intervals, postulated to be two feeder faults. From 215 to 225 feet the hole assays 13.3 g/t silver and from 320 to 330 feet assays 25.1 g/t Ag. GFW1004 contains 36.7 g/t silver from 215-220 feet. These three interpreted faults were given the same orientation as those on Section 83300N. Again, brittle rocks occur roughly 900 to 1,100 feet below the surface and where the interpreted faults cross these rocks are high-grade vein targets. Geochemical results for all five holes using a 0.10 g/t gold equivalent (AuEq) cut off are shown in the table below.

GFW1105 was drilled on Section 87900N in an area where a historic vertical drill hole (MZ4) had intersected a thick section of anomalous gold. This hole intersected 0.65 g/t gold and 28.7 g/t silver from 170 to 180 feet. This indicated feeder fault was interpreted as parallel to the feeder faults further south and the target depth is interpreted as the same.

The results show thick sections of nearly flat-lying volcanoclastic hosted gold/silver mineralization with values averaging 0.3 to 0.5 g/t AuEq with infrequent near vertical feeder faults as shown by high silver values. While the flat-lying mineralization is not currently economic the extensive volume of mineralization indicates major feeder faults were active in the area.

For the first time feeder faults have been identified at the South Target. The projection of these feeder faults into brittle rocks at depth defines several high-grade vein targets. Four such targets have been defined by this latest drilling program. The company will continue to assess the latest data to define targets for a third phase of drilling which is expected to commence in the late summer of 2012. TAC has postponed the requirement of the Option Agreement that requires the property expenditure payment be made on January 20, 2012, until September 20, 2012, or until such time as they are prepared to make specific recommendations as to an exploration program for the current year.

Richard Kern, M.S., (P.Geo. and SME member) of Reno, Nevada, is the Company's qualified person on the project.

Maps of the drill results and drill locations follow immediately.

Iowa Canyon Property

We held a right of first refusal on an additional exploration property called the Iowa Canyon property in Lander County, Nevada through to September 8, 2012. The Iowa Canyon property represents a nearly untested exploration opportunity. Recent exploration efforts have discovered multiple episodes of precious metals mineralization over a district-wide scale. Gold is hosted in a variety of rock types including silicified Tertiary volcanic and volcanoclastic sediments, quartz veins, quartz stockwork zones, carbon-rich Paleozoic sediments, and as jasperoid replacements of lower plate calcareous sediments.

Drilling had identified gold and silver jasperoids within upper and lower plate sediments, as well as gold and molybdenum-rich porphyry dikes. A single drill hole on the western side of the property contains up to 800 parts per million (ppm) molybdenum and 0.2 grams per ton gold over ten foot widths. The lower plate Hanson Creek Formation, a favorable host rock for Carlin style mineralization, has been identified in outcrop as well as drilling on

the north, east and west portions of the Iowa Canyon Property.

Figure 3 - General Location of Iowa Canyon Property Lander County, Nevada

On January 12, 2012, the Board of Directors decided not to proceed further with the Iowa Canyon property at this time. The decision was made to instead focus our resources on our two primary targets the Belleville and Goldfield West projects. At this point there will be no further expenditures made in regards to the Iowa Canyon property.

Essex Mineral Property White Pine County, Nevada

On April 13, 2012, we entered into a non-binding Letter of Intent (the Desert Pacific Essex LOI) with Desert Pacific Exploration, Inc. (Desert Pacific) that set out the general terms and conditions between Desert Pacific and the Corporation for the Essex mineral property located in White Pine County, Nevada, which allowed us to exclusively investigate the mineral property until May 12, 2012, and whereby the Corporation had an exclusive right to enter into a mining option agreement with Desert Pacific at any time prior to May 12, 2012. In consideration of signing the Letter of Intent, we paid to Desert Pacific sum of \$2,500 concurrently with the execution and delivery of the LOI. review historical records on the Essex property, discuss their implications with Desert Pacific and our engineers so as to determine if we wish to enter into a mining option agreement with Desert Pacific to explore the project.

Desert Pacific believes the property shares similarities with Alligator Ridge and has gold mining potential. Targets within the Pilot Shale, the main host for Alligator Ridge ore deposits, remain untested.

On May 21, 2012, the Board of Directors following consultation with our geological engineer elected not to proceed with exploration work or to enter into an option agreement with Desert Pacific in regards to the Essex mineral property.

Bell Flats Mineral Property – Churchill County, Nevada

On May 7, 2012, we entered into a non-binding Letter of Intent (the “Desert Pacific Bell Flats LOI”) with Desert Pacific Exploration, Inc. (“Desert Pacific”) that set out the general terms and conditions between Desert Pacific and the Corporation for the Bell Flats mineral property located in Churchill County, Nevada, which allowed us to exclusively investigate the mineral property for a forty-five (45) day period until June 22, 2012, and whereby the Corporation has an exclusive right to enter into a mining option agreement with Desert Pacific at any time prior to June 22, 2012. In consideration of signing the Letter of Intent, we paid to Desert Pacific sum of \$2,500 concurrently with the execution and delivery of the LOI.

The Bell Flats Project is comprised of 14 unpatented mining claims covering a total of 280 acres within the Nevada mining district, Churchill County, Nevada and is located approximately 5 miles north of Gabbs, Nevada and 25 miles north of the Paradise Peak mine. This project represents an advanced stage exploration property with no defined resource. Extensive soil and rock sampling, geophysical surveys and drilling have identified several alteration zones along a corridor approximately 3,500 meters in length. Gold and silver occur developed along the contact of jasperoid and argillized Tertiary volcanic rock intermittently along the corridor. The mineralization has been encountered from surface to depths of 160 meters in drilling. Gold values exceed 5.1 g/t in trenching while silver values reach 200 g/t from historic drilling. The mineralized zone is open in all directions. A Santa Fe type model is indicated for the project based on the geology and alteration.

Subsequent to the end of the financial year, on June 22, 2012, the Board of Directors following consultation with our geological engineer elected not to proceed with exploration work or to enter into an option agreement with Desert Pacific in regards to the Essex mineral property.

After reviewing all of the available data on both projects our engineers advised that there was insufficient merit to the projects and that All American was advised to not enter into a mining option agreement with Desert Pacific to explore the project. As a result, All American has no further obligations under the Letters of Intent on either project.

RESULTS OF OPERATIONS

	Year Ended	
	May 31	
	2012	2011
Revenue	\$ Nil	\$ Nil
Operating Expenses	\$ 1,666,020	\$ 407,884
Net Profit (Loss)	\$ (1,666,020)	\$ (407,884)

COMMON SHARES: Since inception we have used common stock, notes payable, a convertible debenture and an advance from both related and non-related parties to raise money for our optioned mineral acquisitions and corporate expenses. Net cash provided by financing activities in the current fiscal year ended May 31, 2012, was \$465,000 of which \$480,000 was provided by the issuance of common shares and a \$20,000 advance was repaid to related party. Net cash provided by financing activities from inception on May 17, 2006, was \$979,000 (\$599,000 as proceeds

received from sales of our common stock \$355,000 through a convertible debenture plus a net borrowing of \$25,000).

Revenue

We have not earned any revenues since our inception.

Expenses

Our operating expenses for the year ended May 31, 2012 and 2011 are outlined in the table below:

	Year Ended May 31	
	2012	2011
Exploration of mining property U.S.A.	\$ 341,330	\$ 303,807
Banking and related charges	758	753
Loss on currency exchange	504	(48)
Loss on conversion of debt	71,996	-
Imputed interest expense notes and advances	1,525	0
Interest expense promissory note & advances	869	1,000
Interest expense convertible debenture	108,199	10,301
Consulting	3,000	4,500
Office expenses	18,060	8,457
Professional fees	20,058	36,065
Investor relations	45,000	0
Public relations	11,390	4,729
Registration and filing fees	11,328	15,260
Management fees	1,014,000	18,500
Transfer agent	7,680	3,229
Travel and meals	4,323	1,331
TOTAL	<u>\$ 1,666,020</u>	<u>\$ 407,884</u>

Operating expenses for the year ended May 31, 2012, increased by approximately 408% compared to the similar period in 2011 largely due to the underlying potential cost of the issuance of option stock under a consulting agreement with an executive officer which amounted to a charge of \$1,000,000. Without this charge, the increase relative to the previous year would only have been approximately 163%. During the past year we continued our business plan, completed the first phases of the exploration programs on both the Goldfield West and Belleville properties and made due diligence enquiries on two other projects in Nevada as well as elected not to proceed with the Iowa Canyon option. Investor relations and related services fees and costs were incurred to allow us to make All American more visible to potential investors.

During the year ended May 31, 2012, All American incurred operating expenses of \$1,666,020 (\$666,020 when the option expenses contained in the management fee category is taken out) as compared to \$407,884 for the prior year and a total of \$2,206,704 for the period from inception on May 17, 2006, to May 31, 2012. The costs incurred can be further subdivided into the following categories.

EXPLORATION OF MINING PROPERTY CHINA: No costs were incurred in the past two years pertaining to the phase I exploration program on our optioned exploration property in China, the Gao Feng gold property. Since

inception on May 17, 2006, we have incurred a total of \$20,000 in resource property exploration expenses in China. This cost category will have no further costs incurred in the future.

GOLDFIELD WEST EXPLORATION AND ACQUISITION EXPENSES: \$172,944 in exploration costs relating to the first phase of the exploration program on the property during the past year on the Goldfield West property. For the year ended May 31, 2011, \$303,870 was spent on the property (\$300,000 in acquisition costs and an additional \$3,087 for miscellaneous costs associated with the exploration of the property). For the period May 17, 2006 (inception), through May 31, 2012, All American has incurred \$476,814 in total on expenses in the acquisition of the agreement and initial exploration costs on the Goldfields West property.

BELLEVILLE EXPLORATION AND ACQUISITION EXPENSES: \$102,626 was paid in the current year as the first phase in the exploration of the Belleville property in Nevada and no such costs were expended in the year ended May 31, 2011. For the period May 17, 2006 (inception) through May 31, 2012, All American has incurred \$102,626 in total on expenses in the exploration of the Belleville property.

IOWA CANYON EXPLORATION AND ACQUISITION EXPENSES: \$57,010 was paid in the current year as part of the exploration (\$7,010) or acquisition (\$50,000) expenses of the Iowa Canyon property option in Nevada and no such costs were expended in the year ended May 31, 2011. For the period May 17, 2006 (inception) through May 31, 2012, All American has incurred \$57,010 in total on expenses in the acquisition or the exploration of the Iowa Canyon property. On January 12, 2012, the Board of Directors decided not to proceed further with the Iowa Canyon property at this time. The decision was made to instead focus our resources on our two primary targets the Belleville and Goldfield West projects. At this point there will be no further expenditures made in regards to the Iowa Canyon property.

BANKING AND RELATED CHARGES: \$758 in banking and related charges were incurred in the current fiscal year while \$753 was incurred for the year ended May 31, 2011. For the period May 17, 2006 (inception), through May 31, 2012, All American has incurred a total of \$2,422 on such expenses.

LOSS ON CURRENCY EXCHANGE: All American incurred a \$504 loss in currency exchange for the year ended May 31, 2012, and gained \$48 for the year ended May 31, 2011. From inception on May 17, 2006, to May 31, 2012, we have incurred a total of \$1,233 in losses on currency exchange.

IMPUTED INTEREST EXPENSE Prior to the current year, a former officer and director had advanced \$20,000 in the form of a non-interest bearing promissory note and a non-related party had advanced \$10,500 in the form of a non-interest bearing loan. An imputed interest of \$1,525 was, therefore, deemed to have been incurred in the current fiscal year ended on May 31, 2012, which was calculated using an interest rate of 5% (five percent) which is the interest rate that was payable on comparable notes and advances that we have recently incurred. No such imputed expenses were incurred for the year ended May 31, 2011. For the period May 17, 2006 (inception), through May 31, 2012, All American has incurred a total of \$1,525 on imputed interest expenses.

