RAVEN INDUSTRIES, INC.

NOTES TO CONSOLIDATED FINANCIAL STATEMENTS

(unaudited)

(Dollars in thousands, except per-share amounts)

(1) BASIS OF PRESENTATION AND PRINCIPLES OF CONSOLIDATION

Raven Industries, Inc. (the Company or Raven) is a diversified technology company providing a variety of products to customers within the industrial, agricultural, energy, construction, and military/aerospace markets. The Company is comprised of three unique operating units, or divisions, classified into reportable segments: Applied Technology, Engineered Films, and Aerostar.

The accompanying unaudited consolidated financial information, which includes the accounts of Raven and its wholly-owned or controlled subsidiaries, net of intercompany balances and transactions which have been eliminated, has been prepared by the Company in accordance with accounting principles generally accepted in the United States of America (GAAP) for interim financial information and the instructions to Form 10-Q and Article 10 of Regulation S-X of the Securities and Exchange Commission (SEC). Accordingly, it does not include all of the information and notes required by GAAP for complete financial statements. This financial information should be read in conjunction with the consolidated financial statements and notes thereto included in the Company's Annual Report on Form 10-K for the fiscal year ended January 31, 2015.

In the opinion of management, all adjustments (consisting of normal recurring adjustments) considered necessary for a fair statement of this financial information have been included. Financial results for the interim three-month period ended April 30, 2015 are not necessarily indicative of the results that may be expected for the year ending January 31, 2016. The January 31, 2015 consolidated balance sheet was derived from audited financial statements, but does not include all disclosures required by GAAP. Preparing financial statements in conformity with GAAP requires management to make certain estimates and assumptions. These affect the reported amounts of assets and liabilities as of the date of the financial statements and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Noncontrolling interests represent capital contributions, income and loss attributable to the owners of less than wholly-owned consolidated entities. The Company owns a 75% interest in an entity consolidated under the Aerostar business segment. Given the Company's majority ownership interest, the accounts of the business venture have been consolidated with the accounts of the Company, and a noncontrolling interest has been recorded for the noncontrolling investor interests in the net assets and operations of the business venture.

(2) SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The Company prospectively adopted the straight-line method of depreciation for manufacturing equipment, office equipment, and furniture and fixtures placed in service on or after February 1, 2015. This change was made as a straight-line method of depreciation more accurately reflects the economic consumption of these assets than did the accelerated method previously used. This prospective change in the depreciation method did not have a material effect on the Company's financial position or results of operations for the first quarter of fiscal 2016.

There have been no material changes to the Company's significant accounting policies as described in the Company's Annual Report on Form 10-K for the fiscal year ended January 31, 2015

(3) NET INCOME PER SHARE

Basic net income per share is computed by dividing net income by the weighted average common shares and stock units outstanding. Diluted net income per share is computed by dividing net income by the weighted average common and common equivalent shares outstanding which includes the shares issuable upon exercise of employee stock options (net of shares assumed purchased with the option proceeds), stock units, and restricted stock units outstanding. Performance share awards are included in the diluted calculation based upon what would be issued if the end of the

most recent reporting period was the end of the term of the award.

Certain outstanding options and restricted stock units were excluded from the diluted net income per-share calculations because their effect would have been anti-dilutive under the treasury stock method.

#7

Edgar Filing: RAVEN INDUSTRIES INC - Form 10-Q

(Dollars in thousands, except per-share amounts)

The options and restricted stock units excluded from the diluted net income per-share share calculation were as follows:

	Three Months Ended	
	April 30, 2015	April 30, 2014
Anti-dilutive options and restricted stock units	1,103,707	257,216

The computation of earnings per share is presented below:

(Dollars in thousands, except per-share amounts)

(5) ACQUISITIONS OF AND INVESTMENTS IN BUSINESSES AND TECHNOLOGIES

Integra

Related to the fourth quarter fiscal 2015 acquisition of Integra Plastics, Inc. (Integra), the Company received \$351 in settlement of the working capital adjustment to the purchase price and finalized deferred tax calculations in fiscal 2016 first quarter. These transactions resulted in an adjustment of about \$20 to the purchase price allocation. As of as April 30, 2015, the purchase price valuation was \$48,262 with fair value of goodwill of \$27,422. None of this goodwill is tax deductible.

Acquisition-related contingent consideration

The Company has contingent liabilities related to prior year acquisitions of SBG Innovatie BV and its affiliate, Navtronics BVBA (collectively, SBG) in May 2014 and Vista in 2012 . In connection with the acquisition of SBG, Raven is committed to making additional earn-out payments, not to exceed \$2,500, calculated and paid quarterly for ten years after the purchase date contingent upon achieving certain revenues. The fair value of this contingent consideration was \$1,410, of which \$287 was classified as "Accrued liabilities" and \$1,123 was classified as "Other liabilities" in the Consolidated Balance Sheet for the period ended April 30, 2015. The Company paid \$29 in earn-out payments in the three months ended April 30, 2015.

Related to the acquisition of Vista Research, Inc. (Vista) in 2012, the Company is committed to making annual payments based upon earn-out percentages on specific revenue streams for seven years after the purchase date, not to exceed \$15,000. The fair value of this contingent consideration, estimated using forecasted discounted cash flows, is presented in the Consolidated Balance Sheets for the period ended April 30, 2015 and 2014, respectively. At April 30, 2015 the fair value of this contingent consideration was \$2,571, of which \$648 was classified in "Accrued liabilities" and \$1,923 as "Other liabilities". At April 30, 2014, the fair value of this contingent consideration was \$2,594, of which \$538 was classified as "Accrued liabilities" and \$2,056 as "Other liabilities". The Company paid \$585 and \$454 in the three-month periods ended April 30, 2015 and 2014, respectively.

(6) EMPLOYEE POSTRETIREMENT BENEFITS

The Company provides postretirement medical and other benefits to senior executive officers and senior managers. These plan obligations are unfunded. The components of net periodic benefit cost for postretirement benefits are as follows:

	Three Months Ended	
	April 30, 2015	April 30, 2014
Service cost	\$108	\$49
Interest cost	105	91
Amortization of actuarial losses	84	38
Net periodic benefit cost	\$297	\$178

Postretirement benefit cost components are reclassified in their entirety from accumulated other comprehensive loss to net periodic benefit cost. Net periodic benefit costs are reported in net income as "Cost of sales" or "Selling, general, and administrative expenses" in a manner consistent with the classification of direct labor and personnel costs of the eligible employees.

(7) WARRANTIES

Accruals necessary for product warranties are estimated based on historical warranty costs and average time elapsed between purchases and returns for each division. Additional accruals are made for any significant, discrete warranty

issues. Changes in the warranty accrual were as follows:

	Three Months Ended	
	April 30,	April 30,
	2015	2014
Beginning balance	\$3,120	\$2,525
Accrual for warranties	359	741
Settlements made	(1,194)	(612)
Ending balance	\$2,285	\$2,654

#10

(Dollars in thousands, except per-share amounts)

(8) FINANCING ARRANGEMENTS

On April 15, 2015 the Company's uncollateralized credit agreement with Wells Fargo Bank, N.A. (Wells Fargo) providing a line of credit of \$10,500 and maturing on November 30, 2016 was terminated upon the Company's entering into a new credit facility.

This new credit facility, the Credit Agreement dated as of April 15, 2015 among Raven Industries, Inc., JPMorgan Chase Bank, N.A., Toronto Branch as Canadian Administrative Agent, JPMorgan Chase Bank, National Association, as administrative agent, and each lender from time to time party thereto (the Credit Agreement), provides for a syndicated senior revolving credit facility up to \$125,000 with a maturity date of April 15, 2020. Debt issuance costs associated with this Credit Agreement were \$554 as of April 30, 2015.

