INDEPENDENT ACCOUNTANTS' REVIEW REPORT

To the Chairman and Members of the Board of Directors of Compañía de Telecomunicaciones de Chile S.A.

1. We have reviewed the accompanying interim consolidated balance sheets of Compañía de Telecomunicaciones de Chile S.A. and subsidiaries as of September 30, 2003 and 2002 and the related interim consolidated statements of income and cash flows for the nine-month periods then ended. These interim consolidated financial statements (including the related notes) are the responsibility of the management of the Company. The accompanying Management's Discussion and Analysis of the Consolidated Financial Statements is not an integral part of these financial statements, and, therefore, this report does not cover this item.
2. We conducted our reviews in accordance with auditing standards generally established in Chile for a review of interim financial information. A review of interim financial information consists principally of applying analytical procedures to the financial statements and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with generally accepted auditing standards in Chile, the objective of which is the expression of an opinion regarding the consolidated financial statements taken as a whole. Accordingly, we do not express such an opinion.
3. Our report dated October 24, 2003 on the interim consolidated financial statements as of September 30, 2002, was qualified for the put and call option contract on the investment in Sonda S.A., as Compañía de Telecomunicaciones de Chile S.A. and its subsidiary were in process of evaluating whether the projected earnings of Sonda S.A. would allow the complete recovery of the goodwill which had arisen on this investment. As is discussed in Note 2 d) 7), on July 29, 2003, Inversiones Santa Isabel Limitada communicated its decision to exercise the early call option, an operation which was completed on August 26, 2003, as a result of which our present report on the accompanying 2002 interim financial statements differs from our previously issued report.
4. Based on our review of the interim consolidated financial statements at September 30, 2003 and 2002, we are not aware of any material modifications that should be made to them for them to be in conformity with accounting principles generally accepted in Chile.

The accompanying financial statements have been translated into English for the convenience of readers outside Chile.

[Back to Contents](#)**COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS
(Translation of financial statements originally issued in Spanish)****1. Composition of Consolidated Group and Registration in the Securities Registry:**

a) Compañía de Telecomunicaciones de Chile S.A. (Telefónica CTC Chile) is a public corporation registered in the Securities Registry under No. 009 and therefore is subject to oversight by the Chilean Superintendency of Securities and Insurance.

b) Subsidiaries registered in the Securities Registry:

As of September 30, 2003 the following subsidiaries of the consolidated group are registered with the Securities Registry:

SUBSIDIARIES	TAXPAYER NO.	Registration Number	Participation (direct & indirect) %	
			2002	2003
CTC Transmisiones Regionales S.A.(188 Mundo Telefónica)	96.551.670-0	456	99.16	99.16
Globus 120 S.A.	96.887.420-9	694	99.99	99.99

2. Significant Accounting Principles:**(a) Accounting period:**

The interim consolidated financial statements cover the nine-month periods ended as of September 30, 2003 and 2002.

(b) Basis of preparation:

These interim consolidated financial statements (hereafter, the interim financial statements) have been prepared in accordance with generally accepted accounting principles in Chile and standards set forth by the Chilean Superintendency of Securities and Insurance.

In the event of discrepancies between generally accepted accounting principles issued by the Chilean Accountants Association and the standards set forth by the Chilean Superintendency of Securities and Insurance, for the Company, the standards of the Superintendency shall prevail over the former.

The interim consolidated financial statements of the Company as of June 30 and December 31 of each year are prepared in order to be reviewed and audited respectively in accordance with current legal requirements. The Company has voluntarily adopted the practice of submitting the quarterly financial statements as of March and September to a review of the interim financial information in accordance with standards established for this type of review, as described in generally accepted auditing standard No. 45, Section No. 722, issued by the Chilean Accountants Association.

(c) Basis of preparation:

Certain reclassifications have been made to the 2002 financial statements for comparative purposes.

The interim 2002 consolidated financial statements and their notes have been restated off-the-books by 2.9% in order to allow comparison with the 2003 financial statements.

(d) Basis of consolidation:

Edgar Filing: TELECOMMUNICATIONS CO OF CHILE - Form 6-K

These interim consolidated financial statements include assets, liabilities, income and cash flows of the Parent Company and subsidiaries. Significant transactions involving assets, liabilities, income and cash flows between consolidated companies have been eliminated and the participation of minority interests has been reflected and is presented under Minority Interest (see Note 19).

- 1) The board of directors' meeting of CTC International S.A., held in December 2002, approved the liquidation of this company.
- 2) On May 2, 2003, Telefónica Empresas S.A. sold its holding in Tecnonáutica S.A. to Infoera S.A., which became owner of 99.99% of the shares of that company.
- 3) On May 2, 2003, Tecnonáutica S.A. sold its holding in Infochile S.A. to Portal de Pagos e Información S.A., which became owner of 99.98% of the shares of that company.
- 4) The Extraordinary Shareholders' Meeting of Telefónica Empresas CTC Chile S.A., held on January 28, 2003, approved the merger by incorporation of the subsidiary Telefónica Data Chile S.A., increasing the capital of Telefónica Empresas CTC Chile S.A. by ThCh\$ 414 equivalent to the issuance of 2,878 shares.

Edgar Filing: TELECOMMUNICATIONS CO OF CHILE - Form 6-K

- 5) The Extraordinary Shareholders Meeting of Telefónica Data Chile S.A., held in November 2002, approved the incorporation by absorption of the subsidiary Comunicaciones Empresariales S.A.
- 6) On September 1, 2003 Telefónica CTC Chile S.A., sold 100% of its participation in this subsidiary for UF 9,175, which resulted Telefónica CTC Chile to recognizing a loss on the sale of the subsidiary of ThCh 66,705.

[Back to Contents](#)**COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES**

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)****2. Significant Accounting Principles, continued:****(d) Basis of consolidation, continued**

- 7) During September 2002, Telefónica CTC Chile sold and transferred 25% ownership of Sonda S.A. to Inversiones Pacífico Limitada and Inversiones Santa Isabel Limitada, companies associated with Mr. Andrés Navarro H. Once this transaction had taken place, Telefónica CTC Chile through its subsidiary Telefónica Empresas CTC Chile S.A., continues to hold 35% ownership in that company.

Additionally on September 26, 2002, Telefónica Empresas signed an agreement with Inversiones Santa Isabel Limitada, which granted it an option to sell 35% of Sonda, which it could exercise between July 16 and 25, 2005, at the book value of the investment as of June 30, 2005, plus a premium of UF 142,021, with a minimum value of UF 2,048,885. on the other hand, in the event Telefónica Empresas does not exercise that option to sell, between July 26 and August 5, 2005 Inversiones Santa Isabel Limitada had an option to purchase the same 35% of Sonda, under the same previously described conditions. Likewise, Inversiones Santa Isabel Ltda. could exercise the option to purchase in advance between July 26 and 31, 2003 or of 2004.

On July 29, 2003, Telefónica Empresas became aware of the decision of Inversiones Santa Isabel Limitada, to exercise the option early to purchase the remaining 35 % of Sonda S.A. . This transaction involved a disbursement by the purchasing company of ThCh\$ 33,388,363 (historical) on August 26, 2003, resulting in a charge to income of ThCh\$ 6,999,276 before taxes (ThCh\$ 5,683,065 net of the tax effect).

(e) Price-level restatement:

The interim consolidated financial statements have been price-level restated using price-level restatement methodology in accordance with generally accepted accounting principles in Chile, in order to reflect the variation of the currency's purchasing power during both periods. The accumulated variation in the CPI as of September 30, 2003 and 2002, for beginning balances was 1.2% and 1.3%, respectively.

(f) Basis of conversion:

Assets and liabilities in US\$ (United States dollars), Euros, UF (Unidad de Fomento) and Pound Sterling, have been translated into Chilean pesos at the exchange rates at each period closing date:

YEAR	US\$	EURO	UF
2002	748.73	738.392	16,455.03
2003	660.97	770.811	16,946.03

The exchange differences are charged or credited to income for the period.

(g) Time deposits:

Time deposits are presented at the value of the invested capital plus readjustments, if applicable, and accrued interest as of period end.

[Back to Contents](#)

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

2. Significant Accounting Principles, continued:

(h) Marketable securities:

Fixed income securities are carried at their price-level restated purchase price plus accrued interest as of closing date of each period, based on the real interest rate determined on the purchase date or their market value, whichever is less.

Investments in mutual funds units are carried at the value of the unit at each period's closing date. Investments in shares are presented at their price-level restated cost or market value, whichever is less.

(i) Inventories:

Equipment destined for sale is carried at price-level restated purchase or development cost or market value, whichever is less.

Inventories estimated to be used during the next twelve months are classified as current assets and their cost is price-level restated. Obsolescence provision has been determined on the basis of a study of materials with slow turnover.

(j) Subsidies on sale of cellular telephones:

Represents the difference between the cost at which the cellular equipment is acquired from suppliers and their resale value to customers.

The amounts for equipment with prepayment plans are charged to income at the time they are sold. Equipment with a contract has been commercialized as being on loan (commodate), a legal figure in which the equipment is given to subscribers to use free of charge. The purchase cost of this equipment is capitalized as property, plant and equipment (subscriber equipment), and is depreciated over a 24 month period from the date of the contract.