INTEREST EXPENSE PROMISSORY NOTES AND ADVANCES: During fiscal 2011 - 2012 a director, through a wholly owned corporation loaned \$30,000 to All American in the form of a promissory note which bears interest at the rate of 5% and is due and payable on April 30, 2012; although the note was is currently due, the payee has agreed not to call the note especially in light of the repayment of \$20,000 that was made during the year. Interest costs of \$869 regarding notes payable and advances from officers and other related parties which had been arranged in prior fiscal years as well as the referenced advance were incurred in the current fiscal year; \$1,000 was incurred for the period ended May 31, 2011. All other advances and loans were paid in full, including accrued interest, prior to the end of the year. For the period May 17, 2006 (inception), through May 31, 2012, All American has incurred a total of \$3,513 on such expenses.

INTEREST EXPENSE CONVERTIBLE DEBENTURE: On November 10, 2011, the Corporation issued \$355,000 in a non-interest bearing convertible debentures to a single creditor in exchange for cash proceeds used to make the payment due to TAC under the Goldfields agreement in the amount of \$300,000 as well as \$55,000 which was allocated to working capital. All or any portion of the amounts due under the convertible notes, which mature on August 23, 2015, may be converted at any time, at the option of the holder, into common shares of the Corporation at a conversion price of seventy five percent (75%) of the average closing bid prices for the ten trading days immediately preceding the date that the Corporation receives notice of conversion of the convertible notes. In accordance with ASC 470-20, the Corporation determined that there was a beneficial conversion feature on the convertible notes with an intrinsic value of \$118,500. The Corporation recorded \$118,500 as additional paid-in capital and reduced the carrying value of the convertible notes to \$237,000. The carrying values of the convertible notes are to be accreted over the term of the convertible notes up to their face value of \$355,500. The debenture was converted to shares on July 13, 2011. During the year ended May 31, 2012, the Corporation accreted interest of \$108,199. and \$10,301 for the similar period ended May 31, 2011. Since inception on May 17, 2006, we have incurred a total of \$118,500 in interest accretable on such notes. In the future, this cost category will change based on financing activities.

LOSS ON CONVERSION OF DEBENTURE: Based on the terms of the above noted convertible debenture agreement we should have issued 765,027 shares but over allotted the number of shares to be issued (875,000) through an error in calculating the closing price as stipulated under the agreement. The value of those over allotted shares (109,973 shares) was \$71,996 which is reflected in the financial statements as being a loss on the conversion and recorded in the statements as such. \$0 (nil) in losses on conversion of debts was incurred for the year ended May 31, 2011. A total of \$71,996 has been incurred in the period from inception on May 17, 2006, to May 31, 2012.

CONTRIBUTED ADMINISTRATIVE SUPPORT: No contributed expenses (for contributed administrative costs) were incurred for the year ended May 31, 2012, or 2011. For the period May 17, 2006 (inception), through May 31, 2012, a total of \$300 in contributed expenses has been reflected in the financial statements. All contributed expenses are reported as contributed costs with a corresponding credit to additional paid-in capital. The Corporation's first president periodically contributed administrative services to the Corporation for the period from inception up to and including May 31, 2008. The time and effort was recorded in the accompanying financial statements based on the prevailing rates for such services, which equalled \$50 per hour based on the level of services performed.

CONSULTING FEES: We incurred \$9,000 in consulting fees for the year ended May 31, 2012, and \$4,500 for the year ended May 31, 2011. For the period May 17, 2006 (inception), through May 31, 2012, \$28,500 was recorded for such costs. This category will vary from year to year dependent on corporate capital raising and potential acquisition activities. During the past year the fees were incurred mainly for advice on potential acquisitions and listing and quotation service options available to All American as well as services relating to the electronic trading of our common stock.

OFFICE EXPENSES: \$18,060 in office costs were incurred in the past year. By comparison, \$8,457 was incurred for the previous fiscal year ended May 31, 2011. For the period May 17, 2006 (inception), through May 31, 2012, a total of \$38,765 has been spent on office related expenses. Such expenses include telephone, courier, photocopying, office supplies, trade publication subscriptions and general office costs.

ORGANIZATIONAL COSTS: No charges for organizational costs were incurred for the years ended on May 31, 2012, and 2011. Since inception to May 31, 2012, we have incurred a total of \$300 in organizational expenses. We expect infrequent charges.

PROFESSIONAL FEES: All American incurred \$20,058 in professional fees for the fiscal year ended on May 31, 2012, and \$36,065 in the previous fiscal year. From inception to May 31, 2012, we have incurred \$105,390 in professional fees mainly spent on legal, consulting and accounting matters. This expense category will vary depending on corporate capital raising activities.

CORPORATE SERVICES: No corporate service costs were incurred for the years ended May 31, 2012, or 2011. For the period May 17, 2006 (inception), through May 31, 2012, All American has spent a total of \$5,000 on such expenses.

INVESTOR RELATIONS FEES: All American incurred \$45,000 in investor relation fees for the fiscal year ended on May 31, 2012, and \$0 (nil) in the previous fiscal year. From inception to May 31, 2012, we have incurred \$45,000 in investor relations fees mainly to develop corporate awareness to the investing community.

PUBLIC RELATINS COSTS: All American incurred \$11,390 in public relations costs for the fiscal year ended on May 31, 2012, and \$4,729 in the previous fiscal year. From inception to May 31, 2012, we have incurred \$16,910 in public relations costs.

REGISTRATION AND FILING FEES: We incurred \$11,328 in registration and filing fees for the year ended May 31, 2012, and \$15,260 for the year ended May 31, 2011. For the period May 17, 2006 (inception), through May 31, 2012, \$33,511 was recorded for such costs. This category will vary from year to year dependent on the filing activities of the Company with various regulators.

MANAGEMENT FEES AND COMPENSATION: On December 1, 2011, the Corporation entered into a consulting agreement with Brent Welke, our president and a director, for a term of 36 months, whereby Mr. Welke has agreed to manage the affairs of the Corporation. As compensation, we agreed to pay Mr. Welke \$1,000 per month, pursuant to the terms of the consulting agreement and have issued 2,500,000 shares of the Corporation's common stock valued at the last issuance price of \$0.005 per share. On July 1, 2011, the Corporation entered into a consulting agreement with Gaspar R. Gonzalez, our treasurer and a director, for a term of 36 months, whereby Mr. Gonzalez has agreed to manage the financial affairs of the Corporation. As compensation, we have agreed to pay him \$1,000 on the first day of each of the 36 months, pursuant to the terms of the consulting agreement and have issued 2,000,000 shares of the Corporation's common stock valued at the last trading price prior to entering into the agreement of \$0.50 per share which created an accounting entry of \$1,000,000 which was charged to the management fee and compensation category. \$1,014,000 in management fee costs were incurred in the current year as a result, which includes the deemed value of the 2,000,000 shares of common stock issued to Mr. Gonzalez under his consulting agreement, while \$18,500 was incurred for the year ended May 31, 2011. For the period May 17, 2006 (inception), through May 31, 2012, All American has incurred \$1,040,477 on management fees and compensation.

TRANSFER AGENT FEES: \$7,680 was spent on transfer agent costs and attendant expenses in the year ended on May 31, 2012, while \$3,229 was spent in the corresponding period for 2011. For the period May 17, 2006 (inception), through May 31, 2012, a total of \$16,884 has been spent on transfer agent expenses.

TRAVEL AND MEAL EXPENSES: \$4,323 was spent in travel and meal costs in the year ended on May 31, 2012, while \$1,331 was spent in the corresponding period for 2011. For the period May 17, 2006 (inception), through May 31, 2012, a total of \$11,341 has been spent on travel and meal expenses.

RESEARCH AND DEVELOPMENT: All American has not incurred any expenses for research and development since inception on May 17, 2006.

INCOME TAX PROVISION: As a result of operating losses, there has been no provision for the payment of income taxes to date in 2011 - 2012 or from the date of inception.

At the end of the current fiscal year, May 31, 2012, and as of the date of this report, All American had 96,636,122 common shares issued and outstanding.

Liquidity and Financial Condition

Working Capital				
		At May 31, 2012		At May 31, 2011
Current Assets	\$	22,301	\$	11,013
Current Liabilities	\$	53,248	\$	301,397
Working Capital	\$	(30,947)	\$	(290,384)

Cash Flows				
		At May 31, 2012		At May 31, 2011
Net Cash Used in Operating Activities	\$	(453,712)	\$	(374,513)

Edgar Filing: All American Gold Corp. - Form 10-K

Net Cash Provided by (Used In) Investing Activities	\$	0	\$	0
Net Cash Provided by Financing Activities	\$	465,000	\$	375,500
Increase (Decrease) In Cash During The Period	\$	11,288	\$	987

As of May 31, 2012, our company had a working capital deficit of \$30,947.

Use of Proceeds

Net cash provided by financing activities from inception on May 17, 2006, to May 31, 2012, was \$979,000 as a result of proceeds received from the sale of our common stock (\$599,000), proceeds of a convertible debenture (\$355,000) and the net amount of advances from officers and related and non-related parties (\$25,000). During that same period, the following table indicates how those proceeds have been spent to date:

Exploration of mining property - China	\$ 20,000
Exploration of mining properties - U.S.A.	645,137
Banking and related charges	2,422
Loss on currency exchange	1,233
Loss on conversion of debt	71,996
Interest expense promissory note & advances	3,513
Interest expense convertible debenture	118,500
Consulting	28,500
Office expenses	38,765
Organizational costs	300
Professional fees	105,390
Corporate services	5,000
Investor relations	45,000
Public relations	16,910
Registration and filing fees	33,511
Management fees	1,040,477
Transfer agent	16,884
Travel and meals	<u>11,341</u>
Total Use of Proceeds to May 31, 2012	<u>\$2,204,879</u>

Future Operations

Presently, our revenues are not sufficient to meet operating and capital expenses. We have incurred operating losses since inception which is likely to continue through fiscal 2012 - 2013. Management projects that we may require \$550,000 to fund our ongoing operating expenses and working capital requirements for the next twelve months, broken down as follows:

Operating expenses	\$100,000
Belleville exploration expenses	180,000
Goldfield West exploration expenses	170,000
Working capital	<u>100,000</u>
Total	<u>\$550,000</u>

As at May 31, 2012, we had a working capital deficit of \$30,947. We plan to raise the additional capital required to meet the balance of our estimated funding requirements for the next twelve months primarily through private

placements of our stock or prospectus offerings, loans or advances from officers, directors and shareholders and the possible sale of part of our interest in our mineral properties. We do not anticipate that we will be able to satisfy any of these funding requirements internally until we significantly increase revenues.

There is substantial doubt about our ability to continue as a going concern because our business is dependent upon obtaining further financing. The issuance of additional equity securities by us could result in a significant dilution in the equity interests of current stockholders. Obtaining commercial loans, assuming those loans would be available, will increase our liabilities and future cash commitments.

Future Financings

We will require additional financing in order to enable us to proceed with our plan of operations, as discussed above in order to continue operations. There can be no assurance that additional financing will be available to us when needed or, if available, that it can be obtained on commercially reasonable terms. If we are not able to obtain the additional financing on a timely basis, we will not be able to meet our other obligations as they become due. We are pursuing various alternatives to meet our immediate and long-term financial requirements.

We anticipate continuing to rely on equity sales of our common stock in order to fund our business operations. Issuances of additional shares will result in dilution to existing stockholders. There is no assurance that we will achieve any additional sales of equity securities or arrange for debt or other financing to fund our planned business activities.

We presently do not have any arrangements for additional financing and no potential lines of credit or sources of financing are currently available for the purpose of proceeding with our plan of operations.

Contractual Obligations

As a smaller reporting company we are not required to provide tabular disclosure obligations.

