NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS

(Unaudited)

Note 1. Basis of Presentation

Interim Financial Statements

The accompanying unaudited Condensed Consolidated Financial Statements have been prepared by VeriSign, Inc. and its subsidiaries (collectively, "VeriSign" or the "Company") in accordance with the instructions to Form 10-Q pursuant to the rules and regulations of the Securities and Exchange Commission ("SEC") and, therefore, do not include all information and notes normally provided in audited financial statements. In the opinion of management, all adjustments (consisting of normal recurring accruals and other adjustments) considered necessary for a fair presentation have been included. The results of operations for any interim period are not necessarily indicative of, nor comparable to, the results of operations for any other interim period or for a full fiscal year. These unaudited Condensed Consolidated Financial Statements should be read in conjunction with the Consolidated Financial Statements and related notes contained in VeriSign's fiscal 2009 Annual Report on Form 10-K (the "2009 Form 10-K") filed with the SEC on February 26, 2010.

On July 27, 2010, the Board of Directors authorized a change of the Company's principal place of business from 487 East Middlefield Road, Mountain View, California 94043, to 21355 Ridgetop Circle, Dulles, Virginia 20166, effective upon the sale of the Authentication Services business.

On August 9, 2010, the Company sold its Authentication Services business, including outstanding shares of capital stock of its majority-owned subsidiary VeriSign Japan K.K. ("VeriSign Japan") and trademarks and certain intellectual property used in the Authentication Services business (including the Company's checkmark logo and the Geotrust and thawte brand names), to Symantec Corporation ("Symantec") for cash consideration of approximately \$1.14 billion, net of cash held by transferred subsidiaries of \$127.5 million and transaction costs of \$10.8 million. The Authentication Services business included Business Authentication Services and User Authentication Services. Business Authentication Services enable enterprises and Internet merchants to implement and operate secure networks and websites that utilize Secure Sockets Layer, or SSL, protocol. User Authentication Services include identity protection services, fraud detection services, and managed public key infrastructure, or PKI, services. Also, included with the sale of the Authentication Services business were real and personal property owned by the Company at its Mountain View, California facility ("Mountain View facility") and other locations. Current and historical results of operations of the Authentication Services business have been classified as discontinued operations.

The Company's remaining business consists of the following two reportable segments: (1) Naming Services, which consists of Registry Services and Network Intelligence and Availability ("NIA") Services; and (2) Other Services which consists of the continuing operations of the Content Portal Services ("CPS").

Registry Services operates the authoritative directory of all .com, .net, .cc, .tv, and .name domain names and the back-end systems for all .jobs and .edu domain names. NIA Services provides infrastructure assurance to organizations and is comprised of VeriSign iDefense Security Intelligence Service ("iDefense"), Managed Domain Name System ("Managed DNS") Services and Distributed Denial of Service ("DDoS") mitigation. Revenues from NIA Services are not significant.

Reclassifications

The Condensed Consolidated Statements of Operations have been reclassified for all periods presented to reflect the discontinued operations treatment of the Authentication Services business. Unless noted otherwise, discussions in the Notes to Condensed Consolidated Financial Statements pertain to continuing operations. Certain other reclassifications have been made to prior period amounts to conform to current period presentation. Such reclassifications have no effect on net income as previously reported.

Table of Contents*Recent Accounting Pronouncements*

In October 2009, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2009-13 *Revenue Recognition (Topic 605): Multiple-Deliverable Revenue Arrangements a consensus of the FASB Emerging Issues Task Force* (ASU 2009-13). ASU 2009-13 addresses how to measure and allocate arrangement consideration to one or more units of accounting within certain multiple-deliverable arrangements. ASU 2009-13 modifies the requirements for determining whether a deliverable can be treated as a separate unit of accounting by removing the criterion that objective evidence of fair value must exist for the undelivered elements. ASU 2009-13 is effective for the Company prospectively for revenue arrangements entered into or materially modified beginning January 1, 2011. Early adoption is permitted. The Company has determined that the adoption of ASU 2009-13 will not have a material impact on its financial condition and results of operations.

In October 2009, the FASB issued ASU No. 2009-14 *Software (Topic 985): Certain Revenue Arrangements That Include Software Elements a consensus of the FASB Emerging Issues Task Force* (ASU 2009-14). ASU 2009-14 modifies the scope of the software revenue recognition guidance to exclude arrangements that contain tangible products for which the software element is essential to the functionality of the tangible products. ASU 2009-14 is effective for the Company prospectively for revenue arrangements entered into or materially modified beginning January 1, 2011. Early adoption is permitted. The Company has determined that the adoption of ASU 2009-14 will not have a material impact on its financial condition and results of operations.

Note 2. Cash, Cash Equivalents, and Marketable Securities

The following table summarizes the Company's cash, cash equivalents, and marketable securities:

	September 30, 2010	December 31, 2009
	(In thousands)	
Cash	\$ 92,130	\$ 227,547
Money market funds	1,150,388	736,459
Time deposits	804,131	514,938
Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies	321,957	
Corporate debt securities	178,160	
Debt securities issued by foreign governments	5,070	
Equity securities of a public company		185
Total	\$ 2,551,836	\$ 1,479,129
Included in Cash and cash equivalents	\$ 2,060,195	\$ 1,477,166
Included in Marketable securities	\$ 488,948	\$ 185
Included in Other assets (1)	\$ 2,693	\$ 1,778

- (1) Represents restricted cash related to employee payroll withholdings, net of claims paid, for the short-term disability program under the State of California Employment Development Department's Voluntary Plan Fund guidelines.

Table of Contents

The following table summarizes the Company's unrealized gains and losses, and fair value of debt and equity securities designated as available-for-sale investments. There were no investments classified as either held-to-maturity or trading.

	Amortized Cost	Gross Unrealized Gains (In thousands)	Gross Unrealized Losses	Fair Value
As of September 30, 2010				
Fixed income securities:				
Debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies	\$ 318,391	\$ 3,568	\$ (2)	\$ 321,957
Corporate debt securities	176,449	1,715	(4)	178,160
Debt securities issued by foreign governments	5,063	7		5,070
Total fixed income securities	\$ 499,903	\$ 5,290	\$ (6)	\$ 505,187
Included in Cash and cash equivalents				\$ 16,239
Included in Marketable securities				\$ 488,948
As of December 31, 2009				
Equity securities of a public company (1)	\$ 290	\$	\$ (105)	\$ 185

(1) Included in Marketable Securities

The following table presents the contractual maturities of the fixed income securities as of September 30, 2010:

	Amortized Cost	Gross Unrealized Gains (In thousands)	Gross Unrealized Losses	Fair Value
Due within one year	\$ 85,765	\$ 96	\$	\$ 85,861
Due after one year through three years	414,138	5,194	(6)	419,326
Total	\$ 499,903	\$ 5,290	\$ (6)	\$ 505,187

Net gains or losses recognized during the three and nine months ended September 30, 2010 and 2009 related to sales of marketable securities were not material.

Table of Contents**Note 3. Fair Value of Financial Instruments***Assets and Liabilities Measured at Fair Value on a Recurring Basis*

The following table summarizes the Company's financial assets and liabilities measured at fair value on a recurring basis as of September 30, 2010 and December 31, 2009:

	Fair Value Measurement Using			
	Total Fair Value as of September 30, 2010	Quoted Prices in

Liabilities:

Contingent interest derivative on convertible debentures	\$ 10,000	\$	\$	\$ 10,000
Total	\$ 10,000	\$	\$	\$ 10,000

- (1) Included in Marketable securities
- (2) Included in Prepaid expenses and other current assets

Table of Contents

The fair value of the Company's investments in certain money market funds approximates their face value. Such instruments are classified as Level 1 and are included in Cash and cash equivalents.

The fair value of the Company's investments in fixed income securities are obtained using the weighted average price of available market prices for the underlying securities from various industry standard data providers, large financial institutions and other third-party sources. Such instruments are included in either Cash and cash equivalents or Marketable securities.

The fair value of the Company's foreign currency forward contracts is based on foreign currency rates quoted by banks or foreign currency dealers and other public data sources.

The fair value of the equity securities of a public company is based on the quoted market price of the underlying shares.

The Company's convertible debentures have contingent interest payments that are required to be accounted for separately from the debt instrument, at fair value at the end of each reporting period, with gains and losses reported in Other loss, net. The Company has utilized a valuation model based on simulations of stock prices, interest rates, credit ratings and bond prices to estimate the value of the derivative. The inputs to the model include risk adjusted interest rates, volatility and average yield curve observations and stock price. As several significant inputs are not observable, the overall fair value measurement of the derivative is classified as Level 3.

The following table summarizes the change in the fair value of the Company's Level 3 contingent interest derivative on convertible debentures during the three and nine months ended September 30, 2010 and 2009:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2010	
	2009		2009	
	(In thousands)			
Beginning balance	\$ 8,250	\$ 9,500	\$ 10,000	\$ 10,549
Unrealized loss (gain) on the contingent interest derivative on convertible debentures	625	(750)	(1,125)	(1,799)
Ending balance	\$ 8,875	\$ 8,750	\$ 8,875	\$ 8,750

Other

The fair value of other financial instruments including accounts receivable, restricted cash and investments, and accounts payable, approximates their carrying amount. The fair value of the Company's convertible debentures at September 30, 2010, is \$1.3 billion, and is based on quoted market prices.

Note 4. Discontinued Operations

On August 9, 2010, the Company sold its Authentication Services business, including outstanding shares of capital stock of VeriSign Japan and trademarks and certain intellectual property used in the Authentication Services business (including the Company's checkmark logo and the Geotrust and thawte brand names), to Symantec for cash consideration of approximately \$1.14 billion, net of cash held by transferred subsidiaries of \$127.5 million and transaction costs of \$10.8 million. Also included with the sale of the Authentication Services business were certain corporate assets, namely real and personal property owned by the Company at its Mountain View facility and other locations, which were transferred to the Authentication Services reporting unit before the sale. The Company recorded a gain on sale of \$736.5 million, net of tax of \$243.8 million. The divestiture transaction is subject to definitive adjustment to reflect the actual working capital as of the closing date. The gain on sale also reflects the realization of currency translation adjustments of \$15.3 million previously included in Accumulated other comprehensive income and the recognition of non-controlling interest in VeriSign Japan of \$54.3 million.

Table of Contents

The following table presents the carrying amount of the major classes of assets and liabilities of the Authentication Services business as of August 9, 2010:

	Aug 9, 2010 (In thousands)
Assets:	
Cash and cash equivalents	\$ 127,517
Accounts receivable, net	35,816
Prepaid expenses and other assets	58,861
Property and equipment, net	225,348
Goodwill	235,698
Other intangible assets, net	19,201
 Total assets	 \$ 702,441
Liabilities:	
Accounts payable and accrued liabilities	\$ 19,271
Deferred revenues	308,772
Other liabilities	15,443
 Total liabilities	 \$ 343,486

Current and historical results of operations of the Authentication Services business have been classified as discontinued operations. Income from discontinued operations for the three and nine months ended September 30, 2010, represents the results of operations of the Authentication Services business, the gain on sale of the Authentication Services business, and adjustments to gains or losses on divestitures completed in fiscal 2009, as a result of certain one-time employment termination costs and settlement of certain retained litigation of the divested businesses. Income from discontinued operations for the three and nine months ended September 30, 2009, represents the results of operations of the Authentication Services business, results of operations of businesses divested in fiscal 2009, and gains or losses on completed divestitures.

For a period of time, the Company will continue to generate cash flows and will report income statement activity in continuing operations that are associated with the Authentication Services business and certain other completed divestitures. These activities are transitional in nature and generally result from agreements ensuring and facilitating the orderly transfer of business operations. The nature, magnitude and duration of the agreements vary depending on the specific circumstances of the service, location or business need. The agreements can include the following: data center hosting, logistics, customer service, support of financial processes, procurement, human resources, facilities management, data collection and information services. The existing agreements typically have terms from 1 to 24 months in length and are currently at various stages within their original term.

Table of Contents

The following table presents the revenues and the components of income from discontinued operations, net of tax, attributable to VeriSign stockholders:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Revenues	\$ 42,971	\$ 141,732	\$ 246,663	\$ 521,793
Income from discontinued operations before income taxes	\$ 4,666	\$ 34,443	\$ 63,916	\$ 152,164
Net gains on sale of discontinued operations before income taxes	980,255	18,307	979,292	43,828
Income tax expense	(244,132)	(19,051)	(269,638)	(98,955)
Income from discontinued operations, net of tax	740,789	33,699	773,570	97,037
Less: Income from discontinued operations, net of tax, attributable to noncontrolling interest in subsidiary	(642)	(988)	(2,887)	(2,381)
Total income from discontinued operations, net of tax, attributable to VeriSign stockholders	\$ 740,147	\$ 32,711	\$ 770,683	\$ 94,656

Note 5. Other Balance Sheet Items*Prepaid Expenses and Other Current Assets*

Prepaid expenses and other current assets consist of the following:

	September 30, 2010	December 31, 2009
	(In thousands)	
Prepaid expenses	\$ 11,696	\$ 18,868
Deferred tax assets	34,606	65,984
Non-trade receivables	20,641	25,467
Receivables from buyers	11,385	34,365
Funds held by the Reserve	12,003	20,867
Other	604	3,023
Total prepaid expenses and other current assets	\$ 90,935	\$ 168,574

During the nine months ended, September 30, 2010, the Company received from buyers of the divested businesses substantially the entire amount included in Receivables from buyers as of December 31, 2009. As of September 30, 2010, Receivables from buyers primarily represents amounts due from Symantec for services performed on their behalf under transition services agreements.

During the nine months ended September 30, 2010, the Company received distributions of \$8.9 million from the funds held by the Reserve.

Table of Contents*Property and Equipment, Net*

Property and equipment, net, consist of the following:

	September 30, 2010	December 31, 2009
	(In thousands)	
Land	\$ 4,681	\$ 138,194
Buildings and building improvements	131,047	181,113
Computer equipment and software	248,353	362,475
Capital work in progress	5,599	7,067
Office equipment and furniture	7,634	14,292
Leasehold improvements	13,640	28,054
Total cost	410,954	731,195
Less: accumulated depreciation and amortization	(219,528)	(327,374)
Total property and equipment, net	\$ 191,426	\$ 403,821

Accounts Payable and Accrued Liabilities

Accounts payable and accrued liabilities consist of the following:

	September 30, 2010	December 31, 2009
	(In thousands)	
Accounts payable	\$ 5,975	\$ 16,228
Accrued employee compensation	45,162	75,855
Customer deposits, net	16,793	23,213
Payables to buyers	16,690	27,049
Taxes payable, deferred and other tax liabilities	23,265	27,206
Accrued restructuring costs	19,214	6,605
Other accrued liabilities	35,898	67,811
Total accounts payable and accrued liabilities	\$ 162,997	\$ 243,967

Accrued employee compensation primarily consists of employee accrued vacation, accrued payroll and taxes, accruals for employee contribution to the employee stock purchase plan, and bonus payable. Payables to buyers primarily consists of amounts due to Symantec for certain post-closing purchase price adjustments related to the sale of the Authentication Services business and for collections received on behalf of buyers of certain divested businesses under transition services agreements. As of September 30, 2010, Accrued restructuring costs primarily represents restructuring costs related to the sale of the Authentication Services business.

