**QUARTERLY REPORT PURSUANT TO SECTION 13 OR 15(d) OF
THE SECURITIES EXCHANGE ACT OF 1934**
For the quarterly period ended June 30, 2013
OR
**TRANSITION REPORT PURSUANT TO SECTION 13 OR 15(d) OF THE
SECURITIES EXCHANGE ACT OF 1934**
For transition period from _____ to _____

Commission File Number 0 -10537

OLD SECOND BANCORP, INC.

(Exact name of Registrant as specified in its charter)

Delaware
(State or other jurisdiction
of incorporation or organization)

36-3143493
(I.R.S. Employer Identification Number)

37 South River Street, Aurora, Illinois 60507

(Address of principal executive offices) (Zip Code)

(630) 892-0202

(Registrant's telephone number, including area code)

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Indicate by check mark whether the Registrant (1) has filed all reports required to be filed by Section 13 or 15 (d) of the Securities Exchange Act of 1934 during the preceding 12 months (or for such shorter period that the Registrant was required to file such reports), and (2) has been subject to such filing requirements for the past 90 days.

Yes No

Indicate by check mark whether the registrant has submitted electronically and posted on its corporate Web site, if any, every Interactive Data File required to be submitted and posted pursuant to Rule 405 of Regulation S-T during the preceding 12 months (or for such shorter period that the registrant was required to submit and post such files). Yes No

Indicate by check mark whether registrant is a large accelerated filer, an accelerated filer, a non-accelerated filer, or a smaller reporting company. See the definitions of large accelerated filer, accelerated filer and smaller reporting company in Rule 12b-2 of the Act). (check one):

Large accelerated filer Accelerated filer Non-accelerated filer (do not check if a smaller reporting company) Smaller reporting company

Indicate by check mark whether the registrant is a shell company (as defined in Exchange Act Rule 12b-2).

Yes No

Indicate the number of shares outstanding of each of the issuer's classes of common stock as of the latest practicable date: As of August 12, 2013, the Registrant had outstanding 13,882,910 shares of common stock, \$1.00 par value per share.

Notes to Consolidated Financial Statements

(Table amounts in thousands, except per share data, unaudited)

Note 1 Summary of Significant Accounting Policies

The accounting policies followed in the preparation of the interim financial statements are consistent with those used in the preparation of the annual financial information. The interim financial statements reflect all normal and recurring adjustments, which are necessary, in the opinion of management, for a fair statement of results for the interim period presented. Results for the period ended June 30, 2013, are not necessarily indicative of the results that may be expected for the year ending December 31, 2013. These interim financial statements should be read in conjunction with the audited financial statements and notes included in Old Second Bancorp, Inc.'s (the Company) annual report on Form 10-K for the year ended December 31, 2012. Unless otherwise indicated, amounts in the tables contained in the notes are in thousands. Certain items in prior periods have been reclassified to conform to the current presentation.

The Company's consolidated financial statements are prepared in accordance with United States generally accepted accounting practices (GAAP) and follow general practices within the banking industry. Application of these principles requires management to make estimates, assumptions, and judgments that affect the amounts reported in the consolidated financial statements and accompanying notes. These estimates, assumptions, and judgments are based on information available as of the date of the consolidated financial statements. Future changes in information may affect these estimates, assumptions, and judgments, which, in turn, may affect amounts reported in the financial statements.

All significant accounting policies are presented in Note 1 to the consolidated financial statements included in the Company's annual report on Form 10-K for the year ended December 31, 2012. These policies, along with the disclosures presented in the other financial statement notes and in this discussion, provide information on how significant assets and liabilities are valued in the consolidated financial statements and how those values are determined.

Recent Accounting Pronouncements

In February 2013, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2013-02 *Comprehensive Income (Topic 220) Reporting of Amounts Reclassified Out of Accumulated Other Comprehensive Income*. ASU 2013-02 requires an entity to provide information about the amounts reclassified out of accumulated other comprehensive income by component. In addition, an entity is required to present, either on the face of the statement where net income is presented or in the notes, significant amounts reclassified out of accumulated other comprehensive income by the respective line items of net income but only if the amount reclassified is required under GAAP to be reclassified to net income in its entirety in the same reporting period. The impact of ASU 2013-02 on the Company's consolidated financial statements was reflected in the consolidated statement of comprehensive income (loss) in the Company's Form 10-Q for the quarter ended March 31, 2013.

Note 2 Securities

Investment Portfolio Management

Our investment portfolio serves the liquidity and income needs of the Company. While the portfolio serves as an important component of the overall liquidity management at Old Second National Bank (the Bank), portions of the portfolio will also serve as income producing assets. The size of the portfolio reflects liquidity needs, loan demand and interest income objectives. The Company views the June 30, 2013, securities portfolio (\$602.8 million amortized cost and \$584.9 million fair value) as a substantial source of liquidity that will allow for loan growth without having to raise deposits. Consistent with the comments above, management views the portion of the portfolio not carried in an unrealized loss position and the Bank's ability to borrow a substantial amount with securities as collateral affords the Bank a comfortable liquidity position. Portfolio size and composition may be adjusted from time to time.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

Investments are comprised of debt securities and non-marketable equity investments. All debt securities are classified as available-for-sale and may be sold under our management and asset/liability strategies. Securities available-for-sale are carried at fair value. Unrealized gains and losses on securities available-for-sale are reported as a separate component of equity. This balance sheet component changes as interest rates and market conditions change. Unrealized gains and losses are not included in the calculation of regulatory capital.

Nonmarketable equity investments include Federal Home Loan Bank of Chicago (FHLBC) stock, Federal Reserve Bank of Chicago (FRB) stock and various other equity securities. FHLBC stock was recorded at a value of \$5.5 million at June 30, 2013, and \$6.4 million at December 31, 2012. FRB stock was recorded at \$4.8 million at June 30, 2013, and December 31, 2012. Our FHLB stock is necessary to maintain access to FHLB advances.

The following table summarizes the amortized cost and fair value of the available-for-sale securities at June 30, 2013 and December 31, 2012 and the corresponding amounts of gross unrealized gains and losses recognized in accumulated other comprehensive loss:

| | Amortized Cost | Gross Unrealized Gains | Gross Unrealized Losses | Fair Value |

Recognition of other-than-temporary impairment was not necessary in the six months ended June 30, 2013, or the year ended December 31, 2012. The changes in fair values related primarily to interest rate fluctuations and were generally not related to credit quality deterioration. Further to this point as shown in tables that follow below, the amount of deferrals and defaults in the pooled collateralized debt obligations (CDO) decreased in the period from December 31, 2012, to June 30, 2013.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Uncertainty in the financial markets in the periods presented has resulted in reduced liquidity for certain investments, particularly the CDO. In the case of the CDO fair value measurement, management included a risk premium adjustment as of June 30, 2013, to reflect an estimated yield that a market participant would demand because of uncertainty in cash flows, based on incomplete and sporadic levels of market activity. Accordingly, management continues to designate these securities as Level 3 securities as described in Note 12 of this quarterly report as of June 30, 2013. Management did not have the intent to sell the above securities and it is more likely than not the Company will not sell the securities before recovery of its cost basis.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

Below is additional information as it relates to the collateralized debt obligation, Trapeza 2007-13A, which is secured by a pool of trust preferred securities issued by trusts sponsored by multiple financial institutions.

| | Amortized Cost | Fair Value | Gross Unrealized Loss | S&P Credit Rating 1 | Number of Banks in Issuance | Issuance Deferrals & Defaults Amount | Collateral % | Issuance Excess Subordination Amount | Collateral % |

1 Moody's credit rating for class A1 and A2A were Baa2 and Ba2, respectively, as of June 30, 2013, and December 31, 2012. The Fitch ratings for class A1 and A2A were BBB and B, respectively, as of June 30, 2013, and December 31, 2012.

Note 3 Loans

Major classifications of loans were as follows:

| | June 30, 2013 | December 31, 2012 |
|-------------------------------|---------------|-------------------|
| Commercial | \$ 86,173 | \$ 86,941 |
| Real estate - commercial | 563,061 | 579,687 |
| Real estate - construction | 34,964 | 42,167 |
| Real estate - residential | 386,504 | 414,543 |
| Consumer | 2,793 | 3,101 |
| Overdraft | 505 | 994 |
| Lease financing receivables | 11,863 | 6,060 |
| Other | 16,371 | 16,451 |
| | 1,102,234 | 1,149,944 |
| Net deferred loan cost (fees) | 469 | 106 |
| | \$ 1,102,703 | \$ 1,150,050 |

It is the policy of the Company to review each prospective credit in order to determine an adequate level of security or collateral was obtained prior to making a loan. The type of collateral, when required, will vary from liquid assets to real estate. The Company's access to collateral, in the event of borrower default, is assured through adherence to lending laws, the Company's lending standards and credit monitoring procedures. The Bank generally makes loans solely within its market area. There are no significant concentrations of loans where the customers' ability to honor loan terms is dependent upon a single economic sector although the real estate related categories listed above represent 89.3% and 90.1% of the portfolio at June 30, 2013, and December 31, 2012, respectively. The Company remains committed to overseeing and managing its loan portfolio to reduce its real estate credit concentrations in accordance with the requirements of the Stipulation and Consent to the Issuance of a Consent Order the Bank entered into with the Office of the Controller of the Currency (the OCC) on May 16, 2011 (the Consent Order). Regulatory and Capital matters affecting the Company, including the Consent Order, are discussed in more detail in Note 11 of the consolidated financial statements included in this report.

The Bank had no commitments to any borrower whose loans were classified as impaired at June 30, 2013 and December 31, 2012.

Credit Quality Indicators:

The Company categorizes loans into credit risk categories based on current financial information, overall debt service coverage, comparison against industry averages, historical payment experience, and current economic trends. Each loan and loan relationship is examined either individually or according to the following materiality and risk rating considerations. This analysis includes loans with outstanding loans or commitments greater than \$50,000 and excludes homogeneous loans such as home equity lines of credit and residential mortgages. Loans with a classified risk rating are reviewed quarterly regardless of size or loan type. The Company uses the following definitions for classified risk ratings:

Table of Contents

Special Mention. Loans classified as special mention have a potential weakness that deserves management's close attention. If left uncorrected, these potential weaknesses may result in deterioration of the repayment prospects for the loan at some future date.

Substandard. Loans classified as substandard are inadequately protected by the current net worth and paying capacity of the obligor or of the collateral pledged, if any. Loans so classified have a well-defined weakness or weaknesses that jeopardize the liquidation of the debt. They are characterized by the distinct possibility that the institution will sustain some loss if the deficiencies are not corrected.

Doubtful. Loans classified as doubtful have all the weaknesses inherent in those classified as substandard, with the added characteristic that the weaknesses make collection or liquidation in full, on the basis of currently existing facts, conditions, and values, highly questionable and improbable.

Credits that are not covered by the definitions above are pass credits, which are not considered to be adversely rated.

Troubled debt restructurings (TDR) are loans for which the contractual terms have been modified and both of these conditions exist: (1) there is a concession to the borrower and (2) the borrower is experiencing financial difficulties. Loans are restructured on a case-by-case basis during

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

the loan collection process with modifications generally initiated at the request of the borrower. These modifications may include reduction in interest rates, extension of term, deferrals of principal, and other modifications. The Bank does participate in the U.S. Department of the Treasury's (the Treasury) Home Affordable Modification Program (HAMP) which gives qualifying homeowners an opportunity to refinance into more affordable monthly payments.

The specific allocation of the allowance for loan losses on a TDR is determined by either discounting the modified cash flows at the original effective rate of the loan before modification or is based

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

on the underlying collateral value less costs to sell, if repayment of the loan is collateral-dependent. If the resulting amount is less than the recorded book value, the Bank either establishes a valuation allowance (i.e. specific reserve) as a component of the allowance for loan losses or charges off the impaired balance if it determines that such amount is a confirmed loss. This method is used consistently for all segments of the portfolio. The allowance for loan losses also includes an allowance based on a loss migration analysis for each loan category for loans that are not individually evaluated for specific impairment. All loans charged-off, including TDR charged-off, are factored into this calculation by portfolio segment.