Going Concern

We are in the exploration stage, have not yet achieved profitable operations and are dependent on our ability to raise capital from stockholders or other sources to meet obligations arising from normal business operations when they become due. Therefore, in their report on our audited financial statements for the year ended May 31, 2012, our independent auditors included an explanatory paragraph regarding concerns about our ability to continue as a going concern. Our financial statements contain additional note disclosure describing the circumstances that lead to this disclosure.

Off-Balance Sheet Arrangements

We have no off-balance sheet arrangements that have or are reasonably likely to have a current or future effect on our financial condition, changes in financial condition, revenues or expenses, results of operations, liquidity, capital expenditures or capital resources that is material to stockholders.

Critical Accounting Policies

The discussion and analysis of our financial condition and results of operations are based upon our financial statements, which have been prepared in accordance with the accounting principles generally accepted in the United States of America. Preparing financial statements requires management to make estimates and assumptions that affect the reported amounts of assets, liabilities, revenue, and expenses. These estimates and assumptions are affected by management's application of accounting policies. We believe that understanding the basis and nature of the estimates and assumptions involved with the following aspects of our financial statements is critical to an understanding of our financial statements.

Functional Currency

The Company's functional currency is the United States dollar.

Cash and Cash Equivalents

The Company considers all highly liquid securities with original maturities of three months or less when acquired to be cash equivalents. There were no cash equivalents at May 31, 2012.

Financial Instruments

At May 31, 2012, the fair value of the Company's financial instruments approximate their carrying value based on their terms and interest rates.

Mineral Interests

Mineral interest acquisition costs include cash consideration and the estimated fair value of common shares issued for mineral properties, based on recent share issuances. Exploration and development expenditures are expensed in the period incurred until such time as the Company establishes the existence of commercial feasibility, at which time these costs will be deferred. Administrative expenditures are expensed in the period incurred. Mineral interest acquisition costs and related interest and financing costs may be deferred until the property is placed into production, sold or abandoned. Mineral interest acquisition costs will be deferred only when and if proven and probable reserves have been found to exist. No proven or probable reserves are currently known to exist. Any deferred costs will be amortized on a unit-of-production basis over the estimated proven and probable reserves of the property following commencement of commercial production or written off if the property is sold, allowed to lapse or abandoned.

Earnings (Loss) per Common Share

The Company computes net income (loss) per share in accordance with ASC Topic *Earnings per Share*. The basic net loss per common share is computed by dividing the net loss by the weighted average number of common shares outstanding; basic loss per share excludes the impact of common stock equivalents. Diluted net loss per share gives effect to all dilutive potential common shares outstanding during the period using the *as if converted* basis, i.e., it utilizes the average market price per share when applying the treasury stock method in determining common stock equivalents. For the year ended May 31, 2012, and for the period May 17, 2006 (date of inception), through May 31, 2012, there were no variances between the basic and diluted loss per share as there were no potential dilutive securities.

Income Taxes

The Company has adopted ASC Topic *Accounting for Income Taxes* as of inception. The Company recognizes deferred tax assets and liabilities based on differences between the financial reporting and tax bases of assets and liabilities using the enacted tax rates and laws that are expected to be in effect when the differences are expected to be recovered. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities using enacted tax rates in effect for the year in which the differences are expected to reverse. The Company provides a valuation allowance for deferred tax assets for which it does not consider realization of such assets to be more likely than not.

Foreign Currency Translation

The Company's functional and reporting currency is the United States dollar and where necessary the accounts of the Company's foreign operations have been translated into United States dollars in accordance with ASC Topic *Foreign Currency Translation*. Assets and liabilities of those operations are translated in U.S. dollars using exchange rates as of the balance sheet date; income and expenses are translated using the average exchange rates for the reporting period. Translation adjustments are deferred in accumulated other comprehensive income (loss), a separate component of shareholders' deficit.

Fair Value of financial Instruments.

ASC disclosures about fair value of financial instruments define the fair value of a financial instrument as the amount at which the instrument could be exchanged in a current transaction between willing parties. The carrying values of the Company's financial instruments, which include cash, accounts receivable, and accrued expenses, approximate fair values due to the short-term maturities of such instruments.

Use of Estimates in the Preparation of Financial Statements.

The preparation of financial statements in conformity with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities, the disclosure of contingent assets and liabilities at the date of the financial statements, and the reported amounts of revenues and expenses during the reporting periods. Actual results could differ from those estimates and assumptions.

Recently Adopted and Enacted Accounting Pronouncements

In June 2009, ASC Topic *The FASB Accounting Standards Codification(TM) and the Hierarchy of Generally Accepted Accounting Principles - A Replacement of FASB Statement No. 162* was issued. This standard establishes the FASB Accounting Standards Codification(TM) (the *Codification*) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with US GAAP. The Codification does not change current US GAAP, but is intended to simplify user access to all authoritative US GAAP by providing all the authoritative literature related to a particular topic in one place.

The Codification is effective for interim and annual periods ending after September 15, 2009, and as of the effective date, all existing accounting standard documents were superseded. The Codification is effective in the second quarter of the year ending May 31, 2010, and accordingly, the Annual Report on Form 10-K for the year ended May 31, 2010, and all subsequent public filings will reference the Codification as the sole source of authoritative literature. All guidance contained in the Codification carries an equal level of authority. The Codification superseded all existing non-SEC accounting and reporting standards. All other non-grandfathered, non-SEC accounting literature not included in the Codification is non-authoritative. The FASB will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates (ASUs). The FASB will not consider ASUs as authoritative in their own right. ASUs will serve only to update the Codification, provide background information about the guidance and provide the bases for conclusions on the change(s) in the Codification. References made to FASB guidance throughout these consolidated financials have been updated for the Codification.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which is effective for annual reporting periods beginning after December 15, 2011. ASU 2011-05 will become effective for the Company on December 1, 2012. This guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. In addition, items of other comprehensive income that are reclassified to profit or loss are required to be presented separately on the face of the financial statements. This guidance is intended to increase the prominence of other comprehensive income in financial statements by requiring that such amounts be presented either in a single continuous statement of income and comprehensive income or separately in consecutive statements of income and comprehensive income. The adoption of ASU 2011-05 is not expected to have a material impact on our financial position or results of operations.

In April 2010, the FASB issued ASU 2010-13, "Compensation - Stock Compensation (Topic 718) - Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades (A consensus of the FASB Emerging Issues Task Force)" (ASU 2010-13). ASU 2010-13 clarifies that a share-based payment award with an exercise price denominated in the currency of a market in which a substantial portion of the entity's equity securities trades should not be considered to contain a condition that is not a market, performance, or service condition. Therefore, such an award should not be classified as a liability if it otherwise qualifies as equity. This clarification of existing practice is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2010, with early application permitted. We are currently evaluating the impact of this ASU; however, we do not expect the adoption of this ASU to have a material impact on our financial statements.

In May 2009, ASC Topic 855, *Subsequent Events* was issued which established principles and requirements for evaluating and reporting subsequent events and distinguishes which subsequent events should be recognized in the financial statements versus which subsequent events should be disclosed in the financial statements. ASC Topic 855 was effective for interim periods ending after June 15, 2009. Because it impacts the disclosure requirements, not the accounting treatment for subsequent events, the adoption of ASC Topic 855 did not impact our consolidated results of operations or financial condition. In February 2010, the FASB issued ASU No. 2010-09 *Subsequent Events (ASC Topic 855) Amendments to Certain Recognition and Disclosure Requirements* (ASU No. 2010-09) which requires an entity that is an SEC filer to evaluate subsequent events through the date that the financial statements are issued. The adoption did not have an impact on the Company's financial position and results of operations. See Note 8 for disclosures regarding subsequent events.

Recently Issued Accounting Standards

In August 2009, the FASB issued an amendment to the accounting standards related to the measurement of liabilities that are recognized or disclosed at fair value on a recurring basis. This standard clarifies how a company should measure the fair value of liabilities and that restrictions preventing the transfer of a liability should not be considered as a factor in the measurement of liabilities within the scope of this standard. This standard was effective for the Company on October 1, 2010. The Company does not expect the impact of its adoption to be material to its financial statements.

In October 2009, the FASB issued an amendment to the accounting standards related to the accounting for revenue in arrangements with multiple deliverables including how the arrangement consideration is allocated among delivered and undelivered items of the arrangement. Among the amendments, this standard eliminated the use of the residual method for allocating arrangement considerations and requires an entity to allocate the overall consideration to each deliverable based on an estimated selling price of each individual deliverable in the arrangement in the absence of having vendor-specific objective evidence or other third party evidence of fair value of the undelivered items. This standard also provides further guidance on how to determine a separate unit of accounting in a multiple-deliverable revenue arrangement and expands the disclosure requirements about the judgments made in applying the estimated selling price method and how those judgments affect the timing or amount of revenue recognition. This standard will become effective for the Company on January 1, 2012. The Company does not expect the impact of its adoption to be material to its financial statements.

Item 7A. Quantitative and Qualitative Disclosures About Market Risk

As a smaller reporting company, we are not required to provide the information required by this Item.

Item 8. Financial Statements and Supplementary Data

Our financial statements are stated in United States Dollars (US\$) and are prepared in accordance with United States Generally Accepted Accounting Principles.

The Report of Independent Registered Public Accounting Firm by M&K CPAs, PLLC, for the audited financial statements for the years ended May 31, 2012, and 2011 is included herein immediately preceding the audited financial statements.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

To the Board of Directors
All American Gold Corp.
(An Exploration Stage Company)

We have audited the accompanying balance sheets of All American Gold Corp. (an Exploration Stage Company) as of May 31, 2012 and May 31, 2011, and the related statements of operations, changes in stockholders' equity (deficit), and cash flows for the years then ended. The financial statements for the period May 17, 2006 (inception), through May 31, 2008, were audited by other auditors whose reports expressed unqualified opinions on those statements. The financial statements for the period May 16, 2006 (inception), through May 31, 2012, include total revenues of \$0 and a net loss of \$2,205,179. Our opinion on the statements of operations, stockholders' equity (deficit) and cash flows for the period May 17, 2006 (inception), through May 31, 2008, insofar as it relates to amounts for prior periods through May 31, 2008, is based solely on the reports of other auditors. These financial statements are the responsibility of the Company's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with the standards of the Public Company Accounting Oversight Board (United States). Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. The Company is not required to have, nor were we engaged to perform, an audit of its internal control over financial reporting. Our audit included consideration of internal control over financial reporting as a basis for designing audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the Company's internal control over financial reporting. Accordingly, we express no such opinion. An audit also includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements, assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audits provide a reasonable basis for our opinion.

In our opinion, the financial statements referred to above present fairly, in all material respects, the financial position of All American Gold Corp. as of May 31, 2012, and 2011, and the results of its operations, changes in stockholders' equity (deficit) and cash flows for the periods described above in conformity with accounting principles generally accepted in the United States of America.

The accompanying financial statements have been prepared assuming that the Company will continue as a going concern. As discussed in Note 1 to the financial statements, the Company has insufficient working capital, which raises substantial doubt about its ability to continue as a going concern. Management's plans regarding those matters also are described in Note 1. The financial statements do not include any adjustments that might result from the outcome of this uncertainty.

F-7

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 1 BASIS OF PRESENTATION

a) **Organization**

Osprey Ventures, Inc. (the Company) was incorporated in the state of Wyoming on May 17, 2006, and changed its name to All American Gold Corp. on October 15, 2010, to engage in the acquisition, exploration and development of mineral resource properties. The Company is considered an exploration stage company as it has not generated revenues from its operations.

b) **Going Concern**

These financial statements have been prepared in conformity with generally accepted accounting principles in the United States of America with the assumption that the Company will be able to realize its assets and discharge its liabilities in the normal course of business rather than through a process of forced liquidation.

