ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Unaudited) .June 30, 2009

1. Nature of Business

Atmos Energy Corporation (Atmos Energy or the Company) and our subsidiaries are engaged primarily in the regulated natural gas distribution and transmission and storage businesses as well as certain other nonregulated businesses. Through our natural gas distribution business, we deliver natural gas through sales and transportation arrangements to approximately 3.2 million residential, commercial, public authority and industrial customers through our six regulated natural gas distribution divisions in the service areas described below:

Division Service Area

Atmos Energy Colorado-Kansas Division Colorado, Kansas, Missouri⁽¹⁾

Atmos Energy Kentucky/Mid-States Division Georgia⁽¹⁾, Illinois⁽¹⁾, Iowa⁽¹⁾, Kentucky, Missouri⁽¹⁾,

Tennessee, Virginia⁽¹⁾

Atmos Energy Louisiana Division Louisiana

Atmos Energy Mid-Tex Division Texas, including the Dallas/Fort Worth metropolitan

area

Atmos Energy Mississippi Division Mississippi Atmos Energy West Texas Division West Texas

In addition, we transport natural gas for others through our distribution system. Our natural gas distribution business is subject to federal and state regulation and/or regulation by local authorities in each of the states in which our natural gas distribution divisions operate. Our corporate headquarters and shared-services function are located in Dallas, Texas and our customer support centers are located in Amarillo and Waco, Texas.

Our regulated transmission and storage business consists of the regulated operations of our Atmos Pipeline Texas Division. The Atmos Pipeline Texas Division transports natural gas to our Mid-Tex Division, transports natural gas for third parties and manages five underground storage reservoirs in Texas. We also provide ancillary services customary to the pipeline industry including parking arrangements, lending services and sales of inventory on hand. Parking arrangements provide short-term interruptible storage of gas on our pipeline. Lending services provide short-term interruptible loans of natural gas from our pipeline to meet market demands.

Our nonregulated businesses operate primarily in the Midwest and Southeast and include our natural gas marketing operations and pipeline, storage and other operations. These businesses are operated through various wholly-owned subsidiaries of Atmos Energy Holdings, Inc. (AEH), which is wholly owned by the Company and based in Houston, Texas.

Our natural gas marketing operations are conducted through Atmos Energy Marketing, LLC (AEM), which is wholly owned by AEH. AEM provides a variety of natural gas management services to municipalities, natural gas utility

⁽¹⁾ Denotes states where we have more limited service areas.

systems and industrial natural gas customers, primarily in the Southeast and Midwest and to our Colorado-Kansas, Kentucky/Mid-States and Louisiana divisions. These services consist primarily of furnishing natural gas supplies at fixed and market-based prices, contract negotiation and administration, load forecasting, gas storage acquisition and management services, transportation services, peaking sales and balancing services, capacity utilization strategies and gas price hedging through the use of financial instruments.

6

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Our pipeline, storage and other segment consists primarily of the operations of Atmos Pipeline and Storage, LLC (APS). APS owns and operates a 21 mile pipeline located in New Orleans, Louisiana. This pipeline is used primarily to aggregate gas supply for our regulated natural gas distribution division in Louisiana and for AEM, but also provides limited third party transportation services.

APS also engages in asset optimization activities whereby it seeks to maximize the economic value associated with the storage and transportation capacity it owns or controls. Certain of these arrangements are asset management plans with regulated affiliates of the Company which have been approved by applicable state regulatory commissions. Generally, these asset management plans require APS to share with our regulated customers a portion of the profits earned from these arrangements.

Further, APS owns or has an interest in underground storage fields in Kentucky and Louisiana that are used to reduce the need of our natural gas distribution divisions to contract for pipeline capacity to meet customer demand during peak periods. Finally, APS manages our natural gas gathering operations, which were limited in nature as of June 30, 2009.

2. Unaudited Interim Financial Information

In the opinion of management, all material adjustments (consisting of normal recurring accruals) necessary for a fair presentation have been made to the unaudited consolidated interim-period financial statements. These consolidated interim-period financial statements are condensed as permitted by the instructions to Form 10-Q and should be read in conjunction with the audited consolidated financial statements of Atmos Energy Corporation included in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008. Because of seasonal and other factors, the results of operations for the nine-month period ended June 30, 2009 are not indicative of our results of operations for the full 2009 fiscal year, which ends September 30, 2009.

Significant accounting policies

Our accounting policies are described in Note 2 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008 and there have been no changes to those policies. However, during the nine months ended June 30, 2009, we recognized a non-recurring \$7.8 million increase in gross profit associated with a one-time update to our estimate for gas delivered to customers but not yet billed, resulting from base rate changes in several jurisdictions.

During the second quarter of fiscal 2009, we updated the tax rates used to record deferred taxes. The one-time tax benefit resulted in a favorable impact to net income of \$11.3 million.

Additionally, during the second quarter of fiscal 2009, we completed our annual goodwill impairment assessment. Based on the assessment performed, we determined that our goodwill was not impaired.

Effective October 1, 2008, the Company adopted Statement of Financial Accounting Standards (SFAS) 157, Fair Value Measurements, the measurement date requirements of SFAS 158, Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R), SFAS 159, The Fair Value Option for Financial Assets and Financial Liabilities Including an amendment of FASB Statement

No. 115 and SFAS 161, Disclosures about Derivative Instruments and Hedging Activities, an amendment of FASB Statement No. 133. Effective April 1, 2009, the Company adopted FASB Staff Position (FSP) FAS 107-1 and APB 28-1, Interim Disclosures about Fair Value of Financial Instruments, FSP FAS 115-2 and FAS 124-2, Recognition and Presentation of Other-Than-Temporary Impairments, FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly and SFAS 165, Subsequent Events. Except for the adoption of these accounting pronouncements, which are further discussed below, there were no significant changes to our accounting policies during the nine months ended June 30, 2009.

7

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

SFAS 157 defines fair value, establishes a framework for measuring fair value and enhances disclosure on fair value measurements required under other accounting pronouncements but does not change existing guidance as to whether or not an instrument is carried at fair value. The adoption of this standard did not materially impact our financial position, results of operations or cash flows. The new disclosures required by this standard are presented in Note 4.

Effective October 1, 2008, the Company adopted the measurement date requirements of SFAS 158 using the remeasurement approach. Under this approach, the Company remeasured our projected benefit obligation, fair value of plan assets and our fiscal 2009 net periodic cost. In accordance with the transition rules of SFAS 158, the impact of changing the measurement date from June 30, 2008 to September 30, 2008 decreased retained earnings by \$7.8 million, net of tax, decreased the unrecognized actuarial loss by \$9.0 million and increased our postretirement liabilities by \$3.5 million during the first quarter of fiscal 2009.

SFAS 159 permits an entity to measure certain financial assets and financial liabilities at fair value. The objective of the standard is to improve financial reporting by allowing entities to mitigate volatility in reported earnings caused by measuring related assets and liabilities differently without having to apply complex hedge accounting provisions. Entities that elect the fair value option will report unrealized gains and losses in earnings at each subsequent reporting date. The fair value option may be elected on an instrument-by-instrument basis. The fair value option is irrevocable, unless a new election date occurs. The adoption of this standard did not impact our financial position, results of operations or cash flows.

SFAS 161 expands the disclosure requirements for derivative instruments and hedging activities. This statement requires specific disclosures regarding how and why an entity uses derivative instruments; the accounting for derivative instruments and related hedged items; and how derivative instruments and related hedged items affect an entity s financial position, results of operations and cash flows. Since SFAS 161 only requires additional disclosures concerning derivatives and hedging activities, this standard did not have an impact on our financial position, results of operations or cash flows. The new disclosures required by this standard are presented in Note 3.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. This FSP requires companies to disclose the fair value of financial instruments for which it is practicable to estimate the value and the methods and significant assumptions used to estimate the fair value. The disclosure is required for interim and annual reports. The disclosure requirements of this FSP are presented in Note 4.

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. This FSP amends the other-than-temporary impairment guidance for debt securities to make the guidance more operational and to improve the presentation and disclosure of other-than-temporary impairments on debt and equity securities in the financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities. In addition, FSP FAS 115-2 and FAS 124-2 expands the existing disclosure requirements about debt and equity securities to interim reporting as well as provides new disclosure requirements. We adopted the provisions of this FSP for the quarter ended June 30, 2009. The adoption of FSP FAS 115-2 and FAS 124-2 did not impact our financial position, results of operations or cash flows. The disclosure requirements of this FSP are presented in Note 7.

In April 2009, the FASB issued FSP FAS 157-4, Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly. This FSP

provides further guidance for estimating fair value in accordance with SFAS 157 when there has been a significant decrease in market activity for a financial asset and also identifies circumstances that indicate a transaction is not orderly. The adoption of this FSP did not impact our financial position, results of operations or cash flows.

8

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

In May 2009, the FASB issued SFAS No. 165, *Subsequent Events*. SFAS 165 establishes general standards of accounting for and disclosure of events that occur after the balance sheet date but before the date the financial statements are issued or available to be issued. SFAS 165 requires companies to reflect in their financial statements the effects of subsequent events that provide additional evidence about conditions at the balance-sheet date. Subsequent events that provide evidence about conditions that arose after the balance-sheet date should be disclosed if the financial statements would otherwise be misleading. We adopted the provisions of SFAS 165 for quarter ended June 30, 2009. We have evaluated subsequent events from the balance sheet date through the date these financial statements were filed with the Securities and Exchange Commission. No events have occurred subsequent to the balance sheet date that would require recognition or disclosure in the financial statements.

Regulatory assets and liabilities

We record certain costs as regulatory assets in accordance with SFAS 71, *Accounting for the Effects of Certain Types of Regulation*, when future recovery through customer rates is considered probable. Regulatory liabilities are recorded when it is probable that revenues will be reduced for amounts that will be credited to customers through the ratemaking process. Substantially all of our regulatory assets are recorded as a component of deferred charges and other assets and substantially all of our regulatory liabilities are recorded as a component of deferred credits and other liabilities. Deferred gas costs are recorded either in other current assets or liabilities and the regulatory cost of removal obligation is reported separately.

Significant regulatory assets and liabilities as of June 30, 2009 and September 30, 2008 included the following:

| | June 30, 2009 (In tl | | | tember 30, 2008 ds) |
|--|----------------------------|---------|----|---------------------------|
| Regulatory assets: | | | | |
| Pension and postretirement benefit costs | \$ | 88,472 | \$ | 100,563 |
| Merger and integration costs, net | | 7,268 | | 7,586 |
| Deferred gas costs | | 24,355 | | 55,103 |
| Environmental costs | | 685 | | 980 |
| Rate case costs | | 7,640 | | 12,885 |
| Deferred franchise fees | | 577 | | 651 |
| Deferred income taxes, net | | 343 | | 343 |
| Other | | 7,085 | | 8,120 |
| | \$ | 136,425 | \$ | 186,231 |
| Regulatory liabilities: | | | | |
| Deferred gas costs | \$ | 97,495 | \$ | 76,979 |
| Regulatory cost of removal obligation | | 336,737 | | 317,273 |
| Other | | 5,429 | | 5,639 |

\$ 439,661 \$ 399,891

Currently, our authorized rates do not include a return on certain of our merger and integration costs; however, we recover the amortization of these costs. Merger and integration costs, net, are generally amortized on a straight-line basis over estimated useful lives ranging up to 20 years. Environmental costs have been deferred to be included in future rate filings in accordance with rulings received from various state regulatory commissions.

9

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Comprehensive income

The following table presents the components of comprehensive income (loss), net of related tax, for the three-month and nine-month periods ended June 30, 2009 and 2008:

| | Three Months Ended June 30 | | | | | | | |
|--|-------------------------------|--------|----|-----------------|------|---------------|----|---------|
| | 2 | 2009 | | 2008 (In the | ousa | 2009 ands) | | 2008 |

3. Financial Instruments

We currently use financial instruments to mitigate commodity price risk. Additionally, we periodically utilize financial instruments to manage interest rate risk. The objectives and strategies for using financial instruments have been tailored to our regulated and nonregulated businesses. The accounting for these financial instruments is fully described in Note 2 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008. Currently, we utilize financial instruments in our natural gas distribution, natural gas marketing and pipeline, storage and other segments. However, our pipeline, storage and other segment uses financial instruments acquired from AEM on the same terms that AEM received from

10

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

an independent counterparty. On a consolidated basis, these financial instruments are reported in the natural gas marketing segment. We currently do not manage commodity price risk with financial instruments in our regulated transmission and storage segment.

Our financial instruments do not contain any credit-risk-related or other contingent features that could cause accelerated payments when our financial instruments are in net liability positions.

Regulated Commodity Risk Management Activities

In our natural gas distribution segment, our customers are exposed to the effect of volatile natural gas prices. We manage this exposure through a combination of physical storage, fixed-price forward contracts and financial instruments, primarily over-the-counter swap and option contracts, in an effort to minimize the impact of natural gas price volatility on our customers during the winter heating season.

Our natural gas distribution gas supply department is responsible for executing this segment s commodity risk management activities in conformity with regulatory requirements. In jurisdictions where we are permitted to mitigate commodity price risk through financial instruments, the relevant regulatory authorities may establish the level of heating season gas purchases that can be hedged. If the regulatory authority does not establish this level, we typically seek to hedge between 25 and 50 percent of anticipated heating season gas purchases using financial instruments. For the 2008-2009 heating season, in the jurisdictions where we are permitted to utilize financial instruments, we hedged approximately 27 percent, or 24.3 Bcf of the winter flowing gas requirements. We have not designated these financial instruments as hedges pursuant to SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*.

The costs associated with and the gains and losses arising from the use of financial instruments to mitigate commodity price risk are included in our purchased gas adjustment mechanisms in accordance with regulatory requirements. Therefore, changes in the fair value of these financial instruments are initially recorded as a component of deferred gas costs and recognized in the consolidated statement of income as a component of purchased gas cost when the related costs are recovered through our rates and recognized in revenue in accordance with SFAS 71. Accordingly, there is no earnings impact to our natural gas distribution segment as a result of the use of financial instruments.

Nonregulated Commodity Risk Management Activities

Our natural gas marketing segment, through AEM, aggregates and purchases gas supply, arranges transportation and/or storage logistics and ultimately delivers gas to our customers at competitive prices. To facilitate this process, we utilize proprietary and customer-owned transportation and storage assets to provide the various services our customers request.

We also perform asset optimization activities in both our natural gas marketing segment and pipeline, storage and other segment. Through asset optimization activities, we seek to maximize the economic value associated with the storage and transportation capacity we own or control. We attempt to meet this objective by engaging in natural gas storage transactions in which we seek to find and profit from pricing differences that occur over time. We purchase physical natural gas and then sell financial instruments at advantageous prices to lock in a gross profit margin. We also seek to participate in transactions in which we combine the natural gas commodity and transportation costs to minimize costs incurred to serve our customers by identifying the lowest cost alternative within the natural gas

supplies, transportation and markets to which we have access. Through the use of transportation and storage services and financial instruments, we also seek to capture gross profit margin through the arbitrage of pricing differences that exist in various locations and by recognizing pricing differences that occur over time. Over time, gains and losses on the sale of storage gas inventory will be offset by gains and losses on the financial instruments, resulting in the realization of the economic gross profit margin we anticipated at the time we structured the original transaction.