TDR that were modified during the period are summarized as follows:

| | TDR Modifications Three months ended June 30, 2013 | | | TDR Modifications Six months ended June 30, 2013 | | |
|--|---|---|--|---|---|---|
| | # of contracts | Pre-modification recorded investment | Post-modification recorded investment | # of contracts | Pre-modification recorded investment | Post-modification recorded investment |

Table of Contents

TDR are classified as being in default on a case-by-case basis when they fail to be in compliance with the modified terms. There was no TDR default activity within 12 months of restructure for the three months or six months ending June 30, 2012. The following table presents TDR that defaulted during the periods shown and were restructured within the 12 month period prior to default:

| Troubled debt restructurings that Subsequently Defaulted Real estate - residential Investor | TDR Default Activity Three Months ending June 30, 2013 | | | TDR Default Activity Six Months ending June 30, 2013 | | |

| | \$ 3,302 | \$ 5,522 | \$ 6,399 | \$ 8,974 |

Note 6 Deposits

Major classifications of deposits were as follows:

| | June 30, 2013 | December 31, 2012 |
|--|---------------|-------------------|
| Noninterest bearing demand | \$ 366,406 | \$ 379,451 |
| Savings | 227,687 | 216,305 |
| NOW accounts | 287,492 | 286,860 |
| Money market accounts | 312,773 | 323,811 |
| Certificates of deposit of less than \$100,000 | 306,302 | 318,844 |
| Certificates of deposit of \$100,000 or more | 189,963 | 191,948 |
| | \$ 1,690,623 | \$ 1,717,219 |

Note 7 Borrowings

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

The following table is a summary of borrowings as of June 30, 2013, and December 31, 2012. Junior subordinated debentures are discussed in detail in Note 8:

| | June 30, 2013 | December 31, 2012 |
|---|---------------|-------------------|
| Securities sold under repurchase agreements | \$ 30,510 | \$ 17,875 |
| FHLB advances | - | 100,000 |
| Junior subordinated debentures | 58,378 | 58,378 |
| Subordinated debt | 45,000 | 45,000 |
| Notes payable and other borrowings | 500 | 500 |
| | \$ 134,388 | \$ 221,753 |

The Company enters into deposit sweep transactions where the transaction amounts are secured by pledged securities. These transactions consistently mature within 1 to 90 days from the transaction date. All

Table of Contents

sweep repurchase agreements are treated as financings secured by U.S. government agencies and collateralized mortgage-backed securities with a carrying amount of \$37.1 million at June 30, 2013, and \$26.0 million at December 31, 2012. At June 30, 2013, there was one customer with secured balances exceeding 10% of stockholders' equity.

The Company's borrowings at the FHLBC require the Bank to be a member and invest in the stock of the FHLBC and are generally limited to the lower of 35% of total assets or 60% of the book value of certain mortgage loans. At June 30, 2013, there were no advances on the FHLBC stock of \$5.5 million and collateralized securities and loans valued at \$103.2 million under the principles and standards of the FHLBC advance program. The Company has also established borrowing capacity at the FRB that was not used at either June 30, 2013, or December 31, 2012. The Company currently has \$18.2 million of borrowing capacity at the FRB at the current secondary rate of 1.25%.

One of the Company's most significant borrowing relationships continued to be the \$45.5 million credit facility with Bank of America. That credit began in January 2008 and was originally composed of a \$30.5 million senior debt facility including \$500,000 in term debt, as well as \$45.0 million of subordinated debt. The subordinated debt and the term debt portion of the senior debt facility mature on March 31, 2018. The interest rate on the senior debt facility resets quarterly and at the Company's option, is based on, either the lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the subordinated debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had no principal outstanding balance on the senior line of credit when it matured, but did have \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in subordinated debt at the end of both December 31, 2012, and June 30, 2013. The term debt is secured by all of the outstanding capital stock of the Bank. The Company has made all required interest payments on the outstanding principal amounts on a timely basis. Pursuant to the Written Agreement dated July 22, 2011 between the Company and the FRB (the "Written Agreement"), the Company must receive the FRB's approval prior to making any interest payments on the subordinated debt.

The credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the senior debt agreement. The senior debt agreement also contains certain customary representations and warranties and financial and negative covenants. At June 30, 2013, the Company was out of compliance with one of the financial covenants contained within the credit agreement. Previously, the Company had been out of compliance with two of the financial covenants. The agreement provides that upon an event of default as the result of the Company's failure to comply with a financial covenant, the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line of the term debt by 200 basis points, (iii) declare the senior debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. The total outstanding principal amount of the senior debt is the \$500,000 in term debt. Because the subordinated debt is treated as Tier 2 capital for regulatory capital purposes, the senior debt agreement does not provide the lender with any rights of acceleration or other remedies with regard to the subordinated debt upon an event of default caused by the Company's failure to comply with a financial covenant.

Note 8 Junior Subordinated Debentures

The Company completed the sale of \$27.5 million of cumulative trust preferred securities by its unconsolidated subsidiary, Old Second Capital Trust I in June 2003. An additional \$4.1 million of cumulative trust preferred securities was sold in July 2003. The costs associated with the issuance of the cumulative trust preferred securities are being amortized over 30 years. The trust preferred securities may remain outstanding for a 30-year term but, subject to regulatory approval, can be called in whole or in part by the Company. The stated call period commenced on June 30, 2008 and a call can be exercised by the Company from time to time thereafter. When not in deferral, cash distributions on the securities are payable quarterly at an annual rate of 7.80%. The Company issued a new \$32.6 million subordinated debenture to the trust in return for the aggregate net proceeds of this trust preferred offering. The interest rate and

Table of Contents

payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

The Company issued an additional \$25.0 million of cumulative trust preferred securities through a private placement completed by an additional unconsolidated subsidiary, Old Second Capital Trust II, in April 2007. Although nominal in amount, the costs associated with that issuance are being amortized over 30 years. These trust preferred securities also mature in 30 years, but subject to the aforementioned regulatory approval, can be called in whole or in part on a quarterly basis commencing June 15, 2017. The quarterly cash distributions on the securities are fixed at 6.77% through June 15, 2017 and float at 150 basis points over three-month LIBOR thereafter. The Company issued a new \$25.8 million subordinated debenture to the Old Second Capital Trust II in return for the aggregate net proceeds of this trust preferred offering. The interest rate and payment frequency on the debenture are equivalent to the cash distribution basis on the trust preferred securities.

Under the terms of the subordinated debentures issued to each of Old Second Capital Trust I and II, the Company is allowed to defer payments of interest for 20 quarterly periods without default or penalty, but such amounts will continue to accrue. Also during the deferral period, the Company generally may not pay cash dividends on or repurchase its common stock or preferred stock, including the Series B Fixed Rate Cumulative Perpetual Preferred Stock (the Series B Preferred Stock) as discussed in Note 15. In August of 2010, the Company elected to defer regularly scheduled interest payments on the \$58.4 million of junior subordinated debentures. Because of the deferral on the subordinated debentures, the trusts will defer regularly scheduled dividends on the trust preferred securities. Both of the debentures issued by the Company are recorded on the Consolidated Balance Sheets as junior subordinated debentures and the related interest expense for each issuance is included in the Consolidated Statements of Operations. The total accumulated unpaid interest on the junior subordinated debentures including compounded interest from July 1, 2010 on the deferred payments totals \$14.3 million at June 30, 2013.

Note 9 Long-Term Incentive Plan

The Long-Term Incentive Plan (the Incentive Plan) authorizes the issuance of up to 1,908,332 shares of the Company's common stock, including the granting of qualified stock options, non-qualified stock options, restricted stock, restricted stock units, and stock appreciation rights. Total shares issuable under the plan were 200,868 at June 30, 2013. Stock based awards may be granted to selected directors and officers or employees at the discretion of the board of directors. There were no stock options granted in the first half of 2013 or 2012. All stock options are granted for a term of ten years.

Total compensation cost that has been charged for those plans was \$67,000 in the first half of 2013 and \$153,000 in the first half of 2012.

There were no stock options exercised during the first half of 2013 or 2012. There is no unrecognized compensation cost related to nonvested stock options as all stock options of the Company's common stock have vested.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

A summary of stock option activity in the Incentive Plan for the six months ending June 30, 2013 is as follows:

| | Shares | Weighted Average Exercise Price | Weighted- Average Remaining Contractual Term (years) | Aggregate Intrinsic Value |
|-------------------------------|---------|--|--|---------------------------------|
| Beginning outstanding | 409,500 | \$ 28.75 | | |
| Canceled | (2,000) | 32.59 | | |
| Ending outstanding | 407,500 | \$ 28.74 | 2.5 | \$ - |
| Exercisable at end of quarter | 407,500 | \$ 28.74 | 2.5 | \$ - |

Generally, restricted stock and restricted stock units vest three years from the grant date, but the Company's Board of Directors have discretionary authority to change some terms including the amount of time until vest date. Awards under the Incentive Plan become fully vested upon a merger or change in control of the Company.

Under the Incentive Plan, restricted stock was granted beginning in 2005 and the grant of restricted units began in February 2009. Both of these restricted awards have voting and dividend rights and are subject to forfeiture until certain restrictions have lapsed including employment for a specific period. Further, in first quarter 2013 after completion on Treasury's auction of the Old Second Bancorp Series B Preferred Stock at a discount, 45,000 unvested restricted stock shares previously awarded were recaptured in addition to 133,943 restricted stock shares that were fully vested. These recaptures provided an income statement benefit of \$612,000 included in other noninterest income. There were 155,500 restricted awards issued during the second quarter of 2013 and no restricted awards were issued during the second quarter of 2012. Compensation expense is recognized over the vesting period of the restricted award based on the market value of the award at issue date.

A summary of changes in the Company's nonvested restricted awards for the six months ending June 30, 2013, is as follows:

| | Restricted Stock Shares and Units | June 30, 2013 Weighted Average Grant Date Fair Value |
|-----------------------------------|---|--|
| Nonvested at January 1 | 327,920 | \$ 2.21 |
| Granted | 155,500 | 3.28 |
| Vested | (191,920) | 2.63 |
| Forfeited | (11,000) | 2.47 |
| Recaptured after Series B auction | (45,000) | 1.25 |
| Nonvested at June 30 | 235,500 | \$ 2.75 |

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Total unrecognized compensation cost of restricted awards is \$462,000 as of June 30, 2013, and is expected to be recognized over a weighted-average period of 2.66 years. Total unrecognized compensation

Table of Contents

cost of restricted awards was \$227,000 as of June 30, 2012, which was expected to be recognized over a weighted-average period of 1.13 years.

Note 10 Earnings (Loss) Per Share

The earnings (loss) per share is included below as of June 30 (in thousands except for share data):

| | Three Months Ended | | Six Months Ended | |
|---|--------------------|------------|------------------|------------|
| | June 30, | | June 30, | |
| | 2013 | 2012 | 2013 | 2012 |
| Basic earnings (loss) per share: | | | | |
| Weighted-average common shares outstanding | 13,882,910 | 14,084,328 | 13,978,979 | 14,063,936 |
| Weighted-average common shares less stock based awards | 13,867,910 | 13,883,008 | 13,907,463 | 13,869,174 |
| Weighted-average common shares stock based awards | 209,868 | 327,920 | 209,968 | 334,361 |
| Net income (loss) | \$ 3,477 | \$ 1,252 | \$ 8,948 | \$ (1,716) |
| Dividends and accretion of discount on preferred shares | 1,305 | 1,238 | 2,594 | 2,461 |
| Net earnings (loss) available to common shareholders | 2,172 | 14 | 6,354 | (4,177) |
| Undistributed earnings (loss) | 2,172 | 14 | 6,354 | (4,177) |
| Basic earnings (loss) per share common undistributed loss | 0.15 | 0.00 | 0.45 | (0.29) |
| Basic earnings (loss) per share | \$ 0.15 | \$ 0.00 | \$ 0.45 | \$ (0.29) |
| Diluted earnings (loss) per share: | | | | |
| Weighted-average common shares outstanding | 13,882,910 | 14,084,328 | 13,978,979 | 14,063,936 |
| Dilutive effect of restricted shares | 194,868 | 126,600 | 138,452 | 139,599 |
| Diluted average common shares outstanding | 14,077,778 | 14,210,928 | 14,117,431 | 14,203,535 |
| Net earnings (loss) available to common stockholders | \$ 2,172 | \$ 14 | \$ 6,354 | \$ (4,177) |
| Diluted earnings (loss) per share | \$ 0.15 | \$ 0.00 | \$ 0.45 | \$ (0.29) |
| Number of antidilutive options excluded from the diluted earnings per share calculation | 1,224,839 | 1,313,839 | 1,224,839 | 1,313,839 |

The above earnings (loss) per share calculation did not include 815,339 common stock warrants that were outstanding as of June 30, 2013, and June 30, 2012, because they were anti-dilutive.