The Company's significant operating losses raise substantial doubt about its ability to continue as a going concern. Inherent in the Company's business are various risks and uncertainties, including its limited operating history, historical operating losses, dependence upon strategic alliances, and the historical success rate of mineral exploration.

In the accompanying financial statements, the Company incurred an accumulated deficit of \$2,206,704 for the period from May 17, 2006 (inception), to May 31, 2012, and has no revenue. The Company's future success is primarily dependent upon the existence of gold or other precious minerals on properties for which the Company owns a working interest or an option to acquire an interest. No minerals have yet been discovered on the properties. The Company's success will also be dependent upon its ability to raise sufficient capital to fund its exploration programs and, if gold is discovered, to exploit the discovery on a timely and cost-effective basis.

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

a) **Use of Estimates**

The preparation of financial statements in accordance with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and the disclosure of contingent assets and liabilities at the date of financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

b) **Functional Currency**

The Company's functional currency is the United States (U.S.) dollar.

c) **Cash**

Cash consists of cash on deposit with a government insured federally regulated bank and to date the Company has not experienced losses on any of its balances. The carrying amounts approximate fair market value due to the liquidity of these deposits. For purposes of reporting cash flows, the Company considers all short-term investments with an original maturity of three months or less to be cash equivalents. We had no cash equivalents

at either May 31, 2012, or May 31, 2011.

F-8

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

d) Financial Instruments

The Company's financial instruments consist of cash, accounts payable and accrued liabilities and loans from related parties. At May 31, 2012, the fair value of the Company's financial instruments approximate their carrying value based on their terms and interest rates.

e) Mineral Interests

Mineral interest acquisition costs include cash consideration and the estimated fair value of common shares issued for mineral properties, based on recent share issuances. Exploration and development expenditures are expensed in the period incurred until such time as the Company establishes the existence of commercial feasibility, at which time these costs will be deferred. Administrative expenditures are expensed in the period incurred.

Mineral interest acquisition costs and related interest & financing costs may be deferred until the property is placed into production, sold or abandoned. These costs will be deferred only when and if proven and probable reserves have been found to exist. No proven or probable reserves are currently known to exist.

Any deferred costs will be amortized on a unit-of-production basis over the estimated proven and probable reserves of the property following commencement of commercial production or written off if the property is sold, allowed to lapse or abandoned.

On an on-going basis, the Company evaluates the status of its mineral properties based on results to date to determine the nature of exploration and development work that is warranted in the future. If there is little prospect of further work on a property being carried out, the deferred costs related to that property are written down to their estimated recoverable amount.

f) Loss per Common Share

Basic net loss per share is computed by dividing the net income available to common shareholders (the numerator) for the period by the weighted average number of common shares outstanding (the denominator) during the period. The computation of diluted earnings is similar to basic earnings per share, except that the denominator is increased to include the number of additional common shares that would have been outstanding if potentially dilutive common shares had been issued. At May 31, 2012, and May 31, 2011, there was no variance between basic and diluted loss per share as there were no potentially dilutive securities outstanding.

g) Income Taxes

The Company accounts for income taxes under the provisions of ASC Topic, Accounting for Income Taxes, which requires recognition of deferred tax liabilities and assets for the expected future tax consequences of events that have been included in the financial statements or tax returns. Under this method, deferred tax liabilities and assets are determined based on the difference between the financial statement and tax bases of assets and liabilities and losses carried forward using enacted tax rates in effect for the year in which the

differences are expected to reverse.

F-9

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

The Corporation currently has no issues that create timing differences that would mandate deferred tax expense. Net operating losses would create possible tax assets in future years. Due to the uncertainty as to the utilization of net operating loss carry forwards, a valuation allowance has been made to the extent of any tax benefit that net operating losses may generate.

No provision for income taxes has been recorded due to the net operating loss carry forwards totaling approximately \$2,206,704 as of May 31, 2012, that will be offset against future taxable income; these operating loss carry forwards expire in various years through 2032. No tax benefit has been reported in the financial statements because the Corporation believes there is a 50% or greater chance the carry forwards will expire unused.

h) Foreign Currency Translation

The accounts of the Company's foreign operations have been translated into United States dollars. Assets and liabilities of those operations are translated in U.S. dollars using exchange rates as of the balance sheet date; income and expenses are translated using the average exchange rates for the reporting period. Translation adjustments are deferred in accumulated other comprehensive income (loss), a separate component of stockholders' equity. The translation was not material to accumulate in the current fiscal year.

i) Stock-based Compensation

The Company accounts for stock-based compensation issued to employees based on ASC Topic Share Based Payment which establishes standards for the accounting for transactions in which an entity exchanges its equity instruments for goods or services. It also addresses transactions in which an entity incurs liabilities in exchange for goods or services that are based on the fair value of the entity's equity instruments or that may be settled by the issuance of those equity instruments.

The Topic does not address the accounting for employee share ownership plans, which are subject to AICPA Statement of Position 93-6, Employers Accounting for Employee Stock Ownership Plans .

It requires an entity to measure the cost of employee services received in exchange for an award of equity instruments based on the grant-date fair value of the award (with limited exceptions). That cost will be recognized over the period during which an employee is required to provide service in exchange for the award the requisite service period (usually the vesting period). It further requires that the compensation cost relating to share-based payment transactions be recognized in financial statements. That cost will be measured based on the fair value of the equity or liability instruments issued. The scope of the Topic includes a wide range of share-based compensation arrangements including share options, restricted share plans, performance-based awards, share appreciation rights, and employee share purchase plans.

As at May 31, 2012, the Company had not adopted a stock option plan nor had it granted any stock options. Accordingly no stock-based compensation has been recorded to date.

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 2 SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (continued)

j) Joint Ventures

All exploration and production activities are conducted jointly with others and, accordingly, the accounts reflect only the Company's proportionate interest in such activities.

k) Environmental Protection and Reclamation Costs

The operations of the Company have been, and may in the future be affected from time to time in varying degrees by changes in environmental regulations including those for future removal and site restorations costs. Both the likelihood of new regulations and their overall effect upon the Company may vary from region to region and are not predictable.

The Company's policy is to meet or, if possible, surpass standards set by relevant legislation, by application of technically proven and economically feasible measures. Environmental expenditures that relate to ongoing environmental and reclamation programs will be charged against statements of operations as incurred or capitalized and amortized depending upon their future economic benefits. The Company does not currently anticipate any material capital expenditures for environmental control facilities because all property holdings are at early stages of exploration. Therefore, estimated future removal and site restoration costs are presently considered minimal.

l) Fair Value of financial Instruments

Disclosures about fair value of financial instruments define the fair value of a financial instrument as the amount at which the instrument could be exchanged in a current transaction between willing parties. The carrying values of the Company's financial instruments, which include cash, accounts receivable, and accrued expenses, approximate fair values due to the short-term maturities of such instruments.

m) Exploration Stage Company

The Company is considered an exploration-stage company, having limited operating revenues during the period presented in compliance with ASC Topic Accounting and Reporting of Development Stage Companies which requires those companies to report their operations, shareholders deficit and cash flows since inception through the date that revenues are generated from management's intended operations, among other things, Management has defined inception as May 17, 2006. Since inception, the company has incurred a net loss of \$2,206,704. Much of this is related to professional fees and the first phase of exploration on our optioned mining properties. Management has provided financial data since May 17, 2006 (inception), in the financial statements.

NOTE 3 RECENTLY ADOPTED AND RECENTLY ENACTED ACCOUNTING PRONOUNCEMENTS

In June 2009, ASC Topic *The FASB Accounting Standards Codification(TM) and the Hierarchy of Generally Accepted Accounting Principles - A Replacement of FASB Statement No. 162* was issued. This standard establishes the FASB Accounting Standards Codification(TM) (the Codification) as the source of authoritative accounting principles recognized by the FASB to be applied by nongovernmental entities in the preparation of financial statements in conformity with US GAAP. The Codification does not change current US GAAP, but is intended to

simplify user access to all authoritative US GAAP by providing all the authoritative literature related to a particular topic in one place.

F-11

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 3 RECENTLY ADOPTED AND RECENTLY ENACTED ACCOUNTING PRONOUNCEMENTS
(continued)

The Codification is effective for interim and annual periods ending after September 15, 2009, and as of the effective date, all existing accounting standard documents were superseded. The Codification is effective in the second quarter of the year ending May 31, 2010, and accordingly, the Annual Report on Form 10-K for the year ended May 31, 2010, and all subsequent public filings will reference the Codification as the sole source of authoritative literature. All guidance contained in the Codification carries an equal level of authority. The Codification superseded all existing non-SEC accounting and reporting standards. All other non-grandfathered, non-SEC accounting literature not included in the Codification is non-authoritative. The FASB will not issue new standards in the form of Statements, FASB Staff Positions or Emerging Issues Task Force Abstracts. Instead, it will issue Accounting Standards Updates (ASUs). The FASB will not consider ASUs as authoritative in their own right. ASUs will serve only to update the Codification, provide background information about the guidance and provide the bases for conclusions on the change(s) in the Codification. References made to FASB guidance throughout these consolidated financials have been updated for the Codification.

In June 2011, the FASB issued ASU 2011-05, *Comprehensive Income (Topic 220): Presentation of Comprehensive Income*, which is effective for annual reporting periods beginning after December 15, 2011. ASU 2011-05 will become effective for the Company on December 1, 2012. This guidance eliminates the option to present the components of other comprehensive income as part of the statement of changes in stockholders' equity. In addition, items of other comprehensive income that are reclassified to profit or loss are required to be presented separately on the face of the financial statements. This guidance is intended to increase the prominence of other comprehensive income in financial statements by requiring that such amounts be presented either in a single continuous statement of income and comprehensive income or separately in consecutive statements of income and comprehensive income. The adoption of ASU 2011-05 is not expected to have a material impact on our financial position or results of operations.

In April 2010, the FASB issued ASU 2010-13, "Compensation - Stock Compensation (Topic 718) - Effect of Denominating the Exercise Price of a Share-Based Payment Award in the Currency of the Market in Which the Underlying Equity Security Trades (A consensus of the FASB Emerging Issues Task Force)" (ASU 2010-13). ASU 2010-13 clarifies that a share-based payment award with an exercise price denominated in the currency of a market in which a substantial portion of the entity's equity securities trades should not be considered to contain a condition that is not a market, performance, or service condition. Therefore, such an award should not be classified as a liability if it otherwise qualifies as equity. This clarification of existing practice is effective for fiscal years, and interim periods within those fiscal years, beginning on or after December 15, 2010, with early application permitted. We are currently evaluating the impact of this ASU; however, we do not expect the adoption of this ASU to have a material impact on our financial statements.

In March 2010, the FASB (Financial Accounting Standards Board) issued Accounting Standards Update 2010-11 (ASU 2010-11), *Derivatives and Hedging (Topic 815): Scope Exception Related to Embedded Credit Derivatives*. The amendments in this Update are effective for each reporting entity at the beginning of its first fiscal quarter beginning after June 15, 2010. Early adoption is permitted at the beginning of each entity's first fiscal quarter beginning after issuance of this Update. The Company does not expect the provisions of ASU 2010-11 to have a material effect on the financial position, results of operations or cash flows of the Company.

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 3 RECENTLY ADOPTED AND RECENTLY ENACTED ACCOUNTING PRONOUNCEMENTS
(Continued)

In May 2009, ASC Topic 855, *Subsequent Events* was issued which established principles and requirements for evaluating and reporting subsequent events and distinguishes which subsequent events should be recognized in the financial statements versus which subsequent events should be disclosed in the financial statements. ASC Topic 855 was effective for interim periods ending after June 15, 2009. Because it impacts the disclosure requirements, not the accounting treatment for subsequent events, the adoption of ASC Topic 855 did not impact our consolidated results of operations or financial condition. In February 2010, the FASB issued ASU No. 2010-09 *Subsequent Events (ASC Topic 855) Amendments to Certain Recognition and Disclosure Requirements* (ASU No. 2010-09) which requires an entity that is an SEC filer to evaluate subsequent events through the date that the financial statements are issued. The adoption did not have an impact on the Company's financial position and results of operations. See Note 8 for disclosures regarding subsequent events.

