General Director

FOR IMMEDIATE RELEASE

VIMPELCOM ANNOUNCES FIRST QUARTER 2007

FINANCIAL AND OPERATING RESULTS

Moscow and New York (May 25, 2007) - Open Joint Stock Company Vimpel-Communications (VimpelCom or the Company) (NYSE: VIP), a leading provider of wireless telecommunications services in Russia and the Commonwealth of Independent States (CIS) today announced its financial and operating results for the quarter ended March 31, 2007.

Financial and Operating Highlights

Net operating revenues reached \$1,488.0 million in the first quarter, a year-on-year increase of 59.0% and a quarter-on-quarter increase of 2.5%.

OIBDA reached \$766.4 million, a year-on-year increase of 58.8%.

OIBDA margin was 52.9% in Russia and 51.5% for the Company.

Net income totaled \$277.3 million, a year-on-year increase of 84.6%.

Operating cash flow was \$655.9 million, a year-on-year increase of 81.2%.

ARPU was unchanged in Russia as compared with the previous quarter.

Market share exceeded 50% in Kazakhstan.

Commenting on today's announcement, Alexander Izosimov, Chief Executive Officer of VimpelCom, said, "Our first quarter results were very strong with revenue, OIBDA, net income and cash flow all at record levels. We reported almost 60% year-on-year growth in revenue and OIBDA and almost 85% year-on-year growth in net income which is a remarkable achievement for a company of VimpelCom's size."

On a sequential, quarter-on-quarter basis, our results were also very encouraging. Although the first quarter is the seasonally weakest quarter for revenue, we reported both revenue growth and substantially improved margins. It is a very good start to what we hope will become another successful year.

Changes in definitions and reported data

The Company believes that active subscriber base data and the corresponding MOU and ARPU more accurately reflect the trends and competitive positions of the business. Accordingly, beginning with this press release, the relevant operating and financial results (*i.e.*, number of subscribers, ARPU and MOU) are reported on the basis of active subscribers.

The only exception is churn which we continue to calculate with regard to the registered subscriber base. Russian regulations require that telephone numbers should remain assigned to inactive subscribers for a period of six months. For uniformity, we will also use this approach in the countries of the CIS. Starting from this

- more -

VimpelCom Announces First Quarter 2007 Financial And Operating Results

Page 2 of 8

report we will publish churn numbers separately for each country where we have operated for more than one year.

For convenience, we will continue to report the registered subscriber base and the related figures, which are now defined as MOU_{REG} and $ARPU_{REG}$, for comparable periods (see Attachment A for the definitions and refer to Attachment D for relevant data).

All the above-mentioned definitions refer to mobile subscribers. With the acquisition of Armentel, the Company also has fixed-line subscribers which are treated separately.

Attachments A, B, C and D present respectively

definitions for certain terms used in this press release, the condensed consolidated financial statements of VimpelCom, tables with relevant reconciliations of non-U.S. GAAP financial measures to their most directly comparable U.S. GAAP financial measures, and certain reference data.

Subscriber market share ^{**)}	31.2%	33.9%		31.7%	

^{*)} Excluding inter-company transactions.

^{**)} Subscriber market share data presented here and in the following country tables are published by independent organizations and are generally based on registered subscribers.

In Russia, a favorable business environment and conservative pricing resulted in essentially flat revenue in the first quarter of 2007 versus the fourth quarter of 2006. Stable revenue underscores the robustness of the Russian market as it was delivered in a seasonally weak quarter.

In January 2007, we tightened our definition of active subscribers excluding those who were included in the active base due only to a technical transaction. It was a one-time correction, and we believe it more correctly reflects the size of our base. As a result, our active subscriber base declined sequentially by 2.9%, somewhat supporting our ARPU which stayed flat. [To note, our ARPU_{REG} also remained essentially flat on a sequential quarterly basis.]

Selling, general and administrative expenses (SG&A) as a percentage of net operating revenues improved on a sequential quarterly basis from 31.7% to 29.3% primarily due to a seasonal reduction in sales and marketing expenses. On a year-on-year basis it also improved, as compared with 29.9% reported for the first quarter of 2006. This improvement reflects the growing efficiency of our business and the increased scale of operations during the past 12 months.

The above-mentioned factors resulted in substantial improvements in the margins in the first quarter of 2007 as compared with the fourth quarter of 2006.

In the first quarter of 2007, VimpelCom invested approximately \$199.5 million for the purchase of long-lived assets in Russia.

Subscriber market share	50.2%	40.6%		49.5%	

^{*)} Excluding inter-company transactions.

^{**)} After minority interest.