Note 11 Regulatory & Capital Matters

On May 16, 2011, the Bank, the wholly-owned banking subsidiary of the Company, entered into the Consent Order with the OCC. Pursuant to the Consent Order, the Bank has agreed to take certain actions and operate in compliance with the Consent Order's provisions during its terms.

Under the terms of the Consent Order, the Bank is required to, among other things: (i) adopt and adhere to a three-year written strategic plan that establishes objectives for the Bank's overall risk profile, earnings performance, growth, balance sheet mix, off-balance sheet activities, liability structure, capital adequacy, reduction in nonperforming assets and its product development; (ii) adopt and maintain a capital plan; (iii) by September 30, 2011, achieve and thereafter maintain a total risk-based capital ratio of at least 11.25% and a Tier 1 capital ratio of at least 8.75%; (iv) seek approval of the OCC prior to paying any dividends on its capital stock; (v) develop a program to reduce the Bank's credit risk; (vi) obtain or update appraisals on certain loans secured by real estate; (vii) implement processes to ensure that real estate valuations conform to applicable standards; (viii) take certain actions related to credit and collateral exceptions; (ix) reaffirm the Bank's liquidity risk management program; and (x) appoint a compliance committee of the Bank's Board of Directors to help ensure the Bank's compliance with the Consent Order. The Bank is also required to submit certain reports to the OCC with respect to the foregoing requirements.

The Bank has exceeded both capital ratio objectives in the Consent Order since June 30, 2011. At June 30, 2013, the Bank's Tier 1 capital leverage ratio was 10.40%, up 73 basis points from December 31, 2012, and 165 basis points above the 8.75% objective the Bank had agreed to maintain in the Consent Order. The Bank's total capital ratio was 16.30%, up 144 basis points from December 31, 2012, and 505 basis points above the objective of 11.25%.

Table of Contents

On July 22, 2011, the Company entered into a Written Agreement with the FRB. Pursuant to the Written Agreement, the Company has agreed to take certain actions and operate in compliance with the Written Agreement's provisions during its term.

Under the terms of the Written Agreement, the Company is required to, among other things: (i) serve as a source of strength to the Bank, including ensuring that the Bank complies with the Consent Order it entered into with the OCC on May 16, 2011; (ii) refrain from declaring or paying any dividend, or taking dividends or other payments representing a reduction in the Bank's capital, each without the prior written consent of the FRB and the Director of the Division of Banking Supervision and Regulation of the Board of Governors of the Federal Reserve System (the Director); (iii) refrain, along with its nonbank subsidiaries, from making any distributions on subordinated debentures or trust preferred securities without the prior written consent of the FRB and the Director; (iv) refrain, along with its nonbank subsidiaries, from incurring, increasing or guaranteeing any debt, and from purchasing or redeeming any shares of its capital stock, each without the prior written consent of the FRB; (v) provide the FRB with a written plan to maintain sufficient capital at the Company on a consolidated basis; (vi) provide the FRB with a projection of the Company's planned sources and uses of cash; (vii) comply with certain regulatory notice provisions pertaining to the appointment of any new director or senior executive officer, or the changing of responsibilities of any senior executive officer; and (viii) comply with certain regulatory restrictions on indemnification and severance payments. The Company is also required to submit certain reports to the FRB with respect to the foregoing requirements.

Bank holding companies are required to maintain minimum levels of capital in accordance with FRB capital guidelines. The general bank and holding company capital adequacy guidelines are described in the accompanying table, as are the capital ratios of the Company and the Bank, as of June 30, 2013, and December 31, 2012. These ratios are calculated on a consistent basis with the ratios disclosed in the most recent filings with the regulatory agencies.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Act (the Basel III Rules). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements as well as to bank and savings and loan holding companies with consolidated assets of less than \$500 million. The Basel III Rules not only increase selected minimum regulatory capital ratios, but also introduce a new Common Equity Tier 1 capital ratio and the concept of a capital conservation buffer. The Basel III rules also revise the criteria that certain instruments must meet to qualify as Tier 1 or Tier 2 capital. A number of instruments that now qualify as Tier 1 capital will not qualify under the Basel III rules. The Basel III Rules also permit smaller banking organizations to retain, through a one-time election, the existing treatment of accumulated other comprehensive income. The Basel III Rules have maintained the general structure of the current prompt corrective action framework while incorporating the increased requirements. The Basel III Rules also revise prompt corrective action guidelines to add the Common Equity Tier 1 capital ratio. Generally, the new Basel III Rules become effective on January 1, 2015. Management is reviewing the new rules to assess their impact on the Company.

At June 30, 2013, the Company, on a consolidated basis, exceeded the minimum thresholds to be considered adequately capitalized under current regulatory defined capital ratios. The Company and the Bank are subject to regulatory capital requirements administered by federal banking agencies. Generally, if adequately capitalized, regulatory approval is not required to accept brokered deposits. However, the Bank is limited in the amount of brokered deposits that it can hold pursuant to the Consent Order.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

| Old Second Bank | 201,607 | 10.40 | 77,541 | 4.00 | 96,926 | 5.00 |
| December 31, 2012 | | | | | | |
| Total capital to risk weighted assets | | | | | | |
| Consolidated | \$ 189,466 | 13.62% | \$ 111,287 | 8.00% | N/A | N/A |
| Old Second Bank | 206,496 | 14.86 | 111,169 | 8.00 | 138,961 | 10.00 |
| Tier 1 capital to risk weighted assets | | | | | | |
| Consolidated | 94,817 | 6.81 | 55,693 | 4.00 | N/A | N/A |
| Old Second Bank | 188,873 | 13.59 | 55,592 | 4.00 | 83,388 | 6.00 |
| Tier 1 capital to average assets | | | | | | |
| Consolidated | 94,817 | 4.85 | 78,200 | 4.00 | N/A | N/A |
| Old Second Bank | 188,873 | 9.67 | 78,127 | 4.00 | 97,659 | 5.00 |

1 The Bank exceeded the general minimum regulatory requirements to be considered well capitalized and is in full compliance with heightened capital ratios that it has agreed to maintain with the OCC contained within the Consent Order. However, as a result of continuing to be under the Consent Order, the Bank is formally considered adequately capitalized .

The Company's credit facility with Bank of America includes \$45.0 million in Subordinated Debt. That debt obligation continues to qualify as Tier 2 regulatory capital. In addition, the trust preferred securities continue to qualify as Tier 1 regulatory capital, and the Company treats the maximum amount of this security type allowable under regulatory guidelines as Tier 1 capital. As of June 30, 2013, trust preferred proceeds of \$27.2 million qualified as Tier 1 regulatory capital and \$29.4 million qualified as Tier 2 regulatory capital. As of December 31, 2012, trust preferred proceeds of \$24.6 million qualified as Tier 1 regulatory capital and \$32.0 million qualified as Tier 2 regulatory capital.

Dividend Restrictions and Deferrals

In addition to the above requirements, banking regulations and capital guidelines generally limit the amount of dividends that may be paid by a Bank without prior regulatory approval. Under these regulations, the amount of dividends that may be paid in any calendar year is limited to the current year's profits, combined with the retained profit of the previous two years, subject to the capital requirements described above. Other dividend payment restrictions on the Bank and the Company as included in the Consent Order and the Written Agreement preclude dividend payment without prior regulatory approval.

As discussed in Note 8, as of June 30, 2013, the Company had \$58.4 million of junior subordinated debentures held by two statutory business trusts that it controls. The Company has the right to defer interest payments on the debentures for a period of up to 20 consecutive quarters, and elected to begin such a deferral in August 2010. However, all deferred interest must be paid before the Company may pay dividends on its

Table of Contents

capital stock. Therefore, the Company will not be able to pay dividends on its common stock until all deferred interest on these debentures has been paid in full. The total amount of such deferred and unpaid interest as of June 30, 2013, was \$14.3 million.

Furthermore, as with the debentures discussed above, the Company is prohibited from paying dividends on its common stock unless it has fully paid all deferred dividends on the Series B Preferred Stock. In August 2010, it also began to defer the payment of dividends on such preferred stock. Therefore, in addition to paying all the accrued and unpaid distributions on the debentures set forth above, the Company must also fully pay all deferred and unpaid dividends on the Series B Preferred Stock before it may reinstate the payment of dividends on the common stock. The total amount of deferred Series B Preferred Stock dividends as of June 30, 2013, was \$11.2 million. In addition, the Consent Order and the Written Agreement contain restrictions on dividend payments.

Further detail on the subordinated debentures, the Series B Preferred Stock and the deferral of interest and dividends thereon is described in Notes 8 and 15.

Note 12 Fair Value Measurements

Fair value is defined as the exchange price that would be received for an asset or paid to transfer a liability (an exit price) in the principal or most advantageous market for the asset or liability in an orderly transaction between market participants on the measurement date. The fair value hierarchy established by the Company also requires an entity to maximize the use of observable inputs and minimize the use of unobservable inputs when measuring fair value. Three levels of inputs that may be used to measure fair value are:

Level 1: Quoted prices (unadjusted) for identical assets or liabilities in active markets that the Company has the ability to access as of the measurement date.

Level 2: Significant observable inputs other than Level 1 prices, such as quoted prices for similar assets or liabilities, quoted prices in markets that are not active, and other inputs that are observable or can be corroborated by observable market data.

Level 3: Significant unobservable inputs that reflect a company's own assumptions about the assumptions that market participants would use in pricing an asset or liability.

Transfers between levels are deemed to have occurred at the end of the reporting period. For the quarters ended June 30, 2013, and 2012 there were no significant transfers between levels.

Securities available-for-sale are valued primarily by a third party pricing agent and both the market and income valuation approaches are implemented. The Company uses the following methods and significant assumptions to estimate fair value:

- Government-sponsored agency debt securities are primarily priced using available market information through processes such as benchmark curves, market valuations of like securities, sector groupings and matrix pricing.
- Other government-sponsored agency securities, mortgage-backed securities and some of the actively traded real estate mortgage investment conduits and collateralized mortgage obligations are primarily priced using available market information including benchmark yields, prepayment speeds, spreads, volatility of similar securities and trade date.
- Other inactive government-sponsored agency securities are primarily priced using consensus pricing and dealer quotes.
- State and political subdivisions are largely grouped by characteristics (i.e., geographical data and source of revenue in trade dissemination systems). Because some securities are not traded daily and

Table of Contents

due to other grouping limitations, active market quotes are often obtained using benchmarking for like securities and could be valued with Level 3 measurements.

- CDOs are collateralized by trust preferred security issuances of other financial institutions. CDOs are valued utilizing a discounted cash flow analysis. To reflect an appropriate fair value measurement, management included a risk premium adjustment to provide an estimate of the amount that a market participant would demand because of uncertainty in cash flows in the discounted cash flow analysis. Changes in unobservable inputs such as future cash flows, prepayment speeds and market rates which may result in a significantly higher or lower fair value measurement. Due to the significant amount of unobservable inputs for the security and limited market activity, these securities are considered Level 3 valuations.
- Asset-backed securities are priced using a single expected cash flow stream model using trades, covers, bids, offers and price for similar bonds as well as prepayment and default projections based on historical statistics of the underlying collateral and current market data. As some of asset-backed securities are auction rate securities, there is additional liquidity risk estimated by the Company. Therefore, the valuation of some asset-backed securities are considered Level 3 valuations
- Residential mortgage loans eligible for sale in the secondary market are carried at fair market value. The fair value of loans held for sale is determined using quoted secondary market prices.
- Lending related commitments to fund certain residential mortgage loans (interest rate locks) to be sold in the secondary market and forward commitments for the future delivery of mortgage loans to third party investors as well as forward commitments for future delivery of mortgage-backed securities are considered derivatives. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment and do not typically involve significant judgments by management.
- The fair value of mortgage servicing rights is based on a valuation model that calculates the present value of estimated net servicing income. The valuation model incorporates assumptions that market participants would use in estimating future net servicing income to derive the resultant value. The Company is able to compare the valuation model inputs, such as the discount rate, prepayment speeds, weighted average delinquency and foreclosure/bankruptcy rates to widely available published industry data for reasonableness.
- Interest rate swap positions, both assets and liabilities, are based on a valuation pricing models using an income approach based upon readily observable market parameters such as interest rate yield curves.
- Both the credit valuation reserve on current interest rate swap positions and on receivables related to unwound customer interest rate swap positions was determined based upon management's estimate of the amount of credit risk exposure, including available collateral protection and/or by utilizing an estimate related to a probability of default as indicated in the Bank credit policy. Such adjustments would result in a Level 3 classification.
- The fair value of impaired loans with specific allocations of the allowance for loan losses is generally based on recent real estate appraisals. These appraisals may utilize a single valuation approach or a combination of approaches including comparable sales and the income approach. Adjustments are routinely made in the appraisal process by the appraisers to adjust for differences between the comparable sales and income data available. Such adjustments are usually significant and typically result in a Level 3 classification of the inputs for determining fair value.
- Nonrecurring adjustments to certain commercial and residential real estate properties classified as OREO are measured at the lower of carrying amount or fair value, less costs to sell. Fair values are generally based on third party appraisals of the property, resulting in a Level 3 classification. In cases where the carrying amount exceeds the fair value, less costs to sell, an impairment loss is recognized.