As of June 1, 2002, a customer loyalty policy was implemented and which consists of replacing equipment related to contracts that are more than 18 months old. Based on the above, depreciation provisions have been established for probable early write-off of equipment.

(k) Allowance for doubtful accounts:

Differentiated percentages are applied when calculating the allowance for doubtful accounts, taking into account age factors and eventual collection management until 100% is reached for debts over 120 days and 180 days for large customers (corporations).

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

2. Significant Accounting Principles, continued:

(l) Property, plant and equipment:

Property, plant and equipment is presented at price-level restated purchase and/or construction cost.

Property, plant and equipment purchased until December 31, 1979 are presented at appraisal value, as stipulated in Article 140 of D.F.L. No. 4, and those acquired after that date are carried at purchase value, except for those assets that are presented at their appraisal value recorded as of June 30, 1986, in accordance with Circular No. 550 issued by the Chilean Superintendency of Securities and Insurance. All these values have been price-level restated.

Until December 31, 2002, works in progress included the real financial cost of the loans relating to their financing, originated during the construction stage and which could have been avoided had these disbursements not been made. Based on the above, financial cost has been capitalized for ThCh \$ 6,818,537 in 2002.

As described in Note 3a, starting January 1, 2003 the Company decided not to capitalize the real financial cost of loans in the cost of construction and/or acquisition of property, plant and equipment.

(m) Depreciation:

Depreciation has been calculated and recorded based on the values stated above, by applying set factors determined on the basis of the estimated useful lives of the assets. The average annual financial depreciation rate of the Company is approximately 8.24%.

(n) Leased assets:

Leased assets with a purchase option

Leased assets with a purchase option, whose contracts have the characteristics of a financial lease, are carried in a manner similar to the purchase of property, plant and equipment, recording the full obligation and interest on an accrual basis. The Company does not legally own those assets and as long as it does not exercise the purchase option, it cannot freely dispose of them.

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

2. Significant Accounting Principles, continued:

(ñ) Intangibles

i) Underwater cable rights:

Underwater cable rights are rights acquired by the Company for the use of the underwater cable's transmission capacity. These are amortized over the respective contract term, with a maximum of 25 years.

ii) Licenses (software):

Software licenses are carried at price-level restated purchase cost. Amortization is calculated using the straight-line method considering the periods in which the license will provide benefits, which does not exceed 4 years.

iii) License for the use of radioelectric space:

Corresponds to the cost incurred in obtaining licenses for the use of wireless. They are shown at price-level restated value and are amortized over the concession period (30 years from publication in the [Diario Oficial]) of the decrees covering the respective licenses.

(o) Investments in related companies:

These investments are carried under the equity method, recognizing their income on an accrual basis. Foreign investments have been valued following Technical Bulletin No. 64. Those investments are controlled in dollars, since they are in countries considered unstable under said Bulletin, and their activities are not an extension of the operations of the Parent Company.

(p) Goodwill and negative goodwill:

Goodwill and negative goodwill are differences arising upon adjustment of the investment cost, at the time of adopting the equity method or when making a new purchase. The goodwill and negative goodwill amortization period has been determined taking into consideration aspects such as the nature and characteristics of the business and the estimated period for return of the investment. Goodwill arising on foreign investments is controlled in US dollars (the same currency in which the investment is controlled), as per Technical Bulletin No. 64 of the Chilean Accountants Association (see Note 11).

(q) Transactions with resale or repurchase agreements:

Purchases of financial instruments with resale agreements are recorded as a fixed rate placement and classified in Other Current Assets.

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)

2. Significant Accounting Principles, continued:

(r) Obligations with the public:

- Obligations from bond issuance are presented in liabilities at the par value of the subscribed bonds. The difference between par value and placement value, determined on the basis of real interest originated in the transaction, is deferred and amortized during the term of the respective bond (see Note 16).
- Obligations from issuance of promissory notes: Are presented in liabilities at their placement value, plus accrued interest (see note 16a).

Direct costs related to bond placement are capitalized and amortized using the straight-line method over the term of the respective bond.

(s) Income tax and deferred income tax:

Income tax is calculated on the basis of taxable net income. Deferred taxes arising from all temporary differences, tax benefits for tax losses, and other events that create differences between the tax base of assets and liabilities and their accounting basis are recorded in accordance with Technical Bulletins Nos. 60, 68, 69 and 73 issued by the Chilean Accountants Association and in accordance with Circular 1,466 dated January 27, 2000 issued by the Superintendency of Securities and Insurance.

On September 28, 2001 Law No. 19753 was published, increasing the corporate income tax rate to 16% in 2002, 16.5% in 2003 and 17% in 2004 and thereafter. As of September 30 of each year, the accumulated balances of temporary differences reflect the increase in the income tax rate. Deferred income taxes arising due to the increase in the income tax rate are recorded in accordance with Technical Bulletin No. 71 issued by the Chilean Accountants Association. (see Note 7).

(t) Staff severance indemnities:

The Company's staff severance indemnities obligation is accrued applying the net present value method to accrued benefit using an annual discount rate of 7%, considering a future permanence until the retirement date of each employee (see Note 18).

Expenses for past services rendered by employees resulting from changes in the actuarial base, are capitalized and amortized over the average length of future permanence of the employees.

(u) Operating revenues:

The Company's revenues are recorded on the accrual basis in accordance with generally accepted accounting principles in Chile. Since invoices are issued on dates other than accounting cut-off dates, as of the date of preparation of these financial statements, services rendered and not invoiced have been accrued, and determined on the basis of the contracts and traffic at the current period's prices and conditions. Amounts for this concept are shown in Trade Accounts Receivable.

Revenues from information services are recorded under the following conditions: sale of hardware and licenses is recorded when the equipment and/or software is delivered, and in the case of revenues from projects, these are recorded according to the progress payments reports approved by the customers and which consider the degree of completion of the respective projects.

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

2. Significant Accounting Principles, continued:

(v) Foreign currency futures contracts:

The Company has entered into foreign currency futures contracts, representing a hedge against changes in the exchange rate of its obligations in foreign currency.

These instruments are valued in accordance with Technical Bulletin No. 57 issued by the Chilean Accountants Association.

The rights acquired and obligations incurred are detailed in Note 26. The balance sheet only reflects the net right or obligation as of period-end, classified according to the maturity date of each of the contracts, in Other Current Assets or Other Creditors, as applicable. The contract's implicit insurance premium is deferred and amortized using the straight-line method over the term of the contract.

(w) Interest rate coverage:

Loan interest covered by interest rate swaps is recorded recognizing the effect of the contracts on the interest rate established in the loans. Rights and obligations for this concept are shown in Other Current Assets or in Other Creditors, as applicable (see Note 26).

(x) Computer software:

Software purchase cost is deferred and amortized using the straight-line method over a four-year period.

(y) Research and development expenses:

Research and development expenses are charged to income in the period in which they are incurred. Such expenses have not been significant in recent periods.

(z) Accumulated deficit in development period of subsidiaries:

In accordance with Circular No. 981 of the Superintendency of Securities and Insurance, the Company has included all disbursements or obligations arising during the development and start up stage of its subsidiaries and which are not assignable to the cost of tangible or nominal assets. This deficit has been absorbed by net income earned by the Company during operations.

(aa) Accumulated adjustment for conversion differences:

The Company recognizes the difference between the variation in the exchange rate and the consumer price index arising on the price-level restatement of its investments abroad, controlled in US dollars, as well as adjustments for translation differences arising from subsidiaries and related companies that have been recognized for their foreign investments. The balance in this account is credited (charged) to income in the same period in which the gain or loss on the complete or partial disposal of these investments is recognized.

[Back to Contents](#)

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

2. Significant Accounting Principles, continued:

(ab) Statement of cash flows:

For the purposes of preparing the Statement of Cash Flows in accordance with Technical Bulletin No. 50 issued by the Chilean Accountants Association and with Circular No. 1,312 issued by the Chilean Superintendency of Securities and Insurance, the Company considers mutual funds, resale agreements and time deposits maturing in less than 90 days as cash and cash equivalents.

Cash flows related to the Company's line of business and those not defined as from investment or financing activities are included in "Net Cash Flows from Operating Activities".

(ac) Correspondents:

The Company has current agreements with foreign correspondents, in which the conditions that regulate international traffic are set, charged or paid according to net traffic exchanges (imbalance) and to the rates set in each agreement.

This exchange is accounted for on an accrual basis, recognizing the costs and income in the period in which they are produced, recording the net balances receivable or payable of each correspondent in "Trade Accounts Receivable" or "Accounts Payable" as applicable.

[Back to Contents](#)**COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)****3. Accounting Changes:****a) Property, plant and equipment financing cost:**

Starting January 2003, the Company changed the criteria for capitalizing the real financing costs of the loans related to financing the property, plant and equipment works in progress. This change has meant recognizing a higher charge to income for the period, of approximately ThCh\$ 2,200,000, in comparison to 2002.

b) Change in the reporting entity:

- i) Since the Company no longer owns part of Sonda S.A., the financial statements of Telefónica CTC Chile as of September 30, 2003, have only recognized their 35% equity in the net income of Sonda S.A. earned until June 30, 2003, maintaining the consolidation with that company until August 31, 2002.