Other accrued liabilities consist primarily of interest on convertible debentures, accrued litigation, and accruals for products and services. During the nine months ended September 30, 2010, the Company paid \$8.6 million for certain litigation settlements, net of insurance reimbursements. Interest on convertible debentures is paid semi-annually in arrears on August 15 and February 15.

Other Long-term Liabilities

Edgar Filing: VERISIGN INC/CA - Form 10-Q

	September 30, 2010	December 31, 2009
	(In thousands)	
Deferred tax liabilities	\$ 271,284	\$ 144,777
Long-term tax liabilities	9,672	12,949
Long-term accrued restructuring costs	1,523	3,204
Other	1,126	3,964
Total other long-term liabilities	\$ 283,605	\$ 164,894

Table of Contents

Deferred tax liabilities reflect the tax effects of differences between the financial statement carrying amounts of existing assets and liabilities and their respective tax bases, and are net of deferred tax assets from the same tax jurisdiction. During the nine months ended September 30, 2010, the Company utilized deferred tax assets related to tax deductible goodwill to offset income tax payable upon the gain on the sale of the Authentication Services business and recorded additional deferred tax liabilities, primarily attributable to the gain on sale of the Authentication Services business, and temporary differences related to convertible debentures and property and equipment.

Note 6. Restructuring Charges*2010 Restructuring Plan*

In connection with the sale of the Authentication Services business, the Company initiated a restructuring plan in the second quarter of 2010 (the 2010 Restructuring Plan) including workforce reductions, abandonment of excess facilities and other exit costs. Under the 2010 Restructuring Plan, the Company expects to incur cash and non-cash charges related to employee termination costs and excess facility exit costs. In July 2010, the Company expanded the 2010 Restructuring Plan to include migration of its corporate functions from its Mountain View facility to its facility in Dulles, Virginia, including further workforce reductions, abandonment of excess facilities and other exit costs.

Under the expanded 2010 Restructuring Plan, the Company will incur total estimated pre-tax cash charges of \$22.3 million in severance costs and other related employee termination costs. Through September 30, 2010, the Company has recorded a total of \$17.9 million in cash restructuring charges, inclusive of amounts for discontinued operations, under its 2010 Restructuring Plan, related to employee terminations. The Company expects to recognize excess facility exit costs in the range of \$14.2 million to \$16.9 million. Additionally, the Company recognized stock-based compensation expenses of \$9.1 million, inclusive of amounts for discontinued operations, during the three months ended September 30, 2010, upon acceleration of stock-based awards for employees notified of termination.

2008 Restructuring Plan

As part of its divestiture strategy announced in 2007, the Company had initiated a restructuring plan in the first quarter of 2008 (the 2008 Restructuring Plan) including workforce reductions, abandonment of excess facilities and other exit costs. Through September 30, 2010, the Company recorded a total of \$87.6 million in restructuring charges, inclusive of amounts for discontinued operations, under its 2008 Restructuring Plan. The 2008 Restructuring Plan was substantially completed as of June 30, 2010.

The following table presents the nature of the restructuring charges under the 2010 and 2008 Restructuring Plans:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2010	
	2010	2009	2010	2009
	(In thousands)			
Workforce reduction	\$ 15,295	\$ 2,648	\$ 28,846	\$ 9,351
Excess facilities	374	142	482	1,535
Total consolidated restructuring charges	\$ 15,669	\$ 2,790	\$ 29,328	\$ 10,886
Amounts classified as continuing operations	\$ 6,303	\$ 341	\$ 14,141	\$ 3,643
Amounts classified as discontinued operations	\$ 9,366	\$ 2,449	\$ 15,187	\$ 7,243

Table of Contents

As of September 30, 2010, the consolidated accrued restructuring costs are \$20.7 million and consist of the following:

	Accrued Restructuring Costs at December 31, 2009	Costs Incurred	Costs Paid or Settled (In thousands)	Stock-Based Compensation	Accrued Restructuring Costs at September 30, 2010
Workforce reduction	\$ 4,079	\$ 28,846	\$ (7,074)	\$ (9,693)	\$ 16,158
Excess facilities	5,730	482	(1,634)		4,578
Total accrued restructuring costs	\$ 9,809	\$ 29,328	\$ (8,708)	\$ (9,693)	\$ 20,736
Included in current portion of accrued restructuring costs					\$ 19,213
Included in long-term portion of accrued restructuring costs					\$ 1,523

Note 7. Stockholders Equity*Comprehensive Income*

Comprehensive income consists of Net income adjusted for unrealized gains and losses on marketable securities classified as available-for-sale and foreign currency translation adjustments. The following table presents the components of comprehensive income:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2009	
	2010	2009	2010	2009
	(In thousands)			
Net income	\$ 785,545	\$ 54,599	\$ 874,359	\$ 155,886
Foreign currency translation adjustments	3,160	5,820	7,251	(9,039)
Realized foreign currency translation adjustments attributable to the sale of the Authentication Services business, included in net income	(29,357)		(29,357)	
Change in unrealized gain on investments, net of tax	2,886	(82)	5,628	(74)
Realized (gain) loss on investments, net of tax, included in net income	(87)		(239)	281
Comprehensive income	762,147	60,337	857,642	147,054
Less: Comprehensive (loss) income attributable to noncontrolling interest in subsidiary	(11,928)	3,645	(7,747)	1,621
Comprehensive income attributable to VeriSign, Inc. stockholders	\$ 774,075	\$ 56,692	\$ 865,389	\$ 145,433

During the three and nine months ended September 30, 2010, the Company repurchased 5.1 million and 15.3 million shares, respectively, of its common stock at an average stock price of \$28.62 and \$27.76, respectively, for an aggregate of \$145.5 million and \$423.5 million, respectively, under the 2008 Share Buyback Program and 2010 Share Buyback Program combined. As of September 30, 2010, \$1.38 billion remained available for further repurchase under the 2010 Share Buyback Program.

The Company computes basic net income per share attributable to VeriSign, Inc. stockholders by dividing net income attributable to VeriSign, Inc. stockholders by the weighted-average number of common shares outstanding during the period. Diluted net income per share attributable to VeriSign, Inc. stockholders gives effect to dilutive potential common shares, including outstanding stock options, unvested restricted stock units, and employee stock purchases using the treasury stock method. The following table presents the computation of weighted average shares used in the calculation of basic and diluted net income per share attributable to VeriSign, Inc. stockholders:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2009	
	(In thousands)			
Weighted-average shares of common stock outstanding	173,572	192,619	179,240	192,527
Weighted-average potential shares of common stock outstanding:				
Stock options	424	266	397	269
Unvested restricted stock units	962	587	888	439
Employee stock purchase plan	76		108	
Shares used to compute diluted net income per share attributable to VeriSign, Inc. stockholders	175,034	193,472	180,634	193,235

The following table presents the weighted-average potential shares of common stock that were excluded from the above calculation because their effect was anti-dilutive, and the weighted-average exercise price of the weighted-average stock options outstanding:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands, except per share data)			
Weighted-average stock options outstanding	2,969	6,630	3,654	7,398
Weighted-average exercise price	\$ 31.33	\$ 28.24	\$ 31.06	\$ 28.25
Weighted-average restricted stock units outstanding	33	307	70	1,302
Employee stock purchase plan	73	338	486	398

There was no positive conversion spread relating to the convertible debentures during the three and nine months ended September 30, 2010 and 2009 and therefore there are no shares of common stock to be included in the calculation of diluted net income per share attributable to VeriSign, Inc. stockholders.

Table of Contents**Note 9. Segment Information**

As a result of the sale of the Authentication Services business, included in the former Internet, Infrastructure and Identity Services segment, the Company now operates in two reportable segments: (1) Naming Services and (2) Other Services.

Naming Services consists of Registry Services and NIA Services. Registry Services operates the authoritative directory of all .com, .net, .cc, .tv, and .name domain names and the back-end systems for all .jobs and .edu domain names. NIA Services provides infrastructure assurance to organizations and is comprised of iDefense, Managed DNS, and DDoS mitigation. Revenues from NIA Services are not significant.

The following tables present the results of the Company's reportable segments:

	Three months ended September 30,					
	Naming Services	2010 Other Services	Total (In thousands)	Naming Services	2009 Other Services	Total
Revenues	\$ 172,286	\$ 363	\$ 172,649	\$ 155,480	\$ 1,327	\$ 156,807
Cost of revenues	33,173	472	33,645	30,948	1,307	32,255
	\$ 139,113	\$ (109)	\$ 139,004	\$ 124,532	\$ 20	\$ 124,552

	Nine months ended September 30,					
	Naming Services	2010 Other Services	Total (In thousands)	Naming Services	2009 Other Services	Total
Revenues	\$ 501,750	\$ 2,077	\$ 503,827	\$ 457,206	\$ 3,591	\$ 460,797
Cost of revenues	93,738	2,758	96,496	92,270	3,719	95,989
	\$ 408,012	\$ (681)	\$ 407,331	\$ 364,936	\$ (128)	\$ 364,808

A reconciliation of the totals reported for the reportable segments to the applicable line items in the Condensed Consolidated Statements of Operations is as follows:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2009	
	(In thousands)		(In thousands)	
Total revenues from reportable segments	\$ 172,649	\$ 156,807	\$ 503,827	\$ 460,797
Total cost of revenues from reportable segments	33,645	32,255	96,496	95,989
Unallocated operating expenses (1)	79,555	90,464	243,668	254,526
Operating income	59,449	34,088	163,663	110,282
Other loss, net	(7,500)	(9,056)	(22,776)	(24,489)
Income from continuing operations before income taxes	\$ 51,949	\$ 25,032	\$ 140,887	\$ 85,793

Edgar Filing: VERISIGN INC/CA - Form 10-Q

- (1) Unallocated operating expenses include unallocated cost of revenues, sales and marketing, research and development, general and administrative, and restructuring and other charges, net.

Table of Contents*Geographic Information*

The Company operates in the U.S.; Australia, China, India, and other Asia Pacific countries (APAC); Europe, the Middle East and Africa (EMEA); and certain other countries, including Canada and Latin American countries.

The following table represents a comparison of the Company's geographic revenues:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
U.S.	\$ 105,654	\$ 97,975	\$ 309,224	\$ 293,918
APAC	26,500	22,629	76,359	64,083
EMEA	23,420	20,585	68,147	57,869
Other	17,075	15,618	50,097	44,927
Total revenues	\$ 172,649	\$ 156,807	\$ 503,827	\$ 460,797

Revenues are generally attributed to the country of domicile and the respective regions in which the Company's customers are located.

The following table presents a comparison of property and equipment, net of accumulated depreciation, by geographic region:

	September 30, 2010	December 31, 2009
	(In thousands)	
U.S.	\$ 183,358	\$ 380,732
EMEA	7,377	9,898
APAC	691	13,154
Other		37
Total property and equipment, net	\$ 191,426	\$ 403,821

Assets are not tracked by segment and the chief operating decision maker does not evaluate segment performance based on asset utilization.

Major Customers

One customer accounted for 28% of revenues for both the three and nine months ended September 30, 2010. One customer accounted for 26% and 25% of revenues during the three and nine months ended September 30, 2009, respectively. The Company does not believe that the loss of this customer would have a material adverse effect on the Company's business because, in that event, end-users of this customer would transfer to the Company's other existing customers. Three customers accounted for 24%, 17%, and 10%, respectively, of accounts receivable, net at September 30, 2010. No customer accounted for 10% or more of accounts receivable, net at December 31, 2009.

Table of Contents**Note 10. Stock-Based Compensation**

Stock-based compensation is classified in the Condensed Consolidated Statements of Operations in the same expense line items as cash compensation. The following table presents the classification of stock-based compensation:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2010	
	2009		2009	
	(In thousands)			
Stock-based compensation:				
Cost of revenues	\$ 1,010	\$ 1,000	\$ 3,321	\$ 2,887

(1) Included in Property and equipment, net.

Note 11. Other Loss, Net

The following table presents the components of Other loss, net:

Three Months Ended September 30, 2010		Nine Months Ended September 30, 2010	
2009		2009	
(In thousands)			

Edgar Filing: VERISIGN INC/CA - Form 10-Q

Interest and dividend income	\$ 1,908	\$ 533	\$ 5,047	\$ 2,108
Interest expense	(12,140)	(11,867)	(36,104)	(35,477)
Unrealized (loss) gain on the contingent interest derivative on convertible debentures	(625)	750	1,125	1,799
Income from transition services agreements	3,020	1,230	6,898	3,068
Other, net	337	298	258	4,013
Total other loss, net	\$ (7,500)	\$ (9,056)	\$ (22,776)	\$ (24,489)

Table of Contents

Interest and dividend income is earned principally from the investment of VeriSign's surplus cash balances and marketable securities. Interest expense is principally incurred on convertible debentures. Income from transition services agreements includes fees generated from services provided to the purchasers of the divested businesses for a certain period of time to ensure and facilitate the transfer of business operations for those businesses. During the nine months ended September 30, 2009, Other, net, primarily includes \$3.3 million received from Certicom Corporation (Certicom) due to the termination of the acquisition agreement entered into with Certicom.

Note 12. Income Taxes

The following table presents the income tax expense from continuing operations and the effective tax rates:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(Dollars in thousands)			
Income tax expense from continuing operations	\$ 7,193	\$ 4,132	\$ 40,098	\$ 26,944
Effective tax rate	14%	17%	28%	31%

The effective tax rate for the three and nine months ended September 30, 2010, differs from the statutory federal rate of 35% due to state taxes, the effect of non-U.S. operations, non-deductible stock-based compensation expense, tax benefits from foreign income taxed at lower rates, discrete tax benefits related to lapses of statutes of limitation, and a one-time discrete tax expense related to a change in tax status in a foreign jurisdiction due to the sale of the Authentication Services business. The effective tax rate for the three and nine months ended September 30, 2009, differs from the statutory federal rate of 35% due to state taxes, the effect of non-U.S. operations, non-deductible stock-based compensation expense, discrete tax benefits related to lapses of statutes of limitation, and a one-time discrete income tax benefit related to a California tax law change.

The Company applies a valuation allowance to certain deferred tax assets when management does not believe that it is more likely than not that they will be realized. Deferred tax assets offset by a valuation allowance relate primarily to investments with differing book and tax bases and net operating losses in certain foreign jurisdictions. During the three months ended September 30, 2010, the Company utilized all net operating loss carryforwards not limited by applicable tax laws in the U.S Federal jurisdiction to offset the tax gain from the sale of the Authentication Services business.