In the first quarter of 2007, the Company continued the successful development of its Kazakhstan operations. We achieved triple-digit year-on-year growth in net operating revenues, OIBDA and net income. These figures also grew as compared with the fourth quarter of 2006 in spite of a modest seasonal decline in MOU and ARPU. Our market share reached a new high of 50.2% in an environment of increased activity by the third competitor.

Our gross margin was positively impacted by the change in interconnect accounting when 10 second rounding was introduced by the regulator. This change and seasonal reduction in SG&A expenses as compared with the previous quarter resulted in great improvements in margins, leading the OIBDA margin to 51.9%, the highest ever recorded by the Company in Kazakhstan.

During the first quarter of 2007 the tenge, the Kazakh currency, strengthened against the US dollar from 127.0 tenge per \$1 to 123.8 tenge per \$1. This strengthening resulted in a net foreign exchange gain of \$10.5 million reflected in net income.

Subscriber market share	4.5%	0.8%		3.8%	

^{*)} Excluding inter-company transactions.

The Company improved its position in Ukraine in the first quarter of 2007. Our market share grew from 3.8% to 4.5%, as our incremental market share (IMS) for the first quarter was more than 20%. In fact, our IMS grew in each month of the quarter and reached almost 45% in March. This indicates very good momentum in subscriber growth.

As compared with the previous quarter, we increased our active subscriber base by approximately 28.2% and net operating revenues by 9.8%. Gross margin was better than in the previous quarter and OIBDA, though still negative, is improving as well. Thus, the Company is making progress in Ukraine despite further deterioration of the difficult pricing environment that began in the fourth quarter of 2006. Our focus in Ukraine remains on building our subscriber base and growing market share, while striving towards breakeven OIBDA.

The Company made good progress in Uzbekistan in the first quarter of 2007. The number of active subscribers during the quarter grew by 57.9% in the first quarter of 2007 as compared to the fourth quarter of 2006. On a quarter-on-quarter and year-on-year basis, net operating revenues, OIBDA and net income grew while MOU and ARPU declined. ARPU in the first quarter declined due partially to seasonality, but also reflecting the impact of promotional pricing in this rapidly growing market.

Our key priorities in Uzbekistan are subscriber growth and network and infrastructure build-out, as the penetration rate in the country is still less than 15%.

^{**)} Figures in this column represent the results of operations after November 16, 2006, i.e. only the second half of the fourth quarter of 2006.

^{***)} After minority interest.

VimpelCom completed the acquisition of 90% of Armentel on November 16, 2006 and the acquisition of the remaining 10% on April 18, 2007. We began to consolidate Armentel's results in our financial reporting from November 16, 2006. Therefore the first quarter of 2007 was the first full quarter of VimpelCom's operations in Armenia and we deferred a more detailed analysis of the results until next quarter.

Armentel operates both fixed-line and mobile networks. In Armenia, VimpelCom plans to enhance Armentel's position in the mobile market and continue to operate the fixed-line network, exploring fixed-to-mobile convergence opportunities.

VimpelCom acquired Mobitel, a Georgian GSM-1800 license holder, in July 2006. Since that time we have worked to organize our business in Georgia, build the network, infrastructure and distribution channels. The Company launched commercial operations on March 15, 2007.

The Company's management will discuss its first quarter results during a conference call and slide presentation on May 25, 2007 at 6:30 pm Moscow time (10:30 am ET in New York). The call and slide presentation may be accessed via webcast at the following URL address <http://www.vimpelcom.com>. The conference call replay and the slide presentation webcast will be available through June 1, 2007 and June 25, 2007, respectively. The slide presentation will also be available for download on VimpelCom's website <http://www.vimpelcom.com>.

The VimpelCom Group includes companies operating in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia. The VimpelCom Group's GSM and 3G license portfolio covers a territory with a population of about 250 million. This includes the entire territories of Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan, Georgia and Armenia. VimpelCom was the first Russian company to list its shares on the New York Stock Exchange (NYSE). VimpelCom's ADSs are listed on the NYSE under the symbol VIP .

Although the first quarter 2007 U.S. GAAP financial statements were approved by the requisite majority of our

board, the three directors on our board who were nominated by our shareholder Telenor East Invest AS and who are officers of Telenor or its affiliates voted against approval.