In January 2010, FASB issued Accounting Standards Update (ASU) No. 2010-06, *Improving Disclosures about Fair Value Measurements* which amends FASB Accounting Standards Codification (ASC) 820 and clarifies and provides additional disclosure requirements related to recurring and non-recurring fair value measurements and employers disclosures about postretirement benefit plan assets. This ASU is effective for interim and annual reporting periods beginning after December 15, 2010. The adoption of ASU 2010-06 did not have a material impact on the Company's financial statements.

In April 2009, the FASB issued ASC 805-10, *Accounting for Assets Acquired and Liabilities assumed in a Business Combination That Arise from Contingencies An Amendment of FASB Statement No. 141 (Revised December 2007), Business Combinations*. ASC 805-10 addresses application issues raised by preparers, auditors and members of the legal profession on initial recognition and measurement, subsequent measurement and accounting and disclosure of assets and liabilities arising from contingencies in a business combination. ASC 805-10 is effective for assets or liabilities arising from contingencies in business combinations for which the acquisition date is on or after the beginning of the first annual reporting period beginning on or after December 15, 2008. ASC 805-10 will have an impact on our accounting for any future acquisitions and its consolidated financial statements.

In August 2009, the FASB issued ASU No. 2010-05, *Measuring Liabilities at Fair Value*, which provides additional guidance on how companies should measure liabilities at fair value under ASC 820. The ASU clarifies that the quoted price for an identical liability should be used. However, if such information is not available, an entity may use the quoted price of an identical liability when traded as an asset, quoted prices for similar liabilities or similar liabilities traded as assets, or another valuation technique (such as the market or income approach). The ASU also indicates that the fair value of a liability is not adjusted to reflect the impact of contractual restrictions that prevent its transfer and indicates circumstances in which quoted prices for an identical liability or quoted price for an identical liability traded as an asset may be considered level 1 fair value measurements and was effective October 1, 2010. We would not expect it to have a material impact on our consolidated results of operations or financial condition.

NOTE 3 RECENTLY ADOPTED AND RECENTLY ENACTED ACCOUNTING PRONOUNCEMENTS
(Continued)

Recently Issued Accounting Standards

In August 2009, the FASB issued an amendment to the accounting standards related to the measurement of liabilities that are recognized or disclosed at fair value on a recurring basis. This standard clarifies how a company should measure the fair value of liabilities and that restrictions preventing the transfer of a liability should not be considered as a factor in the measurement of liabilities within the scope of this standard. This standard was effective for the Company on October 1, 2010. The Company does not expect the impact of its adoption to be material to its financial statements.

In October 2009, the FASB issued an amendment to the accounting standards related to the accounting for revenue in arrangements with multiple deliverables including how the arrangement consideration is allocated among delivered and undelivered items of the arrangement. Among the amendments, this standard eliminated the use of the residual method for allocating arrangement considerations and requires an entity to allocate the overall consideration to each deliverable based on an estimated selling price of each individual deliverable in the arrangement in the absence of having vendor-specific objective evidence or other third party evidence of fair value of the undelivered items. This standard also provides further guidance on how to determine a separate unit of accounting in a multiple-deliverable revenue arrangement and expands the disclosure requirements about the judgments made in applying the estimated selling price method and how those judgments affect the timing or amount of revenue recognition. This standard will become effective for the Company on January 1, 2012. The Company does not expect the impact of its adoption to be material to its financial statements.

NOTE 4 RELATED PARTY TRANSACTIONS

In 2006, the Company issued a total of 50,000,000 shares of its restricted common stock to two directors (25,000,000 to each) for \$5,000 (\$.0001/share).

Officers contributed administrative services to the Company for certain periods to May 31, 2008. The time and effort was recorded in the accompanying financial statements based on the prevailing rates for such services, which equaled \$50 per hour based on the level of services performed. The services were reported as contributed administrative support with a corresponding credit to additional paid-in capital. No contributed administrative costs have been incurred in the current year to date.

On April 16, 2011, a director of the Company, through a wholly owned corporation, loaned the Company \$30,000 in exchange for a promissory note. The note carries a five percent interest rate and matures on April 30, 2012. Accrued interest payable on the note was \$1,995 at May 31, 2012.

On December 1, 2010, the Company entered into a consulting agreement with Brent Welke, our president and a director, for a term of 36 months, whereby Mr. Welke has agreed to provide the Company with various consulting services. As compensation, the Company has agreed to pay Mr. Welke US \$1,000 on the first day of each of the 36 months, pursuant to the terms of the consulting agreement and has issued 2,500,000 shares of the Company's common stock which, for accounting purposes, has been valued at \$12,500 which is based on the last issue price of our common stock of \$0.005 per share.

NOTE 4 RELATED PARTY TRANSACTIONS (continued)

On July 1, 2011, the Company entered into a consulting agreement with Gaspar R. Gonzalez, our treasurer, Chief Financial Officer and a director, for a term of 36 months, whereby Mr. Gonzalez agreed to provide the Company with various financial consulting services. As compensation, the Company agreed to pay him US \$1,000 on the first day of each of the 36 months, pursuant to the terms of the consulting agreement and issued 2,000,000 shares of the Company's common stock which, for accounting purposes, was valued at \$1,000,000 which is based on the last price at which our common stock traded at the close of business on July 1, 2011 \$0.50 per share.

NOTE 5 OPTION ON MINERAL PROPERTY UNPROVEN MINERAL INTERESTS

Mineral Property Interests State of Nevada U.S.A.

On August 23, 2010 we entered into three agreements with TAC Gold Inc., a Canadian reporting issuer, in regards to the acquisition of certain property interests. The interests that we have acquired are as follows:

- An option to acquire a 70% interest in a mineral exploration property called the Belleville property in Mineral County, Nevada. TAC Gold has an underlying option agreement with Minquest Inc. for the acquisition of a 100% interest in the property (under which agreement Minquest has retained a 3% net smelter return royalty);
- An option to acquire a 35% interest in a mineral exploration property called the Goldfield West property in Esmeralda County, Nevada. TAC Gold has an underlying option agreement with Minquest Inc. for the acquisition of a 100% interest in the property; and
- A right of first refusal on an additional exploration property called the Iowa Canyon property in Lander County, Nevada for period of 12½ months to September 9, 2012 as amended on August 10, 2011.

Pursuant to the terms of the above noted option agreements, in order to earn the 70% interest in the Belleville property we have assumed our 70% portion of the obligations of TAC Gold under their option agreements with Minquest which consist of:

- Making payments in the aggregate amount of \$170,000 in payments ranging from \$20,000 to \$50,000, to the sixth anniversary of the underlying option agreement; and
- Incurring exploration expenditures in the aggregate amount of \$1,320,000 in annual amounts ranging from \$120,000 to \$400,000, to the seventh anniversary of the underlying option agreement.

In regard to the option agreement for the Goldfield West property, in order to earn the 35% interest in the property we have assumed our 35% portion of the obligations of TAC Gold under their option agreements with Minquest which consist of:

- Making payments in the aggregate amount of \$98,000 in annual periodic payments ranging from \$7,000 to \$24,500 to the seventh anniversary of the underlying option agreement and initial payments of \$300,000; and
- Incurring exploration expenditures in the aggregate amount of \$770,000 in annual amounts ranging from \$70,000 to \$175,000 to the seventh anniversary of the underlying option agreement.

Upon payment of the \$300,000 to TAC (paid as to \$200,000 on September 14, 2011 and \$100,000 on November 24, 2011), we earned a 35% interest in the Goldfield West Property. In order to maintain this 35% interest, we are

required to aggregate cash payments of \$98,000 over a seven year period and incur an aggregate of \$770,000 in exploration expenditures over a seven year period as described below.

F-15

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 5 OPTION ON MINERAL PROPERTY UNPROVEN MINERAL INTERESTS (continued)

In addition, TAC Gold is required to make certain share issuances to Minquest under the terms of their option agreements (700,000 shares in regards to the Belleville property and 1,000,000 shares in regards to the Goldfield West Property, periodically over the terms of the agreements). We are obligated to reimburse TAC Gold in either cash for the fair market value of the TAC Gold shares that are issued to Minquest or in the issuance of the equivalent value of All American shares as have a market value equal to the amount of the payment then due. The common shares of TAC Gold are listed for trading on the CNSX.

The schedule of payments, stock issuances & required property expenditures under the agreements is as follows:

BELLEVILLE ALL AMERICAN S 70% INTEREST

All American s Portion	70%		70%
Anniversary Date	Payment	Share Issuance	Property Expenditure
August 4, 2010	Paid by TAC	Paid by TAC	Paid by TAC
August 4, 2011	\$14,000 (paid)	9,804	\$84,000 (paid)
August 4, 2012	\$21,000	TBD	\$105,500
August 4, 2013	\$21,000	TBD	\$140,000
August 4, 2014	\$28,000	TBD	\$140,500
August 4, 2015	\$35,000	TBD	\$175,000
August 4, 2016	\$0	TBD	\$280,000
TOTALS	\$133,000		\$995,000

Technically we are in default of the option agreement for not having issued shares to TAC and for not having paid the \$105,500 property expenditure. However, TAC has not yet completed their share issuance to Minquest so we currently do not have a basis upon which to make our share issuance to TAC. We have been informed that TAC will complete their share issuance by the end of the first full week of September at which time we intend to make our payment to TAC. Further, we are still awaiting a cash call and a formalized exploration program from TAC, Minquest and their engineers as to the planned exploration program for the current work season; we expect to be in a position to move forward in September, 2011 and will make whatever expenditures are required at that time. In the event that we elected to terminate the option agreement, no payment or share issues would be required to be made. Should TAC fail to issue the shares under its agreements with Minquest or fail to make its required property expenditures, All American would either have to negotiate with Minquest and form a new option agreement between Minquest and All American or terminate the option and lose our interest in the property or make some other mutually agreeable arrangement with the parties involved.

GOLDFIELD ALL AMERICAN 35% INTEREST

All American must pay to TAC Gold \$200,000 on date of execution and \$100,000 by November 21, 2011 (fully paid)

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 5 OPTION ON MINERAL PROPERTY UNPROVEN MINERAL INTERESTS (continued)

All American s Portion	35% of TAC		35%
Anniversary Date	Payment	Share Issuance	Property Expenditure
September 14, 2010	\$200,000 (paid)	Nil	Nil
November 21, 2010	\$100,000 (paid)	Nil	Nil
January 20, 2011	\$7,000 (paid) *	9,651	\$70,000 (paid)
January 20, 2012	\$10,500 (paid)	41,677	\$70,000 (paid)
January 20, 2013	\$10,500	TBD	\$87,500
January 20, 2014	\$14,000	TBD	\$105,000
January 20, 2015	\$14,000	TBD	\$122,500
January 20, 2016	\$17,500	TBD	\$140,000
January 20, 2017	\$24,500	TBD	\$175,000
TOTALS	\$398,000		\$770,000

* included as a credit as part of the cost of the acquisition of the option agreement and paid by TAC Gold

As of the date of this periodic report, we are in full compliance with the terms of the option agreement on the Goldfield West property and are current in all payments, exploration expenditures or advances on planned exploration programs and share issuances to TAC under the option agreements. At this time, neither TAC nor Minquest are in a position to present a geological exploration and drilling program for the current year and do not expect to be until sometime in the late Spring or early summer. Therefore, TAC has postponed the requirement of the Option Agreement that requires the property expenditure payment be made on January 20, 2012, until September 20, 2012, or until such time as they are prepared to make specific recommendations as to an exploration program for the current year. In the event that we elected to terminate the option agreement, no payment would be required to be made. Should TAC fail to make its required property expenditures, All American would either have to negotiate with Minquest and form a new option agreement between Minquest and All American or terminate the option and lose our interest in the property or make some other mutually agreeable arrangement with the parties involved. The share issuance to TAC under the option agreement was made subsequent to the end of the quarter. As of the date of this periodic report, we are otherwise in full compliance with the terms of the option agreement on the Goldfields West property and are current in all other payments, exploration expenditures or advances on planned exploration programs and share issuances to TAC under the option agreements.

