## **PRESS RELEASE**

### **PORTUGAL TELECOM ACQUIRES BASIC NETWORK OWNERSHIP FOR EURO 365 MILLION INCLUDING THE RENTAL PAYMENT FOR 2002 AND WITH AN ESTIMATED NET DEBT IMPACT OF EURO 300 MILLION**

**Lisbon, Portugal, December 11, 2002** Portugal Telecom, SGPS, S.A. ("PT") (NYSE: PT; BVL: PTCO.IN) today announced that PT Comunicações S.A. ("PTC"), its fully owned fixed-line services subsidiary, has entered into a definitive agreement to acquire the ownership of the basic telecommunications network from the Portuguese Government.

Under the terms of the current Concession Contract, the Government grants to PTC the control and use of basic assets associated to the Concession for a fee equivalent to 1% of the voice revenues of the network. In addition, in year 2025, should the Portuguese Government not wish to renew the Concession, PTC is obliged to return the ownership of the network and assets related with the Concession to the Government.

PT today agreed to prepay the future rental payments due under the current Concession Contract in exchange for full ownership of the network and to ensure that there will be no reversion of the assets related to the provision of the Concession services to the Government at the end of the Concession period.

The Concession assets comprise the basic telecommunications network and are recorded in PTC's balance sheet as Concession assets with a net book value as at December 31, 2001 of Euro 2.3 billion and include all of basic network infrastructures (net book value of Euro 1.7 billion), real state (net book value of Euro 344 million) and other assets under Concession (net book value of Euro 259 million).

PT is confident that it will be able to realise significant savings and create value from additional financial flexibility resulting from the ownership of the network. Some of the initiatives contemplated by PT management to realise this value includes, but is not limited to, sale of excess real estate and a potential cross border sale and lease back ("QTE" - Qualified Technological Equipment) of the basic network, and may result in a net cash inflow in the range of Euro 80 million.

In addition, the Portuguese Government has agreed to fund certain services at PTC, namely Mobile Maritime Radio (which will be transferred to a third party within one year) and Telex and Telegraph services. In aggregate these service were loss making in 2001 amounting to Euro 6.5 million and going forward these costs will be borne by the Portuguese Government. Future losses from the transmission of TV and radio signals will also be financed by the Portuguese Government.

The consideration for the basic network has been agreed at Euro 365 million and includes the 2002 Concession rental payment estimated to be approximately Euro 18 million.

Edgar Filing: PORTUGAL TELECOM SGPS SA - Form 6-K

Accordingly, the consideration paid by PTC in this acquisition will be recorded as an intangible asset and will be amortised over 23 years.

Taking into account the payment by the Portuguese Government of receivables relating to certain benefits provided by PTC to Portuguese pensioners on behalf of the Government, under the terms of the current Concession Contract, the impact on the net debt of PT of this transaction is estimated to be an increase of around Euro 300 million.

Closing of the transaction is pending final documentation.