For a comparative analysis of the figures, a consolidated statement of income is presented, assuming that for the eight month period ended August 31, 2002, the investment in Sonda S.A. was recorded using only the equity method.

	Jan-Sep 2003 ThCh\$	Jan-Sep 2002 ThCh\$	Variation

The conditions of the Mandate and Mercantile Current Account are short and long-term respectively. In the case of Telefónica Internacional Chile S.A. it is denominated in US dollars, accruing interest at a variable rate which adjusts to market conditions (US\$ + Market Spread).

In the case of Sales and Services Rendered, these mature in the short-term (less than a year) and the maturity conditions for each case vary based on the transaction that produces them.

Deferred tax subtotal	13,465,683	1,980,995
Total income tax expense	18,544,776	20,725,018

(1) Income tax for the 2003 period amounts to ThCh\$ 4,797,267 after applying the tax benefit for tax losses.

[Back to Contents](#)**COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)****8. Other Current Assets:**

The detail of other current assets is as follows:

	2002	2003
	ThCh\$	ThCh\$
Fixed income securities purchased with resale agreement	8,027,355	9,204,230
Collective negotiation bonus to be amortized (a)	1,003,872	1,076,681
Adjustment to market value for cellular equipment to be commercialized (c)	4,114,086	3,122,435
Exchange insurance premiums to be amortized	2,844,853	981,024
Telephone directories for connection program	8,044,328	6,002,894
Higher discount rate of bonds to be amortized (note 24)	882,450	502,461
Disbursements for placement of bonds to be amortized (note 24)	1,904,454	1,549,543
Disbursement of negotiable instruments (note 24)	□	25,782
Disbursements for foreign financing proceeds to be amortized (b)	832,449	659,270
Exchange difference insurance debtors (net of partial liquidations)	50,580,817	10,915,357
Deferred charges for modification of staff severance indemnities discount rate (net)	114,419	126,687
Others	1,189,963	1,258,081
Total	79,539,046	35,424,445

- (a) In June 2002, the Company signed a 2-year collective contract with a part of its employees (3 years for Telefónica Móvil employees) granting them, among other benefits, a special negotiation bonus. This bonus was paid between June and July of 2002 (for Telefónica Móvil employees, a second installment of ThCh\$ 440,000 (historical) will be paid in May 2004). The total benefit which amounts to Ch\$ 2,494,544 (historical), is being deferred using the straight-line method during the term of the respective collective contracts. The long-term portion is shown under "Other" long-term (see note 13).
- (b) This amount corresponds to the cost (net of amortization) of the reserve paid to the Banco Central de Chile and disbursements incurred for foreign loans obtained by the Company to finance its investment plan.
- (c) Corresponds to adjustment to market value for cellular equipment held in inventory at period-end, which is charged to results in accordance with the method of negotiation, contract or prepayment.

Property, plant and equipment temporarily out of service	7,783,831	15,504,168	13,705,305	20,665,161
Software and others	36,812,936	94,148,452	84,128,019	105,362,436
Technical revaluation-Circular 550	10,458,810	9,242,348	10,431,094	9,242,473
Total	1,934,282,559	3,908,245,206	2,180,120,508	4,045,373,663

(1) As of September 2003 this caption mainly considers: ThCh\$ 5,524,373 gross value for purchase of administrative offices with accumulated depreciation of ThCh\$ 626,135 with contract terms of 15 years from 1996, ThCh\$ 3,245,316 gross value for electronic and computer equipment with accumulated depreciation of ThCh\$ 2,980,657 with 12-year contract terms from 1994. In addition there is ThCh\$ 984,277 gross value of long distance transmission equipment with accumulated depreciation of ThCh\$ 215,311 with 18-year contract terms from 1996.

The balance of gross property, plant and equipment includes capitalized interest until December 2002, of ThCh\$ 210,521,236 and ThCh\$ 211,261,397 in 2002 and 2003, respectively. Accumulated depreciation of this interest amounts to ThCh\$ 77,678,175 and ThCh\$ 97,150,381 in 2002 and 2003, respectively.

Depreciation for the periods was charged to operating costs for ThCh\$ 199,048,570 and ThCh\$ 198,249,390, for 2002 and 2003, respectively. Property, plant and equipment temporarily out of service, made up mainly of the cable TV networks of La Serena not transferred in the sale of assets to Cordillera Comunicaciones, resulted in a depreciation charge of ThCh\$ 1,183,967 in 2002 and ThCh\$ 2,498,506 in 2003, which is classified in Other Non-operating Expenses.

The detail by caption of the technical revaluation is as follows:

Description	Property, plant and equipment 2002 ThCh\$	Net Balance ThCh\$	Accumulated Depreciation ThCh\$	Property, plant and equipment 2003 ThCh\$
Land	(476,687)	(478,317)	□	(478,317)
Construction and infrastructure works	(4,588,149)	(1,005,994)	(3,580,524)	(4,586,518)
Machinery and equipment	14,307,184	295,690	14,011,618	14,307,308
Total	9,242,348	(1,188,621)	10,431,094	9,242,473

Depreciation of the technical revaluation surplus for the period amounts to ThCh\$ (24,245) in 2002 and ThCh\$ (21,945) in 2003.

Gross property, plant and equipment includes assets that have been totally depreciated amounting to ThCh\$ 512,029,604 in 2002 and ThCh\$ 661,289,617 in 2003, which include ThCh\$ 12,113,554 and ThCh\$ 12,015,474, respectively, for technical revaluation.

(1) Recognition of income for this company is that accrued for August 2002 and 2003.

(2) □As indicated in Note 2d, as of September 2002 the Company no longer has a majority or controlling interest in Sonda S.A. It now recognizes 35% equity in the Company.□

During September 2002, Telefónica Empresas sold and transferred 25% ownership in Sonda S.A., to Inversiones Pacifico Limitada and Inversiones Santa Isabel Limitada, companies linked to Mr. Andrés Navarro. This operation meant disbursements on the part of the purchasing companies amounting to ThCh\$ 27,920,701 (historical), implying for Telefónica Empresas a net effect on income (loss), amounting to ThCh\$ 1,889,316, product of proportional extraordinary amortization of goodwill in relation to the percentage sold and to the difference between the book value of the investment and the amount received. Once this transaction was carried out, Telefónica Empresas had a 35% holding in that company.

Additionally, on September 26, Telefónica Empresas signed an agreement with Inversiones Santa Isabel Limitada, which granted it an option to sell 35% of Sonda, which it could exercise between July 16 and 25, 2005, at the book value of the investment as of June 30, 2005, plus a bonus of UF 142,021, with a minimum value of UF 2,048,885. In case Telefónica Empresas does not exercise such option to sell, between July 26 and August 5, 2005, Inversiones Santa Isabel Limitada has an option to purchase the same 35% of Sonda, under the same conditions as above.

Likewise, Inversiones Santa Isabel Limitada can exercise the option to purchase in advance between July 26 and 31, 2003, at the book value on June 30, 2003, plus a bonus of UF 96,000, with a minimum price of UF 1,983,185, or between July 26 and 31, 2004, at the book value of June 30, 2004, plus a bonus of UF 119,000 with a minimum price of UF 2,003,260.

Edgar Filing: TELECOMMUNICATIONS CO OF CHILE - Form 6-K

On July 29, 2003, Telefónica Empresas became aware of the decision of Inversiones Santa Isabel Limitada, to anticipate and exercise the purchase option for the remaining 35% of Sonda S.A. This transaction meant a disbursement on the part of the purchasing company of ThCh\$ 33,388,363 (historical), implying an effect on income, before taxes amounting to ThCh\$ 6,999,276, (ThCh\$ 5,683,065 net of tax effect).

As of the date of these financial statements there are no liabilities for hedge instruments assigned to foreign investments. The Company has the intention of reinvesting net income from foreign investments on a permanent basis, therefore there is no net income that is potentially remittable.

A	873,995,447	873,995,447	873,995,447
B	83,161,638	83,161,638	83,161,638

Paid-in capital:

Series	Subscribed Capital ThCh\$	Paid-in Capital ThCh\$
A	672,480,822	672,480,822
B	63,987,298	63,987,298

On July 11, 2003, the Extraordinary Shareholders' Meeting agreed to increase capital stock for, the capitalization of share premium of ThCh\$ 114,512,356.

(b) Shareholder distribution:

In accordance with Circular No. 792 of the Chilean Superintendency of Securities and Insurance, the distribution of shareholders based on their participation in the Company as of September 30, 2003 is as follows:

Type of shareholder	Percentage of Total holdings %	Number of shareholders
10% holding or more	61.51	2
Less than 10% holding:		
Investment equal to or exceeding UF 200	37.77	2,349
Investment under UF 200	0.72	11,784
Total	100.00	14,135
Company controller	43.64	1

(c) Dividend policy:

As established in Law No. 18,046, except otherwise agreed upon at the General Shareholders' Meeting with the unanimous vote of the outstanding shares, when there is net income, at least 30% should be distributed as dividends.