Loans or borrowings defined under the Credit Agreement bear interest and fees at varying rates and terms defined in the Credit Agreement based on the type of borrowing as defined. The Credit Agreement contains customary affirmative and negative covenants, including those relating to financial reporting and notification, limits on levels of indebtedness and liens, investments, mergers and acquisitions, affiliate transactions, sales of assets, restrictive agreements and change in control as defined in the Credit Agreement. Financial covenants include an interest coverage ratio and funded indebtedness to earnings before interest, taxes, depreciation and amortization as defined in the Credit Agreement. \$125,000 was available under the Credit Agreement for borrowings as of April 30, 2015. The loan proceeds may be utilized by Raven for strategic business purposes and for working capital needs.

Simultaneous with execution of the Credit Agreement, Raven, Aerostar, Vista and Integra entered into a guaranty agreement in favor of JPMorgan Chase Bank National Association in its capacity of administrator under the Credit Agreement for the benefit of JPMorgan Chase Bank N.A., Toronto Branch and the lenders and their affiliates under the Credit Agreement.

Letters of credit totaling \$850, issued under the previous line of credit with Wells Fargo primarily to support self-insured workers' compensation bonding requirements, remain in place. The Company is in the process of moving these outstanding letters of credit under the new credit facility. Until such time as that is complete, any draws required under these letters of credit would be settled with available cash or borrowings under the Credit Agreement.

There were no borrowings under either credit agreement for any of the fiscal periods covered by this Quarterly Report on Form 10-Q.

(9) INCOME TAXES

The Company's effective tax rate varies from the federal statutory rate primarily due to state and local taxes and tax benefits on qualified production activities. The Company's tax rate for the three-month periods ended April 30, 2015 and 2014 were 32.2% and 32.9%, respectively.

As of April 30, 2015, undistributed earnings of approximately \$1,800 of the Canadian subsidiary were considered to have been reinvested indefinitely and, accordingly, the Company has not provided United States income taxes on such earnings. This estimated tax liability would be approximately \$270 net of foreign tax credits.

(10) RESTRUCTURING COSTS

On March 10, 2015, the Company announced and implemented a restructuring plan to further lower its cost structure. The cost reductions covered all divisions and included the corporate offices, but were heavily weighted to Applied Technology as a result of the significant decline in this business and the expectation of continued end-market

weakness for this division. This action was taken in addition to a preemptive restructuring of the Engineered Films Division taken in the fourth quarter of fiscal 2015 to address the expected decline in demand in the energy sector as the result of falling oil prices, as well as the Applied Technology restructuring announced in November 2014.

The Company incurred \$477 of restructuring costs for severance benefits in the three-months ended April 30, 2015 of which \$55 was unpaid as of April 30, 2015. The Company reported \$393 of this expense in cost of sales and the remaining \$84 in selling, general, and administrative expenses in the Consolidated Statements of Income and Comprehensive income. Substantially all of these restructuring costs related to the Applied Technology Division. The Company incurred no restructuring costs in the three-month period ended April 30, 2014.

Subsequent to the end of fiscal 2015, the Company announced that Applied Technology's remaining contract manufacturing operations in the St. Louis, Missouri area had been successfully sold and transferred. The exit activities related to this sale and

#11

(Dollars in thousands, except per-share amounts)

transfer were substantially completed during the first quarter. There were no impairments recorded as a result of the exit activity and a \$364 gain on sale was recorded in the three-month period ended April 30, 2015. Receivables for inventory and estimated future royalties pursuant to the sale agreements were \$789 and were reflected in "Other current assets" in the Consolidated Balance Sheet at April 30, 2015.

(11) DIVIDENDS AND TREASURY STOCK

Dividends paid to Raven shareholders were \$4,940, or 13.0 cents per share during the three months ended April 30, 2015 and \$4,371, or 12.0 cents per share during the three months ended April 30, 2014.

On November 30, 2014 the Company announced that its Board of Directors had authorized a \$40,000 stock buyback program. The remaining dollar value that may be purchased under the plan at April 30, 2015 is \$36,956.

(12) SHARE-BASED COMPENSATION

The Company reserves shares for issuance pursuant to the Amended and Restated 2010 Stock Incentive Plan effective March 23, 2012, administered by the Personnel and Compensation Committee of the Board of Directors. Two types of awards, stock options and restricted stock units, were granted during the three months ended April 30, 2015 and April 30, 2014.

Stock Option Awards

The Company granted 280,200 and 194,900 non-qualified stock options during the three-month periods ended April 30, 2015 and April 30, 2014, respectively. Options are granted with exercise prices not less than the market value of the Company's common stock at the date of grant. The stock options vest over a four-year period and expire after five years. Options contain retirement and change-in-control provisions that may accelerate the vesting period. The fair value of each option grant is estimated on the date of grant using the Black-Scholes option pricing model. The Company uses historical data to estimate option exercises and employee terminations within this valuation model.

The weighted average assumptions used for the Black-Scholes option pricing model by grant year are as follows:

	Three Months Ended			
	April 30, 2015		April 30, 2014	
Risk-free interest rate	1.34	%	1.32	%
Expected dividend yield	2.59	%	1.53	%
Expected volatility factor	36.81	%	38.65	%
Expected option term (in years)	3.75		4.00	
Weighted average grant date fair value	\$4.78		\$9.18	

Restricted Stock Unit Awards (RSUs)

The Company granted 19,250 and 19,040 time-vested RSUs to employees in the three-month periods ended April 30, 2015 and 2014, respectively. The fair value of a time-vested RSU is measured based upon the closing market price of the Company's common stock on the date of grant. The grant date fair value per share of the time-vested RSUs granted during the three months ended April 30, 2015 and 2014 was \$20.10 and \$32.75, respectively. Time-vested RSUs will vest if, at the end of the three-year period, the employee remains employed by the Company. RSUs contain retirement and change-in-control provisions that may accelerate the vesting period. Dividends are cumulatively earned on the time-vested RSUs over the vesting period.

The Company also granted performance-based RSUs in the three-month periods ended April 30, 2015 and 2014. The exact number of performance shares to be issued will vary from 0% to 150% of the target award, depending on the

Company's actual performance over the three-year period in comparison to the target award. The target award for the fiscal 2016 and 2015 grant is based on return on equity (ROE), which is defined as net income divided by the average of beginning and ending shareholders' equity. The performance-based RSUs will vest if, at the end of the three-year performance period, the Company has achieved certain performance goals and the employee remains employed by the Company. RSUs contain retirement and change-in-control provisions that may accelerate the vesting period.

Dividends are cumulatively earned on performance-based RSUs over the vesting period. The number of RSUs that will vest is determined by an estimated ROE target over the three-year performance period. The estimated ROE performance factors used to estimate the number of restricted stock units expected to vest are evaluated at least quarterly. The number of restricted stock units issued at the vesting date will be based on actual results.

#12

Edgar Filing: RAVEN INDUSTRIES INC - Form 10-Q

(Dollars in thousands, except per-share amounts)

The fair value of the performance-based restricted stock units is based upon the closing market price of the Company's common stock on the grant date. The number of performance-based RSUs granted is based on 100% of the target award. During the three-month periods ended April 30, 2015 and 2014, the Company granted 66,330 and 54,490 performance-based RSUs, respectively. The grant date fair value per share of these performance-based RSUs was \$20.10 and \$32.75, respectively.

(13) SEGMENT REPORTING

The Company's reportable segments are defined by their product lines which have been grouped in these segments based on common technologies, production methods, and inventories. Raven's reportable segments are Applied Technology Division, Engineered Films Division, and Aerostar Division. The Company measures the performance of its segments based on their operating income excluding administrative and general expenses. Other expense and income taxes are not allocated to individual operating segments, and assets not identifiable to an individual segment are included as corporate assets. Segment information is reported consistent with the Company's management reporting structure.

Business segment net sales and operating income results are as follows:

	Three Months Ended	
	April 30, 2015	April 30, 2014
Net sales		
Applied Technology Division	\$32,410	\$46,288
Engineered Films Division	31,321	42,207
Aerostar Division	6,554	17,665
Intersegment eliminations ^(a)	(12)	(3,650)
Consolidated net sales	\$70,273	\$102,510
Operating income		
Applied Technology Division	\$8,741	\$15,856
Engineered Films Division	4,471	5,863
Aerostar Division	(853)	11
Intersegment eliminations ^(a)	59	62
Total reportable segment income	12,418	21,792
Administrative and general expenses	(5,204)	(5,260)
Consolidated operating income	\$7,214	\$16,532

^(a) Fiscal 2016 intersegment sales were primarily sales from Engineered Films to Aerostar. Fiscal 2015 intersegment sales were comprised primarily of contract manufacturing sales from Aerostar to Applied Technology.

(14) NEW ACCOUNTING STANDARDS

Accounting Standards Adopted

In April 2015 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-04, "Compensation—Retirement Benefits (Topic 715) Practical Expedient for the Measurement Date of an Employer's Defined Benefit Obligation and Plan Assets" (ASU 2015-04). The amendments in ASU 2015-04 allow a reporting entity that may incur more costs than other entities when measuring the fair value of plan assets of a defined benefit pension or other postretirement benefit plan at other than a month-end to measure defined benefit plan assets and obligations using the month-end date that is closest to the date of event (such as a plan amendment, settlement, or curtailment that calls for a remeasurement in accordance with existing requirements) that is triggering the remeasurement. In addition, if a contribution or significant event occurs between the month-end date used to measure

defined benefit plan assets and obligations and an entity's fiscal year-end, the entity should adjust the measurement of defined benefit plan assets and obligations to reflect the effects of those contributions or significant events. However, an entity should not adjust the measurement of defined benefit plan assets and obligations for other events that occur between the month-end measurement and the entity's fiscal year-end that are not caused by the entity (for example, changes in market prices or interest rates). This practical expedient for the measurement date also applies to significant events that trigger a remeasurement in an interim period. An entity electing the practical expedient for the measurement date is required to disclose the accounting policy election and the date used to measure defined benefit plan assets and obligations in accordance with the amendments in ASU 2015-04. ASU 2015-04 is effective for fiscal years beginning after December 15, 2015. The Company may adopt the standard prospectively or retrospectively. Early adoption is permitted. The Company elected to prospectively early adopt ASU 2015-04. The Company's Plan that provides postretirement medical and other benefits, further described in Note 6

#13

(Dollars in thousands, except per-share amounts)

Employee Postretirement Benefits, did not have an event occur that would trigger a remeasurement in current period; therefore, the early adoption of this guidance did not have any impact on the Company's consolidated financial statements or results of operations for the period.

In April 2015 the FASB issued ASU No. 2015-03, "Interest—Imputation of Interest (Subtopic 835-30) Simplifying the Presentation of Debt Issuance Costs"(ASU 2015-03). The amendments in ASU 2015-03 simplify the presentation of debt issuance costs and require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. ASU 2015-03 is effective for fiscal years beginning after December 15, 2015. The amendments are required to be applied retrospectively to all prior periods presented and early adoption is permitted. The Company elected to early adopt ASU 2015-03. Adoption of this guidance did not have a significant impact on the Company's consolidated financial statements, or results of operations for the period since there were no prior period costs it applied to. Debt issuance costs associated with a credit facility discussed further in Note 8 Financing Arrangements have been presented as prescribed by ASU 2015-03.

In April 2014 the FASB issued ASU No. 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity" (ASU No. 2014-08). ASU No. 2014-08 changes the criteria for determining which disposals should be presented as discontinued operations and modifies the related disclosure requirements. Additionally, this guidance requires that a business that qualifies as held for sale upon acquisition should be reported as discontinued operations. This guidance became effective for the Company on February 1, 2015 and applies prospectively to new disposals and new classifications of disposal groups as held for sale after the effective date. The adoption of this guidance did not have an impact on the Company's consolidated financial statements, disclosures, or results of operations for the period.

In addition to the accounting pronouncements adopted and described above, the Company adopted various other accounting pronouncements that became effective in first quarter fiscal 2016. None of this guidance had a significant impact on the Company's consolidated financial statements, disclosures, or results of operations for the period.

Pending Accounting Standards

In April 2015 the Financial Accounting Standards Board FASB issued ASU No. 2015-05, "Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40) Customer's Accounting for Fees Paid in a Cloud Computing Arrangement" (ASU 2015-05). The amendments in ASU 2015-05 clarifies existing GAAP guidance about a customer's accounting for fees paid in a cloud computing arrangement with or without a software license. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service, and other similar hosting arrangements. ASU 2015-05 adds guidance to Subtopic 350-40, Intangibles—Goodwill and Other—Internal-Use Software, which will help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance does not change GAAP for a customer's accounting for service contracts. All software licenses within the scope of Subtopic 350-40 will be accounted for consistent with other licenses of intangible assets. ASU 2015-05 is effective for fiscal years beginning after December 15, 2015. The amendments are to be applied retrospectively to all prior periods presented. Early adoption is permitted. The Company is evaluating the impact the adoption of this guidance will have on its consolidated financial statements or results of operations.

In February 2015 the FASB issued ASU No. 2015-02, "Consolidation (Topic 810) Amendments to the Consolidation Analysis" (ASU 2015-02). The amendments in ASU 2015-02 affect reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: 1. Modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities; 2. Eliminate the presumption that a general partner should consolidate a limited partnership; 3. Affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships and 4. Provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940. ASU 2015-02 is effective for fiscal years beginning after December 15, 2015. Early adoption is permitted. ASU 2015-02 may be applied retrospectively or using a modified retrospective approach. The Company is evaluating the impact of this guidance on its consolidated legal entities and on its consolidated financial position, results of operations, or cash flows.

In May 2014 the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09). ASU 2014-09 provides a comprehensive new recognition model that requires recognition of revenue when a company transfers promised goods

#14

(Dollars in thousands, except per-share amounts)

or services to customers in an amount that reflects the consideration to which the company expects to receive in exchange for those goods or services. This guidance supersedes the revenue recognition requirements in FASB ASC Topic 605, "Revenue Recognition," and most industry-specific guidance. ASU 2014-09 defines a five-step process to achieve this core principle and, in doing so, companies will need to use more judgment and make more estimates than under the current guidance. It also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts. This guidance will be effective for the Company for fiscal 2018 and interim periods therein. The guidance may be applied using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). Early adoption is not permitted. The Company is currently evaluating the method of adoption and impact the adoption of ASU 2014-09 will have on the Company's consolidated financial position and results of operations.

Item 2. MANAGEMENT'S DISCUSSION AND ANALYSIS OF FINANCIAL CONDITION AND RESULTS OF OPERATIONS

The following commentary on the operating results, liquidity, capital resources and financial condition of Raven Industries, Inc. (the Company or Raven) should be read in conjunction with the unaudited Consolidated Financial Statements in Item 1 of Part 1 of this Quarterly Report on Form 10-Q and the Company's Annual Report on Form 10-K for the year ended January 31, 2015. There have been no material changes to the Company's critical accounting policies discussed therein.

EXECUTIVE SUMMARY

Raven is a diversified technology company providing a variety of products to customers within the industrial, agricultural, energy, construction, aerospace, and situational awareness markets. The Company is comprised of three unique operating units, classified into reportable segments: Applied Technology Division, Engineered Films Division, and Aerostar Division. As strategic actions have changed the Company's business over the last several years, Raven has remained committed to providing high-quality, high-value products. The Company's performance reflects our ongoing adjustment to conditions and opportunities.

Management uses a number of metrics to assess the Company's performance:

- Consolidated net sales, gross margins, operating income, operating margins, net income, and earnings per share
- Cash flow from operations and shareholder returns
- Return on sales, assets, and equity
- Segment net sales, gross profit, gross margins, operating income, and operating margins

Raven's growth strategy focuses on its proprietary product lines and the Company has made an intentional choice to move away from non-strategic product lines such as contract manufacturing. To assess the effectiveness of this strategy during the transition period, management is using two additional measures:

- Consolidated net sales excluding contract manufacturing sales (adjusted sales)
- Segment net sales excluding contract manufacturing sales (adjusted sales)

Information reported as net sales excluding contract manufacturing sales on both a consolidated and segment basis, exclude sales generated from contract manufacturing activities and do not conform to generally accepted accounting principles (GAAP). These non-GAAP measures should not be construed as an alternative to the reported results determined in accordance with GAAP. Management has included this non-GAAP information to assist in understanding the operating performance of the Company and its operating segments as well as the comparability of

results. This non-GAAP information provided may not be consistent with the methodologies used by other companies. All non-GAAP information is reconciled with reported GAAP results in the tables that follow.

Vision and Strategy

At Raven, our purpose is to solve great challenges. Great challenges require great solutions. Raven's three unique divisions share resources, ideas and a passion to create technology that helps the world grow more food, produce more energy, protect the environment, and live safely.

#15

The Raven business model is our platform for success. Our business model is defensible, sustainable, and gives us a consistent approach in the pursuit of quality financial results. This overall approach to creating value, which is employed across the three business segments, is summarized as follows:

- Intentionally serve a set of diversified market segments with attractive near- and long-term growth prospects;
- Consistently manage a pipeline of growth initiatives within our market segments;
- Aggressively compete on quality, service, innovation, and peak performance;
- Hold ourselves accountable for continuous improvement;
- Value our balance sheet as a source of strength and stability with which to pursue strategic acquisitions; and
- Make corporate responsibility a top priority.

This diversified business model enables us to better weather near-term challenges, while continuing to grow and build for our future. It is our culture and it is woven into how we do business.

The following discussion highlights the consolidated operating results for the fiscal first quarters ended April 30, 2015 and 2014. Segment operating results are more fully explained in the Results of Operations - Segment Analysis section.

(dollars in thousands, except per-share data)	Three Months Ended			
	April 30, 2015	April 30, 2014	% Change	
Net sales	\$70,273	\$102,510	(31.4)%
Gross profit	20,359	31,766	(35.9)%
Gross margins ^(a)	29.0	% 31.0	%	
Operating income	\$7,214	\$16,532	(56.4)%
Operating margins	10.3	% 16.1	%	
Net income attributable to Raven Industries, Inc.	\$4,855	\$11,038	(56.0)%
Diluted earnings per share	\$0.13	\$0.30		
Consolidated net sales excluding contract manufacturing sales ^(b)	\$68,171	\$96,164	(29.1)%
Operating cash flow	\$9,023	\$18,178		
Capital expenditures	\$(5,000)	\$(2,900)		
Cash dividends	\$(4,940)	\$(4,371)		

^(a)The Company's gross and operating margins may not be comparable to industry peers due to the diversity of its operations and variability in the classification of expenses across industries in which the Company operates.

^(b)Non-GAAP measure reconciled to GAAP in the following table.

Edgar Filing: RAVEN INDUSTRIES INC - Form 10-Q

The following table reconciles the reported net sales to adjusted sales, a non-GAAP financial measure. Adjusted sales exclude contract manufacturing and represent the Company's sales from proprietary products.

(dollars in thousands)	Three Months Ended		% Change	
	April 30, 2015	April 30, 2014		
Applied Technology				
Reported net sales	\$32,410	\$46,288	(30.0))%
Less: Contract manufacturing sales	547	1,515	(63.9))%
Applied Technology net sales, excluding contract manufacturing sales	\$31,863	\$44,773	(28.8))%
Aerostar				
Reported net sales	\$6,554	\$17,665	(62.9))%
Less: Contract manufacturing sales	1,555	8,217	(81.1))%
Aerostar net sales, excluding contract manufacturing sales	\$4,999	\$9,448	(47.1))%
Consolidated Raven				
Reported net sales	\$70,273	\$102,510	(31.4))%
Less: Contract manufacturing sales	2,102	9,732	(78.4))%
Plus: Aerostar sales to Applied Technology	—	3,386	(100.0))%
Consolidated net sales, excluding contract manufacturing sales	\$68,171	\$96,164	(29.1))%

For the fiscal 2016 first quarter, net sales were \$70.3 million, down \$32.2 million, or 31.4%, from \$102.5 million in the comparative period last year. The Company's operating income was \$7.2 million, down \$9.3 million, or 56.4% from \$16.5 million in first quarter fiscal 2015. All divisions reported lower net sales and operating income. The decline was principally due to weakness in Applied Technology and Engineered Films as each division is facing weak end-market demand conditions. For Aerostar, the timing of orders and contract wins relative to the prior year within the Vista radar business, lower volumes of stratospheric balloon sales, and the planned exit of contract manufacturing business led to lower sales and operating income. The Company is completing the exit of low-growth contract manufacturing business and is working to grow its strategic proprietary product sales both organically and through acquisition. In the first quarter of fiscal 2016, net sales excluding contract manufacturing sales decreased \$28.0 million, or 29.1%, to \$68.2 million as compared to \$96.2 million in the prior year first quarter.

Engineered Films' fiscal 2016 first quarter net sales decreased \$10.9 million, or 25.8%, compared to fiscal 2015 first quarter, primarily driven by markedly lower energy market demand. Operating income decreased 23.7% compared to the prior year. While value engineering efforts, pricing discipline, and favorable raw material comparisons benefited operating income, they were not enough to offset the impact of lower volume.

Applied Technology's fiscal 2016 first quarter net sales decreased \$13.9 million, or 30.0%, compared to the fiscal 2015 first quarter. The decline in sales was driven by a significant contraction in end-market demand. Sales to both original equipment manufacturer (OEM) and aftermarket customers declined by approximately 43% and 29%, respectively. Domestic and international sales declined by similar amounts during the quarter. Excluding contract manufacturing sales, Applied Technology's net sales for the quarter were down \$12.9 million, or 28.8%, to \$31.9 million as compared to \$44.8 million in the prior year. Operating income decreased \$7.1 million, or 44.9%, in the fiscal 2016 first quarter. The decline in operating income was primarily due to lower volume, offset somewhat by savings from cost reduction actions taken during the quarter.

Edgar Filing: RAVEN INDUSTRIES INC - Form 10-Q

Aerostar's fiscal 2016 first quarter net sales decreased \$11.1 million, or 62.9%, compared to fiscal 2015 first quarter due primarily to a planned shift away from Aerostar's contract manufacturing business. In addition, the timing of contract wins within Vista and lower sales of stratospheric balloons also contributed to the decline in sales for the division. Excluding contract manufacturing sales, Aerostar's net sales were down \$4.4 million, or 47.1%, to \$5.0 million as compared to \$9.4 million in the prior year. Operating income decreased nearly \$0.9 million from the prior year quarter, primarily due to lower sales volume of proprietary products.

#17

RESULTS OF OPERATIONS - SEGMENT ANALYSIS

Applied Technology

Applied Technology designs, manufactures, sells, and services innovative precision agriculture products and information management tools that help growers reduce costs, precisely control inputs, and improve yields for the global agriculture market.

(dollars in thousands)	Three Months Ended		\$ Change	% Change	
	April 30, 2015	April 30, 2014			
Net sales	\$32,410	\$46,288	\$(13,878)	(30.0)%	
Gross profit	13,251	21,588	(8,337)	(38.6)%	
Gross margins	40.9 %	46.6 %			
Operating expenses	\$4,510	\$5,732	\$(1,222)	(21.3)%	
Operating expenses as % of sales	13.9 %	12.4 %			
Operating income	\$8,741	\$15,856	\$(7,115)	(44.9)%	
Operating margins	27.0 %	34.3 %			
Applied Technology net sales, excluding contract manufacturing sales	\$31,863	\$44,773	\$(12,910)	(28.8)%	

The following factors were the primary drivers of the three-month year-over-year changes:

Market conditions. Deteriorating conditions in the agriculture market put pressure on Applied Technology during the first quarter of fiscal 2016. End-market demand has deteriorated from the beginning of the year and we believe these conditions will continue through our fiscal year 2016, and may persist well into next year. Corn prices have continued to slide since the beginning of the year and are now at 8-year lows. Farmer sentiment is weak and productivity investments are being delayed. Demand for high value Ag equipment such as sprayers, combines and high horse power tractors have been hit the hardest. With the world's population growing toward nine billion and income growth in emerging economies, greater demand for food will ultimately support healthy growth.

Sales volume. First quarter fiscal 2016 net sales decreased \$13.9 million, or 30%, to \$32.4 million compared to \$46.3 million in the prior year first quarter. Deteriorating demand in end markets across most of Applied Technology's product lines were partially offset by sales contributed by SBG. The sales decline was driven by contraction in both the OEM and aftermarket segments sales for fiscal 2016 first quarter, which were down about 43% and 29%, respectively during the quarter.

Strategic Sales. Applied Technology's net sales, excluding contract manufacturing sales, for fiscal 2016 first quarter were \$31.9 million, a decrease of \$12.9 million, or 28.8%, compared to fiscal 2015 first quarter net sales, excluding contract manufacturing sales of \$44.8 million.

International sales. For the three-month period, international sales totaled \$8.9 million, down 6.2% from the prior year comparative period. Lower sales in Brazil and Canada were the main drivers of the decline, partially offset by \$3.5 million of European revenues from the acquisition of SBG in fiscal 2015 second quarter. International sales represented 27% of segment revenue for the quarter compared to 20% in the prior year comparative period. Stronger volumes for SBG sales are typical in the first quarter of the fiscal year.

Gross margins. Gross margins decreased to 40.9% for the three months ended April 30, 2015 from 46.6% for the three months ended April 30, 2014. Lower net sales and lower production levels contributed to these lower margins.

Restructuring expenses. First quarter fiscal 2016 restructuring costs included severance and other related exit activity totaling \$0.4 million. This cost was offset by substantial completion of the St. Louis contract manufacturing exit activities during the first quarter. There were no impairments recorded as a result of the exit of this business and a \$0.4 million gain was recorded in the three-month period ended April 30, 2015. No restructuring or exit costs were incurred in the three-month period ended April 30, 2014.

Operating expenses. Fiscal 2016 first quarter operating expense as a percentage of net sales was 13.9%, up from 12.4% in the prior year first quarter. Lower spending levels in both research and development (R&D) and selling expense as a result of the costs savings initiatives were not enough to offset the lower sales volumes. The Company continues to invest in research and development efforts to drive innovation and product differentiation for when end-market conditions improve.

#18

Engineered Films

Engineered Films manufactures high performance plastic films and sheeting for energy, agricultural, construction, geomembrane, and industrial applications.

The Company acquired Integra Plastics, Inc. (Integra) in a merger that was effective November 3, 2014. This acquisition expanded Engineered Films' production capacity, broadened its product offerings, and enhanced current converting capabilities. Adding Integra's fabrication and conversion skill sets with Raven's ability to develop value-added innovative products enhances customer service and expands the converting capabilities of the division.

(dollars in thousands)	Three Months Ended			
	April 30, 2015	April 30, 2014	\$ Change	% Change
Net sales	\$31,321	\$42,207	\$(10,886)	(25.8)%
Gross profit	6,278	7,201	(923)	(12.8)%
Gross margins	20.0 %	17.1 %		
Operating expenses	\$1,807	\$1,338	\$469	35.1 %
Operating expenses as % of sales	5.8 %	3.2 %		
Operating income	\$4,471	\$5,863	\$(1,392)	(23.7)%
Operating margins	14.3 %	13.9 %		

The following factors were the primary drivers of the three-month year-over-year changes:

Market conditions. The fiscal 2015 acquisition of Integra better positions Engineered Films to adapt to sales channel changes and customers' complex conversion needs emerging in the energy market. The decline in oil prices has resulted in land-based rig counts decreasing about 50% year-over-year, significantly decreasing demand for films in the energy market. While the decline in oil prices has reduced demand for products in the energy market, it has also led to favorable raw material cost comparisons versus the prior year. Despite the overall contraction in demand in the agricultural equipment market served by Applied Technology, demand has continued to strengthen for agriculture barrier films used in high-value crop production.

Sales volume and selling prices. First quarter net sales were down 25.8% to \$31.3 million compared to prior year first quarter net sales of \$42.2 million. The decline in sales was driven primarily by a sharp decline in energy market sales of approximately 75%. The remaining markets were slightly up in the first quarter of fiscal 2015 compared to the prior year first quarter. Sales volume for the fiscal 2016 three-month period was down 31.4% and average selling prices for the same period were up approximately 8% compared to the prior year period.

Gross margins. For the three-month period, margins of 20% continued the trend of higher gross margins that started during the second half of fiscal 2015. These margins reflect the impact of value engineering, pricing discipline, and favorable raw material cost comparisons.

Operating expenses. Fiscal 2016 first quarter operating expense as a percentage of net sales was 5.8% compared to 3.2% in the prior year three-month period. Higher selling expense due to increased expenses associated with the Integra acquisition over lower sales volumes increased operating expense as a percentage of sales.

Aerostar

Aerostar serves aerospace and situational awareness markets and produces products as a contract manufacturing services provider. These contract manufacturing products have included military parachutes, uniforms, and protective wear as well as electronics manufacturing services. Aerostar designs and manufactures proprietary products including stratospheric balloons, tethered aerostats, and radar processing systems into the aerospace and situational awareness markets. These products can be integrated with additional third-party sensors to provide research, communications, and situational awareness capabilities to governmental and commercial customers. Like Applied Technology, Aerostar has largely completed its planned exit of low-growth contract manufacturing business to focus on growing strategic proprietary product sales.

Through Vista Research, Inc. (Vista) and a separate business venture that is majority-owned by the Company, Aerostar pursues potential product and support services contracts for agencies and instrumentalities of the U.S. and foreign governments. Vista positions the Company to meet growing global demand for lower-cost detection and tracking systems used by government and law enforcement agencies. As a leading provider of surveillance systems that enhance the effectiveness of radar using sophisticated algorithms, Vista products and services enhance Aerostar's security solutions.

#19

Edgar Filing: RAVEN INDUSTRIES INC - Form 10-Q

(dollars in thousands)	Three Months Ended			
	April 30, 2015	April 30, 2014	\$ Change	% Change
Net sales	\$6,554	\$17,665	\$(11,111)	(62.9)%
Gross profit	771	2,915	(2,144)	(73.6)%
Gross margins	11.8 %	16.5 %		
Operating expenses	\$1,624	\$2,904	\$(1,280)	(44.1)%
Operating expenses as % of sales	24.8 %	16.4 %		
Operating (loss) income	\$(853)	\$11	\$(864)	(7,854.5)%
Operating margins	(13.0)%	0.1 %		
Aerostar net sales, excluding contract manufacturing sales	4,999	9,448	\$(4,449)	(47.1)%

The following factors were the primary drivers of the three-month year-over-year changes:

Market conditions. Certain of Aerostar's markets are subject to significant variability due to U.S. federal spending. Uncertain demand in these markets continues in fiscal 2016. Aerostar's growth strategy emphasizes proprietary products and its focus is on proprietary technology including advanced radar systems, stratospheric balloons, and sales of aerostats in international markets. Aerostar is pioneering leading-edge applications of its high-altitude balloons in collaboration with Google on Project Loon, a program to provide high-speed wireless Internet accessibility and telecommunications to rural, remote, and under-served areas of the world.

Sales volumes. Net sales for the current quarter did not reach last year's first quarter levels, declining 62.9% from \$17.7 million to \$6.6 million. The decline was the result of both lower sales of proprietary products and the planned reduction in contract manufacturing sales. Contract manufacturing revenues declined \$6.7 million, or 81.1%, from \$8.2 million to \$1.6 million.

Proprietary revenues. As discussed previously, Aerostar's growth strategy centers on proprietary products. For the fiscal 2016 first quarter, revenues for proprietary products were \$5.0 million; a \$4.4 million, or 47%, decrease from the prior year first quarter. Sales of proprietary products were impacted partially by the timing of orders and contract wins relative to the prior year within the Vista radar business and lower volumes of stratospheric balloons.

Gross Margins. For the three-month period, margins decreased 4.7 percentage points compared to the prior year period. Fiscal 2016 first quarter results were negatively impacted by lower proprietary revenues, including Vista radar sales that normally carry higher margins.