The following table and commentary presents quantitative (dollars in thousands) and qualitative information about Level 3 fair value measurements as of December 31, 2012:

| Measured at fair value on a recurring basis: | Fair Value | Valuation Methodology | Unobservable Inputs | Range of Input | Weighted Average of Inputs |
|---|------------|---|------------------------|----------------|----------------------------|
| Collateralized Debt Obligations | \$ 9,957 | Discounted Cash Flow | Discount Rate | Libor + 6%-7% | 6.4% |
| | | | Prepayment % | 0%-76% | 16.4% |
| | | | Default range | 3.1%-100% | 19.1% |
| Mortgage Servicing rights | 4,116 | Discounted Cash Flow | Discount Rate | 10.5% | 10.5% |
| | | | Prepayment Speed | 15.8% | 15.8% |
| Interest Rate Swap Valuation | (47) | Management estimate of credit risk exposure | Probability of Default | 2%-31% | 17.9% |

The \$132,000 on the state and political subdivisions line at June 30, 2013, under Level 3 represents a security from a small, local municipality. Given the small dollar amount and size of the municipality involved, this is categorized under Level 3 based on the payment stream received by the Company from the municipality. That payment stream is otherwise an unobservable input.

Assets and Liabilities Measured at Fair Value on a Nonrecurring Basis:

The Company may be required, from time to time, to measure certain other assets at fair value on a nonrecurring basis in accordance with GAAP. These assets consist of impaired loans and other real estate owned. For assets measured at fair value on a nonrecurring basis on hand at June 30, 2013, and December 31, 2012, respectively, the following tables provide the level of valuation assumptions used to determine each valuation and the carrying value of the related assets:

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

| | June 30, 2013 | | | | | |
|---|---------------|---|---------|---|-----------|-----------|
| | Level 1 | | Level 2 | | Level 3 | Total |
| Impaired loans ¹ | \$ | - | \$ | - | \$ 11,561 | \$ 11,561 |
| Other real estate owned, net ² | | - | | - | 59,465 | 59,465 |
| Total | \$ | - | \$ | - | \$ 71,026 | \$ 71,026 |

1 Represents carrying value and related write-downs of loans for which adjustments are substantially based on the appraised value of collateral for collateral-dependent loans, had a carrying amount of \$16.6 million, with a valuation allowance of \$5.0 million, resulting in a decrease of specific allocations within the allowance for loan losses of \$1.3 million for the six months ending June 30, 2013.

2 OREO is measured at the lower of carrying or fair value less costs to sell, had a net carrying amount of \$59.5 million, which is made up of the outstanding balance of \$92.5 million, net of a valuation allowance of \$30.5 million and participations of \$2.5 million, at June 30, 2013.

| | December 31, 2012 | | | | | |
|---|-------------------|---|---------|---|-----------|-----------|
| | Level 1 | | Level 2 | | Level 3 | Total |
| Impaired loans ¹ | \$ | - | \$ | - | \$ 21,543 | \$ 21,543 |
| Other real estate owned, net ² | | - | | - | 72,423 | 72,423 |
| Total | \$ | - | \$ | - | \$ 93,966 | \$ 93,966 |

1 Represents carrying value and related write-downs of loans for which adjustments are substantially based on the appraised value of collateral for collateral-dependent loans, had a carrying amount of \$27.8 million, with a valuation allowance of \$6.3 million, resulting in a decrease of specific allocations within the provision for loan losses of \$6.8 million for the year ending December 31, 2012. The carrying value of loans fully charged off is zero.

2 OREO is measured at the lower of carrying or fair value less costs to sell, had a net carrying amount of \$72.4 million, which is made up of the outstanding balance of \$109.7 million, net of a valuation allowance of \$31.4 million and participations of \$5.9 million, at December 31, 2012, resulting in a charge to expense of \$16.4 million for the year ended December 31, 2012.

The Company also has assets that under certain conditions are subject to measurement at fair value on a nonrecurring basis. These assets include OREO and impaired loans. The Company has estimated the fair values of these assets based primarily on Level 3 inputs. Other real estate and impaired loans are generally valued using the fair value of collateral provided by third party appraisals. These valuations include assumptions related to cash flow projections, discount rates, and recent comparable sales. The numerical range of unobservable inputs for these valuation assumptions are not meaningful.

Note 13 Financial Instruments with Off-Balance Sheet Risk and Derivative Transactions

To meet the financing needs of its customers, the Bank, as a subsidiary of the Company, is a party to various financial instruments with off-balance-sheet risk in the normal course of business. These off-balance-sheet financial instruments include commitments to originate and sell loans as well as financial standby, performance standby and commercial letters of credit. The instruments involve, to varying degrees, elements of credit and interest rate risk in excess of the amount recognized in the consolidated balance sheet. The Bank's credit exposure for loan commitments and letters of credit are represented by the dollar amount of those instruments. Management generally uses the same credit policies and collateral requirements in making commitments and conditional obligations as it does for on-balance-sheet instruments.

Table of Contents**Interest Rate Swaps**

The Company also has interest rate derivative positions to assist with risk management that are not designated as hedging instruments. These derivative positions relate to transactions in which the Bank enters an interest rate swap with a client while at the same time entering into an offsetting interest rate swap with another financial institution. Due to financial covenant violations relating to nonperforming loans, the Bank had \$7.8 million in investment securities pledged to support interest rate swap activity with three correspondent financial institutions at June 30, 2013. The Bank had \$7.4 million in investment securities pledged to support interest rate swap activity with two correspondent financial institutions at December 31, 2012. In connection with each transaction, the Bank agreed to pay interest to the client on a notional amount at a variable interest rate and receive interest from the client on the same notional amount at a fixed interest rate. At the same time, the Bank agreed to pay another financial institution the same fixed interest rate on the same notional amount and receive the same variable interest rate on the same notional amount. The transaction allows the client to effectively convert a variable rate loan to a fixed rate loan and is part of the Company's interest rate risk management strategy. Because the Bank acts as an intermediary for the client, changes in the fair value of the underlying derivative contracts offset each other and do not generally affect the results of operations. Fair value measurements include an assessment of credit risk related to the client's ability to perform on their contract position, however, and valuation estimates related to that exposure are discussed in Note 12 above. At June 30, 2013, the notional amount of non-hedging interest rate swaps was \$91.0 million with a weighted average maturity of 1.4 years. At December 31, 2012, the notional amount of non-hedging interest rate swaps was \$82.1 million with a weighted average maturity of 1.3 years. The Bank offsets derivative assets and liabilities that are subject to a master netting arrangement.

The Bank also grants mortgage loan interest rate lock commitments to borrowers, subject to normal loan underwriting standards. The interest rate risk associated with these loan interest rate lock commitments is managed by entering into contracts for future deliveries of loans as well as selling forward mortgage-backed securities contracts. Loan interest rate lock commitments generally have fixed expiration dates or other termination clauses and may require payment of a fee. Since many of the commitments are expected to expire without being drawn upon, the total commitment amounts do not necessarily represent future cash requirements. Commitments to originate residential mortgage loans held-for-sale and forward commitments to sell residential mortgage loans or forward mortgage-backed securities contracts are considered derivative instruments and changes in the fair value are recorded to mortgage banking income. Fair values are estimated based on observable changes in mortgage interest rates including mortgage-backed securities prices from the date of the commitment.

The following table presents derivatives not designated as hedging instruments as of June 30, 2013, and periodic changes in the values of the interest rate swaps are reported in other noninterest income. Periodic changes in the value of the forward contracts related to mortgage loan origination are reported in the net gain on sales of mortgage loans.

| | Notional or Contractual Amount | Asset Derivatives | | Liability Derivatives | |
|---|--------------------------------------|---------------------------|------------|---------------------------|------------|
| | | Balance Sheet Location | Fair Value | Balance Sheet Location | Fair Value |
| Interest rate swap contracts net of credit valuation | \$ 90,986 | Other Assets | \$ 750 | Other Liabilities | \$ 773 |
| Commitments ¹ | 219,605 | Other Assets | 602 | N/A | - |
| Forward contracts ² | 24,000 | N/A | - | Other Liabilities | (6) |
| Total | | | \$ 1,352 | | \$ 767 |

¹Includes unused loan commitments and interest rate lock commitments.

²Includes forward MBS contracts and forward loan contracts.

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

The following table presents derivatives not designated as hedging instruments as of December 31, 2012.

| | Notional or Contractual Amount | Asset Derivatives | | Liability Derivatives | |
|--------------------------------|--------------------------------|------------------------|------------|------------------------|------------|
| | | Balance Sheet Location | Fair Value | Balance Sheet Location | Fair Value |
| Interest rate swap contracts | | | | | |
| net of credit valuation | \$ 82,097 | Other Assets | \$ 1,302 | Other Liabilities | \$ 1,349 |
| Commitments ¹ | 226,135 | Other Assets | 567 | N/A | - |
| Forward contracts ² | 28,000 | N/A | - | Other Liabilities | 5 |
| Total | | | \$ 1,869 | | \$ 1,354 |

¹Includes unused loan commitments and interest rate lock commitments.

²Includes forward mortgage backed securities contracts.

The Bank also issues letters of credit, which are conditional commitments that guarantee the performance of a customer to a third party. The credit risk involved and collateral obtained in issuing letters of credit are essentially the same as that involved in extending loan commitments to our customers.

In addition to customer related commitments, the Company is responsible for letters of credit commitments that relate to properties held in OREO. The following table represents the Company's contractual commitments due to letters of credit as of June 30, 2013, and December 31, 2012.

The following table is a summary of financial instrument commitments (in thousands):

| | June 30, 2013 | | | December 31, 2012 | | |
|-------------------------|---------------|----------|----------|-------------------|----------|-----------|
| | Fixed | Variable | Total | Fixed | Variable | Total |
| Letters of credit: | | | | | | |
| Borrower: | | | | | | |
| Financial standby | \$ 5 | \$ 3,596 | \$ 3,601 | \$ 5 | \$ 3,378 | \$ 3,383 |
| Commercial standby | - | 51 | 51 | - | 51 | 51 |

| | 1,612 | 6,613 | 8,225 | 1,635 | 7,646 | 9,281 |
| Non-borrower: | | | | | | |
| Financial standby | - | - | - | - | - | - |
| Commercial standby | - | - | - | - | - | - |
| Performance standby | 240 | 1,089 | 1,329 | 240 | 1,125 | 1,365 |
| | 240 | 1,089 | 1,329 | 240 | 1,125 | 1,365 |
| Total letters of credit | \$ 1,852 | \$ 7,702 | \$ 9,554 | \$ 1,875 | \$ 8,771 | \$ 10,646 |

Note 14 Fair Values of Financial Instruments

The estimated fair values approximate carrying amount for all items except those described in the following table. Investment security fair values are based upon market prices or dealer quotes, and if no such information is available, on the rate and term of the security. The fair value of the collateralized debt obligations included in investment securities includes a risk premium adjustment to provide an estimate of the amount that a market participant would demand because of uncertainty in cash flows and the methods for determining fair value of securities as discussed in detail in Note 12. It is not practicable to determine the

Table of Contents

fair value of FHLBC stock due to restrictions on transferability. Fair values of loans were estimated for portfolios of loans with similar financial characteristics, such as type and fixed or variable interest rate terms. Cash flows were discounted using current rates at which similar loans would be made to borrowers with similar ratings and for similar maturities. The fair value of time deposits is estimated using discounted future cash flows at current rates offered for deposits of similar remaining maturities. The fair values of borrowings were estimated based on interest rates available to the Company for debt with similar terms and remaining maturities. The fair value of off-balance sheet items is not considered material.