Edgar Filing: TELECOMMUNICATIONS CO OF CHILE - Form 6-K

On April 5, 2002, the General Shareholders' Meeting agreed to pay a dividend of ThCh\$1,233,497 (historical) out of retained earnings and which was paid on May 15, 2002.

On April 4, 2003, the General Shareholders' Meeting was informed of the dividend distribution policy proposed by the Board of Directors for 2003.

[Back to Contents](#)**COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES****NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)****20. Shareholders' Equity, continued:****(c) Dividend policy, continued:**

Distribute for 2003 at least 30% of net income generated in the same period □ percentage that is equal to that required by law □ by means of a final dividend in May 2004, which will be proposed at the corresponding General Shareholders' Meeting.

On July 11, 2003, the Extraordinary Shareholders' Meeting agreed to pay a dividend of ThCh\$ 16,750,249 (historical), charged to retained earnings as of December 31, 2002, which was paid on July 31, 2003.

(d) Other reserves:

In 1994 the Company set up a reserve for the purchase of Invercom S.A. and Instacom S.A., in 1998 for the purchase of Sonda S.A. and its subsidiaries and, since 2001, for the adjustment of Consorcio Telefónica de Brasil Celular Holding.

Company		Amount			Balance as of September 30, 2003 ThCh\$
		December 31, 2002 ThCh\$	Price-level restatement ThCh\$	Net Movement ThCh\$	
96.720.710-1	Invercom S.A.	41,007	492	□	41,458
84.119.600-7	Instacom S.A.	15,726	189	□	15,899
83.628.100-4	Sonda S.A.	1,401,666	15,418	(1,417,084)	□
Foreign	TBS Participacion S.A.	466,337	5,596	470,320	1,613
Total		1,924,736	21,695	1,887,404	59,027

(1) This movement corresponds to the net effect of the adjustment for conversion differences in accordance with Technical Bulletin No. 64 issued by the Chilean Accountants' Association.

(e) Subsidiary development stage deficit:

The General Ordinary Shareholders' Meeting held on April 5, 2002 approved absorption of the accumulated deficit in the development period as of December 31, 2001, for the subsidiaries Telefónica Gestión de Servicios Compartidos S.A. and Infoera S.A.

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

27. Contingencies and restrictions:

a) Lawsuits:

(i) Complaint filed by Profesionales Temporales Ltda (Protempore Ltda.):

On January 2, 1998, the Company was notified of a complaint filed by Protempore Ltda. with the 15th Civil Court of Santiago for cancellation of contract with damage indemnity amounting to ThCh\$ 7,885,711.

By sentence dated June 28, 2002, the court rejected all parts of the complaint and damage indemnity filed by Protempore and accepted the counterclaim filed by Telefónica CTC Chile, declaring cancellation of the contracts due to non-compliance by the former, sentencing them to indemnify all payments made by the Company as a consequence of their non-compliance. Protempore filed a motion to vacate and appeal against this sentence, which is underway (Case No. 4958-1997).

(ii) Complaint filed by VTR Telefónica S.A.:

On June 30, 2000 VTR Telefónica S.A. filed a complaint in plenary suit for pesos charged for access charges of Ch\$ 2,500 million, based on the differences that would originate when access charge rates were reduced due to the dictation of Tariff Decree No. 187 of Telefónica CTC. The first instance sentence accepted VTR's complaint and compensation alleged by Telefónica CTS. The Company filed a motion to vacate and appeal that is currently underway.

(iii) Labor lawsuits:

In the normal course of business of the Company there have been labor lawsuits filed against it.

To date, among others, there are certain labor lawsuits involving 27 former employees who claim wrongful dismissal. These employees did not sign releases or receive staff severance indemnities. First instance sentences have been handed down in two of these lawsuits, accepting the complaint. They have been appealed by the Company. The Company has obtained favorable sentencing in a third lawsuit, with the Supreme Court ratifying a previous verdict by the Court of Appeals of Concepción which accepted the Company's arguments.

In addition there are other lawsuits involving 116 former employees who have been paid their staff severance indemnities and have signed their releases, who in spite of having accepted voluntary retirement plans or having been terminated due to the Company's needs, intend to obtain a declaration of nullity. Of these lawsuits, two have been decided in favor of the Company, rejecting the nullity.

Certain labor union have filed complaints before the Santiago Labor Courts, requesting indemnity for various concepts.

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

27. Contingencies and restrictions, continued:

In Management's opinion and that of in house legal counsel, the risk of the Company being obliged to pay indemnities in the amounts claimed in the lawsuits mentioned previously in addition to the other civil and labor lawsuits in which the Company is the defendant, is remote. Management considers it improbable that the Company's revenues and shareholders' equity will be significantly affected by these loss contingencies. Therefore no provision has been set up in connection with the indemnities claimed.

(iv) Complaint against the Chilean Government:

Telefónica CTC Chile continued its efforts to have illegalities incurred in drafting Decree 187 which set its rates corrected. The presentation of an administrative replacement recourse is emphasized. Subsequent to the negative response from the Authority, Telefónica CTC Chile filed an indemnity complaint against the Government for illegalities incurred in the process of setting rates

The complaint was for US\$274 million, plus readjustments and interest, and covers past and future damages until May 2004, due to having to charge lower rates than those that should legally have been set.

The Third Civil Court of Santiago accepted the complaint, and notified the Government. Once the answer from the Government had been received, as well as the answer and rejoinder with which the discussion period ends, the Court of Justice dictated the writ of evidence, setting the pertinent, substantial and disputed evidence. To date the complaint is at the evidence stage, within which Telefónica CTC Chile has rendered abundant testimonial evidence.

(v) Manquehue Net:

On June 24, 2003, Telefónica CTC Chile filed a petition for forced compliance with contract with damage indemnity before the mixed arbitration court of Mr. Víctor Vial del Río against Manquehue Net, in the amount of Ch\$ 3,647,689,175 in addition to those accrued during the substantiation process. Likewise and on the same date, Manquehue Net filed a petition for discount compliance (in the amount of UF 107,000), in addition to a petition of obligation to perform (signing of 700 service contracts). Regarding both petitions, the Arbitrator conceded transfer on June 25, 2003. The parties were subsequently notified.

b) Financial covenants:

In order to develop its investment plans, the Company has obtained financing both from the local market and the foreign market (Notes 14, 15 and 16), that establish among others: maximum debt clauses for the Company, interest cover and cash flow.

The maximum debt ratio for these contracts is 1.60, while the interest coverage ratio cannot be less than 3.00 and, lastly, the cash flows ratio must be equal to or exceed 0.166.

Non compliance with these clauses implies that all obligations assumed in those financing contracts will become due.

As of September 30 2003, the Company meets all financial covenants.

28. Third party guarantees:

The Company has not received guarantees from third parties

COMPAÑÍA DE TELECOMUNICACIONES DE CHILE S.A. AND SUBSIDIARIES

**NOTES TO THE CONSOLIDATED FINANCIAL STATEMENTS, continued
(Translation of financial statements originally issued in Spanish)**

30. Sanctions:

Neither the Company, nor its Directors and Managers have been sanctioned by the Superintendency of Securities and Insurance or any other administrative authority during the 2003 period.

31. Subsequent Events:

a) Rate Flexibility

By means of Resolution No. 709 date October 13, 2003, the Resolutive Commission decided to:
□ Accept the request made by Compañía de Telecomunicaciones de Chile S.A. in fs. 476, only inasmuch as it is necessary to clarify Resolution No. 686, of May 20, 2003, written in fs. 440, in the sense that what is resolved implies that the market conditions are not in place to authorize freedom of rates, therefore a rate, which must be understood as a maximum, must be set. Lower rates and various plans can be offered, but the conditions of these that duly protect and provide guarantees to users by those in a dominant market position must be issues to be regulated by the respective authority□.

The rate flexibility allows Telefónica CTC Chile to offer its customers various commercial plans, different from the plan regulated by the authority according to the conditions defined for these purposes by the respective authority.

Regarding these conditions, Telefónica CTC Chile has requested from the authority that they be dictated as soon as possible, under the understanding that the same conditions of a general character reported previously by the ministries to the Honorable Resolutive Commission would be reiterated.

- b) In the period from October 1 to 22, 2003, there have been no other significant subsequent events that affect these consolidated financial statements.

32. Environment:

In management□s opinion and in the opinion of in-house legal counsel, the nature of the Company□s operations do not directly or indirectly affect the environment; therefore, as of the closing date of these consolidated financial statements, no resources have been committed or payments made for non-compliance of municipal ordinances or of those of other supervisory bodies.

Management's Discussion and Analysis of the Consolidated Financial Statements

3

1. HIGHLIGHTS**Results for the Period and Business Statistics for the Company**

As of September 30, 2003, Telefónica CTC Chile's consolidated net income was Ch\$ 9,509 million, a figure which compares positively with net loss of Ch\$ 15,942 million incurred as of September 30 of the prior year.

The operating income of Telefónica CTC Chile was Ch\$ 88,161 million. For comparison purposes, it should be noted that as of September of 2002, the Corporation's consolidated income includes the contribution from the subsidiary Sonda for the January to August period.