11

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

As a result of these activities, our nonregulated operations are exposed to risks associated with changes in the market price of natural gas. We manage our exposure to such risks through a combination of physical storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. Futures contracts provide the right to buy or sell the commodity at a fixed price in the future. Option contracts provide the right, but not the requirement, to buy or sell the commodity at a fixed price. Swap contracts require receipt of payment for the commodity based on the difference between a fixed price and the market price on the settlement date.

We use financial instruments, designated as cash flow hedges of anticipated purchases and sales at index prices, to mitigate the commodity price risk in our natural gas marketing segment associated with deliveries under fixed-priced forward contracts to deliver gas to customers. These financial instruments have maturity dates ranging from one to 43 months. The effective portion of the unrealized gains and losses arising from the use of cash flow hedges is recorded as a component of accumulated other comprehensive income (AOCI) on the balance sheet. Amounts associated with cash flow hedges recognized in the income statement include (i) the amount of unrealized gain or loss that has been reclassified from AOCI when the hedged volumes are sold and (ii) the amount of ineffectiveness associated with these hedges in the period the ineffectiveness arises.

We use financial instruments, designated as fair value hedges, to hedge the exposure to changes in the fair value of our natural gas inventory used in our asset optimization activities in our natural gas marketing and pipeline, storage and other segments. Therefore, gains and losses arising from these financial instruments should offset the changes in the fair value of the hedged item to the extent the hedging relationship is effective. Ineffectiveness is recognized in the income statement in the period the ineffectiveness arises.

Our natural gas marketing segment also uses storage swaps and futures to capture additional storage arbitrage opportunities that arise subsequent to the execution of the original fair value hedge associated with our physical natural gas inventory, basis swaps to insulate and protect the economic value of our fixed price and storage books and various over-the-counter and exchange-traded options. These financial instruments have not been designated as hedges pursuant to SFAS 133, *Accounting for Derivative Instruments and Hedging Activities*.

Our nonregulated risk management activities are controlled through various risk management policies and procedures. Our Audit Committee has oversight responsibility for our nonregulated risk management limits and policies. A risk committee, comprised of corporate and business unit officers, is responsible for establishing and enforcing our nonregulated risk management policies and procedures.

Under our risk management policies, we seek to match our financial instrument positions to our physical storage positions as well as our expected current and future sales and purchase obligations to maintain no open positions at the end of each trading day. The determination of our net open position as of any day, however, requires us to make assumptions as to future circumstances, including the use of gas by our customers in relation to our anticipated storage and market positions. Because the price risk associated with any net open position at the end of each day may increase if the assumptions are not realized, we review these assumptions as part of our daily monitoring activities. Our operations can also be affected by intraday fluctuations of gas prices, since the price of natural gas purchased or sold for future delivery earlier in the day may not be hedged until later in the day. At times, limited net open positions related to our existing and anticipated commitments may occur. At the close of business on June 30, 2009, AEH had net open positions (including existing storage) of 0.3 Bcf.

Interest Rate Risk Management Activities

In March 2009, we entered into a Treasury lock agreement to fix the Treasury yield component of the interest cost associated with our \$450 million 8.50% senior notes (the Senior Notes Offering), which was completed on March 26, 2009. The Senior Notes Offering is discussed in Note 5. We designated this Treasury

12

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

lock as a cash flow hedge of an anticipated transaction. This Treasury lock was settled on March 23, 2009 with the receipt of \$1.9 million from the counterparty due to an increase in the 10 year Treasury rates between inception of the Treasury lock and settlement. Because the Treasury lock was effective, the net \$1.2 million unrealized gain was recorded as a component of accumulated other comprehensive income and will be recognized as a component of interest expense over the 10 year life of the senior notes.

In prior years, we similarly managed interest rate risk by entering into Treasury lock agreements to fix the Treasury yield component of the interest cost associated with anticipated financings. These Treasury locks were settled at various times at a net loss. These realized gains and losses were recorded as a component of accumulated other comprehensive income (loss) and are being recognized as a component of interest expense over the life of the associated notes from the date of settlement. The remaining amortization periods for these Treasury locks extend through fiscal 2035. However, the majority of the remaining amounts of these Treasury locks will be recognized through fiscal 2019.

Quantitative Disclosures Related to Financial Instruments

The following tables present detailed information concerning the impact of financial instruments on our condensed consolidated balance sheet and income statements.

As of June 30, 2009, our financial instruments were comprised of both long and short commodity positions. A long position is a contract to purchase the commodity, while a short position is a contract to sell the commodity. As of June 30, 2009, we had net long/(short) commodity contracts outstanding in the following quantities:

| Contract Type | Hedge Designation | Natural Gas Distribution | Natural Gas Marketing Quantity (MMc | Pipeline, Storage and Other f) |
|---------------------|-------------------------|--------------------------------|--|---|
| Commodity contracts | Fair Value Cash Flow | | (22,905) 31,993 | (2,050) (4,118) |
| | Not designated | 21,702 | 84,606 | (51) |
| | | 21,702 | 93,694 | (6,219) |

Financial Instruments on the Balance Sheet

The following tables present the fair value and balance sheet classification of our financial instruments by operating segment as of June 30, 2009 and September 30, 2008. As required by SFAS 161, the fair value amounts below are presented on a gross basis and do not reflect the netting of asset and liability positions permitted under the terms of our master netting arrangements. Further, the amounts below do not include \$20.6 million and \$56.6 million of cash held on deposit in margin accounts as of June 30, 2009 and September 30, 2008 to collateralize certain financial instruments. Therefore, these gross balances are not indicative of either our actual credit exposure or net economic

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Impact of Financial Instruments on the Income Statement

The following tables present the impact that financial instruments had on our condensed consolidated income statement, by operating segment, as applicable, for the three and nine months ended June 30, 2009 and 2008.

Hedge ineffectiveness for our natural gas marketing and pipeline storage and other segments is recorded as a component of unrealized gross profit and primarily results from differences in the location and timing of the derivative instrument and the hedged item. Hedge ineffectiveness could materially affect our results of operations for the reported period. For the three months ended June 30, 2009 and 2008 we recognized a gain (loss) arising from fair value and cash flow hedge ineffectiveness of \$0.2 million and \$(4.7) million. For the nine months ended June 30, 2009 and 2008 we recognized a gain arising from fair value and cash flow hedge ineffectiveness of \$24.7 million and \$40.6 million. Additional information regarding ineffectiveness recognized in the income statement is included in the tables below.

Fair Value Hedges

The impact of commodity contracts designated as fair value hedges and the related hedged item on our condensed consolidated income statement for the three and nine months ended June 30, 2009 and 2008 is presented below.

| Timing ineffectiveness | | 16,812 | | 4,704 | | 21,516 | |
| | \$ | 21,770 | \$ | 4,704 | \$ | 26,474 | |

| | Nine M Natural Gas arketing | Pip Stora O | Ended June beline, age and ther housands) | e 30, 2008 Consolidated | | |
|---|--------------------------------------|-------------------|---|----------------------------|---------------------|--|
| Commodity contracts Fair value adjustment for natural gas inventory designated as the hedged item | \$ (66,612) 104,288 | \$ | (662) 3,841 | \$ | (67,274) 108,129 | |
| Total impact on revenue | \$ 37,676 | \$ | 3,179 | \$ | 40,855 | |
| The impact on revenue is comprised of the following: Basis ineffectiveness Timing ineffectiveness | \$ (1,185) 38,861 | \$ | 3,179 | \$ | (1,185) 42,040 | |
| | \$ 37,676 | \$ | 3,179 | \$ | 40,855 | |

Basis ineffectiveness arises from natural gas market price differences between the locations of the hedged inventory and the delivery location specified in the hedge instruments. Timing ineffectiveness arises due to changes in the difference between the spot price and the futures price, as well as the difference between the timing of the settlement of the futures and the valuation of the underlying physical commodity. As the commodity contract nears the

settlement date, spot to forward price differences should converge, which should reduce or eliminate the impact of this ineffectiveness on revenue.

Financial Instruments Not Designated as Hedges

The impact of financial instruments that have not been designated as hedges on our condensed consolidated income statements for the three and nine months ended June 30, 2009 and 2008 is presented below. Note that this presentation does not reflect the expected gains or losses arising from the underlying physical transactions associated with these financial instruments. Therefore, this presentation is not indicative of the economic gross profit we realized when the underlying physical and financial transactions were settled.

As discussed above, financial instruments used in our natural gas distribution segment are not designated as hedges. However, there is no earnings impact to our natural gas distribution segment as a result of the use of these financial instruments because the gains and losses arising from the use of these financial instruments are recognized in the consolidated statement of income as a component of purchased gas cost when the related costs are recovered through our rates and recognized in revenue. Accordingly, the impact of these financial instruments is excluded from this presentation.

4. Fair Value Measurements

In September 2006, the Financial Accounting Standards Board (FASB) issued SFAS 157, *Fair Value Measurements*, which defines fair value, establishes a framework for measuring fair value in generally accepted accounting principles (GAAP) and expands disclosures about fair value measurements. This Statement does not require any new fair value measurements; rather it provides guidance on how to perform fair value measurements as required or permitted under previous accounting pronouncements.

We prospectively adopted the provisions of SFAS 157 on October 1, 2008 for most of the financial assets and liabilities recorded on our balance sheet at fair value. Adoption of this statement for these assets and liabilities did not have a material impact on our financial position, results of operations or cash flows.

In February 2008, the FASB issued FSP FAS 157-2, *Effective Date of FASB Statement No. 157*, which provided a one-year deferral of SFAS 157 for nonrecurring fair value measurements associated with our nonfinancial assets and liabilities. Under this partial deferral, SFAS 157 will not be effective until October 1, 2009 for fair value measurements for the following:

Asset retirement obligations

Most nonfinancial assets and liabilities that may be acquired in a business combination

Impairment analyses performed for nonfinancial assets

We believe the adoption of SFAS 157 for the reporting of these nonfinancial assets and liabilities will not have a material impact on our financial position, results of operations or cash flows.

In October 2008, the FASB issued FSP FAS 157-3, *Determining the Fair Value of a Financial Asset When the Market for That Asset Is Not Active*, which clarified the application of SFAS 157 in inactive markets. This FSP did not impact our financial position, results of operations or cash flows.

SFAS 157 also applies to the valuation of our pension and post-retirement plan assets. The adoption of this standard did not affect these valuations because SFAS 157 specifically excluded pension and post-retirement assets from its prescribed disclosure provisions. Accordingly, these plan assets are not included in the tabular disclosures below. However, in December 2008, the FASB issued FSP FAS 132(R)-1 *Employers*

19

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Disclosures about Postretirement Benefit Plan Assets, which will, among other things, require disclosure about fair value measurements similar to those required by SFAS 157. This FSP will impact our annual disclosure requirements beginning in fiscal 2010.

In April 2009, the FASB issued FSP FAS 157-4, *Determining Fair Value When the Volume and Level of Activity for the Asset or Liability Have Significantly Decreased and Identifying Transactions That Are Not Orderly.* This FSP provides further guidance for estimating fair value in accordance with SFAS 157 when there has been a significant decrease in market activity for a financial asset and also identifies circumstances that indicate a transaction is not orderly. The adoption of this FSP did not impact our financial position, results of operations or cash flows.

In April 2009, the FASB issued FSP FAS 107-1 and APB 28-1, *Interim Disclosures about Fair Value of Financial Instruments*. This FSP requires companies to disclose the fair value of financial instruments for which it is practicable to estimate the value and the methods and significant assumptions used to estimate the fair value. We have adopted the disclosure requirements of this FSP, which are presented below.

Determining Fair Value

SFAS 157 defines fair value as the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date (exit price). We primarily use quoted market prices and other observable market pricing information in valuing our financial assets and liabilities and minimize the use of unobservable pricing inputs in our measurements.

Prices actively quoted on national exchanges are used to determine the fair value of most of our assets and liabilities recorded on our balance sheet at fair value. Within our nonregulated operations, we utilize a mid-market pricing convention (the mid-point between the bid and ask prices) as a practical expedient for determining fair value measurement, as permitted under SFAS 157. Values derived from these sources reflect the market in which transactions involving these financial instruments are executed. We utilize models and other valuation methods to determine fair value when external sources are not available. Values are adjusted to reflect the potential impact of an orderly liquidation of our positions over a reasonable period of time under then-current market conditions. We believe the market prices and models used to value these assets and liabilities represent the best information available with respect to closing exchange and over-the-counter quotations, time value and volatility factors underlying the assets and liabilities.

Fair-value estimates also consider our own creditworthiness and the creditworthiness of the counterparties involved. Our counterparties consist primarily of financial institutions and major energy companies. This concentration of counterparties may materially impact our exposure to credit risk resulting from market, economic or regulatory conditions. Recent adverse developments in the global financial and credit markets have made it more difficult and more expensive for companies to access the short-term capital markets, which may negatively impact the creditworthiness of our counterparties. A continued tightening of the credit markets could cause more of our counterparties to fail to perform. We seek to minimize counterparty credit risk through an evaluation of their financial condition and credit ratings and the use of collateral requirements under certain circumstances.

SFAS 157 establishes a fair value hierarchy that prioritizes the inputs used to measure fair value based on observable and unobservable data. The hierarchy categorizes the inputs into three levels, with the highest priority given to

unadjusted quoted prices in active markets for identical assets and liabilities (Level 1) and the lowest priority given to unobservable inputs (Level 3). The levels of the hierarchy are described below:

<u>Level 1</u> Unadjusted quoted prices in active markets for identical assets or liabilities. An active market for the asset or liability is defined as a market in which transactions for the asset or liability occur with sufficient frequency and volume to provide pricing information on an ongoing basis. Our Level 1 measurements consist primarily of exchange-traded financial instruments, gas stored underground that has been designated as the hedged item in a fair value hedge and our available-for-sale securities.

20

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

<u>Level 2</u> Pricing inputs other than quoted prices included in Level 1 that are either directly or indirectly observable for the asset or liability as of the reporting date. These inputs are derived principally from, or corroborated by, observable market data. Our Level 2 measurements primarily consist of non-exchange-traded financial instruments, such as over-the-counter options and swaps where market data for pricing is observable.

<u>Level 3</u> Generally unobservable pricing inputs which are developed based on the best information available, including our own internal data, in situations where there is little if any market activity for the asset or liability at the measurement date. The pricing inputs utilized reflect what a market participant would use to determine fair value. Currently, we have no assets or liabilities recorded at fair value that would qualify for Level 3 reporting.

Quantitative Disclosures

Financial Instruments

The classification of our fair value measurements requires judgment regarding the degree to which market data are observable or corroborated by observable market data. The following table summarizes, by level within the fair value hierarchy, our assets and liabilities that were accounted for at fair value on a recurring basis as of June 30, 2009. As required under SFAS 157, assets and liabilities are categorized in their entirety based on the lowest level of input that is significant to the fair value measurement.

- (1) This column reflects adjustments to our gross financial instrument assets and liabilities to reflect netting permitted under our master netting agreements and FSP FIN 39-1. In addition, as of June 30, 2009, we had \$20.6 million of cash held in margin accounts to collateralize certain financial instruments. Of this amount, \$0.1 million was used to offset financial instruments in a liability position. The remaining \$20.5 million has been reflected as a financial instrument asset.
- (2) Our pipeline, storage and other segment uses financial instruments acquired from AEM on the same terms that AEM received from an independent counterparty. On a consolidated basis, these financial instruments are reported in the natural gas marketing segment; however, the underlying hedged item is reported in the pipeline, storage and other segment.