DESERT PACIFIC ESSEX BELL FLATS PROPERTIES

On April 13, 2012, we entered into a non-binding Letter of Intent (the "Desert Pacific Essex LOI") with Desert Pacific Exploration, Inc. ("Desert Pacific") that set out the general terms and conditions between Desert Pacific and the Corporation for the Essex mineral property located in White Pine County, Nevada, which allowed us to exclusively

investigate the mineral property until May 12, 2012, and whereby the Corporation had an exclusive right to enter into a mining option agreement with Desert Pacific at any time prior to May 12, 2012. In consideration of signing the Letter of Intent, we have paid to Desert Pacific sum of \$2,500 concurrently with the execution and delivery of the LOI. review historical records on the Essex property, discuss their implications with Desert Pacific and our engineers so as to determine if we wish to enter into a mining option agreement with Desert Pacific to explore the project.

F-17

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 5 OPTION ON MINERAL PROPERTY UNPROVEN MINERAL INTERESTS (continued)

The Essex Project is comprised of 18 unpatented mining claims covering a total of 360 acres within the Nevada mining district, White Pine County, Nevada and is located approximately 10 miles southeast of Ely, Nevada. This project represents an advanced stage exploration property with no defined resource. However, drilling on roughly 400 feet centers with significant underground workings have identified a mineralized zone approximately 4,500 feet in length and open in both directions. The project area encompasses a northwesterly trending structural zone which can be followed along strike for over 2,500 meters. The structure cuts Devonian Guillemette limestone, Devonian/Mississippian Pilot shale, Mississippian Joana limestone, and Mississippian Chainman shale which are the host rocks in the Alligator Ridge district. Workings and drill holes have encountered gold and silver within a jasperoid developed along Joana-Chainman contact zone where it plunges to the west. The mineralization has been followed to depths of 700 feet in historic workings.

Historic work in the area was initiated as early as 1869 when a minor amount of silver was produced. Production started again in the early 1900 s when manganese ore was shipped.

Recent exploration includes 2 holes by Newmont in 1978, 7 holes by Homestake in 1980, and 26 holes by Echo Bay from 1988 to 1989. This work defines a corridor of gold and silver mineralization trending northwesterly for over 2,500 meters. The zone is lost under alluvial cover to the southeast and northwest, but appears to continue based on CSMT surveys conducted by Cominco in 1996.

Desert Pacific believes the property shares similarities with Alligator Ridge and has gold mining potential. Targets within the Pilot Shale, the main host for Alligator Ridge ore deposits, remain untested.

On May 7, 2012, we entered into a non-binding Letter of Intent (the Desert Pacific Bell Flats LOI) with Desert Pacific Exploration, Inc. (Desert Pacific) that set out the general terms and conditions between Desert Pacific and the Corporation for the Bell Flats mineral property located in Churchill County, Nevada, which allowed us to exclusively investigate the mineral property for a forty-five (45) day period until June 22, 2012, and whereby the Corporation has an exclusive right to enter into a mining option agreement with Desert Pacific at any time prior to June 22, 2012. In consideration of signing the Letter of Intent, we paid to Desert Pacific sum of \$2,500 concurrently with the execution and delivery of the LOI.

The Bell Flats Project is comprised of 14 unpatented mining claims covering a total of 280 acres within the Nevada mining district, Churchill County, Nevada and is located approximately 5 miles north of Gabbs, Nevada and 25 miles north of the Paradise Peak mine. This project represents an advanced stage exploration property with no defined resource. Extensive soil and rock sampling, geophysical surveys and drilling have identified several alteration zones along a corridor approximately 3,500 meters in length. Gold and silver occur developed along the contact of jasperoid and argillized Tertiary volcanic rock intermittently along the corridor. The mineralization has been encountered from surface to depths of 160 meters in drilling. Gold values exceed 5.1 g/t in trenching while silver values reach 200 g/t from historic drilling. The mineralized zone is open in all directions. A Santa Fe type model is indicated for the project based on the geology and alteration.

The project area encompasses a northwesterly trending structural zone. The structure cuts Tertiary felsic volcanic rocks and Triassic sediments which are the host rocks at the nearby Santa Fe gold-silver deposits. Alteration as jasperoid follows the contact of the Triassic limestone and Tertiary volcanic rocks. Shallow pits, trenches and drill

holes have encountered gold and silver within argillized shale and jasperoid developed along this contact and within a clay altered felsic volcanic. Altered rocks are capped by post-mineral basalt and wind-blown sand.

F-18

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 5 OPTION ON MINERAL PROPERTY UNPROVEN MINERAL INTERESTS (continued)

Historic work in the area was initiated in the early 1900 s when prospectors discovered copper oxides within an exposed granitic sill on the south end of the property. There is no reported production from the property.

Recent exploration includes several holes by Dome exploration in 1985 and 9 holes by Hemlo Gold in 1993. Hemlo also conducted an IP survey resulting in 9 lines on the north half of the property. Homeland Precious Metals collected over 300 auger soil samples in 2005. The various exploration programs define a corridor of gold and silver mineralization trending northwesterly for over 3,500 meters under alluvial cover to the northwest.

We then set about having our engineers review the historical records on the Essex and Bell Flats properties and to discuss the implications with Desert Pacific and our Board of Directors. After reviewing all of the available data our engineers advised that there was insufficient merit to the projects and that All American was advised to not enter into a mining option agreement with Desert Pacific to explore the project. As a result, All American has no further obligations under the Letters of Intent on either project.

IOWA CANYON ALL AMERICAN 15% INTEREST

On January 12, 2012, the Board of Directors decided not to proceed further with the Iowa Canyon property at this time because raising the required funds would strain or jeopardize our ability to secure the funds that we require to continue moving forward with our two primary targets the Belleville and Goldfield West projects. At this point there will be no further expenditures made in regards to the Iowa Canyon property.

GAO FENG GOLD PROPERTY JIANGXI PROVINCE, CHINA

In April, 2007 the Company entered into an Option to Purchase and Royalty Agreement, as amended May 15, 2011, to acquire a 25% interest in a mining property with no known reserves, in Jiangxi Province, China. On January 31, 2011, the agreement was terminated as a result of insufficient results being obtained from the first phase of exploration and the high costs of a projected second phase as reported and recommended in a geological engineering report dated January 18, 2011. No further payments, consideration or share issuances are required as a result of the termination of the agreement.

NOTE 6 CAPITAL STOCK

a) **Common Stock**

In 2006 the Company issued 50,000,000 of its common stock at a price of \$0.001 per share for proceeds of \$5,000. The offering was made pursuant to section 4(2) of the Securities Act.

In 2007, the Company offered for sale 30,000,000 shares of its common stock at a price of \$0.01 per share and sold 22,000,000 shares for net proceeds of \$22,000 pursuant to Rule 903 of Reg. S of the Act.

In late 2008 and early 2009, the Company took receipt of \$92,000 in payment for 18,400,000 shares of its common stock at a price of \$0.005 per share issued under an S-1 registration statement dated September 5, 2008, which became effective on September 18, 2008. Treasury orders were issued regarding the delivery of 18,400,000 shares that were sold under the S-1 registration statement.

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 6 CAPITAL STOCK (continued)

On November 30, 2010 the Company issued 2,500,000 of its common stock valued at the last issuance price of \$0.005 per share to an officer and director under a consulting agreement. The offering was made pursuant to section 4(2) of the Securities Act.

On July 1, 2011 the Company issued 2,000,000 of its common stock valued at the last trading price of \$0.50 per share to an officer and director under a consulting agreement. The offering was made pursuant to section 4(2) of the Securities Act.

On July 13, 2011, the Company issued 875,000 shares of its common stock at \$0.40 per share upon receipt of Notice of Conversion related to a \$350,000 Convertible Debenture. We issued the shares in an offshore transaction relying on Regulation S and/or Section 4(2) of the Securities Act of 1933. Based on the terms of the agreement we should have issued 765,027 shares but over allotted the number of shares to be issued through an error in calculating the closing price as stipulated under the agreement; the value of those over allotted shares was \$71,996 which is reflected in the financial statements as being a loss on the conversion and recorded in the statements as such.

On July 11, 2011 the Company issued 400,000 shares of our common stock in a private placement, raising gross proceeds of \$200,000, or \$0.50 per share. We issued the shares in an offshore transaction relying on Regulation S and/or Section 4(2) of the Securities Act of 1933.

On September 9, 2011 the Company issued 400,000 shares of our common stock in a private placement, raising gross proceeds of \$280,000, or \$0.70 per share. We issued the shares in an offshore transaction relying on Regulation S and/or Section 4(2) of the Securities Act of 1933.

On October 3, 2011, the Company issued 19,455 shares of our common stock to satisfy the annualized obligations of the Nevada option agreements on the Belleville and Goldfields West properties to TAC Gold to reimburse them for the equivalent dollar value (\$18,186) of shares of TAC issued to Minquest Inc. under the underlying agreements to the option agreements between the Company and TAC at a deemed price of \$0.51 per share which reflected the average closing price of the Company's stock on the OTC-BB for the ten days prior to the issuance in accordance with the terms of the agreement. We issued the shares in an offshore transaction relying on Regulation S and/or Section 4(2) of the Securities Act of 1933.

On March 26, 2012, we issued 41,667 shares of our common stock to satisfy the annualized obligations of the option agreements on the Goldfield West property to TAC Gold to reimburse them for the equivalent dollar value (\$3,750) of shares of TAC issued to Minquest Inc. under the underlying agreements to the option agreements between the Company and TAC at a price of \$0.09 per share which reflected the average closing price of the Company's stock on the OTC-BB for the ten days prior to the issuance in accordance with the terms of the agreement. We issued the shares in an offshore transaction relying on Regulation S and Section 4(2) of the Securities Act of 1933.

ALL AMERICAN GOLD CORP.
(formerly Osprey Ventures, Inc.)
(An Exploration Stage Company)
Notes to the Financial Statements
May 31, 2012

NOTE 6 CAPITAL STOCK (continued)**b) Stock Options**

The Company does not have a stock option plan and no options or rights to acquire options have been granted.

NOTE 7 INCOME TAXES

The Company accounts for income taxes under the asset and liability method prescribed by ASC Topic Accounting for Income Taxes. This approach requires the recognition of deferred tax assets and liabilities for the expected future tax consequences attributable to temporary differences between the carrying amounts and the tax bases of assets and liabilities. Deferred tax assets and liabilities are measured using enacted tax rates expected to be applicable to taxable income in the years in which those temporary differences are expected to be recovered or settled. The effect on deferred tax assets and liabilities of a change in tax rates is recognized in income in the period that includes the enactment date. Valuation allowances are established when necessary to reduce deferred tax assets to the amounts expected to be realized.

In addition, effective June 1, 2007, the Company adopted ASC 740-10, Accounting for Uncertainty in Income Taxes, which clarifies the criteria that an individual tax position must satisfy for some or all of the benefits of that position to be recognized in a company's financial statements. ASC 740-10 prescribes a recognition threshold of more likely than not, and a measurement attribute for all tax positions taken or expected to be taken on a tax return, in order for those tax positions to be recognized in the financial statements. The Company did not record any transition adjustment as a result of the adoption of ASC 740-10.

The Company recognizes accrued interest and penalties related to potential liability for uncertain tax positions as a component of tax expense. This policy did not change as a result of the adoption of ASC 740-10. No penalties were recognized during fiscal 2012 or fiscal 2011.