This press release contains forward-looking statements, as the phrase is defined in Section 27A of the Securities Act and Section 21E of the Exchange Act. These statements relate to the Company's strategic and development plans, including network development plans, and developments in the telecommunications markets in which the Company operates. These and other forward-looking statements are based on management's best assessment of the Company's strategic and financial position and of future market conditions and trends. These discussions involve risks and uncertainties. The actual outcome may differ materially from these statements as a result of unforeseen developments from competition, governmental regulation of the telecommunications industries in Russia and the CIS, general political uncertainties in Russia and the CIS and general economic developments in Russia and the CIS, the Company's ability to continue to grow its overall revenues and its subscriber base, continued volatility in the world economy and other factors. As a result of such risks and uncertainties, there can be no assurance that the effects of competition or current or future changes in the political, economic and social environment or current or future regulation of the Russian and CIS telecommunications industries will not have a material adverse effect on the VimpelCom Group. Certain factors that could cause actual results to differ materially from those discussed in any forward-looking statements include the risks described in the Company's Annual Report on Form 20-F for the year ended December 31, 2006 and other public filings made by the Company with the United States Securities and Exchange Commission, which risk factors are incorporated herein by reference. VimpelCom disclaims any obligation to update developments of these risk factors or to announce publicly any revision to any of the forward-looking statements contained in this release, or to make corrections to reflect future events or developments.

-Definitions and tables are attached

Attachment A: Definitions

Registered subscriber is an authorized user of cellular services, using one SIM card (GSM/3G) with one or several selective numbers or one handset (DAMPS/CDMA) with one selective number. The number of subscribers includes employees using cellular services and excludes guest roamers and users of test SIM cards or handsets.

Churn rate is defined as the total number of registered subscribers disconnected from our network within a given period of time expressed as a percentage of the midpoint of subscribers in our network at the beginning and end of that period. Contract subscribers are disconnected if they have not paid their bills for 2 months and prepaid subscribers are disconnected 6 months after their services have been blocked. We typically block a prepaid subscriber's service in two cases: (1) their balance drops to \$0 or below, and (2) an account shows no chargeable activity within 6 months. The Company retains the right to change its disconnect policy to reflect changes in business or regulatory environment.

Active subscribers are those subscribers in the registered subscriber base who were a party to a revenue generating activity in the past three months and remain in the base at the end of the reported period. Such activities include all incoming and outgoing calls, subscriber fee accruals, debits related to service, outgoing SMS, MMS, data transmission and receipt sessions, but do not include incoming SMS and MMS sent by our Company or abandoned calls.

Prepaid subscribers are those subscribers who pay for their services in advance.

Fixed-line subscriber is an authorized user of fixed-line communications services.

OIBDA is a non-U.S. GAAP financial measure. OIBDA, previously referred to as EBITDA by the Company, is defined as operating income before depreciation and amortization. The Company believes that OIBDA provides useful information to investors because it is an indicator of the strength and performance of our business operations, including our ability to finance capital expenditures, acquisitions and other investments and our ability to incur and service debt. While depreciation and amortization are considered operating costs under U.S. GAAP, these expenses primarily represent the non-cash current period allocation of costs associated with long-lived assets acquired or constructed in prior periods. Our OIBDA calculations are commonly used as bases for some investors, analysts and credit rating agencies to evaluate and compare the periodic and future operating performance and value of companies within the wireless telecommunications industry. OIBDA should not be considered in isolation as an alternative to net income, operating income or any other measure of performance under U.S. GAAP. OIBDA does not include our need to replace our capital equipment over time. Reconciliation of OIBDA to operating income, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

OIBDA margin is OIBDA expressed as a percentage of total net operating revenues. Reconciliation of OIBDA margin to operating income as a percentage of total net operating revenues, the most directly comparable U.S. GAAP financial measure, is presented below in the reconciliation tables section.

Gross margin is defined as total operating revenues less service costs and cost of handsets and accessories sold.

Gross margin percentage is gross margin expressed as a percentage of total operating revenues.

Each ADS represents 0.25 of one share of common stock. This ratio was established effective November 22, 2004.

ARPU (Monthly Average Revenue per User), a non-U.S. GAAP financial measure, is calculated for each month in the relevant period by dividing the Company's service revenue during that month, including roaming revenue and interconnect revenue, but excluding revenue from connection fees, sales of handsets and accessories and other non-service revenue, by the average number of the Company's active subscribers during the month. Reconciliation of ARPU to service revenues and connection fees, the most directly comparable U.S. GAAP financial measure, is presented below in the tables section. The Company believes that ARPU provides useful information to investors because it is an indicator of the performance of the Company's business operations and assists management in budgeting. The Company also believes that ARPU provides management with useful information concerning usage and acceptance of the Company's services. ARPU should not be viewed in isolation or an alternative to other figures reported under U.S. GAAP.

ARPU_{REG} is ARPU calculated with regard to the registered subscriber base.

MOU (Monthly Average Minutes of Use per User) is calculated for each month of the relevant period by dividing the total number of minutes of usage for incoming and outgoing calls during that month (excluding guest roamers) by the average number of active subscribers during the month.