21

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Other Fair Value Measures

In addition to the financial instruments above, we have several nonfinancial assets and liabilities subject to fair value measures. These assets and liabilities include cash and cash equivalents, accounts receivable, accounts payable, debt, asset retirement obligations and pension and post-retirement plan assets. As noted above, fair value disclosures for asset retirement obligations and pension and post-retirement plan assets are not currently effective for us. We record cash and cash equivalents, accounts receivable, accounts payable and debt at carrying value. For cash and cash equivalents, accounts receivable and accounts payable, we consider carrying value to materially approximate fair value due to the short-term nature of these assets and liabilities. The fair value of our debt is determined using a discounted cash flow analysis based upon borrowing rates currently available to us, the remaining average maturities and our credit rating. The following table presents the carrying value and fair value of our debt as of June 30, 2009:

| | (In thousands) |
|-----------------|----------------|
| Carrying Amount | \$ 2,172,893 |
| Fair Value | \$ 2,068,388 |

June 30, 2009

The fair value as of June 30, 2009 was calculated utilizing discount rates ranging from 3.5 percent to 7.2 percent, remaining average maturities ranging from one to 26 years, and a credit adjustment of 2.9 percent.

5. Debt.

Long-term debt

Long-term debt at June 30, 2009 and September 30, 2008 consisted of the following:

| | June 30, 2009 | • | tember 30, 2008 | | | | |

22

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

On March 26, 2009, we closed our Senior Notes Offering. The effective interest rate on these notes is 8.69 percent, after giving effect to the settlement of the \$450 million Treasury lock discussed in Note 3. Most of the net proceeds of approximately \$446 million were used to redeem our \$400 million 4.00% unsecured senior notes on April 30, 2009, prior to their October 2009 maturity. In connection with the repayment of the \$400 million 4.00% unsecured senior notes, we paid a \$6.6 million call premium in accordance with the terms of the senior notes and accrued interest of approximately \$0.6 million. The remaining net proceeds were used for general corporate purposes.

Short-term debt

Our short-term borrowing requirements are affected by the seasonal nature of the natural gas business. Changes in the price of natural gas and the amount of natural gas we need to supply our customers needs could significantly affect our borrowing requirements. Our short-term borrowings typically reach their highest levels in the winter months.

We finance our short-term borrowing requirements through a combination of a \$566.7 million commercial paper program and four committed revolving credit facilities with third-party lenders that provide approximately \$1.3 billion of working capital funding. At June 30, 2009, there was no short-term debt outstanding. At September 30, 2008, there was \$350.5 million of short-term debt outstanding, comprised of \$330.5 million outstanding under our bank credit facilities and \$20.0 million outstanding under our commercial paper program. We also use intercompany credit facilities to supplement the funding provided by these third-party committed credit facilities. These facilities are described in greater detail below.

Regulated Operations

We fund our regulated operations as needed primarily through a \$566.7 million commercial paper program and three committed revolving credit facilities with third-party lenders that provide approximately \$800 million of working capital funding. The first facility is a five-year unsecured facility, expiring December 2011, that bears interest at a base rate or at a LIBOR-based rate for the applicable interest period, plus a spread ranging from 0.30 percent to 0.75 percent, based on the Company s credit ratings. This credit facility serves as a backup liquidity facility for our commercial paper program. At the time this credit facility was established, borrowings under this facility were limited to \$600 million. However, in September 2008, the limit on borrowings was effectively reduced to \$566.7 million after one lender with a 5.55% share of the commitments ceased funding under the facility. On March 30, 2009, the credit facility was amended to reflect this reduction. At June 30, 2009, there were no borrowings under this facility and \$566.7 million was available.

The second facility is a \$212.5 million unsecured 364-day facility expiring October 2009, that bears interest at a base rate or at a LIBOR-based rate for the applicable interest period, plus a spread ranging from 1.25 percent to 2.50 percent, based on the Company s credit ratings. At June 30, 2009, there were no borrowings outstanding under this facility.

The third facility was an \$18 million unsecured facility that bore interest at a daily negotiated rate, generally based on the Federal Funds rate plus a variable margin. This facility expired on March 31, 2009 and was replaced with a \$25 million unsecured facility effective April 1, 2009 that bears interest at a daily negotiated rate. At June 30, 2009, there were no borrowings outstanding under this facility.

The availability of funds under these credit facilities is subject to conditions specified in the respective credit agreements, all of which we currently satisfy. These conditions include our compliance with financial covenants and the continued accuracy of representations and warranties contained in these agreements. We are required by the financial covenants in each of these facilities to maintain, at the end of each fiscal quarter, a ratio of total debt to total capitalization of no greater than 70 percent. At June 30, 2009, our total-debt-to-

23

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

total-capitalization ratio, as defined, was 52 percent. In addition, both the interest margin over the Eurodollar rate and the fee that we pay on unused amounts under each of these facilities are subject to adjustment depending upon our credit ratings.

In addition to these third-party facilities, our regulated operations have a \$200 million intercompany revolving credit facility with AEH. Through December 31, 2008, this facility bore interest at the one-month LIBOR rate plus 0.20 percent. In January 2009, this facility was replaced with a new \$200 million 364 day-facility that bears interest at the lower of (i) the one-month LIBOR rate plus 0.45 percent or (ii) the marginal borrowing rate available to the Company on the date of borrowing. The marginal borrowing rate is defined as the lower of (i) a rate based upon the lower of the Prime Rate or the Eurodollar rate under the five year revolving credit facility or (ii) the lowest rate outstanding under the commercial paper program. Applicable state regulatory commissions have approved the new facility through December 31, 2009. There was \$40.3 million outstanding under this facility at June 30, 2009.

Nonregulated Operations

On December 30, 2008, AEM and the participating banks amended and restated AEM s former uncommitted credit facility, primarily to convert the \$580 million uncommitted demand credit facility to a 364-day \$375 million committed revolving credit facility and extend it to December 29, 2009. Effective April 1, 2009, the borrowing base was increased to \$450 million through the exercise of an accordion feature in the facility.

The amended facility also adds a swing line loan feature; adjusts the interest rate on borrowings as discussed below and increases the fees paid to reflect the facility s conversion to a committed facility and current credit market conditions. The swing line loan feature allows AEM to borrow, on a same day basis, an amount ranging from \$17 million to \$27 million based on the terms of an election within the agreement.

AEM uses this facility primarily to issue letters of credit and, on a less frequent basis, to borrow funds for gas purchases and other working capital needs. At AEM s option, borrowings made under the credit facility are based on a base rate or an offshore rate, in each case plus an applicable margin. The base rate is a floating rate equal to the higher of: (a) 0.50 percent per annum above the latest federal funds rate; (b) the per annum rate of interest established by BNP Paribas from time to time as its prime rate or base rate for U.S. dollar loans; (c) an offshore rate (based on LIBOR with a one-month interest period) as in effect from time to time; and (d) the cost of funds rate based on an average of interest rates reported by one or more of the lenders to the administrative agent. The offshore rate is a floating rate equal to the higher of (a) an offshore rate based upon LIBOR for the applicable interest period; and (b) a cost of funds rate referred to above. In the case of both base rate and offshore rate loans, the applicable margin ranges from 2.250 percent to 2.625 percent per annum, depending on the excess tangible net worth of AEM, as defined in the credit facility. This facility is collateralized by substantially all of the assets of AEM and is guaranteed by AEH.

At June 30, 2009, there were no borrowings outstanding under this credit facility. However, at June 30, 2009, AEM letters of credit totaling \$24.0 million had been issued under the facility, which reduced the amount available by a corresponding amount. The amount available under this credit facility is also limited by various covenants, including covenants based on working capital. Under the most restrictive covenant, the amount available to AEM under this credit facility was \$100.6 million at June 30, 2009.

AEM is required by the financial covenants in this facility to maintain a ratio of total liabilities to tangible net worth that does not exceed a maximum of 5 to 1. At June 30, 2009, AEM s ratio of total liabilities to tangible net worth, as defined, was 0.86 to 1. Additionally, AEM must maintain minimum levels of net working capital and net worth ranging from \$75 million to \$112.5 million. As defined in the financial covenants, at June 30, 2009, AEM s net working capital was \$195.5 million and its tangible net worth was \$210.5 million.

24

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

To supplement borrowings under this facility, through December 31, 2008, AEM had a \$200 million intercompany demand credit facility with AEH, which bore interest at the rate for AEM s offshore borrowings under its committed credit facility plus 0.75 percent. Amounts outstanding under this facility are subordinated to AEM s committed credit facility. This facility was replaced with another \$200 million 364-day facility in January 2009 with no material changes to its terms except for the rate of interest, which is the greater of (i) the one-month LIBOR rate plus 2.00 percent or (ii) the rate for AEM s offshore borrowings under its committed credit facility plus 0.75 percent. There were no borrowings outstanding under this facility at June 30, 2009.

Finally, through December 31, 2008, AEH had a \$200 million intercompany demand credit facility with AEC, which bore interest at the rate for AEM s offshore borrowings under its committed credit facility plus 0.75 percent. This facility was replaced with another \$200 million 364-day facility in January 2009 with no material changes to its terms except for the rate of interest, which is the greater of (i) the one-month LIBOR rate plus 2.00 percent or (ii) the rate for AEM s offshore borrowings under its committed credit facility plus 0.75 percent. Applicable state regulatory commissions have approved the new facility through December 31, 2009. There were no borrowings outstanding under this facility at June 30, 2009.

Shelf Registration

On March 23, 2009, we filed a registration statement with the Securities and Exchange Commission (SEC) to issue, from time to time, up to \$900 million in common stock and/or debt securities available for issuance, including approximately \$450 million of capacity carried over from our prior shelf registration statement filed with the SEC in December 2006.

As of June 30, 2009, we had \$450 million of availability remaining under the registration statement after completing our Senior Notes Offering. However, due to certain restrictions placed by one state regulatory commission on our ability to issue securities under the registration statement, we now have remaining and available for issuance a total of approximately \$300 million of equity securities and \$150 million of subordinated debt securities.

Debt Covenants

In addition to the financial covenants described above, our debt instruments contain various covenants that are usual and customary for debt instruments of these types.

Additionally, our public debt indentures relating to our senior notes and debentures, as well as our revolving credit agreements, each contain a default provision that is triggered if outstanding indebtedness arising out of any other credit agreements in amounts ranging from in excess of \$15 million to in excess of \$100 million becomes due by acceleration or is not paid at maturity.

Further, AEM s credit agreement contains a cross-default provision whereby AEM would be in default if it defaults on other indebtedness, as defined, by at least \$250 thousand in the aggregate.

Finally, AEM s credit agreement contains a provision that would limit the amount of credit available if Atmos Energy were downgraded below an S&P rating of BBB and a Moody s rating of Baa2. We have no other triggering events in our debt instruments that are tied to changes in specified credit ratings or stock price, nor have we entered into any

transactions that would require us to issue equity, based on our credit rating or other triggering events.

We were in compliance with all of our debt covenants as of June 30, 2009. If we were unable to comply with our debt covenants, we would likely be required to repay our outstanding balances on demand, provide additional collateral or take other corrective actions.

25

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

6. Earnings Per Share

Basic and diluted earnings per share for the three and nine months ended June 30, 2009 and 2008 are calculated as follows:

| | Three Months Ended June 30 | | | Nine Months Ended June 30 | | | | | |
|---|-------------------------------|--------|------|------------------------------|-----------------------|---------|------|---------|--|
| | | 2009 | | 2008 | | 2009 | 2008 | | |
| | | (In th | ousa | nds, excep | pt per share amounts) | | | | |
| Net income (loss) | \$ | 1,964 | \$ | (6,588) | \$ | 206,930 | \$ | 178,749 | |
| Denominator for basic income per share weighted average common shares Effect of dilutive securities: | e | 91,338 | | 89,648 | | 90,940 | | 89,281 | |
| Restricted and other shares | | 616 | | | 611 557 | | | | |
| Stock options | | 48 | | | | 39 | | 99 | |
| Denominator for diluted income per share weighted average common shares | | 92,002 | | 89,648 | | 91,590 | | 89,937 | |
| Income (loss) per share basic | \$ | 0.02 | \$ | (0.07) | \$ | 2.28 | \$ | 2.00 | |
| Income (loss) per share diluted | \$ | 0.02 | \$ | (0.07) | \$ | 2.26 | \$ | 1.99 | |

There were approximately 33,000 and 132,000 out-of-the-money stock options excluded from the computation of diluted earnings per share for the three and nine months ended June 30, 2009.

There were approximately 557,000 restricted and other shares and approximately 99,000 stock options that were excluded from the calculation of diluted earnings per share for the three months ended June 30, 2008 as their inclusion in the computation would be anti-dilutive. There were no out-of-the-money stock options excluded from the computation of diluted earnings per share for the three and nine months ended June 30, 2008 as their exercise price was less than the average market price of the common stock during that period.

7. Interim Pension and Other Postretirement Benefit Plan Information

The components of our net periodic pension cost for our pension and other postretirement benefit plans for the three and nine months ended June 30, 2009 and 2008 are presented in the following table. Most of these costs are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our gas distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

| Net periodic pension cost | \$ | 17,373 | \$ | 18,176 | \$ | 18,813 | \$ | 17,748 | | |

The assumptions used to develop our net periodic pension cost for the three and nine months ended June 30, 2009 and 2008 are as follows:

| | Pension B | Benefits | Other B | enefits |
|--------------------------------|-----------|----------|---------|---------|
| | 2009 | 2008 | 2009 | 2008 |
| Discount rate | 7.57% | 6.30% | 7.57% | 6.30% |
| Rate of compensation increase | 4.00% | 4.00% | 4.00% | 4.00% |
| Expected return on plan assets | 8.25% | 8.25% | 5.00% | 5.00% |

The discount rate used to compute the present value of a plan s liabilities generally is based on rates of high-grade corporate bonds with maturities similar to the average period over which the benefits will be paid. Generally, our funding policy has been to contribute annually an amount in accordance with the requirements of the Employee Retirement Income Security Act of 1974. In accordance with the Pension Protection Act of 2006 (PPA), we determined the funded status of our plans as of January 1, 2009. In June 2009, we contributed \$21 million in cash to our pension plans to achieve a desired level of funding while maximizing the tax deductibility of this payment.

We contributed \$8.2 million to our other post-retirement benefit plans during the nine months ended June 30, 2009. We expect to contribute a total of approximately \$11 million to these plans during fiscal 2009.

In April 2009, the FASB issued FSP FAS 115-2 and FAS 124-2, *Recognition and Presentation of Other-Than-Temporary Impairments*. This FSP amends the other-than-temporary impairment guidance for debt securities and expands the presentation and disclosure of other-than-temporary impairments on debt and equity securities in interim and annual financial statements. This FSP does not amend existing recognition and measurement guidance related to other-than-temporary impairments of equity securities.

For our Supplemental Executive Benefit Plans, we own equity securities that are classified as available-for-sale securities. These securities are reported at market value with unrealized gains and losses shown as a component of accumulated other comprehensive income (loss). We regularly evaluate the performance of these investments on a fund by fund basis for impairment, taking into consideration the fund s purpose, volatility and current returns. If a determination is made that a decline in fair value is other than temporary, the related fund is written down to its estimated fair value and the other-than-temporary impairment is recognized in the income statement.

27

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

Assets for the supplemental plans are held in separate rabbi trusts and comprise the following:

| | Amortized Cost | Gross Unrealized Gain (In tho | Gross Unrealized Loss ousands) | Fair Value |
|------------------------------|-------------------|--|---|---------------|
| As of June 30, 2009: | | | | |
| Domestic equity mutual funds | \$ 25,824 | \$ 286 | \$ | \$ 26,110 |
| Foreign equity mutual funds | 4,047 | | | 4,047 |
| Money market funds | 8,699 | | | 8,699 |
| | \$ 38,570 | \$ 286 | \$ | \$ 38,856 |
| As of September 30, 2008: | | | | |
| Domestic equity mutual funds | \$ 31,041 | \$ 1,625 | \$ (394) | \$ 32,272 |
| Foreign equity mutual funds | 5,309 | 359 | | 5,668 |
| | \$ 36,350 | \$ 1,984 | \$ (394) | \$ 37,940 |

The following table presents interest and dividends on available-for-sale securities for the three and nine months ended June 30, 2009 and 2008:

| | T | hree Mor | ths Ended | Nino Mon | 4h a Essa | J.J | |
|------------------------------|----|----------|------------------------------|------------------|-----------|-------|--|
| | | Jun | Nine Months Ended June 30 | | | | |
| | 2 | 009 | 2008 (In t | 2009 ands) | : | 2008 | |
| Interest Dividends | \$ | 8 184 | \$ 190 | \$ 8 1,607 | \$ | 2,032 | |
| Total interest and dividends | \$ | 192 | \$ 190 | \$ 1,615 | \$ | 2,032 | |

The following table presents realized gains and losses on available-for-sale securities for the three and nine months ended June 30, 2009 and 2008. The gross realized investment losses exclude losses from other-than-temporary impairment:

Nine Months Ended

Edgar Filing: ATMOS ENERGY CORP - Form 10-Q

| | Three Months | | | | | | |
|---|--------------|--------------|-------------|--------------|--|--|--|
| | Ended | June 30 | June | 30 | | | |
| | 2009 | 2008 | 2009 | 2008 | | | |
| | | (In th | ousands) | | | | |
| Gross realized investment gains Gross realized investment losses | \$ | \$ 51 (2) | \$ (129) | \$ 97 (3) | | | |
| Net realized gains (losses) | \$ | \$ 49 | \$ (129) | \$ 94 | | | |

Due to the recent deterioration of the financial markets and the uncertainty of a full recovery of these investments given the current economic environment, we have recorded a \$3.3 million and \$5.4 million noncash charge to impair certain available-for-sale investments during the three and nine months ended June 30, 2009. As a result of these impairments, at June 30, 2009, we did not maintain any investments that are in an unrealized loss position.

8. Commitments and Contingencies

Litigation and Environmental Matters

With respect to the specific litigation and environmental-related matters or claims that were disclosed in Note 12 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30,

28

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

2008, there were no material changes in the status of such litigation and environmental-related matters or claims during the nine months ended June 30, 2009. We continue to believe that the final outcome of such litigation and environmental-related matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

In addition, we are involved in other litigation and environmental-related matters or claims that arise in the ordinary course of our business. While the ultimate results of such litigation and response actions to such environmental-related matters or claims cannot be predicted with certainty, we believe the final outcome of such litigation and response actions will not have a material adverse effect on our financial condition, results of operations or cash flows.

Purchase Commitments

AEM has commitments to purchase physical quantities of natural gas under contracts indexed to the forward NYMEX strip or fixed price contracts. At June 30, 2009, AEM was committed to purchase 83.0 Bcf within one year and 25.4 Bcf within one to three years under indexed contracts. AEM is committed to purchase 2.9 Bcf within one year under fixed price contracts with prices ranging from \$3.15 to \$7.68 per Mcf. Purchases under these contracts totaled \$256.0 million and \$842.1 million for the three months ended June 30, 2009 and 2008 and \$1,215.0 million and \$2,274.4 million for the nine months ended June 30, 2009 and 2008.

Our natural gas distribution divisions, except for our Mid-Tex Division, maintain supply contracts with several vendors that generally cover a period of up to one year. Commitments for estimated base gas volumes are established under these contracts on a monthly basis at contractually negotiated prices. Commitments for incremental daily purchases are made as necessary during the month in accordance with the terms of the individual contract.

Our Mid-Tex Division maintains long-term supply contracts to ensure a reliable source of gas for our customers in this service area which obligate it to purchase specified volumes at market and fixed prices. The estimated commitments under these contracts as of June 30, 2009 are as follows (in thousands):

| 2009 | \$ 20,256 |
|------------|-----------|
| 2010 | 120,481 |
| 2011 | 5,658 |
| 2012 | 7,302 |
| 2013 | 7,711 |
| Thereafter | 2,614 |
| | |

\$ 164,022

Regulatory Matters

As previously described in Note 12 to the consolidated financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008, in December 2007, the Company received data requests from the Division of Investigations of the Office of Enforcement of the Federal Energy Regulatory Commission (the Commission) in

connection with its investigation into possible violations of the Commission s posting and competitive bidding regulations for pre-arranged released firm capacity on natural gas pipelines.

After responding to two sets of data requests received from the Commission, the Commission agreed to allow us to conduct our own internal investigation into compliance with the Commission s rules. We have completed our internal investigation and submitted the results to the Commission. During our investigation, we identified certain transactions that could possibly be considered non-compliant, and we continue to fully

29

ATMOS ENERGY CORPORATION

NOTES TO CONDENSED CONSOLIDATED FINANCIAL STATEMENTS (Continued)

cooperate with the Commission as we work to resolve this matter. We have accrued what we believe is an adequate amount for the anticipated resolution of this proceeding. While the ultimate resolution of this investigation cannot be predicted with certainty, we believe that the final outcome will not have a material adverse effect on our financial condition, results of operations or cash flows.

As of June 30, 2009, rate cases were in progress in our City of Dallas and Virginia service areas and annual rate filing mechanisms were in progress in our City of Dallas and Amarillo service areas. These regulatory proceedings are discussed in further detail in *Management s Discussion and Analysis Recent Ratemaking Developments*.

9. Concentration of Credit Risk

Information regarding our concentration of credit risk is disclosed in Note 14 to the financial statements in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008. During the nine months ended June 30, 2009, there were no material changes in our concentration of credit risk.

10. Segment Information

Atmos Energy and our subsidiaries are engaged primarily in the regulated natural gas distribution, transmission and storage business as well as other nonregulated businesses. We distribute natural gas through sales and transportation arrangements to approximately 3.2 million residential, commercial, public authority and industrial customers through our six regulated natural gas distribution divisions, which cover service areas located in 12 states. In addition, we transport natural gas for others through our distribution system.

Through our nonregulated businesses, we primarily provide natural gas management and marketing services to municipalities, other local distribution companies and industrial customers primarily in the Midwest and Southeast. Additionally, we provide natural gas transportation and storage services to certain of our natural gas distribution operations and to third parties.

We operate the Company through the following four segments:

The *natural gas distribution segment*, which includes our regulated natural gas distribution and related sales operations.

The *regulated transmission and storage segment*, which includes the regulated pipeline and storage operations of the Atmos Pipeline Texas Division.

The *natural gas marketing segment*, which includes a variety of nonregulated natural gas management services.

The *pipeline*, *storage* and other segment, which includes our nonregulated natural gas transmission and storage services.

Our determination of reportable segments considers the strategic operating units under which we manage sales of various products and services to customers in differing regulatory environments. Although our natural gas distribution

segment operations are geographically dispersed, they are reported as a single segment as each natural gas distribution division has similar economic characteristics. The accounting policies of the segments are the same as those described in the summary of significant accounting policies found in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008. We evaluate performance based on net income or loss of the respective operating units.

REPORT OF INDEPENDENT REGISTERED PUBLIC ACCOUNTING FIRM

The Board of Directors and Shareholders of Atmos Energy Corporation

We have reviewed the condensed consolidated balance sheet of Atmos Energy Corporation as of June 30, 2009, the related condensed consolidated statements of income for the three-month and nine-month periods ended June 30, 2009 and 2008, and the condensed consolidated statements of cash flows for the nine-month periods ended June 30, 2009 and 2008. These financial statements are the responsibility of the Company s management.

We conducted our review in accordance with the standards of the Public Company Accounting Oversight Board (United States). A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with the standards of the Public Company Accounting Oversight Board, the objective of which is the expression of an opinion regarding the financial statements taken as a whole. Accordingly, we do not express such an opinion.

Based on our review, we are not aware of any material modifications that should be made to the condensed consolidated financial statements referred to above for them to be in conformity with U.S. generally accepted accounting principles.

We have previously audited, in accordance with the standards of the Public Company Accounting Oversight Board (United States), the consolidated balance sheet of Atmos Energy Corporation as of September 30, 2008, and the related consolidated statements of income, shareholders—equity, and cash flows for the year then ended, not presented herein, and in our report dated November 18, 2008, we expressed an unqualified opinion on those consolidated financial statements. In our opinion, the information set forth in the accompanying condensed consolidated balance sheet as of September 30, 2008, is fairly stated, in all material respects, in relation to the consolidated balance sheet from which it has been derived.

Item 2. Management s Discussion and Analysis of Financial Condition and Results of Operations

INTRODUCTION

The following discussion should be read in conjunction with the condensed consolidated financial statements in this Quarterly Report on Form 10-Q and Management s Discussion and Analysis in our Annual Report on Form 10-K for the year ended September 30, 2008.

Cautionary Statement for the Purposes of the Safe Harbor under the Private Securities Litigation Reform Act of 1995

The statements contained in this Quarterly Report on Form 10-Q may contain forward-looking statements within the meaning of Section 27A of the Securities Act of 1933 and Section 21E of the Securities Exchange Act of 1934. All statements other than statements of historical fact included in this Report are forward-looking statements made in good faith by us and are intended to qualify for the safe harbor from liability established by the Private Securities Litigation Reform Act of 1995. When used in this Report, or any other of our documents or oral presentations, the words anticipate, believe, estimate, expect, forecast, goal, intend, objective, plan, projection, see words are intended to identify forward-looking statements. Such forward-looking statements are subject to risks and uncertainties that could cause actual results to differ materially from those expressed or implied in the statements relating to our strategy, operations, markets, services, rates, recovery of costs, availability of gas supply and other factors. These risks and uncertainties, which are discussed in more detail in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008, include the following: our ability to continue to access the credit markets to satisfy our liquidity requirements; the impact of recent adverse economic conditions on our customers; increased costs of providing pension and postretirement health care benefits and increased funding requirements; market risks beyond our control affecting our risk management activities including market liquidity, commodity price volatility, increasing interest rates and counterparty creditworthiness; regulatory trends and decisions, including the impact of rate proceedings before various state regulatory commissions; increased federal regulatory oversight and potential penalties; the impact of environmental regulations on our business; the concentration of our distribution, pipeline and storage operations in Texas; adverse weather conditions; the effects of inflation and changes in the availability and price of natural gas; the capital-intensive nature of our gas distribution business; increased competition from energy suppliers and alternative forms of energy; the inherent hazards and risks involved in operating our gas distribution business; natural disasters, terrorist activities or other events; and other risks and uncertainties discussed herein, all of which are difficult to predict and many of which are beyond our control. Accordingly, while we believe these forward-looking statements to be reasonable, there can be no assurance that they will approximate actual experience or that the expectations derived from them will be realized. Further, we undertake no obligation to update or revise any of our forward-looking statements whether as a result of new information, future events or otherwise.

OVERVIEW

Atmos Energy and our subsidiaries are engaged primarily in the regulated natural gas distribution and transportation and storage businesses as well as other nonregulated natural gas businesses. We distribute natural gas through sales and transportation arrangements to approximately 3.2 million residential, commercial, public authority and industrial customers throughout our six regulated natural gas distribution divisions, which cover service areas located in 12 states. In addition, we transport natural gas for others through our distribution system.

Through our nonregulated businesses, we primarily provide natural gas management and marketing services to municipalities, other local gas distribution companies and industrial customers primarily in the Midwest and Southeast and natural gas transportation and storage services to certain of our natural gas distribution divisions and to third

38

Table of Contents

We operate the Company through the following four segments:

the *natural gas distribution segment*, which includes our regulated natural gas distribution and related sales operations,

the *regulated transmission and storage segment*, which includes the regulated pipeline and storage operations of the Atmos Pipeline Texas Division,

the *natural gas marketing segment*, which includes a variety of nonregulated natural gas management services and

the *pipeline*, *storage* and other segment, which is comprised of our nonregulated natural gas gathering, transmission and storage services.

CRITICAL ACCOUNTING ESTIMATES AND POLICIES

Our condensed consolidated financial statements were prepared in accordance with accounting principles generally accepted in the United States. Preparation of these financial statements requires us to make estimates and judgments that affect the reported amounts of assets, liabilities, revenues and expenses and the related disclosures of contingent assets and liabilities. We based our estimates on historical experience and various other assumptions that we believe to be reasonable under the circumstances. On an ongoing basis, we evaluate our estimates, including those related to risk management and trading activities, the allowance for doubtful accounts, legal and environmental accruals, insurance accruals, pension and postretirement obligations, deferred income taxes and the valuation of goodwill, indefinite-lived intangible assets and other long-lived assets. Actual results may differ from such estimates.

Our critical accounting policies used in the preparation of our consolidated financial statements are described in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008 and include the following:

Regulation

Revenue Recognition

Allowance for Doubtful Accounts

Derivatives and Hedging Activities

Impairment Assessments

Pension and Other Postretirement Plans

Our critical accounting policies are reviewed quarterly by the Audit Committee. There were no significant changes to these critical accounting policies during the nine months ended June 30, 2009.

RESULTS OF OPERATIONS

During the current fiscal year, several external factors have impacted Atmos Energy, including but not limited to adverse developments in the global and financial credit markets and the unfavorable impact of the economic recession.

The tightening of the credit markets has made it more difficult and more expensive for us to access the capital markets. However, during the fiscal year, we have undertaken several steps to improve our financial position. In March 2009, we successfully completed an offering of \$450 million 8.5% senior notes, and used most of the proceeds in April 2009 to redeem \$400 million of senior notes that were scheduled to mature in October 2009. Additionally, we enhanced our liquidity sources in various ways. In October 2008, we replaced our former \$300 million 364-day committed credit facility with a new 364-day \$212.5 million committed credit facility. Additionally, we converted AEM s former \$580 million uncommitted credit facility to a 364-day \$375 million committed credit facility. This facility was subsequently increased to \$450 million in April 2009. Finally, in April 2009 we replaced an expiring \$18 million unsecured committed credit facility

39

Table of Contents

with a \$25 million unsecured committed credit facility. After entering into these new facilities, we currently have a total of approximately \$1.3 billion available to us under four committed credit facilities. As a result of these developments and our continued successful financial performance, Standard & Poor s Corporation (S&P) upgraded our credit rating from BBB to BBB+ in December 2008 and Moody s Investors Service (Moody s) upgraded the credit rating on our senior long-term debt from Baa3 to Baa2 and our commercial paper from P-3 to P-2 in May 2009. These ratings upgrades should improve our ability to access the short-term capital markets to satisfy our liquidity requirements on more economical terms in the future.