As of September 30, 2010, and December 31, 2009, the Company had gross unrecognized tax benefits for income taxes associated with uncertain tax positions of \$27.1 million and \$30.0 million, respectively. During the three and nine months ended September 30, 2010, the Company recorded a decrease in unrecognized tax benefits of \$6.8 million and \$2.9 million, respectively. Of the net decrease of \$6.8 million for the three months ended September 30, 2010, a decrease of \$3.2 million related to lapses in the applicable statutes of limitation, an increase of \$1.7 million related to current period activities, and a decrease of \$5.3 million related to tax positions taken during a prior period. Of the net decrease of \$2.9 million for the nine months ended September 30, 2010, a decrease of \$3.2 million related to lapses in the applicable statutes of limitation, an increase of \$5.2 million related to current period activities, and a decrease of \$4.9 million related to tax positions taken during a prior period. The prior period positions are decreased for the three and nine month periods ended September 30, 2010 due to the tax gain from the sale of the Authentication Services business. As of September 30, 2010, and December 31, 2009, \$24.3 million and \$29.0 million, respectively, of unrecognized tax benefits, including penalties and interest, would affect the Company's effective tax rate if realized. The balance of the gross unrecognized tax benefits is not expected to materially change in the next 12 months.

The Company recognizes accrued interest and penalties related to unrecognized tax benefits as a component of income tax expense. During the three and nine months ended September 30, 2010, the Company recognized a net benefit of \$1.4 million and \$1.1 million, respectively, for interest and penalties through Income tax expense

Table of Contents

as a result of lapses of statutes of limitation during the year. During the three and nine months ended September 30, 2009, the Company expensed \$0.1 million and \$0.7 million, respectively, for interest and penalties related to income tax liabilities through Income tax expense.

The Company's major taxing jurisdictions are U.S. Federal, the states of California and Virginia, and Switzerland. The Company's income tax returns are not currently under tax examination by the Internal Revenue Service or the Virginia Department of Revenue. The Company's income tax return for the year ended December 31, 2005 is currently under examination by the California Franchise Tax Board. Because the Company uses historic net operating loss carryforwards and other tax attributes to offset its taxable income in current and future years' income tax returns for U.S. Federal, California and Virginia, such attributes can be adjusted by these taxing authorities until the statute closes on the year in which such attributes were utilized. The open years in Switzerland are the 2006 tax year and forward.

Note 13. Commitments and Contingencies*Commitments*

On September 15, 2010, the Company entered into a lease agreement for an office building containing approximately 221,326 square feet in Reston, Virginia. The lease agreement is expected to commence in July 2011 commensurate with taking control of the premises. The lease term is for 15 years and 5 months. The lease includes a five month rent holiday followed by 18 months of a 50% rent concession. The minimum lease payments under the lease agreement as of September 30, 2010, are as follows:

	Operating Lease Payments (In thousands)
2011	\$ 251
2012	3,022
2013	4,920
2014	6,382
2015	6,557
Thereafter	84,443
Total	\$ 105,575

Legal Proceedings

On May 31, 2007, plaintiffs Karen Herbert, et al., on behalf of themselves and a nationwide class of consumers (*Herbert*), filed a complaint against VeriSign, m-Qube, Inc., and other defendants alleging that defendants collectively operate an illegal lottery under the laws of multiple states by allowing viewers of the NBC television show *Deal or No Deal* to incur premium text message charges in order to participate in an interactive television promotion called *Lucky Case Game*. The lawsuit is pending in the U.S. District Court for the Central District of California, Western Division. On June 5, 2007, plaintiffs Cheryl Bentley, et al., on behalf of themselves and a nationwide class of consumers (*Bentley*), filed a complaint against VeriSign, m-Qube, Inc., and other defendants alleging that defendants collectively operate an illegal lottery under the laws of multiple states by allowing viewers of the NBC television show *The Apprentice* to incur premium text message charges in order to participate in an interactive television promotion called *Get Rich With Trump*. The Bentley matter is currently stayed. A motion to dismiss the ruling in Herbert was appealed. On July 8, 2010, the Court of Appeals for the Ninth Circuit dismissed the appeal for lack of jurisdiction and remanded the case to the district court. Certain defendants have asserted indemnity claims against VeriSign in connection with these matters.

Table of Contents

As described in the VeriSign Annual Report on Form 10-K for the year ended December 31, 2009 (the "2009 Annual Report"), filed with the SEC on February 26, 2010, VeriSign has been named as a defendant in litigation brought by the plaintiff Coalition for ICANN Transparency, Inc. (CFIT) asserting claims, among others, under Sections 1 and 2 of the Sherman Antitrust Act (the "Sherman Act") in connection with the .com and .net registry agreements. The Second Amended Complaint, which was filed on December 28, 2006 and remains unanswered, includes a prayer for relief that the 2005 .net and 2006 .com agreements, and their renewal, be enjoined, and for damages, and for such other relief as the court may consider necessary. The claims with respect to the .net agreement have been dismissed by the court, and it is uncertain whether CFIT will further amend the complaint with respect to the dismissed claims based on the .net agreement or with respect to the requested relief. For a history of these proceedings, see the 2009 Annual Report under the heading entitled "Legal Proceedings". On July 9, 2010, the U.S. Court of Appeals for the Ninth Circuit issued an order (the "Amended Order") amending its June 5, 2009 order (the "Original Order"). The Original Order had reversed and remanded the district court's dismissal of the second amended complaint filed by CFIT. The Amended Order denied VeriSign's motion for rehearing and rehearing en banc and stated that CFIT's complaint, assuming its material allegations to be true, plead plausible claims against VeriSign under Sections 1 and 2 of the Sherman Act in connection with the 2006 .com registry agreement. The U.S. Court of Appeals was reviewing matters of law at that stage in the pleadings, and was required to assume that all material allegations were true for purposes of assessing whether a valid claim had been plead. The amended opinion changed in two respects the U.S. Court of Appeal's earlier decision. First, the U.S. Court of Appeals amended its opinion by explaining that, for purposes of reviewing the sufficiency of the complaint, it was not considering the role of the U.S. government in the 2006 .com registry agreement. Second, the amended opinion changed the earlier decision by explaining that "competitive bidding is not required" as a predicate to complying with the antitrust laws. The case has been remanded to the U.S. District Court for the Northern District of California. The District Court has scheduled a trial to begin December 5, 2011, a summary judgment hearing on threshold issues, including standing, the role of the United States government and ICANN, and immunity, as well as CFIT's right to a jury trial, for March 2011 and a final summary judgment hearing for October 2011.

While certain matters to which the Company is a party specify the damages claimed, such claims may not represent reasonably possible losses. Given the inherent uncertainties of the litigation, the ultimate outcome of these matters cannot be predicted at this time, nor can the amount of ultimate loss contingencies, if any, be reasonably estimated, except in circumstances where an aggregate litigation accrual has been recorded for probable and reasonably estimable loss contingencies. A determination of the amount of accrual required, if any, for these contingencies is made after careful analysis of each matter. The required accrual may change in the future due to new developments in each matter or changes in approach such as a change in settlement strategy in dealing with these matters. The Company does not believe that any such matter currently being reviewed will have a material adverse effect on its financial condition or results of operations.

VeriSign is involved in various other investigations, claims and lawsuits arising in the normal conduct of its business, none of which, in its opinion will have a material effect on its business. The Company cannot assure you that it will prevail in any litigation. Regardless of the outcome, any litigation may require the Company to incur significant litigation expense and may result in significant diversion of management attention.

Indemnifications

In connection with the sale of the Authentication Services business to Symantec, the Company has agreed to indemnify Symantec for certain potential legal claims arising from the operation of the Authentication Services business for a period of sixty months after the closing of the sale transaction. The Company's indemnification obligations in this regard are triggered only when indemnifiable claims exceed in the aggregate \$4 million. Thereafter, the Company is obligated to indemnify Symantec for 50% of all indemnifiable claims. The Company's maximum indemnification obligation with respect to these claims is capped at \$125 million. A loss related to this indemnification obligation is neither probable nor reasonably estimable.

Table of Contents

Note 14. Subsequent Events

The Company has a credit facility, maturing on June 7, 2011, which permits cash borrowings up to a maximum of \$500.0 million. On October 27, 2010, the Company notified the Administrative Agent under the credit facility of its intention to terminate the credit facility, effective November 3, 2010.

ITEM 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

You should read the following discussion in conjunction with the interim unaudited Condensed Consolidated Financial Statements and related notes.

This Quarterly Report on Form 10-Q contains forward-looking statements within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended (the "Exchange Act"). These forward-looking statements involve risks and uncertainties, including, among other things, statements regarding our anticipated costs and expenses and revenue mix.

Forward-looking statements include, among others, those statements including the words expects, anticipates, intends, believes and similar language. Our actual results may differ significantly from those projected in the forward-looking statements. Factors that might cause or contribute to such differences include, but are not limited to, those discussed in the section titled "Risk Factors" in Part II, Item 1A of this Quarterly Report on Form 10-Q. You should also carefully review the risks described in other documents we file from time to time with the Securities and Exchange Commission, including the Quarterly Reports on Form 10-Q or Current Reports on Form 8-K that we file in 2010 and our 2009 Form 10-K, which was filed on February 26, 2010, which discuss our business in greater detail. You are cautioned not to place undue reliance on the forward-looking statements, which speak only as of the date of this Quarterly Report on Form 10-Q. We undertake no obligation to publicly release any revisions to the forward-looking statements or reflect events or circumstances after the date of this document.

Overview

VeriSign is one of the world's leading providers of Internet infrastructure services. By leveraging its world-class global infrastructure, VeriSign delivers network confidence and availability for mission-critical Internet services. VeriSign's Naming Services capabilities enable domain name registration through our registrar partners and provide network availability for registrars and Internet users alike.

As a result of the sale of our Authentication Services business, included in our former Internet, Infrastructure and Identity Services segment, we now have the following two reportable segments: (1) Naming Services, which consists of Registry Services and Network Intelligence and Availability ("NIA") Services; and (2) Other Services, which consists of the continuing operations of Content Portal Services ("CPS"), our remaining non-core business.

Registry Services operates the authoritative directory of all .com, .net, .cc, .tv, and .name domain names and the back-end systems for all .jobs and .edu domain names. As of September 30, 2010, we had approximately 103.5 million domain names registered under the .com and .net registries, our principal registries. The number of domain names registered is largely driven by Internet usage and broadband penetration rates, as well as advertising and promotional activities carried out by us and third-party registrars. Although growth in absolute number of registrations remains greatest in mature markets such as the United States ("U.S."), growth on an annual percentage basis is expected to be greatest in markets outside of the U.S. over the long-term. NIA Services provides infrastructure assurance to organizations and is comprised of VeriSign iDefense Security Intelligence Services, Managed Domain Name System Services, and Distributed Denial of Service mitigation. Revenues from NIA Services are not significant.

On August 9, 2010, we sold our Authentication Services business, including outstanding shares of capital stock of VeriSign Japan and trademarks and certain intellectual property used in the Authentication Services business (including our checkmark logo and the Geotrust and thawte brand names), to Symantec for a cash consideration of approximately \$1.14 billion, net of cash held by transferred subsidiaries of \$127.5 million and transaction costs of \$10.8 million. Also included with the sale of the Authentication Services business were real and personal property owned by the Company at our Mountain View facility and other locations. We recorded a

Table of Contents

gain on sale of \$736.5 million, net of tax of \$243.8 million. The divestiture transaction is subject to definitive adjustment to reflect the actual working capital as of the closing date. Current and historical results of operations of the Authentication Services business have been classified as discontinued operations. As a result of the sale of the checkmark logo, VeriSign is in the process of selecting, clearing and adopting a new logo for the Company.

Business Highlights and Trends Three and nine months ended September 30, 2010

We recorded revenues of \$172.7 million and \$503.8 million during the three and nine months ended September 30, 2010, an increase of 10% and 9%, respectively, as compared to the same periods last year. The increase was primarily due to a 9% year-over-year increase in active domain names ending in .com and .net and fee increases in our .com and .net registry fees in October 2008 and July 2010.

We recorded income from continuing operations attributable to VeriSign, Inc. stockholders of \$44.8 million and \$100.8 million during the three and nine months ended September 30, 2010, respectively, an increase of 114% and 71%, respectively, as compared to the same periods last year.

On August 9, 2010, we sold our Authentication Services business to Symantec for cash consideration of approximately \$1.14 billion, net of cash held by transferred subsidiaries of \$127.5 million and transaction costs of \$10.8 million. We recorded a gain on sale of \$736.5 million, net of tax of \$243.8 million.

On July 27, 2010, the Board of Directors authorized the repurchase of up to approximately \$1.1 billion of our common stock, in addition to the \$393.6 million of our common stock remaining available for repurchase under the previous 2008 Share Buyback Program, for a total repurchase of up to \$1.5 billion of our common stock (collectively, the 2010 Share Buyback Program). We repurchased 5.1 million and 15.3 million shares of our common stock for an aggregate cost of \$145.5 million and \$423.5 million during the three and nine months ended September 30, 2010, respectively.

We purchased marketable securities of \$52.3 million and \$714.6 million and sold marketable securities of \$39.1 million and \$226.7 million during the three and nine months ended September 30, 2010, respectively.

We generated cash flows from operating activities of \$168.5 million during the nine months ended September 30, 2010, a decrease of 24% as compared to the same period last year. The decrease was primarily due to a decrease in income tax payable upon the gain resulting from the sale of the Authentication Services business, by utilizing carried forward excess tax benefits from exercises of stock options and other employee stock purchases.

Table of Contents**Results of Operations**

The following table presents information regarding our results of operations as a percentage of revenues:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
Revenues	100%	100%	100%	100%
Costs and expenses:				
Cost of revenues	23	27	24	28
Sales and marketing	11	13	13	12
Research and development	8	8	8	9
General and administrative	20	23	20	24
Restructuring, impairment and other charges, net	4	7	3	3
Total costs and expenses	66	78	68	76
Operating income	34	22	32	24
Other loss, net	(4)	(6)	(4)	(5)
Income from continuing operations before income taxes	30	16	28	19
Income tax expense	(4)	(3)	(8)	(6)
Income from continuing operations, net of tax	26	13	20	13
Income from discontinued operations, net of tax	429	21	154	21
Net income	455	34	174	34
Less: Income from discontinued operations, net of tax, attributable to noncontrolling interest in subsidiary			(1)	(1)
Net income attributable to VeriSign, Inc. stockholders	455%	34%	173%	33%

Revenues

We have two reportable segments: Naming Services and Other Services. A comparison of revenues is presented below:

	Three Months Ended September 30,			Nine Months Ended September 30,		
	2010	% Change	2009	2010	% Change	2009
	(Dollars in thousands)			(Dollars in thousands)		
Naming Services	\$ 172,286	11%	\$ 155,480	\$ 501,750	10%	\$ 457,206
Other Services	363	(73%)	1,327	2,077	(42%)	3,591
Total revenues	\$ 172,649	10%	\$ 156,807	\$ 503,827	9%	\$ 460,797

Naming Services

Edgar Filing: VERISIGN INC/CA - Form 10-Q

Revenues related to our Naming Services are primarily derived from registrations for domain names in the *.com*, *.net*, *.cc*, *.tv*, *.name* and *.jobs* domain name registries. Revenues from *.cc*, *.tv*, *.name* and *.jobs* are not significant. For domain names registered with the *.com* and *.net* registries, we receive a fee from third-party registrars per annual registration that is fixed pursuant to our agreements with Internet Corporation for Assigned Names and Numbers (ICANN). Individual customers, called registrants, contract directly with third-party registrars or their resellers, and the third-party registrars in turn register the *.com*, *.net*, *.cc*, *.tv*, *.name* and *.jobs* domain names with VeriSign. Changes in revenues are driven largely by increases in the number of new domain name registrations and the renewal rate for existing registrations, in each case as impacted by continued Internet growth, promotional programs, marketing expenditure by third-party registrars, as well as fee increases as permitted under our agreements with ICANN. On July 1, 2010, we increased our *.com* domain name registration

Table of Contents

fees by 7% from \$6.86 to \$7.34. We have the contractual right to increase the fees for .com domain name registrations up to 7% either in 2011 or in 2012 prior to the end of the current agreement with ICANN on November 30, 2012. On July 1, 2010, we increased our .net domain name registration fees by 10% from \$4.23 to \$4.65. We have the contractual right to increase the fees for .net domain name registrations up to 10% in 2011 prior to the end of the current agreement with ICANN on June 30, 2011. We offer promotional marketing programs for our registrars based upon market conditions and the business environment in which the registrars operate. We are largely insulated from the risk posed by fluctuations in exchange rates due to the fact that all revenues paid to us for .com and .net registrations are in U.S. dollars.