Certain financial statement information presented as described and quantified in Note 3 (*)

	For the nine month period ended September 30,		VARIATION %
	2002 (*)	2003	
Revenues	594,686	605,313	1.8
Costs	(301,928)	(318,903)	5.6
EBITDA	292,758	286,410	-2.2
Depreciation	(192,870)	(198,249)	2.8
Operating Income	99,888	88,161	-11.7

(*) For comparison purposes, 2002 excludes consolidated results of SONDA S.A..

Including the effects of Sonda, consolidated operating income decreased by 13.7% as compared to the first nine months of 2002.

The non-operating result as of September 30, 2003, is a loss of Ch \$ 57,823 million, a 41.4% decrease over the same period in 2002, coming mainly from the decrease in financial expenses on a lower debt burden and better financing conditions, a decrease in other non-operating expenses, together with a gain from price-level restatement which compares positively with the 2002 loss.

On business operating statistics, as of September 30, 2003, fixed telephone lines in service of Telefónica CTC Chile were 2,486,855, a decrease of 8.6% as compared to September 30, 2002. ADSL customers in service increased to 107,580 a growth of 160.7 % over the previous year. Mobile service customers reached 2,030,761, a growth of 15.3% over 2002. The long distance business experienced a drop in traffic of 11.4% in domestic long distance (DLD) and a growth of 1.4% in outgoing international long distance (ILD), of 482 million minutes and 48 million of minutes, respectively, as of September 30, 2003. ATM links for corporate customers decreased by 1.8% whereas IP links grew by 123.4%.

As of September 30, 2003, the corporation's payroll was 4,796 persons, a decrease of 14.7% as compared to September 2002.

Management's Discussion and Analysis of the Consolidated Financial Statements

4

Tariff Setting Process for Telefónica CTC (Local Telephone Service)

As a step prior to the rate setting process for the services provided by Telefónica CTC, on January 13 of this year, Telefónica CTC Chile S.A. sought the pronouncement of the Antitrust Commission with respect to decreeing freedom of rates in specific geographical areas, to define the telephone services which will be subject to rate regulation in areas where the market conditions are not sufficient to guarantee a freedom of rates regime and to determine that Telefónica CTC Chile S.A. has the right to offer alternative rate plans without prior authorization.

On April 30, 2003, Telefónica CTC submitted to the Undersecretary of Telecommunications (Subtel) its proposal for the Technical Economic Basis for the Tariff Setting Study for services rendered to the general republic by Telefónica CTC Chile, the Tariff Setting Study for services rendered by Telefónica CTC Chile to other concessionaires of public telephony, to concessionaires of intermediate services, which provide long distance telephone services and to suppliers of complementary services.

On May 20, 2003, the Antitrust Commission issued Resolution No. 686 which defines the services subject to tariff setting by the Ministries of Economy and of Transportation and Telecommunications, which are similar to those established for the 1999 - 2004 period. This Resolution No. 686 rejects the petition for tariff freedom for specific primary zones requested by Telefónica CTC Chile, and in relation to the request for rate flexibility, reported on favorably by the Regulator, the Antitrust Commission did not issue a specific pronouncement in spite of the fact that most of its members were for making a pronouncement on the same, whereas the rest of the members considered that such matter did not correspond to that Commission.

On May 30, 2003, Subtel sent Telefónica CTC Chile the Preliminary Technical Economic Bases. In this respect, Telefónica CTC Chile submitted 84 objections to the Preliminary Technical Economic Basis of Subtel and requested that an Expert Commission be set up in conformity with that established in the law and Regulation that Regulates the Procedure, Advertising and Participation of the Tariff Setting Process.

The Expert Commission was officially formed on June 17, 2003, made up of the experts named by Telefónica CTC Chile and Subtel. and issued their report on July 17, 2003, with a unanimous pronouncement regarding all the objections, except for one of these, which was carried by a majority.

On July 25, 2003, Subtel issued Exempt Resolution No. 827 of 2003 which sets the final Technical - Economic Basis that will govern the Tariff Setting Study to set the levels, structure and indexation mechanisms of the services subject to rate setting provided by Telefónica CTC Chile.

Rate flexibility

By means of Resolution No. 709 of October 13, 2003, the Resolutive Commission decided to: -Accept the request made on folio 476 by Compañía de Telecomunicaciones de Chile S.A., only inasmuch as it is necessary to clarify Resolution No. 686, of May 20, 2003, folio. 440, in the sense that that which was resolved implies that the market conditions are not present for authorizing rate freedom, therefore a rate, which must be understood to be a maximum, must be set. Lower rates for different plans can be offered, but the conditions of these that duly protect and provide guarantees to users in respect to those in a dominant market position, must be matters to be regulated by the respective authority.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

5

The rate flexibility allows Telefónica CTC Chile to offer its customers diverse commercial plans, other than the plan regulated by the authority, based on the conditions defined for these purposes by the respective authority.

Regarding these conditions, Telefónica CTC Chile has requested the authority to issue these as soon as possible, with the understanding that the same that in a general nature were issued earlier by the ministries to the Honorable Resolutive Commission should be reiterated.

Process for Setting Interconnection Rates for Telefónica Móvil

On January 10, 2003, Telefónica Móvil submitted its proposal for Technical Economic Basis to the Undersecretary of Telecommunications, for governing the process for setting interconnection rates.

By means of Resolution dated February 22, 2003, Subtel approved the Final Technical Economic Bases that will govern the interconnection rate setting process for the concessionaires of public mobile telephone service for the 2004 - 2009 period.

Last July 25th, Telefónica Móvil submitted to Subtel the Special Study for access charges rate setting for the 2004 - 2009 period. The Ministries of Transport and Telecommunications and of Economy, Development and Reconstruction have established a deadline of November 22, 2003 for making a pronouncement on the rate proposal.

Decrease in Financial Debt and Distribution of Dividends

Telefónica CTC Chile continues to improve its debt level through amortization of loans, renegotiation of rates and terms of current loans and also through the global decrease in market rates. As of September 30, 2003, the debt equity ratio, measured as the relation between total debt and equity, reached 0.95, a figure which continually moves downward, comparing favorably with the 1.19 of the same period in the prior year. The financial debt was US\$1,389 million, reflecting a 16.8% decrease over the nominal financial debt as of US\$ 1,670 million of September 30, 2002. The decrease in debt levels together with improved financing conditions, had the effect of lowering financial expenses for 2003.

On July 11, 2003, the Extraordinary Shareholders' Meeting agreed to pay a dividend of Ch\$ 16,750.2 million (historical), charged to retained earnings as of December 31, 2002 and, which was paid on July 31, 2003.

Telefónica S.A.'s Offer to Purchase Shares of Terra Networks

On May 28, 2003, Telefónica S.A. announced an offer to purchase 100 % of the shares of Terra Lycos. On July 10, 2003, the Board of Directors of CTC Transmisiones Regionales S.A. agreed to participate in the offer (Public Offer for Shares (OPA)) and sell the 2,984,986 shares of Terra Networks S.A. it owned at a share price of 5.25 Euros. This transaction was completed on July 27, 2003 with the purchase by Telefónica S.A., of all the shares available for sale, which meant recognizing net non-operating income of Ch\$3,401 million during the period from January to September 2003, a figure which compares to the loss of Ch\$ 7,463 million as of September 30, 2002.

Management's Discussion and Analysis of the Consolidated Financial Statements

6

Placement of Negotiable Instruments

On January 27, 2003, Telefónica CTC Chile S.A. registered a line of bills of exchange in the Securities Registry for a maximum amount of Ch\$ 35,000 million, for a 10-year term. On June 26, Telefónica CTC Chile, placed Ch\$ 20,000 million, through a placement agent, in two series of equal nominal value, with final maturity in September and November 2003.

On September 24, 2003, series A of the placed bills of exchange was redeemed, by paying Ch\$10,000 million.

Sale of Istel

On July 23, 2003, Telefónica CTC Chile S.A. signed a sales contract with Isapre Consalud S.A. in virtue of which it committed to selling the shares of Compañía de Telecomunicaciones de Chile Isapre S.A. (Istel).

On September 1, 2003 the sale was completed with the signing of the respective contract. This transaction has a negative impact on non-operating results of approximately Ch\$ 67 million.

Sale of Sonda S.A.

On September 26, 2002, Telefónica Empresas CTC Chile S.A. signed an agreement by virtue of which it sold and transferred 25% ownership of Sonda S.A. to Inversiones Pacífico Limitada and Inversiones Santa Isabel Limitada, companies related to Mr. Andrés Navarro H. This agreement also stipulated a call option for these investment companies for the remaining 35%, with July 31, 2004 as the ultimate deadline.

On July 29, 2003, Telefónica Empresas CTC Chile S.A. was informed of the decision of Inversiones Santa Isabel Limitada to exercise the call option mentioned above in advance. The sale of these shares had a negative effect on the consolidated results of Telefónica CTC Chile S.A. of Ch \$5,683 million in 2003.

(1) Due to accounting consolidation does not include access charges of 188 Mundo Telefónica and Globus.

(2) Corresponds to income recorded in Telefónica Móvil.