No provision for income taxes has been recorded due to the net operating loss carry forwards totaling approximately \$2,206,704 as of May 31, 2012, that will be offset against future taxable income. The available net operating loss carry forwards expire in various years through 2030. No tax benefit has been reported in the financial statements because the Corporation believes there is a 50% or greater chance the carry forwards will expire unused.

	May 31			
		2012		2011
Net Operating Loss	\$	2,206,704	\$	540,684

Income tax recovery at statutory rate	\$	750,279	\$	183,833
Less valuation allowance		(750,279)		(183,833)
Net deferred income tax asset		---		---

NOTE 8 SUBSEQUENT EVENTS

There are no other subsequent events upon which to report. Subsequent events have been evaluated through the date of this financial report as being the latest practicable and most reasonable date for which to evaluate and include subsequent events in this report.

F-21

Item 9. Changes in and Disagreements With Accountants on Accounting and Financial Disclosure

There were no disagreements related to accounting principles or practices, financial statement disclosure, internal controls or auditing scope or procedure during the two fiscal years and interim periods, including the interim period up through the date the relationship ended.

There were no changes in our independent accountants for the years ended May 30, 2012, and 2011.

Item 9A(T). Controls and Procedures

We maintain disclosure controls and procedures that are designed to ensure that information required to be disclosed in our reports filed under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in the SEC's rules and forms, and that such information is accumulated and communicated to our management, including our principal executive officer (our president) and our principal accounting and financial officer (our chief financial officer and treasurer) to allow for timely decisions regarding required disclosure. In designing and evaluating our disclosure controls and procedures, our management recognizes that any controls and procedures, no matter how well designed and operated, can provide only reasonable assurance of achieving the desired control objectives, and our management is required to apply its judgment in evaluating the cost-benefit relationship of possible controls and procedures.

Our management does not expect that our disclosure controls or our internal controls over financial reporting will prevent all error and fraud. A control system, no matter how well conceived and operated, can provide only reasonable, but not absolute, assurance that the objectives of a control system are met. Further, any control system reflects limitations on resources and the benefits of a control system must be considered relative to its costs. These limitations also include the realities that judgments in decision-making can be faulty and that breakdowns can occur because of simple error or mistake. Additionally, controls can be circumvented by the individual acts of some persons, by collusion of two or more people or by management override of a control. A design of a control system is also based upon certain assumptions about potential future conditions; over time, controls may become inadequate because of changes in conditions, or the degree of compliance with the policies or procedures may deteriorate. Because of the inherent limitations in a cost-effective control system, misstatements due to error or fraud may occur and may not be detected.

As of May 31, 2012, the year end period covered by this report, we carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and our principal financial officer, of the effectiveness of the design and operation of our disclosure controls and procedures. Based on the foregoing, our president and chief financial officer concluded that our disclosure controls and procedures were ineffective as of the end of the period covered by this annual report.

There have been no significant changes in our internal controls over financial reporting that occurred during the fiscal year ended May 31, 2012, that have materially or are reasonably likely to materially affect, our internal controls over financial reporting.

Management's Report on Internal Control over Financial Reporting

Our management is responsible for establishing and maintaining adequate internal control over financial reporting as defined in Rule 13a-15(f) under the Exchange Act, and assessed the effectiveness of our internal control over financial reporting as of May 31, 2012. In making this assessment, our management used the criteria set forth by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) in Internal Control-Integrated Framework. A material weakness is a deficiency or a combination of deficiencies, in internal control over financial reporting, such

that there is a reasonable possibility that a material misstatement of the company's annual or interim financial statements will not be prevented or detected on a timely basis. We have identified the following material weaknesses:

1. As of May 31, 2012, we did not maintain effective controls over the control environment. Specifically, we have not developed and effectively communicated to our employees our accounting policies and procedures. This has resulted in inconsistent practices. Further, the Board of Directors does not currently have any independent members and no director qualifies as an audit committee financial expert as defined in Item 407(d)(5)(ii) of Regulation S-K. Since these entity level programs have a pervasive effect across the organization, management has determined that these circumstances constitute a material weakness.
2. As of May 31, 2012, we did not maintain effective controls over financial statement disclosure. Specifically, controls were not designed and in place to ensure that all disclosures required were originally addressed in our financial statements. Accordingly, management has determined that this control deficiency constitutes a material weakness.

Because of these material weaknesses, management has concluded that the Company did not maintain effective internal control over financial reporting as of May 31, 2012, based on the criteria established in Internal Control-Integrated Framework issued by COSO.

This annual report does not include an attestation report of the company's independent registered public accounting firm regarding internal control over financial reporting. Management's report was not subject to the attestation by the company's registered public accounting firm pursuant to temporary rules of the SEC that permit the company to provide only management's report.

Item 9B. Other Information

None.

PART III

Item 10. Directors, Executive Officers and Corporate Governance

The following individuals serve as the directors and executive officers of our company as of the date of this annual report. All directors of our company hold office until the next annual meeting of our shareholders or until their successors have been elected and qualified. The executive officers of our company are appointed by our board of directors and hold office until their death, resignation or removal from office.

Name	Position Held with Our Company	Age	Date First Elected or Appointed
Brent Welke	Chief Executive Officer Chief Operating Officer Director	65	December 1, 2010
Dr. Gaspar R Gonzalez, Jr.	Chief Financial Officer Director	58	July 1, 2011

None of the directors or officers has professional or technical accreditation in the exploration, development or operations of mining or mining related projects. During the past year, our president, Mr. Welke, and our Treasurer, Mr. Gonzalez, each spent approximately 10% of his time (approximately 6 hours per week) on the affairs of All American. For the coming year, it is anticipated that their time commitment and requirement will remain approximately the same.

Business Experience

The following is a brief account of the education and business experience during at least the past five years of each director, executive officer and key employee of our company, indicating the person's principal occupation during that period, and the name and principal business of the organization in which such occupation and employment were carried out.

Brent Welke *President, Secretary, Treasurer, Chief Executive Officer and Director* From August, 2002 to present, Mr. Welke has been an attorney practicing various areas of law such as estates, class actions, consumer protection and bankruptcy, and post conviction criminal litigation. From April 2007 to August 2008, he was the chief executive officer of Agnova Corporation, a high tech soil supplement Corporation. From 1982 to 1990, he was chief landman for the North American Coal Corporation whereby he was responsible for all corporate leases and acquisition of surface tracts in various states and supervised a complete corporate real estate restructuring. As a chief executive officer, Mr. Welke's responsibilities included overseeing the Corporation's day-to-day activities.

Gaspar R. Gonzalez, Jr. *Chief Financial Officer and Treasurer* - As chief financial officer, Dr. Gonzalez, Jr. oversees all of the organization, planning, reporting and analyzing of the Company's financial data. Dr. Gonzalez, Jr. has more than fifteen years executive-level experience in financial management organizations. Prior to joining the Company, from 1997 to 2009, he was an advisor on global business alliances and a senior director of international development in strategic affairs and governmental business development with United States Advanced Resource Technologies. His responsibilities included the introduction and development of strategic business alliances; serving as host with governments, while bridging respective organizations to key decision making contacts in the target country; identifying the client's needs and interfacing with the sales and delivery of technical advisory services, mergers and acquisitions, and infrastructure developers in Asia/Pacific, Latin America, Africa and Europe; leading international operations. These included functions of general management issues specializing in banking and international finance, international trade and commerce, energy, water, environmental management, telecommunications, healthcare, pharmaceutical and nutraceutical, food and distribution sectors. From August 2005 to July 2007 Dr. Gonzalez, Jr. was the senior advisor, director, project manager and program facilitator with Menon Foundation in Dubai, UAE, where his responsibilities included advising on all phases of negotiations and contracts, stemming from letters of intent to final payments and review of contract structures; coordinating with all responsible parties and consolidating reports; verifying and hypothecating all negotiable instruments for transactions; identifying fraudulent operators and coordinating reporting with the Federal Reserve and all other respective duties assigned by the authority of the Sheik. His financial control and commercial skills played a crucial role in helping Menon Foundation achieve and exceed its projected growth year after year. He has experience in the financial sector working with entities such as IMF, Export-Import Bank, World Bank, USAID and others specializing in banking, international financial operations, international trading and minerals and oil related industries. Dr. Gonzalez earned his Bachelor of Business Administration degree at Florida Atlantic University (1979). He also holds a Doctorate Business Administration/PHD (1992) in international business development and finance. Dr. Gonzalez is multilingual DOD/NSA certified in English, Spanish, French, Portuguese, Italian and with working knowledge in Chinese.

Involvement in Certain Legal Proceedings

During the past five years, none of our officers, directors, promoters or control persons have had any of the following events occur:

- a bankruptcy petition filed by or against any business of which such person was a general partner or executive officer either at the time of the bankruptcy or within two years prior to that time;
- conviction in a criminal proceeding or being subject to a pending criminal proceeding, excluding traffic violations and other minor offenses;
- being subject to any order, judgement or decree, not substantially reversed, suspended or vacated, of any court of competent jurisdiction, permanently enjoining, barring, suspending or otherwise limiting his involvement in any type of business, securities or banking business; and/or
- being found by a court of competent jurisdiction, in a civil action, the SEC or the Commodity Futures Trading Commission to have violated a federal or state securities or commodities law, and the judgement has not been reversed, suspended or vacated.

Compliance with Section 16(a) of the Securities Exchange Act of 1934

Section 16(a) of the Exchange Act requires our executive officers and directors and persons who own more than 10% of our common stock to file with the SEC initial statements of beneficial ownership, reports of changes in ownership and annual reports concerning their ownership of our common stock and other equity securities, on Forms 3, 4 and 5 respectively. Executive officers, directors & greater than 10% shareholders are required by the SEC regulations to furnish us with copies of all Section 16(a) reports that they file.

Based solely on our review of the copies of such forms received by us, or written representations from certain reporting persons, we believe that during fiscal year ended May 31, 2012, all filing requirements applicable to our officers, directors and greater than 10% percent beneficial owners were complied with, with the exception of the following:

Name	Number of Late Reports	Number of Transactions Not Reported on a Timely Basis	Failure to File Required Forms
Brent Welke	0	0	0
Gaspar R. Gonzalez	0	0	0

Code of Ethics

Our board of directors on April 22, 2008, adopted a formal written Code of Business Conduct and Ethics and Compliance Program for all officers, directors and senior employees. Our Code of Business Conduct and Ethics Program was filed as an exhibit to our Form S-1 filed with the SEC on September 05, 2008.

Audit Committee and Audit Committee Financial Expert

Our board of directors has determined that it does not have a member of its audit committee that qualifies as an audit committee financial expert as defined in Item 407(d)(5)(ii) of Regulation S-K, and is independent as the term is used in Item 7(d)(3)(iv) of Schedule 14A under the Exchange Act.

We believe that the members of our board of directors are collectively capable of analyzing and evaluating our financial statements and understanding internal controls and procedures for financial reporting. We believe that retaining an independent director who would qualify as an audit committee financial expert would be overly costly and burdensome and is not warranted in our circumstances given the early stages of our development and the fact that we have not generated any material revenues to date. In addition, we currently do not have nominating, compensation or audit committees or committees performing similar functions nor do we have a written nominating, compensation or audit committee charter. Our board of directors does not believe that it is necessary to have such committees because it believes the functions of such committees can be adequately performed by our board of directors.

Web Site

All American maintains a Web site at allamericangoldcorp.com and has an email address at info@allamericangoldcorp.com.

Item 11. Executive Compensation

(a) General

The particulars of the compensation paid to the following persons:

- (a) our principal executive officer;
 - (b) each of our two most highly compensated executive officers who were serving as executive officers at the end of the years ended May 31, 2012, and 2011; and
 - (c) up to two additional individuals for whom disclosure would have been provided under (b) but for the fact that the individual was not serving as our executive officer at the end of the years ended May 31, 2012, and 2011,
-

who we will collectively refer to as the named executive officers of our company, are set out in the following summary compensation table, except that no disclosure is provided for any named executive officer, other than our principal executive officers, whose total compensation did not exceed \$100,000 for the respective fiscal year.

