Time charter equivalent (TCE) rate (1)	\$10,416	\$7,069

Time charter equivalent rates, or TCE rates, are defined as our time charter revenues less voyage expenses during a period divided by the number of our available days during the period, which is consistent with industry standards.

Voyage expenses include port charges, bunker (fuel) expenses, canal charges and commissions. TCE is a (1) non-GAAP measure. TCE rate is a standard shipping industry performance measure used primarily to compare daily earnings generated by vessels on time charters with daily earnings generated by vessels on voyage charters, because charter hire rates for vessels on voyage charters are generally not expressed in per day amounts while charter hire rates for vessels on time charters are generally expressed in such amounts.

Daily vessel operating expenses, which include crew wages and related costs, the cost of insurance, expenses relating to repairs and maintenance, the costs of spares and consumable stores, tonnage taxes and other (2) miscellaneous expenses, are calculated by dividing vessel operating expenses by ownership days for the relevant period.