The following table presents the year-over-year change in active domain names ending in .com and .net managed by our Naming Services business:

	September 30, 2010	% Change	September 30, 2009
Active domain names ending in .com and .net	103.5 million	9%	94.9 million

The growth in the number of active domain names was primarily driven by continued Internet growth and new domain name promotional programs. We expect to see continued growth in the number of active domain names in 2010 as a result of further Internet growth. In addition, we expect to see continued growth internationally in both .com and .net domain name bases, especially in markets that we have targeted through our promotional programs. We expect Naming Services revenues to increase in fiscal 2010 as compared to fiscal 2009 as a result of continued growth in the number of active domain names ending in .com and .net and implementation of the fee increase which became effective in July 2010.

Our Naming Services revenues increased by \$16.8 million and \$44.5 million during the three and nine months ended September 30, 2010, respectively, as compared to the same periods last year, primarily due to a 9% year-over-year increase in the number of domain names ending in .com and .net and increases in our .com and .net registry fees in October 2008 and July 2010 as per our agreements with ICANN. The increase in Naming Services revenues for the nine months ended September 30, 2010, was partially offset by a \$7.6 million decrease in revenues from a one-time project completed during the nine months ended September 30, 2009.

Our expectations and trends are based on what we observe and can project with regard to the current macro-economic environment. Our outlook is subject to broader changes in the market and could change significantly over time.

Geographic Revenues

We operate in the U.S.; Australia, China, India and other Asia Pacific countries (APAC); Europe, the Middle East and Africa (EMEA); and certain other countries including Canada and Latin American countries.

The following table presents a comparison of our geographic revenues:

	Three Months Ended September 30, 2010 % Change 2009 (Dollars in thousands)			Nine Months Ended September 30, 2010 % Change 2009 (Dollars in thousands)		
U.S.	\$ 105,654	8%	\$ 97,975	\$ 309,224	5%	\$ 293,918
APAC	26,500	17%	22,629	76,359	19%	64,083
EMEA	23,420	14%	20,585	68,147	18%	57,869
Other	17,075	9%	15,618	50,097	12%	44,927
Total revenues	\$ 172,649		\$ 156,807	\$ 503,827		\$ 460,797

Table of Contents

Revenues are generally attributed to the country of domicile and the respective regions in which our customers are located.

Revenues from each of the respective regions increased during the three and nine months ended September 30, 2010, as compared to the same periods last year, primarily driven by an increase in the number of domain names ending in *.com* and *.net* and increases in our *.com* and *.net* registry fees in October 2008 and July 2010. The increase in the number of domain names ending in *.com* and *.net* was driven by continued Internet growth and new domain name promotional programs. During the nine months ended September 30, 2010, the increase in U.S. revenues was partially offset by a decrease of \$7.6 million related to a one-time project completed during the nine months ended September 30, 2009.

Mature markets such as the U.S., where broadband and e-commerce have seen strong market penetration, are expected to see decreasing incremental growth rates reflecting the maturing of these markets. We expect to see larger increases in certain other international regions, resulting from greater broadband and Internet penetration and expanding e-commerce.

Cost of revenues

Cost of revenues consist primarily of salaries and employee benefits expenses for our personnel that manage the operational systems, depreciation expenses, operational costs associated with the delivery of our services, registry fees, customer support and training, consulting and development services, costs of facilities and computer equipment used in these activities, and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

A comparison of cost of revenues is presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2010	% Change	2009	2010	% Change 2009
	(Dollars in thousands)				
Cost of revenues	\$ 40,266	(4%)	\$ 42,159	\$ 120,588	(8%) \$ 130,380

Cost of revenues decreased during the three months ended September 30, 2010, as compared to the same period last year, primarily due to decreases in allocated overhead expenses and occupancy expenses, partially offset by an increase in telecommunication expenses. Allocated overhead expenses decreased by \$3.0 million, primarily due to a decrease in allocable indirect costs and a decrease in proportional headcount within the cost of revenues function. Occupancy expenses decreased by \$1.0 million, primarily due to the purchase in December 2009 of a previously leased facility, management's cost-saving initiatives to reduce overall utility expenses, and the elimination of certain shared services utility expenses as a result of the sale of the Authentication Services business. Telecommunication expenses increased by \$1.6 million, primarily due to an increase in colocation expenses and additional circuits required to support the increase in our network infrastructure.

Cost of revenues decreased during the nine months ended September 30, 2010, as compared to the same period last year, primarily due to decreases in allocated overhead expenses, occupancy expenses, direct cost of revenues, expenses related to the CPS business, and contract and professional services expenses, partially offset by increases in telecommunication expenses, salary and employee benefits expenses and depreciation expenses. Allocated overhead expenses decreased by \$11.0 million, primarily due to a decrease in allocable indirect costs and a decrease in proportional headcount within the cost of revenues function. Occupancy expenses decreased by \$1.8 million, primarily due to the purchase in December 2009 of a previously leased facility, management's cost-saving initiatives to reduce overall utility expenses, and the elimination of certain shared services utility expenses as a result of the sale of the Authentication Services business. Direct cost of revenues decreased by \$1.7 million, primarily due to a decrease associated with a one-time revenue project completed during the nine months ended September 30, 2009, partially offset by an increase in ICANN registry fees resulting from a fee increase effective

Table of Contents

July 2009. Expenses related to our CPS business decreased by \$1.4 million, primarily as a result of winding down the business. Contract and professional services expenses decreased by \$1.4 million, primarily due to a decrease in services of outside contractors and the conversion of contractors to employees. Telecommunication expenses increased by \$3.0 million, primarily due to an increase in colocation expenses and additional circuits required to support the increase in our network infrastructure. Salary and employee benefits expenses increased by \$2.7 million, primarily due to an increase in average headcount. Depreciation expenses increased by \$2.0 million, primarily due to an increase in capitalized hardware and software to support investments in our infrastructure.

We expect cost of revenues as a percentage of revenues to remain consistent during the remainder of fiscal 2010 and in 2011 as compared to the nine months ended September 30, 2010.

Sales and marketing

Sales and marketing expenses consist primarily of salaries, sales commissions, sales operations and other personnel-related expenses, travel and related expenses, trade shows, costs of lead generation, costs of computer and communications equipment and support services, facilities costs, consulting fees, costs of marketing programs, such as the Internet, television, radio, print and direct mail advertising costs, and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

A comparison of sales and marketing expenses is presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,		
	2010	% Change	2009	2010	% Change
	(Dollars in thousands)				
Sales and marketing	\$ 18,450	(10%)	\$ 20,545	\$ 63,080	15%
				\$ 54,620	

Sales and marketing expenses decreased during the three months ended September 30, 2010, as compared to the same period last year, primarily due to decreases in contract and professional services expenses and allocated overhead expenses. Contract and professional services expenses decreased by \$1.8 million, primarily due to certain market strategy and international marketing initiatives costs during the three months ended September 30, 2009. Allocated overhead expenses decreased \$1.6 million, primarily due to a decrease in allocable indirect costs and a decrease in proportional headcount within the sales and marketing function.

Sales and marketing expenses increased during the nine months ended September 30, 2010, as compared to the same period last year, primarily due to increases in advertising and marketing expenses and salary and employee benefits expenses, partially offset by a decrease in allocated overhead expenses. Advertising and marketing expenses increased by \$7.7 million, primarily due to certain corporate and Registry Services related advertising and marketing campaigns in 2010. Salary and employee benefits expenses increased by \$3.1 million, primarily due to an increase in average headcount which will primarily support the expansion of the NIA business. Allocated overhead expenses decreased by \$2.9 million, primarily due to a decrease in allocable indirect costs and a decrease in proportional headcount within the sales and marketing function as a result of the sale of the Authentication Services business and other divestitures in 2009.

We expect sales and marketing expenses as a percentage of revenues to remain consistent during the remainder of fiscal 2010 as compared to the nine months ended September 30, 2010.

Research and development

Research and development expenses consist primarily of costs related to research and development personnel, including salaries and other personnel-related expenses, consulting fees, the cost of facilities, computer and communications equipment, support services used in our service and technology development, and allocations of indirect costs such as corporate overhead. All allocations of indirect costs are included in continuing operations.

Table of Contents

A comparison of research and development expenses is presented below:

	Three Months Ended September 30, 2010		2009		Nine Months Ended September 30, 2010		2009	
		% Change				% Change		
	(Dollars in thousands)							
Research and development	\$ 14,537	10%	\$ 13,245	\$ 40,731	2%	\$ 40,050		

Research and development expenses increased during the three months ended September 30, 2010, as compared to the same period last year, primarily due to an increase in salary and employee benefits expenses. Salary and employee benefits expenses increased by \$1.8 million, primarily due to an increase in average headcount to support new projects within our Registry and NIA Services.

Research and development expenses increased during the nine months ended September 30, 2010, as compared to the same period last year, primarily due to increases in salary and employee benefits expenses, and stock-based compensation expenses, partially offset by a decrease in allocated overhead expenses and an increase in capitalized labor. Salary and employee benefits expenses increased by \$5.2 million, primarily due to an increase in average headcount to support new projects within our Registry and NIA Services. Stock-based compensation expenses increased by \$1.4 million, primarily due to new grants of stock awards in 2010, an increase in average headcount and increases in Employee Stock Purchase Plan contributions in 2010. Allocated expenses decreased by \$2.7 million, primarily due to a decrease in allocable indirect costs. Capitalized labor increased by \$1.7 million, primarily due to an increase in internally developed software projects.

We expect research and development expenses as a percentage of revenues to remain consistent during the remainder of fiscal 2010 and in 2011 as compared to the nine months ended September 30, 2010.

General and administrative

General and administrative expenses consist primarily of salaries and other personnel-related expenses for our executive, administrative, legal, finance, information technology and human resources personnel, facilities, computer and communications equipment, management information systems, support services, professional services fees, certain tax and license fees, and bad debt expense, offset by allocations of indirect costs such as facilities and shared services expenses to other cost types. All allocations of indirect costs are included in continuing operations.

A comparison of general and administrative expenses is presented below:

	Three Months Ended September 30, 2010		2009		Nine Months Ended September 30, 2010		2009	
		% Change				% Change		
	(Dollars in thousands)							
General and administrative	\$ 33,644	(5%)	\$ 35,315	\$ 101,624	(9%)	\$ 111,196		

General and administrative expenses decreased during the three months ended September 30, 2010, as compared to the same period last year, primarily due to decreases in contract and professional services expenses, depreciation expenses, legal expenses, telecommunication expenses, and miscellaneous general and administrative expenses, partially offset by a decrease in overhead expenses allocated to other cost types and an increase in stock-based compensation expenses. Contract and professional services expenses decreased by \$2.5 million, primarily due to a decrease in professional services costs incurred in 2009 for accounting and auditing services related to our divestiture strategy, as well as a reduction in the use of outside contractors. Depreciation expenses decreased by \$1.6 million, primarily due to certain capital software projects being fully depreciated prior to 2010 and ceasing further depreciation on corporate assets held for sale in May 2010, the results of operations of which were classified as continuing operations until the third quarter of 2010. Legal expenses decreased by \$1.5 million, primarily as a result of receiving insurance reimbursements in excess of litigation expenses related to a certain legal matter. Telecommunication expenses decreased by \$1.4 million, primarily due

Table of Contents

to a reduction in circuits required to support the business as a result of the divestitures of certain businesses. Miscellaneous general and administrative expenses decreased by \$1.2 million, primarily due to a release of an accrual for certain non-income tax contingencies during the three months ended September 30, 2010 when the statute of limitations expired. Overhead expenses allocated to other cost types decreased by \$5.0 million, primarily due to a decrease in allocable indirect costs and proportionately higher headcount in the general and administrative function. Stock-based compensation expenses increased by \$1.0 million, primarily due to a forfeiture true-up related expense reversal adjustment during the three months ended September 30, 2009.

General and administrative expenses decreased during the nine months ended September 30, 2010, as compared to the same period last year, primarily due to decreases in contract and professional services expenses, telecommunication expenses, miscellaneous general and administrative expenses, salary and employee benefits expenses, depreciation expenses, legal expenses, and equipment and software expenses, partially offset by a decrease in overhead expenses allocated to other cost types. Contract and professional services expenses decreased by \$7.8 million, primarily due to a decrease in professional services costs incurred in 2009 for accounting and auditing services related to our divestiture strategy, as well as a reduction in the use of outside contractors. Telecommunication expenses decreased by \$4.9 million, primarily due to reduction in circuits required to support the business as a result of the divestitures and a one-time minimum commitment short-fall expense recorded during the three months ended March 31, 2009. Miscellaneous general and administrative expenses decreased by \$4.1 million, primarily due to a refund during the three months ended March 31, 2010 of previously expensed non-income tax payment, an adjustment of certain expense accruals during the three months ended June 30, 2010, a release of an accrual for certain non-income tax contingencies during the three months ended September 30, 2010, when the statute of limitations expired, and certain asset write-offs during the three months ended June 30, 2009. Salary and employee benefits expenses decreased by \$3.5 million, primarily due to a decrease in average headcount. Depreciation expenses decreased by \$3.3 million, primarily due to certain capital software projects being fully depreciated prior to 2010 and ceasing further depreciation on corporate assets held for sale in May 2010, the results of operations of which were classified as continuing operations until the third quarter of 2010. Legal expenses decreased by \$2.1 million, primarily as a result of receiving insurance reimbursements in excess of litigation expenses related to a certain legal matter and a reduction in overall legal fees. Equipment and software expenses decreased by \$1.7 million, primarily due to management's cost savings initiatives and a reduction in overall equipment and software to support continuing operations. Overhead expenses allocated to other cost types decreased by \$16.0 million, primarily due to a decrease in allocable indirect costs and proportionately higher headcount in the general and administrative function.