Challenging economic times have also impacted most of our business segments. The impact of the economic downturn is most apparent in a general decline in throughput. Our natural gas distribution segment has experienced a year-over-year four percent decrease in consolidated throughput, primarily associated with lower residential, commercial and industrial consumption. Declines in the demand for natural gas as a result of idle production and plant closures have contributed to a seven percent year-over-year decrease in consolidated throughput in our regulated transmission and storage segment and a five percent year-over-year decrease in consolidated sales volumes in our natural gas marketing segment. However, recent improvements in rate design in our natural gas distribution segment and the ability to earn higher per-unit margins in our regulated transmission and storage and natural gas marketing segments has more than offset the decline in throughput and sales volumes. Additionally, reduced demand for natural gas has resulted in lower natural gas prices, which has contributed significantly to the increase in our operating cash flow from \$417 million for the nine months ended June 30, 2008 to \$825 million for the nine months ended June 30, 2009.

The seasonality of our distribution business typically results in a loss in our fiscal third quarter. However, we reported net income of \$2.0 million, or \$0.02 per diluted share for the three months ended June 30, 2009 compared with a net loss of \$6.6 million, or \$0.07 per diluted share in the prior-year quarter. The quarter-over-quarter improvement reflects higher gross profit in our regulated transmission and storage and natural gas marketing segments combined with lower consolidated operation and maintenance expense, which more than offset lower natural gas distribution margins and a \$3.3 million charge to impair certain available-for-sale investments.

For the first nine months of fiscal 2009, net income increased 16 percent to \$206.9 million, or \$2.26 per diluted share. Regulated operations contributed 85 percent of our net income during this period with our nonregulated operations contributing the remaining 15 percent. Results for the nine months ended June 30, 2009 include the favorable impact of a one-time tax benefit of \$11.3 million, or \$0.12 per diluted share and the unfavorable impact of a \$5.4 million charge, or \$0.04 per diluted share, to impair certain available-for-sale investments. Additionally, results for the nine-month period ended June 30, 2009 reflect increased gross profit across all of our business segments, partially offset by higher depreciation expense, pipeline maintenance and employee costs and interest expense.

The following table presents our consolidated financial highlights for the three and nine months ended June 30, 2009 and 2008:

Natural Gas Distribution Segment

The primary factors that impact the results of our natural gas distribution operations are our ability to earn our authorized rates of return, the cost of natural gas, competitive factors in the energy industry and economic conditions in our service areas.

Our ability to earn our authorized rates of return is based primarily on our ability to improve the rate design in our various ratemaking jurisdictions by reducing or eliminating regulatory lag and, ultimately, separating the recovery of our approved margins from customer usage patterns. Improving rate design is a long-term process and is further complicated by the fact that we operate in multiple rate jurisdictions.

Seasonal weather patterns can also affect our natural gas distribution operations. However, the effect of weather that is above or below normal is substantially offset through weather normalization adjustments, known as WNA, which has been approved by state regulatory commissions for approximately 90 percent of our residential and commercial meters in the following states for the following time periods:

Georgia October May Kansas October May Kentucky November April Louisiana December March Mississippi November April Tennessee November April Texas: Mid-Tex November April Texas: West Texas October May January December Virginia

Our natural gas distribution operations are also affected by the cost of natural gas. The cost of gas is passed through to our customers without markup. Therefore, increases in the cost of gas are offset by a corresponding increase in revenues. Accordingly, we believe gross profit is a better indicator of our financial performance than revenues.

Gross profit in our Texas and Mississippi service areas includes franchise fees and gross receipts taxes, which are calculated as a percentage of revenue (inclusive of gas costs). Therefore, the amount of these taxes included in revenues is influenced by the cost of gas and the level of gas sales volumes. We record the associated tax expense as a component of taxes, other than income. Although changes in these revenue-related taxes arising from changes in gas costs affect gross profit, over time the impact of these timing differences is generally offset within operating income. Prior to January 1, 2009, timing differences existed between the recognition of revenue for franchise fees collected from our customers and the recognition of expense of franchise taxes. These timing differences had a significant temporary effect on operating income in periods with volatile gas prices, particularly in our Mid-Tex Division. Beginning January 1, 2009, changes in our franchise fee agreements in our Mid-Tex Division became effective which should significantly reduce the impact of this timing difference on a prospective basis. However, this timing difference will still be present for gross receipts taxes.

Higher gas costs may also adversely impact our accounts receivable collections, resulting in higher bad debt expense and may require us to increase borrowings under our credit facilities resulting in higher interest expense. Finally, higher gas costs, as well as competitive factors in the industry and general economic conditions may cause customers to conserve or use alternative energy sources.

Table of Contents

Review of Financial and Operating Results

Financial and operational highlights for our natural gas distribution segment for the three months ended June 30, 2009 and 2008 are presented below.

| | Three Months Ended June 30 | | | | | | | | | | |
|--|--|----------|------|----------|----|----------|--|--|--|--|--|

Total \$ 7,383 \$ 5,197 \$ 2,186

The \$8.2 million decrease in natural gas distribution gross profit primarily reflects a net \$5.4 million decrease in margins in the Mid-Tex Division. This reduction in margins was primarily due to rate design changes implemented in November 2008 that decreased the monthly base charge and increased the volumetric charge for most of the Mid-Tex Division s customers. This change results in higher gross profit during the winter heating season and lower gross profit in the summer months. The current year period also reflects a \$3.3 million increase in rate adjustments primarily in Georgia, Kansas, Louisiana and West Texas. The

43

Table of Contents

decrease in gross profit also reflects a \$3.5 million decrease as a result of a five percent decrease in distribution throughput, primarily associated with lower residential, commercial and industrial consumption. Finally, service revenue and late charges, which are based on the customer soutstanding balance, decreased \$1.3 million due to the lower cost of natural gas in the current-year period.

Partially offsetting these decreases was an increase of approximately \$1.3 million in revenue-related taxes in the current-year quarter compared to the prior-year quarter primarily due to the timing change in franchise fees in our Mid-Tex Division. This increase was combined with a \$9.5 million quarter-over-quarter decrease in the associated franchise and state gross receipts tax expense recorded as a component of taxes, other than income, resulting in a \$10.8 million increase in operating income when compared with the prior-year quarter.

Operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense, taxes, other than income, and asset impairments decreased \$10.4 million.

Operation and maintenance expense, excluding the provision for doubtful accounts, decreased \$4.9 million, primarily due to lower legal and other administrative costs. These decreases were partially offset by a \$2.8 million noncash charge to impair certain available-for-sale investments as the Company believed the fair value of these investments would not recover within a reasonable period of time.

Depreciation and amortization expense increased \$3.2 million for the third quarter of fiscal 2009 compared with third quarter of fiscal 2008. The increase primarily was attributable to additional assets placed in service during the current-year period.

Interest charges allocated to the natural gas distribution segment increased \$4.3 million due to the effect of the Company s March 2009 issuance of \$450 million 8.50% senior notes to repay \$400 million 4.00% senior notes in April 2009.

Recent Ratemaking Developments

Significant ratemaking developments that occurred during the nine months ended June 30, 2009 are discussed below. The amounts described below represent the operating income that was requested or received in each rate filing, which may not necessarily reflect the stated amount referenced in the final order, as certain operating costs may have changed as a result of a commission s final ruling.

Annual Rate Filing Mechanisms

In March 2009, the Mid-Tex Division filed its second Rate Review Mechanism (RRM) with the Settled Cities. The filing requested an increase in annual operating income of \$9.7 million for the Settled Cities. The Mid-Tex Division and representatives of the Settled Cities reached an agreement to increase annual operating income by \$2.0 million, which will be implemented in rates beginning in August 2009. Beginning in November 2008, rates were implemented from our first RRM filing with the Settled Cities, which resulted in an increase in annual operating income on a system-wide basis of approximately \$27.3 million. The impact to the Mid-Tex Division for the Settled Cities was approximately \$21.8 million.

In April 2009, the West Texas Division filed its second RRM with the West Texas Cities. The filing requested an increase in annual operating income of \$11.1 million. The West Texas Division and representatives of the West Texas Cities reached an agreement to increase annual operating income \$7.8 million, which will be implemented in rates beginning in August 2009. Beginning in November 2008, rates were implemented from our first RRM with the West Texas Cities, which resulted in an increase in operating income of \$4.5 million, of which \$3.9 million is being

collected over a 91/2 month period.

In April 2009, the City of Lubbock approved an RRM tariff similar to the RRM tariff utilized by the West Texas Cities. The West Texas Division filed its first RRM with the City of Lubbock on April 15, 2009. The filing requested an increase in annual operating income of \$3.5 million. The City of Lubbock is currently reviewing the filing and a final determination is expected in October 2009.

44

Table of Contents

In June 2009, the City of Amarillo approved an RRM tariff similar to the RRM tariff utilized by the West Texas Cities. The West Texas Division filed its first RRM with the City of Amarillo on June 17, 2009. The filing requested an annual increase in operating income of \$2.3 million. The City of Amarillo is currently reviewing the filing and a final determination is expected in October 2009.

In December 2008, the Louisiana Division filed its TransLa annual rate stabilization clause with the Louisiana Public Service Commission (LPSC) for the test year ended September 30, 2008. The filing resulted in an annual increase in operating income of \$0.6 million and was implemented in April 2009.

In April 2009, the Louisiana Division filed its LGS annual rate stabilization clause with the LPSC. The filing was for the test year ended December 31, 2008. The filing resulted in an annual increase in operating income of \$3.3 million and was implemented in July 2009.

In September 2008, we filed our Mississippi stable rate filing with the Mississippi Public Service Commission (MPSC) requesting an increase in annual operating income of \$3.5 million. In January 2009, we withdrew this request after we were unable to reach a mutually agreeable settlement with the MPSC.

GRIP Filings

In May 2008, the Mid-Tex Division made a GRIP filing seeking a \$10.3 million increase on a system-wide basis. However, this filing was only applicable to the City of Dallas and the Mid-Tex environs and sought a \$1.8 million increase for customers in those service areas. Rates were approved for this filing in December 2008 and were implemented in January 2009. However, in April 2009, the City of Dallas challenged the legality of the implementation of the GRIP rates, which the Company is contesting in the District Courts of Dallas and Travis Counties.

In March 2009, the Mid-Tex Division made a GRIP filing seeking an \$18.7 million increase on a system-wide basis. However, this filing is applicable to the City of Dallas only and seeks a \$2.7 million increase for customers in the City of Dallas. The City of Dallas denied this GRIP filing in June 2009 and the Mid-Tex Division has appealed this action to the Railroad Commission of Texas (RRC).

Any rate increases granted from these GRIP filings will be in effect until such time that they are superseded by the statement of intent filed with the City of Dallas discussed below.

Rate Case Filings

In October 2008, our Kentucky/Mid-States Division filed a rate case with the Tennessee Regulatory Authority seeking an increase in annual operating income of \$6.3 million. In January 2009, the Consumer Advocate and Protection Division recommended a decrease in rates of \$3.7 million. In March 2009, a unanimous stipulation was filed and approved in the case. The parties agreed to an increase in annual operating income of \$2.5 million with a stated return on equity of 10.3 percent. The increase in rates was implemented in April 2009.

In November 2008, the Mid-Tex Division filed a statement of intent to increase annual operating income for customers within the City of Dallas by \$9.1 million. The City of Dallas suspended the filing in December 2008 and denied the increase in March 2009. The Mid-Tex Division has appealed the filing and in April 2009 we requested an increase in annual operating income of \$7.5 million and concurrently filed for a statement of intent to increase annual operating income \$1.3 million applicable to the Mid-Tex unincorporated areas. The City of Dallas has proposed a reduction of rates of \$28.9 million to annual operating income system-wide, or approximately \$5.8 million for the City of Dallas and environs customers. On August 4, 2009, the Mid-Tex Division filed a rebuttal revising the

requested increase in annual operating income to \$6.6 million for the City of Dallas and \$1.1 million for the Mid-Tex unincorporated areas. A hearing is scheduled with the RRC in August 2009 and a final ruling is expected in November 2009. If the statement of intent applicable to the City of Dallas is approved by the RRC, the new rates implemented could supersede the City of Dallas GRIP rates discussed above.

45

Table of Contents

In April 2009, the Kentucky/Mid-States Division filed an expedited rate case with the Virginia State Corporation Commission seeking an increase in annual operating income of \$1.7 million. Interim rates were implemented subject to refund on May 1, 2009. The application is currently in discovery with a final determination expected in October 2009.

In July 2009, the Colorado/Kansas Division filed a rate case with the Colorado Public Service Commission seeking an increase in annual operating income of \$3.8 million effective in August 2009. A procedural schedule has not been established; however the Commission is expected to suspend the filing.

Other Ratemaking Activity

In May 2007, our Mid-Tex Division filed for a 36-month gas contract review filing. This filing was mandated by prior RRC orders and related to the prudency of gas purchases made from November 2003 through October 2006, which total approximately \$2.7 billion. The intervening parties recommended disallowances ranging from \$58 million to \$89 million. A hearing was held at the RRC in September 2008. In December 2008, a proposal for decision was issued by the Hearing Examiner recommending no gas cost disallowance. In February 2009, the RRC approved the Hearing Examiner s recommendation to disallow no gas costs.

In March 2009, the RRC established a procedural schedule to examine the 36-month gas contract review process. Briefs were filed in April 2009 and the Hearing Examiner issued a proposal for decision in June 2009 which recommended the elimination of the 36-month gas contract review process. The RRC has not taken any action on the proposed final order.

Regulated Transmission and Storage Segment

Our regulated transmission and storage segment consists of the regulated pipeline and storage operations of the Atmos Pipeline Texas Division. The Atmos Pipeline Texas Division transports natural gas to our Mid-Tex Division and third parties and manages five underground storage reservoirs in Texas. We also provide ancillary services customary in the pipeline industry including parking and lending arrangements and sales of inventory on hand.

Similar to our natural gas distribution segment, our regulated transmission and storage segment is impacted by seasonal weather patterns, competitive factors in the energy industry and economic conditions in our service areas. Further, as the Atmos Pipeline Texas Division operations supply all of the natural gas for our Mid-Tex Division, the results of this segment are highly dependent upon the natural gas requirements of the Mid-Tex Division. Finally, as a regulated pipeline, the operations of the Atmos Pipeline Texas Division may be impacted by the timing of when costs and expenses are incurred and when these costs and expenses are recovered through its tariffs.

46

Table of Contents

Review of Financial and Operating Results

Financial and operational highlights for our regulated transmission and storage segment for the three months ended June 30, 2009 and 2008 are presented below.

| | Three Months Ended June 30 | | | | | | | | |
|---|----------------------------|-----------|-------|---------|--------------|----------|--|--|--|
| | 2009 | | | 2008 | | hange | | | |
| | (I | n thousan | ds, u | | rwise noted) | | | | |
| | ` | | | | | , | | | |
| Mid-Tex transportation | \$ | 19,507 | \$ | 18,761 | \$ | 746 | | | |
| Third-party transportation | | 24,285 | | 22,485 | | 1,800 | | | |
| Storage and park and lend services | | 3,137 | | 2,387 | | 750 | | | |

| | | | | | | | | | |
| Gross profit | | 49,345 | | 46,286 | | 3,059 | | | |
| Operating expenses | | 21,789 | | 24,395 | | (2,606) | | | |
| On supting in some | | 27.556 | | 21 001 | | E 66E | | | |
| Operating income Miscellaneous income | | 27,556 | | 21,891 | | 5,665 | | | |
| | | 615 | | 550 | | 65 | | | |
| Interest charges | | 8,152 | | 6,606 | | 1,546 | | | |
| Income before income taxes | | 20,019 | | 15,835 | | 4,184 | | | |
| Income tax expense | | 7,065 | | 5,570 | | 1,495 | | | |
| Net income | \$ | 12,954 | \$ | 10,265 | \$ | 2,689 | | | |
| Gross pipeline transportation volumes MMcf | | 169,641 | | 181,112 | | (11,471) | | | |
| Consolidated pipeline transportation volumes MMcf | | 141,556 | | 152,450 | | (10,894) | | | |

The \$3.1 million increase in gross profit was attributable primarily to a \$3.5 million increase from higher demand-based fees. The improvement in gross profit also reflects a \$1.1 million increase due to our GRIP filings. These increases were partially offset by a \$0.7 million decrease arising from a seven percent decrease in city-gate, electrical generation, Barnett Shale and HUB deliveries.

Operating expenses decreased \$2.6 million primarily due to a decrease in pipeline maintenance costs during the current-year quarter.

Recent Ratemaking Developments

In February 2009, the Atmos Pipeline Texas Division made a GRIP filing seeking an increase in annual operating income of \$6.3 million. The filing was approved by the RRC and a final order was issued in April 2009.

Natural Gas Marketing Segment

Our natural gas marketing activities are conducted through Atmos Energy Marketing, LLC (AEM). AEM aggregates and purchases gas supply, arranges transportation and/or storage logistics and ultimately delivers gas to our customers at competitive prices. To facilitate this process, we utilize proprietary and customer-owned transportation and storage assets to provide the various services our customers request, including furnishing natural gas supplies at fixed and market-based prices, contract negotiation and administration, load forecasting, gas storage acquisition and management services, transportation services, peaking sales and balancing services, capacity utilization strategies and gas price hedging through the use of financial instruments. As a result, our revenues arise from the types of commercial transactions we have structured with our customers and include the value we extract by optimizing the storage and transportation capacity we own or control as well as revenues received for services we deliver.

Our asset optimization activities seek to maximize the economic value associated with the storage and transportation capacity we own or control. We attempt to meet this objective by engaging in natural gas storage transactions in which we seek to find and profit from the pricing differences that occur over time. We purchase physical natural gas and then sell financial instruments at advantageous prices to lock in a gross

47

Table of Contents

profit margin. We also seek to participate in transactions in which we combine the natural gas commodity and transportation costs to minimize our costs incurred to serve our customers by identifying the lowest cost alternative within the natural gas supplies, transportation and markets to which we have access. Through the use of transportation and storage services and financial instruments, we also seek to capture gross profit margin through the arbitrage of pricing differences that exist in various locations and by recognizing pricing differences that occur over time.

AEM continually manages its net physical position to attempt to increase in the future the potential economic gross profit that was created when the original transaction was executed. Therefore, AEM may subsequently change its originally scheduled storage injection and withdrawal plans from one time period to another based on market conditions and recognize any associated gains or losses at that time. If AEM elects to accelerate the withdrawal of physical gas, it will execute new financial instruments to economically hedge the original financial instruments. If AEM elects to defer the withdrawal of gas, it will reset its financial instruments by settling the original financial instruments and executing new financial instruments to correspond to the revised withdrawal schedule.

We use financial instruments, designated as fair value hedges, to hedge our natural gas inventory used in our natural gas marketing storage activities. These financial instruments are marked to market each month based upon the NYMEX price with changes in fair value recognized as unrealized gains and losses in the period of change. The hedged natural gas inventory is marked to market at the end of each month based on the Gas Daily index with changes in fair value recognized as unrealized gains and losses in the period of change. Changes in the spreads between the forward natural gas prices used to value the financial hedges designated against our physical inventory and the market (spot) prices used to value our physical storage result in unrealized margins until the underlying physical gas is withdrawn and the related financial instruments are settled. Once the gas is withdrawn and the financial instruments are settled, the previously unrealized margins associated with these net positions are realized.

AEM also uses financial instruments to capture additional storage arbitrage opportunities that may arise after the execution of the original physical inventory hedge and to attempt to insulate and protect the economic value within its asset optimization activities. Changes in fair value associated with these financial instruments are recognized as a component of unrealized margins until they are settled.

Review of Financial and Operating Results

Financial and operational highlights for our natural gas marketing segment for the three months ended June 30, 2009 and 2008 are presented below. Gross profit margin consists primarily of margins earned from the delivery of gas and related services requested by our customers and margins earned from asset optimization activities, which are derived from the utilization of our proprietary and managed third-party storage and transportation assets to capture favorable arbitrage spreads through natural gas trading activities.

Unrealized margins represent the unrealized gains or losses on our net physical gas position and the related financial instruments used to manage commodity price risk as described above. These margins fluctuate based upon changes in the spreads between the physical (spot) and forward natural gas prices. Generally, if the physical/financial spread narrows, we will record unrealized gains or lower unrealized losses. If the physical/financial spread widens, we will record unrealized losses or lower unrealized gains. The magnitude of the

48

Table of Contents

unrealized gains and losses is also contingent upon the levels of our net physical position at the end of the reporting period.

| | Three Months Ended June 30 | | | | | | | | | |
|--|--|------------------|------|------------------------|----|--------------------------|--|--|--|--|
| | | 2009 | | | | Change | | | | |
| | (In thousands, unless otherwise noted) | | | | | | | | | |
| Realized margins Delivered gas Asset optimization | | 598 580) | | 1,231 7,551) | \$ | 5,367 22,971 | | | | |
| Unrealized margins | | 018 004 | - | 6,320) 3,689 | | 28,338 (10,685) | | | | |
| Gross profit Operating expenses | | 022 555 | , | 2,631) 5,205 | | 17,653 2,350 | | | | |
| Operating income Miscellaneous income Interest charges | ŕ | 467 71 020 | | 7,836) 377 2,850 | | 15,303 (306) 1,170 | | | | |
| Income (loss) before income taxes Income tax expense (benefit) | | 518 419 | , | 0,309) 3,995) | | 13,827 5,414 | | | | |
| Net income (loss) | \$ 2, | 099 | \$ (| 6,314) | \$ | 8,413 | | | | |
| Gross natural gas marketing sales volumes MMcf | 103, | 146 | 10 | 3,403 | | (257) | | | | |
| Consolidated natural gas marketing sales volumes MMcf | 84, | 162 | 8 | 2,122 | | 2,040 | | | | |
| Net physical position (Bcf) | 2 | 20.0 | | 17.5 | | 2.5 | | | | |

The \$17.7 million increase in our natural gas marketing segment s gross profit was driven primarily by a \$23.0 million increase in asset optimization margins. The increase was primarily the result of a decrease in losses realized on financial settlements during the current quarter when compared to the prior-year quarter. Settlements during both years were primarily related to the deferral of storage withdrawals as AEM had elected to reset the corresponding financial instruments to future periods to increase the potential gross profit it could realize from its asset optimization activities. The reduction in realized losses was caused by greater price volatility in the prior-year period which had a greater impact on the settlement of financial instruments used to hedge our physical storage.

The increase in asset optimization margins was partially offset by a \$10.7 million decrease in unrealized margins. This decrease reflects lower volatility during the current quarter compared with the prior-year quarter between current cash prices used to value our physical inventory and future natural gas prices, which influence the prices used to value the financial instruments used to hedge our physical inventory.

In addition, delivered gas margins increased \$5.4 million compared with the prior-year quarter largely attributable to a 48 percent increase in gross per-unit margins on similar gross sales volumes period over period as a result of greater basis opportunities in certain market areas and successful contract renewals.

Operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense, taxes, other than income taxes, and asset impairments increased \$2.4 million primarily due to an increase in legal and other administrative costs.

Economic Gross Profit

AEM monitors the impact of its asset optimization efforts by estimating the gross profit, before associated storage fees, that it captured through the purchase and sale of physical natural gas and the execution of the associated financial instruments. This economic gross profit, combined with the effect of the future reversal of

49

Table of Contents

unrealized gains or losses currently recognized in the income statement is referred to as the potential gross profit.⁽¹⁾ The following table presents AEM s economic gross profit and its potential gross profit at June 30, 2009, March 31, 2009, December 31, 2008, September 30, 2008 and June 30, 2008.

| | | | ociated Net | _ | | | | |
|--------------------|-----------------|---------------------------|----------------|---------------|----------|-----------------------|------------------|--|
| | Net Physical | | onomic | Uni | realized | | tential Fross | |
| Period Ending | Position | Position Gross Profit (In | | | Gain | Profit ⁽¹⁾ | | |
| | (Bcf) | millions) | | (In millions) | | (In millions) | | |
| June 30, 2009 | 20.0 | \$ | 42.0 | \$ | 16.7 | \$ | 25.3 | |
| March 31, 2009 | 21.9 | \$ | 33.4 | \$ | 2.4 | \$ | 31.0 | |
| December 31, 2008 | 16.3 | \$ | 20.7 | \$ | 4.8 | \$ | 15.9 | |
| September 30, 2008 | 8.0 | \$ | 48.5 | \$ | 36.4 | \$ | 12.1 | |
| June 30, 2008 | 17.5 | \$ | 48.2 | \$ | 34.3 | \$ | 13.9 | |

(1) Potential gross profit represents the increase in AEM s gross profit in future periods if its optimization efforts are executed as planned. This amount does not include storage and other operating expenses and increased income taxes that will be incurred to realize this amount. Therefore, it does not represent an estimated increase in future net income. There is no assurance that the economic gross profit or the potential gross profit will be fully realized in the future. We consider this measure a non-GAAP financial measure as it is calculated using both forward-looking storage injection/withdrawal and hedge settlement estimates and historical financial information. This measure is presented because we believe it provides our investors a more comprehensive view of our asset optimization efforts and thus a better understanding of these activities than would be presented by GAAP measures alone.

As of June 30, 2009, based upon AEM s planned inventory withdrawal schedule and associated planned settlement of financial instruments, the economic gross profit was \$42.0 million. This amount will be reduced by \$16.7 million of net unrealized gains recorded in the financial statements as of June 30, 2009 that will reverse when the inventory is withdrawn and the accompanying financial instruments are settled. Therefore, the potential gross profit associated with these positions was \$25.3 million at June 30, 2009.

During the nine months ended June 30, 2009, AEM increased its potential gross profit by \$13.2 million to \$25.3 million. In the first quarter, AEM withdrew gas and substantially realized the associated potential gross profit reported as of September 30, 2008. Since that time, as a result of falling current cash prices, AEM has been deferring storage withdrawals and has been a net injector of gas into storage to increase the potential gross profit it could realize in future periods from its asset optimization activities. As a result of these activities, AEM has increased its net physical position by 12.0 Bcf since September 30, 2008. However, the captured spreads on these positions have been lower than those captured as of September 30, 2008, resulting in a lower economic gross profit compared to that time. This decrease from September 2008 to June 2009 was partially offset by lower unrealized gains associated with these positions primarily due to lower current cash prices and lower volatility between cash and future prices.

The economic gross profit is based upon planned storage injection and withdrawal schedules and its realization is contingent upon the execution of this plan, weather and other execution factors. Since AEM actively manages and

optimizes its portfolio to attempt to enhance the future profitability of its storage position, it may change its scheduled storage injection and withdrawal plans from one time period to another based on market conditions. Therefore, we cannot ensure that the economic gross profit or the potential gross profit calculated as of June 30, 2009 will be fully realized in the future nor can we predict in what time periods such realization may occur. Further, if we experience operational or other issues which limit our ability to optimally manage our stored gas positions, our earnings could be adversely impacted. Assuming AEM fully executes its plan in place on June 30, 2009, without encountering operational or other issues, we anticipate that approximately \$15.9 million of the economic gross profit as of June 30, 2009 will be recognized in fiscal 2009 with the remaining \$26.1 million expected to be recognized during the first six months of fiscal 2010.

50

Table of Contents

Pipeline, Storage and Other Segment

Our pipeline, storage and other segment consists primarily of the operations of Atmos Pipeline and Storage, LLC (APS). APS owns and operates a 21 mile pipeline located in New Orleans, Louisiana. This pipeline is primarily used to aggregate gas supply for our regulated natural gas distribution division in Louisiana and for AEM, but also provides limited third party transportation services.

APS also engages in asset optimization activities whereby it seeks to maximize the economic value associated with the storage and transportation capacity it owns or controls. Certain of these arrangements are asset management plans with regulated affiliates of the Company which have been approved by applicable state regulatory commissions. Generally, these asset management plans require APS to share with our regulated customers a portion of the profits earned from these arrangements.

Further, APS owns or has an interest in underground storage fields in Kentucky and Louisiana that are used to reduce the need of our natural gas distribution divisions to contract for pipeline capacity to meet customer demand during peak periods. Finally, APS manages our natural gas gathering operations, which were limited in nature as of June 30, 2009.

Results for this segment are impacted primarily by seasonal weather patterns and volatility in the natural gas markets. Additionally, this segment s results include an unrealized component as APS hedges its risk associated with its asset optimization activities.

Review of Financial and Operating Results

Financial and operational highlights for our pipeline, storage and other segment for the three months ended June 30, 2009 and 2008 are presented below.

| | Three Months End June 30 2009 2008 (In thousands) | | | Change | | |
|-------------------------------------|--|---------|----------|-----------|----|-------|
| | | | (111 t1) | iousaiius | , | |
| Asset optimization | \$ | 1,051 | \$ | (484) | \$ | 1,535 |
| Storage and transportation services | | 3,470 | | 3,464 | | 6 |
| Other | | 737 | | 592 | | 145 |
| Unrealized margins | | (1,244) | | (398) | | (846) |
| Gross profit | | 4,014 | | 3,174 | | 840 |
| Operating expenses | | 2,823 | | 1,803 | | 1,020 |
| Operating income | | 1,191 | | 1,371 | | (180) |
| Miscellaneous income | | 2,319 | | 2,273 | | 46 |
| Interest charges | | 408 | | 532 | | (124) |
| Income before income taxes | | 3,102 | | 3,112 | | (10) |
| Income tax expense | | 1,250 | | 1,273 | | (23) |
| Net income | \$ | 1,852 | \$ | 1,839 | \$ | 13 |

Gross profit from our pipeline, storage and other segment increased \$0.8 million primarily due to a \$1.5 million increase in asset optimization margins resulting from larger basis gains earned from utilizing controlled pipeline capacity. These increases were partially offset by a \$0.8 million decrease in unrealized margins associated with our asset optimization activities due to a widening of the spreads between current cash prices and forward natural gas prices.