(b) Summary Compensation Table

Name and Principal Position	Fiscal Year Ended May 31	Salary	Bonus	Stock Awards (\$)	Securities Underlying Options	Options Awards (Value of Options) (\$)(5)	Total Compensation
Brent Welke President & Director	2012	\$12,000	\$0	\$0	Nil	\$0	\$12,000
Gaspar R. Gonzalez Treas. & Dir.	2012	6,000	\$0	\$1,000,000	\$0	\$0	\$1,006,000
Brent Welke President & Director	2011	\$12,000	\$0	\$12,500	Nil	\$0	\$18,500
Brent Welke President & Director	2010 (part)	\$1,000	\$0	\$0	\$0	\$0	\$1,000
James Yiu Yeung Lung Pres. & Dir.	2010 (part)	\$3,225	\$0	\$0	Nil	\$0	\$0

On December 1, 2010, the Corporation entered into a management agreement with Brent Welke, our president and a director, for a term of 36 months, whereby Mr. Welke has agreed to manage the affairs of the Corporation. As compensation, we agreed to pay Mr. Welke \$1,000 per month, pursuant to the terms of the consulting agreement and have issued 2,500,000 shares of the Corporation's common stock valued at the last issuance price of \$0.005 per share. \$12,000 in management fee costs were incurred in the current year under his management agreement.

On July 1, 2012, the Corporation entered into a consulting agreement with Gaspar R. Gonzalez, our treasurer and a director, for a term of 36 months, whereby Dr. Gonzalez has agreed to manage the financial affairs of the Corporation. As compensation, we agreed to pay Dr. Gonzalez \$1,000 per month, pursuant to the terms of the consulting agreement and have issued 2,000,000 shares of the Corporation's common stock valued at the last traded price of \$0.50 per share.

The fair market value of the 50,000,000 shares of All American originally issued to Messrs. Stephen Jackson and Bruce Jackson, the founders of the Corporation, in October, 2006 for cash consideration of \$5,000 and subsequently sold and transferred to Messrs Yiu and Ma did not exceed the \$0.001 per share that they paid for the shares.

(c) Options Grants During the Last Fiscal Year / Stock Option Plans

We do not currently have a stock option plan in favour of any director, officer, consultant or employee of our company. No individual grants of stock options, whether or not in tandem with stock appreciation rights known as SARs or freestanding SARs have been made to any executive officer or director since our inception; accordingly, no stock options have been granted or exercised by any of the officers or directors since we were founded.

(d) Aggregated Options Exercises in Last Fiscal Year

No individual grants of stock options, whether or not in tandem with stock appreciation rights known as SARs or freestanding SARs have been made to any executive officer or any director since our inception; accordingly, no stock options have been granted or exercised by any of the officers or directors since we were founded.

(e) Long-Term Incentive Plans and Awards

We do not have any long-term incentive plans that provide compensation intended to serve as incentive for performance. No individual grants or agreements regarding future payouts under non-stock price-based plans have been made to any executive officer or any director or any employee or consultant since our inception; accordingly, no future payouts under non-stock price-based plans or agreements have been granted or entered into or exercised by any of the officers or directors or employees or consultants since we were founded.

(f) Compensation of Directors

The members of the Board of Directors are not compensated by All American for acting as such. Directors are reimbursed for reasonable out-of-pocket expenses incurred. There are no arrangements pursuant to which directors are or will be compensated in the future for any services provided as a director.

We do not have any agreements for compensating our directors for their services in their capacity as directors, although such directors are expected in the future to receive stock options to purchase shares of our common stock as awarded by our board of directors.

(g) Employment Contracts, Termination of Employment, Change-in-Control Arrangements

There are no employment or other contracts or arrangements with our officers or directors other than those disclosed in this report. There are no compensation plans or arrangements, including payments to be made by All American, with respect to the officers, directors, employees or consultants of All American that would result from the resignation, retirement or any other termination of such directors, officers, employees or consultants. There are no arrangements for directors, officers or employees that would result from a change-in-control.

(h) Indebtedness of Directors, Senior Officers, Executive Officers and Other Management

None of our directors or executive officers or any associate or affiliate of our company during the last two fiscal years, is or has been indebted to our company by way of guarantee, support agreement, letter of credit or other similar agreement or understanding currently outstanding.

(i) Family Relationships

There are no family relationships between any of our directors, executive officers or directors.

Item 12. Security Ownership of Certain Beneficial Owners and Management and Related Stockholder Matters

(a) Security Ownership of Certain Beneficial Owners

The following table sets forth, as of the date of this report, the total number of shares owned beneficially by each of our directors, officers and key employees, individually and as a group, and the present owners of 5% or more of our total outstanding shares. The shareholder listed below has direct ownership of his shares and possesses sole voting and dispositive power with respect to the shares.

Edgar Filing: All American Gold Corp. - Form 10-K

Title of Class	Name and Address of Beneficial Owner [1] [2] [4]	Amount & Nature of Beneficial Ownership [3]	Percentage of Class
Common stock	Brent Welke	2,428,639	2.6%

	700 North High School Road, Suite 203, Indianapolis, IN 46214		
Common stock	James Yiu Yeung Lung Suite 905, 9 Floor, 338 Kings Road, North Point, Hong Kong	25,000,000 Beneficial Owner	25.9%
Common stock	Ma Cheng Ji Ste. 06 - No. 1277 Ding Xi Road Shanghai, China 200050	25,000,000 Beneficial Owner	25.9%
Common stock	Gaspar R. Gonzalez 514 Enfield Road Delray Beach, FL 33440	2,000,000 Beneficial Owner	2.2%

- [1] The person(s) named above may be deemed to be a parent and promoter of All American, within the meaning of such terms under the Securities Act by virtue of his direct and indirect stock holdings. Messrs. Welke, Gonzalez, Yiu and Ma are the only promoter(s) of All American.
- [2] The persons named above do not have any specified rights to acquire, within sixty (60) days of the date of this report any options, warrants or rights and no conversion privileges or other similar obligations exist.
- [3] For Messrs. Welke, Gonzalez, Yiu and Ma, as of May 31, 2012, and the date of this report.
- [4] A beneficial owner of a security includes any person who, directly or indirectly, through any contract, arrangement, understanding, relationship, or otherwise has or shares: (i) voting power, which includes the power to vote, or to direct the voting of shares; and (ii) investment power, which includes the power to dispose or direct the disposition of shares. Certain shares may be deemed to be beneficially owned by more than one person (if, for example, persons share the power to vote or the power to dispose of the shares). In addition, shares are deemed to be beneficially owned by a person if the person has the right to acquire the shares (for example, upon exercise of an option) within 60 days of the date as of which the information is provided. In computing the percentage ownership of any person, the amount of shares outstanding is deemed to include the amount of shares beneficially owned by such person (and only such person) by reason of these acquisition rights. As a result, the percentage of outstanding shares of any person as shown in this table does not necessarily reflect the person's actual ownership or voting power with respect to the number of shares of common stock actually outstanding on the date of this report. as of which there were 96,636,122 shares of our common stock issued and outstanding.

(b) Security Ownership of Management

The following table sets forth the names and addresses of each of our directors and officers and their respective date of commencement of their term with All American. All directors and officers hold office until our next annual general meeting of shareholders or until a successor is appointed.

Title of Class	Name and Address of Beneficial Owner [1] [3]	Amount & Nature of Beneficial Ownership [2]	Percentage of Class

Edgar Filing: All American Gold Corp. - Form 10-K

Common stock	Brent Welke 700 North High School Road, Suite 203, Indianapolis, IN 46214 Director and officer since Dec. 1, 2012	2,428,639	2.6
Common stock	Gaspar R. Gonzalez 514 Enfield Road Delray Beach, FL 33440 Director and officer since July 1, 2011	2,000,000 Beneficial Owner	2.2%

- [1] As of May 31, 2012, and the date of this report.
- [2] Common shares beneficially owned, directly or indirectly, or over which control or direction is exercised, as at the date hereof based upon information furnished to All American by individual directors and officers. All such shares are held directly.
- [3] The person named above does not have any specified rights to acquire, within sixty (60) days of the date of this report any options, warrants or rights and no conversion privileges or other similar obligations exist.

The directors, officers and other members of management of All American, as a group, beneficially own, directly or indirectly, 4,500,000 of our common shares, representing 4.7% of the total issued and outstanding securities of All American as of May 31, 2012, and the date of this report.

There are no outstanding stock options.

(c) Equity Compensation Plans

We do not have a stock option plan in favour of any director, officer, consultant or employee of our company.

(d) Changes in Control

We do not anticipate at this time any changes in control of All American. There are no arrangements either in place or contemplated which may result in a change of control of All American. There are no provisions within our Articles or Bylaws that would delay or prevent a change of control.

Item 13. Certain Relationships and Related Transactions, and Director Independence

Except as disclosed herein, no director, executive officer, shareholder holding at least 5% of shares of our common stock, or any family member thereof, had any material interest, direct or indirect, in any transaction or proposed transaction since the year ended May 31, 2011, in which the amount involved in the transaction exceeded or exceeds the lesser of \$120,000 or one percent of the average of our total assets at the year end for the last three completed fiscal years.

Item 14. Principal Accounting Fees and Services

The aggregate fees billed for the current fiscal year ended May 31, 2012, and for fiscal year ended May 31, 2011, for professional services rendered by the principal accountant for the audit of our annual financial statements and review of the financial statements included in our quarterly reports on Form 10-Q and services that are normally provided by the accountant in connection with statutory and regulatory filings or engagements for these fiscal periods were as follows:

	Year Ended	
	May 31, 2012	May 31, 2011
Audit Fees	\$4,000	\$4,000
Audit Related Fees	\$5,100	\$6,550
Tax Fees	Nil	Nil
All Other Fees	<u>Nil</u>	<u>Nil</u>

Edgar Filing: All American Gold Corp. - Form 10-K

Total	\$9,100	\$10,550
-------	---------	----------

Audit Fees: The aggregate fees billed for the fiscal year ended May 31, 2012, for professional services rendered by the principal accountant for the audit of our annual financial statements and the review of financial statements included in our filed Form 10Qs were approximately \$9,100 as compared to \$10,550 for the similar period of the preceding fiscal year and for the period from inception on May 17, 2006, to May 31, 2012, the amount was approximately \$41,200.

Audit-Related Fees: The aggregate fees billed for the fiscal year ended May 31, 2011, for assurance and related services by the principal accountant that are reasonably related to the performance of the audit or review for the audit or review of our annual financial statements and the review of financial statements and are not reported under the previous item, Audit Fees, was approximately \$0 (nil) and \$0 (nil) for the similar period last year and for the period from inception on May 17, 2006, to May 31, 2012, the amount was approximately \$0 (nil).

Tax Fees: The aggregate fees billed for the fiscal years ended May 31, 2012, and 2011 for professional services rendered by the principal accountant for tax compliance and tax planning was approximately \$0 and for the period from inception on May 17, 2006, to May 31, 2012, the amount was approximately \$0.

All Other Fees: The aggregate fees billed for the fiscal years ended May 31, 2012 and 2011 for products and services provided by the principal accountant other than the services reported above was \$0 and for the period from inception on May 17, 2006, to May 31, 2012, the amount was \$0 (nil).

Our board of directors has considered the nature and amount of fees billed by our independent auditors and believes that the provision of services for activities unrelated to the audit is compatible with maintaining our independent auditors' independence.

PART IV

Item 15. Exhibits, Financial Statement Schedules

(a) Financial Statements

- (1) Financial statements for our company are listed in the index under Item 8 of this report;
- (2) All financial statement schedules are omitted because they are not applicable, not material or the required information is shown in the financial statements or notes thereto.

Exhibit No.	Description