The carrying amount and estimated fair values of financial instruments were as follows:

| | Carrying Amount | Fair Value | June 30, 2013 | | |
|---|--------------------|---------------|---------------|-----------|-----------|
| | | | Level 1 | Level 2 | Level 3 |
| Financial assets: | | | | | |

Note 15 Preferred Stock

The Series B Preferred Stock was issued as part of the Treasury's Troubled Asset Relief Program and Capital Purchase Program (the CPP), as implemented by the Treasury. The Series B Preferred Stock qualifies as Tier 1 capital and pays cumulative dividends on the liquidation preference amount on a quarterly basis at a rate of 5% per annum for the first five years, and 9% per annum thereafter. Concurrent with issuing the Series B Preferred Stock, the Company issued to the Treasury a ten year warrant to purchase 815,339 shares of the Company's common stock at an exercise price of \$13.43 per share.

The Company allocated the \$73 million in proceeds received from the Treasury in the first quarter 2009 between the Series B Preferred Stock and the warrants that were issued. The warrants were classified as equity, and the allocation was based on their relative fair values in accordance with accounting guidance. The fair value was determined for both the Series B Preferred Stock and the warrants as part of the allocation process in the amounts of \$68.2 million and \$4.8 million, respectively.

As discussed in Note 11, in August 2010, the Company suspended quarterly cash dividends on its outstanding Series B Preferred Stock. Further, as discussed in Note 8 and Note 11, the Company has elected to defer interest payments on certain of its subordinated debentures. In quarters prior to first quarter, 2013, during the period in which preferred stock dividends were deferred such dividends continued to accrue. However, if the Company fails to pay dividends for an aggregate of six quarters on the Series B Preferred Stock, whether or not consecutive, the holders have the right to appoint representatives to the Company's board of directors. As the Company elected to defer dividends for more than six quarters, a new director was appointed by the Treasury to join the board during the fourth quarter of 2012. The terms of the Series B Preferred Stock also prevent the Company from paying cash dividends or generally repurchasing its common stock while Series B Preferred Stock dividends are in arrears. The total amount of unpaid and deferred Series B Preferred Stock dividends as of June 30, 2013, was \$11.2 million.

During the fourth quarter 2012, Treasury announced the continuation of individual auctions of the preferred stock issued through CPP. At that time, the Company was informed that the Series B Preferred Stock would be auctioned by Treasury. All of the Series B Preferred Stock held by Treasury was sold to

Table of Contents

third parties, including certain of our directors, in auctions that were completed in the first quarter of 2013. At December 31, 2012, Old Second Bancorp carried \$71.9 million of Series B Stock in Total Stockholders Equity. At June 30, 2013, the Company carried \$72.4 million of Series B Stock.

As a result of the completed auctions, the Company's Board elected to stop declaring the dividend on the Series B Preferred Stock in first quarter, 2013. Previously, the Company had declared and accrued the dividend on the Series B Stock quarterly throughout the deferral period. Given the discount reflected in the results of the auction, the Board believes that the Company will likely be able to repurchase the Series B Stock in the future at a price less than the face amount of the Series B Stock plus accrued and unpaid dividends. Therefore, under GAAP, the Company did not fully accrue the dividend on the Series B Stock in the first quarter and did not accrue for it in the second quarter. The Company will continue to evaluate whether declaring dividends on the Series B Stock is appropriate in future periods. Pursuant to the terms of the Series B Stock, the dividends paid on the Series B Stock will increase from 5% to 9% in 2014.

Item 2. Management's Discussion and Analysis of Financial Condition and Results of Operations

Overview

Old Second Bancorp, Inc. (the Company) is a financial services company with its main headquarters located in Aurora, Illinois. The Company is the holding company of Old Second National Bank (the Bank), a national banking organization headquartered in Aurora, Illinois and provides commercial and retail banking services, as well as a full complement of trust and wealth management services. The Company has offices located in Cook, Kane, Kendall, DeKalb, DuPage, LaSalle and Will counties in Illinois. The following management's discussion and analysis is presented to provide information concerning our financial condition as of June 30, 2013, as compared to December 31, 2012, and the results of operations for the three-month and six-month periods ended June 30, 2013, and 2012. This discussion and analysis should be read along with our consolidated financial statements and the financial and statistical data appearing elsewhere in this report and our 2012 Form 10-K.

The economies in our chosen markets continued to recover slowly as did the national financial infrastructure. Troubled real estate markets in the Company's market areas continue to directly affect borrowers' ability to repay their loans. This has resulted in a continued elevated, but improving level of nonperforming loans. The Company has, however, seen signs of stabilization in all real estate markets. Overall economic weakness is reflected in the Company's operating results, and management remains vigilant in analyzing the loan portfolio quality, estimating loan loss provision and making decisions to charge-off loans. The Company recorded a \$4.3 million loan loss reserve release and net income of \$8.9 million prior to preferred stock dividends in the first half of 2013. This compared to a \$6.3 million provision for loan losses and a net loss of \$1.7 million prior to preferred stock dividends the same period in 2012.

The Company recorded a \$1.8 million loan loss reserve release after \$1.8 million in net charge offs in second quarter. Net income of \$3.5 million (prior to preferred stock dividends) was recorded in second quarter down from \$5.5 million for the first three months of 2013. Second quarter 2012 results included \$200,000 in provision for loan losses and \$1.3 million net income prior to preferred stock dividends and accretion.

Summary information shown as graphs can be found at our investor relations website or go to <https://www.sn1.com/irweblinkx/QuarterlyResults.aspx?iid=100625>. The graphs and information included on the investor relations website are being furnished for reference purposes only and are not incorporated in, or to be considered filed with this, Form 10-Q.

Results of Operations

The net income for the second quarter of 2013 was \$3.5 million, or \$0.15 earnings per diluted share, after preferred stock dividend and accretion discount, as compared with \$1.3 million net income, or \$0.00 earnings per diluted share after preferred stock dividend and accretion discount, in the second quarter of 2012. The net income for the first half of 2013 was \$8.9 million or \$0.45 earnings per diluted share after preferred stock dividend and accretion, as compared to \$1.7 million in net loss, or \$0.29 loss per diluted share after preferred stock dividend and accretion in the first half of 2012. The Company recorded a \$4.3 million release from the loan loss reserve in the first half of 2013, which included a release of \$1.8 million in the second quarter. Net loan recoveries totaled \$745,000 the first half of 2013, which included \$1.8 million of net charge-offs in the second quarter. The net income available to common stockholders was \$2.2 million for the second quarter of 2013 and \$6.4 million for the first half of 2013, as compared to a net income to common shareholders of \$14,000 and a net loss to common shareholders of \$4.2 million for the second quarter and first half of 2012, respectively.

Net Interest Income

Net interest and dividend income decreased \$3.5 million, from \$30.8 million in the first half of 2012, to \$27.3 million in the first half of 2013. Average earning assets increased \$27.9 million to \$1.77 billion from the first half of 2012 to the first half of 2013, as management continued to emphasize asset quality with sharply higher portfolio securities (up 61.1%) while new loan originations continued to be limited. The

Table of Contents

\$194.3 million decrease in year to date average loans and loans held-for-sale was primarily due to the lack of expansion by local businesses leading to lower utilization of available credit lines. Simultaneously, difficult competitive pricing, paydowns and maturities contributed to the year over year decrease. To utilize available liquid funds, management continued to increase securities available-for-sale in the first half of 2013 to 30.3% of total assets up from 28.3% at the end of 2012. At the same time, the Company's stable deposit base was impacted by expiration of the Federal Deposit Insurance Corporation Transaction Account Guarantee (TAG) program on large deposit balances, income and property tax payments and the loss of some retail deposits as customers took advantage of other investment opportunities. As a result, average interest bearing deposits decreased \$32.0 million year over year for the six month period ended June 30. At this time, management sees no need to grow deposits to fund loan or investment opportunities and management expects that securities sales and maturities will provide cost effective liquidity as those opportunities arise.

The net interest margin (tax-equivalent basis), expressed as a percentage of average earning assets, decreased from 3.57% in the first half of 2012 to 3.13% in the first half of 2013. The average tax-equivalent yield on earning assets decreased from 4.46% in the first half of 2012 (yield would have been 4.35% except for collection of previously reversed or unrecognized interest on loans that returned to performing status) to 3.89% (yield would have been 3.82% except for adjustments noted above) in the first half of 2013. At the same time, however, the cost of funds on interest bearing liabilities decreased from 1.13% to 0.96% helping to offset the decrease in earning asset yield. The growth of lower yielding securities (compared to reductions in higher yielding loans) was the main cause of decreased net interest income. Reductions in higher yielding loans come from the factors discussed in the paragraph above. Additionally, management continued to see pressure to reduce interest rates on loans retained at renewal and found it necessary to accept rate concessions to keep the business.

Net interest income decreased \$2.3 million from \$15.7 million in the second quarter of 2012 to \$13.4 million in the second quarter of 2013. Higher yielding average loans were down \$174.6 million year over year in the three month period ended June 30 while lower yielding average securities were up \$215.0 million in the same period. Quarterly average interest bearing deposits were essentially flat year over year (down \$35.44 million to \$1.35 billion from \$1.38 billion) while other interest bearing liabilities showed a \$20.1 million increase in year over year quarterly averages in low cost securities sold under repurchase agreements and a minimal decrease in other borrowings, essentially FHLB advances. The net interest margin (tax-equivalent basis), expressed as a percentage of average earning assets decreased from 3.65% in the second quarter of 2012 to 3.07% in the second quarter of 2013. The average tax-equivalent yield on earning assets decreased from 4.52% in the second quarter of 2012 to 3.83% in the second quarter of 2013. The cost of interest-bearing liabilities also decreased from 1.09% to 0.96% in the same period. Consistent with the year to date margin trend, the decreased overall average earning assets resulting from reduced levels of higher yielding loans and the movement to lower yielding securities combined with the repricing of interest bearing assets and liabilities in a lower interest rate environment to decrease interest income to a greater degree than found in interest expense decreases.

Management, in order to evaluate and measure performance, uses certain non-GAAP performance measures and ratios. This includes tax-equivalent net interest income (including its individual components) and net interest margin (including its individual components) to total average interest-earning assets. Management believes that these measures and ratios provide users of the financial information with a more accurate view of the performance of the interest-earning assets and interest-bearing liabilities and of the Company's operating efficiency for comparison purposes. Other financial holding companies may define or calculate these measures and ratios differently. See the tables and notes below for supplemental data and the corresponding reconciliations to GAAP financial measures for the three and six-month periods ended June 30, 2013, and 2012.

The following tables set forth certain information relating to the Company's average consolidated balance sheets and reflect the yield on average earning assets and cost of average liabilities for the periods indicated. Dividing the related interest by the average balance of assets or liabilities derives rates. Average balances are derived from daily balances. For purposes of discussion, net interest income and net interest

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

Table of Contents

income to total earning assets on the following tables have been adjusted to a non-GAAP tax equivalent (TE) basis using a marginal rate of 35% to more appropriately compare returns on tax-exempt loans and securities to other earning assets.

Provision for Loan Losses

In the first half of 2013, the Company recorded a \$4.3 million release of reserve for loan losses, which included a release of \$1.8 million in the second quarter primarily as a result of continuing improvement in asset quality as evidenced by reductions in nonperforming loans and continued moderate charge off experience. In the first half of 2012, the provision for loan losses was \$6.3 million, which included an addition of \$200,000 in the second quarter. Provisions for loan losses are made to recognize probable and estimable losses inherent in the loan portfolio. Nonperforming loans decreased to \$62.7 million at June 30, 2013, from \$69.8 million at March 31, 2013. Charge-offs, net of recoveries, totaled a recovery of \$745,000 in the first half of 2013 with net charge offs of \$18.0 million in the first half of 2012. Net charge-offs totaled \$1.8 million in the second quarter of 2013 and \$7.5 million in the second quarter of 2012. These data along with the distribution of the Company's nonperforming loans and charge-offs net of recoveries for the periods are included in the following tables.

Classified loans include nonaccrual, performing troubled debt restructurings and all other loans considered substandard. All three components are down since June 30, 2012. Classified assets include both classified loans and OREO. Management monitors a ratio of classified assets to the sum of Bank Tier 1

Table of Contents

capital and the allowance for loan and lease loss reserve. This ratio reflects another measure of overall change in loan related asset quality. The decline in both classified loans and OREO in second quarter improved this ratio for the tenth straight quarter.

