The following text is the English translation of a news release issued in Germany by HSBC Trinkaus & Burkhardt, a 78.6 per cent indirectly owned subsidiary of HSBC Holdings plc.

HSBC TRINKAUS & BURKHARDT AG
THIRD QUARTER 2007 RESULTS

- Operating profit up 18.3 per cent in the first nine months of 2007 to EUR162.6 million, compared with the same period in 2006.
- Profit after tax up 24.0 per cent in the first nine months of 2007 to EUR111.6 million versus the first nine months of 2006.
- Return on equity before tax of 26.5 per cent during the first nine months of 2007, compared with 24.7 per cent for the same period last year.

HSBC Trinkaus & Burkhardt AG showed strong results in the first nine months of the year as all business segments exceeded comparable 2006 results. Operating profit during the nine month period was up 18.3 per cent period on period to EUR162.6 million. Profit after tax increased by 24.0 per cent compared with the first nine months of 2006 to EUR111.6 million. Trading profit remained at a high level despite the volatility in the capital markets. Net interest income and fee income were the greatest contributors to earnings.

Edgar Filing: HSBC HOLDINGS PLC - Form 6-K

Net interest income rose significantly during the first three quarters, by 24.4 per cent to EUR83.6 million versus the comparable period in 2006. This was primarily due to an increase in customer deposits which funded higher loans and advances to banks and increased loans and advances to customers. Interest income from financial assets, including investment income, remains at a high level.

Net fee income increased 14.2 per cent to EUR242.9 million compared to the previous year. This was due primarily to higher volumes in the securities business despite a slight slowdown in recent months. The issuing and structuring business also made a contribution to this growth.

Trading profit again improved, by 4.1 per cent to EUR84.3 million in the first three quarters compared with the same period in 2006, despite an extremely high starting base during the last two years. Volatility in capital markets in the third quarter resulted in the weakest earnings contribution from trading profit compared to the two preceding quarters in 2007. Equities and equity/index derivatives remain the strongest earnings component.

Net credit for loan impairment of EUR3.7 million was primarily attributable to the reversal of individually assessed impairments and a reduction in collectively assessed impairments. Credit risk provisioning continues to remain cautious and characterised by strong valuation standards.

Total administrative expenses increased 14.2 per cent compared with the first nine months of 2006. This was due to both an increase in the number of employees and higher performance-related remuneration. Other administrative expenses increased due to higher fees for consultancy services in IT projects for the further modernisation of IT infrastructure.

The cost efficiency ratio remained unchanged at 61.8 per cent compared with the comparable nine month period in the previous year.

The Management Board is aiming to increase operating profit for the full year compared with 2006. HSBC Trinkaus' business model and strategy joins up its traditional full range of personalised service and local expertise with the HSBC Group's worldwide network. To reinforce its strategy and distinctive image in the German market, HSBC Trinkaus will today introduce a new HSBC-branded logo campaign.

Notes to editors:
