2. BASIS OF PREPARATION OF THE CONSOLIDATED FINANCIAL STATEMENTS (Cont.)

2.c) Accounting Estimates and Judgments

The preparation of financial statements at a certain date requires Management to make estimates and assessments affecting the amount of assets and liabilities recorded, contingent assets and liabilities disclosed at such date, as well as income and expenses recorded during the period. Actual future results might differ from the estimates and assessments made as of the date of preparation of these condensed interim consolidated financial statements.

In preparing these condensed interim consolidated financial statements, significant estimates and judgments made by Management in applying the Group's accounting policies and the main sources of uncertainty were consistent with those applied by the Group in the preparation of the annual consolidated financial statements, which are disclosed in Note 2.c) to the annual consolidated financial statements.

2.d) Comparative information

Amounts and other information corresponding to the year ended on December 31, 2016 and to the three-month period ended on March 31, 2016 are an integral part of these condensed interim consolidated financial statements and are intended to be read only in relation to these financial statements.

3. SEASONALITY OF OPERATIONS

Historically, the Group's results have been subject to seasonal fluctuations during the year, particularly as a result of the increase in natural gas sales during the winter. After the 2002 devaluation of the Argentine peso, and as a consequence of the natural gas price freeze imposed by the Argentine government, the use of natural gas has been diversified, generating an increase in demand throughout the entire year. However, sales of natural gas are still typically higher in the winter for the residential sector of the Argentine domestic market, which has lower prices than other sectors of the Argentine market. Notwithstanding the foregoing, under the Additional Injection Stimulus Program (see Note 30.h) to the annual consolidated financial statements), gas producing companies were invited to file with the MINEM before June 30, 2013 projects to increase natural gas injection, in order to receive an increased price of US\$ 7.50/MMBTU for all additional natural gas injected. These projects shall comply with the minimum requirements established in the aforementioned Program, and will be subject to approval by the MINEM, including a maximum term of five years, renewable at the request of the beneficiary, upon the decision of the MINEM. If the

beneficiary company does not reach the committed production increase in a given month, it will have to make up for such volumes not produced. The natural gas pricing program was incorporated into the Hydrocarbons Law, as modified by Law No. 27,007.

In view of the foregoing, seasonality of the Group operations is not significant.

4. ACQUISITIONS AND DISPOSITIONS

During the three-month period ended March 31, 2017, there have been no significant acquisitions or dispositions.

5. FINANCIAL RISK MANAGEMENT

The Group's activities are exposed to a variety of financial risks: market risk (including foreign currency risk, interest rate risk and price risk), credit risk and liquidity risk. The Group maintains an organizational structure and systems that allow for the identification, measurement and control of the risks to which it is exposed.

The condensed interim consolidated financial statements do not include all the information and disclosures on financial risk management; therefore, they should be read in conjunction with the Group's annual consolidated financial statements.

There have been no significant changes in the risk management or risk management policies applied by the Group since the last year end. See Note 4 to the annual consolidated financial statements.

6. SEGMENT INFORMATION

The different segments in which the Group is organized take into consideration the different activities from which the Group obtains income and incurs expenses. The aforementioned organizational structure is based on the way in which the highest authority in the decision-making process analyzes the main financial and operating magnitudes while making decisions about resource allocation and performance assessment also considering the Group's business strategy.

Upstream

The Upstream segment carries out all activities related to the oil and natural gas exploration, development and production.

It obtains its revenues from (i) the sale of produced oil to the Downstream segment and, marginally, from its sale to third parties; and (ii) the sale of produced gas to the Gas and Power segment, which includes the receipt of incentives from the Natural Gas Additional Injection Stimulus Program.

Gas and Power

On March 15, 2016, the Gas and Power Executive Vice-presidency was created, and during the previous fiscal year, the complete scope of management of this new business unit was determined.

The Gas and Power segment obtains its income from the development of activities related to: (i) the natural gas commercialization to third parties and the Downstream segment, (ii) the commercial and technical operation of LNG regasification terminals in Bahía Blanca and Escobar, by hiring two regasification vessels, (iii) the natural gas distribution, and (iv) the generation of conventional and renewable electricity,

In addition to the proceeds derived from the sale of natural gas to third parties and the intersegment, which is then recognized as a purchase to the Upstream segment, Gas and Power accrues a fee in its favor with the Upstream segment to carry out such commercialization.

The Gas and Power Executive Vice-presidency assumed, as of 2017, all responsibility for the administration and management of collections related to the Natural Gas Additional Injection Stimulus Program, and therefore began to record revenues derived from sales in the segment, to later be transferred to the Upstream segment as an intersegment operation.

6. SEGMENT INFORMATION (Cont.)

Downstream

The Downstream segment develops activities related to: (i) oil refining and petrochemical production, (ii) commercialization of refined and petrochemical products obtained from such processes, (iii) logistics related to the transportation of oil and gas to refineries and the transportation and distribution of refined and petrochemical products to be marketed in the different sales channels.

It obtains its income from the marketing mentioned in item (ii) above, which is developed through the Retail, Industry, Agro, LPG, Chemicals and Lubricants and Specialties businesses.

It incurs in all expenses related to the aforementioned activities, including the oil purchase from the Upstream segment and third parties and the natural gas to be consumed in the refinery and petrochemical industrial complexes from the Gas and Power segment.

Central Administration and Others

It covers other activities, not falling into the aforementioned categories, mainly including corporate administrative expenses and assets and construction activities.

Sales between business segments were made at internal transfer prices established by the Group, which generally seek to approximate market prices.

Operating income and assets for each segment have been determined after consolidation adjustments.

As required by IFRS 8, comparative information has been given retroactive effect by the creation of the new segment.

28. DECONSOLIDATION OF MAXUS ENTITIES

Reorganization process under Chapter 11 of the US Bankruptcy Law of Maxus Entities

On March 28, 2017, in connection with the reorganization proceedings under Chapter 11 of the United States Bankruptcy Code filed by Maxus Energy Corporation, Tierra Solutions Inc., Maxus International Energy Company, Maxus (US) Exploration Company and Gateway Coal Company (collectively, the Maxus Entities), the Creditors Committee and the Maxus Entities submitted an alternative restructuring plan (the Alternative Plan) that does not incorporate the agreement (the Agreement) with YPF, jointly with its subsidiaries YPF Holdings, CLH Holdings Inc., YPF International and YPF Services USA Corp (jointly, the YPF Entities), to settle any and all claims held by the Maxus Entities against the YPF Entities, including any alter ego claims, all of which claims the YPF Entities believe are without merit.

Under the Alternative Plan, a liquidating trust (the Liquidating Trust) may pursue alter ego claims or any other estate claims against the YPF Entities. The Liquidating Trust will be funded by Occidental Chemical Corporation, a creditor of the Maxus Entities.

As YPF does not approve of such Alternative Plan and the Alternative Plan does not contemplate the implementation of the Agreement originally submitted, this situation creates an event of default (Event of Default) under the loan granted within the scope of the Agreement with YPF and the YPF Entities (the DIP Loan), and on April 10, 2017, YPF Holdings sent a note to communicate this development. Additionally, on April 17, 2017, YPF Holdings communicated that the amounts due under the DIP Loan terms are an approximate total of US\$ 12.2 million.

On April 21, 2017, the Judge issued an order to authorize the repayment of amounts due under the terms of the DIP Loan through the approval of the financing offered by Occidental (Post-petition DIP Facility) within the scope of the Alternative Plan. The Alternative Plan remains subject to confirmation by the United States Bankruptcy Court of the District of Delaware. The hearing on the confirmation of the Alternative Plan is currently scheduled to begin in late May 2017.

Considering the preceding events mentioned, the Company s Management, in consultation with its legal advisors, estimates that the Agreement originally submitted has no reasonable prospect of final approval by the Judge and, accordingly, has reassessed the amounts reported considering the existing uncertainties and classified them as provisions in accordance with the accounting policies explained in Note 2.b.7) to the annual consolidated financial statements.

29. CONTINGENT ASSETS AND LIABILITIES

Contingent liabilities and contingent assets are described in Note 28 to the annual consolidated financial statements.

The Company will timely respond to the claim by filing all relevant procedural defenses.

On March 14, 2017, YPF was notified of SC Resolution No. 137 which, based on the prior opinion given by the CNDC, ordered the case closed for failure to establish collusive behavior by the companies sued and abuse of dominant market position by YPF.

29.b.4) Tax claims

Dispute over customs duties

On March 31, 2017, the Company resolved to pay the differences in export duties which had been objected to by several Customs authorities arising from future commitments to deliver crude oil, in accordance with the moratorium provided for by Law No. 27,260. This action made it possible to reduce interest and release the fines applied which were related to the substantial obligation. In that regard, the summaries and processes in which the application of a fine is in disputed when there are no export duties remain ongoing, in which case the fine provided for in Article 954 subsection c) would be applied, which figure amounts to 450 as of the date of these condensed interim consolidated financial statements.

Tariff renegotiation

i. Transitional Agreement 2017

On March 30, 2017, Metrogas signed a Transitional Agreement (Transitional Agreement 2017) with MINEM and the Ministry of Economy which provides for the temporary price and tariff adjustment to the Natural Gas Distribution Public Service, the specific allocation of the amounts set forth therein until the execution of the Memorandum of Agreement for the Comprehensive Contractual Renegotiation and the effective application of the final tariff schemes which result from the General Tariff Review. The Temporary Agreement 2017 is supplemental to the agreement approved by Decree No. 234 dated March 26, 2009, which extends the one approved by Decree No. 445 dated April 1, 2014 and the Transitional Agreement 2016.

The Transitional Agreement 2017, which is not subject to ratification by the National Executive Power, sets forth a temporary tariff scheme as of April 1, 2017 consisting of the readjustment of tariffs pursuant to the necessary guidelines to maintain the continuity of service in order to allow the licensee to manage its operation, maintenance, management and commercialization expenses, the disbursements corresponding to the execution of the mandatory investment plan determined by ENARGAS and to comply with the respective payment obligations, keeping its payment procedure for the purpose of ensuring the continued normal provision of the public service it is responsible

for until the effective date of the tariff scheme that derives from the Memorandum of Agreement for the Comprehensive Contractual Renegotiation.

Additionally, the Transitional Agreement 2017 incorporates a Mandatory Investment Plan led by Metrogas.

Finally, Metrogas may not distribute dividends without prior accreditation before the ENARGAS of its comprehensive compliance with the Mandatory Investment Plan.

On March 30, 2017, the MINEM instructed the ENARGAS, by means of Resolution No. 74 - E/2017, to make effective the tariff schemes resulting from the General Tariff Review stated in Article 1 of the MINEM Resolution No. 31 dated March 29, 2016 and carried out as per the provisions in the Memorandum of Agreement for the Comprehensive Contractual Renegotiation entered into with the licensees within the provisions of Law No. 25,561, as amended and supplemented.

In this sense, for the purpose of the gradual and progressive implementation of such measure, it established that the ENARGAS should apply the tariff increases resulting from the Comprehensive Tariff Review in stages according to the following progression: thirty percent (30%) of the increase, as from April 1, 2017; forty percent (40%) of the increase, as from December 1, 2017; and the remaining thirty percent (30%), as from April 1, 2018.

Moreover, and for the cases in which the corresponding Memorandum of Agreement for the Comprehensive Contractual Renegotiation had not become effective, it instructed the ENARGAS to apply to the licensees (among them, Metrogas) a transitional tariff adjustment on account of the Comprehensive Tariff Review.

Finally, ENARGAS Resolution No. 4,356/2017 approved the Semiannual Adjustment Methodology attached as Annex V and which will become effective jointly with the Memorandum of Agreement for the License Adjustment.

ii. Memorandum of Agreement for the Natural Gas Distribution License Contract

On March 30, 2017, Metrogas signed a Memorandum of Agreement for the Natural Gas Distribution License Contract Adjustment with MINEM and the Ministry of Economy. In the terms provided therein, a number of guidelines were established which shall contemplate the General Tariff Review process (non-automatic mechanisms for the adjustment of the distribution tariff among five-year tariff reviews, criteria for determining the capital base and the rate of return to apply, fees and charges, investment plan, etc.) and, subject to the effective application of the Memorandum of Agreement, it sets forth the suspension and withdrawal of all claims, appeals and lawsuits filed, pending or in the process of execution, whether in administrative, arbitration or judicial venues, in the Argentine Republic or abroad, which are based on or related to the facts or measures taken, regarding the License Contract, as from the Emergency Law and/or the annulment of the PPI (Producer Price Index of the United States of America).

For the effective implementation of the Memorandum of Agreement, this must be ratified by Metrogas Shareholders Meeting, in order for the National Executive Power to issue the ratifying Decree of the terms of the Memorandum of Agreement.

The Memorandum of Agreement also states that Metrogas shall commit to make, during the extension term of the license, plus its eventual ten-year extension and within the license area, additional sustainable investments equivalent to the amount of the award granted in the BG Group Plc. vs. The Argentine Republic (UNC 54 KGA) arbitration with the proportional percentage that had been established in the payment agreement and excluding the amounts corresponding to interest for a delay in the payment of the award. The plan of additional investments will be determined by ENARGAS at the Company's proposal, and they shall not be incorporated into the tariff base.

iii. Supplementary Agreement with Natural Gas Producers

By means of Resolution No. 74 E/2017, MINEM determined the new prices at the Entry Point to the Transportation System for natural gas which shall be applicable as of April 1, 2017 to the user categories therein indicated. Likewise, it determined the new discounted prices at the Entry Point to the Transportation System for residential users of natural gas that show savings in consumption equal to or higher than fifteen percent (15%) as compared to the same period of year 2015. These new prices at the Entry Point to the Transportation System have been contemplated in ENARGAS Resolution No. 4,356/2017.

Note from ENARGAS referred to the participation of YPF in Metrogas

On March 30, 2017, YPF filed for reconsideration and requested to render the note null and void and to issue a new decision that sets a reasonable and consistent term with the current reality of the gas market to comply with the provisions of Article 34 of Law No. 24,076.