We expect general and administrative expenses as a percentage of revenues to remain consistent during the remainder of fiscal 2010 as compared to the nine months ended September 30, 2010, primarily as a result of our obligation to support the transition services related to the sale of the Authentication Services business. We expect general and administrative expenses as a percentage of revenues to decrease in 2011 as compared to the nine months ended September 30, 2010, as these transition services are completed in 2011.

Restructuring Charges

The following table presents the nature of our restructuring charges:

	Three Months Ended September 30, 2010		Nine Months Ended September 30, 2010	
	2010	2009	2010	2009
	(In thousands)			
Workforce reduction	\$ 15,295	\$ 2,648	\$ 28,846	\$ 9,351
Excess facilities	374	142	482	1,535
Total consolidated restructuring charges	\$ 15,669	\$ 2,790	\$ 29,328	\$ 10,886
Amounts classified as continuing operations	\$ 6,303	\$ 341	\$ 14,141	\$ 3,643
Amounts classified as discontinued operations	\$ 9,366	\$ 2,449	\$ 15,187	\$ 7,243

Table of Contents

In connection with the sale of the Authentication Services business, we initiated a restructuring plan in the second quarter of 2010 (the 2010 Restructuring Plan) including workforce reduction, abandonment of excess facilities and other exit costs. In July 2010, we expanded the 2010 Restructuring Plan to include migration of our corporate functions from our Mountain View facility to our facility in Dulles, Virginia, upon the closing of the sale of the Authentication Services business, including further workforce reductions, abandonment of excess facilities and other exit costs.

Under the expanded 2010 Restructuring Plan, we will incur total estimated pre-tax cash charges of \$22.3 million in severance costs and other related employee termination costs. Through September 30, 2010, we recorded a total of \$17.9 million in cash restructuring charges, inclusive of amounts for discontinued operations, under our 2010 Restructuring Plan, related to employee terminations. We expect to recognize excess facility exit costs in the range of \$14.2 million to \$16.9 million. Additionally we recognized stock-based compensation expenses of \$9.1 million, inclusive of amounts for discontinued operations, during the three months ended September 30, 2010, upon acceleration of stock-based awards for employees notified of termination and expect to recognize further expenses for employees to be terminated in the future. However, at this time, we are not able, in good faith, to make a determination of the estimated amount or range of amounts thereon. We expect to recognize all remaining cash and stock-based restructuring charges over the next several quarters through the end of fiscal 2011.

Impairments and Other Charges

In 2009, we recorded an impairment charge of \$9.7 million related to our .name generic top level domain (.gTLD) intangible asset and a reversal of impairment charges of \$0.8 million related to property and equipment of our CPS business that was previously classified as a disposal group held for sale and subsequently reclassified as held and used in 2009.

Other loss, net

Other loss, net, consists primarily of interest and dividend income earned on our cash, cash equivalents, and investments, interest expense related to our borrowings, net gains or losses on the sale and impairment of investments, net gains or losses on the divestiture of certain businesses, unrealized gains and losses on the contingent interest derivative on the convertible debentures, income from transition services agreements, and the net effect of foreign currency gains and losses. Net gains or losses on the sale and impairment of investments, net gains or losses on the divestiture of certain businesses and the net effect of foreign currency gains and losses are included in Other, net, in the table below.

A comparison of other loss, net is presented below:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Interest and dividend income	\$ 1,908	\$ 533	\$ 5,047	\$ 2,108
Interest expense	(12,140)	(11,867)	(36,104)	(35,477)
Unrealized (loss) gain on the contingent interest derivative on convertible debentures	(625)	750	1,125	1,799
Income from transition services agreements	3,020	1,230	6,898	3,068
Other, net	337	298	258	4,013
Total other loss, net	\$ (7,500)	\$ (9,056)	\$ (22,776)	\$ (24,489)

Other loss, net, decreased during the three months ended September 30, 2010, as compared to the same period last year, primarily due to increases in interest and dividend income and income from transition services agreements, partially offset by an unrealized loss recorded on the contingent interest derivative. Interest and

Table of Contents

dividend income increased, primarily as a result of investing in marketable securities which have higher interest rates in 2010 as compared to money market funds. Income from transition services agreements increased primarily due to transition services provided to the buyer of the Authentication Services business.

Other loss, net, decreased during the nine months ended September 30, 2010, as compared to the same period last year, primarily due to increases in interest and dividend income and income from transition services agreements, partially offset by decreases in Other, net. Interest and dividend income increased, primarily as a result of investing in marketable securities which have higher interest rates in 2010 as compared to money market funds. Income from transition services agreements increased, primarily due to transition services provided to the buyers of certain divested businesses. During the nine months ended September 30, 2009, Other, net, includes \$3.3 million received from Certicom Corporation (Certicom) due to the termination of the acquisition agreement entered into with Certicom.

Income taxes

The following table presents the income tax expense from continuing operations and the effective tax rates:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(Dollars in thousands)			
Income tax expense from continuing operations	\$ 7,193	\$ 4,132	\$ 40,098	\$ 26,944
Effective tax rate	14%	17%	28%	31%

The effective tax rate for the three and nine months ended September 30, 2010, differs from the statutory federal rate of 35% due to state taxes, the effect of non-U.S. operations, non-deductible stock-based compensation expense, tax benefits from foreign income taxed at lower rates, discrete tax benefits related to lapses of statutes of limitation, and a one-time discrete tax expense related to a change in tax status in a foreign jurisdiction due to the sale of the Authentication Services business. The effective tax rate for the three and nine months ended September 30, 2009, differs from the statutory federal rate of 35% due to state taxes, the effect of non-U.S. operations, non-deductible stock-based compensation expense, discrete tax benefits related to lapses of statutes of limitation, and a one-time discrete income tax benefit related to a California tax law change. As of September 30, 2010, we plan to continue with our policy of permanently reinvesting all foreign earnings.

Income from Discontinued operations, net of tax

Income from discontinued operations for the three and nine months ended September 30, 2010, represents the results of operations of the Authentication Services business, the gain on sale of the Authentication Services business, and adjustments to gains or losses on divestitures completed in fiscal 2009, as a result of certain one-time employment termination costs and settlement of certain retained litigation of the divested businesses. Income from discontinued operations for the three and nine months ended September 30, 2009, represents the results of operations of the Authentication Services business, results of operations of businesses divested in fiscal 2009, and gains or losses on completed divestitures.

For a period of time, we will continue to generate cash flows and will report income statement activity in continuing operations that are associated with the Authentication Services business and certain other completed divestitures. These activities are transitional in nature and generally result from agreements ensuring and facilitating the orderly transfer of business operations. The nature, magnitude and duration of the agreements vary depending on the specific circumstances of the service, location or business need. The agreements can include the following: data center hosting, logistics, customer service, support of financial processes, procurement, human resources, facilities management, data collection and information services. The existing agreements typically have terms from 1 to 24 months in length and are currently at various stages within their original term.

Table of Contents

The following table presents the revenues and the components of income from discontinued operations, net of tax, attributable to VeriSign stockholders:

	Three Months Ended September 30,		Nine Months Ended September 30,	
	2010	2009	2010	2009
	(In thousands)			
Revenues	\$ 42,971	\$ 141,732	\$ 246,663	\$ 521,793
Income from discontinued operations before income taxes	\$ 4,666	\$ 34,443	\$ 63,916	\$ 152,164
Net gains on sale of discontinued operations before income taxes	980,255	18,307	979,292	43,828
Income tax expense	(244,132)	(19,051)	(269,638)	(98,955)
Income from discontinued operations, net of tax	740,789	33,699	773,570	97,037
Less: Income from discontinued operations, net of tax, attributable to noncontrolling interest in subsidiary	(642)	(988)	(2,887)	(2,381)
Total income from discontinued operations, net of tax, attributable to VeriSign stockholders	\$ 740,147	\$ 32,711	\$ 770,683	\$ 94,656

We recognized carried forward excess tax benefits from exercises of stock options and other employee stock purchases of \$154.1 million during the three months ended September 30, 2010, to reduce income tax payable upon the gain resulting from the sale of the Authentication Services business.

Liquidity and Capital Resources

	September 30, 2010	December 31, 2009
	(In thousands)	
Cash and cash equivalents	\$ 2,060,195	\$ 1,477,166
Marketable securities	488,948	185
Total	\$ 2,549,143	\$ 1,477,351

As of September 30, 2010, our principal source of liquidity was \$2.1 billion of cash and cash equivalents and \$488.9 million of marketable securities. In summary, our cash flows for the nine months ended September 30, 2010 and 2009 are as follows:

	Nine Months Ended September 30,	
	2010	2009
	(In thousands)	
Net cash provided by operating activities	\$ 168,479	\$ 222,042
Net cash provided by investing activities	616,784	330,712
Net cash (used in) provided by financing activities	(211,334)	81,694
Effect of exchange rate changes on cash and cash equivalents	9,100	8,790
Net increase in cash and cash equivalents	\$ 583,029	\$ 643,238

Cash flows from operating activities

Our largest source of operating cash flows is cash collections from our customers. Our primary uses of cash from operating activities are for personnel related expenditures, and other general operating expenses, including payments related to taxes and facilities.

Table of Contents

Net cash provided by operating activities decreased, primarily due to a decrease in cash received from customers resulting from a decrease in consolidated revenues, inclusive of revenues from discontinued operations, timing of receipts from customers during the nine months ended September 30, 2010 and a decrease in income tax payable upon the gain resulting from the sale of the Authentication Services business, by utilizing carried forward excess tax benefits from exercises of stock options and other employee stock purchases. The decrease is partially offset by a decrease in cash payments to suppliers and employees, primarily resulting from the completion of our divestitures in 2009, the divestiture of the Authentication Services business in August 2010 and lower average headcount.

Cash flows from investing activities

The changes in cash flows from investing activities primarily relate to the divestiture of businesses, timing of purchases, maturities and sales of investments, and purchases of property and equipment.

Net cash provided by investing activities increased, primarily due to net proceeds received from the divestiture of the Authentication Services business in August 2010 and maturities and sales of marketable securities during the nine months ended September 30, 2010, partially offset by purchases of marketable securities during the nine months ended September 30, 2010.

Cash flows from financing activities

The changes in cash flows from financing activities primarily relate to stock repurchases, and stock option exercise activities.

Net cash used in financing activities increased, primarily due to an increase in stock repurchases during the nine months ended September 30, 2010. The increase is partially offset by an increase in excess tax benefits from exercises of stock options and employee stock purchases and an increase in proceeds received from issuance of common stock from stock option exercises and employee stock purchase plan.

Other Liquidity and Capital Resources Information

Our credit facility, which matures on June 7, 2011, permits cash borrowings up to a maximum of \$500.0 million. As of September 30, 2010, we had no outstanding borrowings under our credit facility. On October 27, 2010, the Company notified the Administrative Agent under the credit facility of its intention to terminate the credit facility, effective November 3, 2010.

As of September 30, 2010, our principal source of liquidity was \$2.1 billion of cash and cash equivalents, including \$1.14 billion in net cash we received from the sale of the Authentication Services business, and \$488.9 million of marketable securities. The marketable securities consist of debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, and corporate debt securities meeting the criteria of our investment policy, which is focused on the preservation of our capital through investment in investment grade securities. The cash equivalents consist mainly of time deposits and amounts deposited in money market funds. As of September 30, 2010, \$505.2 million of marketable securities were invested in fixed income securities, of which \$85.9 million had maturities within one year and \$419.3 million had maturities between one and three years. Our cash and cash equivalents are readily accessible. For additional information on our investment portfolio, see Note 2, Cash, Cash Equivalents, and Marketable Securities, of our Notes to Condensed Consolidated Financial Statements in this Quarterly Report on Form 10-Q, and for a discussion of market risk associated with our investment portfolio, see Item 3, Quantitative and Qualitative Disclosures about Market Risk, *Interest Rate Sensitivity*, in this Quarterly Report on Form 10-Q.

We believe existing cash and cash equivalents, together with funds generated from operations should be sufficient to meet our working capital, capital expenditure requirements and to service our debt for the next 12 months. We regularly assess our cash management approach and activities in view of our current and potential future needs.

Table of Contents**ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK**

There have been no significant changes in our market risk exposures since December 31, 2009, except as noted below:

Interest rate sensitivity

We invest in a variety of securities, including money market funds, debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, and corporate debt securities. The primary objective of our short-term investment management activities is to preserve principal with the additional goals of maintaining appropriate liquidity and earning an after-tax return commensurate with the risks associated in each portfolio. We manage our interest rate risk by maintaining an investment portfolio generally consisting of debt instruments of high credit quality. We monitor our interest rate and credit risks, including our credit exposures to specific rating categories and to individual issuers. We invest in investment grade marketable fixed income securities.

In general, money market funds are not considered to be subject to interest rate risk because the interest paid on such funds fluctuates with the prevailing interest rate. Notwithstanding our efforts to manage interest rate risks, there can be no assurance that we will be adequately protected against risks associated with interest rate fluctuations. At any time, a sharp change in interest rates could have a significant impact on the fair value of our investment portfolio. The following table presents the hypothetical changes in fair value of our fixed income securities in our short-term investment portfolio as of September 30, 2010, arising from potential changes in interest rates. The modeling technique estimates the change in fair value from immediate hypothetical parallel shifts in the yield curve of plus or minus 50 basis points (BPS), 100 BPS, and 150 BPS.

	Valuation of Securities Given an Interest Rate Decrease of X Basis Points			Fair Value As of September 30, 2010 (In thousands)	Valuation of Securities Given an Interest Rate Increase of X Basis Points		
	(150 BPS)	(100 BPS)	(50 BPS)		50 BPS	100 BPS	150 BPS
Fixed income securities	\$ 517,824	\$ 513,612	\$ 509,399	\$ 505,187	\$ 500,975	\$ 496,763	\$ 492,551

ITEM 4. CONTROLS AND PROCEDURES

Based on our management's evaluation, with the participation of our Chief Executive Officer (our principal executive officer) and our Chief Financial Officer (our principal financial officer), as of the end of the period covered by this Quarterly Report on Form 10-Q, our principal executive officer and principal financial officer have concluded that our disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e) under the Exchange Act) are effective to ensure that information required to be disclosed by us in reports that we file or submit under the Exchange Act is recorded, processed, summarized and reported within the time periods specified in SEC rules and forms and is accumulated and communicated to our management, including our principal executive officer and principal financial officer, as appropriate, to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

There was no change in our internal control over financial reporting (as such term is defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the three months ended September 30, 2010 that has materially affected, or is reasonably likely to materially affect, the Company's internal control over financial reporting.