Operating expenses for the three months ended June 30, 2009 increased \$1.0 million primarily due to increased employee costs and higher depreciation expense, which was largely attributable to additional assets placed in service during the current-year period.

52

Table of Contents

The \$26.5 million increase in natural gas distribution gross profit primarily reflects a net \$35.1 million increase in rates. The net increase in rates was attributable primarily to the Mid-Tex Division, which increased \$22.4 million as a result of the implementation of its 2008 Rate Review Mechanism (RRM) filing with all incorporated cities in the division other than the City of Dallas (the Settled Cities) and rate adjustments for customers in the City of Dallas. The current year period also reflects a \$12.7 million increase in rate adjustments primarily in Georgia, Kansas, Louisiana and West Texas. The increase in gross profit also reflects the reversal of a \$7.0 million uncollectible gas cost accrual recorded in a prior year and a \$7.8 million increase attributable to a non-recurring update to our estimate for gas delivered to customers but not yet billed to reflect changes in base rates in several of our jurisdictions recorded in the fiscal first quarter. These increases in gross profit were partially offset by an \$18.8 million decrease as a result of a four percent decrease in distribution throughput primarily associated with lower residential, commercial and industrial consumption and warmer weather in our Colorado service area, which does not have weather-normalized rates.

Partially offsetting these increases was a decrease of approximately \$8.0 million in revenue-related taxes primarily due to lower revenues, on which the tax is calculated, in the current-year period compared to the prior-year period. This decrease, partially offset by a \$2.2 million period-over-period decrease in the associated franchise and state gross receipts tax expense recorded as a component of taxes other than income, resulted in a \$5.8 million decrease in operating income when compared with the prior-year period.

Operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense, taxes, other than income, and asset impairments decreased \$0.9 million.

Operation and maintenance expense, excluding the provision for doubtful accounts, decreased \$11.3 million, primarily due to lower legal, fuel and other administrative costs. These decreases were partially offset by a \$4.6 million noncash charge to impair certain available-for-sale investments as the Company believed the fair value of these investments would not recover within a reasonable period of time.

Depreciation and amortization expense increased \$11.9 million for the current-year period compared with nine months ended June 30, 2008. The increase primarily was attributable to additional assets placed in service during the current-year period.

Results for the prior-year period also included a \$1.2 million gain on the sale of irrigation assets in our West Texas Division.

Interest charges allocated to the natural gas distribution segment increased \$5.7 million primarily due to the effect of the Company s March 2009 issuance of \$450 million 8.50% senior notes to repay \$400 million 4.00% senior notes in April 2009. In addition, higher average short-term debt balances, interest rates and commitment fees were experienced during the current-year period compared to the prior-year period.

Results for the current-year period include a \$10.5 million tax benefit associated with updating the rates used to determine our deferred taxes.

Regulated Transmission and Storage Segment

Review of Financial and Operating Results

Financial and operational highlights for our regulated transmission and storage segment for the nine months ended June 30, 2009 and 2008 are presented below.

| | Nine Months Ended June 30 | | | | | | | |
|---|------------------------------|---------|----|---------|----|----------|--|--|
| | | 2009 | | 2008 | | hange | | |
| | (In thousands, unless otherw | | | | | _ | | |
| | | | | | | | | |
| Mid-Tex transportation | \$ | 70,920 | \$ | 69,409 | \$ | 1,511 | | |
| Third-party transportation | | 73,497 | | 58,946 | | 14,551 | | |
| Storage and park and lend services | | 8,151 | | 6,288 | | 1,863 | | |
| Other | | 10,693 | | 8,129 | | 2,564 | | |
| Gross profit | | 163,261 | | 142,772 | | 20,489 | | |
| Operating expenses | | 82,006 | | 68,565 | | 13,441 | | |
| Operating income | | 81,255 | | 74,207 | | 7,048 | | |
| Miscellaneous income | | 1,713 | | 933 | | 780 | | |
| Interest charges | | 23,580 | | 20,453 | | 3,127 | | |
| Income before income taxes | | 59,388 | | 54,687 | | 4,701 | | |
| Income tax expense | | 19,308 | | 19,351 | | (43) | | |
| Net income | \$ | 40,080 | \$ | 35,336 | \$ | 4,744 | | |
| Gross pipeline transportation volumes MMcf | | 555,169 | | 593,452 | | (38,283) | | |
| Consolidated pipeline transportation volumes MMcf | | 400,699 | | 429,758 | | (29,059) | | |

The \$20.5 million increase in gross profit was attributable primarily to an \$11.0 million increase from higher demand-based fees and a \$7.5 million increase resulting from higher transportation fees on through-system deliveries due to market conditions. The improvement in gross profit also reflects a \$3.8 million increase due to our GRIP filings and a \$2.9 million gain on the sale of excess gas during the current-year period. These increases were partially offset by a \$4.2 million decrease associated with a seven percent decrease in city-gate, electrical generation, Barnett Shale and HUB deliveries.

Operating expenses increased \$13.4 million primarily due to increased employee and pipeline maintenance costs.

Results for the current-year period also include a \$1.7 million tax benefit associated with updating the rates used to determine our deferred taxes.

Natural Gas Marketing Segment

Review of Financial and Operating Results

Financial and operational highlights for our natural gas marketing segment for the nine months ended June 30, 2009 and 2008 are presented below.

| | N | Nine Months Ended June 30 | | | | | |
|--|-------------------------|---------------------------------|---------------------------|--|--|--|--|
| | 2009 | 2008 | Change | | | | |
| | (In thousa | (In thousands, unless otherwise | | | | | |
| Realized margins Delivered gas Asset optimization | \$ 58,316 20,286 | \$ 55,599 (10,339) | \$ 2,717 30,625 | | | | |
| Unrealized margins | 78,602 (10,013) | 45,260 14,404 | 33,342 (24,417) | | | | |
| Gross profit Operating expenses | 68,589 30,230 | 59,664 22,775 | 8,925 7,455 | | | | |
| Operating income Miscellaneous income Interest charges | 38,359 490 11,383 | 36,889 1,775 6,166 | 1,470 (1,285) 5,217 | | | | |
| Income before income taxes Income tax expense | 27,466 11,444 | 32,498 12,933 | (5,032) (1,489) | | | | |
| Net income | \$ 16,022 | \$ 19,565 | \$ (3,543) | | | | |
| Gross natural gas marketing sales volumes MMcf | 336,870 | 348,789 | (11,919) | | | | |
| Consolidated natural gas marketing sales volumes MMcf | 282,443 | 298,351 | (15,908) | | | | |
| Net physical position (Bcf) | 20.0 | 17.5 | 2.5 | | | | |

The \$8.9 million increase in our natural gas marketing segment s gross profit was driven primarily by a \$30.6 million increase in asset optimization margins. During the first quarter of fiscal 2009, AEM withdrew physical storage inventory and realized the spreads it had captured during fiscal 2008 as a result of deferring storage withdrawals and increasing the spreads associated with those physical positions. These gains were partially offset by margin losses incurred in the second and third fiscal quarters as a result of deferring storage withdrawals and injecting gas into storage. In the prior-year period, AEM deferred storage withdrawals from the first quarter into the second quarter, and recognized the storage withdrawal gains during the second quarter of fiscal 2008.

The increase in asset optimization margins was partially offset by a \$24.4 million decrease in unrealized margins. This decrease reflects lower volatility during the current year compared with the prior-year period between current cash

prices used to value our physical inventory and future natural gas prices, which influence the prices used to value the financial instruments used to hedge our physical inventory.

Additionally, realized delivered gas margins increased by \$2.7 million. The increase was largely attributable to a nine percent increase in gross per-unit margins as a result of improved basis spreads in certain market areas where we were able to better optimize transportation assets and successful contract renewals, partially offset by a three percent decrease in gross sales volumes primarily associated with lower industrial demand due to the current economic climate.

Operating expenses, which include operation and maintenance expense, provision for doubtful accounts, depreciation and amortization expense, taxes, other than income taxes, and asset impairments increased \$7.5 million primarily due to an increase in legal and other administrative costs partially offset by the absence in the current year of \$2.4 million related to tax matters incurred in the prior-year period.

Pipeline, Storage and Other Segment

Review of Financial and Operating Results

Financial and operational highlights for our pipeline, storage and other segment for the nine months ended June 30, 2009 and 2008 are presented below.

| | Nine Months Ended June 30 | | | | | |
|-------------------------------------|------------------------------|---------|----|--------|----|---------|
| | | 2009 | | 2008 | | Change |
| | (In thousands) | | | | | |
| Asset optimization | \$ | 21,675 | \$ | 5,890 | \$ | 15,785 |
| Storage and transportation services | | 10,097 | | 10,487 | | (390) |
| Other | | 2,076 | | 2,432 | | (356) |
| Unrealized margins | | (6,673) | | 47 | | (6,720) |
| Gross profit | | 27,175 | | 18,856 | | 8,319 |
| Operating expenses | | 7,239 | | 6,061 | | 1,178 |
| Operating income | | 19,936 | | 12,795 | | 7,141 |
| Miscellaneous income | | 6,540 | | 6,243 | | 297 |
| Interest charges | | 1,821 | | 1,755 | | 66 |
| Income before income taxes | | 24,655 | | 17,283 | | 7,372 |
| Income tax expense | | 10,595 | | 6,877 | | 3,718 |
| Net income | \$ | 14,060 | \$ | 10,406 | \$ | 3,654 |

Gross profit from our pipeline, storage and other segment increased \$8.3 million primarily due to a \$15.8 million increase in asset optimization margins as a result of larger realized gains from the settlement of financial positions associated with storage and trading activities, basis gains earned from utilizing controlled pipeline capacity and higher margins earned under asset management plans during the current-year period compared with the prior-year period. These increases were partially offset by a \$6.7 million decrease in unrealized margins associated with our asset optimization activities due to a widening of the spreads between current cash prices and forward natural gas prices.

Operating expenses for the nine months ended June 30, 2009 increased \$1.2 million primarily due to increased employee costs and higher depreciation expense which was largely attributable to additional assets placed in service during the current-year period.

Liquidity and Capital Resources

The liquidity required to fund our working capital, capital expenditures and other cash needs is provided from a variety of sources including internally generated funds and borrowings under our commercial paper program and bank credit facilities. Additionally, we have various uncommitted trade credit lines with our gas suppliers that we utilize to purchase natural gas on a monthly basis. Finally, from time to time, we raise funds from the public debt and equity capital markets to fund our liquidity needs.

The primary means we use to fund our working capital needs and growth is to utilize internally generated funds and to access the commercial paper markets. Recent adverse developments in global financial and credit markets have made it more difficult and more expensive for the Company to access the short-term capital markets, including the commercial paper market, to satisfy our liquidity requirements. Consequently, during the first quarter, we experienced higher than normal borrowings under our five-year credit facility used to backstop our commercial paper program in lieu of commercial paper borrowings to fund our working capital needs. However, subsequent to the end of the first quarter, credit market conditions improved, both as to availability and interest rates, and we have been able to access the commercial paper markets on more reasonably economical terms. At June 30, 2009, there were no borrowings or commercial paper outstanding under this facility and \$566.7 million was available.

56

Table of Contents

On March 26, 2009, we closed our offering of \$450 million of 8.50% senior notes due 2019. Most of the net proceeds of approximately \$446 million were used to redeem our \$400 million 4.00% unsecured senior notes on April 30, 2009, prior to their October 2009 maturity. In connection with the repayment of the \$400 million 4.00% unsecured senior notes, we paid a \$6.6 million call premium in accordance with the terms of the senior notes and accrued interest of approximately \$0.6 million. The remaining net proceeds were used for general corporate purposes.

During the nine months ended June 30, 2009, we enhanced our liquidity sources in various ways. In October 2008, we replaced our former \$300 million 364-day committed credit facility with a new facility that will allow borrowings up to \$212.5 million and expires in October 2009. We are currently evaluating alternatives to replace this facility and believe we will successfully replace this facility on reasonably economical terms.

In December 2008, we converted AEM s former \$580 million uncommitted credit facility to a \$375 million committed credit facility that will expire in December 2009. Effective April 1, 2009, we exercised the accordion feature of this facility to increase the credit available under the facility to \$450 million. In addition, we replaced our \$18 million unsecured committed credit facility that expired in March 2009 with a \$25 million unsecured facility effective April 1, 2009. As a result of executing these new agreements, we have a total of approximately \$1.3 billion available to us under four committed credit facilities. As of June 30, 2009, the amount available to us under our credit facilities, net of outstanding letters of credit, was approximately \$905 million.

We believe the liquidity provided by our senior notes and committed credit facilities, combined with our operating cash flows, will be sufficient to fund our working capital needs and capital expenditure program for the remainder of fiscal 2009.

Cash Flows

Our internally generated funds may change in the future due to a number of factors, some of which we cannot control. These include regulatory changes, prices for our products and services, demand for such products and services, margin requirements resulting from significant changes in commodity prices, operational risks and other factors.

Cash flows from operating activities

Period-over-period changes in our operating cash flows primarily are attributable to changes in net income and working capital changes, particularly within our natural gas distribution segment resulting from the price of natural gas and the timing of customer collections, payments for natural gas purchases and deferred gas cost recoveries.

For the nine months ended June 30, 2009, we generated operating cash flow of \$824.6 million from operating activities compared with \$417.4 million for the nine months ended June 30, 2008. Period over period, the \$407.2 million increase was attributable primarily to the favorable impact on our working capital due to the decline in natural gas prices in the current year compared to the prior-year period which increased operating cash flow by \$251.1 million. The increase in operating cash flow was also positively impacted by \$99.9 million due to lower cash margin requirements related to our natural gas marketing financial instruments and by \$49.0 million due to the favorable timing in the recovery of gas costs during the current year. Partially offsetting these increases in operating cash flows was the \$21.0 million contribution to our pension plans in the current year.

Cash flows from investing activities

In recent years, a substantial portion of our cash resources has been used to fund growth projects, our ongoing construction program and improvements to information technology systems. Our ongoing construction program enables us to provide natural gas distribution services to our existing customer base, expand our natural gas

distribution services into new markets, enhance the integrity of our pipelines and, more recently,

57

Table of Contents

expand our intrastate pipeline network. In executing our current rate strategy, we are directing discretionary capital spending to jurisdictions that permit us to earn a timely return on our investment. Currently, our Mid-Tex, Louisiana, Mississippi and West Texas natural gas distribution divisions and our Atmos Pipeline Texas Division have rate designs that provide the opportunity to include in their rate base approved capital costs on a periodic basis without being required to file a rate case.

Capital expenditures for fiscal 2009 are expected to range from \$500 million to \$515 million. For the nine months ended June 30, 2009, capital expenditures were \$342.3 million compared with \$312.9 million for the nine months ended June 30, 2008. The increase in capital spending primarily reflects spending for a nonregulated growth project and the construction of a pipeline extension in our regulated operations.

Cash flows from financing activities

For the nine months ended June 30, 2009, our financing activities used \$397.2 million compared with \$114.4 million in the prior-year period. Our significant financing activities for the nine months ended June 30, 2009 and 2008 are summarized as follows:

On March 26, 2009, we issued \$450 million of 8.50% senior notes due 2019. The effective interest rate of this offering, inclusive of all debt issue costs, was 8.74 percent. After giving effect to the settlement of our \$450 million Treasury lock agreement on March 23, 2009, the effective rate on these senior notes was reduced to 8.69 percent. Most of the net proceeds of approximately \$446 million were used to repay our \$400 million unsecured 4.00% senior notes on April 30, 2009.