Allowance for Loan and Lease Losses

Below is a reconciliation of the activity for the periods indicated (in thousands):

| 6/30/2013 | Three Months Ending 3/31/2013 | 6/30/2012 |
|-----------|----------------------------------|-----------|
|-----------|----------------------------------|-----------|

The coverage ratio of the allowance for loan losses to nonperforming loans was 55.9% as of June 30, 2013, which reflects an increase from 55.3% as of March 31, 2013. A decrease of \$7.2 million, or 10.2%, in nonperforming loans in the second quarter of 2013 drove the overall coverage ratio change. Management updated the estimated specific allocations in the second quarter after receiving more recent appraisals for detailed collateral valuations or information on cash flow trends related to the impaired credits. Management determined the estimated amount to provide in the allowance for loan losses based upon a number of considerations, including loan growth or contraction, the quality and composition of the loan portfolio and loan loss experience. The latter item was also weighted more heavily based upon recent loss experience. The construction and development (C & D) portfolio, which has accounted for significant losses in previous periods, has had diminished adverse migration and the remaining credits are exhibiting more stable credit characteristics. Management believes that adequate reserves have been established for the inherent risk of loss in the C & D portfolio.

Management regularly reviews the performance of the higher risk pool within commercial real estate loans, and adjusts the population and the related loss factors taking into account adverse market trends including collateral valuation as well as assessments of the credits in that pool. Those assessments capture management's estimate of the potential for adverse migration to an impaired status as well as an estimate of potential reserve impact if the adverse migration were to become reality. Assets subject to this pool factor decreased by 51.0% at June 30, 2013, compared to December 31, 2012. Management has also observed that many stresses in those credits were generally attributable to cyclical economic events that were showing some signs of stabilization. Those signs included a reduction in loan migration to watch status, as well as a decrease in 30 to 89 day past due loans and some stabilization in values of certain properties.

Table of Contents

Since December 31, 2012, the Company continued to reduce its nonperforming loans reaching a total of \$62.7 million at June 30, 2013. Additionally, management conducted intensive loan workout and loss mitigation activities as evidenced by sizable net recoveries in first quarter and continued sizable recoveries in second quarter. Recognizing the strength of our established trends, during the remaining months of 2013 management reasonably expects continued runoff of troubled assets. This should allow for a reduction of the qualitative loss factors in our Loan Loss Reserve calculation methodology, thus reducing our reserve requirements. Based on these factors and after an extensive review of the loan portfolio, management approved a \$1.8 million loan loss reserve release effective June 30, 2013.

When measured as a percentage of loans outstanding, the total allowance for loan losses decreased from 3.3% of total loans as of June 30, 2012, to 3.2% of total loans at June 30, 2013. In management's judgment, an adequate allowance for estimated losses has been established for inherent losses at June 30, 2013; however, there can be no assurance that actual losses will not exceed the estimated amounts in the future.

Other Real Estate Owned

OREO decreased \$6.2 million from \$65.7 million at March 31, 2013, to \$59.5 million at June 30, 2013. Disposition activity and valuation writedowns in the second quarter more than offset several smaller dollar additions to OREO, leading to this overall decrease. In the second quarter of 2013, management successfully completed the OREO transactions (dispositions, improvements, valuations, new) shown below. As a result, holdings in all categories (vacant land suitable for farming, single family residences, lots suitable for development, multi-family and commercial property) were down or essentially unchanged in the quarter. Overall, a net gain on sale of \$386,000 was realized in the second quarter.

| (in thousands) | Three Months Ended | | Year to Date | |
|------------------------------|--------------------|------------|--------------|-----------|
| | June 30, | | June 30, | |
| | 2013 | 2012 | 2013 | 2012 |
| Beginning balance | \$ 65,663 | \$ 101,680 | \$ 72,423 | \$ 93,290 |
| Property additions | 4,196 | 3,432 | 11,181 | 19,350 |
| Development improvements | - | 197 | 50 | 515 |
| Less: | | | | |
| Property disposals | 7,804 | 10,342 | 19,465 | 15,688 |
| Period valuation adjustments | 2,590 | 5,296 | 4,724 | 7,796 |
| Other real estate owned | \$ 59,465 | \$ 89,671 | \$ 59,465 | \$ 89,671 |

The OREO valuation reserve decreased to \$30.5 million, which is 33.9% of gross OREO at June 30, 2013. The valuation reserve represented 23.5% and 30.3% of gross OREO at June 30, 2012, and December 31, 2012, respectively. In management's judgment, an adequate property valuation allowance has been established to present OREO at current estimates of fair value less costs to sell; however, there can be no assurance that additional losses will not be incurred on disposition or updates to valuation in the future.

| Total | \$ 59,465 | 100% | \$ 65,663 | 100% | \$ 89,671 | 100% |

As part of our OREO management process, we age or track the time that OREO is held for sale. The table above shows that, in total, where 47% of our OREO at June 30, 2012, had been held for less than one year, that percentage dropped to 23% at June 30, 2013. When properties are tracked as being held for one to three years, the percentage of total OREO in that age class rose to 63% at June 30, 2013, up from 48% at June 30, 2012. While the dollar totals held for more than three years were smaller than other aging categories, a similar trend was found in properties held in OREO for more than three years (14% as of June 30, 2013, up 1% and 9% from March 31, 2013, and June 30, 2012, respectively) with approximately \$3.7 million held for over four years at June 30, 2013.

As properties are held for longer periods of time or if the specific property is problematic (i.e. completely vacant retail property) the Company has found it becomes more difficult to objectively evaluate qualified property appraisals of value. In second quarter, the Company sold properties that fit this description to reduce OREO holdings and decrease the classified asset ratio in order to comply with the Consent Order.

The Company has seen slow sales improvement in all sectors of OREO holdings in 2013. The most marked improvement has been in residential houses and unimproved lots for residential development, especially as these areas were relatively stagnant in the Company's OREO holdings last year. At June 30, 2013, the Company sees no sluggish sectors in the OREO portfolio and expects continued progress in shrinking the portfolio through sales. While past liquidations of OREO properties have been close to or higher than the Company's book value, there can be no guarantee that sales trend will continue.

Table of Contents*Noninterest Income*

| (in thousands) | Three Months Ended | | | June 30, 2013 Dollar Change From | |
|--|--------------------|-------------------|------------------|-------------------------------------|------------------|
| | June 30, 2013 | March 31, 2013 | June 30, 2012 | March 31, 2013 | June 30, 2012 |
| Noninterest income | | | | | |
| Trust income | \$ 1,681 | \$ 1,491 | \$ 1,463 | \$ 190 | \$ 218 |
| Service charges on deposits | 1,799 | 1,677 | 1,893 | 122 | (94) |
| Residential mortgage revenue | 2,821 | 2,450 | 2,272 | 371 | 549 |
| Securities gains, net | 745 | 1,453 | 692 | (708) | 53 |
| Increase in cash surrender value of bank-owned life insurance | 372 | 407 | 326 | (35) | 46 |
| Death benefit including interest realized on bank-owned life insurance | 375 | - | - | 375 | 375 |
| Debit card interchange income | 900 | 792 | 1,113 | 108 | (213) |
| Lease revenue from other real estate owned | 257 | 408 | 911 | (151) | (654) |
| Net gain on sales of other real estate owned | 386 | 181 | 355 | 205 | 31 |
| Other income | 1,147 | 1,737 | 1,371 | (590) | (224) |
| Total noninterest income | \$ 10,483 | \$ 10,596 | \$ 10,396 | \$ (113) | \$ 87 |

Trust income for the second quarter was the highest quarterly total in two years reflecting favorable equity values and new business development by expanded trust relationship staff. Portfolio management to lessen risk while maintaining and improving selected yields produced gains on securities sales. Other noninterest income in 2013 reflects recapture during first quarter of large dollar expense previously recorded for restricted stock awards (\$612,000 benefit) while a more modest amount was recognized on a new debit card agreement signed in second quarter. Strong 2013 results were also realized in the Company's residential mortgage group.

Noninterest Expense

| Legal fees | 486 | 323 | 770 | 163 | (284) |
| OREO valuation expense | 2,589 | 1,987 | 5,127 | 602 | (2,538) |
| Other OREO expense | 1,356 | 1,699 | 1,661 | (343) | (305) |
| Other expense | 3,510 | 3,144 | 3,026 | 366 | 484 |
| Total noninterest expense | \$ 22,194 | \$ 21,527 | \$ 24,634 | \$ 667 | \$ (2,440) |

Salaries and benefits are up from first quarter 2013 on accrual of management bonus amounts under Board approved incentive plans. Amortization expense related to core deposit intangible assets increased from the second quarter in 2012 reflecting management analysis of the decreased value of those deposits in the current historically low interest rate environment. Legal fees expenses dropped on accounting recoveries and management control of legal expense continued. OREO valuation expenses decreased from 2012 as property valuation declines, while still sizable, are more moderate than seen last year. OREO valuation expenses are measured on a consistent process of reappraising properties annually with a high level of appraisals in second and fourth calendar quarters. General bank insurance expense is lower as a result of a favorable renewal of required coverage.

Table of Contents

Income Taxes

The Company did not record income tax expense for the first six months of 2013, despite an \$8.9 million pre-tax income during that period, due to the establishment of a valuation allowance against the Company's deferred tax assets which was first established as of December 31, 2010. Under generally accepted accounting principles, income tax benefits and the related tax assets are only allowed to be recognized if they will more likely than not be fully realized. As a result, at June 30, 2013, the net amount of the Company's deferred tax assets related to operations has been reduced to zero. The Company's effective tax rate for the first six months ending June 30, 2013, and 2012 was 0%.

The determination of being able to realize the deferred tax assets is highly subjective and dependent upon judgment concerning management's evaluation of both positive and negative evidence, including forecasts of future income, available tax planning strategies, and assessments of the current and future economic and business conditions. Management considered both positive and negative evidence regarding the final realization of the deferred tax assets, which is largely dependent upon the ability to derive benefits based upon future taxable income. Management determined that realization of the deferred tax asset was not more likely than not as required by accounting principles and established a valuation allowance at December 31, 2010, to reflect this judgment. A deferred tax asset related to accumulated other comprehensive loss resulting from the net unrealized loss on available-for-sale securities increased to \$7.3 million at June 30, 2013, from \$928,000 at December 31, 2012. An increase in rates will generally cause a decrease in the fair value of individual securities and results in changes in unrealized loss on available-for-sale securities. In addition to the impact of rate changes upon pricing, uncertainty in the financial markets can cause reduced liquidity for certain investments and those changes are discussed in detail in Note 2 to the consolidated financial statements. Management has both the ability and intent to retain investments in available-for-sale securities. In each future accounting period, the Company's management will reevaluate whether the current conditions in conjunction with positive and negative evidence support a change in the valuation allowance against its deferred tax assets. Any such subsequent reduction in the estimated valuation allowance would lower the amount of income tax expense recognized in the Company's consolidated statements of operations in future periods.

Financial Condition

Total assets decreased \$112.9 million, or 5.5%, from December 31, 2012, to close at \$1.93 billion as of June 30, 2013. Total loans decreased by \$47.3 million, or 4.1%, as management continued to emphasize capital management and credit quality along with relationship lending under an intensely competitive market environment and with a customer base that has generally been cautious about expanding business in a difficult economy. At the same time, loan charge-off activity reduced balances and collateral that previously secured loans moved to OREO. OREO, net of valuation reserve and reflecting new properties as well as dispositions and improvements to existing properties, decreased \$13.0 million from December 31, 2012, or 17.9% at June 30, 2013. Available-for-sale securities increased by \$5.1 million for the six months ended June 30, 2013. Management is comfortable with the positions held in available for sale securities. The portfolio provides benefit to net interest income as loan demand develops. Between the portion of the portfolio that is not carried with unrealized loss and the ability to borrow a substantial amount using securities as collateral, management is comfortable with liquidity provided by available for sale securities. If needed, management is confident that deposits could be raised if needed for whatever reason.

The core deposit intangible asset related to the Heritage Bank acquisition in February 2008 decreased from \$3.3 million at December 31, 2012, to \$2.2 million as of June 30, 2013. Management performed an annual review of the core deposit intangible assets as of November 30, 2012. Based upon that review and ongoing quarterly monitoring, management determined there was no impairment of the core deposit intangible assets as of June 30, 2013. No assurance can be given that future impairment tests will not result in a charge to earnings.