Inherent Limitations of Disclosure Controls and Internal Control Over Financial Reporting

Because of its inherent limitations, our internal control over financial reporting may not prevent material errors or fraud. A control system, no matter how well conceived and operated, can provide only reasonable, not absolute, assurance that the objectives of the control system are met. The continued effectiveness of our internal control over financial reporting is subject to risks, including that the control may become inadequate because of changes in conditions or that the degree of compliance with our policies or procedures may deteriorate.

Table of Contents

PART II OTHER INFORMATION

ITEM 1. LEGAL PROCEEDINGS

The information set forth under Legal Proceedings in Note 13, Contingencies, of our Notes to Condensed Consolidated Financial Statements in Part I, Item 1, of this Quarterly Report on Form 10-Q is incorporated herein by reference.

ITEM 1A. RISK FACTORS

In addition to other information in this Form 10-Q, the following risk factors should be carefully considered in evaluating us and our business because these factors currently have a significant impact or may have a significant impact on our business, operating results or financial condition. Actual results could differ materially from those projected in the forward-looking statements contained in this Form 10-Q as a result of the risk factors discussed below and elsewhere in this Form 10-Q and in other filings we make with the SEC.

Risks relating to our business

Our operating results may fluctuate and our future revenues and profitability are uncertain.

Our operating results have varied in the past and may fluctuate significantly in the future as a result of a variety of factors, many of which are outside our control. These factors include the following:

the current global economic environment as well as its impact on e-commerce, financial services, and the communications and Internet industries;

volume of new domain name registrations and customer renewals in our Naming Services business;

the long sales and implementation cycles for, and potentially large order sizes of, some of our services and the timing and execution of individual customer contracts;

changes in the payment structures of on-line advertising network providers and compensation levels, as well as policies proposed and implemented by ICANN, which could impact the number of domain name registrations;

our success in direct marketing, and the scope and success of marketing efforts by third-party registrars in the case of our Naming Services business, and market acceptance of our services by our existing customers and by new customers;

customer renewal rates and turnover of customers of our services;

continued development of our direct and indirect distribution channels for our products and services, both in the U.S. and abroad;

Edgar Filing: VERISIGN INC/CA - Form 10-Q

the impact of price changes in our products and services or our competitors' products and services;

the impact of decisions by distributors to offer competing products or modify or cease their marketing practices;

seasonal fluctuations in business activity;

changes in marketing expenses related to promoting and distributing our services or changes in marketing expenses related to promoting and distributing services provided by third-party registrars;

potential attacks by hackers, which could threaten the perceived reliability of our products and services;

changes in the level of spending for information technology-related products and services by enterprise customers; and

Table of Contents

the uncertainties, costs and risks as a result of the sale of our Authentication Services business, including any income statement charges we incur in connection therewith and costs related to our transition services agreements and any retained liability related to existing and future claims or retained litigation.

Our operating expenses may increase. If an increase in our expenses is not accompanied by a corresponding increase in our revenues, our operating results will suffer, particularly as revenues from some of our services are recognized ratably over the term of the service, rather than immediately when the customer pays for them, unlike our sales and marketing expenditures, which are expensed in full when incurred.

Due to all of the above factors, our revenues and operating results are difficult to forecast. Therefore, we believe that period-to-period comparisons of our operating results will not necessarily be meaningful, and you should not rely upon them as an indication of future performance. Also, operating results may fall below our expectations and the expectations of securities analysts or investors in one or more future periods. If this were to occur, the market price of our common stock would likely decline.

Our operating results may continue to be adversely affected by the current economic environment, unfavorable market and economic conditions.

The current global economic environment may continue to have a negative impact on demand for our services, our business and our foreign operations. The economic environment has or may negatively impact, among other things:

our customers' continued growth and development of their businesses and our customers' ability to continue as going concerns;

the ability of our customers to maintain their businesses;

current and future demand for our services, including decreases as a result of reduced spending on information technology and communications by our customers;

price competition for our products and services;

the price of our common stock;

our liquidity;

our ability to service our debt, to obtain financing or assume new debt obligations;

our ability to obtain payment for outstanding debts owed to us by our customers or other parties with whom we do business; and

our ability to execute on any stock repurchase plans.

In addition, to the extent that the economic environment impacts specific industry and geographic sectors in which many of our customers are concentrated, that may further negatively impact our business. If the economic and market conditions in the U.S. and globally do not improve, or if they further deteriorate, we may experience material adverse impacts on our business, operating results and financial position as a consequence of the above factors or otherwise.

We may experience significant fluctuations in our financial results.

The successful operation of our business depends on numerous factors, many of which are not entirely under our control, including, but not limited to, the following:

the use of the Internet and other IP networks, and the extent to which domain names are used for e-commerce and communications;

growth in demand for our services;

Table of Contents

the competition for any of our services;

the perceived security of e-commerce and communications over the Internet and other IP networks;

the perceived security of our services, technology, infrastructure and practices;

the loss of customers through industry consolidation or customer decisions to deploy in-house or competitor technology and services;

our continued ability to maintain our current, and enter into additional, strategic relationships;

our ability to successfully market our services to new and existing customers;

our success in attracting, integrating, training, retaining and motivating qualified personnel;

our response to competitive developments;

the successful introduction, and acceptance by our customers, of new products and services, including our NIA Services;

seasonal fluctuations in business activity; and

the successful introduction of enhancements to our services to address new technologies and standards and changing market conditions.

Issues arising from our agreements with ICANN and the Department of Commerce could harm our Registry Services business.

The Department of Commerce (the "DOC") has adopted a plan for the phased transition of its responsibilities for the Domain Name System (the "DNS") to ICANN. As part of this transition, we are parties to agreements with ICANN and the DOC as the exclusive registry of domain names within the .com gTLD and with ICANN with respect to being the exclusive registry for the .name and .net gTLDs.

We face risks arising from (i) our agreements with ICANN and the DOC and (ii) the transition of the DOC's responsibilities for the DNS to ICANN, including the following:

ICANN could adopt or promote policies, procedures or programs that are unfavorable to us as the registry operator of the .com, .net and .name gTLDs, that are inconsistent with our current or future plans, or that affect our competitive position;

under the Affirmation of Commitments entered into between ICANN and the DOC effective October 1, 2009 (the "Affirmation of Commitments"), the DOC became one of several parties working together with other representative constituency members in providing an on-going review of ICANN's performance and accountability. The Affirmation of Commitments provides for more

Edgar Filing: VERISIGN INC/CA - Form 10-Q

defined international participation in this review. It is not known what, if any, role these review committees will play in the oversight of ICANN's contracting process with various gTLD providers including VeriSign, and they could make recommendations that are adverse to our business;

one or both of the *.com* or *.net* Registry Agreements may not renew when they expire in 2011 (*.net*) and 2012 (*.com*), which could have a material adverse effect on our business;

under certain circumstances, ICANN could terminate one or more of our agreements to be the registry for the *.com*, *.net* or *.name* gTLDs and the DOC could refuse to grant its approval to the renewal of the *.com* Registry Agreement, in which case terminations of the *.com* or *.net* Registry Agreements could have a material adverse impact on our business;

the DOC's or ICANN's interpretation of provisions of our agreements with either of them could differ from ours; and

our Registry Services business faces, and could continue to face legal or other challenges resulting from our activities or the activities of registrars and registrants, and any adverse outcome from such matters could have a material adverse effect on our business.

Table of Contents

In addition, under the *.com*, *.net* and *.name* Registry Agreements, we are prohibited from holding a greater than 15% ownership interest in an ICANN accredited registrar. This prohibition on cross-ownership currently applies to all sixteen ICANN gTLDs, but does not apply to country code top-level domains (ccTLDs). ICANN is currently considering whether it will allow any vertical integration of registries and registrars in terms of partner and owners in the upcoming round of new gTLD registries. Whatever policy ICANN adopts on vertical integration with respect to new gTLDs may or may not in the future extend to existing gTLD contracts. If vertical integration is permitted, the impact to the distribution channel is uncertain but could have a material adverse effect on our business.

Challenges to ongoing privatization of Internet administration could harm our Naming Services business.

Risks we face from challenges by third parties, including governmental authorities in the U.S. and other countries, to our role in the ongoing privatization of the Internet include:

legal, regulatory or other challenges could be brought, including challenges to the agreements governing our relationship with the DOC or ICANN, or to the legal authority underlying the roles and actions of the DOC, ICANN or us;

the U.S. Congress could take action that is unfavorable to us;

ICANN could fail to maintain its role, potentially resulting in instability in DNS administration; and

some governments and governmental authorities outside the U.S. have in the past disagreed, and may in the future disagree, with the actions, policies or programs of ICANN, the U.S. Government and us relating to the DNS. The Affirmation of Commitments, which calls for the establishment of multi-party review panels, contemplates a greater involvement by foreign governments and governmental authorities in the oversight of ICANN. These periodic review panels may take positions that are unfavorable to VeriSign.

As a result of these and other risks, it may be difficult for us to introduce new services in our Registry Services business and we could also be subject to additional restrictions, which may not also apply to our competitors, on how this business is conducted.

Our international operations subject our business to additional economic risks that could have an adverse impact on our revenues and business.

As of September 30, 2010, we had 172, or 16%, of our employees outside the U.S. Expansion into international markets has required and will continue to require significant management attention and resources. We may also need to tailor some of our services for a particular market and to enter into international distribution and operating relationships. We have limited experience in localizing our services and in developing international distribution or operating relationships. We may not succeed in expanding our services into new international markets or expand our presence in existing markets. Failure to do so could harm our business. Moreover, local laws and customs in many countries differ significantly from those in the U.S. In many foreign countries, particularly in those with developing economies, it is common for others to engage in business practices that are prohibited by our internal policies and procedures or U.S. law or regulations applicable to us. There can be no assurance that all of our employees, contractors and agents will not take actions in violation of such policies, procedures, laws and/or regulations. Violations of laws, regulations or key control policies by our employees, contractors or agents could result in financial reporting problems, fines, penalties, or prohibition on the importation or exportation of our products and could have a material adverse effect on our business. In addition, we face risks inherent in doing business on an international basis, including, among others:

competition with foreign companies or other domestic companies entering the foreign markets in which we operate;

differing and uncertain regulatory requirements;

Table of Contents

legal uncertainty regarding liability, enforcing our contracts and compliance with foreign laws;

tariffs and other trade barriers and restrictions;

difficulties in staffing and managing foreign operations;

longer sales and payment cycles;

problems in collecting accounts receivable;

currency fluctuations, as a small portion of our international revenues are not always denominated in U.S. dollars and some of our costs are denominated in foreign currencies;

difficulty in repatriating profits to the U.S.;

potential problems associated with adapting our services to technical conditions existing in different countries;

the necessity of developing foreign language portals and products for our services;

difficulty of authenticating customer information;

political instability;

failure of foreign laws to protect our U.S. proprietary rights adequately;

more stringent privacy policies in some foreign countries;

export and import restrictions on cryptographic technology and products incorporating that technology;

additional vulnerability from terrorist groups targeting U.S. interests abroad;

seasonal reductions in business activity; and

potentially adverse tax consequences.

We are exposed to risks faced by financial institutions.

We have entered into hedging transactions with counterparties in the financial services industry which have been adversely impacted by the current economic environment. Defaults by, and even rumors or questions about the solvency of, certain financial institutions and the financial services industry generally have led to market-wide liquidity problems and could lead to losses or defaults by other institutions. The hedging transactions we have entered into expose us to credit risk in the event of default by one of our counterparties. Despite the risk control measures we have in place, a default by one of our counterparties, or liquidity problems in the financial services industry in general, could have a material adverse effect on our business, financial condition and results of operations.

Our marketable securities portfolio could experience a decline in market value, which could materially and adversely affect our financial results.

At September 30, 2010, we had \$2.55 billion in cash, cash equivalents, marketable securities and restricted cash, of which \$488.9 million was invested in marketable securities. On August 9, 2010, we sold our Authentication Services business for cash consideration of approximately \$1.14 billion, net of cash held by transferred subsidiaries of \$127.5 million and transaction costs of \$10.8 million. The marketable securities consist of debt securities issued by the U.S. Treasury and other U.S. government corporations and agencies, and corporate debt securities meeting the criteria of our investment policy, which is focused on the preservation of our capital through the investment in investment grade securities. We currently do not use derivative financial instruments to adjust our investment portfolio risk or income profile.

These investments as well as any cash deposited in bank accounts are subject to general credit, liquidity, market and interest rate risks, which may be exacerbated by unusual events, such as the sub-prime mortgage

Table of Contents

crisis in the United States, which has affected various sectors of the financial markets and led to global credit and liquidity issues. Over the past several years, the volatility and disruption in the global credit market have reached unprecedented levels. If the global credit market continues to deteriorate or does not improve, our investment portfolio may be impacted and we could determine that some of our investments have experienced an other-than-temporary decline in fair value, requiring an impairment charge which could adversely impact our financial results.

Governmental regulation and the application of existing laws may slow business growth, increase our costs of doing business, create potential liability and have an adverse effect on our business.

Application of new and existing laws and regulations to the Internet and communications industry can be unclear. The costs of complying or failing to comply with these laws and regulations could limit our ability to operate in our current markets, expose us to compliance costs and substantial liability and result in costly and time-consuming litigation.

Foreign, federal or state laws could have an adverse impact on our business, financial condition, results of operations, and our ability to conduct business in certain foreign countries. For example, laws designed to restrict who can register domain names, the on-line distribution of certain materials deemed harmful to children, on-line gambling and cyber squatting; laws designed to require registrants to provide additional documentation or information in connection with domain name registrations; and laws designed to promote cyber security may impose significant additional costs on our business or subject us to additional liabilities. We have a number of contracts pursuant to which we provide services to the U.S. government and even though these contracts are immaterial, they impose compliance costs, including compliance with the Federal Acquisition Regulation, that could be significant to the Company.

Due to the nature of the Internet, it is possible that state or foreign governments might attempt to regulate Internet transmissions or prosecute us for violations of their laws. We might unintentionally violate such laws, such laws may be modified and new laws may be enacted in the future. Any such developments could increase the costs of regulatory compliance for us, affect our reputation, force us to change our business practices or otherwise materially harm our business. In addition, any such new laws could impede growth of or result in a decline in domain name registrations, as well as impact the demand for our services.

We may be exposed to potential risks if we were to determine we do not have an effective system of disclosure controls or internal controls over financial reporting.

As a public company, the Company is subject to the rules and regulations of the SEC, including those that require the Company to report on and receive an attestation from its independent registered public accounting firm regarding the Company's internal control over financial reporting.

As a result of the sale of the Authentication Services business, the transitioning of key corporate functions to our Dulles, Virginia office and potential voluntary employee attrition, there is an increased risk of our failing to maintain an effective system of disclosure controls or internal controls over financial procedures, including satisfaction of the requirements of the Sarbanes-Oxley Act of 2002. Although we believe that we have adequately planned to address this risk, despite our efforts, if we were to fail to maintain an effective system of disclosure controls or internal control over financial reporting, we may not be able to accurately or timely report on our financial results or adequately identify and reduce fraud. As a result, the financial position of the Company could be harmed and current and potential future stockholders could lose confidence in us and/or our reported financial results, which may cause a negative effect on our stock price; and we could be exposed to litigation or regulatory proceedings, which may be costly or divert management attention.