(3) Revenues from Sonda S.A. are included only in 2002 due to deconsolidation as of September of that year.

(4) Includes revenues from Istel, Teleemergencia and Tgestiona.

(5) For the purposes of a comparative analysis, participation in income from investments in related companies is shown net (net income/losses).

(6) For comparative purposes certain reclassifications have been made for 2002 statements of income.

Management's Discussion and Analysis of the Consolidated Financial Statements

9

3. ANALYSIS OF RESULTS FOR THE PERIOD

3.1 Operating Income

As of September 30, 2003, operating income was Ch\$ 88,161 million, which represents a decrease of 13.7% as compared to the first nine months of 2002.

Operating Revenues

Operating revenues for the period were Ch\$605,313 million, a decrease of 7.6% in relation to 2002. This decrease includes the effects of the deconsolidation of Sonda as of September 2002. Isolating this effect, operating revenues increased by 1.8% over the previous year.

This variation was a result of a 13.4% increase in mobile services, together with a 1.8% increase in revenues from corporate communications. The above was partly offset by a 13.1% decrease in long-distance revenues and a drop of 1.4% in local telephone revenues. The latter is mainly due to increased revenues for 42.5% for value added services and other services such as ADSL, partly compensating the decreased revenues from the drop in the Corporation's lines in service.

Revenues from Local Telephone Service: Revenues from **Basic Telephone Service** decreased by 5.5% as compared to the previous year. The variation experienced in this revenue is mainly a result of: (i) the 3.2% decrease in the level of **fixed charge**, corresponding to the fixed monthly charge for network connections, mainly due to the decrease in the number of lines in service and compensated in part by the indexation of rates applicable to these services, the 1% reduction in the rates for this service established in the Rate Decree, applied in May of each year, partly offset by the indexation of rates applicable to these services; (ii) the 7.3% drop in revenues from variable charge, mainly due to the decrease in lines in service, to the downward trend in the behavior of traffic per line and the 1% reduction in the rates for this service established in the Rate Decree, compensated in part by the indexation applicable to these services.

Consolidated revenues from **access charges and interconnections** decreased by 1.3%, mainly due to the 5.8% decrease in revenues from domestic long distance access charges and a 22.2% decrease in revenues from international long distance access charges, due to the 25.1% drop in international interconnection traffic, a situation that was partly offset by 9.6% increase in revenues from other charges and interconnection services.

Other Local Telephone Services increased by 45.2% due to a 10.9% increase in value added services, increased revenues (82.4%) from the sale of equipment especially the sale of public telephony equipment and the sale of equipment to PYMES (small and medium sized companies), sold by the business communications area, as a result of the Corporation's business restructuring at the end of 2002. Other services increased by 86.9% mainly due to the contribution from broadband ADSL services, which show sustained growth during recent periods.

Long Distance: Revenues from these services decreased by 13.1% in comparison to 2002, due to a decrease of 16.9% and 9.1% in revenues from DLD and ILD, respectively, the latter influenced by an average decrease of 12.8% in the price of these services, together with a 1.4% decrease in ILD outgoing traffic. Media and circuit rentals show decreased revenues of 12.0% as compared to the third quarter of 2002.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

10

Mobile Communications: Total revenues from this business increased by 13.4% in relation to 2002, mainly due to the 15.3% growth experienced in the average mobile customer base, partially offset by the drop in average revenue per subscriber, derived mainly from the higher level of prepaid customers as compared to contract customers. It should be noted that these revenues include regulated calling party pays revenues for incoming traffic to mobile telephones.

Corporate Communications: Business revenues shows an increase of 1.8% over the previous year, corresponding to a 6.1% increase in the sale and rental of equipment and networks, notwithstanding that the sale of equipment to the PYMES segment, as per the Corporation's business restructuring during the end of 2002, is now carried out by the local telephony business. In addition, private services show a 0.2% increase due to the increase in corporate services, a 123.4% increase in dedicated IP links and the growth in Broad Band and ISP services, all offset in part by the 1.8% decrease in the number of ATM services.

Other Operating Revenues: This income, excluding the effect of Sonda in 2002, shows a 8.6% increase mainly due to higher revenues of Telemergencia, from alarm monitoring services and increased revenues from maintenance of interior telephone lines and sales of telephony equipment.

Operating Costs

Operating costs of Ch\$517,152 million for the period decreased by 6.5% compared to 2002.

This decrease is mainly explained by a 33.4% decrease in **salaries** which translates into a 13.7% decrease excluding Sonda in 2002, reflecting the savings in the workforce reduction carried out by the Company in October 2002. **Depreciation** decreased by 0.4% (increase of 2.8% when excluding Sonda in 2002) due mainly to the Corporation's new assets becoming operational. **Other operating costs** dropped by 9.0%, (however, when excluding Sonda in 2002, they increased by 6.6%) mainly due to the increase in mobile business costs associated with the growth of its activities, the increase in allowance for doubtful accounts and other operating expenses, partly offset by a drop in media rental costs and other rentals.

Administration and selling costs show a 2.7% increase over the same nine-month period in 2002, however when Sonda is excluded in 2002 these increase by 14.1% mainly due to the increase in mobile business costs associated with the growth in its activities, outsourcing services, bank fees and other administration expenses, partly offset by payroll savings due to the Corporation's personnel reduction.

3.2 Non-Operating Result

Non-operating result in the period from January to September of 2003 shows a loss of Ch\$57,823 million, which is 41.4% less than the non-operating result for the same period in 2002. The variation in non-operating result is broken down as follows:

Interest income decreased by 44.2%, mainly due to lower domestic and international interest rates and lower surplus funds, which have been destined to lowering the Corporation's financial debt.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

11

Other non-operating income shows a 8.5% decrease, mainly explained by higher income recorded in 2002 from the sale of shares, including the sale of 25% of Sonda S.A., which was greater than the income from this item in 2003, which corresponded to the sale of the remaining 35% of Sonda S.A., the higher market value of the Terra Networks shares and final settlement of the compensatory indemnity for early termination of the contract with Publiguías S.A.

Interest expenses decreased by 22.9% in 2003, mainly due to a lower debt and better financing conditions and lower interest rates.

Other non-operating expenses decreased by 76.4%, mainly as a result of higher expenses in 2002 the effect of the lower market value of the Terra Networks shares and the administrative recognized in that year.

Price-level restatement is a net gain of Ch\$949 million which compares positively with the Ch\$7,125 million loss in the first nine months of 2002, this latter figure reflecting in part the effects of devaluation on Sonda's investments in Argentina and Brazil. It should be noted that a 100% foreign exchange hedge level has been maintained. The Company's peso-dollar hedge policy neutralized the effects of variations in foreign exchange rates in 2002 and 2003. On the other hand payment of hedged liabilities has implied conversion from dollars to unidades de fomento with a decreasing trend which has resulted in positive price-level restatement effects on income.

3.3 Net Income for the Period

Net income was Ch\$ 9,509 million compared to a Ch\$15,942 million loss in 2002. Income in the period comes from the 13.7% drop in operating net income, together with an 11.8% increase in income taxes, while the non-operating loss shows a 41.4% decrease compared to the previous year.

Management's Discussion and Analysis of the Consolidated Financial Statements

12

4. RESULTS BY BUSINESS AREA

Local Telephone Business: Showed a net loss of Ch\$16,581 million in the period, which represents a decrease of Ch\$ 22,586 million in the loss with respect to the previous year, explained mainly by a 45.5% decrease in non-operating loss.

Long Distance Business: showed a profit of Ch\$17,348 million, a 28.8% increase over the previous year. This variation is composed of a 27.5% drop in the operating income, and a non-operating gain of Ch\$2,191 million which compares positively with the loss of Ch\$9,966 million in the third quarter of 2002.

Corporate Communications Business: This business contributed income of Ch\$7,059 million, compared to income in 2002 of Ch\$13,425 million. This lower net income is due to a 47.3% decrease in operating income, affected in part by the transfer of the sale of equipment for the PYMES segment to the local telephony business. In addition, non-operating income has a loss which exceeds the 2002 loss of Ch\$132 million by Ch\$ 928 million.

Mobile Business: The Mobile Communications business contributed income of Ch\$5,862 million to the consolidated net income during the period, whereas in 2002 it had income of Ch\$2,749 million. This positive contribution is a result of higher non-operating income and lower income taxes, partly offset by a decrease in operating income as compared to the previous year.

Other Businesses: This group of businesses jointly showed a loss of Ch\$4,179 million explained by a non-operating loss of Ch\$ 12,059 million in 2003, whereas during the same period of the previous year they showed a loss of Ch\$8,518 million. In 2003, these businesses mainly include public telephony services, maintenance and installation of basic telephony equipment, Telemergencia alarm monitoring services, Isapre Istel (employee health insurance) and Telefónica Gestión de Servicios Compartidos. In 2002 they also included income from Sonda S.A.