Table of Contents*Loans*

Total loans were \$1.10 billion as of June 30, 2013, a decrease of \$47.3 million from \$1.15 billion as of December 31, 2012.

| (in thousands) | Major Classification of Loans as of | | | June 30, 2013 Dollar Change From | |
|---------------------------------------|-------------------------------------|-------------------|------------------|-------------------------------------|------------------|

| | 1,102,234 | 1,113,066 | 1,238,042 | (10,832) | (135,808) |
| Net deferred loan costs and (fees) | 469 | 236 | 92 | 233 | 377 |
| | \$ 1,102,703 | \$ 1,113,302 | \$ 1,238,134 | \$ (10,599) | \$ (135,431) |

The quality of the Bank's loan portfolio has continued to improve over the last 10 consecutive quarters. This improvement is attributable to a number of factors including successful execution of management's plan to reduce troubled and lower-quality assets, the still sluggish but gradually improving business conditions in our operating footprint, and the improvement in most sectors of the northern Illinois real estate market positively affecting real estate based borrowers in our portfolio. Because the Company is located in a growth corridor with significant open space and undeveloped real estate, real estate lending (including commercial, residential, and construction) has been and continues to be a sizeable portion of the portfolio. Notwithstanding this, our concentrations of real estate loans are below regulatory advised maximum limits. These categories comprised 89.3% of the portfolio as of June 30, 2013, compared to 90.1% of the portfolio as of December 31, 2012.

The Company continues to oversee and manage its loan portfolio in accordance with interagency guidance on risk management. Consistent with that commitment and management's response to the Consent Order with the OCC, management continues to follow its asset diversification plan and revised credit policy. Management had previously reorganized the lending function placing increased emphasis upon commercial and industrial lending in particular. While the Bank is beginning to offer new commercial and industrial loan transactions to manufacturing industries, the Bank has also entered into new income producing commercial real estate loans, such as to nationally branded hotel franchises and to multi-family apartments. These efforts are beginning to reverse normal loan attrition. Continued focus on this strategy in the remainder of 2013 should yield growth in our commercial loan portfolio ahead of runoff.

In second quarter 2013, the portfolio showed some stabilization. Total loans declined \$11.0 million in the quarter compared to much higher declines in previous recent quarters, for example, a \$36.7 million decline between December 31, 2012, and March 31, 2013. Management believes that the Bank may experience modest organic loan growth in the second half of 2013. While overall growth remains elusive, business development efforts, including work by several new experienced lenders since year end 2012, has produced sizable buildup in loan pipelines in the first half of 2013.

Table of Contents*Securities*

| (in thousands) | Securities at Fair Value as of | | | June 30, 2013 Dollar Change From | |
|---|--------------------------------|-------------------|------------------|-------------------------------------|------------------|
| | June 30, 2013 | March 31, 2013 | June 30, 2012 | March 31, 2013 | June 30, 2012 |
| U.S. Treasury | \$ 1,547 | \$ 1,502 | \$ 1,515 | \$ 45 | \$ 32 |
| U.S. government agencies | 6,726 | 69,265 | 44,623 | (62,539) | (37,897) |
| U.S. government agency mortgage-backed | 52,414 | 76,352 | 95,208 | (23,938) | (42,794) |
| States and political subdivisions | 20,119 | 27,015 | 14,058 | (6,896) | 6,061 |
| Corporate Bonds | 34,429 | 38,579 | 35,267 | (4,150) | (838) |
| Collateralized mortgage obligations | 168,505 | 131,669 | 62,387 | 36,836 | 106,118 |
| Asset-backed securities | 290,853 | 220,737 | 136,674 | 70,116 | 154,179 |
| Collateralized debt obligations | 10,344 | 10,627 | 9,163 | (283) | 1,181 |
| | \$ 584,937 | \$ 575,746 | \$ 398,895 | \$ 9,191 | \$ 186,042 |

Second quarter purchases generally consisted of auction rate asset-backed securities backed by student loans with U.S. Department of Education guarantees. Other noteworthy purchases were made on collateralized mortgage obligations and mortgage-backed securities, including some privately issued mortgage-backed. Sales were conducted to maintain yield while lowering market value risk.

The net unrealized losses, net of deferred tax benefit, in the portfolio increased by \$9.2 million from \$1.3 million as of December 31, 2012, to \$10.5 million as of June 30, 2013. Management is confident that the increase in securities carried with unrealized losses is in no way a concern. Additional information related to securities available-for-sale is found in Note 2.

Deposits and Borrowings

| (in thousands) | As Of | | | June 30, 2013 Dollar Change From | |
|---------------------------|------------------|-------------------|------------------|-------------------------------------|------------------|
| | June 30, 2013 | March 31, 2013 | June 30, 2012 | March 31, 2013 | June 30, 2012 |
| Noninterest bearing | \$ 366,406 | \$ 351,328 | \$ 412,635 | \$ 15,078 | \$ (46,229) |

| Certificates of deposits: | | | | | |
| of less than \$100,000 | 306,302 | 312,193 | 347,789 | (5,891) | (41,487) |
| of \$100,000 or more | 189,963 | 188,872 | 209,400 | 1,091 | (19,437) |
| | \$ 1,690,623 | \$ 1,718,256 | \$ 1,770,024 | \$ (27,633) | \$ (79,401) |

The Company's stable deposit base was impacted by the expiration of the TAG program that provided FDIC insurance on large account balances. Since March 31, 2013, income and property tax payments have also lead to deposit reductions. Additionally, management believes that some retail deposits have been withdrawn to take advantage of other investment opportunities.

Total deposits decreased \$26.6 million, or 1.5%, in the six months ended June 30, 2013, to close at \$1.69 billion. During first six months, savings and NOW increased by \$11.4 million, and \$632,000, or 5.3% and 0.2%, respectively. At the same time, noninterest bearing demand and money market deposits decreased by \$13.0 million and \$11.0 million, or 3.4% and 3.4%, respectively. Time deposits decreased \$14.5 million or 2.8% primarily due to management's pricing strategy discouraging deposit business from customers with a single service relationship at the Bank. The Bank continues to maintain its number one market share in its home counties of Kane and Kendall in Illinois. Market interest rates decreased generally and the average

Table of Contents

cost of interest bearing deposits decreased from 0.76% in the quarter ended June 30, 2012, to 0.60%, or 16 basis points, in the same period of 2013. Similarly, the average total cost of interest bearing liabilities decreased 13 basis points from 1.09% in the quarter ended June 30, 2012, to 0.96% in the same period of 2013.

June 30, 2013, compared to March 31, 2013, and comparisons of June 30, 2013, to June 30, 2012, are shown in the table above. Relevant comments on these periods are found immediately below the data table.

One of the Company's most significant borrowing relationships continued to be the \$45.5 million credit facility with Bank of America. That credit facility was originally composed of a \$30.5 million senior debt facility including \$500,000 in term debt, as well as \$45.0 million of subordinated debt. The subordinated debt and the term debt portion of the senior debt facility mature on March 31, 2018. The interest rate on the senior debt facility resets quarterly and is based on, at the Company's option, either the lender's prime rate or three-month LIBOR plus 90 basis points. The interest rate on the Subordinated Debt resets quarterly, and is equal to three-month LIBOR plus 150 basis points. The Company had no principal outstanding balance on the senior line of credit when it matured, but did have \$500,000 in principal outstanding in term debt and \$45.0 million in principal outstanding in Subordinated Debt at the end of both December 31, 2012, and June 30, 2013. The term debt is secured by all of the outstanding capital stock of the Bank. The Company has made all required interest payments on the outstanding principal amounts on a timely basis. Pursuant to the Written Agreement with the FRB, the Company must receive the FRB's approval prior to making any interest payments on the subordinated debt.

The credit facility agreement contains usual and customary provisions regarding acceleration of the senior debt upon the occurrence of an event of default by the Company under the senior debt agreement. The senior debt agreement also contains certain customary representations and warranties and financial and negative covenants. At June 30, 2013, the Company was out of compliance with one of the financial covenants contained within the credit agreement. Previously, the Company had been out of compliance with two of the financial covenants. The agreement provides that upon an event of default as the result of the Company's failure to comply with a financial covenant, relating to the senior debt, the lender may (i) terminate all commitments to extend further credit, (ii) increase the interest rate on the revolving line of the term debt by 200 basis points, (iii) declare the senior debt immediately due and payable and (iv) exercise all of its rights and remedies at law, in equity and/or pursuant to any or all collateral documents, including foreclosing on the collateral. The total outstanding principal amount of the senior debt is the \$500,000 in term debt. Because the subordinated debt is treated as Tier 2 capital for regulatory capital purposes, the senior debt agreement does not provide the lender with any rights of acceleration or other remedies with regard to the subordinated debt upon an event of default caused by the Company's failure to comply with a financial covenant.

The Company increased its securities sold under repurchase agreements \$12.6 million, or 70.7%, from December 31, 2012. The Company's other short-term borrowings decreased \$100.0 million, from December 31, 2012, as an FHLBC advance matured and was not replaced at June 30, 2013.

Capital

As of June 30, 2013, total stockholders' equity was \$71.1 million, which was a decrease of \$1.5 million, or 2.0%, from \$72.6 million as of December 31, 2012. This decrease was primarily attributable to the increase in the accumulated other comprehensive loss, specifically unrealized loss on securities available for sale in the second quarter of 2013. Unrealized loss on securities available for sale was \$1.3 million and \$10.5 million at December 31, 2012, and June 30, 2013, respectively. Management believes the Company is very well positioned for an increase in rates and is very comfortable with the Company's interest rate risk position. Management expects only minimal activity (continued work to shorten duration under compliance with Company investment policy along with avoiding long term fixed rate securities) to address the

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

increase in unrealized loss on securities available for sale. Additionally, total stockholders' equity received benefit from the Company not declaring or accruing a dividend for the second quarter of 2013 on its Series B Preferred Stock. As of June 30, 2013, the Company's regulatory ratios of total capital to risk weighted assets, Tier 1 capital to risk weighted assets and Tier 1 leverage increased to 14.70%, 7.89% and 5.46%, respectively, compared to

Table of Contents

13.62%, 6.81% and 4.85%, respectively, at December 31, 2012. The Company, on a consolidated basis, exceeded the minimum ratios to be deemed adequately capitalized under regulatory defined capital ratios at June 30, 2013. The same capital ratios at the Bank were 16.30%, 15.03% and 10.40%, respectively, at June 30, 2013, compared to 14.86%, 13.59%, and 9.67%, at December 31, 2012. The Bank's ratios exceeded the heightened capital ratios agreed to in the May 2011 Consent Order.

In July 2013, the U.S. federal banking authorities approved the implementation of the Basel III regulatory capital reforms and issued rules effecting certain changes required by the Dodd-Frank Act (the Basel III Rules). The Basel III Rules are applicable to all U.S. banks that are subject to minimum capital requirements as well as to bank and savings and loan holding companies with consolidated assets of less than \$500 million. The Basel III Rules not only increase selected minimum regulatory capital ratios, but also introduce a new Common Equity Tier 1 capital ratio and the concept of a capital conservation buffer. The Basel III rules also revise the criteria that certain instruments must meet to qualify as Tier 1 or Tier 2 capital. A number of instruments that now qualify as Tier 1 capital will not qualify under the Basel III rules. The Basel III Rules also permit smaller banking organizations to retain, through a one-time election, the existing treatment of accumulated other comprehensive income, which currently does not affect regulatory capital. The Basel III Rules have maintained the general structure of the current prompt corrective action framework while incorporating the increased requirements. The Basel III Rules also revise prompt corrective action guidelines to add the Common Equity Tier 1 capital ratio. Generally, the new Basel III Rules become effective on January 1, 2015. Management is reviewing the new rules to assess their impact on the Company.

In July 2011, the Company also entered into the Written Agreement with the FRB designed to maintain the financial soundness of the Company. Key provisions of the Written Agreement include restrictions on the Company's payment of dividends on its capital stock, restrictions on the Company taking dividends or other payments from the Bank that reduce the Bank's capital, restrictions on subordinated debenture and trust preferred security distributions, restrictions on incurring additional debt or repurchasing stock, capital planning provisions, requirements to submit cash flow projections to the FRB, requirements to comply with certain notice provisions pertaining to changes in directors or senior management, requirements to comply with regulatory restrictions on indemnification and severance payments, and requirements to submit certain reports to the FRB. The Written Agreement also calls for the Company to serve as a source of strength for the Bank, including ensuring that the Bank complies with the Consent Order.

As previously announced in the third quarter of 2010, the Company elected to defer regularly scheduled interest payments on \$58.4 million of junior subordinated debentures related to the trust preferred securities issued by its two statutory trust subsidiaries, Old Second Capital Trust I and Old Second Capital Trust II. Because of the deferral on the subordinated debentures, the trusts will defer regularly scheduled dividends on their trust preferred securities. The total accumulated interest on the trust preferred securities including compounded interest from July 1, 2010 on the deferred payments totaled \$14.3 million at June 30, 2013.