Operating expenses. First quarter operating expense was \$1.6 million, a decrease from \$2.9 million, compared to the first quarter of fiscal 2015. Operating spending was constrained beginning in the second quarter of fiscal 2015, driving lower spending levels the fiscal 2016 first quarter.

Corporate Expenses (administrative expenses; other (expense), net; and income taxes)

(dollars in thousands)	Three Months Ended			
	April 30, 2015	April 30, 2014		
Administrative expenses	\$5,204	\$5,260		
Administrative expenses as a % of sales	7.4 %	5.1 %		
Other (expense), net	\$(44)	\$(79)		
Effective tax rate	32.2 %	32.9 %		

Administrative spending for the three-month period ended April 30, 2015 was down slightly compared to the three-month period ended April 30, 2014. This first quarter expense reflects the Company's cost control measures put in place starting in the fiscal 2015 second quarter to manage expenses relative to anticipated lower sales levels. These costs savings were offset by expenses related to acquisition and integration activity and, along with the lower sales levels, resulted in these expenses being 7.4% of sales for the current quarter as compared to 5.1% for the prior year

quarter.

Other income (expense), net consists primarily of activity related to the Company's equity investment, interest income, and foreign currency transaction gains or losses.

#20

The Company's fiscal 2016 first quarter effective tax rate decreased to 32.2% compared to 32.9% in the prior year due to lower pre-tax income in the current fiscal year and the geographic mix of earnings.

OUTLOOK

At Raven our enduring success is built on our ability to balance the Company's purpose and core values with necessary shifts in business strategy demanded by an ever-changing world.

For Applied Technology, end-market demand has deteriorated since the beginning of the year and the Company believes conditions will remain challenging throughout fiscal 2016, and may persist well into fiscal 2017. Corn prices continue to slide and are at 8-year lows. Farmer sentiment is weak and productivity investments are being delayed. As a result, the Company is reducing its cost structure while preserving its investments in research and development to maintain its commitment to long-term growth through new product innovation.

For Engineered Films, while oil prices have rebounded somewhat lately, the dramatic decline in oil prices continues to impact rig counts and oil well completion rates continue to decline. As a result, Engineered Films is not anticipating a quick recovery, rather a slow and more measured return in demand. Despite the favorable raw material cost comparisons for Engineered Films as a whole, the Company faces significant headwinds in the energy market. The second half of the fiscal year should be stronger than the first half, but will likely be down around the 50 percent level given where rig counts are today.

For Aerostar, the second half of the year is the seasonally-stronger half for proprietary products and the Company expects momentum to build throughout the year. With the exit of low-growth contract manufacturing business complete, Aerostar continues to develop new opportunities and make progress on key strategic programs relating to both radar and stratospheric balloon opportunities.

Completion of the planned run-off of the contract manufacturing business in both Applied Technology and Aerostar allows the Company to focus on growing strategic product sales both organically and through acquisition. Further, the challenges in agriculture have given the Company an opportunity to rebalance the profit mix by aggressively growing Engineered Films and Aerostar and that is a goal moving forward. As the Company transforms and evolves to capitalize on key growth opportunities, investment focus is on essential strategic initiatives that will directly fuel growth while continuing to reduce operating expenses.

In addition to two restructuring actions taken in fiscal 2015, on March 10, 2015 the Company announced and implemented a \$13.0 million restructuring plan to further lower Raven's cost structure. The cost reductions covered all divisions and included the corporate offices, but were heavily weighted to Applied Technology. These robust cost reduction measures will greatly benefit the year and help increase the Company's profit margin percentages in the quarters ahead; however, the Company did not realize the full benefit of these actions in the fiscal 2016 first quarter due to timing and associated one-time costs.

In aggregate, more than half of the Company's consolidated businesses are facing severe end-market demand challenges. As a result, the Company does not expect consolidated sales to grow over the prior fiscal year. The Company has adjusted its cost structure for the current level of demand and continues to look for opportunities to reduce expenses and further optimize our structure as necessary. While current end-market conditions are not conducive to growth, the Company believes in the long-term fundamentals of the markets it serves. Management is committed and confident that the Company will return to the growth rates consistent with its strategic objectives when commodity market conditions cycle in our favor. In the short term, the Company will continue to manage expenses, work diligently on margin improvement initiatives, and take the necessary actions to preserve the core capabilities of the organization. The Company will continue to focus on pursuing additional market share gains and leveraging its

innovative culture to introduce value-added product offerings to each of our core markets.

LIQUIDITY AND CAPITAL RESOURCES

The Company's balance sheet continues to reflect significant liquidity and a strong capital base. Management focuses on the current cash balance and operating cash flows in considering liquidity, as operating cash flows have historically been the Company's primary source of liquidity. Management expects that current cash, combined with the generation of positive operating cash flows, will be sufficient to fund the Company's normal operating, investing, and financing activities.

The Company's cash needs are seasonal, with working capital demands strongest in the first quarter. As a result, the discussion of trends in operating cash flows focuses on the primary drivers of year-over-year variability in working capital.

#21

Cash and cash equivalents totaled \$47.5 million at April 30, 2015, a decrease of \$4.4 million from \$51.9 million at January 31, 2015. The comparable balance one year earlier was \$63.4 million. The decrease from fiscal year-end was driven by increased working capital cash outflows and cash outflow for shares repurchased under the authorized \$40.0 million buyback plan.

At April 30, 2015 the Company held cash and cash equivalents of \$4.9 million and \$0.3 million of short-term investments in accounts outside the United States. These balances included undistributed earnings of foreign subsidiaries we consider to be indefinitely reinvested. If repatriated, undistributed earnings of approximately \$1.8 million would be subject to United States federal taxation. This estimated tax liability is approximately \$0.3 million net of foreign tax credits. Our liquidity is not materially impacted by the amount held in accounts outside of the United States.

The Company entered into a new credit agreement dated April 15, 2015. This new agreement (Credit Agreement), more fully described in Note 8 Financing Arrangements of this Form 10-Q, provides for a syndicated senior revolving credit facility up to \$125 million with a maturity date of April 15, 2020. There were no borrowings against the Credit Agreement in the fiscal quarter ended April 30, 2015 or outstanding balance under the Credit Agreement at April 30, 2015.

Letters of credit totaling \$0.9 million as of April 30, 2015, issued under the previous line of credit with Wells Fargo primarily to support self-insured workers' compensation bonding requirements, remain in place. The Company is in the process of moving these outstanding letters of credit under the new credit facility. Until such time as that is complete, any draws required under these letters of credit would be settled with available cash or borrowings under the Credit Agreement.

Operating Activities

Operating cash flows result primarily from cash received from customers, which is offset by cash payments for inventories, services, employee compensation, and income taxes. Management evaluates working capital levels through the computation of average days sales outstanding and inventory turnover. Average days sales outstanding is a measure of the Company's efficiency in enforcing its credit policy. The inventory turnover ratio is a metric used to evaluate the effectiveness of inventory management, with further consideration given to balancing the disadvantages of excess inventory with the risk of delayed customer deliveries.

Changes in inventory and accounts receivable generated \$6.2 million of cash in the first three months of fiscal 2016 compared to consuming \$0.8 million one year ago. Inventory levels have increased from \$55.2 million at January 31, 2015 to \$59.0 million at April 30, 2015. The Company's inventory turnover rate decreased from the prior year primarily due to higher average inventory levels at Engineered Films (trailing 12-month inventory turn of 4.5X in fiscal 2016 versus 5.1X in fiscal 2015). Inventory levels have increased as Engineered Films inventory levels were impacted by the recent acquisition of Integra together with advance production of grain covers for sale in future quarters. From an accounts receivable perspective, the end-market strategy for the energy market will continue to impact accounts receivable by stretching out cash collections and increase days sales outstanding during fiscal 2016. The trailing 12 months days sales outstanding was 55 days at April 30, 2015 and 50 days at April 30, 2014.