The following table shows the contribution of each business area to the corporate results:

Management's Discussion and Analysis of the Consolidated Financial Statements

14

5. STATEMENT OF CASH FLOWS

TABLE No. 4
CONSOLIDATED CASH FLOWS
(Figures in millions of pesos as of September 30, 2003)

DESCRIPTION	JAN - SEP		VARIATION	
	2002	2003	MCh\$	%
Cash flows from operating activities	235,882	199,755	(36,127)	-15.3%
Cash flows from financing activities	(149,068)	(159,520)	(10,452)	7.0%
Cash flows from investment activities	(85,207)	(40,305)	44,902	-52.7%
Effect of inflation on cash and cash equivalents	(1,227)	(596)	631	-51.4%
Net change in cash and cash equivalents for the period	381	(666)	(1,047)	C.S.

The negative variation of Ch\$ 666 million in cash and cash equivalents for 2003 compared to the increase of Ch\$ 381 million in 2002, comes from greater amortization and prepayment destined to decrease the financial debt and lower cash flows from operating activities, a situation that was partly offset by lower cash flows destined to the Corporation's investments, during the period from January to September 2003, as compared to the same period in the previous year.

Management's Discussion and Analysis of the Consolidated Financial Statements

16

In the previous table, the following is highlighted:

The **current ratio** shows a decrease as current assets decreased by 26.1% as compared to the same period in the previous year and liabilities 49.3% greater than the 2002 figure.

The **debt/equity ratio** decreased with lower levels of financial liabilities as compared to January September 2002.

7. EXPLANATION OF THE MAIN DIFFERENCES BETWEEN MARKET OR ECONOMIC VALUE AND THE BOOK VALUE OF THE COMPANY'S ASSETS

Due to an imperfect market for the sector's assets, there is no economic or market value that can be compared to the respective accounting values. However, there are certain buildings with a book value of zero or close to zero, which have a market value and, which, compared to the book value, is not significant with regard to the Company's assets taken as a whole.

In the case of other assets, such as marketable securities (shares and promissory notes) with a referential market value, the corresponding provisions have been set up, when the market value is lower than the book value.

8. REGULATORY ISSUES

Fixed Telephony Tariff Decree

Decree No. 187 is in effect as of May 5, 1999. It establishes maximum rates for Telefónica CTC Chile for local telephone services and interconnection services for a period of five years, which expires on May 4, 2004.

The main services subject to tariff regulation are: Telephone Line Service (formerly Fixed Charge), Local Measured Service, Local Tranche, Access Charges, Communications Service from Public Telephones and Network Unbundling Services.

In connection with the procedure to be followed for setting rates for services subject to tariff regulation, on January 13 of this year, Telefónica CTC Chile S.A. sought a pronouncement from the Antitrust Commission that would freedom of rates in specific geographic areas, that they define telephone services which will be subject to rate regulation in areas where the market conditions are not sufficient to guarantee a freedom of rates regime and that they determine that Telefónica CTC Chile S.A. has the right to offer alternative rate plans without prior authorization.

Subtel, together with the process of rate setting for Telefónica CTC Chile, initiated the process of rate setting for public services provided by Entelphone in Easter Island and access charge rates provided by Entelphone, CMET, Telesat and Manquehue Net.

On April 30, 2003, Telefónica CTC submitted its proposal to Subtel for the Technical Economic Basis for the Tariff Setting Study for services provided to the public and for the Tariff Setting Study for services provided by Telefónica CTC Chile to other concessionaires of Public Telephone services, to intermediate services concessionaires that provide long distance telephone services and to suppliers of complementary services.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

17

For its part, on May 20, 2003, the Antitrust Commission issued Resolution No. 686 which defines the services subject to rate setting by the Ministries of Economy and of Transportation and Telecommunications, which are similar to those established for the 1999 - 2004 period. This resolution No. 686 rejects the petition for tariff deregulation for specific primary zones requested by Telefónica CTC Chile, and in relation to the request for rate flexibility, reported on favorably by the Regulator, the Antitrust Commission did not issue a specific pronouncement in spite of the fact that most of its members were in favor of making a pronouncement on the same, whereas the rest of the members considered that such matter did not correspond to that Commission.

On May 30, 2003, Subtel sent Telefónica CTC Chile the Preliminary Technical Economic Basis. In this respect, Telefónica CTC Chile presented 84 objections to the Preliminary Technical Economic Basis of Subtel and requested the formation off a panel of experts in conformity with what is established in the law and Regulations that regulates the Procedure, Advertising and Participation in the Rate Setting Process.

The Expert Commission was officially formed on June 17, made up of experts designated by Telefónica CTC Chile and Subtel, and issued its report on July 17, 2003, with a unanimous pronouncement on all the objections, except for one, which was passed by a majority.

On July 25, 2003, Subtel issued Exempt Resolution No. 827 of 2003 which sets the Final Technical-Economic Basis that will govern the Tariff Setting Study to set the levels, structure and indexation mechanisms of the services subject to rate setting offered by Telefónica CTC Chile.

Entelphone, CMET, Manquehue Net and Telesat did not present objections to the Preliminary Technical Economic Basis. As a result, Subtel issued the Final Technical Economic Basis for the respective companies.

Rate flexibility

By means of Resolution No. 709 of October 13, 2003, the Resolutive Commission decided to: "Accept the request of Compañía de Telecomunicaciones de Chile S.A. made on folio 476 only inasmuch as it is necessary to clarify Resolution No. 686 of May 20, 2003, contained on folio. 440, in the sense that what has been resolved implies that the market conditions are not in place to authorize rate freedom, therefore a rate, which must be understood as a maximum, must be set. Lower rates or different plans can be offered, but the conditions therein that duly protect and provide guarantees to users from those in a dominant market position, must be matters regulated by the respective authority."

Rate flexibility allows Telefónica CTC Chile to offer its customers various commercial plans, other than the plan regulated by the authority, on the basis of the conditions defined for these purposes by the respective authority.

Regarding these conditions, Telefónica CTC Chile will request that the authority issue them as soon as possible, under the understanding that the same which in a general nature were previously reported by the Ministries to the Honorable Resolutive Commission will be reiterated.

18

Mobile Telephone Tariff Decree

Decree No. 97 is in effect as of February 12, 1999. It establishes maximum rates for Telefónica Móvil for interconnection services, including Mobile Access Charge, for a period of five years, which expires on February 12, 2004.

As the expiry of the five-year period of current regulated rates is nearing, on January 10, 2003, Telefónica Móvil presented its Technical Economic Basis Proposal to the Undersecretary of Telecommunications, beginning the process of rate setting for the 2004-2009 period. In Exempt Resolution dated February 22, 2003, the Undersecretary of Telecommunications approved the Final Technical Economic Basis that will apply to the process of setting the Access Charges Rates for the mobile telephone public service for the 2004 - 2009 period.

On July 25, 2003, Telefónica Móvil presented the Tariff Study to set the rate for access charges for the 2004 - 2009 period. The Ministries of Transport and Telecommunications and Economy, Development and Reconstruction have until November 22 to make a pronouncement in respect to the proposed rate.

Lawsuit Against the State of Chile

Upon exhausting the administrative instances to correct the illegalities involved in the Tariff Setting Process, Telefónica CTC Chile S.A. filed a lawsuit for damages against the State of Chile.

The lawsuit for US\$274 million, plus readjustments and interests, covers past and future damages until May 2004, resulting from having to charge lower rates than those that should legally have been set.

The Third Civil Court of Santiago accepted the complaint, and notified the State. Once the answer from the State had been received, as well as the answer and rejoinder with which the discussion period ends, the Court dictated the writ of evidence, setting the pertinent, substantial and disputed evidence, which initiated the presentation of evidence stage, in which witnesses for the plaintiff and for the State have testified.

Upon conclusion of the testimonial and partial proof, the expert investigation stage requested by the parties begins.

Management's Discussion and Analysis of the Consolidated Financial Statements

19

9. ANALYSIS OF MARKETS, COMPETITION AND RELATIVE PARTICIPATION

Continued growth is observed in the mobile and broad band Internet market during the third quarter of 2003, in contrast with the stagnation in the fixed-network voice communication, long distance and narrow band Internet business.

In the competitive environment, there were no relevant changes in the relative participation of the operators in the various businesses, with exception of an increase in the participation of Telefónica CTC Chile in the broad band market.

Among the relevant competitive events, in mid-April 2003, the highlight is the announcement of the owner of AT&T Chile (AT&T Latin America) that it had requested protection under Chapter 11 of the Bankruptcy Law in the United States of America for reorganizing its operations. This process is currently at the auction phase, with a scheduled completion date for October 2003.

Local Telephone Service

This market contemplates providing local telephone services inside the primary areas, interconnection services with other telecommunications companies and other unregulated local services.

Incorporation into this market is regulated by concessions awarded by the Undersecretary of Telecommunications of the Ministry of Transport and Telecommunications (Subtel).

Currently eleven companies with twelve brands participate in this market, including rural operators. The penetration rate per 100 inhabitants as of Aug 2003 was in the order of 22.1 lines per 100 inhabitants (considering the population figures in the April 2002 census) Telefónica CTC Chile has approximately 75.0% of fixed telephone lines as of Aug 2003.

On August 21, 1999, Decree No. 187 was published in the Official Gazette. This decree was drafted jointly by the Ministries of Transport and Telecommunications and of Economy, Development and Reconstruction and it sets rates for the regulated services of Telefónica CTC Chile during the five-year period from 1999-2004. The Decree had to be applied retroactively as of May 4, 1999.