During the fourth quarter of 2012, the Treasury announced the continuation of individual auctions of the preferred stock issued through the CPP. At that time, the Company was informed that the Series B Preferred Stock would be auctioned by Treasury. All of the Series B Preferred Stock held by Treasury was sold to third parties, including certain of our directors, through the auctions that were completed in the first quarter of 2013. At December 31, 2012, Old Second Bancorp carried \$71.9 million of Series B Preferred Stock in Total Stockholders Equity, and at June 30, 2013, the Company carried \$72.4 million of Series B Preferred Stock.

As a result of the completed auctions, the Company's Board elected to stop declaring the dividend on the Series B Preferred Stock in first quarter, 2013. Previously, the Company had declared and accrued this dividend quarterly throughout the deferral period. Given the discount reflected in the results of the auction, the Board believes that the Company will likely be able to repurchase the Series B Preferred Stock in the future at a price less than the face amount of the Series B Preferred Stock plus accrued dividends. Therefore, under GAAP, the Company did not fully declare or accrue the dividend on the Series B Preferred Stock in

Table of Contents

the first quarter and did not declare or accrue for it in the second quarter. The Company will continue to evaluate whether declaring dividends on the Series B Preferred Stock is appropriate in future periods. Pursuant to the terms of the Series B Preferred Stock, the dividends paid on the Series B Preferred Stock will increase from 5% to 9% in 2014.

In addition to the above regulatory ratios, the Company's non-GAAP tangible common equity to tangible assets decreased to (0.18)% at June 30, 2013, largely attributable to the increase in the accumulated other comprehensive loss. Specifically unrealized loss on securities available for sale rose sharply in the second quarter of 2013. The Tier 1 common equity to risk weighted assets increased to 0.49% at June 30, 2013. These 2013 results compare to tangible common equity to tangible assets (0.13)% and tier 1 common equity to risk weighted assets of (0.12)%, respectively, at December 31, 2012.

Management is working diligently to position the Company so that it can become current on deferred amounts related to the trust preferred securities and possibly repurchase Series B Stock formerly held by Treasury. Management believes that continuing to improve the Bank's asset quality, showing improving earnings and securing removal of the Consent Order are primary steps necessary for the Company to solve some of its capital issues.

Item 3. Quantitative and Qualitative Disclosures about Market Risk

Liquidity and Market Risk

Liquidity is the Company's ability to fund operations, to meet depositor withdrawals, to provide for customer's credit needs, and to meet maturing obligations and existing commitments. The liquidity of the Company principally depends on cash flows from net operating activities, including pledging requirements, investment in and maturity of assets, changes in balances of deposits and borrowings, and its ability to borrow funds. The Company monitors borrowing capacity at correspondent banks as well as the FHLBC and FRB as part of its liquidity management process.

Net cash inflows from operating activities were \$15.5 million during the first half of 2013, compared with net cash inflows of \$17.9 million in the same period in 2012. Proceeds from sales of loans held-for-sale, net of funds used to originate loans held-for-sale, continued to be a source of inflow for both of the first halves of 2013 and 2012. Interest received, net of interest paid, combined with changes in other assets and liabilities were a source of inflow for the first half of 2013 and outflow for the first half of 2012. The Company's management of investing and financing activities, as well as market conditions, determines the level and the stability of net interest cash flows. Management's policy is to mitigate the impact of changes in market interest rates to the extent possible, as part of the balance sheet management process.

Net cash inflows from investing activities were \$38.0 million in the first half of 2013, compared to \$19.1 million in the same period in 2012. In 2013, securities transactions accounted for a net outflow of \$13.3 million, and net principal received on loans accounted for net inflows of \$31.6 million. Proceeds from sales of OREO accounted for \$20.0 million and \$16.1 million in investing cash inflows for the first half of 2013 and 2012, respectively. Investing cash outflows for investment in OREO were \$50,000 in the first half of 2013 as compared to \$515,000 in the same period in 2012.

Net cash outflows from financing activities in the first half of 2013 were \$114.1 million compared with net cash inflow of \$42.1 million in the first half of 2012. Net deposit outflows in the first half of 2013 were \$26.6 million compared to net deposit inflows of \$29.2 million in the first half of 2012. Changes in securities sold under repurchase agreements accounted for \$12.6 million and \$12.9 million in net inflows, respectively, in the first half of 2013 and 2012.

Under the terms of the Consent Order (discussed in Note 11 of the Notes to Consolidated Financial Statements), the Bank has agreed to reaffirm its liquidity risk management program. Management has a well-defined liquidity management program reflecting sound liquidity risk supervision through the Asset and Liability Committee process and Board review. Important elements of the program cover base operating liquidity, a liquid asset cushion, contingency funding strategies to address liquidity shortfalls in emergency situations and periodic stress testing. This program also covers liquidity management for the Company.

Interest Rate Risk

As part of its normal operations, the Company is subject to interest-rate risk on the assets it invests in (primarily loans and securities) and the liabilities it funds with (primarily customer deposits and borrowed funds), as well as its ability to manage such risk. Fluctuations in interest rates

Edgar Filing: OLD SECOND BANCORP INC - Form 10-Q

may result in changes in the fair market values of the Company's financial instruments, cash flows, and net interest income. Like most financial institutions, the Company has an exposure to changes in both short-term and long-term interest rates.

The Company manages various market risks in its normal course of operations, including credit, liquidity, and interest-rate risk. Other types of market risk, such as foreign currency exchange risk and commodity price risk, do not arise in the normal course of the Company's business activities and operations. In addition, since the Company does not hold a trading portfolio, it is not exposed to significant market risk from trading activities. The Company's interest rate risk exposures from June 30, 2013, and December 31,

Table of Contents

2012, are outlined in the table below.

Like most financial institutions, the Company's net income can be significantly influenced by a variety of external factors, including: overall economic conditions, policies and actions of regulatory authorities, the amounts of and rates at which assets and liabilities reprice, variances in prepayment of loans and securities other than those that are assumed, early withdrawal of deposits, exercise of call options on borrowings or securities, competition, a general rise or decline in interest rates, changes in the slope of the yield-curve, changes in historical relationships between indices (such as LIBOR and prime), and balance sheet growth or contraction. The Company's Asset and Liability Committee seeks to manage interest rate risk under a variety of rate environments by structuring the Company's balance sheet and off-balance sheet positions, which includes interest rate swap derivatives as discussed in Note 13 of the financial statements included in this quarterly report. The risk is monitored and managed within approved policy limits.

The Company utilizes simulation analysis to quantify the impact of various rate scenarios on net interest income. Specific cash flows, repricing characteristics, and embedded options of the assets and liabilities held by the Company are incorporated into the simulation model. Earnings at risk is calculated by comparing the net interest income of a stable interest rate environment to the net interest income of a different interest rate environment in order to determine the percentage change. Due to the significant declines in interest rates that occurred during the first half of 2012, Management found it impossible to calculate valid interest rate scenarios that represent declines of 0.5% or more. However, recent increases in long-term rates have again made it possible to employ the -0.5% scenario. Compared to December 31, 2012, the Company expects to have greater earnings gains (in dollars) if interest rates should rise. This increase in rising-rate benefit reflects the Company's ability to obtain certain variable rate securities that both contributed to this rising-rate benefit and maintained the investment portfolio yield to support the margin. The Company also sold some securities that had longer maturities further contributing to the increase in rising-rate benefit. Federal Funds rates and the Bank's prime rate were stable throughout the first half of 2013 at 0.25% and 3.25%, respectively.

The following table summarizes the effect on annual income before income taxes based upon an immediate increase or decrease in interest rates of 0.5%, 1%, and 2% assuming no change in the slope of the yield curve. The -2% and -1% sections of the table do not show model changes for those magnitudes of decrease due to the low interest rate environment over the relevant time periods. While it was not possible to calculate valid results for -0.05% for December 31, 2012, it was possible to do so for June 30, 2013, and that the information is reflected in the table:

Analysis of Net Interest Income Sensitivity

| | Immediate Changes in Rates | | | | | |
|--------------------------|----------------------------|-------|------------|--------|----------|----------|
| | -2.0% | -1.0% | -0.5% | 0.5% | 1.0% | 2.0% |
| June 30, 2013 | | | | | | |
| Dollar change | N/A | N/A | \$ (1,190) | \$ 967 | \$ 2,033 | \$ 4,486 |
| Percent change | N/A | N/A | -2.2% | +1.8% | +3.8% | +8.4% |
| December 31, 2012 | | | | | | |
| Dollar change | N/A | N/A | N/A | \$ 538 | \$ 1,164 | \$ 2,511 |
| Percent change | N/A | N/A | N/A | +1.1% | +2.3% | +4.9% |

The amounts and assumptions used in the simulation model should not be viewed as indicative of expected actual results. Actual results will differ from simulated results due to timing, magnitude and frequency of interest rate changes as well as changes in market conditions and management strategies. The above results do not take into account any management action to mitigate potential risk.

Item 4. Controls and Procedures

Evaluation of Disclosure Controls and Procedures

The Chief Executive Officer and Chief Financial Officer have evaluated the effectiveness of the

Table of Contents

design and operation of the Company's disclosure controls and procedures, as defined in Rule 13a-15(e) promulgated under the Securities and Exchange Act of 1934, as amended, as of June 30, 2013. Based on that evaluation, the Chief Executive Officer and Chief Financial Officer concluded that as of June 30, 2013, the Company's internal controls were effective to ensure that information required to be disclosed by the Company in reports that it files or submits under the Securities and Exchange Act of 1934 is recorded, processed, summarized, and reported within the time periods specified.

There were no changes in the Company's internal control over financial reporting during the quarter ended June 30, 2013, that have materially affected, or are reasonably likely to affect, the Company's internal control over financial reporting.

Forward-looking Statements

This document (including information incorporated by reference) contains, and future oral and written statements of the Company and its management may contain, forward-looking statements, within the meaning of such term in the Private Securities Litigation Reform Act of 1995, with respect to the financial condition, results of operations, plans, objectives, future performance and business of the Company.

Forward-looking statements, which may be based upon beliefs, expectations and assumptions of the Company's management and on information currently available to management, are generally identifiable by the use of words such as believe, expect, anticipate, plan, intend, estimate, will, would, could, should or other similar expressions. Additionally, all statements in this document, including forward-looking statements, speak only as of the date they are made, and the Company undertakes no obligation to update any statement in light of new information or future events.

The Company's ability to predict results or the actual effect of future plans or strategies is inherently uncertain. The factors, which could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries, are detailed in the Risk Factors section included under Item 1A. of Part I of the Company's Form 10-K. In addition to the risk factors described in that section, there are other factors that may impact any public company, including ours, which could have a material adverse effect on the operations and future prospects of the Company and its subsidiaries. These risks and uncertainties should be considered in evaluating forward-looking statements and undue reliance should not be placed on such statements.

PART II - OTHER INFORMATION

Item 1. Legal Proceedings

On February 17, 2011, a former employee filed a class action complaint in the U.S. District Court for the Northern District of Illinois on behalf of participants and beneficiaries of the Old Second Bancorp, Inc. Employees' 401(k) Savings Plan and Trust alleging that the Company, the Bank, the Employee Benefits Committee of Old Second Bancorp, Inc. and certain Company officers and employees violated certain disclosure requirements and fiduciary duties established under the Employee Retirement Income Security Act of 1974, as amended (ERISA). The complaint sought equitable and monetary relief. Though the Company believes that it, its affiliates, and its officers and employees have acted, and continue to act, in compliance with ERISA with respect to these matters, without conceding liability, the named defendants negotiated a settlement with the plaintiffs. On June 14, 2013, the Court entered a final order approving the parties' settlement agreement, and the plaintiffs therefore dismissed the litigation with a release of all claims. The settlement agreement, which became effective July 15, 2013, did not have a material adverse effect on the financial statements of the Bank or on the consolidated financial position of the Company because the entire settlement amount was paid by the Company's insurers.

In addition to the matter described above, the Company and its subsidiaries, from time to time, are involved in collection suits in the ordinary course of business against its debtors and are defendants in legal actions arising from normal business activities. Management, after consultation with legal counsel, believes that the ultimate liabilities, if any, resulting from these actions will not have a material adverse effect on the financial position of the Bank or on the consolidated financial position of the Company.

Item 1.A. Risk Factors

There have been no material changes from the risk factors set forth in Part I, Item 1.A. Risk Factors, of the Company's Form 10-K for the year ended December 31, 2012. Please refer to that section of the Company's Form 10-K for disclosures regarding the risks and uncertainties related to the Company's business.