During the nine months ended June 30, 2009, we decreased our borrowings by a net \$366.4 million under our short-term credit facilities compared with \$35.7 million in the prior-year period. The reduction in the net borrowings reflects the combination of increased cash flows and lower natural gas prices during the current year.

We repaid \$407.3 million of long-term debt during the nine months ended June 30, 2009 compared with \$9.9 million during the nine months ended June 30, 2008. The increase in payments in the current year reflects the redemption of our \$400 million unsecured 4.00% senior notes discussed above.

During the nine months ended June 30, 2009, we paid \$90.9 million in cash dividends compared with \$87.8 million for the nine months ended June 30, 2008. The increase in dividends paid over the prior-year period reflects the increase in our dividend rate from \$0.975 per share during the nine months ended June 30, 2008 to \$0.99 per share during the nine months ended June 30, 2009 combined with new share issuances under our various equity plans.

During the nine months ended June 30, 2009, we issued 0.9 million shares of common stock under our various equity plans, which generated net proceeds of \$19.9 million. In addition, we issued 0.5 million shares of common stock under our 1998 Long-Term Incentive Plan.

The following table summarizes our share issuances for the nine months ended June 30, 2009 and 2008.

Nine Months Ended June 30 2009 2008

| 319,732 | 294,071 |

Credit Facilities

Our short-term borrowing requirements are affected by the seasonal nature of the natural gas business. Changes in the price of natural gas and the amount of natural gas we need to supply to meet our customers needs could significantly affect our borrowing requirements. However, our short-term borrowings reach their highest levels in the winter months.

We finance our short-term borrowing requirements through a combination of a \$566.7 million commercial paper program and four committed revolving credit facilities with third-party lenders that provide approximately \$1.3 billion of working capital funding. As of June 30, 2009, the amount available to us under our credit facilities, net of outstanding letters of credit, was approximately \$905 million. These facilities are described in further detail in Note 5 to the unaudited condensed consolidated financial statements.

Shelf Registration

On March 23, 2009, we filed a registration statement with the Securities and Exchange Commission (SEC) to issue, from time to time, up to \$900 million in common stock and/or debt securities available for issuance, including approximately \$450 million of capacity carried over from our prior shelf registration statement filed with the SEC in December 2006. Immediately following the filing of the registration statement, we issued \$450 million of 8.50% senior notes due 2019 under the registration statement. Most of the net proceeds of approximately \$446 million were used to repay our \$400 million unsecured 4.00% senior notes on April 30, 2009.

As of June 30, 2009, we had \$450 million of availability remaining under the registration statement. However, due to certain restrictions placed by one state regulatory commission on our ability to issue securities under the registration statement, we now have remaining and available for issuance a total of approximately \$300 million of equity securities and \$150 million of subordinated debt securities.

Credit Ratings

Our credit ratings directly affect our ability to obtain short-term and long-term financing, in addition to the cost of such financing. In determining our credit ratings, the rating agencies consider a number of quantitative factors, including debt to total capitalization, operating cash flow relative to outstanding debt, operating cash flow coverage of interest and pension liabilities and funding status. In addition, the rating agencies consider qualitative factors such as consistency of our earnings over time, the quality of our management and business strategy, the risks associated with our regulated and nonregulated businesses and the regulatory structures that govern our rates in the states where we operate.

Our debt is rated by three rating agencies: Standard & Poor s Corporation (S&P), Moody s Investors Service (Moody s) and Fitch Ratings, Ltd. (Fitch). In December 2008, S&P upgraded our senior long-term debt credit rating from BBB to BBB+ and changed our rating outlook from positive to stable. S&P cited improved financial performance and rate case decisions that have increased cash flow as the key drivers for the upgrade. In January 2009, Moody s changed our rating outlook from stable to positive. In May 2009, Moody s upgraded the credit rating on our senior long-term debt from Baa3 to Baa2 and on our commercial paper from P-3 to P-2 and changed our rating outlook from positive to stable. Moody s stated that the key drivers for the upgrade were the completion of a major debt refinancing and the Company improving its alternate liquidity resources while maintaining solid financial performance. Fitch still maintains its stable outlook. Our current debt ratings are all considered investment grade and are as follows:

S&P Moody s Fitch

Unsecured senior long-term debt

Commercial paper

BBB+

Baa2

BBB+

Commercial paper

A-2

P-2

F-2

A significant degradation in our operating performance or a significant reduction in our liquidity caused by more limited access to the private and public credit markets as a result of the recent adverse global financial and credit conditions could trigger a negative change in our ratings outlook or even a reduction in

59

Table of Contents

our credit ratings by the three credit rating agencies. This would mean more limited access to the private and public credit markets and an increase in the costs of such borrowings.

A credit rating is not a recommendation to buy, sell or hold securities. The highest investment grade credit rating for S&P is AAA, Moody s is Aaa and Fitch is AAA. The lowest investment grade credit rating for S&P is BBB-, Moody s is Baa3 and Fitch is BBB-. Our credit ratings may be revised or withdrawn at any time by the rating agencies, and each rating should be evaluated independent of any other rating. There can be no assurance that a rating will remain in effect for any given period of time or that a rating will not be lowered, or withdrawn entirely, by a rating agency if, in its judgment, circumstances so warrant.

Debt Covenants

We were in compliance with all of our debt covenants as of June 30, 2009. Our debt covenants are described in greater detail in Note 5 to the unaudited condensed consolidated financial statements.

Capitalization

The following table presents our capitalization inclusive of short-term debt and the current portion of long-term debt as of June 30, 2009, September 30, 2008 and June 30, 2008:

| | June 30, 20 | June 30, 2 | 008 | | | |
|---------------------|--------------|------------|--------------|--------|--------------|--------|
| Short-term debt | \$ | % | \$ 350,542 | 7.7% | \$ 113,257 | 2.6% |
| Long-term debt | 2,169,526 | 49.7% | 2,120,577 | 46.9% | 2,120,788 | 48.9% |
| Shareholders equity | 2,191,520 | 50.3% | 2,052,492 | 45.4% | 2,105,407 | 48.5% |
| Total | \$ 4,361,046 | 100.0% | \$ 4,523,611 | 100.0% | \$ 4,339,452 | 100.0% |

Total debt as a percentage of total capitalization, including short-term debt, was 49.7 percent at June 30, 2009, 54.6 percent at September 30, 2008 and 51.5 percent at June 30, 2008. Our ratio of total debt to capitalization is typically greater during the winter heating season as we incur short-term debt to fund natural gas purchases and meet our working capital requirements. We intend to maintain our debt to capitalization ratio in a target range of 50 to 55 percent through cash flow generated from operations, continued issuance of new common stock under our Direct Stock Purchase Plan and Retirement Savings Plan and access to the equity capital markets.

Contractual Obligations and Commercial Commitments

Significant commercial commitments are described in Note 8 to the unaudited condensed consolidated financial statements. There were no significant changes in our contractual obligations and commercial commitments during the nine months ended June 30, 2009.

In February 2008, Atmos Pipeline and Storage, LLC announced plans to construct and operate a salt-cavern gas storage project in Franklin Parish, Louisiana. The project, located near several large interstate pipelines, includes the development of three 5 billion cubic feet (Bcf) caverns for a total of 15 Bcf of working gas storage, with six-turn injection and withdrawal capacity. Testing of the salt core samples was completed in March 2009 which showed favorable conditions for development. In June 2009, we received our 7C certification from the Federal Energy

Regulatory Commission (FERC) to construct and operate the project and expect approval of this request in June 2009. Finally, we have engaged the services of an investment bank to assist us in determining the optimal ownership and/or development alternatives for this project, which is still in process.

Risk Management Activities

We conduct risk management activities through our natural gas distribution, natural gas marketing and pipeline, storage and other segments. In our natural gas distribution segment, we use a combination of physical

60

Table of Contents

storage, fixed physical contracts and fixed financial contracts to reduce our exposure to unusually large winter-period gas price increases.

In our natural gas marketing and pipeline, storage and other segments, we manage our exposure to the risk of natural gas price changes and lock in our gross profit margin through a combination of storage and financial instruments, including futures, over-the-counter and exchange-traded options and swap contracts with counterparties. To the extent our inventory cost and actual sales and actual purchases do not correlate with the changes in the market indices we use in our hedges, we could experience ineffectiveness or the hedges may no longer meet the accounting requirements for hedge accounting, resulting in the financial instruments being treated as mark to market instruments through earnings.

The following table shows the components of the change in fair value of our natural gas distribution segment s financial instruments for the three and nine months ended June 30, 2009 and 2008:

| | , | Three Months Ended June 30 | | | Nine Months Ended June 30 | | | |
|--|----------------|-------------------------------|----|--------|------------------------------|-----------|----|----------|
| | | 2009 | | 2008 | | 2009 | | 2008 |
| | (In thousands) | | | | | | | |
| Fair value of contracts at beginning of period | \$ | (21,863) | \$ | 9,505 | \$ | (63,677) | \$ | (21,053) |
| Contracts realized/settled | | (844) | | 339 | | (101,840) | | (26,971) |
| Fair value of new contracts | | (885) | | 5,675 | | (4,891) | | 5,395 |
| Other changes in value | | 1,564 | | 21,847 | | 148,380 | | 79,995 |
| Fair value of contracts at end of period | \$ | (22,028) | \$ | 37,366 | \$ | (22,028) | \$ | 37,366 |

The fair value of our natural gas distribution segment s financial instruments at June 30, 2009 is presented below by time period and fair value source:

| | Fair Value of Contracts at June 30, 2009 Maturity in Years | | | | | | | |

Pension and Postretirement Benefits Obligations

Effective October 1, 2008, the Company adopted the requirement under SFAS 158, *Employers Accounting for Defined Benefit Pension and Other Postretirement Plans, an amendment of FASB Statements No. 87, 88, 106, and 132(R)*, that the measurement date used to determine our projected benefit and postretirement obligations and net periodic pension and postretirement costs must correspond to a fiscal year end. In accordance with the transition rules, the impact of changing the measurement date from June 30, 2008 to September 30, 2008 decreased retained earnings by \$7.8 million, net of tax, decreased the unrecognized actuarial loss by \$9.0 million and increased our postretirement liabilities by \$3.5 million.

Further, our fiscal 2009 costs were determined using a September 30, 2008 measurement date. As of September 30, 2008, interest and corporate bond rates utilized to determine our discount rates were significantly higher than the interest and corporate bond rates as of June 30, 2007, the measurement date for our fiscal 2008 net periodic cost. Accordingly, we increased our discount rate used to determine our fiscal 2009 pension and benefit costs to 7.57 percent. We maintained the expected return on our pension plan assets at 8.25 percent, despite the recent decline in the financial markets as we believe this rate reflects the average rate of expected earnings on plan assets that will fund our projected benefit obligation. Although the fair value of our plan assets has declined as the financial markets have declined, the impact of this decline is mitigated by the fact that assets are smoothed for purposes of determining net periodic pension cost. Accordingly, asset gains and losses are recognized over time as a component of net periodic pension and benefit costs for our Pension Account Plan, our largest funded plan. Therefore, our fiscal 2009 pension and postretirement medical costs were materially the same as in fiscal 2008.

For the nine months ended June 30, 2009 and 2008, our total net periodic pension and other benefits cost was \$36.2 million and \$35.9 million. Those costs relating to our natural gas distribution operations are recoverable through our gas distribution rates; however, a portion of these costs is capitalized into our distribution rate base. The remaining costs are recorded as a component of operation and maintenance expense.

In accordance with the Pension Protection Act of 2006 (PPA), we determined the funded status of our plans as of January 1, 2009. Based upon this valuation, we contributed \$21 million to our pension plans in June 2009. The need for this funding reflected the decline in the fair value of the plans assets resulting from the unfavorable market conditions experienced during the latter half of calendar year 2008. This contribution increased the level of our plan assets to achieve a desirable PPA funding threshold. With respect to our postretirement medical plans, we anticipate

contributing a total of approximately \$11 million to these plans during fiscal 2009.

The projected pension liability, future funding requirements and the amount of pension expense or income recognized for the plan are subject to change, depending upon the actuarial value of plan assets and the determination of future benefit obligations as of each subsequent actuarial calculation date. These amounts are impacted by actual investment returns, changes in interest rates and changes in the demographic composition of the participants in the plan.

62

OPERATING STATISTICS AND OTHER INFORMATION

The following tables present certain operating statistics for our natural gas distribution, regulated transmission and storage, natural gas marketing and pipeline, storage and other segments for the three and nine-month periods ended June 30, 2009 and 2008.

Natural Gas Distribution Sales and Statistical Data

Note to preceding tables:

RECENT ACCOUNTING DEVELOPMENTS

Recent accounting developments and their impact on our financial position, results of operations and cash flows are described in Note 2 to the unaudited condensed consolidated financial statements.

Item 3. Quantitative and Qualitative Disclosures About Market Risk

Information regarding our quantitative and qualitative disclosures about market risk are disclosed in Item 7A in our Annual Report on Form 10-K for the fiscal year ended September 30, 2008. During the nine months ended June 30, 2009, there were no material changes in our quantitative and qualitative disclosures about market risk.

⁽¹⁾ Sales volumes and revenues reflect segment operations, including intercompany sales and transportation amounts.

Item 4. Controls and Procedures

Management s Evaluation of Disclosure Controls and Procedures

We carried out an evaluation, under the supervision and with the participation of our management, including our principal executive officer and principal financial officer, of the effectiveness of the Company s disclosure controls and procedures, as such term is defined in Rules 13a-15(e) and 15d-15(e) under the Securities Exchange Act of 1934, as amended (Exchange Act). Based on this evaluation, the Company s principal executive officer and principal financial officer have concluded that the Company s disclosure controls and procedures were effective as of June 30, 2009 to provide reasonable assurance that information

64

Table of Contents

required to be disclosed by us, including our consolidated entities, in the reports that we file or submit under the Exchange Act is recorded, processed, summarized, and reported within the time periods specified by the SEC s rules and forms, including a reasonable level of assurance that such information is accumulated and communicated to our management, including our principal executive and principal financial officers, as appropriate to allow timely decisions regarding required disclosure.

Changes in Internal Control over Financial Reporting

We did not make any changes in our internal control over financial reporting (as defined in Rules 13a-15(f) and 15d-15(f) under the Exchange Act) during the third quarter of the fiscal year ended September 30, 2009 that have materially affected, or are reasonably likely to materially affect, our internal control over financial reporting.

PART II. OTHER INFORMATION

Item 1. Legal Proceedings

During the nine months ended June 30, 2009, except as noted in Note 8 to the unaudited condensed consolidated financial statements, there were no material changes in the status of the litigation and other matters that were disclosed in Note 12 to our Annual Report on Form 10-K for the fiscal year ended September 30, 2008. We continue to believe that the final outcome of such litigation and other matters or claims will not have a material adverse effect on our financial condition, results of operations or cash flows.

Item 6. Exhibits

A list of exhibits required by Item 601 of Regulation S-K and filed as part of this report is set forth in the Exhibits Index, which immediately precedes such exhibits.