In Resolution No. 611, the Antitrust Commission established the possibility for Telefónica CTC Chile to offer alternative tariff plans to Decree No. 187, oriented toward volume discounts, and to request tariff deregulation in certain geographic areas. In this regard, on September 4, 2001, Telefónica CTC Chile presented a proposal for alternative tariff plans (for high traffic consumption), which was approved in October 2002.

On May 24, 2002, Telefónica CTC Chile also obtained authorization from Subtel to commercialize prepaid telephone service for low income segments, which was commercially implemented in October 2002.

Of the five companies that were awarded the bid to operate fixed wireless telephone service concessions in the 3,400 to 3,700 MHz or Wireless Local Loop (WLL), only Entel (licenses: one national and 13 regional) is currently developing its projects. Telefónica del Sur (which was awarded licenses from the VIII to X Regions) informed Subtel of the interruption of its project, due to extenuating circumstances, this being the reason that Subtel annulled the concession for local wireless public service in the VIII and IX regions.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

20

Telefónica CTC Chile does not currently hold a license to operate with WLL technology.

Long Distance

This market contemplates communications services between primary areas (DLD) and international communications (ILD), also known as intermediate services.

On March 9, 1994 Law No. 19,302 came into effect. It establishes the application of a multicarrier system for domestic and international long distance calls. This law allows local telephone operators to participate in the long distance market through an independent subsidiary subject to a series of requirements.

In this market there are currently 14 companies operating with 17 carrier codes. Traffic in the DLD and ILD market, through fixed telephone lines recorded a drop in the third quarter of 2003 with respect to the same quarter of 2002 estimated at 11% and 5% respectively. Telefónica CTC Chile, through its subsidiaries 188 Telefónica Mundo and GLOBUS 120, reached an estimated market share of 39.8% in domestic long distance and 30.3% in outgoing international long distance, in the third quarter of 2003.

Corporate Communications

This business area contemplates providing circuit and data services (Datared, E1, ATM, Frame Relay), IP network solutions, Hosting, ASP and advanced telecommunications solutions for corporate clients and Internet service providers (ISPs). Likewise, it includes the commercialization of advanced equipment (multiple lines and PABx, among others).

In October 2002, Telefónica Empresas refocused toward the company and corporate segments. In this business Telefónica CTC Chile competes with 8 companies in the private service area and with at least 10 companies in the hosting business, with an estimated market share of approximately 48% during the first semester of 2003, including sale of advanced equipment to companies.

Mobile Communications

Provides mobile communication services (cellular telephony, paging, trunking and wireless data transmission).

There are currently four mobile telephone operators and one smaller operator of mobile satellite communications.

Telefónica CTC Chile, through its subsidiary Telefónica Móvil, has approximately 29% of an estimated total of 6.9 million of customers as of September 2003.

Regarding the tender offer for PCS mobile spectrum in the 1,900 MHz band (3 bands of 10 MHz each) once the Supreme Court verdict to exclude Smartcom was handed down, the Ministry of Transport and Telecommunications called on Telefónica Móvil S.A. and Bellsouth to proceed with a bid on the three concessions on July 18, 2002.

On July 18, 2002, the three 10 MHz frequencies on the 1,900 MHz band were awarded. Telefónica Móvil Chile was awarded two frequencies (20 MHz) for a total of UF 544,521, equivalent to US\$12.8 million.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

21

On the other hand, Telefónica CTC enabled the specialized radio-communications interconnection requested by a mobile service operator, which is available as of the beginning of April 2003.

Pay TV

The pay television market is composed of two main cable TV competitors with approximately 80% of the pay TV market. (roughly 710,000 customers), two satellite TV operators and approximately 20 cable TV operators in specific areas, jointly have the remaining 20% of the market.

On July 3, 2000, a contract was signed for the sale by Telefónica CTC Chile of Metrópolis Intercom to Cordillera Comunicaciones S.A. once the transaction was authorized by the Antitrust Commission. The amount of the transaction was US\$270 million for 40% of Metrópolis Intercom, 100% of its cable television network (except the cable TV network in the IV and VIII Regions) and 100% of Compañía de Telecomunicaciones de Chile Plataforma Técnica Red Multimedia. In addition the arbitration processes of both companies ended by way of a legal settlement.

In January 2002, a merger agreement was reached between Liberty Media and United Global Com (UCG), companies that participate in the Chilean operators Metrópolis Intercom and VTR, respectively.

Internet Access

In this market there are currently approximately 35 ISP's effectively operating, in which three of them concentrate 84% of the traffic. IP traffic (switched) for the third quarter of 2003 in the network of Telefónica CTC Chile, reached approximately 1,655 million of minutes, a 2% drop as compared to the third quarter of 2002, mainly due to the migration of intensive users to broad band access.

Telefónica CTC Chile focuses on Internet access for corporate clients through its ISP TIE, segment in which it holds a market share close to 30%, and has commercial agreements with ISP Terra.

Telefónica CTC Chile continues with an intensive deployment of internet access through ADSL broad band, directly to the final customer and through a wholesale model in the ISP industry. At the end of September 2003, Telefónica CTC Chile's broadband connections in service reached 107,580, representing a growth of 161% over September 2002, thus achieving a market share of 35%.

[Back to Contents](#)

Management's Discussion and Analysis of the Consolidated Financial Statements

22

Other Businesses

These comprise the Public Telephone market, in which Telefónica CTC Chile participates through its subsidiary CTC Equipos. There are seven nationwide companies of, which CTC Equipos, as of September 2003, has approximately 23.5% market share considering its own public telephones. Additionally, Telefónica CTC Chile has another 21,551 community telephones installed.

On January 11, 1999, Telefónica CTC Chile completed the acquisition of 60% of Sonda S.A. The agreement included the commitment of Sonda S.A. to purchase 100% of the information assets of Telefónica CTC Chile, which was completed in the first quarter of 1999.

On October 12, 2001, Telefónica CTC Chile signed a new shareholders' agreement with Inversiones Pacifico II Ltda. and Inversiones Atlántico Ltda. in which it grants each of these companies a call option for its 60% stake in Sonda S.A. maturing in June 2005. Additionally, the outsourcing and rental contracts between Sonda and Telefónica CTC Chile were terminated and a contract was signed in virtue of which Telefónica CTC Chile repurchases, at book value, the assets that were sold to Sonda S.A. in January 1999.

During the third quarter of 2001 Telefónica CTC Chile and Publiguías signed a new contract, terminating early the previous contract. This new contract mainly consists of a billing and collections contract, for which Telefónica CTC Chile receives a percentage of the income produced by the sale of advertising in the Yellow Pages and in the White Pages. Additionally, Publiguías will pay a charge per customer for permanent updating of the Telefónica CTC Chile database.

On November 20, 2001 a new subsidiary was formed to commercialize and install alarm systems and video cameras for residential and corporate customers, providing monitoring and surveillance services and any other service relating to the above. As of December 2002, it is estimated that Telefónica CTC Chile has a market share of 24% of this service.

Management's Discussion and Analysis of the Consolidated Financial Statements

23

10. ANALYSIS OF MARKET RISK

Financial Risk Coverage

With the attractive foreign interest rates in certain periods, the Company has obtained financing abroad, denominated mainly in dollars and euros and, in certain cases, at a floating interest rate. For this reason the Company faces two types of financial risks, the risk of exchange rate fluctuations and the risk of interest rate fluctuations.

Financial risk due to foreign currency fluctuations

The Company has exchange rate coverage instruments, the purpose of which is to reduce the negative impact of dollar and euro fluctuations on its financial results. The percentage of interest-bearing debt exposure is defined and continuously reviewed, basically considering the volatility of the exchange rate, its trend, and the cost and availability of hedging instruments for different terms.

The main hedging instruments used are dollar/UF and dollar/peso forward agreements.

As of September 30, 2003, the interest-bearing debt in original currency expressed in dollars was US\$1,389.2 million, including US\$ 973.6 million of financial liabilities in dollars, US\$ 217.5 million in debt expressed in "unidades de fomento" (inflation indexed Chilean currency unit), US\$ 154.2 million in debt expressed in euros, US\$ 43.9 million in debt expressed in Chilean pesos. In this way, US\$ 1,127.8 million corresponded to debt exposed to foreign currencies, and therefore directly or indirectly exposed to fluctuations of the dollar.

Simultaneously, the Company had dollar/UF and dollar/peso exchange insurance and assets in dollars that resulted, in Zero exposure to foreign exchange as of September 30, 2003.

Financial risk due to floating interest rate fluctuations

Interest rate variations are covered by hedge policies that seek to reduce the impact on financial expenses.

As of September 30, 2003, the Company had debts at variable interest rates, Libor, Euro Libor and TAB, mainly for syndicated loans.

To protect the Company from increases in the variable (floating) interest rates, derivative financial instruments have been used, particularly "collars" and "Forward Rate Agreements" (which protect the Libor rate), to limit the future fluctuations of interest rates. This has allowed the Company to end with an exposure of 17% of the total interest-bearing debt in original currency as of September 30, 2003.