Investing Activities

Cash used in investing activities totaled \$4.4 million in the first three months of fiscal 2016 compared to \$3.0 million in the first three months of fiscal 2015. Capital expenditures totaled \$5.0 million in the first three months of fiscal 2016 compared to \$2.9 million in the first three months of fiscal 2015. The fiscal 2016 first quarter spending primarily relates to Engineered Films capacity expansion.

Management anticipates fiscal 2016 capital spending to be in the range of approximately \$13-15 million. Expansion of Engineered Films' capacity and Applied Technology's capital spending to advance product development are expected

to continue. In addition, management will evaluate strategic acquisitions that result in expanded capabilities and improved competitive advantages.

Cash inflow related to business acquisitions during the first quarter of fiscal 2016 related to the Company receiving a \$0.4 million settlement of the working capital adjustment to the Integra purchase price.

Financing Activities

Cash used in financing activities was \$9.0 million for the three months ended April 30, 2015 compared to \$4.8 million one year ago. Dividends of \$4.9 million, or 13.0 cents per share, were paid to Raven shareholders in the current year compared to dividends of \$4.4 million, or 12.0 cents per share in the prior year. During the three months ended April 30, 2015 and April 30, 2014, the Company made payments of \$0.6 million and \$0.5 million, respectively, on acquisition-related contingent liabilities.

The Company began purchasing common shares as part of the \$40.0 million share repurchase plan authorized in by the Company's Board of Directors in fiscal 2015. During first quarter of fiscal 2016, the Company paid \$2.6 million for share purchases settled. No shares were repurchased during first quarter of fiscal 2015.

During three months ended April 30, 2015, the Company paid \$0.5 million of debt issuance costs associated with the new Credit Agreement previously discussed. No debt issuance costs were paid during the three months ended April 30, 2014.

Financing cash outflows in the fiscal 2016 first quarter included a decrease for the employee taxes paid in relation to net settlement of restricted stock units (RSUs) that vested during the period. No RSUs vested in the first quarter of fiscal 2015.

OFF-BALANCE SHEET ARRANGEMENTS AND CONTRACTUAL OBLIGATIONS

Except as described above, there have been no material changes since the fiscal year ended January 31, 2015.

ACCOUNTING PRONOUNCEMENTS

Accounting Standards Adopted

In April 2015 the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) No. 2015-04, "Compensation—Retirement Benefits (Topic 715) Practical Expedient for the Measurement Date of an Employer's Defined Benefit Obligation and Plan Assets" (ASU 2015-04). The amendments in ASU 2015-04 allow a reporting entity that may incur more costs than other entities when measuring the fair value of plan assets of a defined benefit pension or other postretirement benefit plan at other than a month-end to measure defined benefit plan assets and obligations using the month-end date that is closest to the date of event (such as a plan amendment, settlement, or curtailment that calls for a remeasurement in accordance with existing requirements) that is triggering the remeasurement. In addition, if a contribution or significant event occurs between the month-end date used to measure defined benefit plan assets and obligations and an entity's fiscal year-end, the entity should adjust the measurement of defined benefit plan assets and obligations to reflect the effects of those contributions or significant events. However, an entity should not adjust the measurement of defined benefit plan assets and obligations for other events that occur between the month-end measurement and the entity's fiscal year-end that are not caused by the entity (for example, changes in market prices or interest rates). This practical expedient for the measurement date also applies to significant events that trigger a remeasurement in an interim period. An entity electing the practical expedient for the measurement date is required to disclose the accounting policy election and the date used to measure defined benefit plan assets and obligations in accordance with the amendments in ASU 2015-04. ASU 2015-04 is effective for fiscal years beginning after December 15, 2015. The Company may adopt the standard prospectively or retrospectively. Early adoption is permitted. The Company elected to prospectively early adopt ASU 2015-04. The Company's Plan that provides postretirement medical and other benefits, further described in Note 6 Employee Postretirement Benefits, did not have an event occur that would trigger a remeasurement in current period; therefore, the early adoption of this guidance did not have any impact on the Company's consolidated financial statements or results of operations for the period.

In April 2015 the FASB issued ASU No. 2015-03, "Interest—Imputation of Interest (Subtopic 835-30) Simplifying the Presentation of Debt Issuance Costs"(ASU 2015-03). The amendments in ASU 2015-03 simplify the presentation of debt issuance costs and require that debt issuance costs related to a recognized debt liability be presented in the balance sheet as a direct deduction from the carrying amount of that debt liability, consistent with debt discounts. The recognition and measurement guidance for debt issuance costs are not affected by the amendments in this update. ASU 2015-03 is effective for fiscal years beginning after December 15, 2015. The amendments are required to be applied retrospectively to all prior periods presented and early adoption is permitted. The Company elected to early adopt ASU 2015-03. Adoption of this guidance did not have a significant impact on the Company's consolidated financial statements, or results of operations for the period since there were no prior period costs it applied to. Debt issuance costs associated with a credit facility discussed further in Note 8 Financing Arrangements have been presented as prescribed by ASU 2015-03.

In April 2014 the FASB issued ASU No. 2014-08, "Presentation of Financial Statements (Topic 205) and Property, Plant, and Equipment (Topic 360): Reporting Discontinued Operations and Disclosures of Disposals of Components of an Entity" (ASU No. 2014-08). ASU No. 2014-08 changes the criteria for determining which disposals should be presented as discontinued operations and modifies the related disclosure requirements. Additionally, this guidance requires that a business that qualifies as held for sale upon acquisition should be reported as discontinued operations. This guidance became effective for the Company on February 1, 2015 and applies prospectively to new disposals and new classifications of disposal groups as held for sale after the effective date. The adoption of this guidance did not have an impact on the Company's consolidated financial statements, disclosures, or results of operations for the period.

In addition to the accounting pronouncements adopted and described above, the Company adopted various other accounting pronouncements that became effective in first quarter fiscal 2016. None of this guidance had a significant impact on the Company's consolidated financial statements, disclosures, or results of operations for the period.

#23

Pending Accounting Standards

In April 2015 the Financial Accounting Standards Board FASB issued ASU No. 2015-05, "Intangibles-Goodwill and Other-Internal-Use Software (Subtopic 350-40) Customer's Accounting for Fees Paid in a Cloud Computing Arrangement" (ASU 2015-05). The amendments in ASU 2015-05 clarifies existing GAAP guidance about a customer's accounting for fees paid in a cloud computing arrangement with or without a software license. Examples of cloud computing arrangements include software as a service, platform as a service, infrastructure as a service, and other similar hosting arrangements. ASU 2015-05 adds guidance to Subtopic 350-40, Intangibles—Goodwill and Other—Internal-Use Software, which will help entities evaluate the accounting for fees paid by a customer in a cloud computing arrangement. If a cloud computing arrangement includes a software license, then the customer should account for the software license element of the arrangement consistent with the acquisition of other software licenses. If a cloud computing arrangement does not include a software license, the customer should account for the arrangement as a service contract. The guidance does not change GAAP for a customer's accounting for service contracts. All software licenses within the scope of Subtopic 350-40 will be accounted for consistent with other licenses of intangible assets. ASU 2015-05 is effective for fiscal years beginning after December 15, 2015. The amendments are to be applied retrospectively to all prior periods presented. Early adoption is permitted. The Company is evaluating the impact the adoption of this guidance will have on its consolidated financial statements or results of operations.