MOU_{REG} is MOU calculated with regard to the registered subscriber base.

SAC (Average Acquisition Cost Per User), a non-U.S. GAAP financial measure, is calculated as dealers' commissions (for sales and bonus for exclusivity^{*}), advertising expenses and handset subsidies for the relevant period divided by the number of new subscribers added during the relevant period. Reconciliation of SAC to selling, general and administrative expenses, the most directly comparable U.S. GAAP financial measure, is presented below in the tables section. The Company believes that SAC in growing markets provides useful information to investors because it is an indicator of the performance of the Company's business operations and assists management in budgeting. The Company also believes that SAC assists management in quantifying the incremental costs to acquire a new subscriber. SAC should not be viewed in isolation or as an alternative to other figures reported under U.S. GAAP.

Market share of subscribers for each relevant area is calculated by dividing the estimated number of our subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan and Armenia, respectively, by the total estimated number of subscribers in Russia, Kazakhstan, Ukraine, Uzbekistan, Tajikistan and Armenia, respectively. Market share data is published by consulting agencies specializing in the telecommunications industry in Russia and the CIS.

^{*}) *Dealers' bonus for exclusivity which, prior to the fourth quarter of 2006, we counted as a part of general and administrative expenses is now included in the dealers' commission expense. Historical numbers including SAC were recalculated accordingly.*

Presentation of 1Q 2007
Financial
and
Operating Results
May 25, 2007

2

Disclaimer

This presentation contains "forward-looking statements", as the phrase is defined in Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. These statements relate, in part, to the Company's strategy and development plans, such as growth in terms of subscribers, ARPU and revenues

as

well

as

acquisitions

and

expansion

into

new

business

areas.

The

forward-looking

statements

are

based

on

management's

best

assessment

of

the

Company's

strategic

and

financial

position,

and

future

market

conditions and trends. These discussions involve risks and uncertainties. The actual outcome may differ

materially from these statements as a result of risks and uncertainties relating to developments from competition, governmental regulations of the wireless telecommunications industry, general political uncertainties in Russia and the CIS, general economic developments in Russia and the CIS, and/or litigation with third parties or our shareholders (including Telenor). The actual outcome may also differ materially if the Company is unable to obtain all necessary corporate approvals relating to its business (including approval of

funding,
specific
transactions
and
payment
of
dividends),
and
other
factors.

There
can
be
no
assurance
that

these risks and uncertainties will not have a material adverse effect on the Company, that the Company will be able to grow or that it will be successful in executing its strategy and development plans. Certain factors that could cause actual results to differ materially from those discussed in any forward-looking statements include the risks described in the Company's Annual Report on Form 20-F for the year ended December 31, 2006 and other public filings made by the Company with the United States Securities and Exchange Commission, which risk factors are incorporated herein by reference. The Company disclaims any obligation to update developments of these risk factors or to announce publicly any revision to any of the forward-looking statements contained in this release, or to make corrections to reflect future events or developments.

Welcome Remarks
Alexander Izosimov, Chief Executive Officer

Strategy Going Forward

Grow ARPUs
and customer loyalty
through pricing excellence and new
VAS

Strengthen corporate segment

Develop strong, situation-specific
value propositions in local markets

Explore consolidation opportunities

Focus on subscriber growth

Leverage unified business platform
developed in Russia

Pursue acquisitions in remaining markets

Opportunistically explore deals outside
of the CIS

Develop business in backbone wholesale
and residential broadband

Build new digital service businesses,
including media, mobile TV, payment
services, etc.

Explore new technologies and business
platforms
Drive operations and investment efficiency

Re-balance focus from speed to efficiency and enhance cost transparency as markets mature

Avoid head-count growth in mature operations

Drive procurement excellence

Optimize capex

decisions at a granular level and continuously improve marketing spend efficiency

Build and sustain strong management capabilities

Offer an open and transparent, meritocracy-based environment

Use a global approach to hiring

Develop best-in-class individual development and coaching mechanisms

Ensure competitive, performance-based compensation packages

Extract maximum value in the

Russian business

Grow the business in the CIS

Capture attractive opportunities to
expand into new business areas

18

VimpelCom s
AGM

The AGM has been set for June 29, 2007 with 10 candidates vying for 9 board seats. The record date is May 14 and the cut-off date for ADR holders voting is June 25, 2007.

Shareholder materials are available on the Company s website at the address:
www.vimpelcom.com/investor/shareholder/index.wbp

19

Summary

Continued strong financial performance on the consolidated level.

Flat revenue in Russia compared with the fourth quarter of 2006 confirms ongoing strength of the Russian market.

CIS becomes increasingly important, behind strong subscriber growth and improvements in OIBDA margin.

20
