Internet Gold to Purchase Rights in Additional International Fiber Optic Lines

Wednesday November 16, 10:29 am ET

PETACH TIKVA, Israel, November 16 /PRNewswire-FirstCall/ -- Internet Gold (NASDAQ: IGLD - News) today announced that it has amended its long-term Rights Of Use (ROU) agreement with Barak I.T.C. (1995) Ltd increasing the number of international fiber optic lines that it shall activate in the future. The amendment improves Internet Gold's overall broadband capacity rights and reduces the average price of its international fiber optic lines.

Mr. Eli Holzman, CEO of Internet Gold, commented that "the agreement enhances Internet Gold's ability to provide first class high speed broadband connection service in the medium as well as long term. We estimate that the high penetration of Internet broadband connections in Israel combined with the broader ADSL and cable connections recently introduced to the market will require us to utilize this additional infrastructure in order to guarantee and improve our services and maintain our dominant role in the market."

About Internet Gold

Internet Gold is a communications company that provides Internet access and related value-added services, international telephony, e-advertising, content and e-Commerce services throughout Israel under the brand name "smile" to both residential and business customers.

Internet Gold's operations are carried out through four subsidiaries. Through MSN Israel, its (50.1% owned) joint-venture with Microsoft Corp. (49.9% owned), the Company operates several of Israel's Internet portals. Its fully-owned subsidiary, Internet Gold International, specializes in the provision of international Internet and communication services. Its fully-owned subsidiary, GoldMind, focuses on the provision of Internet value-added services. Through GoldTrade, its fully-owned e-Commerce subsidiary, the Company has established itself as one of Israel's leading e-Commerce providers.