In February 2015 the FASB issued ASU No. 2015-02, "Consolidation (Topic 810) Amendments to the Consolidation Analysis" (ASU 2015-02). The amendments in ASU 2015-02 affect reporting entities that are required to evaluate whether they should consolidate certain legal entities. All legal entities are subject to reevaluation under the revised consolidation model. Specifically, the amendments: 1. Modify the evaluation of whether limited partnerships and similar legal entities are variable interest entities (VIEs) or voting interest entities; 2. Eliminate the presumption that a general partner should consolidate a limited partnership; 3. Affect the consolidation analysis of reporting entities that are involved with VIEs, particularly those that have fee arrangements and related party relationships and 4. Provide a scope exception from consolidation guidance for reporting entities with interests in legal entities that are required to comply with or operate in accordance with requirements that are similar to those in Rule 2a-7 of the Investment Company Act of 1940. ASU 2015-02 is effective for fiscal years beginning after December 15, 2015. Early adoption is permitted. ASU 2015-02 may be applied retrospectively or using a modified retrospective approach. The Company is evaluating the impact of this guidance on its consolidated legal entities and on its consolidated financial position, results of operations, or cash flows

In May 2014 the FASB issued ASU No. 2014-09, "Revenue from Contracts with Customers" (ASU 2014-09). ASU 2014-09 provides a comprehensive new recognition model that requires recognition of revenue when a company transfers promised goods or services to customers in an amount that reflects the consideration to which the company expects to receive in exchange for those goods or services. This guidance supersedes the revenue recognition requirements in FASB ASC Topic 605, "Revenue Recognition," and most industry-specific guidance. ASU 2014-09 defines a five-step process to achieve this core principle and, in doing so, companies will need to use more judgment and make more estimates than under the current guidance. It also requires additional disclosure about the nature, amount, timing and uncertainty of revenue and cash flows arising from customer contracts. This guidance will be effective for the Company for fiscal 2018 and interim periods therein. The guidance may be applied using either of the following transition methods: (i) a full retrospective approach reflecting the application of the standard in each prior reporting period with the option to elect certain practical expedients or (ii) a retrospective approach with the cumulative effect of initially adopting ASU 2014-09 recognized at the date of adoption (which includes additional footnote disclosures). Early adoption is not permitted. The Company is currently evaluating the method of adoption and impact the adoption of ASU 2014-09 will have on the Company's consolidated financial position and results of operations.

FORWARD-LOOKING STATEMENTS

Certain statements contained in this Quarterly Report on Form 10-Q are “forward-looking statements” within the meaning of Section 27A of the Securities Act of 1933, as amended, and Section 21E of the Securities Exchange Act of 1934, as amended, including statements regarding the expectations, beliefs, intentions or strategies regarding the future. Without limiting the foregoing, the words “anticipates,” “believes,” “expects,” “intends,” “may,” “plans” and similar expressions are intended to identify forward-looking statements. The Company intends that all forward-looking statements be subject to the safe harbor provisions of the Private Securities Litigation Reform Act. Although management believes that the expectations reflected in forward-looking statements are based on reasonable assumptions, there is no assurance that these assumptions are correct or that these expectations will be achieved. Assumptions involve important risks and uncertainties that could significantly affect results in the future. These risks and uncertainties include, but are not limited to, those relating to weather conditions and commodity prices, which could affect sales and profitability in some of the Company’s primary markets, such as agriculture, construction, and oil and gas drilling; or changes in competition, raw material availability, technology or relationships with the Company’s largest customers, risks and uncertainties relating to development of new technologies to satisfy customer requirements, possible development of competitive technologies, ability to scale production of new products without negatively impacting quality and cost, and ability to finance investment and working capital needs for new development projects, any of which could adversely impact any of the Company's product lines, as well as other risks described in the Company's 10-K for the fiscal year ended January 31, 2015 under Item 1A.

#24

The foregoing list is not exhaustive, and the Company disclaims any obligation to subsequently revise any forward-looking statements to reflect events or circumstances after the date of such statements are made. Past financial performance may not be a reliable indicator of future performance and historical trends should not be used to anticipate results or trends in future periods.

ITEM 3. QUANTITATIVE AND QUALITATIVE DISCLOSURES ABOUT MARKET RISK

The exposure to market risks pertains mainly to changes in interest rates on cash and cash equivalents and short-term investments. The Company has no debt outstanding as of April 30, 2015. The Company does not expect operating results or cash flows to be significantly affected by changes in interest rates. Additionally, the Company does not enter into derivatives or other financial instruments for trading or speculative purposes. However, the Company does utilize derivative financial instruments to manage the economic impact of fluctuation in foreign currency exchange rates on those transactions that are denominated in currency other than its functional currency, which is the U.S. dollar. The use of these financial instruments had no material effect on the Company's financial condition, results of operations or cash flows.

The Company's subsidiaries that operate outside the United States use their local currency as the functional currency. The functional currency is translated into U.S. dollars for balance sheet accounts using the period-end exchange rates and average exchange rates for the statement of income. Adjustments resulting from financial statement translations are included as cumulative translation adjustments in accumulated other comprehensive income (loss) within shareholders' equity. Foreign currency transaction gains or losses are recognized in the period incurred and are included in "Other (expense), net" in the Consolidated Statements of Income and Comprehensive Income. Foreign currency fluctuations had no material effect on the Company's financial condition, results of operations or cash flows.

ITEM 4. CONTROLS AND PROCEDURES

Evaluation of Disclosure Controls and Procedures

Disclosure controls and procedures (as defined in Rules 13a-15(e) and 15d-15(e)) are our controls and other procedures that are designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Securities and Exchange Act of 1934, (the Exchange Act) is recorded, processed, summarized, and reported within the time periods specified in the SEC's rules and forms. Disclosure controls and procedures include, without limitation, controls and procedures designed to ensure that information required to be disclosed by us in the reports that we file or submit under the Exchange Act is accumulated and communicated to our management, including our Chief Executive Officer (CEO) and Chief Financial Officer (CFO), as appropriate to allow timely decisions regarding required disclosure.

As of April 30, 2015, the end of the period covered by this report, management evaluated the effectiveness of the Company's disclosure controls and procedures as of such date.

Based on their evaluation, the CEO and CFO have concluded that the Company's disclosure controls and procedures were effective at a reasonable assurance level as of April 30, 2015.

Changes in Internal Control over Financial Reporting

There were no changes in the Company's internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) that occurred during the quarter ended April 30, 2015 that have materially affected, or are reasonably likely to materially affect, the Company's internal control over financial reporting.

RAVEN INDUSTRIES, INC.

PART II — OTHER INFORMATION

Item 1. Legal Proceedings:

The Company is involved as a defendant in lawsuits, claims, regulatory inquiries, or disputes arising in the normal course of business. The potential costs and liability of such claims cannot be determined at this time. Management

believes that any liability resulting from these claims will be substantially mitigated by insurance coverage. Accordingly, management does not believe the ultimate outcome of these matters will be significant to its results of operations, financial position or cash flows.

Item 1A. Risk Factors:

The Company's business is subject to a number of risks, including those identified in Item 1A "Risk Factors" of the Company's Annual Report on Form 10-K for the year ended January 31, 2015, that could have a material effect on our business, results of operations, financial condition and/or liquidity and that could cause our operating results to vary significantly from fiscal period

Edgar Filing: RAVEN INDUSTRIES INC - Form 10-Q

(Dollars in thousands, except per-share amounts)

to fiscal period. The risks described in the Annual Report on Form 10-K are not the only risks we face. Additional risks and uncertainties not currently known to us, or that we currently deem to be immaterial, also could have a material effect on our business, results of operations, financial condition and/or liquidity.

Item 2. Unregistered Sales of Equity Securities and Use of Proceeds:

On November 3, 2014, the Company announced that its Board of Directors had authorized a \$40.0 million stock buyback program.

The Company made purchases of its own equity securities during first quarter of 2016 (recorded on trade date basis) as follows:

Period	Total number of shares purchased under the plan ^(a)	Weighted average price paid per share (or unit)	Total amount purchased including commissions ^(b)	Dollar value of shares (or units) that may be purchased under the plan
February 1 to February 28, 2015	—	\$—	\$—	\$40,000,000
March 1 to March 31, 2015	49,700	20.59	1,024,440	38,975,560
April 1 to April 30, 2015	99,659	20.25	2,019,616	36,955,944
Total	149,359	20.36	3,044,056	

^(a) Includes purchase of 24,059 shares not settled as of April 30, 2015.

^(b) Includes \$481,372 payable on trades not settled as of April 30, 2015.

Item 3. Defaults Upon Senior Securities: None

Item 4. Mine Safety Disclosures: None

Item 5. Other Information: None