We rely on third parties who maintain and control root zone servers and route Internet communications.

We currently administer and operate only two of the thirteen root zone servers. The others are administered and operated by independent operators on a non-regulated basis. Root zone servers are name servers that contain

Table of Contents

authoritative data for the very top of the DNS hierarchy. These servers have the software and data needed to locate name servers that contain authoritative data for the top-level domains. These root zone servers are critical to the functioning of the Internet. Consequently, our Naming Services business could be harmed if these independent operators fail to maintain these servers properly or abandon these servers, which would place additional capacity demands on the two root zone servers we operate.

Further, our Naming Services business could be harmed if any of the independent operators fails to include or provide accessibility to the data that it maintains in the root zone servers that it controls. In the event and to the extent that ICANN is authorized to set policy with regard to an authoritative root zone server system, as provided in our registry agreement with ICANN, it is required to ensure that the authoritative root will point to the top-level domain zone servers designated by us. If ICANN does not do this, our business could be harmed.

Changes in customer behavior, either as a result of evolving technologies or user practices, may impact the demand for domain names.

Currently, Internet users navigate to a website either by directly typing its domain name into a web browser or through the use of a search engine. If (i) web browser or Internet search technologies were to change significantly; (ii) Internet search engines changed the value of their algorithms on the use of a domain for finding a website; (iii) Internet users were to shift away from direct navigation; (iv) Internet users were to increase the use of web and phone applications to locate and access content or (v) Internet users were to increase the use of second or third level domains or alternate identifiers, such as social networking sites, in each case the demand for domain names could decrease.

Changes in the level of spending on on-line advertising and/or the way that on-line networks compensate owners of websites, could impact the demand for domain names.

Some domain name registrars and registrants seek to generate revenue through advertising on their websites; changes in the way these registrars and registrants are compensated (including changes in methodologies and metrics) by advertisers and advertisement placement networks, such as Google and Yahoo!, could adversely affect the market for those domain names favored by such registrars and registrants resulting in a decrease in demand and/or the renewal rate for those domain names. As a result of the general economic environment, spending on on-line advertising and marketing may not increase or may be reduced, which in turn, may result in a further decline in the demand for those domain names.

Undetected or unknown defects in our services could harm our business and future operating results.

Services as complex as those we offer or develop could contain undetected defects or errors. Despite testing, defects or errors may occur in our existing or new services, which could result in compromised customer data, loss of or delay in revenues, loss of market share, failure to achieve market acceptance, diversion of development resources, injury to our reputation, tort or warranty claims, increased insurance costs or increased service and warranty costs, any of which could harm our business. The performance of our services could have unforeseen or unknown adverse effects on the networks over which they are delivered as well as on third-party applications and services that utilize our services, which could result in legal claims against us, harming our business. Furthermore, we often provide implementation, customization, consulting and other technical services in connection with the implementation and ongoing maintenance of our services, which typically involves working with sophisticated software, computing and communications systems. Our failure or inability to meet customer expectations in a timely manner could also result in loss of or delay in revenues, loss of market share, failure to achieve market acceptance, injury to our reputation and increased costs.

If we encounter system interruptions, we could be exposed to liability and our reputation and business could suffer.

We depend on the uninterrupted operation of our various systems, secure data centers and other computer and communication networks. Our systems and operations are vulnerable to damage or interruption from:

power loss, transmission cable cuts and other telecommunications failures;

Table of Contents

damage or interruption caused by fire, earthquake, and other natural disasters;

attacks by hackers;

computer viruses or software defects; and

physical or electronic break-ins, sabotage, intentional acts of vandalism, terrorist attacks and other events beyond our control.

Most of our systems are located at, and most of our customer information is stored in, our facilities in New Castle, Delaware; Dulles, Virginia; and Fribourg, Switzerland. To the extent we are unable to partially or completely switch over to secondary or tertiary sites, any damage or failure that causes interruptions in any of these facilities or our other computer and communications systems could materially harm our business. Although we carry insurance for property damage and business interruption, we do not carry insurance or financial reserves for interruptions or potential losses arising from terrorism.

In addition, our Registry Services business and certain of our other services depend on the efficient operation of the Internet connections from customers to our secure data centers and from our customers to the Shared Registration System. These connections depend upon the efficient operation of Internet service providers and Internet backbone service providers, all of which have had periodic operational problems or experienced outages in the past.

A failure in the operation of our top-level domain name zone servers, the domain name root zone servers, or other events could result in the deletion of one or more domain names from the Internet for a period of time. A failure in the operation of our Shared Registration System could result in the inability of one or more other registrars to register and maintain domain names for a period of time. A failure in the operation or update of the master database that we maintain could result in the deletion of one or more top-level domains from the Internet and the discontinuation of second-level domain names in those top-level domains for a period of time. Any of these problems or outages could decrease customer satisfaction, harming our business or resulting in adverse publicity that could adversely affect the market's perception of the security of e-commerce and communications over IP networks as well as of the security or reliability of our services.

If we experience security breaches, we could be exposed to liability and our reputation and business could suffer.

We retain certain confidential customer information in our secure data centers and various registration systems. It is critical to our business strategy that our facilities and infrastructure remain secure and are perceived by the marketplace to be secure. Our domain name registry operations also depend on our ability to maintain our computer and telecommunications equipment in effective working order and to reasonably protect our systems against interruption, and potentially depend on protection by other registrars in the Shared Registration System. The domain name root zone servers and top-level domain name zone servers that we operate are critical hardware to our registry services operations. Therefore, we may have to expend significant time and money to maintain or increase the security of our facilities and infrastructure. Despite our security measures, our infrastructure may be vulnerable to physical break-ins, computer viruses, attacks by hackers or similar disruptive problems. It is possible that we may have to expend additional financial and other resources to address such problems. Any physical or electronic break-in or other security breach or compromise of the information stored at our secure data centers and domain name registration systems may jeopardize the security of information stored on our premises or in the computer systems and networks of our customers. In such an event, we could face significant liability, customers could be reluctant to use our services and we could be at risk for loss of various security and standards-based compliance certifications needed for certain of our businesses. Such an occurrence could also result in adverse publicity and therefore adversely affect the market's perception of the security of e-commerce and communications over IP networks as well as of the security or reliability of our services.

Table of Contents

We rely on our intellectual property, and any failure by us to protect, or any misappropriation of, our intellectual property could harm our business.

Our success depends in part on our internally developed technologies and intellectual property. Despite our precautions, it may be possible for a third party to copy or otherwise obtain and use our trade secrets or other forms of our intellectual property without authorization. Furthermore, the laws of foreign countries may not protect our proprietary rights in those countries to the same extent U.S. law protects these rights in the U.S. In addition, it is possible that others may independently develop substantially equivalent intellectual property. If we do not effectively protect our intellectual property, our business could suffer. Additionally, we have filed patent applications with respect to certain of our technology in the U.S. Patent and Trademark Office and patent offices outside the U.S. Patents may not be awarded with respect to these applications and even if such patents are awarded, such patents may not provide us with sufficient protection of our intellectual property. In the future, we may have to resort to litigation to enforce our intellectual property rights, to protect our trade secrets or to determine the validity and scope of the proprietary rights of others. This type of litigation, regardless of its outcome, could result in substantial costs and diversion of management attention and technical resources.

We also license third-party technology that is used in our products and services to perform key functions. These third-party technology licenses may not continue to be available to us on commercially reasonable terms or at all. Our business would suffer if we lost the rights to use certain of these technologies. Additionally, another party could claim that the licensed software infringes a patent or other proprietary right. Litigation between the licensor and a third-party or between us and a third-party could lead to royalty obligations for which we are not indemnified or for which indemnification is insufficient, or we may not be able to obtain any additional license on commercially reasonable terms or at all. The loss of or our inability to obtain or maintain, any of these technology licenses could harm our business.

We rely on the strength of our VeriSign brand to differentiate ourselves in the marketing of our products. Dilution of the strength of our brand could harm our business.

We could become subject to claims of infringement of intellectual property of others, which could be costly to defend and could harm our business.

Claims relating to infringement of intellectual property of others or other similar claims have been made against us in the past and could be made against us in the future. It is possible that we could become subject to additional claims for infringement of the intellectual property of third parties. The upcoming international launch of the new logo for the Company could present additional potential risks for third party claims. Any claims, with or without merit, could be time consuming, result in costly litigation and diversion of technical and management personnel attention, cause delays in our efforts to launch a new logo or business activities generally, or require us to develop a non-infringing logo or technology or enter into royalty or licensing agreements. Royalty or licensing agreements, if required, may not be available on acceptable terms or at all. If a successful claim of infringement was made against us, we could be required to pay damages or have portions of our business enjoined. If we could not identify and adopt an alternative non-infringing logo, develop non-infringing technology or license the infringed or similar technology on a timely and cost-effective basis, our business could be harmed.

In addition, legal standards relating to the validity, enforceability, and scope of protection of intellectual property rights in Internet-related businesses are uncertain and still evolving. Because of the growth of the Internet and Internet-related businesses, patent applications are continuously being filed in connection with Internet-related technology. There are a significant number of U.S. and foreign patents and patent applications in our areas of interest, and we believe that there has been, and is likely to continue to be, significant litigation in the industry regarding patent and other intellectual property rights.

Table of Contents

We are involved in a number of claims, lawsuits and investigations against us that may result in adverse outcomes.

In addition to possible intellectual property litigation and infringement claims, we are involved in a number of claims, lawsuits and investigations which we currently believe are immaterial but that could prove material. Litigation is inherently unpredictable, and excessive verdicts do occur. In addition, certain parties to litigation to which we are a party may be entitled to indemnification by us. Adverse outcomes in some or all of these claims, lawsuits and investigations may result in significant monetary damages, including indemnification payments, or injunctive relief that could adversely affect our ability to conduct our business and may have a material adverse effect on our financial condition and results of operations. Additionally, these investigations, claims and lawsuits may involve significant expense and diversion of management's attention and resources from other matters.

We must establish and maintain strategic, channel and other relationships.

One of our significant business strategies has been to enter into strategic or other similar collaborative relationships in order to reach a larger customer base than we could reach through our direct sales and marketing efforts. We may need to enter into additional relationships to execute our business plan. We may not be able to enter into additional, or maintain our existing, strategic relationships on commercially reasonable terms. If we fail to enter into additional relationships, we would have to devote substantially more resources to the distribution, sale and marketing of our services than we would otherwise.

Our success in obtaining results from these relationships will depend both on the ultimate success of the other parties to these relationships and on the ability of these parties to market our services successfully.

Furthermore, any changes by our distributors to their existing marketing strategies could have a material adverse effect on our business. Similarly, if one or more of our distributors were to encounter financial difficulties, or if there were a significant reduction in marketing expenditures by our distributors (including registrars), as a result of industry consolidation or otherwise, it could have a material adverse effect on our business, including a decrease in domain name registrations and renewals. Failure of one or more of our strategic, channel or other relationships to result in the development and maintenance of a market for our services could harm our business. If we are unable to maintain our existing relationships or to enter into additional relationships, this could harm our business.

Our NIA Services depend in part on the acceptance of our services.

We are investing in our NIA Services, and the future growth of these services depends, in part, on the commercial success and acceptance, and reliability, of our NIA Services. These services will suffer if our target customers do not adopt or use these services. We are not certain that our target customers will choose our NIA Services or continue to use these services even after adoption.

Many of our target markets are evolving, and if these markets fail to develop or if our products and services are not widely accepted in these markets, our business could be harmed.

Our Registry Services and NIA Services businesses are developing services in emerging markets, including services that involve naming and directory services other than registry and related infrastructure services. These emerging markets are rapidly evolving, may never gain wide acceptance and may not grow. Even if these markets grow, our services may not be widely accepted. Accordingly, the demand for our services in these markets is very uncertain. The factors that may affect market acceptance of our services in these markets include the following:

market acceptance of products and services based upon technologies other than those we use;

public perception of the security of our technologies and of IP and other networks;

Table of Contents

the introduction and consumer acceptance of new generations of mobile handsets;

the ability of the Internet infrastructure to accommodate increased levels of usage; and

government regulations affecting e-commerce and telecommunications over IP networks.

If the market for e-commerce and communications over IP and other networks does not grow or these services are not widely accepted in the market, our business could be materially harmed.

We depend on key personnel to manage our business effectively and may not be successful in attracting and retaining such personnel.

We depend on the performance of our senior management team and other key employees. Our success also depends on our ability to attract, integrate, train, retain and motivate these individuals and additional highly skilled technical and sales and marketing personnel, both in the U.S. and abroad.

All of the members of our senior management team and other U.S. key employees are at-will employees and we do not maintain key person life insurance for any of our senior management team members or key employees. The loss of the services of any of our senior management team or other key employees, or failure to attract, integrate, train, retain and motivate additional key employees could harm our business.

We have anti-takeover protections that may discourage, delay or prevent a change in control that could benefit our stockholders.

Our amended and restated Certificate of Incorporation and Bylaws contain provisions that could make it more difficult for a third party to acquire us without the consent of our Board of Directors. These provisions include:

our stockholders may take action only at a duly called meeting and not by written consent;

special meetings of our stockholders may be called only by the chief executive officer, the president or our Board of Directors, and cannot be called by our stockholders;

our board must be given advance notice regarding stockholder-sponsored proposals for consideration at annual meetings and for stockholder nominations for the election of directors;

vacancies on our Board of Directors can be filled until the next annual meeting of stockholders by majority vote of the members of the Corporate Governance and Nominating Committee, or a majority of directors then in office if no such committee exists, or a sole remaining director; and

our Board of Directors has the ability to designate the terms of and issue new series of preferred stock without stockholder approval. VeriSign has also adopted a stockholder rights plan that may discourage, delay or prevent a change of control or the acquisition of a substantial block of our common stock and may make any future unsolicited acquisition attempt more difficult. Under the rights plan:

The rights will generally become exercisable if a person or group acquires 20% or more of VeriSign's outstanding common stock (unless such transaction is approved by our Board of Directors) and thus becomes an acquiring person.

Each right, when exercisable, will entitle the holder, other than the acquiring person, to acquire shares of VeriSign's common stock at a 50% discount to the then-prevailing market price.

As a result, the rights plan will cause substantial dilution to a person or group that becomes an acquiring person on terms that our Board of Directors does not believe are in our best interests and those of our stockholders and may discourage, delay or prevent a merger or acquisition that

Table of Contents

stockholders may consider favorable, including transactions in which stockholders might otherwise receive a premium for their shares.

In addition, Section 203 of the General Corporation Law of Delaware prohibits a publicly held Delaware corporation from engaging in a business combination with an interested stockholder, generally a person which together with its affiliates owns or within the last three years has owned 15% or more of our voting stock, for a period of three years after the date of the transaction in which the person became an interested stockholder, unless in the same transaction the interested stockholder acquired 85% ownership of our voting stock (excluding certain shares) or the business combination is approved in a prescribed manner. Section 203 therefore may impact the ability of an acquirer to complete an acquisition of us after a successful tender offer and accordingly could discourage, delay or prevent an acquirer from making an unsolicited offer without the approval of our Board of Directors.

Changes in, or interpretations of, tax rules and regulations and other factors may adversely affect our effective tax rates.

We are subject to income taxes in both the U.S. and numerous foreign jurisdictions. Significant judgment is required in determining our worldwide provision for income taxes. There are many transactions and calculations where the ultimate tax determination is uncertain. Although we believe our tax estimates are reasonable, the final determination of tax audits and any related litigation could be materially different than that which is reflected in historical income tax provisions and accruals. Should additional taxes be assessed as a result of an audit or litigation, an adverse effect on our income tax provision and net income in the period or periods for which that determination is made could result. Our effective tax rates may also change as a result of the sale of our Authentication Services business.

Risks relating to the competitive environment in which we operate

The business environment is highly competitive and, if we do not compete effectively, we may suffer price reductions, reduced gross margins and loss of market share.

General: New technologies and the expansion of existing technologies may increase competitive pressure. We cannot assure you that competing technologies developed by others or the emergence of new industry standards will not adversely affect our competitive position or render our services or technologies noncompetitive or obsolete. In addition, our markets are characterized by announcements of collaborative relationships involving our competitors. The existence or announcement of any such relationships could adversely affect our ability to attract and retain customers. As a result of the foregoing and other factors, we may not be able to compete effectively with current or future competitors, and competitive pressures that we face could materially harm our business.

Competition in Registry Services: We face competition in the domain name registry space from other gTLD and ccTLD registries that are competing for the business of entities and individuals that are seeking to establish a Web presence, including registries offering services related to the .info, .org, .mobi, .biz, .pro, .aero, .museum and .coop gTLDs and registries offering services related to ccTLDs. ICANN currently has registry agreements with 15 registries for the operation of 17 gTLDs. In addition, there are over 240 ccTLD registries. Furthermore, under our agreements with ICANN, we are subject to certain restrictions in the operation of .com, .net and .name on pricing, bundling and use of registrars that do not apply to ccTLDs and therefore may create a competitive disadvantage.

We also face competition from service providers that offer outsourced domain name registration, resolutions and other DNS services to organizations that require a reliable and scalable infrastructure. Among the competitors are Neustar Inc., Afiliis Limited and Nominum, Inc. In addition, to the extent end-users navigate using search engines as opposed to direct navigation, we may face competition from search engine operators such as Google Inc., Microsoft Corporation, and Yahoo! Inc.

Table of Contents

Additional competition to our business may arise from the introduction of new internationalized domain name top-level domains (IDN TLDs) and the upcoming introduction of new gTLDs by ICANN. On October 30, 2009, ICANN approved a fast track process for the awarding of new IDN TLDs and such new IDN TLDs have started to be introduced into the root. Other new domain extensions (including ones for which we could apply) could become available by the end of 2012. We do not yet know the impact, if any, that these new domain extensions may have on our business. Applicants for such new TLDs may have greater financial, technical, marketing and other resources than we do. While we may apply for one or more of these new domain extensions, there is no certainty that we will ultimately be successful, and even if we are successful in obtaining one or more of these new domain extensions, there is no guarantee that such extensions will be any more successful than the domain name extensions obtained by our competitors.

Competition in Network Intelligence and Availability Services: Several of our current and potential competitors have longer operating histories and/or significantly greater financial, technical, marketing and other resources than we do and therefore may be able to respond more quickly than we can to new or changing opportunities, technologies, standards and customer requirements. Many of these competitors also have broader and more established distribution channels that may be used to deliver competing products or services directly to customers through bundling or other means. If such competitors were to bundle competing products or services for their customers, we may experience difficulty establishing or increasing demand for our products and services or distributing our products successfully.

We face competition in the network intelligence and availability services industry from companies such as iSight Partners, Security Services X-Force Threat Analysis Service, Secunia ApS, SecureWorks, Inc., McAfee, Inc., Prolexic Technologies, Inc., AT&T Inc., Verizon Communications, Inc., Dyn, Inc. s Dynect Platform, NeuStar Ultra Services, OpenDNS, BlueCat Networks, Inc., Nominum, Inc. and Afiliast Limited.

Our inability to react to changes in our industry and successfully introduce new products and services could harm our business.

The Internet and communications network services industries are characterized by rapid technological change and frequent new product and service announcements which require us continually to improve the performance, features and reliability of our services, particularly in response to competitive offerings. In order to remain competitive and retain our market share, we must continually improve our access technology and software, support the latest transmission technologies, and adapt our products and services to changing market conditions and customer preferences, or launch entirely new products and services in anticipation of market trends. We cannot assure you that we will be able to adapt to these challenges or respond successfully or in a cost effective way to adequately meet them. Our failure to do so would adversely affect our ability to compete and retain customers or market share.

Risks related to the sale of our Authentication Services business and the completion of our divestiture plan

Our suite of products and services is less diverse following the sale of our Authentication Services business.

We may not be able to achieve the full strategic and financial benefits we expect from the sale of our Authentication Services business. Following the sale of the Authentication Services business, our Naming Services business, which derives most of its revenues from registration fees for domain names, generates substantially all of our revenue. If there is a disruption in the Naming Services business, including any disruption from changes in the domain name industry, changes in or challenges to our agreements with ICANN, including any changes resulting from legal challenges to these agreements, from CFIT or otherwise, changes in customer preferences, a downturn in the economy or changes in technology related to the use of domain names, there may be a material adverse effect on our business and results of operations. In addition, one or both of the .com or .net Registry Agreements may not renew when they expire in 2011 (.net) and 2012 (.com), which could have a material adverse effect on our business.

Table of Contents

We face risks related to the terms of the sale of the Authentication Services business.

Under the agreement reached with Symantec for the sale of our Authentication Services business (the "Symantec Agreement"), we agreed to several terms that may pose risks to us, including the potential for confusion by the public with respect to Symantec's right to use certain of our trademarks, brand and web site, as well as the risk that current or potential investors in our stock or our customers may attribute to us problems affecting products or services operated under the VeriSign name pursuant to licensing agreements with Symantec. This may have a negative impact on our reputation, our brand and the market for our products and services. We are at risk that we will be unable to register, build equity in, or enforce the new logo for the Company. In addition, we may determine that certain assets transferred to Symantec could have been useful in our Naming Services business or in other future endeavors, requiring us to forego future opportunities or design or purchase alternatives which could be costly and less effective than the transferred assets.

Under the terms of the Symantec Agreement, we have licensed rights to certain of our websites and domain name registrations to Symantec. We are at risk that our customers will go to the licensed websites and be unable to locate our Registry Services and NIA Services. In addition, we will continue to maintain the registration rights for the domain names licensed to Symantec for which Symantec has sole control over the content, and we may be subject to claims of infringement if Symantec posts content that is alleged to infringe the rights of a third party. We may also face expenditures to procure registration rights to other domain names for our Naming Services, many of which may be owned by third parties.

We are at risk of increased levels of employee attrition following the sale of our Authentication Services business.

Although we believe that we have retained sufficient senior management and other employees to perform various functions at the Company, we are at risk of experiencing increased levels of employee attrition from employees scheduled to be transitioned out of the Company now that the sale of the Authentication Services business has closed, and we may encounter difficulty recruiting and hiring competent personnel to replace any key personnel who voluntarily terminate their employment with us. If we are unable to replace employees quickly, we may be forced to hire contractors or consultants at higher rates than the salaried employees whom they replace. In addition, it may take new personnel a significant period of time to understand and become familiar with Company processes. The failure to replace our departing personnel, if any, in a timely manner could result in our inability to perform various important functions, including completing our SEC filings, and could impair our ability to execute our business strategy, which could have a material adverse effect on our business.

We are transitioning key corporate functions from our California office to our Virginia office.

We may encounter difficulties and face risks as we transition key corporate functions from our Mountain View, California office to our Dulles, Virginia office, including our ability to timely complete our financial reporting, the impact on key corporate support functions, and our ability to attract and retain qualified employees. In addition, the large number of personnel displacements could impair employee morale and create a distraction for employees, which could harm our business.

We continue to be responsible for certain liabilities and transition services following the divestiture of certain businesses.

Under the agreements reached with the buyers of certain divested businesses, including the Authentication Services business, we remain liable for certain liabilities related to the divested businesses. In addition, we have entered into, and may in the future amend or extend, transition services agreements with buyers in connection with the divestiture of certain businesses, including the Authentication Services business. These transition services may be required for a longer period of time than anticipated by management. In addition, we have

Table of Contents

agreed to perform certain transition services for a fixed price or for fixed hourly rates, but our actual costs to provide such services may exceed the fees buyers are contractually obligated to pay us under the relevant transition services agreements. The scope and magnitude of the transition services we have agreed to provide in connection with the sale of the Authentication Services business are greater than those provided under our divestiture plan, and we may face challenges performing such transition services, including that the focus of employees and resources supporting the transition services may impact their ability to support our existing businesses.

There is a possibility that we will incur costs and expenses associated with the management of liabilities related to the businesses we have divested, including requests for indemnification by buyers. These liabilities could potentially relate to (i) breaches of contractual representations and warranties we gave to buyers of the divested businesses, or (ii) certain liabilities relating to the divested businesses which we retained under the agreements reached with buyers of the divested businesses. Such liabilities include certain litigation matters, including actions brought by third parties. Where responsibility for such liabilities is to be contractually allocated to the buyer or shared with the buyer or another party, it is possible that the buyer or the other party may be in default for payments for which they are responsible, obligating us to pay amounts in excess of our agreed-upon share of those obligations.

Following the divestiture of certain businesses, our ability to compete in certain market sectors is restricted.

Under the agreements reached with buyers for certain businesses we divested, including the Authentication Services business, we are restricted from competing, either directly or indirectly, with those businesses or from entering certain market sectors for a defined period of time pursuant to negotiated non-compete arrangements.

Risks related to our securities

We have a considerable number of common shares subject to future issuance.

As of September 30, 2010, we had one billion authorized common shares, of which 171.7 million shares were outstanding. In addition, of our authorized common shares, 24.9 million common shares were reserved for issuance pursuant to outstanding employee stock option and employee stock purchase plans (Equity Plans), and 36.4 million shares were reserved for issuance upon conversion of the 3.25% junior subordinated convertible debentures due 2037 (the Convertible Debentures). As a result, we keep substantial amounts of our common stock available for issuance upon exercise or settlement of equity awards outstanding under our Equity Plans and/or the conversion of Convertible Debentures into our common stock. Issuance of all or a large portion of such shares would be dilutive to existing security holders, could adversely affect the prevailing market price of our common stock and could impair our ability to raise additional capital through the sale of equity securities.

We may not have the ability to repurchase the Convertible Debentures in cash upon the occurrence of a fundamental change, or to pay cash upon the conversion of Convertible Debentures, as required by the indenture governing the Convertible Debentures.

As a result of the sale of the Convertible Debentures, we have a substantial amount of long term debt outstanding. Holders of our outstanding Convertible Debentures will have the right to require us to repurchase the Convertible Debentures upon the occurrence of a fundamental change as defined in the Indenture dated as of August 20, 2007 (the Indenture) between the Company and U.S. Bank National Association, as Trustee. Although we currently intend to settle the principal amount of the Convertible Debentures in cash as required under the Indenture, we may not have sufficient funds to repurchase the Convertible Debentures in cash or have the ability to arrange necessary financing on acceptable terms or at all. In addition, upon conversion of the Convertible Debentures, we will be required to make cash payments to the holders of the Convertible Debentures equal to the lesser of the principal amount of the Convertible Debentures being converted and the conversion value (as defined in the Indenture) of those debentures. Such payments could be significant, and we may not have

Table of Contents

sufficient funds to make them at such time. Our maintenance of substantial levels of debt could also adversely affect our ability to take advantage of corporate opportunities.

A fundamental change may also constitute an event of default or prepayment under, or result in the acceleration of the maturity of, our then-existing indebtedness. Our ability to repurchase the Convertible Debentures in cash or make any other required payments may be limited by law or the terms of other agreements relating to our indebtedness outstanding at the time. Our failure to repurchase the Convertible Debentures or pay cash in respect of conversions when required would result in an event of default with respect to the Convertible Debentures.

While we currently have the intent and ability to settle the principal in cash, if we conclude that we no longer have the ability, in the future, we will be required to change our accounting policy for earnings per share from the treasury stock method to the if-converted method.

There may be potential new accounting pronouncements or regulatory rulings which may have an impact on our future financial position and results of operations.

New accounting pronouncements could, when adopted, require us to implement different accounting methods which could have a material adverse impact on future or past results of operations, which could in turn materially adversely affect the trading price of our common stock.

Table of Contents**ITEM 2. UNREGISTERED SALES OF EQUITY SECURITIES AND USE OF PROCEEDS**

On July 27, 2010, the Board of Directors authorized the repurchase of up to approximately \$1.1 billion of VeriSign's common stock, in addition to the \$393.6 million of its common stock remaining available for repurchase under the previous 2008 Share Buyback Program, for a total repurchase of up to \$1.5 billion of its common stock (collectively, the 2010 Share Buyback Program). The 2010 Share Buyback Program has no expiration date. Purchases made under the 2010 Share Buyback Program could be effected through open market transactions, block purchases, accelerated share repurchase agreements or other negotiated transactions.

The following table presents the stock repurchase activity during the three months ended September 30, 2010:

	Total Number of Shares Purchased (1)	Average Price Paid per Share	Total Number of Shares Purchased as Part of Publicly Announced Plans or Programs (1)	Approximate Dollar Value of Shares That May Yet Be Purchased Under the Plans or Programs (2)
July 1 - 31, 2010	943,575	\$ 27.20	943,575	\$ 1,500.0 million
August 1 - 31, 2010	4,140,610	28.94	4,140,610	1,380.2 million
September 1 - 30, 2010		\$		\$ 1,380.2 million
	5,084,185		5,084,185	

(1) Represents shares repurchased under the 2008 Share Buyback Program and the 2010 Share Buyback Program.

(2) Represents the remaining amount available for further share repurchases under the 2010 Share Buyback Program.

Pursuant to the rules and regulations of the SEC, the Company has filed certain agreements as exhibits to this Form 10-Q. These agreements may contain representations and warranties by the parties thereto. These representations and warranties have been made solely for the benefit of the other party or parties to such agreements and (1) may be intended not as statements of fact, but rather as a way of allocating the risk to one of the parties to such agreements if those statements prove to be inaccurate, (2) may have been qualified by disclosures that were made to such other party or parties and that either have been reflected in the Company's filings or are not required to be disclosed in those filings, (3) may apply materiality standards different from what may be viewed as material to investors and (4) were made only as of the date of such agreements or such other date(s) as may be specified in such agreements and are subject to more recent developments. Accordingly, these representations and warranties may not describe the Company's actual state of affairs at the date hereof or at any other time.
